

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. PUBLISHERS' NOTE ON THE COMPLETED WORK

WITH the publication of the Atlas which is incorporated in the present edition The Century Dictionary and Cyclopedia was brought to completion. As the Cyclopedia of Names grew out of the Dictionary and supplemented it on its encyclopedic side, so the Atlas grew out of the Cyclopedia, and serves as an extension of its geographical material. Each of these works deals with a different part of the great field of words,—common words and names,—while the three, in their unity, constitute a work of reference which practically covers the whole of that field. The total number of words and names defined or otherwise described in the completed work is about 450,000.

The special features of each of these several parts of the book are described in the Prefaces which will be found in the first, ninth, and tenth volumes. It need only be said that the definitions of the common words of the language are for the most part stated encyclopedically, with a vast amount of technical, historical, and practical information in addition to an unrivaled wealth of purely philological material; that the same encyclopedic method is applied to proper names—names of persons, places, characters in fiction, books—in short, of everything to which a name is given; and that in the Atlas geographical names, and much besides, are exhibited with a completeness and serviceableness seldom equaled. Of The Century Dictionary and Cyclopedia as a whole, therefore, it may be said that it is in its own field the most complete presentation of human knowledge—scientific, historical, and practical—that exists.

Moreover, the method of distributing this encyclopedic material under a large number of headings, which has been followed throughout, makes each item of this great store of information far more accessible than in works in which a different system is adopted.

The first edition of The Century Dictionary was completed in 1891, that of The Century Cyclopedia of Names in 1894, and that of the Atlas in 1897. During the years that have elapsed since those dates each of these works has been subjected to repeated careful revisions, in order to include the latest information, and the results of this scrutiny are comprised in this edition.

KEY TO PRONUNCIATION.

a as in fat, man, pang.
 ā as in fate, mane, dale.
 ă as in far, father, guard.
 ʌ as in fall, talk, naught.
 ʌ as in ask, fast, ant.
 ǣ as in fare, hair, bear.

e as in met, pen, bless.
 ē as in mete, meet, meat.
 ɛ as in her, fern, heard.

i as in pin, it, biscuit.
 ī as in pine, fight, file.

o as in not, on, frog.
 ō as in note, poke, floor.
 ɔ as in move, spoon, room.
 ɒ as in nor, song, off.

u as in tub, son, blood.
 ū as in mute, acute, few (also new,
 tube, duty: see Preface, pp. ix, x).
 ũ as in pull, book, could.
 ü German ü, French u.

oi as in oil, joint, boy.
 ou as in pound, proud, now.

A single dot under a vowel in an unaccented syllable indicates its abbreviation and lightening, without absolute loss of its distinctive quality. See Preface, p. xi. Thus:

ḡ as in prelate, courage, captain.
 ḡ as in ablegate, episcopal.
 ḡ as in abrogate, eulogy, democrat.
 ḡ as in singular, education.

A double dot under a vowel in an unaccented syllable indicates that, even in the mouths of the best speakers, its sound is variable to, and in ordinary utterance actually becomes, the short u-sound (of but, pun, etc.). See Preface, p. xi. Thus:

ṡ as in errant, republican.
 ṡ as in prudent, difference.
 ṡ as in charity, density.
 ṡ as in valor, actor, idiot.

ṡ as in Persia, peninsula.
 ḡ as in the book.
 ḡ as in nature, feature.

A mark (˘) under the consonants *t*, *d*, *s*, *z* indicates that they in like manner are variable to *ch*, *j*, *sh*, *zh*. Thus:

ṡ as in nature, adventure.
 ḡ as in arduous, education.
 ḡ as in pressure.
 ḡ as in seizure.

th as in thin.
 ʰh as in then.
 ʰh as in German ach, Scotch loch.
 ̃n French nasalizing n, as in ton, en.
 ly (in French words) French liquid (mouillé) l.
 ' denotes a primary, ' a secondary accent. (A secondary accent is not marked if at its regular interval of two syllables from the primary, or from another secondary.)

SIGNS.

< read *from*; i. e., derived from.
 > read *whence*; i. e., from which is derived.
 + read *and*; i. e., compounded with, or with suffix.
 = read *cognate with*; i. e., etymologically parallel with.

✓ read *root*.
 * read *theoretical* or *alleged*; i. e., theoretically assumed, or asserted but unverified, form.
 † read *obsolete*.

SPECIAL EXPLANATIONS.

A superior figure placed after a title-word indicates that the word so marked is distinct etymologically from other words, following or preceding it, spelled in the same manner and marked with different numbers. Thus:

back¹ (bak), *n.* The posterior part, etc.
 back¹ (bak), *a.* Lying or being behind, etc.
 back¹ (bak), *v.* To furnish with a back, etc.
 back¹ (bak), *adv.* Behind, etc.
 back² (bak), *n.* The earlier form of *bat*.
 back³ (bak), *n.* A large flat-bottomed boat, etc.

Various abbreviations have been used in the credits to the quotations, as "No." for *number*, "st." for *stanza*, "p." for *page*, "l." for *line*, ¶ for *paragraph*, "fol." for *folio*. The method used in indicating the subdivisions of books will be understood by reference to the following plan:

Section only § 5.
 Chapter only xiv.
 Canto only xiv.
 Book only iii.

Book and chapter
 Part and chapter
 Book and line
 Book and page iii. 10.
 Act and scene
 Chapter and verse
 No. and page
 Volume and page II. 34.
 Volume and chapter IV. iv.
 Part, book, and chapter II. iv. 12.
 Part, canto, and stanza II. iv. 12.
 Chapter and section or ¶ vii. § or ¶ 3.
 Volume, part, and section or ¶ . I. i. § or ¶ 6.
 Book, chapter, and section or ¶ . I. i. § or ¶ 6.

Different grammatical phases of the same word are grouped under one head, and distinguished by the Roman numerals I., II., III., etc. This applies to transitive and intransitive uses of the same verb, to adjectives used also as nouns, to nouns used also as adjectives, to adverbs used also as prepositions or conjunctions, etc.

The capitalizing and italicizing of certain or all of the words in a synonym-list indicates that the words so distinguished are discrimi-

nated in the text immediately following, or under the title referred to.

The figures by which the synonym-lists are sometimes divided indicate the senses or definitions with which they are connected.

The title-words begin with a small (lower-case) letter, or with a capital, according to usage. When usage differs, in this matter, with the different senses of a word, the abbreviations [*cap.*] for "capital" and [*l. c.*] for "lower-case" are used to indicate this variation.

The difference observed in regard to the capitalizing of the second element in zoological and botanical terms is in accordance with the existing usage in the two sciences. Thus, in zoology, in a scientific name consisting of two words the second of which is derived from a proper name, only the first would be capitalized. But a name of similar derivation in botany would have the second element also capitalized.

The names of zoological and botanical classes, orders, families, genera, etc., have been uniformly italicized, in accordance with the present usage of scientific writers.

pharmacological (fär'ma-kō-loj'i-kal), *a.* [*<* *pharmacology* + *-ic* + *al*.] Of or pertaining to pharmacology: as, *pharmacological* experiments.

Pharmacological considerations certainly render the practical identity of the two solutions very probable.

pharmacopœia (fär'ma-kō-pē'ä), *n.* [= *F. pharmacopée* = *Sp. It. farmacopea* = *Pg. farmacopea*, *pharmacopœia*, *<* *NL. pharmacopœia*, *<* *Gr. φαρμακοποιία*, the art of preparing drugs, *<* *φάρμακος*, one who prepares drugs, *<* *φάρμακον*, a drug, medicine, + *ποιέω*, make.] 1. A book of formulæ or directions for the preparation, etc., of medicines, generally published by authority. The United States Pharmacopœia is revised decennially by delegates in national convention, not more than three each from incorporated medical colleges, incorporated colleges of pharmacy, incorporated pharmaceutical societies, the American Medical Association, and the American Pharmaceutical Association, and not exceeding three each appointed by the surgeon-general of the army, the surgeon-general of the navy, and the surgeon-general of the Marine Hospital. This convention met last in Washington in May, 1890.

2t. A chemical laboratory.

pharmacopœial (fär'ma-kō-pē'äl), *a.* [*<* *pharmacopœia* + *-al*.] Of or pertaining to a pharmacopœia; made or prepared according to the formula of the pharmacopœia: as, *pharmacopœial* preparations; a *pharmacopœial* solution.

pharmacopolist (fär'ma-kop'ō-list), *n.* [= *Pg. farmacopolista*; cf. *F. pharmacopole* = *Sp. farmacopola* = *Pg. farmacopola* = *It. farmacopola*, *<* *L. pharmacopola*, *<* *Gr. φαρμακοπώλης*, one who sells drugs, an apothecary, *<* *φάρμακον*, a drug, + *πώλειν*, sell.] A dealer in drugs or medicines; an apothecary.

No *pharmacopolist* could sell one grain of hellebore.

Sterne, Sentimental Journey.

The *pharmacopolist* . . . compounds the drugs after the order of the mediciner.

pharmacosiderite (fär'ma-kō-sid'ē-rit), *n.* [= *F. pharmacosiderite*, *<* *Gr. φάρμακον*, a drug, + *σίδηρος*, iron: see *siderite*.] A hydrous arseniate of iron: same as *cubé-ore*.

pharmacum (fär'ma-kum), *n.* Same as *pharmakon*.

pharmacy (fär'ma-si), *n.*; pl. *pharmacies* (-siz). [*<* *ME. fermacye*, *<* *OF. farmacie*, *F. pharmacie* = *Sp. It. farmacia* = *Pg. farmacia*, *<* *Gr. φαρμακία*, the use of drugs or medicines, pharmacy, *<* *φάρμακον*, use drugs, *<* *φάρμακον*, a drug, medicine: see *pharmacology*.] 1. The art or practice of preparing, preserving, and compounding medicines, and of dispensing them according to the formulæ or prescriptions of medical practitioners.

Each dose the goddess weighs with watchful eye;

So nice her art in impious pharmacy!

Garth, tr. of Ovid's *Metamorph.*, xiv.

Their pain soft arts of pharmacy can ease,

Thy breast alone no lenitives appease.

Pope, *Iliad*, xvi. 88.

2. The occupation of an apothecary or pharmaceutical chemist. — 3. A place where medicines are prepared and dispensed; a drug-store; an apothecary's shop. — *Pharmacy Act*, an English statute of 1868 (21 and 22 Vict., c. 121),

Pharmacy Jar, 17th century.

amended 1869 (32 and 33 Vict., c. 117), regulating the sale of poisons. — **Pharmacy jar**, a name given to vases of majolica and like wares made for use in dispensaries of convents and similar pharmaceutical establishments in Italy, the south of France, and elsewhere, and painted with the name of the drug for which the jar was intended. Vases of the form called *albarello* were used for this purpose, and a pitcher-shaped jar with handle and spout was also common. See cut in preceding column.

Pharnaceum (fär'nä-sē'um), *n.* [*<* *NL. (Linnaeus, 1753), cf. L. pharnaceon*, *<* *Gr. φάρνακειον*, a certain plant, a species of panax, so named, according to Pliny, from Pharnaces II. (*Gr. Φαρνάκης*), son of Mithridates the Great, and King of Pontus or of Bosphorus.] An apetalous genus of the order *Ficoideæ* and tribe *Mollugineæ*, characterized by the lacerate or lobed stipules, five sepals, and stamens, styles, and carpels usually three to five. The 16 species are mainly South African. They are low herbs, erect or spreading, with alternate or almost whorled leaves, often bristle-bearing at the apex, and clusters of small white, greenish, or purplish flowers. Some species are cultivated for the flowers, and *P. acutum*, the Longwood samphire of St. Helena, yields an acid salad from its crowded succulent leaves.

pharo, *n.* See *faro*.

pharot, *n.* Same as *pharos*.

pharoht, *n.* [*<* *Ir. faram*, noise (f).] A shout or war-cry of Irish soldiers. *Davies*.

That barbarous *Pharoh* and outcry of the Soldiers, which with great straining of their voice they use to set up when they joine battalle. *Holland*, tr. of Camden, ii. 75.

pharology (fä-rol'ō-ji), *n.* [*<* *Gr. φάρος* (see *pharos*) + *-λογία*, *<* *λέγω*, say: see *-ology*.] The art or science of directing the course of ships by means of light-signals from the shore.

Pharomacrus (fä-rom'ä-krus), *n.* [*<* *NL. (De La Llave, 1832), <* *Gr. φάρος* (1), a lighthouse, + *μακρός*, long.] A genus of trogons: same as *Calurus*, and of prior date. *P. mocino* is the paradise-trogon. See cut under *trogon*.

pharos (fä'ros), *n.* [Also *phare*, *<* *F. phare* = *Sp. It. faro* = *Pg. pharo*; *<* *L. pharos*, *pharus*, *<* *Gr. φάρος*, a lighthouse, *<* *φάρος*, Pharos, an island in the Bay of Alexandria, famous for its lighthouse.] 1. A lighthouse or tower which anciently stood on the isle of Pharos, at the entrance to the port of Alexandria.

The famous *Pharos*, or light-house, was on a rock at the east end of the island, that was on every side encompass'd with water, and so in a manner a small separate island.

Poocoe, Description of the East, I. 2.

Hence — 2. Any lighthouse for the direction of seamen; a watch-tower; a beacon.

So high nevertheless it (the Peak of Tenerife) is as in serene weather it is seen 120 English miles, which some double; serving as an excellent *pharos*.

Sir T. Herbert, Travels in Africa, p. 3.

We pass'd over to the *Pharos*, or Lantern, a towre of very greates height.

Bodlyn, Diary, Oct. 17, 1644.

Here the college, which guided them all till they were ready to launch on the ocean of life, still stands like a *pharos* founded on a sea-girt rock.

Everett, Orations, II. 171.

Pharus (fä'rus), *n.* [*<* *NL.*, *<* *Gr. φάρος*, a wide cloak or mantle.] 1. In *conch.*, the typical genus of *Pharidae*. *J. E. Gray*, 1840. — 2. In *entom.*, a genus of coleopterous insects of the family *Coccinellidæ*, or ladybirds. Only a few species are known, one Tasmanian and the rest African. *Mulsant*, 1851. — 3. A genus of opilionine arachnidans. *Simon*, 1879. — 4. An anomalous genus of grasses, classed with the tribe *Oryzæ*, and characterized by monœcious panicles with spikelets in pairs, one of them pistillate and sessile, the other much smaller, staminate, and pedicelled. The 5 species are found from Florida and the West Indies to Brazil. They are stout grasses, bearing a loose and ample terminal panicle with long slender branches, and are remarkable for their large leaves, which are somewhat feather-veined, unlike those of other grasses, and are often borne reversed on their long-exserted twisted leafstalks. *P. latifolius* is the wild oat of Jamaica; its leaves, which reach 3 inches broad and 8 long, are in use for wrapping small articles, etc. *Linnaeus*, 1767.

pharyngalgia (fä-ring-gal'ji-ä), *n.* [*<* *NL.*, *<* *Gr. φάρυγξ* (*φάρυγξ*), throat (see *pharynx*), + *άλγος*, pain.] Pain in the pharynx.

Pharyngea (fä-rin'jē-ä), *n.* pl. [*<* *NL.*, *<* *Gr. φάρυγξ* (*φάρυγξ*), the throat: see *pharynx*.] A group of planarians or *Rhabdocela* having a pharynx: distinguished from *Apharyngea*.

pharyngeal (fä-rin'jē-äl), *a.* and *n.* [*<* *NL. pharynx* (*pharynx*), *pharynx*, + *-eal*.] 1. *a.* Of or pertaining to the pharynx; entering into the structure of the pharynx: as, a *pharyngeal* artery, vein, nerve, muscle, gland, etc. — 2. Having a pharynx; specifically, of or pertaining to the *Pharyngea*: as, a *pharyngeal* planarian. — 3. Having ankylous pharyngeal bones, as a fish; pharyngognathous. — **Pharyngeal aponeurosis**, the connective-tissue layer of the walls of the pharynx, external to the mucous membrane. — **Pharyngeal arches**,

Same as *postoral arches*. — **Pharyngeal artery**. (*a.*) *Ascending*, the smallest branch of the external carotid, supplying the prevertebral muscles, the constrictors of the pharynx, the elevator and tensor muscles of the palate, the tonsil, and the Eustachian tube. (*b.*) *Superior*. Same as *pterygopalatine artery* (which see, under *pterygopalatine*). — **Pharyngeal bones**, the bones behind the last branchial arch in fishes, generally in a pair below (called *hypopharyngeals*) and in one or four pairs above (called *epipharyngeals*). — **Pharyngeal bursa**, a mucous crypt in the mid-line under the sphenoid bone, just behind the vomer. *Medical News*, Sept., 1889, p. 254. — **Pharyngeal clefts**. Same as *pharyngeal slits*. — **Pharyngeal fascia**, the fascia investing the wall of the pharynx. — **Pharyngeal fishes**, the *Pharyngognathæ*. — **Pharyngeal ganglion**. See *ganglion*. — **Pharyngeal glands**, racemose mucous glands, found everywhere in the submucous tissue of the pharynx, but especially numerous at the upper part, around the orifices of the Eustachian tubes. — **Pharyngeal jaws**. (*a.*) Jaw-like organs in the pharynx, as in certain nereid worms. (*b.*) The pharyngeal bones when they have a jaw-like form or function. — **Pharyngeal nerves**, branches of the vagus, glossopharyngeal, sympathetic, and Meckel's ganglion. The first three unite to form the pharyngeal plexus; the last, after passing through the pterygopalatine canal, is distributed chiefly to the mucous membrane of the pharynx. — **Pharyngeal plexus**. (*a.*) A plexus of nerves formed by the branches of the vagus, sympathetic, and glossopharyngeal, and supplying the muscles and mucous membranes of the pharynx. (*b.*) A plexus of veins on the outer surface of the pharynx. — **Pharyngeal sac**, a sac or vessel in the head of a butterfly, at the base of the proboscis or spiral tongue, from which it is separated by a valve. By the alternate contraction and expansion of this sac the insect is able to suck up nectar or other liquids. — **Pharyngeal slits**, the postoral visceral clefts or gill-slits which any vertebrate or chordate animal may possess, to the number of not more than eight, temporarily or permanently. The whole tendency is to the reduction in number of these slits in ascending the vertebrate scale, and to their impermanence in the development of the embryos of the higher vertebrates. In adult reptiles, birds, and mammals they have all disappeared, excepting the trace of the first one, which persists as the auditory passage. In batrachians their progressive loss is seen in the transition from gilled tadpoles to the adults with lungs. In fishes and lower vertebrates than fishes more or fewer persist as ordinary gill-slits or branchial apertures. Also called *visceral clefts*, when the structures which separate the slits on each side are known as *visceral arches*. — **Pharyngeal spine**. Same as *pharyngeal tubercle*. — **Pharyngeal teeth**, the teeth on the pharyngeal bones, especially on the lower pharyngeals or hypopharyngeals. They are much used in the taxonomy of the cyprinoid fishes. — **Pharyngeal tubercle**, a small elevation near the middle of the under surface of the basilar process of the occipital bone, for attachment of the fibrous raphe of the pharynx. — **Pharyngeal veins**, tributaries to the internal jugular vein from the pharyngeal plexus.

II. *n.* A structure which enters into the composition of the pharynx: as, the ascending *pharyngeal*, a branch of the external carotid artery, given off at or near the origin of the latter; the ankylous *pharyngeals* (bones) of some fishes. **pharyngectomy** (fä-rin-jek'tō-mi), *n.* [*<* *Gr. φάρυγξ* (*φάρυγξ*), throat (see *pharynx*), + *ἐκτομή*, a cutting out.] The excision of a portion of the pharynx.

pharynges, *n.* New Latin plural of *pharynx*. **pharyngeus** (fä-rin-jē'us), *n.*; pl. *pharynges* (-i). [*<* *NL.*, *<* *pharynx* (*pharynx*), *pharynx*.] A pharyngeal muscle. There are several such, distinguished by a qualifying word, generally in composition: as, *stylopharyngeus*, *palatopharyngeus*. See the compounds. **pharyngismus** (fä-rin-jiz'mus), *n.* [*<* *NL.*, *<* *pharynx* (*pharynx*), *pharynx*.] Spasm of the muscles of the pharynx.

pharyngitis (fä-rin-jit'ik), *a.* [*<* *pharyngitis* + *-ic*.] Of, pertaining to, or affected with pharyngitis. **pharyngitis** (fä-rin-jit'is), *n.* [*<* *NL.*, *<* *pharynx* (*pharynx*), *pharynx*, + *-itis*.] Inflammation of the mucous membrane of the pharynx. — **Granular, follicular, or chronic pharyngitis**. See *granular*. **pharyngobranch** (fä-ring-gō-brang'k), *a.* and *n.* I. *a.* Of or pertaining to the *Pharyngobranchii*. II. *n.* A member of the *Pharyngobranchii*.

Pharyngobranchia (fä-ring-gō-brang'ki-ä), *n.* pl. [*<* *NL.*] Same as *Pharyngobranchii*. **pharyngobranchiate** (fä-ring-gō-brang'ki-ät), *a.* [*<* *Pharyngobranchia* + *-ate*.] Same as *pharyngobranch*.

Pharyngobranchii (fä-ring-gō-brang'ki-i), *n.* pl. [*<* *NL.*, *<* *Gr. φάρυγξ* (*φάρυγξ*), throat (see *pharynx*), + *βράγχια*, gills.] An order or class of acranial fish-like vertebrates, so called from the pharynx being perforated at the sides for the branchial apertures. The group was originally constituted as an order of fishes; the name is synonymous with *Cirrostromi*, *Leptocardi*, *Entomocrania*, and *Acrania*. It includes only the lancelets. See *Branchiostoma* and *lancelet*, and cut on following page.

pharyngodynia (fä-ring-gō-din'i-ä), *n.* [*<* *NL.*, *<* *Gr. φάρυγξ* (*φάρυγξ*), throat, + *δύσιν*, pain.] Pain in the pharynx. **pharyngo-esophageal** (fä-ring-gō-ē-sō-fä-jē-äl), *a.* [*<* *pharyngo-esophagus* + *-eal*.] Of or pertaining to the pharynx and the esophagus. **pharyngo-esophagus** (fä-ring-gō-ē-sof'ä-gus), *n.* [*<* *NL.*, *<* *Gr. φάρυγξ* (*φάρυγξ*), throat (see *pharynx*), + *οισοφάγος*, esophagus: see *esophagus*.]

Anterior End of Body of Lancelet (*Branchiostoma* or *Amphioxus*), representing the *Pharyngobranchii*.

Ch, notochord; My, myelon, or spinal cord; a, position of olfactory (N) sac; b, optic nerve; c, fifth (V) pair of nerves; d, spinal nerves; e, representatives of neural spines or of fin-rays; f, g, oral skeleton. (The heavy lighter and darker shading represents muscular segments, or myotomes, and their interspaces.)

gus.] A gullet extended to a mouth; a structure representing or consisting of a pharynx and an esophagus combined.

pharyngoglossal (fā-ring-gō-glos'al), *a.* [*Gr. φάρυγξ (pharynx), throat, + γλῶσσα, tongue; see glossal.*] Of or pertaining to the pharynx and the tongue; glossopharyngeal: as, a *pharyngoglossal nerve*. *Dunglison.*

pharyngognath (fā-ring-gog-nath), *a.* and *n.* I. *a.* Of or pertaining to the *Pharyngognathi*.

II. *n.* A member of the *Pharyngognathi*.

Pharyngognathi (far-ing-gog'nā-thī), *n. pl.* [*NL., < Gr. φάρυγξ (pharynx), throat, + γνάθος, jaw.*] In J. Müller's classification, an order of teleost fishes, having the inferior pharyngeals ankylosed and the pneumatic duct closed. It embraced both spine-rayed and soft-rayed fishes. In Günther's system the group was similarly constituted, and contained the families *Labridae*, *Embiolidae*, *Chromidae*, and *Pomacentridae*. In Cope's system the *Pharyngognathi* are an order of physoclistous fishes with the cranium normal, bones of the jaws distinct, third superior pharyngeal bone enlarged and articulating with the cranium, and inferior pharyngeals coalesced. It includes the same fishes as Günther's group.

pharyngognathous (far-ing-gog'nā-thus), *a.* [*< pharyngognath + -ous.*] Same as *pharyngognath*.

pharyngographic (fā-ring-gō-graf'ik), *a.* [*< pharyngograph + -ic.*] Descriptive of the pharynx; and of or pertaining to pharyngography.

pharyngography (far-ing-gog'ra-fī), *n.* [= *F. pharyngographie*, *< Gr. φάρυγξ (pharynx), throat, + γραφία, < γράφω, write.*] An anatomical description of the pharynx.

pharyngolaryngeal (fā-ring-gō-lā-rin'jē-al), *a.* [*< Gr. φάρυγξ (pharynx), throat, + λάρυγξ (larynx); see laryngeal.*] Of or pertaining to both the pharynx and the larynx: as, a *pharyngolaryngeal membrane*.—**Pharyngolaryngeal cavity.** (a) The lower part of the pharynx, into which the larynx opens, separated from the pharyngo-oral cavity by a horizontal plane passing through the tips of the hyoid cornua. (b) The part of the pharynx lying below the soft palate in deglutition. See cut under *mouth*.

pharyngological (fā-ring-gō-loj'i-kal), *a.* [*< pharyngology + -ic-al.*] Of or pertaining to pharyngology.

pharyngology (far-ing-gol'ō-jī), *n.* [*< Gr. φάρυγξ (pharynx), throat, + λογία, < λέγειν, speak; see -ology.*] That part of anatomy which treats of the pharynx.

pharyngomycosis (fā-ring-gō-mī-kō'sis), *n.* [*NL., < Gr. φάρυγξ (pharynx), throat, + NL. mycosis, q. v.*] The growth of fungi, usually lepto-thrix, in the pharynx.

pharyngonasal (fā-ring-gō-nā-zal), *a.* [*< Gr. φάρυγξ (pharynx), throat, + L. nasus, nose; see nasal.*] Of or pertaining to both the pharynx and the nose.—**Pharyngonasal cavity,** the uppermost part of the pharynx, separated from that below by a horizontal plane passing through the base of the uvula, or again defined as that part above the soft palate during deglutition; the nasopharynx. See cut under *mouth*.

pharyngo-oral (fā-ring-gō-ō'al), *a.* [*< Gr. φάρυγξ (pharynx), throat, + L. os (or-), mouth; see oral.*] Of or pertaining to both the pharynx and the mouth; oropharyngeal.—**Pharyngo-oral cavity,** the middle part of the pharynx, that into which the mouth opens; the oropharynx.

pharyngopalatinus (fā-ring-gō-pal-ā-tī'nus), *n.*; *pl. pharyngopalatini* (-nī). [*NL., < Gr. φάρυγξ (pharynx), throat, + L. palatum, palate; see palatine.*] Same as *palatopharyngeus*.

pharyngopathia (fā-ring-gō-path'i-ā), *n.* [*NL., < Gr. φάρυγξ (pharynx), throat, + πάθος, a suffering.*] Disease of the pharynx.

pharyngoplegia (fā-ring-gō-plē'ji-ā), *n.* [*NL., < Gr. φάρυγξ (pharynx), throat, + πλῆγή, a blow,*

stroke.] Paralysis of the muscles of the pharynx.

pharyngopleural (fā-ring-gō-plō'al), *a.* [*< Gr. φάρυγξ (pharynx), throat (see pharynx), + πλευρά, a rib; see pleural.*] Pertaining or common to the pharynx and to the lateral body-walls: as, "the fluted *pharyngo-pleural membrane*" [of a lancelet], *Encyc. Brit.*, XXIV. 184.

Pharyngopneusta (fā-ring-gop-nūs'tā), *n. pl.* [*NL., < Gr. φάρυγξ (pharynx), throat, + πνευστός (cf. πνευστικός), verbal adj. of πνέειν, breathe.*] A superordinal division proposed by Huxley to be established for the reception of the tunicates or ascidians and the *Enteropneusta* (*Balanoglossus*).

pharyngopneustal (fā-ring-gop-nūs'tal), *a.* [*< Pharyngopneusta + -al.*] Of or pertaining to the *Pharyngopneusta*.—**Pharyngopneustal series,** a name proposed by Huxley in 1877 for the series of animals constituting the *Pharyngopneusta*.

pharyngorhinitis (fā-ring-gō-ri-nī'tis), *n.* [*NL., < Gr. φάρυγξ (pharynx), throat, + ρίς (riv-), nose, + -itis.*] Inflammation of the pharynx and the mucous membrane of the nose.

pharyngorhinology (fā-ring-gō-ri-nōs'kō-pi), *n.* [*< Gr. φάρυγξ (pharynx), throat, + ρίς (riv-), nose, + σκοπεῖν, view.*] Examination of the posterior nares and adjacent parts of the pharynx with a rhinoscopic mirror.

pharyngoscope (fā-ring-gō-skōp), *n.* [*< Gr. φάρυγξ (pharynx), throat, + σκοπεῖν, view.*] An instrument for inspecting the pharynx.

pharyngoscopy (fā-ring-gō-skō-pi), *n.* [*< Gr. φάρυγξ (pharynx), throat, + σκοπεῖν, view.*] Inspection of the pharynx.

pharyngospasmus (fā-ring-gō-spaz'mus), *n.* [*< Gr. φάρυγξ (pharynx), throat, + σπασμός, spasm.*] Spasm of the pharynx.

pharyngotomy (far-ing-got'ō-mi), *n.* [= *F. pharyngotomie* = *Sp. faringotomia* = *Pg. pharyngotomia* = *It. faringotomia*, *< Gr. φάρυγξ (pharynx), throat (see pharynx), + -τομία, < τέμνειν, τμήν, cut.*] In *surg.*, incision into the pharynx.

pharynx (far'ingks), *n.*; *pl. pharynges* (fā-rin'jēz), rarely *pharynxes* (far'ingks-ēz). [= *F. pharynx* = *Sp. It. faringe* = *Pg. pharynx*, *pharynge*, *< NL. pharynx*, the pharynx, *< Gr. φάρυγξ, the throat; technically the joint opening of the gullet and the windpipe, but also applied to the windpipe and the esophagus; cf. φάραγξ, a cleft; < √ φάρ, bore, in φάρον, plow.*] 1. A musculo-membranous pouch situated at the back of the nasal cavities, mouth, and larynx, and extending from the base of the skull to the cricoid cartilage. It is continuous below with the esophagus, and communicates above with the nasal passages, Eustachian tubes, mouth, and larynx. It may be conveniently considered to be divided into the pharyngonasal, pharyngo-oral, and pharyngolaryngeal cavities. The pharynx has also been divided into two parts, called *nasopharynx* and *oropharynx*. See cuts under *Branchiostoma*, *mouth*, and *larynx*.

2. In invertebrates, some tubular or infundibuliform beginning of the alimentary canal or continuation of the oral aperture. A structure to which the name applies is very commonly found in invertebrates, even among those of microscopic size, as rotifers and infusorians. See cut under *Oxyuris*, *Appendicularia*, and *Arcticia*.—**Branchial pharynx.** See *branchial*.—**Constrictor pharynx**, superior, medius, inferior. See *constrictor*, and cut under *muscle*.—**Levator or dilator pharynx.** Same as *stylopharyngeus*.—**Nasal pharynx,** the pharyngonasal cavity; the nasopharynx.—**Oral pharynx,** the pharyngo-oral cavity; the oropharynx.

Phascaceæ (fas-kā'sē-ē), *n. pl.* [*NL., < Phascum + -acæ.*] An order of bryaceous mosses, named from the genus *Phascum*. They are very small soft plants, with loosely areolate leaves and globular, immersed, subsessile or short-pedicellate capsules, which rupture irregularly across the middle for the discharge of the spores, there being no deciduous operculum as in most mosses.

Phasceæ (fas'ē-ē), *n. pl.* [*NL., < Phascum + -æ.*] Same as *Phascaceæ*.

Phascogale (fas-kog'a-lē), *n.* [*NL. (Temminck, 1827), contr. for "Phascogale, < Gr. φάσκωλος, a leathern bag, + γαλή, a weasel.*] A genus of small insectivorous and carnivorous marsupial mammals of the family *Dasyuridae*, inhabiting the whole of the Australian region. They are of the size of a rat or less, are of arboreal habits, and have a pointed snout, rounded ears, and the fore feet five-toed, the hind feet being variable in this respect. There is usually one more premolar above and below on each side than in the typical *dasyures*, making a total of 46 instead of 42. There are several species, among them *P. penicillata*, the largest one, with a long bushy tail, somewhat like a squirrel. Some differ in details of form from others, in consequence of which the genera *Chalcoceros*, *Antechinus*, *Antechinus*, and *Podabrus* have been detached from *Phascogale* proper. See cut in preceding column.

Phascogalinæ (fas-kog-a-li'nē), *n. pl.* [*NL., < Phascogale + -inæ.*] A subfamily of *Dasyuridae* based on the genus *Phascogale*.

Phascolarctidae (fas-kō-lārk'ti-dē), *n. pl.* [*NL., < Phascolarctos + -idae.*] The *Phascolarctineæ*, raised to the rank of a family.

Phascolarctinae (fas'kō-lārk-ti'nē), *n. pl.* [*NL., < Phascolarctos + -inæ.*] A subfamily of *Phalangistidae* based on the genus *Phascolarctos*.

Phascolarctos (fas-kō-lārk'tos), *n.* [*NL. (De Blainville, 1816), < Gr. φάσκωλος, a leathern bag, + ἄρκτος, bear.*] A genus of *Phalangistidae*, type of the subfamily *Phascolarctineæ*, having cheek-pouches, 30 teeth, no lower canines, only 11 dorsal vertebrae and as many pairs of ribs, no external tail, the tongue not peculiar, a cardiac gland in the stomach, and a very long cæcum. It contains the koala or native bear of Australia, *P. cinereus*. See cut under *koala*.

Phascolomyidae (fas-kō-lō-mī'i-dē), *n. pl.* [*NL., < Phascolomys + -idae.*] A family of diprotodont marsupial mammals; the wombats. They have two incisors above and two below, as in rodents, large, scalpriform, enameled in front only; no canines; all the teeth with persistent pulps; the hind feet with four subequal, somewhat syndactylous toes, and hallux rudimentary; the fore feet five-toed; the tail rudimentary; the stomach simple with a cardiac gland; and a short cæcum with a vermiform appendage. There is but one genus, *Phascolomys*.

Phascolomys (fas-kol'ō-mis), *n.* [*NL., < Gr. φάσκωλος, a leathern bag, + μῦς, mouse.*] The typical genus of the family *Phascolomyidae*, including the wombats. They are inoffensive terrestrial and fossorial herbivorous animals of the Australian

region. The genus has two sections—one containing the common and broad-nosed wombats, *P. wombat* and *P. platyrhinus*, the other the hairy-nosed wombat, *P. latifrons*. See *wombat*.

Phascolosoma (fas-kō-lō-sō'mā), *n.* [*NL., < Gr. φάσκωλος, a leathern bag, + σῶμα, body.*] A genus of geophyean worms of the family *Sipunculidae*, or spoon-worms. *P. camentarium* is common in deep water on sandy or shelly bottoms along the New England coast, living somewhat like a hermit-crab in the deserted shell of some mollusk, the mouth of which is extended and contracted by sand or mud cemented by the secretion of its own body into a kind of tube.

Phascum (fas'kum), *n.* [*NL. (Linneus), < Gr. φάσκον, same as φάσκος, a kind of tree-moss.*] A genus of bryaceous mosses, giving name to the order *Phascaceæ*. They are minute but distinctly caulescent plants, mostly growing on the ground, with costate leaves and monoclous "flowers." The capsule is pedicellate, subglobose or ovate-oblong, dehiscing by irregular ruptures. There are 3 North American species, sometimes called *earth-mosses*.

phase¹ (fāz), *n.* [Formerly also, as *ML.*, *phasis* (plural *phases*, whence the *E. sing. phase*); = *F. phase* = *Sp. It. fase* = *Pg. phase*, *< ML. phasis*, *< Gr. φάσις, an appearance, < φαίνω, shine, = Skt. bhā, shine; cf. phantasm, etc., and see face¹, fable, etc.*] 1. Aspect, appearance, or guise; the aspect or presentation in which a thing of varying modes or conditions manifests itself to the eye or the mind, or the stage in its history or development which it reaches at a particular time; an era: as, the war entered on a new phase; the varying phases of life.

Certainly the mansion appeared to enjoy a quieter phase of existence than the temple: some of its windows too were aglow. *Charlotte Brontë, Shirley*. ix.

Phascogale (fas-kog'a-lē), *n.* [*NL. Phascogalinæ (fas-kog-a-li'nē), *n. pl.* [*NL., < Phascogale + -inæ.*] A subfamily of *Dasyuridae* based on the genus *Phascogale*.

Phascolarctidae (fas-kō-lārk'ti-dē), *n. pl.* [*NL., < Phascolarctos + -idae.*] The *Phascolarctineæ*, raised to the rank of a family.

Phascolarctinae (fas'kō-lārk-ti'nē), *n. pl.* [*NL., < Phascolarctos + -inæ.*] A subfamily of *Phalangistidae* based on the genus *Phascolarctos*.

Phascolarctos (fas-kō-lārk'tos), *n.* [*NL. (De Blainville, 1816), < Gr. φάσκωλος, a leathern bag, + ἄρκτος, bear.*] A genus of *Phalangistidae*, type of the subfamily *Phascolarctineæ*, having cheek-pouches, 30 teeth, no lower canines, only 11 dorsal vertebrae and as many pairs of ribs, no external tail, the tongue not peculiar, a cardiac gland in the stomach, and a very long cæcum. It contains the koala or native bear of Australia, *P. cinereus*. See cut under *koala*.

Phascolomyidae (fas-kō-lō-mī'i-dē), *n. pl.* [*NL., < Phascolomys + -idae.*] A family of diprotodont marsupial mammals; the wombats. They have two incisors above and two below, as in rodents, large, scalpriform, enameled in front only; no canines; all the teeth with persistent pulps; the hind feet with four subequal, somewhat syndactylous toes, and hallux rudimentary; the fore feet five-toed; the tail rudimentary; the stomach simple with a cardiac gland; and a short cæcum with a vermiform appendage. There is but one genus, *Phascolomys*.

Phascolomys (fas-kol'ō-mis), *n.* [*NL., < Gr. φάσκωλος, a leathern bag, + μῦς, mouse.*] The typical genus of the family *Phascolomyidae*, including the wombats. They are inoffensive terrestrial and fossorial herbivorous animals of the Australian

Phascogale penicillata.

We may congratulate ourselves on having reached a phase of civilization in which the rights of life and personal liberty no longer require inculcating.

H. Spencer, Social Statics, p. 131.

That peculiar phase in the life of the Greek commonwealth which intervenes between oligarchy and democracy—the age of the tyrannies. *Encyc. Brit.*, XI. 94.

2. In *astron.*, the particular appearance presented by the moon or by a planet at a given time; one of the recurring appearances of the moon or a planet in respect to the apparent form of the illuminated part of its disk.

At such times as these planets show their full phases they are found to be spherical, and only lose this figure by virtue of position to the sun, to whom they owe their light.

Chief the planter, if he wealth desire,
Should note the phases of the fickle moon.

Granger, The Sugar Cane, l.

8. In *physics*, a particular value, especially at the zero of time, of the uniformly varying angular quantity upon which a simple harmonic motion, or a simple element of a harmonic motion, depends. The position of the moving object may be expressed by means of a sum or sums of terms of the form $A \sin(\omega t + \phi)$, where t is the time. The value of ϕ at any instant, especially when $t = 0$, is the phase. Two simple harmonic motions $A \sin(\omega t + \phi)$ and $M \sin(\omega t + \eta)$ are said to differ in phase, meaning that there is a constant difference in their contemporaneous phases.

The distance whereby one set of waves is in advance of another is called the difference of phase.

Spottiswoode, Polarisation, p. 32.

We have within the annular regions two electro-motive forces at right angles, and differing in phase.

Science, XIII. 100.

phase², *v. t.* A bad spelling of *face*.

phase¹, *n.* See *face*².

phaseless (fā'z'les), *a.* [*< phase*¹ + *-less*.] Unchanging; devoid of change in aspect or state.

A phaseless and unceasing gloom.

Poe, Tale of the Ragged Mountains.

Phaseolus (fā-sē-ō'lē-ō), *n. pl.* [NL. (Bentham, 1835), *< Phaseolus* + *-ae*.] A tribe of leguminous plants of the suborder *Papilionaceae*, distinguished by racemose or fasciated flowers, usually from the axils, stamens diadelphous or nearly so, two-valved pods, pinnate leaves of three entire or lobed leaflets, each with a pair of stipels, and twining or prostrate habit. It includes 6 subtribes and 47 genera, of which the principal are *Phaseolus* (the type), *Apios*, *Butea*, *Cajanus*, *Citioria*, *Doichia*, *Erythrina*, *Galactia*, *Kennedia*, *Mucuna*, *Physostigma*, and *Rhynchosia*.

phaseolite (fā-sē-ō'lit), *n.* [*< Phaseolus* + *-ite*².] A generic name proposed by Unger, under which have been included various remains of fossil plants, principally leaves, which are supposed to belong to the *Leguminosae*, and some of which appear to be closely allied to the living genus *Phaseolus*.

Phaseolus (fā-sē-ō'lus), *n.* [NL. (Rivinus, 1691), *< L. phaseolus*, *phaseolus*, also *phasēlus*, *fasēlus*, *< Gr. φασήλος*, also *φασήλος*, *φασήλος*, a kind of bean: see *phase*, *face*².] A genus of leguminous plants, type of the tribe *Phaseoleae* and the subtribe *Euphaseoleae*, distinguished by the spiral keel, orbicular banner, longitudinally bearded style, and flowers clustered above the middle of the peduncle. There are about 60 species, widely dispersed through warmer regions, with about 100 well-marked varieties due to long cultivation. They are twining or prostrate plants, with leaves of three leaflets, persistent striate stipules, white, yellowish, red, violet, or purplish flowers, and long straight or curving pods. To this genus belong most of the beans of culinary use, for which see *bean*, *kidney-bean*, *haricot*, and *green gram* (under *gram*). *P. multiflorus*, the scarlet runner, is often cultivated for ornament. *P. perennis*, the wild bean-vine (see *cut under leaf*), and *P. diversifolius*, a trailing plant remarkable for its polymorphous leaves, with two other species, all purplish-flowered, are native to the eastern United States. See *Strophostyles*.

phases, *n.* Plural of *phase*.

Phasianella (fā'si-ā-nel'ā), *n.* [NL. (Lamarck), fem. dim. of *L. phasianus*, pheasant: see *phasiant*.] The typical genus of *Phasianellidae*, containing shells brilliantly polished and colored, calling to mind the tints of a pheasant, and hence called *pheasant-shells*.

Phasianellidae (fā'si-ā-nel'-idē), *n. pl.* [NL., *< Phasianella* + *-idae*.] A family of gastropods; the pheasant-shells. They are generally ranked as a subfamily, called *Phasianellinae*, of the family *Turbinidae*. They are distinguished by their necrosous shell. The species abound chiefly in the Australian seas.

Phasianidae (fā-si-ān'-idē), *n. pl.* [NL., *< Phasianus* +

-idae.] A family of rasorial or gallinaceous birds, containing the most magnificent representatives of the order *Gallinæ*, as the peacock, all the various species of pheasants, the domestic hen, the turkey, and the guinea-fowl. The last two, respectively the American and the African representatives, are sometimes excluded as the types of separate families. The *Phasianidae* are specially characteristic of Asia and the islands zoologically related. There are about 75 species, included in many genera. The leading types are *Pavo* and *Polyplecton*, the peacocks and peacock-pheasants; *Argus* or *Argusianus*, the argus-pheasants; *Phasianus*, the common pheasants, such as have been introduced in Europe; *Chrysolophus* or *Thaumalea*, the golden and Amherstian pheasants; *Pucrasia*, the pucras pheasants; *Crossoptilon*, the eared or snow pheasants; *Euplocamus*, the macartneya, firebacks, kalceges, and silver pheasants; *Lophophorus*, the monauls or impeyans; *Cerionix*, the tragopans, satyrs, or horned pheasants; *Gallus*, the domestic cock and hen, descended from the jungle fowl; *Ithaginis*, the blood-pheasants; *Meleagris*, the turkeys of America; and *Numida*, *Gallinula*, *Acryllium*, *Agelastus*, and *Phasianus*, genera of African guinea-fowls. These genera are by Elliot grouped in no fewer than eight subfamilies—*Pavoninae*, *Lophophorinae*, *Meleagrinae*, *Phasianinae*, *Euplocaminae*, *Gallinae*, *Agelastinae*, and *Numidinae*. See further under *Phasianus* and *pheasant*.

Phasianine (fā'si-ā-ni'ne), *n. pl.* [NL., *< Phasianus* + *-inae*.] The *Phasianidae*, exclusive of the *Pavoninae*, *Meleagrinae*, and *Numidinae*, or still further restricted to forms resembling the genus *Phasianus*; the pheasants proper. Some authors compose the subfamily of five genera—*Phasianus*, *Thaumalea*, *Euplocamus*, *Lobiophasia*, and *Ithaginis*.

phasianine (fā'si-ā-nin), *a.* Of or pertaining to the *Phasianinae*.

Phasianomorphæ (fā-si-ā-nō-mōr'fē), *n. pl.* [NL., *< Gr. φασιανός*, a pheasant, + *μορφή*, form.] In Sundevall's system of classification, a cohort of *Gallinæ*, composed of the pheasants proper, or *Phasianidae*, with the guinea-fowls, partridges, quails, and hemipodes (*Turnicidae*).

phasianomorphie (fā-si-ā-nō-mōr'fik), *a.* [*< Phasianomorphæ* + *-ic*.] Of or pertaining to the *Phasianomorphæ*.

Phasianurus (fā'si-ā-nū'rus), *n.* [NL. (Wagler, 1832), *< Gr. φασιανός*, a pheasant, + *οὐρά*, tail.] A genus of *Anatidae*: same as *Dasila*.

Phasianus (fā-si-ā-nus), *n.* [NL., *< L. phasianus*, *< Gr. φασιανός*, a pheasant: see *pheasant*.]

other genera (*Euplocamus* and *Thaumalea*). See further under *pheasant*.

phasic (fā'zik), *a.* [*< phase*¹ + *-ic*.] Pertaining to or of the nature of a phase.

Phasidus (fā-si'dus), *n.* [NL. (Cassin, 1856), appar. irreg. *< Gr. φασίς* (avós), a pheasant, + *είδος*, form.] A notable genus of African guinea-fowls of the family *Numididae*, having as type *P. niger*, the only species. The head is bare, the tarsi are spurred, and the plumage is black.

phasis (fā'sis), *n.*; *pl. phases* (-sēz). [ML.: see *phase*¹.] In *astron.*, a phase.

phasm (fāzm), *n.* [*< L. phasma*, *< Gr. φάσμα*, an apparition, *< φαίνω*, shine: see *phase*¹. Cf. *phantasm*.] Appearance; fancied apparition; phantom. [Rare.]

Such phasma, such apparitions, are most of those excellencies which men applaud in themselves.

Decay of Christian Piety, p. 82.

phasma (fas'mā), *n.* [NL., *< L. phasma*, *< Gr. φάσμα*, an apparition: see *phas*.] 1. *Pl. phasmata* (-mā-tā). Same as *phas*.—2. [cap.] A genus of gressorial or ambulatorial orthopterous insects, typical of the family *Phasmodæ*.

Phasma rubicundum, female. (One half natural size.)

It formerly contained all the curious creatures known as *walking-sticks*, but is now restricted to certain tropical forms. *Lichtenstein*, 1796.

Phasmodæ (fas'mi-dē), *n. pl.* [NL. (Serville, 1831), *< Phasma* + *-idæ*.] A family of *Orthoptera*, typified by the genus *Phasma*, composing with the *Mantidae* the series *Gressoria* or *ambulatoria*. They are known as *specklers*, *leaf-insects*, *walking-leaves*, *walking-sticks*, etc., from their extraordinary protective mimicry of the twigs and leaves upon which they live. The body is usually long and slender, and the wings, when not abortive, are foliaceous. A member of this family, *Diapheromera femorata*, is the common walking-stick of the northern and eastern United States. See *cut under Phasma*.

Phasmina (fas'mi-nā), *n. pl.* [NL., *< Phasma* + *-inae*.] A group of orthopterous insects corresponding to the family *Phasmodæ*.

Phasmomantis (fas-mō-man'tis), *n.* [NL., *< Gr. φάσμα*, an appearance, + *μάντις*, an insect so called: see *Mantis*.] A genus of *Mantidae*, containing the common praying-mantis or rear-horse of the United States, *P. carolina*. The female is about three inches long, of a pale pea-green color; the male is smaller, grayish, with dark-barred fore tibiae. See *cut under Mantis*.

phasachate (fā'sā-kāt), *n.* [*< Gr. φάσσα*, a ring-dove, + *ἀχάτης*, agate: see *agate*².] The lead-colored agate.

phaulographic (fā-lō-graf'ik), *a.* [*< Gr. φαῦλος*, bad, worthless, + *γραφειν*, write.] Relating to bad or worthless literature. *Haeckel*. [Rare.]

Reeves's Pheasant (*Phasianus* or *Syrmaticus reevesi*).

The typical genus of the family *Phasianidae* and subfamily *Phasianinae*, formerly nearly conterminous with the family, now restricted to such forms as *Phasianus colchicus*, the common pheasant, long domesticated in Europe. They have a much-lengthened tail, with long acuminate middle feathers, and the head crestless but provided with lateral tufts. At least 16 species are commonly referred to this genus (in several sections, ranked by some authors as genera). One of the most remarkable is *P. (Syrmaticus) reevesi*, of northern China, in which the tail reaches the maximum length of 5 or 6 feet. The plumage is beautifully varied with black, white, chestnut, and golden yellow. *P. (Catreus) walli* is the cheer, or Walli's pheasant, of the Himalayas, with a long, broad tail and much-varied plumage. *P. (Graphophasianus) soemmerringi* is Sommering's pheasant, of Japan, with coppery-metallic plumage and very long tail. *P. (Calophaps) ellioti* is a gorgeously colored pheasant of the mountains near Ningpo, in China. Certain green-breasted pheasants, as *P. versicolor* of Japan and *P. elegans* of China, form a small group. Ring-necked pheasants, as *P. insignis* and *P. mongolicus*, have a white ring around the neck. The above-named approach more and more nearly to the ordinary pheasant as domesticated in Europe, of which the *Turkestan P. shawi* is a near relative. The silver and golden pheasants, though long-tailed, are now placed in

Pheasant-shell (*Phasianella imperialis*).

φασιανός, a pheasant (abbr. of *L. Phasianus avis*, Gr. *φασιανός όρνις*, the Phasian bird), < *φασιανός*, Phasian, of Phasis, < *φάσις*, a river in Colchis, near the mouth of which these birds are said to have been numerous.] A bird of the genus *Phasianus*, family *Phasianidae*. (See the technical names.) (a) *Phasianus colchicus*, the bird originally called pheasant from its supposed origin, of which nothing is certainly known, and now for many centuries naturalized in Great Britain and in other parts of Europe. The cock bird in full plumage is nearly three feet long, of which length the tail is more than half. The head and neck are deep steel-blue, glancing greenish in some lights; and there is a bare red skin about the eyes. The general color is golden-brown, varying to chestnut or plain brown, on most parts intimately barred or laced with black. The

Common Pheasant (*Phasianus colchicus*).

hen is more yellowish-brown, and only about two thirds as long. This pheasant runs into some varieties in domestication, and also crosses freely with several related species. The several other forms of the restricted genus are definitely known as to their origin and habitat, all being natives of China and Tibet and more southerly regions of Asia, as well as of Japan and many other islands included in the Oriental fauna. Several of these are often seen in aviaries and in semi-domestication. They are such as Shaw's, *P. shawi*; the Mongolian, *P. mongolicus*; the Yarkand, *P. insignis*; the Formosan, *P. formosanus*; the ring-necked, *P. torquatus*; the Chinese ringless, *P. deollatus*; the Japanese green, *P. versicolor*; the green-backed golden, *P. elegans*; also pheasants known as Reeves's, Wallich's, Sommering's, Swinhoe's, Elliot's, etc. Pheasants have often been introduced in the United States, where, however, none have been thoroughly naturalized, unless the cases of *P. versicolor* and *P. sommeringi* in Oregon should prove successful. (b) Hence, any bird of the subfamily *Phasianinae* or (with a few exceptions) of the family *Phasianidae*. (c) In the United States, the ruffed grouse, *Bonasa umbellata*; so called in the Southern and Middle States wherever the bobwhite (*Ortyx virginiana*) is known as the partridge, and called partridge in the Northern States wherever the bobwhite is known as the quail. See cut under *Bonasa*. (d) Loosely, one of various birds which resemble or suggest a pheasant, especially in the length of the tail: usually with a qualifying word: (1) The reed-pheasant, or bearded titmouse, *Parus biarmicus*. [Norfolk, Eng.] (2) The magpie. [Cornwall, Eng.] (3) One of several different American guans (*Cracidae*). (4) The Australian mallee-bird. See *Leipoa*. (5) A duck, *Querula acuta*: more fully called pheasant-duck, sea-pheasant, or water-pheasant. [Local, U. S. and Eng.] (6) A merganser; any one of the three species found in the United States: more fully called pheasant-duck or water-pheasant. [Local, U. S.]—*Amherstian* or *Lady Amherst's pheasant*, *Chrysolophus* or *Thaumalea amherstiae*, one of the golden pheasants, with a very long tail, and highly developed ruff around the head, gorgeously arrayed in golden-yellow, green, crimson, white, and other colors. It is sometimes seen in confinement, like *T. picta*.—*Argus-pheasant*. See *Argus*. 8.—*Blood-pheasant*, any member of the genus *Ithaginis*, as *I. cruentatus*. See cut under *Ithaginis*.—*Bohemian pheasant*, a variety of the common pheasant, *Phasianus colchicus*, produced in semi-domestication.—*Copper pheasant*, Sommering's pheasant, *P. sommeringi*, from Japan.—*Cornish pheasant*, the magpie. [Cornwall, Eng.]—*Derbian pheasant*. See *Derbian* and *Oreophaps*.—*Eared pheasant*, a pheasant of the genus *Crossoptilon*, having a tuft of feathers projecting like an ear on each side of the head and neck. They are large birds, not long-tailed, but with a peculiarity of the middle tail-feathers: the males are spurred; the plumage is not so brilliant as that of most pheasants, and the coloration is chiefly massed in large areas of light and dark. There are two Chinese species, *C. mantchuricum* and *C. auratum*; and two Tibetan, *C. tibetanum* and *C. drouyni*. All inhabit high mountain-ranges.—*English pheasant*, the common pheasant, *Phasianus colchicus*, an Asiatic bird naturalized in Great Britain prior to 1659.—*Fire-backed pheasant*, a fireback; a Macartney pheasant; a member of that section of the genus *Euplocamus* in which the plumage is intensely lustrous, part of the back being of a fiery tint. There are several species, as *E. ignitus*, inhabiting the Malay peninsula, Borneo, Sumatra, and Formosa. That of Blam is *E. praelatus*, formerly *Phasianus diardi*, sometimes forming a separate section of the genus, called *Diardigallus*. The Formosan fireback, *E. swinhoei*, has the fiery color of the back replaced by black and blue; it represents a section called *Hydrophasianus*.—*Golden pheasant*, a magnificent pheasant of the genus *Chrysolophus* or *Thaumalea*, as *C. pictus* or *T. picta*, and *C. T. am-*

herstiae. The former has long been known, and is often reared in confinement. It is long-tailed and ruffed; the plumage is scarlet, orange, golden, green, etc. These pheasants are natives of parts of China and Tibet. See the generic name.—*Green pheasant*, *Phasianus versicolor*, of Japan, much of whose plumage is of an emerald-green.—*Guiana pheasant*, *Oreoloma motmot*.—*Horned pheasant*, a pheasant of the genus *Criornis*; a satyr or tragopan, so called from the fleshy processes on the head, which resemble horns. See cut under *tragopan*.—*Impey pheasant*. See *Impeyan pheasant*.—*Kaleege* or *kall* pheasant, a member of the genus *Euplocamus*, and of that section of the genus called *Gallophasia*. See *kaleege*.—*Macartney pheasant*, a fireback; a pheasant of the fire-backed section of *Euplocamus*, as *E. ignitus*, formerly included in a genus *Macartneya*.—*Native pheasant* of Australia, *Leipoa ocellata*: same as *mallee-bird*.—*Peacock-pheasant*, any pheasant of the genus *Polyplectron*. See cut under *calcarate* and *Polyplectron*.—*Pucras pheasant*. See *Pucrasia*.—*Ring-necked pheasant*, *Phasianus torquatus*, of China, with a white collar and buff flanks, but in general resembling the common pheasant. —*Silver pheasant*, a pheasant of that section of the genus *Euplocamus* called *Nyctemerus*, in which the upper parts and tail are silvery-white, more or less varied with black, but strongly contrasted with the jet-black of the under parts. The best-known is *E. nyctemerus* of China, whose specific name translates a native designation of the dark and light colors, as if contrasting night and day.—*Snow-pheasant*, an eared pheasant; any species of the genus *Crossoptilon*: so called from their habitat.—*Wallich's pheasant*, *Phasianus (Catres) wallichi*, the cheer.—*Water-pheasant*, an aquatic fowl with a long tail, or otherwise suggesting a pheasant, as the pintail duck or a merganser; specifically, *Hydrophasianus chirurgus*. See cut under *Hydrophasianus*.

pheasant-cuckoo (fēz'ant-kūk'ō), *n.* Any spur-heeled or lark-heeled cuckoo; a conical: so called from the length of the tail. See *Centropus*.

pheasant-duck (fēz'ant-duk), *n.* Same as pheasant (d) (5) (6).

pheasant-finch (fēz'ant-finch), *n.* An African astrild, *Astrilda undulata*: so called from its general figure and coloration.

pheasantries (fēz'ant-ri), *n.*; pl. *pheasantries* (-riz). [*pheasant* + *-ry*, after *F. faisanderie*.] A place where pheasants are bred, reared, and kept.

pheasant's-eye (fēz'ants-i), *n.* 1. See *Adonis*, 2.—2. Same as *pheasant's-eye pink* (which see, under *pink*2).

pheasant-shell (fēz'ant-shel), *n.* A shell of the genus *Phasianella*. See cut under *Phasianella*.

pheasant-tailed (fēz'ant-tāld), *a.* Having a long tail like that of a pheasant: as, the *pheasant-tailed jacana*, *Hydrophasianus chirurgus*, a bird of the family *Paridae* or *Jacaniidae*, found in eastern and southeastern Asia. See cut under *Hydrophasianus*.

pheasant-wood (fēz'ant-wūd), *n.* Same as *partridge-wood*.

phebe, *n.* See *phæbe*1.

pheer, **pheeret**. Bad spellings of *feer*1 and *feer*3.

pheezet, **phoezet**, *n.* Bad spellings of *feezet*1.

Phegopteris (fē-gop'te-ris), *n.* [NL. (Presl, 1836), < Gr. *φηγος*, an oak (= *L. fagus*, beech, = *E. beech*), + *πτερίς*, a fern.] A genus of ferns, the beech-ferns. The stipe is continuous with the rootstock, as in the *Aspidæ*, and the sori are naked, small, and borne on the back of the veins, below the apex; the frond is variable. There are about 90 species, of which number 5 are found in North America. By some pteridologists this genus is regarded as a section of the genus *Polypodium*.

Pheldiac, *a.* Same as *Phidian*.

Pheldian, *a.* See *Phidian*.

Phélipæa (fel-i-pē'ā), *n.* [NL. (Tournefort, 1700), named after Louis and Hiér. *Phélipæaux*, French naval officers and patrons of science.]

A genus of parasitic plants of the gamopetalous order *Orobanchaceæ*, characterized by the broad and spreading corolla-lobes, equal parallel anther-cells, and five unequal acute calyx-teeth. Two species are Oriental herbs, with a rather smooth, unbranched, leafless stem, bearing a few scales at the base, above becoming a long smooth peduncle bearing a single large scarlet flower. *P. lutea*, of the Old World, has been used for dyeing black. Eight North American species, formerly included in this genus, are now separated, constituting the American genus *Aphyllon*. See *broom-rape*.

phellogerm (fel'ō-jēr'm), *n.* [NL., < Gr. *φελλός*, cork, + *όέρμα*, skin.] A definite layer of green parenchymatous cells beneath the cork, formed from the inner layers of the phellogen. Phellogerm may be demonstrated in the stems of *Ribes*, *Lonicera*, *Spiræa*, *Deutzia*, etc.

phellogen (fel'ō-jen), *n.* [NL., < Gr. *φελλός*, cork, + *-γενής*, producing: see *-gen*.] Cork-meristem, or cork-cambium; the inner layers of cork-tissue, which possess cellular activity and give rise to cork.

phellogenetic (fel'ō-jē-net'ik), *a.* [*phellogen*, after *genetic*.] In bot., pertaining or relating to phellogen: as, *phellogenetic meristem*.

phelloplastics (fel-ō-plas'tiks), *n.* [= *F. phelloplastique*, < Gr. *φελλός*, cork, + *πλαστικός*, verbal

adj. of *πλάσσειν*, form: see *plastic*.] The art, of cutting and manipulating cork, as in making architectural models, etc.

phelonion (fē-lō'ni-on), *n.*; pl. *phelonias* (-s). [*L*Gr. *φελόνιον*, *φελώνιον*, also *φελόνη*, incorrect forms for *φανόλιον*, *φανόλη*, < *L. pænula*, *penula*, a cloak, in ML a chasuble: see *pænula*.] An ecclesiastical vestment corresponding to the Roman Catholic chasuble, worn by patriarchs and priests of the Greek Church.

phenacetin (fē-nas'e-tin), *n.* [*phen*(ol) + *acetin*.] An acetyl derivative of amidophenol, occurring in small tasteless colorless crystals but slightly soluble in water, antalgic and antipyretic.

phenacite (fen'a-sit), *n.* [So called in allusion to its having been mistaken for quartz; < Gr. *φείναξ* (*φενάκ*), an impostor, + *-ite*2.] A rare mineral occurring in transparent rhombohedral crystals, colorless to wine-yellow, and having a vitreous luster. It is a silicate of beryllium (glucinum). It is found in the Urala, also in Switzerland, and on Mount Antoro in Colorado. As a precious stone, the colorless transparent variety is extremely brilliant by artificial light.

phenakism (fen'a-kizm), *n.* [*Gr. φενακισμός*, cheating, quackery, < *φενάκιζεν*, cheat, < *φείναξ* (*φενάκ*), a cheat, quack, impostor.] The act of conveying false ideas or impressions; deceit. *Bacon*.

phenakistoscope (fen-a-kis'tō-skōp), *n.* [*Gr. φενακιστικός*, deceitful (< *φενάκιζεν*, cheat, deceive, trick, < *φείναξ*, a cheat: see *phenakism*), + *σκοπεῖν*, see.] An optical instrument which produces the representation of actual motion, as in leaping, walking, flying, etc. It consists of a disk on which a figure is repeated in successive positions.

Phenakistoscope.

The disk *a* has drawn upon it the figures arranged in successive positions. It is rotated by spinning with the fingers applied to a small boss or nut in the rear (not shown in the cut). *b*, *b'* are the slits through which the reflected images are viewed.

When the disk is caused to revolve and is observed through a slit as reflected in a mirror, a single figure appears to the eye, owing to the principle of the persistence of impressions on the retina, to assume in turn the various positions of the separate figures, its motion appearing to be continuous.

phenetol (fen'et-ol), *n.* [*phen*(ol) + *-et* + *-ol*.] Ethyl phenyl ether, $C_6H_5.O.C_2H_5$, a volatile aromatic-smelling liquid.—**Phenetol red**. Same as *coccinin*.

phengite (fen'jit), *n.* [See *fengite*.] A variety of muscovite, or common potash mica. See *muscovite*.

phenic (fē'nik), *a.* [*F. phénique*; as *phen*(ol) + *-ic*.] Obtained from coal-tar: as, *phenic* or *carbolic acid*. See *carbolic*. Also *phenylic*.

Phenician, **Phœnician** (fē-nish'an), *a.* and *n.* [= *F. Phénicien*, < *L. Phœnicus*, *Phœnicia*, < *Phœnice*, < Gr. *φονικία*, *Phœnicia*, < *φονίξ* (> *L. Phœnix*), a *Phœnicia*.] I. *a.* Of or pertaining to *Phœnicia*.

II. *n.* 1. A native or an inhabitant of *Phœnicia*, an ancient country on the coast of Syria, of which Tyre and Sidon were the chief cities. The *Phœnicians* were probably of Semitic race, and were celebrated for their commerce, colonies, and inventions.—2. The language of the ancient *Phœnicians*. It was a Semitic dialect, akin to Hebrew.

phenicin, **phenicine** (fen'i-sin), *n.* [Also *phœnicin*; < *F. phénicine*, < Gr. *φονίξ*, purple-red: see *phenix*.] A brown coloring matter pro-

duced by the action of nitrosulphuric acid on carbonic acid (phenol).

phenicoid (fē-nish'us), *a.* [Prop. *pheniceous; < L. *pheniceus*, < Gr. *φοινικός*, purple-red, < *φοινίς*, purple: see *phenix*.] Of or pertaining to phenic; of the color of phenic. Also *pheniceous*.

phenicopter, **phenicopter** (fē-ni-kop'tēr), *n.* [*F. phenicopter* = Pg. *phenicopter* = It. *fenicopter*, *fenicopter*, < L. *phenicopter*, < Gr. *φοινίς*, a bird, supposed to be the flamingo, lit. red-feathered, < *φοινίς* (foinik-), purple-red (see *phenix*), + *πτερόν*, feather, wing.] A flamingo.

He [Vitellius] blended together the livers of gillheads, the brains of pheasants and peacocks, tongues of *phenicopters*, and the melts of lampreys.

Hakewill, Apology, p. 381.

Phenicopter (fē-ni-kop'tēr), *n.* See *Phenicopter*.

phenix, **phenix**¹ (fē'niks), *n.* [Formerly *fenix*, but now *phenix* or *phenix*, after the L. spelling; < ME. *fenix*, < AS. *fenix* = D. *feniks* = MLG. *fēnix* = G. *phōnix* = Sw. Dan. *fōnix* = F. *phénix* = Sp. *fenix* = Pg. *fenix* = It. *fenice*, < L. *phoenix*, < Gr. *φοινίς*, a fabulous bird, the phenix (see def. 1). The name has no obvious connection with *φοινίς*, purple-red, purple, red, also the palm, date-palm, date, also a kind of grass, etc., also [*cap.*] a Phœnician; see *Phœnician*. It is by some identified with Egypt. *bennu*, a bird (supposed to be a small heron) sacred to Osiris, emblem of the soul, and also symbol of a certain cycle of time.] 1. In *anc. Oriental myth.*, a wonderful bird of great beauty, which, after living 500 or 600 years in the Arabian wilderness, the only one of its kind, built for itself a funeral pile of spices and aromatic gums, lighted the pile with the fanning of its wings, and was burned upon it, but from its ashes revived in the freshness of youth. Hence the phenix often serves as an emblem of immortality. Allusions to this myth are found in the hieroglyphic writings, and the fable survives in popular forms in Arabia, Persia, and India. By heralds the phenix is always represented in the midst of flames.

Than the Bird *Fenix* cometh, and brenneth him self to ashes.

Mandeville, Travels, p. 48.

For, as there is but one *phenix* in the world, so there is but one tree in Arabia wherein she buydeth.

Lyly, Euphues (ed. Arber), p. 312.

The bird *phenix* is supposed to have taken that name of this date tree (called in Greek *φοινίς*); for it was assured unto me that the said bird died with the tree, and revived of itself as the tree sprung again.

Holland, tr. of Pliny, xiii. 4.

Hence—2. A person of unique excellence; one of singular distinction or peerless beauty; a paragon.

For God's love let him not be a *phenix*, let him not be alone.

Latimer, 1st Sermon bef. Edw. VI., 1549.

That incomparable Queens, most deservedly called the *Phœnix* of her sex.

Coryat, Crudities, I. 43.

The Haji repaid me for my docility by vaunting me every where as the very *phenix* of physicians.

R. P. Burton, El-Medina, p. 60.

3. In *entom.*, the geometrid moth *Cidaria ribesaria*, whose larva feeds on the currant and gooseberry: a collectors' name in England. The small phenix is *C. silacea*.—Chinese *phenix*. Same as *fung-hwang*.—Phenix badge, a medal struck in the reign of Elizabeth about 1574, bearing on the obverse a portrait of Elizabeth, and on the reverse a phenix in flames with cipher and crown above. The inscriptions seem to refer to the plague then raging. It was probably worn by the immediate favorites and courtiers of Elizabeth.—*Phenix fowls*. See *Japanese long-tailed fowls*, under *Japanese*.—*Phenix post*. See *post*.

phenix-stone (fē'niks-stōn), *n.* An artificial stone in which furnace-slag is used in place of sand.

phenocryst (fē-nō-krist), *n.* [*Gr. φαίνω*, show, + *κρυσταλλος* (allōs), crystal: see *crystal*.] One of the prominent crystals in a porphyritic rock.

phenogam, *n.* See *phenogam*.

Phenogamia (fē-nō-gā'mi-g), *n. pl.* See *Phenogamia*.

phenogamic, **phenogamous**, *a.* See *phenogamic*, *phenogamous*.

phenol (fē'nol), *n.* [*F. phénol*, said to be < Gr. *φαίνω*, shine, appear (but prob. < *φοινίς*), purple-red), + *-ol*.] 1. Phenyl alcohol, C₆H₅OH, more commonly called *carbolic acid*.—2. The general name of a compound formed from benzene and its homologues by the substitution of hydroxyl for hydrogen in the benzene nucleus. The phenols correspond to tertiary alcohols, as they contain the group COH, and all have weak acid properties.—*Phenol-camphor*, camphorated phenol; camphor combined with carbolic acid.

phenological, **phenological** (fē-nō-loj'i-kal), *a.* [*Gr. φαινολογία* + *-ic*.] Pertaining to phenology.

phenologist, **phenologist** (fē-nol'ō-jist), *n.* [*Gr. φαινολογία* + *-ist*.] One who is versed in phenology. *Nature*, XXXIX. 12.

phenology, **phenology** (fē-nol'ō-jī), *n.* [Short for *phenomenology*, with a restricted application.] That branch of applied meteorology which treats of the influence of climate on the recurrence of the annual phenomena of animal and vegetable life. So far as it concerns plant-growth, phenology is also a branch of botany, and records dates of budding, leafing, blooming, and fruiting, in order to correlate these epochs with the attendant progress of meteorological conditions. Among the phenomena of animal life, the migration of birds has been especially studied as a department of phenology.

phenomena, *n.* Plural of *phenomenon*. **phenomenal** (fē-nom'e-nal), *a.* [Also *phenomenal*; = *F. phénoménal* = Sp. *fenomenal*; as *phenomenon* + *-al*.] 1. Of, pertaining to, or of the nature of phenomena, or the appearances of things, as distinguished from the things in themselves; pertaining to the occurrences or changing phases of matter or mind.

Mill, . . . in holding that all knowledge is only relative and *phenomenal*, and that causation is merely invariable sequence, cuts at the roots of our belief both in matter and force. *Dawson*, *Nature* and the Bible, p. 138.

The basis of Fichte's system is an absolute Ego, of which the Ego of consciousness is at best *phenomenal*.

Veitch, *Introd. to Descartes's Method*, p. lxxix.

The *Phenomenal* is the Real; there is no other real that we can distinguish from it.

H. Sidgwick, *Methods of Ethics*, p. 120.

Thought must alter the *phenomenal* sequence, no doubt; but so also does mere emotion, and again sensation.

F. H. Bradley, *Mind*, XIII. 26.

2. Of the nature of a phenomenon, or extraordinary fact in nature; so surprising or extraordinary as to arrest the attention or excite wonder; impressively notable or important; beyond what is common or usual; remarkable; as, the *phenomenal* growth of the United States; a brain of *phenomenal* size.—*Phenomenal idealism*. Same as *Berkeleyan idealism* (which see, under *idealism*).

II. *n.* That which is in the nature of a phenomenon. [Rare.]

The greatness of the change is sufficiently hinted in the Vision of St. John: "I saw a new heaven and a new earth; for the first heaven and the first earth had passed away, and there was no more sea" (Rev. xxi. 1). In the matter of elementals, the new earth will be identical with the old; in the matter of *phenomenals*, the new earth will be different from the old.

Boardman, *Creative Week*, p. 239.

phenomenalism (fē-nom'e-nal-izm), *n.* [= *F. phénoménalisme*; as *phenomenal* + *-ism*.] The philosophical doctrine that the phenomenal and the real are identical—that phenomena are the only realities. Also called *externalism*.

Phenomenalism . . . is that philosophy which holds that all existences, all possible objects of thought, are of two kinds only, external and internal phenomena; or sensuous objects, such as color, shape, hardness, or groups of these, and the unsensuous ideas we have of sensuous objects.

J. C. Sharpe, *Culture and Religion*, p. 58.

phenomenalist (fē-nom'e-nal-ist), *n.* [*Gr. φαινόμενολιστής* + *-ist*.] An adherent or disciple of phenomenism.

phenomenality (fē-nom'e-nal'i-ti), *n.* [= *F. phénoménalité*; as *phenomenal* + *-ity*.] The character of being phenomenal, in either sense of that word.

phenomenalize (fē-nom'e-nal-iz), *v. t.*; pret. and pp. *phenomenalized*, ppr. *phenomenalizing*. [*Gr. φαινόμενολογία* + *-ize*.] To represent as a phenomenon; cause to figure as a phenomenon.

His [Locke's] integrity is also illustrated in his acknowledgment of the unimaginable, and in this sense incoherent, in our thought of Substance. He tries to *phenomenalize* it; but he finds that it cannot be *phenomenalized*, and yet that we cannot dispense with it.

Encyc. Brit., XIV. 760.

phenomenally (fē-nom'e-nal-i), *adv.* 1. As a phenomenon; as a mere phase or appearance. —2. In an extraordinary or surprising manner or degree.

phenomenism (fē-nom'e-nizm), *n.* [*Gr. φαινόμενολογία* + *-ism*.] The doctrine or principles of the phenomenists.

phenomenist (fē-nom'e-nist), *n.* [*Gr. φαινόμενολογιστής* + *-ist*.] One who believes only in what he observes, or in phenomena, having no regard to their causes or consequences; one who rejects a priori reasoning or necessary primary principles; one who does not believe in an invariable connection between cause and effect, but holds this to be nothing more than a habitually observed sequence.

phenomenize (fē-nom'e-niz), *v. t.*; pret. and pp. *phenomenized*, ppr. *phenomenizing*. [*Gr. φαινόμενολογία* + *-ize*.] To bring into the world of experience.

phenomenological (fē-nom'e-nol'ōj'i-kal), *a.* [*Gr. φαινόμενολογία* + *-ic*.] Of or pertaining to phenomenology; related or relating to phenomenology.

My metaphysic is psychological or *phenomenological* metaphysic.

Mind, IX. 466.

phenomenology (fē-nom'e-nol'ō-jī), *n.* [= *F. phénoménologie* = Pg. *fenomenologia*, < Gr. *φαίνω*, show, + *-λογία*, < *λέγω*, speak: see *-ology*.] A description or history of phenomena.

phenomenon (fē-nom'e-non), *n.*; pl. *phenomena* (-nā). [Formerly also *phenomenon*; = *F. phénomène* = G. *phänomen* = Sw. *fenomen* = Dan. *fanomen* = Sp. *fenómeno* = It. *fenomeno* = Pg. *fenomeno*, < LL. *phænomenon*, < Gr. *φαινόμενον*, pl. *φαίνόμενα*, that which appears or is seen, neut. of pass. part. of *φαίνω*, shine, show, pass. *φαίνεσθαι*, appear, < *φάω*, extended form of *φα* = Skt. *bhā*, shine: see *phase*, *face*, etc. Cf. *phantasm*, *phantom*, *phantasy*, *fancy*, etc.] 1. In *philos.*, an appearance or immediate object of experience, as distinguished from a thing in itself.

How pitiful and ridiculous are the grounds upon which such men pretend to account for the lowest and commonest *phenomena* of nature without recurring to a God and Providence!

South, *Sermons*, IV. ix.

The term appearance is used to denote not only that which reveals itself to our observation, as existent, but also to signify that which only seems to be, in contrast to that which truly is. There is thus not merely a certain vagueness in the word, but it even involves a kind of contradiction to the sense in which it is used when employed for *phenomenon*. In consequence of this, the term *phenomenon* has been naturalized in our language as a philosophical substitute for the term appearance.

Sir W. Hamilton, *Metaph.*, viii.

A *phenomenon*, as commonly understood, is what is manifest, sensible, evident, the implication being that there are eyes to see, ears to hear, and so forth.

J. Ward, *Encyc. Brit.*, XX. 38.

And do we need any more evidence to convince us that *phenomena*—by which I mean the effects produced upon our consciousness by unknown external agencies—are all that we can compare and classify, and are therefore all that we can know?

J. Fiske, *Cosmic Philos.*, I. 20.

2. In *science*, a fact directly observed, being either (a) an individual circumstance or occurrence, such as the emergence of a temporary star, or more usually (b) a regular kind of fact observed on certain kinds of occasion, such as the electrical sparks seen in combing the hair of some persons in cold, dry weather.

In fiction, the principles are given, to find the facts; in history, the facts are given, to find the principles; and the writer who does not explain the *phenomena* as well as state them performs only one half of his office.

Macaulay, *History*.

We do not inquire respecting this human nature what are the laws under which its varied *phenomena* may be generalised, and accommodate our acts to them.

H. Spencer, *Social Statics*, p. 507.

Last night we watched from our roof that lovely *phenomenon*, the approach of Venus to the moon.

J. F. Clarke, *Self-Culture*, p. 119.

3. Any extraordinary occurrence or fact in nature; something strange and uncommon; a prodigy; a very remarkable personage or performer.

"This, sir," said Mr. Vincent Crummies, bringing the Maiden forward, "this is the infant *phenomenon*, Miss Ninetta Crummies."

Dickens, *Nicholas Nickleby*, xxiii.

Chess-board phenomenon, the effect produced by crossing the visual axes in front of a chess-board or other similar object, so that there is a partial superposition of the images in the two eyes, and an appearance as if the objects were nearer and smaller.—*Entoptic phenomena*. See *entoptic*.—*Leidenfrost phenomenon*. See *spheroidal condition*, under *spheroidal*.—*Peltier's phenomenon*. See *Peltier effect* (under *effect*), and *thermo-electricity*.—*Syn.* 3. Prodigy, marvel, wonder.

phenoxygon (fē-nōz'ig-us), *a.* [*Gr. φαίνω*, show, + *ζυγόν*, yoke: see *yoke*.] Having, as a skull, the zygotomic arches visible directly from above; having the bizygomatic diameter greater than the maximum transverse frontal diameter, and the angle of Quatrefages positive.

phenyl, **phenyle** (fē'nīl), *n.* [*F. phényle*; as *phen(ol)* + *-yl*.] An organic radical (C₆H₅); in the free state, C₁₂H₁₀ found in phenol (or carbolic acid), benzol, and aniline. It crystallizes from alcohol in colorless nacreous scales of an agreeable odor, which melt at 70° C. and sublime at a higher temperature.—*Phenyl brown*. See *brown*.

phenylamide (fē-nīl-am'id or -id), *n.* [*Gr. φένυλ* + *amide*.] A compound formed by the substitution of one or more amido-groups for the hydrogen of benzene. The phenylamides are very feeble bases. The most important commercially is aniline.

phenylamine (fē-nīl-am'in), *n.* [*Gr. φένυλ* + *amine*.] Same as *aniline*.

phenyle, *n.* See *phenyl*.

phenylia (fē-nīl'i-g), *n.* [NL., < E. *phenyl*, *q. v.*] Same as *aniline*.

phenylic (fē-nīl'ik), *a.* [*< phenyl + -ic.*] Same as *phenic*.

phœon (fē'on), *n.* [Origin obscure.] 1. A barbed javelin formerly carried by the royal sergeant-at-arms. *Fairholt*. — 2. In *her.*, a barbed head, as of an arrow or a fish-spear, differing from the broad-arrow in being engraved on the inner side of the barbs unless otherwise blazoned. The point is always directed downward unless otherwise stated in the blazon. Also called *ferrum jaculi*. Compare *broad-arrow*.

Pherecratean (fer'ek-rā-tē'an), *n.* [*< Gr. Φερεκράτης*, *Pherecrates* (see def.).] In *anc. pros.*, a logædic meter (named from *Pherecrates*, a Greek comic poet), similar to a trochaic tripod, but having a dactyl for the second trochee (also called *Aristophanic*); also, a logædic tripod (catalectic or acatalectic) with a dactyl either in the first or second place.

Pherecratic (fer-ek-rat'ik), *n.* Same as *Pherecratean*.

phesteri, *n.* A bad spelling of *festeri*.

phew (fū), *interj.* [A mere exclamation; cf. *phoo*, *pho*, *phy*, etc.] An exclamation of disgust, weariness, or surprise.

phi (fī), *n.* The Greek letter φ, corresponding to the English *ph* (f).

phial (fī'al), *n.* and *v.* See *vial*.

phiale (fī'a-lē), *n.*; pl. *phialæ* (-lē). [*< Gr. φιάλη*, a patera, saucer: see *vial*.] 1. A flat saucer-shaped Greek vase used for pouring religious libations: commonly known by its Latin name, *patera*. — 2. Same as *cantharus*, 2.

Phibalura (fī'b-a-lū'rā), *n.* [A mutilated and corrupt form of *Amphibolura*, *q. v.*] A genus of birds established by Vieillot in 1816. The type and only species is *P. flavirostris* of Brazil, a bird of the family *Columbidae*. The plumage is yellow and black, the beak yellow. The name is derived from the long, deeply forked tail.

Phidian (fīd'i-an), *a.* [*< L. Phidias*, < *Gr. Φειδίας*, *Phidias* (see def.), + *-an*.] Of, pertaining to, or produced by *Phidias*, the most eminent artist of the most splendid time of ancient Athens, during the fifth century B. C., the artistic director of the monumental works of *Pericles*, and the sculptor of the decoration of the *Parthenon* and of the chryselephantine *Zeus of Olympia*. Hence, in general, noting the Athenian art of the third quarter of the fifth century, including not only the work of *Phidias* himself, but also that molded by

his example and executed by the galaxy of great artists of whom he was the chief; also, from the artistic standpoint, noting the age when *Phidias* and his immediate disciples worked. At this time the Greek artists had already won complete command of the material side of their profession, so that they were unhampered by difficulties of execution, and their work was constantly inspired by a high and noble ideal. Also written *Pheidian*.

Phigalian (fī-gā'li-an), *a.* [*< Gr. Φιγᾶλεια*, *Phigalia* (see def.), + *-an*.] Pertaining to *Phigalia*, an ancient town in the Peloponnesus.—**Phigalian marbles**, a series of twenty-three blocks sculptured in alto-rilievo, from the interior frieze of the cella of the temple of *Apollo Epikourios* at *Phigalia* or *Basae*, now preserved in the British Museum. They represent the combat of the *Centaur* and *Lapithæ*, and that of the *Greeks* and *Amazons*, and are of high artistic excellence, though lacking the dignity and repose of the almost contemporaneous art of the *Parthenon*.

phil- See *philo-*.

philabeg (fī'a-beg), *n.* Same as *filibeg*.

Philacte (fī-lak'tē), *n.* [NL. (Bannister, 1870), < *Gr. φιλεῖν*, love, + *ἀκτή*, sea-shore.] A genus of arctic maritime *Anatidae* of the subfamily *Anserinae*, having a variegated plumage without metallic tints, incised webs, rostral lamellæ exposed posteriorly, and skull with superorbital depression; the painted geese. *P. canagica* is the emperor-geese of Alaska, abounding at the mouth of the *Yukon*. The color is wavy bluish-gray, with lavender tinging and sharp black crescentic marks, the head, nape, and tail being white, the former often washed with amber,

the throat black speckled with white. Its flesh is rank and scarcely fit for food.

philactery, *n.* See *phylactery*.

Philadelphian¹ (fī-l-a-del'fī-an), *a.* and *n.* [*< Philadelphia* (see def.) + *-an*.] The name *Philadelphia*, usually explained to mean the 'city of brotherly love' (as if identical with *Gr. φιλαδέλφεια*, brotherly love), is taken from the LL. *Philadelphia*, < *Gr. Φιλαδέλφεια*, the name of a city of *Lydia* (Rev. i. 11, iii. 7), now *Ala-shehr* (also the name of a city in *Cilicia*, and of another in *Coele-Syria*), lit. 'city of *Philadelphus*,' namely, of *Attalus II.*, king of *Pergamum*, surnamed *Philadelphus* (Φιλάδελφος) on account of his affection for his brother *Eumenes*, whom he succeeded; < *φιλάδελφος*, loving one's brother or sister, < *φιλεῖν*, love, + *ἀδελφός*, brother, *ἀδελφή*, sister.] 1. *a.* Of or pertaining to *Philadelphia*, the chief city of *Pennsylvania*, situated on the *Delaware* and *Schuylkill* rivers.

II. *n.* A native or an inhabitant of the city of *Philadelphia*.

Philadelphian² (fī-l-a-del'fī-an), *a.* [*< L. Philadelphus* (< *Gr. Φιλάδελφος*, a man's name: see def.) + *-ian*. Cf. *Philadelphian*¹.] Pertaining to *Ptolemy Philadelphus*, king of *Egypt*, 283–247 B. C., a patron of literature, science, and art.

philadelphian³ (fī-l-a-del'fī-an), *n.* [*< F. philadelphie*, member of a society formed in France in the 17th century, < *Gr. φιλάδελφος*, loving one's brother: see *Philadelphian*¹.] One of a short-lived mystical denomination founded in England in the end of the seventeenth century.

philadelphite (fī-l-a-del'fīt), *n.* [*< Philadelphia* (see def.) + *-ite*².] A kind of vermiculite found near *Philadelphia* in *Pennsylvania*.

Philadelphus (fī-l-a-del'fus), *n.* [NL. (Linnaeus, 1737), < *Gr. Φιλάδελφος*, a sweet-flowering shrub, perhaps *jasmine*; named after *Ptolemy Philadelphus*, *Gr. Φιλάδελφος*, king of *Egypt*: see *Philadelphian*¹.] A genus of shrubs of the order *Saxifragales* and the tribe *Hydrangeæ*, characterized by the inferior ovary, numerous stamens, and four or five imbricate petals.

The 12 species are natives of central Europe, the southern United States, Japan, and the Himalayas. They bear round opposite leaves, and rather large flowers, corymbose or solitary in the axilla, white or straw-colored, and commonly fragrant. They are common in cultivation as ornamental shrubs, under the names *mock-orange* and *eyringia*. (For flower-section, see cut under *epiynous*.) *P. grandiflorus* and two other species are wild in the United States from *Virginia* southward.

Flowering Branch of Syringa or Mock-orange (*Philadelphus coronarius*). a, the fruit.

philamott, *n.* A bad spelling of *filemot*. *Holland*, tr. of *Pliny*.

Philampelus (fī-lam'pe-lus), *n.* [NL. (Harris, 1839), < *Gr. φιλάμπελος*, loving the vine, < *φιλεῖν*, love, + *ἀμπελος*, a vine.] A genus of sphingid moths of the subfamily *Chærocampinae*, includ-

Indies; in the larval state all are vine-feeders, whence the generic name. The larvae have the head small and globose, the anterior segments slender and retractile into the swollen third segments; and the anal horn is wanting in full-grown individuals, being replaced by a shining lenticular tubercle. *P. achemon* and *P. pandorus* or *satellitia* are abundant, and of economic importance from the damage done in vineyards by their larvae.

philander (fī-lan'dēr), *n.* [So called in allusion to *Philander*, as the name in old plays and romances of a lover, e. g. "*Philander*, Prince of *Cyprus*, passionately in love with *Erota*." one of the dramatic personæ of *Beaumont and Fletcher's* "*Laws of Candy*," and *Philander*, the name of a virtuous youth in *Ariosto's* "*Orlando Furioso*," between whom and a married woman named *Gabrina* there were certain tender passages; < *Gr. φιλάδελφος*, loving men, < *φιλεῖν*, love, + *άνθρωπος* (*άνδρ-*), man. Cf. *phylis*, *n.* and *v.*] 1. A lover.

This exceeds all precedent; I am brought to fine uses, to become a botcher of second hand marriages between *Abigails* and *Andrews*!—I'll couple you!—Yes, I'll baste you together, you and your *Philander*!

Congreve, *Way of the World*, v. 1.

2. In *zool.*, one of several different marsupial mammals. Specifically—(a) The Australian bandicoot, *Perameles lagotis*. (b) A South American opossum of one of several different species.

philander (fī-lan'dēr), *v. i.* [*< philander*, *n.* Cf. *phylis*, *v.*] To play the philander; pay court to a woman, especially without serious intention; make love in a foolish way; "spoon."

Sir Kit was too much taken up philandering to consider the law in this case. *Miss Edgeworth*, *Castle Rackrent*, II.

You must make up your mind whether you wish to be accepted: . . . you can't be philandering after her again for six weeks. *George Eliot*, *Daniel Deronda*, xiv.

philanderer (fī-lan'dēr-ēr), *n.* One who philanders; a male flirt.

At last, without a note of warning, appeared in *Beddeler* a phenomenon which rejoiced some hearts, but perturbed also the spirits, not only of the Oxford *philanderers*, but those of *Elisey Vavasour*.

Kingley, *Two Years Ago*, xix.

Philanthidæ (fī-lan'thi-dē), *n. pl.* [NL., < *Philanthus* + *-idæ*.] A family of fossorial hymenopterous insects, founded on the genus *Philanthus*. They have a narrow prothorax, three submarginal cells of the fore wings, the second and third of which receive each a recurrent nervure, and sessile or sub sessile abdomen. These wasps are small but beautiful; they prey chiefly on bees and beetles, and their burrows seldom exceed five inches in length. See cut under *Philanthus*.

philanthrope (fī-lan'thrōp), *n.* [*< F. philanthrope* = *Sp. filántropo* = *It. filántropo* = *Pg. philanthropo*, < *Gr. φιλόανθρωπος*, humane: see *philanthropy*.] A philanthropist.

He had a goodness of nature and disposition in so great a degree that he may be deservedly styled a *philanthrope*. *Roger North*, *Lord Guilford*, II. 127. (*Davies*.)

philanthropic (fī-lan'thrōp'ik), *a.* [= *F. philanthropique* = *Sp. filántropico* = *Pg. philanthropico* = *It. filántropico*, < *ML. *philanthropicus* (in adv. *philanthropice*), < *Gr. *φιλόανθρωπος*, a false reading for *φιλόανθρωπος*, humane, a philanthropist: see *philanthropy*.] Of or pertaining to philanthropy; characterized by or springing from love of mankind; actuated by a desire to do good to one's fellows.

The kindlier feeling of men is seen in all varieties of philanthropic effort. *H. Spencer*, *Social Statics*.

= *Syn.* Benevolent, humane.

philanthropical (fī-lan'thrōp'ik-al), *a.* [*< philanthropic* + *-al*.] Same as *philanthropic*.

philanthropically (fī-lan'thrōp'ik-al-i), *adv.* In a philanthropic manner; benevolently.

philanthropism (fī-lan'thrōp'i-nizm), *n.* [*< Gr. *φιλόανθρωπισμός* (a false reading for *φιλόανθρωπος*, humane: see *philanthropy*) + *-ism*.] A system of education on so-called natural principles, promoted by *Basedow* and his friends in Germany in the eighteenth century.

philanthropist (fī-lan'thrōp'ist), *n.* [*< philanthropic* + *-ist*.] An advocate of philanthropism.

philanthropism (fī-lan'thrōp'izm), *n.* [= *F. philanthropisme*; as *philanthropy* + *-ism*.] Philanthropy.

philanthropist (fī-lan'thrōp'ist), *n.* [*< philanthropy* + *-ist*.] One who is actuated by a philanthropic spirit; one who loves mankind, or wishes well to his fellow-men and endeavors to benefit them by active works of benevolence or beneficence; one who from philanthropic motives endeavors to do good to his fellows.

We all know the wag's definition of a *philanthropist*—a man whose charity increases directly as the square of the distance. *George Eliot*, *Middlemarch*, xxxviii.

philanthropic (fi-lan-thrō-pis'tik), *a.* [**Philanthropist** + *-ic*.] Relating to or characterizing professional philanthropists. [Rare.]

Over the wild-surfing chaos in the leaden air are only sudden glares of revolutionary lightning; then mere darkness with *philanthropic* phosphorescences, empty meteoric lights. *Carlyle, Sterling, v. (Davies).*

philanthropy (fi-lan-thrō-pi), *n.* [Formerly *philanthropie*; *< F. philanthropie = Sp. filantropía = Pg. filantropia = It. filantropia*; *< L.L. philanthropia*, *< Gr. φιλοανθρωπία*, humanity, benevolence, generosity, *< φιλοανθρωπος*, loving mankind, humane, benevolent, liberal, *< φιλεῖν*, love, + *άνθρωπος*, man.] Love of mankind, especially as evinced in deeds of practical beneficence and endeavors for the good of one's fellows.

They thought themselves not much concerned to acquire that God-like excellency, a *philanthropy* and love to all mankind. *Jer. Taylor, Works (ed. 1835), III. 1.*

= *Syn. Philanthropy, Charity*. Originally these words were the same, meaning the love of fellow-man, a sense which *philanthropy* retains, but *charity* (except in Biblical language: see 1 Cor. xiii, authorized version) has lost. Each expresses both spirit and action; but *philanthropy* cannot be applied to a concrete act, while *charity* may; hence we speak of a *charity*, but not of a *philanthropy*; on the other hand, as a spirit, *philanthropy* looks upon human welfare as a thing to be promoted, especially by preventing or mitigating actual suffering, while *charity*, outside of Biblical usage, is simply disposed to take as favorable a view as possible of the character, conduct, motives, or the like, of a fellow-man. As activity, *charity* helps men individually; *philanthropy* helps the individual as a member of the race, or provides for large numbers. *Philanthropy* agitates for prison-reform and the provision of occupation for released convicts; *charity* gives a released convict such personal help as he needs.

Philanthus (fi-lan'thus), *n.* [NL. (Fabricius, 1793), *< Gr. φιανθος*, loving flowers (cf. *Φιλανθος*, a man's name), *< φιλεῖν*, love, + *άνθος*, flower.] 1. In *entom.*, a notable genus of digger-wasps, typical of the family *Philanthidae*, having the third submarginal cell narrow and the antennæ inserted in the middle of the

Philanthus ventralis, natural size.

face, not far above the clypeus. There are 24 American and 5 European species. The British *P. apivorus* preys especially upon the hive-bee.

2. In *ornith.*, a genus of meliphagine birds. Also called *Manorrhina*. *Lesson, 1831.*

philantomba (fi-lan-tom'bā), *n.* [NL.; supposed to be a native name.] An African antelope of the genus *Cephalophus*, as *C. maxwelli*.

philargurous, *a.* [*< philargur-y + -ous*.] Money-loving; avaricious. *Sir R. L'Estrange.*

philargury (fi-lār'gū-ri), *n.* [Properly *philargyry*; ML. **philargyria*, *philargiria*, *< Gr. φιλαργυρία*, love of money, covetousness (the word used in 1 Tim. vi. 10), *< φιλάργυρος*, loving money, *< φιλεῖν*, love, + *άργυρος*, silver, money: see *argyrium*, *argent*.] Love of money; avarice.

philatelic (fi-lā-tel'ik), *a.* [*< philatēly + -ic*.] Of or relating to philately.

philatelist (fi-lat'e-list), *n.* [*< philatēly + -ist*.] A collector of postage-stamps and revenue-stamps as objects of curiosity or interest.

philately (fi-lat'e-li), *n.* [*< F. philatélie*, intended to mean 'the love of the study of all that concerns prepayment', i. e. of stamps, absurdly formed (by M. Herpin, a stamp-collector, in "Le Collectionneur," in 1865) *< Gr. φίλος*, loving (prop. *φιλεῖν*, love), + *τέλεος*, free of tax or charge (taken in the sense of 'prepaid'), *< ἀ-priv + τέλος*, tax, duty.] The fancy for collecting and classifying postage-stamps and revenue-stamps as objects of curiosity; also, the occupation of making such collections.

philauty (fi-lā-ti), *n.* [Also *philautie*; *< F. philautie = Sp. filautia = Pg. philautia = It. filautia*, *< Gr. φιλαυτία*, self-love, *< φιλαυτος*, loving oneself, *< φιλεῖν*, love, + *αὐτός*, self.] Love of self; selfishness.

Then *Philauty* and *Pride* shall stretch her Soul
With swelling poison, making her disdain
Heaven's narrow gate. *J. Beaumont, Psyche, I. 38.*

philazeri, *n.* A bad spelling of *filicer*.

philenor (fi-lē'nor), *n.* [NL., *< Gr. φίληνωρ*, *φιλάνωρ*, loving one's husband, *< φιλεῖν*, love, + *άνωρ*, man, husband. Cf. *philander*.] A butterfly, *Papilio philenor*, one of the handsomest of the North American swallowtails. The forewings are black with greenish metallic reflections; the hind are brilliant steel-blue with greenish reflections; the larva is velvety-black, covered with long black fleshy tubercles and shorter orange ones. It feeds upon plants of the genus *Aristolochia*, and is somewhat gregarious in early life. See cuts under *Papilio* and *Papilionidae*.

Philepitta (fi-lē-pit'ā), *n.* [NL. (Isidore Geoffroy St. Hilaire, 1838), *< Gr. φιλεῖν*, love, + NL.

Pitta.] The typical genus of *Philepittidae*, containing two Madagascan species, *P. castanea* and *P. schlegelii*. The systematic position of the genus has been much questioned, it having been classed with the *Pitidae* or Old World ant-thrushes, the birds of paradise, and the *Neotarnidae* or honey-suckers. The genus is also called *Brissonia*, *Buddingha*, and *Paides*.

Philepittidae (fi-lē-pit'ā-dē), *n. pl.* [NL., *< Philepitta + -idae*.] A family of mesomyodian passerine birds peculiar to Madagascar, typified by the genus *Philepitta*. The syrinx is bronchotracheal, with a peculiar modification of the bronchial half-rings and corresponding expansion of the muscular insertions. The tongue is penicillate, the tarsi are taxaspidean, the wing-coverts are long, the tail is short, and the male has a caruncle over the eye.

Philesia (fi-lē-si-ā), *n.* [NL. (Commerson, 1789), *< Gr. φίλησις*, affection, *< φιλεῖν*, love.] A genus of liliaceous plants of the tribe *Luzuriageæ*, distinguished by its one-nerved leaves and sepals shorter than the petals. The only species, *P. buzzifolia*, is the peepo, a smooth branching shrub from southern Chili and the straits of Magellan, bearing rigid alternate oblong leaves and showy drooping rose-red and waxy flowers, large and bell-shaped. Their contrast with the evergreen leaves makes it one of the handsomest of antarctic plants. It is also remarkable for its structure of bark, wood, and pith, similar to that of exogenous stems.

Philetarus (fi-lē-tē-rus), *n.* [NL. (orig. *Philetairus*, Sir Andrew Smith, 1837), *< Gr. φιλεῖν*, love, + *ταῖρος*, a companion: see *hetæra*.] A genus of sociable weaver-birds of the family

Social Weaver-bird (*Philetarus socius*), with its hive-nest.

Ploceidae, having as type *P. socius* of South Africa, the well-known social weaver, which builds its enormous umbrella-like nest in common with its fellows. See cut under *hive-nest*.

philharmonic (fi-lār-mon'ik), *a.* [= *F. philharmonique = Sp. filarmónico = Pg. philarmonico* = *It. filarmonico*, *< Gr. as if *φιλαρμονικός*, *< φιλεῖν*, love, + *άρμονία*, harmony: see *harmony*.] Loving harmony; fond of music; music-loving.

Philhellene (fi-hel'ēn), *n.* [*< F. philhellène = It. fielleno*, *< Gr. φιέλλην*, *< φιλεῖν*, love, + *Έλληνα*, a Greek, pl. *Έλληνες*, Greeks: see *Hellene*.] A friend of Greece; a foreigner who supports the cause and interests of the Hellenes; particularly, one who favored, supported, or actually assisted the modern Greeks in their successful struggle with the Turks for independence.

Philhellenic (fi-he-len'ik), *a.* [As *Philhellene* + *-ic*, after *Hellenic*.] Of or pertaining to Philhellenes; loving the Greeks.

Philhellenism (fi-hel'en-izm), *n.* [As *Philhellene* + *-ism*, after *Hellenism*.] Love of Greece; the principles of the Philhellenes.

Philhellenist (fi-hel'en-ist), *n.* [As *Philhellene* + *-ist*, after *Hellenist*.] Same as *Philhellene*.

Philhydrus (fi-hi'drus), *n.* [NL. (Solier, 1834), *< Gr. φιλόδρος*, loving water, *< φιλεῖν*, love, + *ὕδωρ* (ὕδρ), water.] In *entom.*, a large genus of water-beetles of the family *Hydrophilidae*, widely distributed and comprising species which have the last joint of the maxillary palpi shorter than the third. Also *Philhydrus* and *Holophilus*.

phillater (fi-lī'ā-tēr), *n.* [*< Gr. φίλατρος*, a friend of the art of medicine, *< φιλεῖν*, love, + *ιατρός*, a mediciner, physician: see *iatic*.] An amateur student of medicine.

philibeg, philigreet. Bad spellings of *filibeg, filigree*.

Philidor's defense. In chess-playing. See *opening*, 9.

philip (fi-lip), *n.* [Also contr. *phip*; a particular use of the proper name *Philip* (cf. "*Philip Sparrow*," the name of a poem of Skelton). The name *Philip* is *< F. Philippe = Sp. Filipo = Pg. Filippo = It. Filippo*, *< L. Philippus*, *< Gr. Φί-*

λιππος, lit. loving horses, *< φιλεῖν*, love, + *ἵππος*, horse.] 1. The common European house-sparrow, *Passer domesticus*.—2. The hedge-sparrow, *Accentor modularis*. [Prov. Eng.]

When *Philip* lyst to go to bed,
It is a heaven to hear my Philpe,
How she can chirp with chery lip.
Gascogne, Praise of Philip Sparrow. (Davies.)

Philip and Cheiney. [Also *Philip and Cheyne* (*Cheinie*, *Cheanie*, *Cheny*); from the proper names *Philip* and *Cheiny*, used like *Tom*, *Dick*, and *Harry*. The name *Cheiny*, *Cheyney*, survives in the surnames *Chency*, *Cheyne*.] 1. "Tom, Dick, and Harry"; any one and every one.

It was not his intent to bryng unto Sylla *philip* and *cheinie*, mo than a good meiny, but to bryng fable souldiours of manhood approued and well tried to his handes. *Udall, tr. of Apophthegms of Erasmus, p. 311. (Davies.)*

Loltersers I kept so meanie,
Both *Philip*, *Hob*, and *Cheanie*.
Tusser, p. 8. (Davies.)

2. Some stuff, apparently coarse or common, the exact character of which is uncertain. [In this use hyphenated as one word.]

'Twill put a lady scarce in *Philip-and-cheiney*,
With three small bugle-laces, like a chamber maid.
Beau. and Fl., Wit at Several Weapons, II. 1.

No cloth of silver, gold, or tissue here;
Philip-and-Cheiny never would appear
Within our bounds.
John Taylor, Praise of Hempseed.

Philippist, *n.* See *Philippist*.

Philippian (fi-lip'i-an), *a.* and *n.* [*< L. Philippianus*, *Philippian*, *< Philippi*, *< Gr. Φίλιππος*, *Philippi*, *< Φίλιππος*, *Philip*: see *philip*.] 1. *a.* Of or pertaining to Philippi or its inhabitants.

II. *n.* A native or an inhabitant of Philippi, a city of ancient Macedonia, the seat of an early Christian church, to which Paul addressed his Epistle to the Philippians.—*Epistle to the Philippians*, a letter addressed by the apostle Paul to the church in Philippi, in which he alludes to the close personal relations existing between himself and the members of that church, encourages them to remain in unity, and warns them against various dangers.

Philippic (fi-lip'ik), *n.* [= *F. philippique = Sp. filippica = Pg. filippica = It. filippica*, *< L. philippica*, *ec. oratio*, in plural *philippicæ orationes* (also absolutely *philippica*, neut. pl.), fem. of *Philippicus*, *< Gr. Φίλιππικός*, pertaining to Philip, *< Φίλιππος*, *Philip*: see *philip*.] 1. One of a series of orations delivered, in the fourth century B. C., by the Athenian orator Demosthenes, against Philip, king of Macedon, the father of Alexander the Great, in which the orator proclaims the imminent jeopardy of Athenian liberty, and seeks to arouse his fellow-citizens to a sense of their danger and to stimulate them to timely action against the growing power of Macedon. Hence.—2. [*i. c.*] Any discourse or declamation full of acrimony and invective. The orations of Cicero against Mark Antony are called *philippics*.

In a tone which may remind one of the similar *philippic* by his contemporary Dante against his fair countrywomen of Florence. *Fraser, Ferd. and Isa., I. 8, note 31.*

Philippic era. See *era*.

Philippin (fi-lip'in), *n.* [*< Philip* (see def.) + *-in*.] A member of a small Russian denomination, chiefly in Lithuania. It was founded by Philip Pustovat, about 1700; its members have no regular priests, and refuse military service and oaths.

philippine (fi-lip'ēn), *n.* Same as *philopena*.

Philippism (fi-lip'izm), *n.* [*< Philip* (see def.) + *-ism*.] The doctrines attributed to Philip Melancthon by his pupils and followers.

Philippist (fi-lip'ist), *n.* [*< Philip* (see def.) + *-ist*.] A pupil or follower of Philip Melancthon, a German theologian (1497–1560). Also spelled *Philipist*.

philippize (fi-lip'iz), *v.*; pret. and pp. *philippized*, ppr. *philippizing*. [= *F. philippiser*, *< Gr. φιλιππιζειν*, be on Philip's side, *< Φίλιππος*, *Philip*: see *Philippic*.] In defs. 1, 2, and II., *< philippic + -ize*.] I. *intrans.* 1. To side with Philip of Macedon; support or advocate the cause of Philip.

Its prestige (that of the oracle of Delphi) naturally vanished with the downfall of Greek liberty, after it began, as Demosthenes expressed it, to *philippize*, or to yield its authority to corrupt inducements. *G. P. Fisher, Begin. of Christianity, p. 108.*

2. To write or utter a philippic or invective; declaim. See *Philippic*.

With the best intentions in the world he naturally *philippizes*, and chaunts his prophetic song in exact unison with their designs. *Burke, Rev. in France.*

II. *trans.* To attack in a philippic; inveigh against.

He argued with us, *philippized* us, denounced us, and, as Nimrod said, "whipped us over the Almighty's back!" S. Judd, Margaret, iii.

Philister (fi-lis'ter), *n.* Same as *Philistine*, 3.
Philistian (fi-lis'ti-an), *a.* and *n.* [*< Philistia*, LL. *Philistea*, *Philisthaea* (see *Philistine*), + *-an*.] *I. a.* Of or pertaining to Philistia in Syria, or its inhabitants.

The cis-Jordan country . . . was the scene of a great development of the *Philistian* power.

Encyc. Brit., XVIII. 176.

II. n. A Philistine.

But, Colonel, they say you went to Court last night very drunk: nay, I'm told for certain you had been among the *Philistians*. Swift, Polite Conversation, I. (Davies.)

Philistinim (fi-lis'tim), *n.* [*< LL. Philisthim*, *< Heb. Plishtim*, pl.: see *Philistine*.] A *Philistine*: properly a plural (Hebrew), but used as a singular.

They served also the Gods of Aram, Zidon, Moab, Ammon, and the *Philistines*. Purchas, Pilgrimage, p. 136.

Those *Philistines* put out the fair and farre-sighted eyes of his natural discerning.

Milton, Church-Government, II., Con.

Philistine (fi-lis'tin), *n.* [= *F. Philistin*, *< LL. Philistini*, also *Philisthim*, *Philistines* (cf. *Ar. Filisti*, *Philistines*, *Filistin*, *Palestine*), *< Heb. Plishtim*, pl. *Plishtim*, the original inhabitants of Palestine (*Philistia*), *< palash*, wander about. In def. 3 *Philistine* is a translation of *G. Philister* (= *D. Philister* = *Sw. Dan. Filister*), a 'Philistine'), applied by German students in the universities, as "the chosen people" or "the children of light," to the townsmen, regarded as their enemies, or "the children of darkness."]

1. One of a warlike immigrant people, of disputed origin, who inhabited parts of Philistia or Palestine, and contested the possession and sovereignty of it with the Israelites, and continued to harass them with much persistency for several centuries. Hence—2. A heathen enemy; an unfeeling foe: used humorously, for example, of a bailiff or sheriff's officer.

She was too ignorant of such matters to know that, if he had fallen into the hands of the *Philistines* (which is the name given by the faithful to bailiffs), he would hardly have been able so soon to recover his liberty.

Fielding, Amelia, v. 6. (Davies.)

3. In Germany, one who has not been trained in a university: so called by the students. [Slang.] Hence—4. A matter-of-fact, commonplace person; a man upon whom one can look down, as of culture inferior to one's own; one of "parochial" intellect; a satisfied person who is unaware of his own lack of culture.

The people who believe most that our greatness and welfare are proved by our being very rich, and who most give their lives and thoughts to becoming rich, are just the very people whom we call *Philistines*.

M. Arnold, Sweetness and Light, § 18.

Philistinism (fi-lis'tin-izm), *n.* [= *F. philistinisme*; as *Philistine* + *-ism*.] The character or views of *Philistines*. See *Philistine*, 3, 4.

Out of the steady humdrum habit of the creeping Saxon, as the Celt calls him—out of his way of going near the ground—has come, no doubt, *Philistinism*, that plant of essentially Germanic growth, flourishing with its genuine marks only in the German fatherland, Great Britain and her colonies, and the United States of America. M. Arnold.

philizert, *n.* A bad spelling of *filacer*.

phill-horset, *n.* A bad spelling of *fill-horse*.

phillibeg, *n.* A bad spelling of *filibeg*.

philipena, *n.* See *philopena*.

philipsite (fil'ip-sit), *n.* [Named after W. Phillips, an English mineralogist (died 1828).] In *mineral*, a hydrous silicate of aluminium, calcium, and potassium, commonly found in cruciform twin crystals. It is a member of the zeolite group, and is closely related to harmotome. It occurs chiefly in basaltic rocks, but was obtained also by deep-sea dredging by the Challenger expedition. Also called *christianite*.

Phillyrea (fi-lir'ē-ŷ), *n.* [NL. (Tournefort, 1700), fancifully transferred from *Gr. φιλύρεα* (Theophrastus), an unidentified shrub, *< φιλύρα*, the linden-tree.] A plant-genus of the gamopetalous order *Oleaceæ* and the tribe *Oleineæ*, distinguished by broad imbricated corollalobes, and a drupe with a thin stone. The 4 species are native of the Mediterranean region and the East. They are smooth shrubs with opposite evergreen leaves, and small greenish-white flowers clustered in the axilla, hardy and adapted to seaside planting, forming compact and ornamental roundish masses, called *jasmine box* from the relationship to the *jasmine* and resemblance to box.

philo- [*F. philo-* = *Sp. It. filo-* = *Pg. philo-*, *< L. philo-*, *< Gr. φίλος*, before a vowel or rough breathing *φίλ-*, combining form of *φιλέω* (ind. pres. *φίλω*), love, regard with affection, be fond of, like or like to do, be wont to do, etc.; *< φίλος*, loved, beloved, dear, pleasing; as a noun, a friend, neut. *φίλον*, an object of love; later, in

poet. use, in an active sense, loving, friendly, fond; orig. own, one's own (as in Homer); perhaps, with adj. formative *-λος*, and with loss of initial *σ*, from the root of *σφείζ* (dat. *σφαισ*, *σφαισιν*, *σφιν*, *σφί*, dial. *φιν*, *ψιν*, *ψε*, etc., acc. *σφέας*, *σφε*, etc.), themselves, *√ sta*, = *L. suus*, his, their (own), etc. The element *φίλο-*, in composition, is usually explained as "*φίλος*, loving," but the adj. is not so used in composition; the element *φίλο-* represents *φιλέω*, love, as the element *μωσ-*, of opposite meaning, represents *μισέω*, hate.] An element in many words of Greek origin or formation, representing a verb meaning 'to love.' See etymology, and words following. It is opposed to *μισ-*, as in *misogynist*, etc. Before a vowel or *h* it becomes *phil-*, as in *Phil-American*, *Philhellenic*, etc. It occurs terminally (Latin *-philus*, Greek *-φίλος*, properly passive) in *bibliophile*, *Russophile*, etc.

philobiblical (fil-ō-bib'li-kal), *a.* [*< Gr. φιλέω*, love, + *LL. biblia*, the Bible: see *biblical*. Cf. *Gr. φιλόβιβλος*, loving books.] Devoted to Biblical study.

The Duke of Brunswick, hearing of Hardt's fame, appointed him his librarian shortly after the Orientalist had founded at Leipzig a *philobiblical* society, with the object of determining the sacred text. Encyc. Brit., XI. 476.

philocalist (fil'ō-kal-ist), *n.* [*< Gr. φιλόκαλος*, loving the beautiful (*< φιλέω*, love, + *καλός*, beautiful), + *-ist*.] A lover of the beautiful. [Rare.]

philodemic (fil-ō-dem'ik), *a.* [*< Gr. φιλόδημος*, a friend of the people, *< φιλέω*, love, + *δῆμος*, people.] Loving the people.

Philodendrea (fil-ō-den-dre-ē), *n. pl.* [NL. (Schott, 1832), *< Philodendron* + *-ea*.] A tribe of monocotyledonous plants of the order *Araceæ* and the subfamily *Philodendroideæ*, distinguished by their habit as erect sympodial shrubs, often branching or climbing, by their orthotropous or anatropous and often long-stalked ovules, and by the rudimentary stamens sometimes present in the pistillate flowers. It includes 9 genera, all tropical, of which *Philodendron* is the type.

philodendrist (fil-ō-den-drist), *n.* [*< Gr. φιλόδενδρος*, loving trees (*< φιλέω*, love, + *δένδρον*, a tree), + *-ist*.] A lover of trees. Lowell, Study Windows, p. 44.

Philodendroideæ (fil'ō-den-droi-dē-ē), *n. pl.* [NL. (Engler, 1879), *< Philodendron* + *-oideæ*.] A subfamily of the order *Araceæ*, distinguished by a spadix staminate below, flowers without perianths (usually with distinct stamens), albuminous seeds, an axillary embryo, and abundant tubular unbranched laticiferous ducts. It includes 4 tribes and 12 genera, of which *Philodendron* is the type. See also *Pollandra* and *Richardia*.

Philodendron (fil-ō-den'dron), *n.* [NL. (Schott, 1830), *< Gr. φιλόδενδρος*, loving trees, *< Gr. φιλέω*, love, + *δένδρον*, a tree.] A genus of araceous plants, type of the tribe *Philodendrea* and the subfamily *Philodendroideæ*, characterized by a fruit not included in the persistent spathe, stamens united into a prismatic body, and distinct two- to ten-celled ovaries with the orthotropous ovules fixed to the inner angle of the cells. There are about 120 species, natives of tropical America. They are climbing shrubs, with broad coriaceous leaves and short terminal or axillary peduncles, commonly in clusters. They bear fleshy white, red, or yellowish spathe, and a closely flowered spadix, followed by a dense mass of berries. (See *Araceæ*.) Some West Indian species are there known as *wake-robin*.

philofelist (fi-lof'e-list), *n.* [*< Gr. φιλέω*, love, + *L. felis*, a cat: see *Felis*.] A lover of cats. [Rare.]

Dr. Southey, who is known to be a *philofelist*, and confers honours upon his cats according to their services, has raised one to the highest rank in peerage. Southey, The Doctor, Fragment of Interchapter. (Davies.)

philogalist (fi-log'a-list), *n.* [*< Gr. φιλέω*, love, + *γάλα*, milk: see *galaxy*.] A lover of milk. [Rare.]

You . . . are a *philogalist*, and therefore understand . . . cat nature. Southey, Letters (1821), III. 240. (Davies.)

philogalic (fi-ō-gär'lik), *a.* [*< Gr. φιλέω*, love, + *E. garlic*.] Loving garlic; fond of garlic. De Quincey, Spanish Nun. [Rare.]

philogynist (fi-loj'i-nist), *n.* [*< philogyn-y* + *-ist*.] A lover of women: the opposite of *misogynist*.

There are "*philogynists*" as fanatical as any "*misogynists*," who, reversing our antiquated notions, bid the man look upon the woman as the higher type of humanity; who ask us to regard the female intellect as the clearer and the quicker, if not the stronger.

Huxley, Lay Sermons (1870), p. 21.

philogyny (fi-loj'i-ni), *n.* [= *F. philogynie*, *< Gr. φιλογυνία*, love of women, *< φιλόγυνος*, loving women, *< φιλέω*, love, + *γυνή*, woman.] Fondness or admiration for women; love of women: the opposite of *misogyny*.

We will therefore draw a curtain over this scene, from that *philogyny* which is in us.

Fielding, Jonathan Wild, I. 10.

Because the Turks so much admire *philogyny*, Although their usage of their wives is sad.

Byron, Beppo, st. 70.

Philohela (fi-lō'he-lā), *n.* [NL. (G. R. Gray, 1841), prop. **Philela*, *< Gr. φιλέω*, love, + *ἐλος*, a marsh.] A genus of *Sceloporidae*, having short rounded wings, the three outer primaries of which are emarginate and attenuate; the American woodcocks. *P. minor* is the common woodcock of the United States, generically distinct from the European woodcock, *Scelopox rusticula*. See *woodcock*. Also called *Microptera*.

Philohellenian (fil'ō-he-lō'ni-an), *n.* [For **Philhellenian*; as *Philhellene* + *-ian*.] Same as *Philhellene*. Arnold.

philologer (fi-lol'ō-jēr), *n.* [*< philolog-y* + *-er*. Cf. *philologue*.] Same as *philologist*, and formerly in more common use.

philologist (fi-lō'j'i-an), *n.* [*< philology* + *-an*.] Same as *philologist*.

philologic (fi-lō'j'ik), *a.* [= *F. philologique* = *Sp. filológico* = *Pg. filológico* = *It. filologico* (cf. *D. filologisch* = *G. philologisch* = *Sw. Dan. filologisk*), *< MGR. φιλόλογος*, pertaining to philology or learning, *< Gr. φιλόλογια*, philology, learning: see *philology*.] Of or pertaining to philology, or the study of language: as, *philologic learning*.

philological (fi-lō'j'i-kal), *a.* [*< philologic* + *-al*.] Relating to or concerned with philology: as, *philological study*; the American *Philological Association*.

philologically (fi-lō'j'i-kal-i), *adv.* In a philological manner; as regards philology.

philologist (fi-lol'ō-jist), *n.* [*< philolog-y* + *-ist*.] One who is versed in philology. Also *philologer*, *philologist*, *philologue*.

Learn'd *philologists*, who chase

A panting syllable through time and space.

Cowper, Retirement, l. 601.

philologize (fi-lol'ō-jiz), *v. i.*; pret. and pp. *philologized*, ppr. *philologizing*. [*< philology* + *-ize*.] To discuss questions relating to philology.

Nor is it here that we design to enlarge, as those who have *philologized* on this occasion. Evelyn.

philologue (fi-lō'log), *n.* [= *D. filoloog* = *G. philolog* = *Sw. Dan. filolog*, *< F. philologue* = *Sp. filólogo* = *Pg. filólogo*, *filologo* = *It. filologo* = *Russ. filolog*, a philologist; *< L. philologus*, a man of letters, a scholar; as adj., studious of letters, versed in learning, scholarly; *< Gr. φιλόλογος*, a learned man, student, scholar; prop. adj., fond of learning and literature, etc.: see *philology*.] Same as *philologist*.

This is the fittest and most proper hour wherein to write these high matters and deep sentences, as Homer knew very well, the paragon of all *philologues*.

Urruhart, tr. of Rabelais, I., Author's Prol. (Davies.)

The combination . . . was and is a fact in language; and its evolution was the effect of some philological force which it is the business of *philologues* to elucidate.

Latham, Elements of Comparative Philology, II. 1, 2.

philology (fi-lol'ō-ji), *n.* [Formerly *philologie*; = *D. filologie* = *G. philologie* = *Sw. Dan. filologi*; *< F. philologie* = *Sp. filología* = *Pg. philologia*, *filologia* = *It. filologia* = *Russ. filologiya*, philology (see def.), *< L. philologia*, love of learning and literature (Cicero), explanation and interpretation of writings (Seneca), *< Gr. φιλόλογια*, love of dialectic or argument (Plato), love of learning and literature (Isocrates, Aristotle), the study of language and history (Plutarch, etc.), in later use learning in a wide sense; *< φιλόλογος*, fond of words, talkative (wine was said to make men so) (Plato), fond of speaking (said of an orator) (Plato), fond of dialectic or argument (Plato), fond of learning and literature, literary, studious, learned (Aristotle, Plutarch, etc.); of books, learned, scientific (Cicero), later also studious of words (Plotinus, Proclus, etc.); as a noun, a learned man, student, scholar (see *philologue*); *< φιλέω*, love, + *λόγος*, word, speech, discourse, argument: see *Logos*, and cf. *-ology*.] The love or the study of learning and literature; the investigation of a language and its literature, or of languages and literatures, for the light they cast upon men's character, activity, and history. The word is sometimes used more especially of the study of literary and other records, as distinguished from that of language, which is called *linguistics*; often, on the other hand, of the study of language or of languages. See quotation under *comparative philology*, below.

Philology . . . deals with human speech, and with all that speech discloses as to the nature and history of man.

Whitney, Encyc. Brit., XVIII. 768.

Comparative philology, the study of languages as carried on by the comparative method; investigation, by means of a comparison of languages, of their history, relationships, and characteristics, within narrower or wider limits; linguistic science; linguistics; glossology.

Philology, whether classical or oriental, whether treating of ancient or modern, of cultivated or barbarous languages, is an historical science. Language is here treated simply as a means. The classical scholar uses Greek or Latin, the oriental scholar Hebrew or Sanskrit, or any other language, as a key to an understanding of the literary monuments which bygone ages have bequeathed to us, as a spell to raise from the tomb of time the thoughts of great men in different ages and different countries, and as a means ultimately to trace the social, moral, intellectual, and religious progress of the human race. . . . In comparative philology the case is totally different. In the science of language, languages are not treated as a means; language itself becomes the sole object of scientific inquiry. Dialects which have never produced any literature at all, the jargons of savage tribes, the clicks of the Hottentots, and the vocal modulations of the Indo-Chinese, are as important, nay, for the solution of some of our problems, more important, than the poetry of Homer or the prose of Cicero. We do not want to know languages, we want to know language; what language is, how it can form a vehicle or an organ of thought; we want to know its origin, its nature, its laws, and it is only in order to arrive at that knowledge that we collect, arrange, and classify all the facts of language that are within our reach.

Max Müller, Science of Language, 1st ser., Lect. 1.

Philomachus (fil-om'ā-kus), *n.* [NL. (Moehring, 1752), < Gr. *φιλόμαχος*, loving fight, < *φιλέιν*, love, + *μαχη*, fight.] A genus of wading birds of the family *Scolopacidae*; the ruffs and reeves; synonymous with *Machetes* and with *Pavonella*.

philomath (fil'ō-math), *n.* [= It. *filomate*, < Gr. *φιλόμαθος*, fond of learning, < *φιλέιν*, love, + *μάθος*, learning, < *μανθάνειν*, *μαθεῖν*, learn.] A lover of learning.

A solemn disputation in all the mysteries of the profession, before the face of every *philomath*, student in astrology, and member of the learned societies.
Goldsmith, Citizen of the World, lxxviii.

philomathematic (fil'ō-math-ē-mat'ik), *n.* [< Gr. *φιλέιν*, love, + *μάθημα*, learning, > *μαθηματικός*, mathematic; see *mathematic*.] Same as *philomath*. *Settle*.

Philonthidae (fi-lon'thi-dē), *n. pl.* [NL., < *Philonthus* + *-idae*.] A family of rove-beetles, named by Kirby in 1837 from the genus *Philonthus*.

Philonthus (fi-lon'thus), *n.* [NL. (Curtis, 1825), < Gr. *φιλέιν*, love, + *θύκος*, dung.] A very large and wide-spread genus of rove-beetles, comprising more than 200 species, found in all quarters of the globe. They have the ligula entire, the femora unarmed, and the last joint of the labial palpi slender. They are insects of small size, and of the usual rove-beetle habits, except that some species inhabit ants' nests.

Eighty-five species are found in the United States and Canada. See *cut* under *rove-beetle*.

philopena (fil'ō-pē'nā), *n.* [A rural or provincial word of undetermined origin and unsettled spelling, being variously written *philopena*, *philipena*, *philippena*, *filopena*, also *philopene*, *philippine*, *filippen*, *filippen*, etc., the spelling *philopena* simulating a Greek origin, as if 'a friendly forfeit,' < Gr. *φίλος*, loving, friendly, + *παινή*, a penalty (see *pain*), *pine*2]. The correct form appears to be *philippine* (= F. *philippine*, D. *filippine*, Sw. *filipin*, Dan. *filipine*), < G. *Philippine*, fem. of *Philipp*, Philip, these names being used by the man and woman respectively in greeting the other party to the compact. The use of the name *Philippine* is referred by some to the tradition that St. Philip's two daughters were buried (at Hierapolis) in one sepulcher. The word is commonly said to be a corruption of G. *vielliebchen*, 'sweetheart' (used in address), lit. 'very darling,' < *viel*, much, very, + *liebchen* (= MD. *liefsken*), sweetheart, darling; see *feel*2 and *liefskin*.] 1. A custom or game of reputed German origin: two persons share a nut containing two kernels, and one of them incurs the obligation of giving something as forfeit to the other, either by being first addressed by the latter with the word *philopena* at their next meeting, or by receiving something from the other's hand, or by answering a question with yes or no, or by some other similar test as agreed upon.—2. The salutation in the game or custom thus described.—3. The kernel of the nut used in the game.

philopolemic (fil'ō-pō-lem'ik), *a.* [(< Gr. *φιλοπόλεμος*, *φιλοπτόλεμος*, loving war, < *φιλέιν*, love, + *πόλεμος*, war; see *polemic*.] Loving war or combat; fond of debate or controversy. [Rare.]

philopolemic (fil'ō-pō-lem'ik-al), *a.* [(< *philopolemic* + *-al*.] Same as *philopolemic*.

Philoponist (fi-lōp'ō-nist), *n.* [(< *Philopon-us* (see *def.*) + *-ist*.] A member of a sect of Trinitarians, followers of John Philoponus, an Alexandrian of the sixth century. See *Trinitarian*.

philoprogenity (fil'ō-prō-jē-nē'ti), *n.* [Irreg. < Gr. *φιλέιν*, love, + L. *progenies*, offspring, + *-ity*.] Love of offspring; philoprogenitiveness. *Science*, XII. 124.

philoprogenitiveness (fil'ō-prō-jē-nē'tiv-nes), *n.* [Irreg. < Gr. *φιλέιν*, love, + L. *progenies* (see *progeny*) + *-itiveness*.] In phrenol., the love of offspring; the instinctive love of young in general. Phrenologists locate its organ above the middle part of the cerebellum.

One of those travelling chariots or family arks which only English *philoprogenitiveness* could invent.
Thackeray, Pendennis, xxii.

Philopteridae (fil-op-ter'i-dē), *n. pl.* [NL. (Burmeister, 1838), < *Philopterus* + *-idae*.] One of the principal families of mallophagous insects, having no tarsal cushions, no maxillary palpi, and filiform antennae with five or three joints, typified by the genus *Philopterus*. They infest the skins of birds and mammals.

Philopterus (fi-lōp'te-rus), *n.* [NL. (Nitzsch, 1818), < Gr. *φιλέιν*, love, + *πτερόν*, a feather.] A genus of bird-lice, or *Mallophaga*, having five-jointed antennae and two-jointed tarsi, typical of the *Philopteridae*. They are small insects of much-varied patterns, living in the feathers on the neck and under the wings of birds. *P. holosericeus* is a common parasite of the domestic fowl in Europe.

philornithic (fil'ō-rnith'ik), *a.* [(< Gr. *φιλορνωθία*, fondness for birds; < Gr. *φιλέιν*, love, + *ὄρνις* (ὄρνιθ-), a bird.] Bird-loving; fond of birds. [Rare.]

The danger has happily this year been met by the public spirit of a party of *philornithic* gentlemen.
Contemporary Rev., LIV. 184.

philosoph (fil'ō-sof), *n.* [ME. *filosofe* (AS. *philosoph* = D. *filosofo* = G. *philosoph* = Sw. Dan. *filosof*), < OF. *filosofo*, *philosophie*, F. *philosophe* = Pr. *philosophe* = Sp. *filósofo* = Pg. *filosofo* = It. *filosofo*, < L. *philosophus*, < Gr. *φιλόσοφος*, a philosopher; see *philosophy*. Cf. *philosopher*.] A philosopher: a word sometimes used with a contemptuous implication as nearly equivalent to *philosophaster*. Also, as French, *philosophe*.

A little light is precious in great darkness; nor, amid myriads of poetsasters and *philosophes*, are poets and philosophers so numerous that we should reject such when they speak to us in the hard, but manly, deep, and expressive tones of that old Saxon speech which is also our mother-tongue.
Carlyle, State of German Literature.

philosophaster (fi-lōs'ō-fas-tēr), *n.* [= F. *philosophastre* = Sp. It. *filosofastro*, < L. *philosophaster*, < L. *philosophus*, a philosopher, + *dim.*

suffix *-aster*.] A pretender to philosophical knowledge; an incompetent philosopher.

Of necessity there must be such a thing in the world as incorporeal substance, let inconsiderable *philosophasters* hoot and deride as much as their follies please.

Dr. H. More, Immortal of Soul, l. 14.

philosophate (fi-lōs'ō-fāt), *v. i.* [(< L. *philosophatus*, pp. of *philosophari* (> It. *filosofare* = Sp. *filosofar* = Pg. *filosofar* = F. *philosopher*, > D. *filosoferen* = G. *philosophiren* = Sw. *filosofera* = Dan. *filosofere*), philosophize, < *φιλοσοφία*, philosophy, a philosopher; see *philosophy*.] To philosophize. *Barrow, Works, l. xii.*

philosophation (fi-lōs'ō-fā'shōn), *n.* [(< *philosophate* + *-ion*.] The act of philosophizing; philosophical speculation. *Sir W. Pettie, Advice to Hartliit, p. 18.*

philosophema (fi-lōs'ō-fē-mā), *n.* [NL., < Gr. *φιλοσοφημα*, a demonstration, < *φιλοσοφείν*, philosophize, < *φιλόσοφος*, a philosopher; see *philosophy*.] Same as *philosopheme*.

philosopheme (fi-lōs'ō-fēm), *n.* [= F. *philosophème*, < NL. *philosophema*; see *philosophema*.] 1. Properly, a perfect demonstration. Hence —2. A theorem; a philosophical truth.

This, the most venerable, and perhaps the most ancient, of the Grecian myths, is a *philosopheme*.
Coleridge.

philosopher (fi-lōs'ō-fēr), *n.* [(< ME. *philosophre*, *philosofre*, with term. *-re*, *-er*; earlier *filosofe*, < OF. *filosofo*, *philosophie*, a philosopher; see *philosoph* and *philosophy*.] 1. One who is devoted to the search for fundamental truth; in a restricted sense, one who is versed in or studies the metaphysical and moral sciences; a metaphysician. The application of the term to one versed in natural science or natural philosophy has become less common since the studies of physicists have been more specialized than formerly.

He said: But who are the true *philosophers*?
Those, I said, who are lovers of the vision of truth.
Plato, Republic (tr. by Jowett), v. § 475.

He who has a taste for every sort of knowledge, and who is curious to learn and is never satisfied, may justly be termed a *philosopher*. Am I not right?
Plato, Republic (tr. by Jowett), v. § 475.

Philosophers, who darken and put out
Eternal truth by everlasting doubt.
Couper, Progress of Error, l. 472.

2. One who conforms his life to the principles of philosophy, especially to those of the Stoical school; one who lives according to reason or the rules of practical wisdom.

Be mine a *philosopher's* life in the quiet woodland ways,
Where, if I cannot be gay, let a passionless peace be my lot.
Tennyson, Maud, iv. 2.

3. An alchemist: so called with reference to the search for the philosopher's stone.

But albe that he was a *philosophere*,
Yet hadde he but litel gold in cofre.
Chaucer, Gen. Prolog. to C. T., l. 297.

Hence—4. One who deals in any magic art.

"Allas!" quod he, "allas that I blighthe
Of pure gold a thousand pound of wighte
Unto this *philosophere*."
Chaucer, Franklin's Tale, l. 833.

A priori philosopher. See *a priori*.—**Philosopher's egg**, a medicine compounded of the yolk of an egg, saffron, etc., formerly supposed to be an excellent preservative against all poisons, and against plague and other dangerous diseases. *Nares*.—**Philosopher's game**, an intricate game, played with pieces or men of three different forms, round, triangular, and square, on a board resembling two chess-boards united. *Hallivell*.—**Philosophers of the garden**. philosophy (fil-ō-sōf'i), *n.*; *pl. philosophies* (-fiz). [*< ME. philosophie, filosofie, < OF. philosophie, filosofie, F. philosophie = Sp. filosofia = Pg. filosofia = It. filosofia = D. filosofie = G. philosophia = Dan. Sw. filosofi, < L. philosophia, < Gr. φιλοσοφία, love of knowledge and wisdom, < φιλόσοφος, a philosopher, one who speculates on the nature of things, existence, freedom, and truth; in eccl. writers applied to one who leads a life of contemplation and self-denial; lit. 'one who loves wisdom' (a term first used, according to the tradition, by Pythagoras, who preferred to call himself φιλόσοφος, one who loves wisdom, instead of σοφός, a sage); in later use (Hesychius) in the sense 'loving a handicraft or art';*

< φιλεῖν, love, + σοφία, wisdom, skill, art, < σοφός, wise, skilful: see sophist.] 1. The body of highest truth; the organized sum of science; the science of which all others are branches; the science of the most fundamental matters. This is identified by different schools—(a) with the account of the elementary factors operative in the universe; the science of principles, or the matter, form, causes, and ends of things in general; (b) with the science of the absolute; metaphysics; (c) with the science of science; the theory of cognition; logic. In Greek, *philosophy* originally signified culture; but from Aristotle down it had two meanings—(a) speculative knowledge, and (b) the study of the highest things, metaphysics. Chrysippus defined it as the science of things divine and human. In the middle ages *philosophy* was understood to embrace all the speculative sciences: hence the faculty and degree of arts in German universities are called the faculty and degree in *philosophy*.

In *philosophy*, the contemplations of man do either penetrate unto God or are circumscribed to nature, or are reflected or reverted upon himself. Out of which several inquiries there do arise three knowledges, divine *philosophy*, natural *philosophy*, and human *philosophy*, or human-ity.

Bacon, Advancement of Learning, II.

Philosophy has been defined:—The science of things divine and human, and the causes in which they are contained;—The science of effects by their causes;—The science of sufficient reasons;—The science of things possible, inasmuch as they are possible;—The science of things, evidently deduced from first principles;—The science of truths, sensible and abstract;—The application of reason to its legitimate objects;—The science of the relations of all knowledge to the necessary ends of human reason;—The science of the original form of the ego or mental self;—The science of science;—The science of the absolute;—The science of the absolute indifference of the ideal and real.

Sir W. Hamilton, Metaphysics, iii.

All knowledge of reason is . . . either based on concepts or on the construction of concepts; the former being called philosophical, the latter mathematical. . . . The system of all philosophical knowledge is called *philosophy*. It must be taken objectively, if we understand by it the type of criticising all philosophical attempts, which is to serve for the criticism of every subjective *philosophy*, however various and changeable the systems may be. In this manner *philosophy* is a mere idea of a possible science which exists nowhere in the concrete, but which we may try to approach on different paths. . . . So far the concept of *philosophy* is only scholastic. . . . But there is also a universal, or, if we may say so, a cosmical concept (conceptus cosmicus) of *philosophy*, which always formed the real foundation of that name. . . . In this sense *philosophy* is the science of the relations of all knowledge to the essential aims of human reason.

Kant, Critique of Pure Reason (tr. by Müller), II. 719.

Philosophy is an all-comprehensive Synthesis of the doctrines and methods of science; a coherent body of theorems concerning the Cosmos, and concerning Man in his relations to the Cosmos of which he is a part.

J. Fichte, Cosmic Philos., I. 9.

That *philosophy* only means psychology and morals, or in the last resort metaphysics, is an idea slowly developed through the eighteenth century, owing to the victorious advances of science.

Edinburgh Rev., CLXV. 96.

2. A special branch of knowledge of high speculative interest. (*a*) Any such science, as alchemy (in Chaucer).

Voydeth your man and lat him be theroute,
And shet the dore, whyls we ben aboute
Our privitye, that no man us espye
Whyls that we werke in this *philosophye*.

Chaucer, Canon's Yeoman's Tale, l. 128.

(*b*) Theology: this use of the word was common in the middle ages. (*c*) Psychology and ethics; moral philosophy.

(*d*) Physics; natural philosophy.

3. The fundamental part of any science; proædæutic considerations upon which a special science is founded; general principles connected with a science, but not forming part of it; a theory connected with any branch of human activity: as, the *philosophy* of science; the *philosophy* of history; the *philosophy* of government.—4. A doctrine which aims to be philosophy in any of the above senses.

But who so coude in other thing him grope,
Thanne hadde he spent al his *philosophie*.

Chaucer, Gen. Prolog. to C. T., l. 645.

There are more things in heaven and earth, Horatio,
Than are dreamt of in your *philosophy*.

Shak., Hamlet, l. 5. 167.

Of good and evil much they argued then,
Of happiness and final misery,
Passion and apathy, and glory and shame;
Vain wisdom all, and false *philosophy*.

Milton, P. L., II. 565.

We may return to the former distribution of the three *philosophies*, divine, natural, and human.

Bacon, Advancement of Learning, II. 152.

We shall in vain interpret their words by the notions of our *philosophy* and the doctrines in our schools.

Locke.

5. A calm temper which is unruffled by small annoyances; a stoical impassiveness under adversity.—*Association philosophy*. See *association*.

—*Atomic or atomistic philosophy*. See *atomic*.

—*Atomist philosophy*, the philosophy of St. Augustine and other fathers of the church.—*Constructive philosophy*, the philosophy of Schelling and others, as opposed to the merely destructive philosophy of Kant.

—*Corpuscular philosophy*, the doctrine of atoms considered as a philosophy or general explanation of the phenomena of the world, particularly that form of the doctrine advocated by Robert Boyle.—*Critical philosophy*.

philostorgy (fil-ō-stōr-jī), *n.* [*< Gr. φιλοστοργία, tender love, < φιλόστοργος, loving, tenderly affectionate, < φιλεῖν, love, + στοργή, affection, < στέργειν, love.*] Natural affection, such as that of a mother for her child.

philotechnic (fil-ō-tek'nik), *a.* [= *F. philotechnique, < Gr. φιλότεχνος, fond of art, < φιλεῖν, love, + τέχνη, art: see technic.*] Having a fondness for the arts, or a disposition to study or foster them; devoted to study of the arts, or to promoting advancement in them.

philotechnical (fil-ō-tek'nik-al), *a.* [*< philotechnic + -al.*] Same as *philotechnic*.

philotheseosophical (fil-ō-thē-sōf'is-kal), *a.* [*< philo(sophical) + theosophical.*] Relating to philosophy and theosophy. [Rare.]

King of Berytus, to whom Sanchoniathon dedicated his *philotheseosophical* writings.

Cooper, Arch. Dict., p. 10.

philozoic (fil-ō-zō'ik), *a.* [*< Gr. φιλοζωῖν, love, + ζῶν, an animal, + -ic.*] Having a tenderness for brute creatures; characterized or prompted by fondness for animals. [Rare.]

philter, philtre (fil'ter), *n.* [Formerly also *filter*; *< F. philtre, filtre = Sp. filtro = Pg. filtro = It. filtro, < L. philtrum, < Gr. φίλτρον, a love-charm; prop. φίλητρον, < φιλεῖν, love: see philo-*] A potion supposed to have the power of exciting sexual love; a love-potion.

They can make friends enemies and enemies friends by *philters*.

Burton, Anat. of Mel., p. 123.

The caillachs (old Highland hags) administered drugs which were designed to have the effect of *philters*.

Scott, Rob Roy, Int.

philter, philtre (fil'ter), *v. t.*; pret. and pp. *philtered, philtred*, ppr. *philtering, philtring*. [*< philter, n.*] 1. To impregnate with a love-potion: as, to *philter* a draught.—2. To excite to sexual love or desire by a potion. *Dr. H. More*.

Her eyes, in mine poured, frenzy-philtred mine.

Love, Endymion, II.

philtrum (fil'trum), *n.* [*L.: see philter.*] A philter.

Love itself is the most potent *philtrum*.

Burton, Anat. of Mel., p. 494.

Philydor (fil'i-dōr), *n.* [NL. (Spix, 1824), *< Gr. φιλεῖν, love, + ὕδωρ, water.*] A genus of South

Philydor superciliosus.

American synallaxine birds, of the family *Dendrocolaptidae*, containing numerous species, such as *P. superciliosus* of Brazil.

Philydraceæ (fil-i-drā'sē-ē), *n. pl.* [NL. (Lindley, 1836), *< Philydrum + -aceæ.*] A small order of monocotyledonous plants, of the series *Coronarieæ*, distinguished by the irregular flowers with two petals, one stamen, and two rudiments, three carpels, and numerous ovules. It includes 3 genera, each with one species, mainly Australian. They are small herbs with sword-shaped leaves sheathing at the

base, and a few smaller ones along the erect stem, which bears sessile flowers among spatheaceous bracts, forming a spike or panicle. In habit they resemble the sedges, and in their flowers the spiderworts.

Philydrum (fil'i-drum), *n.* [NL. (Banks, 1788), so called from its growth in marshes; < Gr. *φύλον*, loving water, < *φάω*, love, + *ιδωρ* (*idōr*), water.] A genus of plants, type of the order *Philydraceae*, distinguished by the imperfect partitions of the ovary, and the long undivided spike. The only species, *P. lanuginosum*, ranges from eastern Australia to southern China. It bears a white woolly stem, two-ranked leaves becoming bracts above, and yellow flowers solitary between their broad bracts. It is cultivated for its bright-colored spikes, sometimes under the name of *waterwort*.

phimosed (fi'mōst), *a.* [*< phimosis + -ed.*] Affected with phimosis.

phimosis (fi-mō'sis), *n.* [NL., < Gr. *φίμωσις*, a muzzling, < *φάω*, muzzling, < *φίμω*, a muzzle.] Stenosis of the preputial orifice. Compare *paraphimosis*.

phip (fip), *n.* [A contraction of *philip*.] A sparrow; also, the noise made by a sparrow. See *philip*. Halliwell.

And when I sayd *Phyp*, *Phyp*,
Than he wold lepe and skyp,
And take me by the lyp.
Alas! it will me slo,
That *Phillyp* is gone me fro.
Stedon, *Phillyp Sparowe*, l. 138.

phisiket, *n.* A Middle English form of *physic*.

phismomy (fiz'nō-mi), *n.* A corruption of *physiognomy*. *Palsgrave*.

phiton, *n.* A Middle English form of *python*.

phitoneset, *n.* A Middle English form of *pythoness*.

phiz (fiz), *n.* [Also *phyz*; an abbr. of *physiognomy*, *physiognomy*.] The face or visage. [Humorous.]

Why, truly a Body would think so by thy slovenly Dress,
lean Carcase, and ghastly *Phyz*.
N. Bailey, tr. of *Colloquies of Erasmus*, I. 51.

Who can see such an horrid ugly *Phiz* as that Fellow's
and not be shock'd?
Steele, *Grief A-la-Mode*, l. 1.

phlebectasia (flē-bek-tā'si-ā), *n.* [NL., < Gr. *φλέψ* (*phlēps*), a vein, + *εκτασις*, dilatation; see *ectasis*.] Dilatation of a vein.

phlebectopia (flē-bek-tō'pi-ā), *n.* [NL., < Gr. *φλέψ* (*phlēps*), a vein, + *εκτοπος*, out of place; see *ectopia*.] Abnormal situation of a vein.

Phlebenterata (flē-ben-ter-ā'tā), *n. pl.* [NL. (Quatrefages, 1844), < Gr. *φλέψ* (*phlēps*), a vein, + *εντερον*, intestine, + *-ατα*.] In *conch.*, a division of gastropods, characterized by the ramification of the gastric canal (alleged to serve for circulation as well as digestion) termed *gastrovascular*, comprising such genera as *Acteon* or *Elysia*. Quatrefages maintained that these gastric ramifications perform the office of branchial vessels, and that the division he made was of ordinal rank, but by others they are believed to be hepatic. The families *Solididae* and *Elysidae* exhibit the structure in question. They are now referred to the *Nudibranchiata*. See cuts under *Solididae*, *Elysia*, and *Dendronotus*.

phlebenterate (flē-ben-ter-ā't), *a. and n. I. a.* Having the characteristics of the *Phlebenterata*, as a nudibranchiate gastropod.

II. a. A member of the *Phlebenterata*.

phlebenteric (flē-ben-ter'ik), *a.* [*< phlebenterism + -ic.*] Characterized by or exhibiting phlebenterism; as, the *phlebenteric* system.

phlebenterism (flē-ben-ter'izm), *n.* [*< Gr. φλέψ* (*phlēps*), a vein, + *εντερον*, intestine, + *-ισμ*.] 1. Extension of processes of a loose alimentary canal into the legs, as in certain arachnidans (the *Pycnogonida*).—2. The doctrine that the gastric ramifications of certain nudibranchiate gastropods (*Phlebenterata*) have a respiratory function.

phlebitic (flē-bit'ik), *a.* [*< phlebitis + -ic.*] Pertaining to or affected with phlebitis.

phlebitis (flē-bi'tis), *n.* [NL., < Gr. *φλέψ* (*phlēps*), a vein, + *-itis*.] Inflammation of a vein.

phlebogram (flēb'ō-grām), *n.* [*< Gr. φλέψ* (*phlēps*), a vein, + *γραφή*, a writing, < *γράφειν*, write.] A pulse-tracing or sphygmogram from a vein.

phlebographical (flēb'ō-graf'ik-al), *a.* [*< phlebograph + -ic-al.*] Descriptive of veins; of or pertaining to phlebography.

phlebography (flē-bog'ra-fi), *n.* [= F. *phlébographie*, < Gr. *φλέψ* (*phlēps*), a vein, + *-γραφία*, < *γράφειν*, write.] A description of the veins.

phleboidal (flē-boi'dal), *a.* [*< Gr. φλέψ* (*phlēps*), vein, + *ιδίος*, form.] Vein-like; in *bot.*, noting moniliform vessels. *Encyc. Brit.*, IV. 87.

phlebolite (flēb'ō-lit), *n.* [= F. *phlébolithe*, < Gr. *φλέψ* (*phlēps*), a vein, + *λίθος*, a stone.] In *pathol.*, a calcareous concretion in a vein. Also called *veinsone*.

phlebolith (flēb'ō-lith), *n.* Same as *phlebolite*. **phlebolitic** (flēb'ō-lit'ik), *a.* [*< phlebolite + -ic.*] Having phlebolites; characterized by phlebolites.

phlebological (flēb'ō-loj'ik-al), *a.* [*< phlebology + -ic-al.*] Of or pertaining to phlebology.

phlebology (flēb'ō-lō-jī), *n.* [*< Gr. φλέψ* (*phlēps*), a vein, + *-λογία*, < *λέγειν*, speak; see *-ology*.] That branch of anatomy which treats of the veins; a treatise on the veins. *Dunglison*.

phlebometritis (flēb'ō-mē-trī'tis), *n.* [NL., < Gr. *φλέψ* (*phlēps*), a vein, + *μήτρα*, the womb, + *-itis*.] Uterine phlebitis.

phleborrhage (flēb'ō-rā-jī), *n.* [= F. *phléborrhagie*, < Gr. *φλεβορραγία*, the bursting of a vein, < *φλέψ* (*phlēps*), a vein, + *-ραγία*, < *ρηγνύναι*, burst.] Venous hemorrhage.

phleborrhagia (flēb'ō-rā-jī-ā), *n.* [NL.: see *phleborrhage*.] Same as *phleborrhage*.

phleborrhaxis (flēb'ō-rek'sis), *n.* [NL., < Gr. *φλέψ* (*phlēps*), a vein, + *ρήξις*, a rupture, < *ρηγνύναι*, break, burst.] The rupture of a vein.

phlebothrombosis (flēb'ō-throm-bō'sis), *n.* [NL., < Gr. *φλέψ* (*phlēps*), a vein, + *θρόμβωσις*, a becoming clotted or curdled; see *thrombosis*.] Thrombosis in a vein.

phlebotomic (flēb'ō-tom'ik), *a.* [*< phlebotomy + -ic.*] Of or pertaining to phlebotomy.

phlebotomical (flēb'ō-tom'ik-al), *a.* [*< phlebotomic + -al.*] Pertaining to or of the nature of phlebotomy.

phlebotomize, *v. t.* See *phlebotomize*.

phlebotomist (flēb'ō-tō-mist), *n.* [= F. *phlébotomiste* = Pg. *phlebotomista* (cf. Sp. *flebotomo*, It. *flebotomo*), a phlebotomist; as *phlebotomy + -ist*.] One who practises phlebotomy; a blood-letting.

phlebotomize (flē-bot'ō-mīz), *v. t.*; pret. and pp. *phlebotomized*, ppr. *phlebotomizing*. [= F. *phlébotomiser* = Sp. *flebotomizar* = Pg. *phlebotomisar*; as *phlebotomy + -ize*.] To let blood from; bleed by opening a vein. Also spelled *phlebotomise*.

All body politicks . . . must have an evacuation for their corrupt humours, they must be *phlebotomized*.
Howell, *England's Tears* (ed. 1645).

Let me beg you not . . . to speak of a "thorough-bred" as a "blooded" horse, unless he has been recently *phlebotomized*. I consent to your saying "blood horse," if you like.
O. W. Holmes, *Autocrat*, p. 40.

phlebotomy (flē-bot'ō-mī), *n.* [Formerly spelled *phlebotomie*; < OF. *phlebotomie*, F. *phlébotomie* = Sp. *flebotomia* = Pg. *phlebotomia* = It. *flebotomia*, < LL. *phlebotomia*, < Gr. *φλεβοτομία*, the opening of a vein, blood-letting, < *φλέβοτομος*, opening veins, < *φλέψ* (*phlēps*), a vein, + *τέμνειν*, *ταμειν*, cut. Cf. *fleam*.] The act or practice of opening a vein for letting blood, as a remedy for disease or with a view to the preservation of health.

Every sin is an incision of the soul, a lancing, a *phlebotomy*, a letting of the soul-blood. *Donne*, *Sermons*, XI.

Phlegethonius (flē-jē-thon'ti-us), *n.* [NL., < Gr. *φλεγέθων*, ppr. of *φλεγεῖν*, burn, scorch, burn up.] A genus of sphingid moths, founded by Herrich-Schäffer in 1854, having the thorax tufted, head prominent, palpi well developed, eyes large and scarcely ciliate, and outer border of the wings obliquely rounded. *P. celeus* (formerly called *Macroleia quinque-maculata*) is the common five-spotted sphinx, whose larva is the tomato-worm or potato-worm, abundant in the northern and middle United States upon the tomato, potato, jimson-weed, matrimony-vine, and ground-cherry. *P. carolina* is the tobacco-worm moth, whose caterpillar is found in tobacco-fields and often injures the plant. See cut under *tomato-worm*.

phlegm (flem), *n.* [Also *flegm*, *flegme*, *fleam*, *flem*, etc. (see *fleam*); < ME. *fleme*, *fleume*, < OF. *flegme*, *fleume*, F. *flegme*, *phlegme* = Sp. *flema*, *flegma* = Pg. *flegma*, *fleuma*, *phlegma*, *phleugma* = It. *flemma*, < ML. *phlegma*, *flegma*, *phlegm*, < Gr. *φλέγμα*, flame, fire, heat, inflammation; hence, as the result of such heat, phlegm, a humor regarded as the matter and cause of many diseases; < *φλέγειν*, burn; see *flame*.] 1†. One of the four humors of which the ancients supposed the blood to be composed.

The II. medecyn is for to heele the feure cotidian, the which is causid of putrifaction of *fleume* to haboundynge.
Book of Quinte Essence (ed. Furnivall), p. 21.

The water which is moist and colde
Maketh *fleume*, which is manifolde,
Forgettel (forgetful), slow, and wery one
Of every thing. *Gower*, *Conf. Amant*, III. 98.

2. In *old chem.*, the aqueous, insipid, and inodorous products obtained by subjecting moist vegetable matter to the action of heat.—3. A thick viscid matter secreted in the diges-

tive and respiratory passages, and discharged by coughing or vomiting; bronchial mucus.

For thorough cruditye and lack of perfect concoction in the stomacke is engendered great abundance of naughty baggage and hurtfull *phlegme*.

Touchstone of Complexions, p. 118.

4. Dullness; sluggishness; indifference; coolness; apathy; calm self-restraint.

They only think you animate your theme
With too much fire, who are themselves all *phlegm*.
Dryden, *To Lee*, l. 429.

They judge with fury, but they write with *phlegm*.
Pope, *Essay on Criticism*, l. 662.

But not her warmth, nor all her winning ways,
From his cool *phlegm* could Donald's spirit raise.
Crabbe, *Works*, l. 75.

His temperance boasted a certain amount of *phlegm*, and he preferred an undemonstrative, not ungentle, but serious aspect to any other. *Charlotte Brontë*, *Shirley*, xiii. =Syn. 4. *Inassibility*, *Impassibility*, etc. See *apathy*.

phlegmat, *n.* Same as *phlegm*, 2.

phlegmagogic (fleg-ma-goj'ik), *a. and n.* [*< phlegmagog-ue + -ic.*] 1. *a.* Expelling phlegm; having the character of a phlegmagogue.

II. n. A phlegmagogue.

phlegmagogue (fleg-ma-gog), *n.* [*< F. phlegmagogue*, *flegmagogue* = Pg. *phlegmagogo* = It. *flemmagogo*, < Gr. *φλεγμαγωγός*, carrying off phlegm, < *φλέγμα*, phlegm, + *αγωγός*, carrying off, < *άγειν*, lead, carry off.] A medicine supposed to possess the property of expelling phlegm.

phlegmant, *n.* See *phlegmon*.

phlegmasia (fleg-mā'si-ā), *n.* [= F. *phlegmasie*, *flegmasie*, < NL. *phlegmasia*, < Gr. *φλεγμασία*, inflammation, < *φλεγμαιναι*, heat, be heated or inflamed, < *φλέγμα*, flame; see *phlegm*.] In *med.*, inflammation.—**Phlegmasia dolens** (literally, painful inflammation), puerperal tumid leg: an affection presenting thrombosis of the large veins of the part, with swelling, hardness, whiteness of the skin, and much pain, usually affecting the leg, most frequent shortly after childbirth. Also called *phlegmasia alba dolens*, *milk-leg*, and *white leg*.

phlegmatic (fleg-mat'ik or fleg-ma-tik), *a.* [Also *flegmatic*, and formerly *flegmatick* (ME. *flewmatik*, etc.); < F. *flegmatique*, *phlegmatique* = Sp. *flegmático*, *flemático* = Pg. *flegmatico*, *flegmatico*, *flemmatico* = It. *flemmatico*, < LL. *phlegmaticus*, < Gr. *φλεγματικός*, like phlegm, pertaining to phlegm, < *φλέγμα*, phlegm; see *phlegm*.] 1†. Of the nature of phlegm; watery; aqueous; as, *phlegmatic* humors.

Spirit of wine . . . grows by every distillation more and more aqueous and *phlegmatic*. *Newton*.

2†. Generating or causing phlegm.

Cold and *phlegmatic* habitations.

Sir T. Browne, *Vulg. Err.*, vi. 10.

3. Abounding in phlegm; lymphatic; hence, cold; dull; sluggish; heavy; not easily excited to action or passion; apathetic; cool and self-restrained: as, a *phlegmatic* temperament. See *temperament*.

Gift *flewmatik* men [are occupied] aboute othere [imaginations], but the men that habounde in blak color, that is malencoly, ben occupied a thousand part with tho thoughtis than ben men of any othere complexion.
Book of Quinte Essence (ed. Furnivall), p. 17.

The officers' understandings are so *phlegmatic*
They cannot apprehend us.
Fletcher, *Mad Lover*, II. 2.

Heavy and *phlegmatick* he trod the stage,
Too proud for tenderness, too dull for rage.
Churchill, *The Rosciad*.

Many an ancient burgher, whose *phlegmatic* features had never been known to relax, nor his eyes to moisten, was now observed to puff a pensive pipe, and the big drop to steal down his cheek.
Irring, *Knickerbocker*, p. 466.

=Syn. 3. Frigid, impassive, unsusceptible. See *apathy*.

phlegmatical (fleg-mat'ik-al), *a.* [*< phlegmatic + -al.*] Same as *phlegmatic*.

phlegmatically (fleg-mat'ik-al-i), *adv.* In a phlegmatic manner; coldly; heavily.

phlegmatically (fleg-mat'ik-li), *adv.* Same as *phlegmatically*.

phlegmon (fleg'mon), *n.* [Formerly also, erroneously, *phlegman*; < F. *flegmon*, *phlegmon* = Sp. *flegmon*, *flemon* = Pg. *fleimão*, *phlegmão* = It. *flemmone*, < L. *phlegmon*, < Gr. *φλεγμονή*, inflammation, < *φλέγειν*, burn; see *phlegm*.] In *pathol.*: (a) Inflammation.

I shall begin with *phlegmon* or inflammation, . . . because it is the first degeneration from good blood, and in its own nature nearest of kin to it.

Wiseman, *Surgery*, l. 3.

(b) Inflammation of the connective tissue, especially the subcutaneous connective tissue, usually suppurative.

phlegmonoid (fleg'mō-noid), *a.* [*< Gr. φλεγμονοειδής*, contr. *φλεγμονώδης*, like an inflamed tumor, < *φλέγειν*, burn; see *phlegm* (see *phlegmon*), + *ειδός*, form.] Resembling phlegmon.

phlegmonous (fleg-mō-nus), *a.* [*< F. phlegmonus, flegmoneus = It. flemmonoso; as phlegmon + -ous.*] Of, pertaining to, or of the nature of phlegmon: as, **phlegmonous inflammation**.

phlegmy (flem'i), *a.* Pertaining to, containing, or resembling phlegm.

A **phlegmy** humour in the body. *Chambers's Cyc.*

phlemet, *n.* An obsolete form of **fleam**¹.

Phleum (fīs'um), *n.* [NL. (Linnaeus, 1737), *< Gr. φλέω, also φλέος, φλόος, some water-plant, according to Sprengel Arundo Ampelodesmon.*] A genus of grasses of the tribe *Agrostideae*, type of the subtribe *Phleoidae*, and characterized by the dense cylindrical or ovoid spike, with the empty glumes wingless, mucronate, or short-awned, and much longer than the flowering one. There are about 10 species, natives of Europe, central and northern Asia, northern Africa, and northern and antarctic America. They are erect annual or perennial grasses, with flat leaves, and the flowers usually conspicuously hairy, with a purplish cast in blossom from the color of the abundant anthers, which are large and exserted. (See *timothy*, also *cat's-tail grass* (under *cat's-tail*) and *herd's-grass*, names for the most valuable species, in common use in the eastern United States.) *P. alpinum*, the mountain cat's-tail grass, is also an excellent meadow-grass for colder regions.

phlobaphenes (fīō-baf'e-nēz), *n. pl.* Brown amorphous coloring matters which are present in the walls of the bark-cells of trees and shrubs.

phloēm (fīō'em), *n.* [(Nägeli, 1858), irreg. *< Gr. φλόος, bark. Cf. phloem.*] In *bot.*, the bast or liber portion of a vascular bundle, or the region of a vascular bundle or axis with secondary thickening which contains sieve-tubes. Compare *xylem*.

phloēm-sheath (fīō'em-shēth), *n.* In *bot.*, the sheath of phloēm-tissue sometimes formed about the xylem part in a vascular bundle, as in certain ferns.

Phloecharina, **Phloecharini** (fīō'ō-kā-rī'nā), *n. pl.* [NL., *< Phloecharis + -ina², -ini.*] A group of coleopterous insects named from the genus *Phloecharis*, and forming a small tribe of the rove-beetle family, *Staphylinidae*, comprising species of slender, depressed form. Only four genera are known, of which two inhabit the United States.

Phloecharis (fīō'ō-kā-ris), *n.* [NL. (Mannerheim, 1830), *< Gr. φλόος, bark, + χαίρειν, rejoice.*] A genus of rove-beetles, typical of the tribe *Phloecharina*. Few species are known, confined to Europe.

Phlophora (fīō'ō-fō-rā), *n. pl.* [NL., *< Gr. φλόος, bark, + φέρειν = E. bear¹.*] In Carus's classification, an order of protozoans represented by the sun-animalcules, *Actinophryidae*.

phlophorous (fīō'ō-fō-rus), *a.* Of or pertaining to the *Phlophora*.

phloēm (fīs'um), *n.* [NL., *< Gr. φλόος, bark.*] In *bot.*, the cellular portion of bark lying immediately under the epidermis. It is also termed *epiphloēm* and *bast*. [Not used by later authorities.]

phlogistian (fīō-jis'ti-an), *n.* [*< phlogist-on + -ian.*] A believer in the existence of phlogiston.

phlogistic (fīō-jis'tik), *a.* [*< phlogist-on + -ic.*] 1. Pertaining or relating to phlogiston.

The mistakes committed in the celebrated *phlogistic* theory. *J. S. Mill, Logic, v. 4.*

2. In *med.*, inflammatory.

phlogisticate (fīō-jis'ti-kāt), *v. t.* [*< phlogistic + -ate².*] To combine phlogiston with.—**Phlogisticated air or gas**, the name given by the old chemists to nitrogen.—**Phlogisticated alkali**, prussiate of potash.

phlogistication (fīō-jis-ti-kā'shon), *n.* [= *F. phlogistication*; as *phlogisticate + -ion.*] The act or process of combining with phlogiston.

phlogiston (fīō-jis'ton), *n.* [NL., *< Gr. φλογιστός, inflammable, burnt up, verbal adj. of φλόγειν, burn, < φλόξ, a flame: see phlox.*] In *old chem.*, the supposed principle of inflammability; the matter of fire in composition with other bodies. Stahl gave this name to a hypothetical element which he supposed to be pure fire fixed in combustible bodies, in order to distinguish it from fire in action or in a state of liberty.

It is only after Stahl's [1680-1734] labors that a scientific chemistry becomes for the first time possible; the essential difference between the teaching of the science then and now being that the phenomena of combustion were then believed to be due to a chemical decomposition, *phlogiston* being supposed to escape, whilst we account for the same phenomena now by a chemical combination, oxygen or some element being taken up.

Roscoe and Schortlemmer, Treatise on Chemistry (1888), I. 14.

phlogogenic (flog-ō-jen'ik), *a.* [As *phlogogenous + -ic.*] Same as *phlogogenous*.

phlogogenous (flog-goj'e-nus), *a.* [*< Gr. φλόξ (φλογ-), flame, + -γενής, producing.*] Producing inflammation.

phlogopite (flog'ō-pīt), *n.* [*< Gr. φλογώψ (< φλόξ, a flame, + ὤψ, the face), fiery-looking, flaming-red, + -ite².*] A kind of magnesia mica (see *mica*²), commonly occurring in crystalline limestone and in serpentine. It has often a copper-like color and pearly luster; chemically it is usually characterized by the presence of a small percentage of fluorine.

phlogosis (fīō-gō'sis), *n.* [NL., *< Gr. φλόγωσις, a burning, inflammation, < φλόξ (φλογ-), flame: see phlox.*] In *med.*, inflammation.

phlogotic (fīō-gō'tik), *a.* [*< phlogosis (-ot-) + -ic.*] Pertaining to, characterized by, or of the nature of phlogosis; inflammatory.

Phlomis (fīō'mis), *n.* [NL. (Tournefort, 1700), *< Gr. φλόμις, also φλόμος, also corruptly φλόμος, φλόνος, mullen, appar.* so called in allusion to the use of its thick woolly leaves as wicks (one species being called *φλόμις λυχνίτης*, 'lamp-mullen'); prob. for orig. *φλογμός*, *< φλογμός, a flame, < φλέγειν, burn: see phlegm, phlox, flame.*] A genus of gamopetalous plants of the order *Labiales*, the mint family, belonging to the tribe *Stachydeae* and subtribe *Lamieae*, and characterized by the villous and concave upper lip, the plicate calyx, and the densely flowered whorls in the axils. There are about 50 species, natives of the Mediterranean region and Asia. They are herbs or shrubs with rugose or puckered leaves, often thick and woolly or hoary, and sessile yellow, purple, or white flowers. They rank among the most showy hardy plants of the mint family. About a dozen species are in common cultivation, especially *P. fruticosa*, the Jerusalem sage (see *sage*), a half-shrubby plant, 3 to 5 feet high, covered with rusty down, and producing many dense whorls of rich-yellow flowers. Several other shrubby species from the Mediterranean are cultivated under the name *Phlomis*. *P. Herba-venti*, the wind-herb, is the best of the herbaceous species. *P. tuberosa* occurs introduced on the south shore of Lake Ontario. See also *lampwick*, 2, and *Jupiter's distaf*.

phlorizin (fīō'rī-zin), *n.* [= *F. phlorrhizin*; irreg. *< Gr. φλοῦρριζός, having roots covered with coats of rind, < φλόος, bark, + ρίζα, root.*] A substance (C₂₁H₂₄O₁₀) discovered in the fresh bark of the root of the apple, pear, cherry, and plum. It forms fine colorless four-sided silky needles, soluble in water. The solution has a bitter and slightly astringent taste. It has been used with success in intermittents, and while it is administered produces glycosuria.

phloroglucin (fīō-rō-glō'sin), *n.* [*< phlor(izin) + glucin.*] A substance widely distributed in the vegetable kingdom, when pure crystallizing in small yellow crystals with the composition C₆H₃(OH)₃; a trivalent phenol. It is used in microscopy as one of the best reagents for testing lignified cell-walls.

Phlox (fīōks), *n.* [NL. (Linnaeus, 1737), *< L. phlox, < Gr. φλόξ, some flower so named from its color, a particular use of φλόξ, a flame, < φλέγειν, burn: see flame.*] 1. A genus of ornamental gamopetalous plants of the order *Polemoniacae*, characterized by a deeply three-valved loculicidal capsule, included stamens unequally inserted on the tube of a salver-shaped corolla, and entire leaves. The 30 species are natives of North America and Siberia. They are erect or spreading herbs, often tall perennials, bearing chiefly opposite leaves, and showing flowers usually in a flat or pyramidal cyme, red, violet, purplish, white, or blue. Most species are cultivated under the name *phlox*. *P. speciosa* as the pride-of-Columbia, *P. subulata* as the moss-pink. *P. maculata* is the wild sweet-william of the middle and western United States. *P. paniculata*, with large pyramidal clusters of flowers, native of the central and southern States, is the parent of most of the perennial phloxes of the gardens. The annual varieties in gardens are from *P. Drummondii* of Texas, there discovered by Drummond in 1835. *P. divaricata* is the wild phlox of the eastern States, with early bluish-lilac flowers. *P. reptans*, the creeping phlox, is an important spring-flowering species of the south.

2. [*l. c.*] Any plant of this genus.

phloxin (fīōk'sin), *n.* [*< Gr. φλόξ, flame, + -in².*] A coal-tar color used in dyeing, similar to eosin. It is the potassium salt of tetra-brom-dichlor-fluorescein.

phlox-worm (fīōks'wērm), *n.* The larva of *Heliothis phlogophagus*, a noctuid moth, closely resembling the well-known boll-worm moth of the cotton. It feeds upon cultivated varieties of phlox, and pupates under ground. See cut in next column.

phlyctena, **phlyctæna** (fīk-tē'nā), *n.*; *pl. phlyctenæ, phlyctænæ (-nē).* [NL. *phlyctæna*, *< Gr. φλύκταινα, a blister, pustule, < φλύγειν, φλίνειν, boil over.*] A small vesicle.

phlyctenar, **phlyctænar** (fīk-tē'nār), *a.* [*< phlyctena, phlyctæna, + -ar³.*] Affected with phlyctenæ; blistered.

phlyctenoid, **phlyctænoid** (fīk-tē'noid), *a.* [*< Gr. φλύκταινα, blister, + εἶδος, form.*] Resembling a phlyctena.

Phlox-worm and Moth (*Heliothis phlogophagus*), natural size.

phlyctenous, **phlyctænous** (fīk-tē'nus), *a.* [*< phlyctena, phlyctæna, + -ous.*] Pertaining to, exhibiting, or of the nature of a phlyctena or phlyctenæ.

phlyctenula, **phlyctænula** (fīk-tē'nū-lā), *n.*; *pl. phlyctenulæ, phlyctænulæ (-læ).* [NL., dim. of *phlyctena, phlyctæna.*] In *med.*, a minute phlyctena in the conjunctiva or the cornea.

phlyctenular, **phlyctænular** (fīk-tē'nū-lār), *a.* [*< phlyctenula, phlyctænula, + -ar³.*] Pertaining to, of the nature of, or accompanied by phlyctenulæ.—**Phlyctenular ophthalmia**, inflammation of the cornea or the conjunctiva with phlyctenulæ on the cornea.

phlyzadium (fī-zā'si-um), *n.*; *pl. phlyzadia (-ā).* [NL., *< Gr. φλύζακιον, a pimple, pustule, < φλύγειν, φλίνειν, boil over.*] A phlyctena.

pho, *interj.* A bad spelling of *foh*.

phobanthropy (fō-ban'thrō-pi), *n.* [*< Gr. φόβος, fear (< φόβος, fear), + ἀνθρωπος, man.*] A morbid dread of mankind. *Westminster Rev.*

phobophobia (fō-bō-fō'bi-ā), *n.* [NL., *< Gr. φόβος, fear (< φόβος, fear), + φόβος, fear.*] Morbid dread of being alarmed.

Phobos (fō'bos), *n.* [NL., *< Gr. φόβος, Fear, a companion of Ares or Mars (War); a personification of φόβος, fear, terror, dismay, < φέβειν, be scared, fear, flee. Cf. Deimos.*] The inner of the two satellites of the planet Mars, discovered by Asaph Hall at Washington, in August, 1877. This extraordinary body revolves in the plane of the equator of Mars, at a distance of only about 3,700 miles from the surface of the planet, but as it is probably only about five and a half miles in diameter, it would appear only one sixth of the apparent diameter of our moon at the zenith, and on the horizon, owing to the enormous parallax, only about one fourteenth of the same. At the equinoxes it is in eclipse about one fifth of the time, or double that proportion of the time between sunset and sunrise. At the solstices it does not suffer eclipse. It revolves about its primary in 7 hours, 39 minutes, and 14 seconds, and as Mars revolves on its axis in 24 hours, 37 minutes, and 22.7 seconds, it follows that the satellite appears to an observer on Mars to rise in the west and set in the east, its return to his meridian occurring in 11 hours, 6 minutes, and 23 seconds, but, owing to its close proximity, its velocity will appear to be much greater. At a station on the equator of Mars (where the satellite always passes through the zenith), it will, out of its 11 hours and 6 minutes of period, pass only 3 hours and 20 minutes above the horizon against 7 hours and 46 minutes below.

phoca (fō'kā), *n.* [= *F. phoque = Sp. It. foca = Fg. phoca, < L. phoca, < Gr. φώκη, a seal.*] 1. A seal.—2. [*cap.*] [NL.] A genus of *Phocidae* or seals, formerly coextensive at least with the

Common Harbor-seal (*Phoca vitulina*).

family, now restricted to the section which is represented by the common harbor-seal, *P. vitulina*, and a few closely related species. See *seal*¹, and cut under *harp-seal*.

phocacean (fō-kā'sē-an), *a. and n.* [*< phoca + -acean.*] 1. *a.* 1. Of or pertaining to the genus *Phoca* in a broad sense; phocine.

II. *n.* A seal of the genus *Phoca* in a broad sense; a phocine.

Phocæna (fō-sē-nā), *n.* [NL., < Gr. *φωκαία*, a porpoise; cf. *φωκός*, *m.*, a porpoise, *φωκός*, a seal: see *phoca*.] A genus of delphinoid odontocete cetaceans, containing the true porpoises, such as *P. communis*, as distinguished from the dolphins proper. There are about 64 vertebrae, of which the cervical are 7, mostly ankylosed, and the dorsals 13; the teeth are from 72 to 100, along nearly the whole length of the jaw, with constricted necks; the symphysis of the mandible is very short, and the rostral is not longer than the cranial section of the skull. The dorsal fin is near the middle of the back (wanting in *P. maui*, which constitutes the subgenus *Nomeria*), triangular, of less height than breadth at the base; the fins have five digits, oval or somewhat falcate. See cut under *porpoise*.

Phocænia (fō-sē-nī-nā), *n. pl.* [NL., < *Phocæna* + *-ina*.] A group of cetaceans, typified by the genus *Phocæna*; the porpoises.

phocænine (fō-sē-nīn), *a.* [< Gr. *φωκαία*, a porpoise, + *-ine*.] Resembling a porpoise; of or pertaining to the *Phocænia*.

phocal (fō-kal), *a.* [< *phoca* + *-al*.] Phocæcean; phocine. [Rare.]

Phocæa (fō-sē-ā), *n.* [NL., prop. *Phocæa*, < L. *Phocæa*, < Gr. *φωκαία*, a maritime city of Ionia, a colony of Athens, and the parent city of Massilia, now Marseilles.] The 25th planetoid, discovered by Chacornac at Marseilles in 1853.

Phocian (fō-gian), *a. and n.* [< L. *Phocis*, < Gr. *φωκίς*, Phocis (see def.), + *-an*.] *I. a.* Of or pertaining to Phocis, a state of ancient Greece, or its inhabitants.

II. n. A native or an inhabitant of Phocis.

Phocidæ (fō-si-dē), *n. pl.* [NL., < *Phoca* + *-idæ*.] A family of aquatic carnivorous mammals of the order *Feræ* and suborder *Pinnipedia*, having the limbs modified into fins or flippers; the seals. The family was formerly coextensive with the suborder, including the otaries and the walruses as well as the true seals, and divided into three subfamilies: *Arctocephalina*, the otaries; *Trichechina*, the walruses; and *Phocina*, the seals proper. The last alone now constitute the family *Phocidæ*, having the body truly phociform, with the hinder limbs projecting backward, and not capable of being turned forward; the outer ear obsolete; the fore flippers smaller than the hind ones, and having the digits successively shortened and armed with claws, while the hind flippers are emarginated by the shortening of the third and fourth digits, and are usually but not always provided with claws. The incisors are variable in number, and the upper ones are unnotched. The skull has no alisphenoid canals, and the postorbital processes are obsolete. In this restricted sense the *Phocidæ* are represented by about 12 genera, and divided into the subfamilies *Phocina*, *Cystophorina*, and *Stenorhynchina*. See cuts under *harp-seal*, *Pagomys*, *Phoca*, *seal*, and *Erignathus*.

phociform (fō-si-fōrm), *a.* [< Gr. *φωκός*, a seal, + L. *forma*, form.] Resembling a seal in structure; having the form or characters of the *Phocidæ*.

Phocinæ (fō-si-nē), *n. pl.* [NL., < *Phoca* + *-inæ*.] The leading subfamily of *Phocidæ* proper, typified by the genus *Phoca*, having normally six upper and four lower incisors, and narrow nasal and intermaxillary bones. The genera besides *Phoca* are *Pagomys*, *Pagophilus*, *Erignathus*, *Halichærus*, and *Monachus*.

phocine (fō-sin), *a. and n.* [< Gr. *φωκός*, a seal, + *-ine*.] *I. a.* Seal-like; of or pertaining to the *Phocidæ* at large. — *2.* Belonging to the restricted subfamily *Phocina*: distinguished from *otarine*.

II. n. Any member of the *Phocina*; a phocæcean.

Phocodon (fō-kō-don), *n.* [NL. (Agassiz), < Gr. *φωκός*, a seal, + *ὀδών* (*ōdōn*) = *E. tooth*.] A genus of fossil cetaceans, giving name to the *Phocodontia*. See *Zeuglodon*.

phocodont (fō-kō-dont), *n.* One of the *Phocodontia*.

Phocodontia (fō-kō-don-shi-ā), *n. pl.* [NL., < *Phocodon* (-odont-) + *-ia*.] One of the primary groups of the order *Cetacea*, entirely extinct, consisting of the genera *Zeuglodon*, *Squalodon*, and other large cetaceans of the Tertiary epoch, remarkable as furnishing connecting-links between the *Cetacea* and the pinniped aquatic *Carnivora*.

phocodontic (fō-kō-don'tik), *a.* [< *phocodont* + *-ic*.] Pertaining to the *Phocodontia*, or having their characters.

phocoid (fō-koid), *a. and n.* [< Gr. *φωκός*, a seal, + *-oid*, form.] *I. a.* Resembling a seal; belonging to the *Phocoidea*.

II. n. Any member of the *Phocoidea*.

Phocoidea (fō-koi-dē-ā), *n. pl.* [NL.: see *phocoid*.] A superfamily of pinnipeds, containing the *Otariidæ* and *Phocidæ*, or the eared and earless seals, together contrasted with *Trichechoidæ* or *Rosmaroidæ*, the walruses. They have no tusks, or highly developed canine teeth, and the incisors are persistent; the lower molars are five on each side, the upper five or six.

phocomelus (fō-kom'e-lus), *n.* [pl. *phocomeli* (-li). [NL., < Gr. *φωκός*, a seal, + *μέλος*, a limb.] In *teratol.*, a monster with very short extremities, the hands and feet being apparently attached directly to the trunk.

Phœbades (fē-bā-dēz), *n. pl.* [L. *Phœbades*, pl. of *Phœbas*, < Gr. *Φοῖβας*, a priestess of Apollo, < *Φοῖβος*, Apollo, Phœbus: see *Phœbus*.] Priestesses of the sun.

Attired like Virginian Priests, by whom the Sun is there adored, and therefore called the *Phœbades*.

Chapman, Masque of the Middle Temple and Lincoln's Inn.

Phœbe (fē-bē), *n.* [Also *Phebe*; < L. *Phæbe*, < Gr. *Φοῖβη*, the moon-goddess, sister of *Φοῖβος*, Phœbus: see *Phœbus*.] *1.* The moon or moon-goddess.

To-morrow night, when *Phæbe* doth behold
Her silver visage in the watery glass.
Shak., *M. N. D.*, I. 1. 209.

2. [l. c.] A Cuban fish, *Haliperca phæbe*. *F. Poey.*

phœbe (fē-bē), *n.* [An imitative name, according in spelling to L. *Phæbe*: see *Phæbe*. Cf. *pewit*.] The water-pewee, or pewit flycatcher, *Sayornis fuscus*. See cut under *pewit*.

Phœbean (fē-bē-an), *a.* [< *Phæbe* + *-an*.] Of, pertaining to, or produced by Phœbus Apollo.

Whose ear
Is able to distinguish strains that are
Clear and Phœbean from the popular.
Shirley, *Love in a Mass*, Prol.

phœbe-bird (fē-bē-bērd), *n.* The phœbe.

phosbium (fē-bi-um), *n.* [NL., < Gr. *Φοῖβος*, Phœbus, i. e. the sun: see *Phæbus*.] A name suggested by Proctor for the unknown substance which produces the 1474 line of Kirchhoff's scale in the spectrum of the solar corona: commonly called *coronium*.

Phœbus (fē-bus), *n.* [= *F. Phæbus* = *Sp. It. Febo* = *Pg. Phæbo*, < L. *Phæbus*, < Gr. *Φοῖβος*, Phœbus (see def.), < *Φοῖβος*, pure, bright, < *φῶς*, light, < *φάειν*, shine: see *phase*.] A name of Apollo, often used in the same sense as *Sol* or *Helios*, the sun-god.

Hark, hark! the lark at heaven's gate sings
And *Phæbus* gins arise. Shak., *Cymbeline*, II. 2. 22.

Phœnicæ (fē-nis-ē-ā), *n. pl.* [NL. (Bentham and Hooker, 1833), < *Phœnix* (*Phœnic*-) + *-æ*.] A tribe of palms, consisting of the genus *Phœnix*, and distinguished by the pinnately divided leaves, with acuminate segments induplicate in the bud, dioecious flowers, and a long, solitary, coriaceous and compressed spathe.

phœniceous (fē-nish-i-us), *a.* [< Gr. *φωινίκος*, purple-red, < *φῶινξ* (*phœnix*), purple-red.] Same as *phœnicous*.

Phœnicercus (fē-ni-sēr-kus), *n.* [NL. (Swainson, 1831, as *Phœnicircus*; emended *Phœnicercus*, Strickland, 1841), prop. *Phœnicocercus* (Cabanis, 1847), and erroneously *Phœnicocercus* (Bonaparte, 1850); < Gr. *φῶινξ* (*phœnix*), purple-red, + *κέρκος*, tail.] A genus of South American non-oscine passerine birds, of the family *Cotingidæ* and subfamily *Rupicolinæ*, closely related to the cock-of-the-rock (see *Rupicola*): so called from the color of the tail. There are two species, *P. carminea* and *P. nigricollis*, the former of Cayenne and Colombia, the latter found in the vicinity of Pará. Both are chiefly of a scarlet or bloody-red color; in *P. nigricollis* the neck, back, wings, and tip of the tail are black. Also called *Carriææ*.

Phœnician, *a. and n.* See *Phœnician*.

phœnicin, *n.* See *phœnicin*.

Phœnicophilinæ (fē-ni-kof-i-lī-nē), *n. pl.* [NL., < *Phœnicophilus* + *-inæ*.] A subfamily of *Tanagridæ*, represented by the genera *Phœnicophilus* and *Calyptophilus*, peculiar to San Domingo.

Phœnicophilus (fē-ni-kof-i-lus), *n.* [NL. (H. E. Strickland, 1851), < Gr. *φῶινξ* (*phœnix*), the

date-palm, + *φίλος*, loving.] The typical genus of *Phœnicophilinæ*, having a comparatively slender bill, moderate tarsi, and square tail. *P. palmarum* is the leading species.

phœnicopteryx, *n.* See *phœnicopter*.

Phœnicopteridæ (fē-ni-kop-tēr'i-dē), *n. pl.* [NL., < *Phœnicopteryx* + *-idæ*.] A family of birds of the suborder *Odontoglossæ* and order *Lamelirostres*, consisting of the flamingos only. Its systematic position is intermediate between the storks and herons on the one hand and the ducks and geese on the other. The group is called *Odontoglossæ* by Nitzsch, and *Amphimorphæ* by Huxley. See *flamingo*.

phœnicopteroid (fē-ni-kop-tē-roid), *a.* Of or resembling the *Phœnicopteridæ*.

Phœnicopteroidæ (fē-ni-kop-tē-roi-dē-ā), *n. pl.* [NL., < *Phœnicopteryx* + *-oidæ*.] The flamingos regarded as a superfamily: synonymous with both *Amphimorphæ* and *Odontoglossæ*.

phœnicopterous (fē-ni-kop-tē-rus), *a.* [< Gr. *φωινώπτερος*, in lit. sense 'red-winged': see *Phœnicopteryx*.] Having red wings, as a flamingo; relating to the genus *Phœnicopteryx*.

Phœnicopterus (fē-ni-kop-tē-rus), *n.* [NL., < L. *phœnicopterus*, the flamingo, < Gr. *φωινώπτερος*, a bird, supposed to be the flamingo, lit. 'red-winged,' < *φῶινξ* (*phœnix*), purple-red, red, + *πτερόν*, feather, wing.] *1.* The typical and leading genus of *Phœnicopteridæ*, usually held to be conterminous with the family, and sometimes divided into four sections—*Phœnicopterus* proper, *Phœniconotus*, *Phœnicorodius*, and *Phœnicoparrus*. *P. antiquorum* is widely distributed in Africa and some parts of Asia and Europe; *P. ignipalatus* is South American; *P. minor* is African; *P. ruber* inhabits the southern United States, the West Indies, and other parts of tropical America; *P. andinus* is found in the Andes of Peru, Bolivia, and Chili. See cut under *flamingo*. *2.* The constellation *Grus*.

phœnicurus (fē-ni-kū-rus), *a.* [< L. *phœnicurus*, < Gr. *φωινύροπος*, a bird, the redstart, lit. 'having a red tail,' < *φῶινξ* (*phœnix*), purple-red, red, + *οὐρά*, a tail.] Having a red tail.

phœnix, *n.* See *phœnix*.

Phœnix (fē-niks), *n.* [NL. (Linnaeus, 1737), < Gr. *φῶινξ*, the date-palm; cf. *φῶινξ*, Phœnician: see *Phœnician*.] A genus of palms, constituting the tribe *Phœnicæ*, characterized by the three distinct carpels (only one of which matures), containing a single erect cylindrical seed with a deep longitudinal groove, and having the embryo near the base or on the back. The 12 species are the cultivated and the wild date-palms, all natives of the Old World, within or near the tropics of Asia and Africa. The habit of different species varies greatly, the trunks being either short or tall, robust or slender, erect or declined. The trunk is destitute of spines, but is commonly covered with the persistent leaf-bases. The palms grow in close clusters, forming groves. The pinnate leaves are large and terminal, forming a spreading canopy, each consisting of very numerous narrow, rigid, and compressed leaflets, the lower ones shorter and transformed into spines. The abundant yellow and rather small flowers have three sepals and three petals. The staminate trees bear oblong or ovoid flowers on numerous erect and much-branched spadices between the upper leaves. The pistillate trees bear spherical flowers on similar but often nodding spadices, followed by numerous cylindrical orange, brown, or black berries, those of *P. dactylofera* being the dates of commerce. (For this fruit, see *date-palm* and *date*); and for the sugar made from it, see *jaggery* and *goor*. This species is the chief palm of history and of ceremony, having been used as the emblem of triumph from the Egyptian worship of Isis onward. It is the palm of ancient Palestine, and has been for centuries cultivated for miles along the Italian and French Riviera, to supply palm-branches for festivals. White palm-branches are procured by binding the top of the unfolding leaf-bud, thereby blanching the inner leaves. It does not fruit in Italy nor under glass, and requires for successful growth an average annual temperature of 80° F. In Africa native huts are made from its leaves, its wood is used for building, its fiber for cloth and rope, its leaf-stalks for brooms, crates, etc., its young leaves are eaten, and an intoxicating drink is made from its sap. It reaches a height of 80 and rarely 120 feet, and bears fruit, though in diminishing abundance, for as long as 200 years. The necessity of artificially fertilizing it first drew attention to the existence of sex in plants. *P. sylvestris*, the wild date-palm of India and Africa, is smaller, reaches a height of 40 feet, bears yellow or reddish berries, and is an important source of sugar and toddy, both prepared from its sap, which it is said can be made to flow from the upper part of its trunk for twenty years. *P. pusilla*, a dwarf from southern China, and *P. reclinata*, a decumbent palm from the Cape of Good Hope, also bear sweet edible berries, and are valued, as is *P. paludosa*, a stout Indian tree, for decorative uses.

pholad (fō-lad), *n.* A member of the family *Pholadidæ*.

Pholadacea (fō-lā-dā-sē-ā), *n. pl.* [NL., < *Pholad* + *-acea*.] A family of bivalves: same as *Pholadidæ*. De Blainville, 1825.

Pholadidæ (fō-lad-i-dē), *n. pl.* [NL., < *Pholad* + *-idæ*.] A family of lithodomous or lithophagous lamellibranch mollusks, typified by the genus *Pholad*; the piddocks and their allies. The animals have the lobes of the mantle mostly

Phœnicophilus palmarum.

united and everted upon the umbonal region, long siphons with fringed orifices, narrow branchiae prolonged into the branchial siphon, and a short truncated foot. The shell is gaping and sinuapallate, without hinge or ligament, and besides the pair of large valves there are small accessory valves near the umbones. The family formerly included *Teredo*, now made the type of *Teredinidae*. The species are generally classed under at least 8 genera, and occur in various parts of the world, generally boring into stone or wood. See cuts under *accessory* and *piddock*.

Pholadidea (fō-lā-dīd'ē-ā), n. [NL., < *Pholas* (*Pholad-*) + *-idea*.] A genus of *Pholadidae*, characterized by the development of a corneous tubular appendage to the posterior end of the shell, surrounding the siphons at their base, called *siphonoplax*. *P. papyracea*, of the European seas, is the type.

pholadite (fō-lā-dīt), n. [= F. *pholadite*; < L. *Pholas* (*Pholad-*) + *-ite*.] A fossil pholad, or some similar shell.

Pholadomyidae (fō-lā-dō-mī'ī-dē), n. pl. [NL., < *Pholadomya* (the typical genus) (< Gr. *φολάς* (*pholad-*), lurking in a hole, + *μύς*, mussel) + *-idae*.] A family of bivalves, typified by the genus *Pholadomya*. They are related to the *Anatinidae*. The mantle-margins are mostly united, and the siphons long and united; the foot is small, with a small process bifurcated behind, and the branchiae are thick and appendiculate. The shell is equivalve, very thin, nacreous internally and with radiating ribs, without hinge-teeth, and with an external ligament.

Pholadomya candida (exterior).

Pholadomya candida (left valve).

The living species are few, and are found only in very deep water, but in former ages they were very numerous.

Pholas (fō-las), n. [NL. (Linnaeus, 1758), < Gr. *φολάς* (*pholad-*), lurking in a hole, a mollusk that makes holes in stones (*Lithodomus*); cf. *φωλεῖν*, lurk in a hole, *φωλεός*, a hole, lurking-place.] 1. The typical genus of the family *Pholadidae* and the subfamily *Pholadinae*. It was formerly co-extensive with the family, but has been variously subdivided. By recent writers it is restricted to species having the dorsal margin protected by two accessory valves (see *accessory*), anterior and posterior, and with umbonal processes reflected over the beaks. The species are of some economical value, the *Pholas dactylus*, called *piddock*, being marketable and also used as bait in England.

2. [L. c.] A species of the genus *Pholas*; a pholad; a piddock. See cut under *piddock*.

Pholidae (fōl'sī-dē), n. pl. [NL. (C. Koch, 1850), < *Pholus* + *-idae*.] A family of spiders formerly placed in the superfamily *Retitulariæ*, but recently put among the more primitive forms, near the *Dysderidae*, *Hypochilidae*, and *Filistatidae*. They are pale, long-legged spiders, living in dark places and having either six or eight eyes. The male palpi are very peculiar.

Pholus (fōl'kus), n. [NL. (Walckenaer, 1805), < Gr. *φολός*, squint-eyed.] A genus of spiders, typical of the family *Pholidae*, having the eyes in three groups, a cluster of three on each side of the median two. Nine species are known in the United States. They live either in cellars or under rocks in the woods, and construct irregular webs in which they stand upside down. The webs are violently shaken as a defense. The egg-cocoon is carried in the female's mouth. The legs of some species are multiarticulate, indicating a relationship with the *Opiliones*.

pholerite (fōl'e-rīt), n. [Prop. **pholidite*, < Gr. *φολίς* (*pholid-*), scale, + *-ite*.] A clay-like mineral closely related to or identical with kaolinite. It usually occurs in masses consisting of minute scales.

pholidote (fōl'ī-dōt), a. [*Gr. φολιδωτός*, armed, clad with scales, < *φολίς* (*pholid-*), a scale.] Provided with scales; scaly or squamous.

Phoma (fō'mā), n. [NL. (Fries, 1828), < Gr. *φωίς*, a blister.] A genus of parasitic fungi, of the class *Sphaerioides*, producing little pustules on plants. About 650 species have been referred to this genus, but they probably represent different stages in the development of other forms. *P. unicola*, of the grape, for instance (see *grape-rot*), is now understood to be only a stage in the life-history of *Physalospora Bidwellii*.

phonal (fō'nāl), a. [*Gr. φωνή*, voice (see *phone*), + *-al*.] Of or pertaining to sound or the voice. [Rare.]

The Tibetan is near in *phonal* structure.

Max Müller, *Selected Essays*, I. 74.

phonascetics (fō-na-set'iks), n. [*Gr. φωνασκεῖν*, exercise the voice; cf. *φωναστικός*, one who

exercises the voice: see *phonascus*.] Systematic practice for strengthening the voice; treatment for improving or restoring the voice.

phonascus (fō-nas'kus), n.; pl. *phonasci* (-ī). [L., a teacher of singing, LL. a musical director, < Gr. *φωναστικός*, one who exercises the voice, < *φωνή*, the voice, + *ἀσκειν*, train, exercise: see *acetic*.] In *anc. Gr. music*, a trainer of the voice; a teacher of vocal music.

phonate (fō'nāt), v. i.; pret. and pp. *phonated*, ppr. *phonating*. [*Gr. φωνή*, sound, voice (see *phone*), + *-ate*.] To utter vocal sounds; produce a noise with the vocal cords.

In a marked case, on the patient's attempting to *phonate*, the cords remain perfectly movable during the attempt. *Lancet*, No. 3417, p. 873.

phonation (fō-nā'shon), n. [= F. *phonation*; as *phonate* + *-ion*.] The act of phonating; emission of vocal sounds; production of tone with the vocal cords. *Encyc. Brit.*, XXI. 202.

phonatory (fō-nā-tō-ri), a. [*Gr. φωνή*, sound, voice (see *phone*), + *-ory*.] Of or pertaining to phonation.

phonautogram (fō-nā-tō-grām), n. [*Gr. φωνή*, sound, voice, + *αὐτός*, self, + *γράμμα*, inscription.] The diagram or record of speech or other sound made by a phonautograph or a gramophone.

phonautograph (fō-nā-tō-gráf), n. [*Gr. φωνή*, sound, + *αὐτός*, self, + *γράφειν*, write.] 1. An instrument for registering the vibrations of a sounding body. That devised about 1858 by Léon Scott consists of a large barrel-shaped vessel made of plaster of Paris, into the open end of which the sound enters; the

BC, barrel with opening at C; C, brass tube with membrane and style at B, and movable piece A, by which the position of the nodal points can be regulated; A, handle to turn cylinder (A) covered with lampblack paper.

other end, somewhat contracted in shape, is closed by a membrane with a style attached on the outside, whose point rests against a horizontal cylinder covered with lampblack paper. If the membrane is at rest the trace of the style is a straight line, but when the sound enters the membrane vibrates, and the writing-point registers these vibrations with great perfection.

2. Same as *music-recorder*.

phonautographic (fō-nā-tō-gráf'ik), a. [*Gr. φωνή*, sound, + *αὐτός*, self, + *γράφειν*, write.] Of, pertaining to, or made by the phonautograph or gramophone. *Jour. Franklin Inst.*, CXXV. 53.

phonautographically (fō-nā-tō-gráf'ī-kāl-i), adv. By means of the phonautograph. *Jour. Franklin Inst.*, CXXV. 53.

phone (fōn), n. [*Gr. φωνή*, a sound, tone, sound of the voice (of man or brute), voice, speech, cry, etc., any articulate sound, vowel or consonant (later restricted to vowels as opposed to consonants), also the faculty of speech, language, a language, dialect, also a report, rumor, etc., < *φ* in *φήμη*, speech, report, etc., = L. *fama*, etc.: see *fame*, *fable*.] A sound; a vocal sound; a tone produced by the vibration of the vocal cords; one of the primary elements of utterance. See *phonate*, *phonic*.

phone² (fōn), n. [Abbr. of *telephone*, n.] A telephone: generally applied to the receiver, but sometimes to the whole apparatus. *Sci. Amer.*, N. S., July 19, 1884, p. 43. [Colloq.]

phone² (fōn), v. i.; pret. and pp. *phoned*, ppr. *phoning*. [Abbr. of *telephone*, v.] To telephone. [Colloq.]

phonoscope (fō-nī-dō-skōp), n. [*Gr. φωνή*, sound, + *ἰδός*, form, + *σκοπεῖν*, view.] An instrument for observing the color-figures of liquid films under the action of sonorous vibrations. *E. H. Knight*.

phonoscopic (fō-nī-dō-skop'ik), a. [*Gr. φωνή*, sound, + *ἰδός*, form, + *σκοπεῖν*, view.] Of or pertaining to the phonoscope or the phenomena observed by means of it.

At a meeting of the Physical Society of Paris, Guehard . . . showed that even the films condensed from the breath may exhibit *phonoscopic* properties.

Quoted in *Smithsonian Report*, 1880, p. 274.

phonetic (fō-net'ik), a. [= F. *phonétique* = Sp. *fonético* = Pg. *fonetico* = It. *fonetico* (cf. G. *phonetisch*), < NL. *phoneticus*, < Gr. *φωνητικός*, of or pertaining to sound or voice, phonetic, vocal, < *φωνεῖν*, produce a sound, speak, < *φωνή*, a sound, tone, prop. the sound of the voice (of man or brute): see *phone*.] 1. Relating or pertaining to the human voice as used in speech; concerning articulate sounds, their mode of production, relations, combinations, and changes: as, *phonetic science*; *phonetic decay*.—2. Representing articulate sounds or utterance: as, a *phonetic mode of writing* (in contradistinction to an ideographic or pictorial mode); a *phonetic mode of spelling* (in contradistinction to a traditional, historical, or so-called etymological mode, such as the current spelling of English, in which letters representing or supposed to represent former and obsolete utterance are retained or inserted according to chances of time, caprice, or imperfect knowledge).—3. In *entom.*, as used by Kirby, noting the collar or prothorax of a hymenopterous insect when it embraces the mesothorax and the posterior angles cover the mesothoracic or so-called vocal spiracles.—**Phonetic shorthand**, a system of shorthand or stenography in which words are represented by their sounds, and not by their spelling as in ordinary long-hand writing; *phonography*. All systems of shorthand in use in writing English are phonetic, the phonetic principle being absolutely necessary to the requisite brevity.—**Phonetic spelling**, spelling according to sound; the spelling of words as they are pronounced.

phonetical (fō-net'ī-kāl), a. [*Gr. φωνή*, sound, + *-ical*.] Same as *phonetic*.

phonetically (fō-net'ī-kāl-i), adv. In a phonetic manner; as regards the sound and not the spelling of words.

phonetician (fō-ne-tish'an), n. [*Gr. φωνή*, sound, + *-ician*.] One who is versed in or is a student of phonetics.

We must serve our apprenticeship as *phoneticians*, etymologists, and grammarians before we can venture to go beyond. *Max Müller*, in *Fortnightly Rev.*, N. S., XII. 700.

phoneticism (fō-net'ī-sizm), n. [*Gr. φωνή*, sound, + *-ism*.] The quality of being phonetic; phonetic character; representation, or faithful representation, of utterance by written signs.

The Egyptian and Chinese alphabets, each of which began as simple picture-writing and developed into almost complete *phoneticism*. *Science*, VIII. 553.

phoneticist (fō-net'ī-sist), n. [*Gr. φωνή*, sound, + *-ist*.] One who adopts or favors phonetic spelling.

phoneticize (fō-net'ī-siz), v. t.; pret. and pp. *phoneticized*, ppr. *phoneticizing*. [*Gr. φωνή*, sound, + *-ize*.] To make phonetic; render true, or more nearly corresponding, to utterance. *Science*, XV. 7.

phonetics (fō-net'iks), n. [Pl. of *phonetic*: see *-ics*.] Phonetic science; that division of language-study which deals with articulate sounds and whatever concerns them; phonology.

phonetism (fō-ne-tizm), n. [*Gr. φωνή*, sound, + *-ism*.] Sound; pronunciation.

phonetist (fō-ne-tist), n. [*Gr. φωνή*, sound, + *-ist*.] A student of or one versed in phonetics.

Different *phonetists* of that time giving different lists.

Trans. Amer. Philol. Ass., XVI. 66.

The author of the *Ormulum* was a *phonetist*, and employed a special spelling of his own to represent not only the quality but the quantities of vowels and consonants. *Encyc. Brit.*, VIII. 396.

phonetization (fō-ne-tī-zā'shon), n. [*Gr. φωνή*, sound, + *-ization*.] The act or art of representing sound by phonetic signs. *Webster's Dict.* *Imp. Dict.* [Rare.]

phonetize (fō-ne-tīz), v. t.; pret. and pp. *phonetized*, ppr. *phonetizing*. [*Gr. φωνή*, sound, + *-ize*.] To represent phonetically. [Rare.]

I find a goodly number of Yankeeisms in him [Spenser], such as *Idée* (not as a rhyme); but the oddest is his twice spelling *dew* *deow*, which is just as one would spell it who wished to *phonetize* its sound in rural New England. *Lovell*, *Among my Books*, II. 196.

phonic (fon'ik), a. [= F. *phonique* = Sp. *fonico* = It. *fonico*, < Gr. as if **φωνικός*, < *φωνή*, sound, voice: see *phone*. Cf. *phonetic*.] Of or pertaining to sound; according to sound: as, the *phonic method*. See *phonics*.

phonics (fon'iks), n. [Pl. of *phonic*: see *-ics*.] 1. The doctrine or science of sounds, especially those of the human voice; phonetics.—2. The art of combining musical sounds.

phonikon (fō-nī-kon), n. [NL., < Gr. as if *φωνικός*, neut. of **φωνικός*: see *phonic*.] A musical instrument of the metal wind group, with a

spherical-shaped bell, invented in 1848 by B. F. Czerveny of Königsgrätz, Bohemia.
phonocamptic (fō-nō-kamp'tik), *a.* [= F. *phonocamptique* = Pg. *phonocamptico*, < Gr. *φωνή*, sound, voice (see *phonē*), + *καμπτός*, verbal adj. of *καμπτείν*, bend.] Reflecting or deflecting sound.

The magnifying the sound by the polyphonisms or repercussions of the rocks and other *phonocamptick* objects. *Derham.*

Phonocamptic center. See *center*.
phonocamptics (fō-nō-kamp'tiks), *n.* [Pl. of *phonocamptic*: see -ics.] That branch of physics which treats of the reflection of sound.

Besides what the masters of . . . *phonocamptics*, otacoustics, etc., have done, something has been attempted by the Royal Society. *Evelyn, To Doctor Beale.*

phonogram (fō-nō-gram), *n.* [*<* Gr. *φωνή*, sound, voice, + *γράμμα*, a writing, letter: see *gram*.²] 1. A graphic character representing a sound of the human voice.

It is probable that the adoption of the important step by which the advance was made from ideograms to *phonograms* arose out of the necessity of expressing proper names. *Isaac Taylor, The Alphabet, I. 22.*

2. The record of sound produced by a phonograph, or the sheet of tin-foil or cylinder of wax on which it is produced.

There is a brass cylinder, on which the wax *phonogram* is placed. *Nature, XXXIX. 108.*

phonograph (fō-nō-gráf), *n.* [= F. *phonographe*, < Gr. *φωνή*, sound, voice, + *γράφειν*, write.] 1. A type or character for expressing a sound; a character used in phonography.—2. A form of phonautograph, the invention of Thomas A. Edison, by means of which sounds are made to produce on a register permanent tracings, each having an individual character corresponding to the sound producing it. The sounds can be afterward reproduced from the register. In its original form it consists essentially of a curved tube, one end of which is fitted with a mouthpiece, while the other end (about two inches in diameter) is closed with a diaphragm of exceedingly thin metal.

Phonograph (earlier form).

Connected with the center of this diaphragm is a steel point, which, when the sounds are projected on the disk from the mouthpiece, vibrates backward and forward. This part of the apparatus is adjusted to a cylinder which rotates on a horizontal axis. On the surface of the cylinder is cut a spiral groove, and on the axis there is a spiral screw of the same pitch, which works in a nut. When the instrument is to be used, a piece of tin-foil is gummed round the cylinder, and the steel point is adjusted so as just to touch the tin-foil above the line of the spiral groove. If words are now spoken through the mouthpiece, and the cylinder is kept rotating either by the hand or by clockwork, a series of small marks will be made on the foil by the vibratory movement of the steel point, and these markings will each have an individual character corresponding to the various sounds. The sounds thus registered are reproduced by placing the diaphragm with its steel point in the same position with reference to the tin-foil as when the cylinder originally started. When the cylinder is rotated, the indentations previously made cause the steel point to rise or fall, or otherwise vibrate, as they pass under it, and the diaphragm is consequently thrown into a state of vibration exactly corresponding to that which produced the markings, and thus affects the surrounding air so as to produce sounds closely similar to those originally made by the voice. The reproduced sound is, however, more or less metallic and nasal, and some of the consonants, as s

and z, are not clearly given. The contents of the strips of foil may be reproduced in sound after any length of time, and repeated until the markings become effaced. The instrument has recently been improved and made in the form shown in the second cut, in which the cylinder is driven by an electric current from a battery, and the tin-foil is replaced by a cylinder of hard wax, which can be turned off to remove marks and thus fitted to register other sounds—a process that may be repeated many times before the cylinder is rendered useless.

phonograph (fō-nō-gráf), *v. t.* [*<* *phonograph*, *n.*] To register or record by means of the phonograph.

phonographer (fō-nō-grá-fér), *n.* [*<* *phonograph*, *phonography*, + *-er*.¹] 1. One who is versed in phonography; a writer of phonography, or phonetic shorthand.—2. One who uses or who is skilled in the use of the phonograph.

phonograph-graphophone (fō-nō-gráf-gráf-ō-fōn), *n.* See *graphophone*.

phonographic (fō-nō-gráf'ik), *a.* [= F. *phonographique*; as *phonograph*, *phonography*, + *-ic*.] 1. Pertaining to or used in the writing or representation of sound.

Although our own writing has reached the alphabetic stage, yet we still continue to employ a considerable number of *phonographic* and ideographic signs. *Isaac Taylor, The Alphabet, I. 6.*

2. Of, pertaining to, or of the nature of phonography, or phonetic shorthand; made in or using phonetic shorthand: as, a *phonographic* note or report; a *phonographic* reporter.—3. Of or pertaining to the phonograph; produced by means of the phonograph.

phonographically (fō-nō-gráf'ik-al), *a.* [*<* *phonographic* + *-al*.] Same as *phonographic*.

phonographically (fō-nō-gráf'ik-al-i), *adv.* In a phonographic manner. (*a*) As regards or by means of phonography. (*b*) As regards or by means of the phonograph.

phonographist (fō-nō-grá-fist), *n.* [*<* *phonograph*, *phonography*, + *-ist*.] A phonographer.

phonography (fō-nō-grá-fi), *n.* [= F. *phonographie*, < Gr. *φωνή*, sound, voice, + *γραφία*, < *γράφειν*, write.] 1. The science of sound-signs, or the representation of vocal sounds.—2. The representation of words as they are pronounced; specifically, a system of phonetic writing in shorthand introduced by Isaac Pitman of Bath, England, in the year 1837. The consonants are represented by simple lines (called stems), curved or straight, light or heavy, vertical, horizontal, or slanting; with initial and terminal hooks, circles, loops, etc.; the vowels are represented by dots and dashes, light or heavy, by combinations of them, and by small angles and semicircles. In actual use most of the vowel-signs are omitted (though they may in many cases be approximately indicated by the position—above, on, or below the line—of the consonant-stem), and the consonant-stems, by halving, doubling, etc., are made to perform extra duty. To secure further brevity, various arbitrary devices are employed. Mr. Pitman's system has been variously modified and improved by himself and others in England and America. See *shorthand*. 3. The construction and use of phonographs, and the recording of sound by mechanical means, with a view to its reproduction.

phonolite (fō-nō-lit), *n.* [= F. *phonolithe* = Pg. *phonolite*; equiv. to *clinkstone*; < Gr. *φωνή*, sound, + *λίθος*, stone.] The name given by Klaproth to certain volcanic rocks of exceedingly variable and complex character, but closely related to the trachytes. The essential constituents of phonolite are sanidine and nephelin, and some authors restrict the name to rocks having this composition. Rocks containing sanidine and leucite are called by Rosenbusch *leucite-phonolites*, varieties of which pass into or are closely allied with leucitophyre and leucite-basalt. Nesean and haityne are often present in rocks of this class, and give names to varieties known as *nesean-phonolite* and *haityne-phonolite*. Authors are by no means agreed in opinion with regard to the classification of the many varieties of nephelin and leucite rocks, which frequently pass into each other by insensible gradations. Boricky makes eight divisions of the phonolite family. With the essential constituents of the various phonolites are associated many accessory minerals, especially magnetite, as well as olivin, apatite, zircon, etc. Various zeolitic minerals are of frequent occurrence in the phonolites as alteration products. Phonolite is peculiarly a modern volcanic rock. Auvergne and Bohemia are localities in which it is found in various forms characteristic of volcanic action.

phonolitic (fō-nō-lit'ik), *a.* [*<* *phonolite* + *-ic*.] Of, pertaining to, or of the nature of phonolite; composed of phonolite.

phonologer (fō-nō-lō-jér), *n.* [*<* *phonology* + *-er*.¹] Same as *phonologist*.

phonologic, phonological (fō-nō-lōj'ik, -i-kal), *a.* [= Sp. *fonológico* = Pg. *fonológico*; as *phonology* + *-ic*, *-ic-al*.] Of or pertaining to phonology.

phonologically (fō-nō-lōj'ik-al-i), *adv.* In a phonologic manner; as regards phonology.

phonologist (fō-nō-lō-jist), *n.* [*<* *phonology* + *-ist*.] One who is versed in phonology.

phonology (fō-nō-lō-jī), *n.* [= F. *phonologie* = Sp. *fonología* = Pg. *fonologia* = It. *fonologia*,

< NL. **phonologia*, < Gr. *φωνή*, sound, voice, + *-λογία*, < *λέγειν*, speak: see *-ology*.] 1. The science or doctrine of the sounds uttered by the human voice, or used in a particular language; phonetics.—2. That part of grammar which treats of pronunciation. Compare *orthoepey*.—3. The system of sounds and of their combinations in a language.

These common characteristics of the Semitic alphabets consist in the direction of the writing, the absence of true vowels, the unique *phonology*, the number, the names, and the order of the letters. *Isaac Taylor, The Alphabet, I. 159.*

phonomania (fōn-ō-mā-ni-ä), *n.* [*<* Gr. *φωνή*, slaughter, murder, killing, + *μανία*, madness.] A mania for murder or killing.

phonometer (fō-nō-mē'tēr), *n.* [= F. *phonomètre* = Pg. *phonometro*, < Gr. *φωνή*, sound, voice, + *μέτρον*, measure.] An instrument for experimentally determining and exhibiting the number of vibrations of a sonorous body (as a string or tuning-fork) in a unit of time. The simplest form comprises apparatus for uniformly moving a paper tape coated with lampblack, in contact with a delicate tracing-point fixed to the vibrating body. By this means an undulating curve is traced having a length corresponding to the time of its motion. The number of undulations in the curve is also the number of vibrations made by the sounding string or fork. By the substitution of sensitized paper for the blackened tape, and a small mirror for the tracing-point, permanent photographic tracings of such curves can be made. See *Saari's wheel* (under *wheel*), and *siren*, and compare *phonautograph*.

phonomotor (fō-nō-mō'tor), *n.* [*<* Gr. *φωνή*, sound, voice, + L. *motor*, mover: see *motor*.] An instrument by which the energy of sound-waves, as those produced by the human voice, may be made to perform mechanical work. Such an instrument invented by Edison has a mouthpiece like that of a phonograph, and a diaphragm the vibration of which, transmitted by means of a pawl, causes a small wheel to revolve. Compare *phonoscope*.

phonophore (fō-nō-fōr), *n.* [*<* NL. *phonophorus*, < Gr. *φωνή*, sound, voice, + *φορέω*, bearing, < *φέρειν* = E. *bear*.¹] 1. An auditory ossicle; one of the phonophori. *Coues*.—2. An apparatus by means of which telephonic communication may be maintained over a telegraph-line without interfering with its use in the ordinary way. The principal feature of the instrument consists in the arrangement of two wires of considerable length, wound in close proximity to but completely insulated from each other, which together act as a condenser. Also called *phonopore*.

phonophori (fō-nō-fō-rī), *n. pl.* [NL., pl. of *phonophorus*: see *phonophore*.] The auditory ossicles, or ossicula auditus, of *Mammalia*, collectively considered as bones subservient to the office of hearing. *Coues*, Amer. Jour. Otolaryngology, IV. 19. See cut under *tympanic*.

phonophorous (fō-nō-fō-rus), *a.* [As *phonophore* + *-ous*.] Conveying sound; having the function of the phonophori. *Coues*.

phonoplex (fō-nō-plēks), *n.* [NL., < Gr. *φωνή*, sound, voice, + *πλέκω*, a twisted rope, < *πλέκειν*, twist.] A system of duplexing on telegraph-lines by the use of condensers and the telephone as a receiver, devised by Edison.

phonopore (fō-nō-pōr), *n.* [*<* Gr. *φωνή*, sound, voice, + *πόρος*, a means of passing: see *pore*.¹] Same as *phonophore*, 2.

phonoporic (fō-nō-pōr'ik), *a.* [*<* *phonopore* + *-ic*.] Of or pertaining to, or made by, the phonopore. *Electric Rev.* (Amer.), XIV. 6.

phonorganon, phonorganum (fō-nōr-gā-non, -num), *n.* [NL., < Gr. *φωνή*, sound, voice, + *ὄργανον*, an instrument: see *organ*.¹] An instrument for imitating vocal sounds or speech; a speaking-machine.

phonoscope (fō-nō-skōp), *n.* [*<* Gr. *φωνή*, sound, voice, + *σκοπεῖν*, view.] 1. A machine for recording music as it is played or sung, or for testing the quality of strings for musical instruments.—2. Same as *microphone*.

phonotelemeter (fō-nō-te-lem'ē-tēr), *n.* [*<* Gr. *φωνή*, sound, voice, + *τῆλε*, far, + *μέτρον*, measure.] An instrument for determining distances by means of the velocity with which sound is transmitted.

phonotype (fō-nō-tip), *n.* [*<* Gr. *φωνή*, sound, voice, + *τύπος*, mark, type: see *type*.] A system of expression which provides a distinct character for every distinct sound of speech; a phonetic alphabet, or writing or printing in phonetic characters.

phonotypic (fō-nō-tip'ik), *a.* [*<* *phonotype* + *-ic*.] Of or pertaining to phonotypy: as, a *phonotypic* alphabet; *phonotypic* writing or printing.

phonotypical (fō-nō-tip'ik-al), *a.* [*<* *phonotypic* + *-al*.] Same as *phonotypic*.

phonotypically (fō-nō-tip'i-kal-i), *adv.* According to or as regards phonotypy; in phonotypic characters. *Ellis, Early Eng. Pronunciation, IV. 1182.*

phonotypist (fō-nō-ti-pist), *n.* [*< phonotyp-y + -ist.*] An advocate of phonotypy; one who practises phonotypy.

phonotypy (fō-nō-ti-pi), *n.* [*< Gr. φωνή, sound, voice, + τύπος, mark, type: see type.*] A method of representing each of the sounds of speech by a distinct printed character or letter; phonetic printing.

phoot, *interj.* Same as *pho*.

Phora (fō'rā), *n.* [NL. (Latreille, 1796), *< Gr. φέρω, bearing, carrying, < φέρειν = E. bear¹.*] In entom., the typical genus of *Phoridae*, containing many small active flies whose habits are those of scavengers or, rarely, of parasites. They feed usually on fungi and decaying vegetation. Also called *Noda*.

Phoradendron (fō-rā-den'dron), *n.* [NL. (Nuttall, 1848), so called as being parasitic on trees; *< Gr. φέρω (= L. fur), a thief, + δένδρον, a tree.*] A genus of apetalous plants, the American mistletoes, of the order *Loranthaceae* and tribe *Viscaceae*, characterized by the erect anthers subsessile on the base of the calyx-lobes, vertically two-celled and opening by a longitudinal slit. The 80 species are all American, widely scattered through the warmer regions, extending into the United

American Mistletoe (*Phoradendron flavescens*). a, branch with the male inflorescence; b, branch with the fruit.

States to New Jersey, and especially found in the west, and southward into the Argentine Republic. They are shrubby yellowish-green parasites, generally with abundant short much-jointed branches, flat opposite thickish leaves, and terminal or axillary jointed spikes of small sessile and immersed flowers in several or many rows. *P. flavescens* extends north to New Jersey, on various trees, especially the sour-gum (*Nyssa sylvatica*), and is often destructive to the tree, as in cases of growth on elms, hickories, and wild cherries. (See *mistletoe*, 2.) It is used as a substitute for the European mistletoe.

phoranthium (fō-ran'thi-um), *n.*; pl. *phoranthia* (-iā). [NL., *< Gr. φέρω, bearing (< φέρειν = E. bear¹), + άνθος, flower.*] In bot., same as *clinanthium*.

phorbela (fōr-bi'ā), *n.* [NL., *< Gr. φορβέλα, a mouth-band, a halter by which a horse is tied to the manger, < φορβή, pasture, fodder, < φέρβειν, feed: see herb.*] Same as *capistrum*, 1.

Phoridae (fōr'i-dā), *n. pl.* [NL., *< Phora + -idae.*] A family of cyclorhaphous *Diptera*, founded on the genus *Phora*. They are small, nearly naked humpback flies with one- or two-jointed antennae, and large wings with two strong veins and from three to five weak cross-veins. They are everywhere numerous, and feed in the larval state on all sorts of dead animal and vegetable matters, seldom attacking living insects and thus becoming parasites.

phorminx (fōr'mingks), *n.* [NL., *< Gr. φόρυγξ, a kind of lyre, perhaps < φέρειν, carry, = E. bear¹, as being a portable lyre.*] An ancient Greek stringed musical instrument; a cithara or lyre.

We beat the phorminx till we hurt our thumbs,
As if still ignorant of counterpoint.

Mrs. Browning, *Aurora Leigh*, l.

Phormium (fōr'mi-um), *n.* [NL. (J. and G. Forster, 1776), *< Gr. φοπύλον, a plant, a kind of sage. Cf. Gr. φοπύλον, dim. of φοπύς, a basket, mat, < φέρειν = E. bear¹.*] A genus of liliaceous plants of the tribe *Hemerocallideae*, characterized by the turbinate form of the perianth above its short tube, with three lanceolate erect sepals and three thinner petals slightly spreading at the apex.

New Zealand Flax (*Phormium tenax variegata*).

The 2 species, with several varieties, are natives of New Zealand and Norfolk Island. They are perennials, forming large tufts, with rigid two-ranked sword-shaped radical leaves from a short thickened rootstock. They bear a tall leafless scape branching at the summit, with erect variegated

lurid or yellow and red flowers in a terminal panicle. The largest variety produces green and gray leaves from 5 to 6 feet long, and deep orange-red flowers on a stalk 16 feet high. *P. tenax variegata* is the New Zealand flax (which see, under *flax*, 1 (b)), also called *flax-bush*. It is a very beautiful variegated-leaved variety, valuable for lawn decoration. The other varieties are cultivated also for their beauty, and especially for their fiber—the strongest vegetable fiber known. The plants are raised from the divided roots or from seeds, and are hardy in England. The fiber is now sold for making cordage, paper, etc., and gardeners use the leaves as cordage when simply torn into shreds.

Phoronis (fō-rō'nis), *n.* [NL., *< Gr. Φορωνίς, of Phoroneus, < Φορωνεύς, Phoroneus, a king of Argos.*] A genus of *Gephyrea*, typical of the family *Phoronidae*. They have a circlet of long tentacular appendages around the mouth, close to which the anus is situated. A pseudohemal system exists, and the fluid is said to contain red corpuscles. The embryo is mesotrochal, but has also two ciliated bands, one around the anus, the other behind the mouth, the latter being produced into a fringe of numerous tentaculiform lobes, in which state it is the so-called *actinotrocha*.

phoronomiā (fō-rō-nō-mi-ā), *n.* [NL.: see *phoronomy*.] Same as *phoronomics*.

phoronomics (fō-rō-nō-miks), *n.* [*< phoronomy + -ics.*] That branch of mechanics which treats of bodies in motion; kinematics; the purely geometrical theory of motion.

phoronomy (fō-rō-nō-mi), *n.* [= *F. phoronomie, < NL. phoronomia, < Gr. φέρω, motion (< φέρειν, carry, + νόμος, < νόμος, law: see nome¹.*] 1. Same as *phoronomics*.

Matter, quantitatively defined, is "the moveable in space." In this point of view it is the object of a science we may call *Phoronomy*. *E. Caird, Philos. of Kant, p. 489.*

2. The inference of force from motion.

phoroscope (fōr'ō-skōp), *n.* [*< Gr. φέρω, motion (< φέρειν = E. bear¹), + σκοπεῖν, view.*] An instrument for producing at a distance, by means of electricity, a copy of an image as a photograph.

phosgen, **phosgene** (fōs'jen, -jēn), *n.* [= *F. phosgene = Pg. phosgeno; irreg. < Gr. φῶς, contr. of φῶς, light, + -γενής, producing: see -gen.*] Carbonyl chlorid (COCl₂), a gas formed by the action of light on a mixture of carbonic acid and chlorine. Below 8° C. it is a colorless fluid with a suffocating odor.

phosgenite (fōs'jen-it), *n.* [*< phosgen + -ite².*] A mineral consisting of the chlorid and carbonate of lead. It occurs in white or yellowish tetragonal crystals having an adamantine luster. Also called *corneous lead*.

phosphate (fōs'fat), *n.* [= *F. phosphate = Sp. fosfato = Pg. fosfato = It. fosfato; as phosph(orus) + -ate¹.*] 1. A salt of phosphoric acid.—2. A name given to various mineral deposits which consist largely of calcium or iron and alumina phosphates, and are used in the manufacture of commercial fertilizers.—**Phosphate of iron**, a native blue ochre, in color similar to the deeper hues of ultramarine ash, but more dull.

phosphated (fōs'fā-ted), *a.* [*< phosphate + -ed².*] Phosphatized; as, *phosphated deposits*. *Nature, XXXIX. 192.*

phosphatic (fōs'fat'ik), *a.* [= *F. phosphatique; < phosphate + -ic.*] Of the nature of or containing a phosphate; characterized by the formation or presence of a phosphate.—**Phosphatic bread**, bread made from bolted meal or white flour to which nutritive salts which have been removed with the bran or gluten coat are restored by the use of an acid phosphate and a carbonated alkali, which, also, by the evolution of carbonic acid, lighten or raise the bread.—**Phosphatic diathesis**, in med., the condition of the system which evinces itself in phosphaturia.—**Phosphatic nodules**, concretions and nodules of phosphate of lime, now largely used for artificial manure.

phosphatization (fōs'fā-ti-zā'shon), *n.* [*< phosphatize + -ation.*] Conversion into a phosphate, or a phosphatic condition. *Amer. Geologist, I. 256.*

phosphatize (fōs'fā-tiz), *v. t.*; pret. and pp. *phosphatized*, ppr. *phosphatizing*. [*< phosphate + -ize.*] 1. To reduce to the form of a phosphate.

In most instances these fossils are *phosphatized* more or less completely, in extreme cases to the extent of nearly obliterating the organic structure. *Science, III. 587.*

2. To treat with phosphates, as with phosphatic medicines or fertilizing phosphates.

phosphaturia (fōs'fā-tū-ri-ā), *n.* [NL., *< phosphate + Gr. ούρον, urine.*] The presence of an excessive quantity of phosphates in the urine.

phosphene (fōs'fēn), *n.* [= *F. phosphène; irreg. < Gr. φῶς, light, + φαίνω, show.*] The luminous image produced by pressing the eyeball with the finger or otherwise. It is due to the direct mechanical stimulation of the retina.

Press the finger into the internal corner of the eye: you perceive a brilliant colored spectrum in the field of view on the opposite or external side. . . . The colored spectra have been called *phosphene*. *La Combe, Sight, p. 67.*

phosphide (fōs'fid or -fid), *n.* [*< phosph(orus) + -ide¹.*] A combination of phosphorus with a single element: as, *phosphide* of iron or copper.

phosphine (fōs'fin), *n.* [*< phosph(orus) + -ine².*] Same as *phosphureted hydrogen* (which see, under *phosphureted*).

phosphite (fōs'fit), *n.* [= *F. phosphite = Sp. fosfito = Pg. phosphito; as phosph(orus) + -ite².*] A salt of phosphorous acid.

phosphochalcite (fōs'fō-kal'sit), *n.* [*< phospho(rus) + chalcitis.*] Hydrous phosphate of copper. See *pseudomalachite*.

Phosphor (fōs'for), *n.* [= *F. Phosphore = Sp. Fosforo = Pg. Fosforo = It. Fosforo, Phosphor (in def. 2, F. phosphore = Sp. fosforo = Pg. phosphoro = It. fosforo = Dan. Sw. fosfor, < NL. phosphorus, phosphorus), < L. Phosphorus, < Gr. Φωσφόρος, Lucifer, the morning star, < φῶς, bringing light, < φῶς, contr. of φῶς, light (< φαίνω, shine: see phase¹), + -φόρος, < φέρειν, bring, = E. bear¹. Cf. the equiv. Lucifer.] 1. The morning star, or Lucifer; the planet Venus, when it precedes the sun and shines in the morning.*

They saw this Phosphor's Infant-light, and knew
It bravely usher'd in a Sun as New.

Cowley, *Davidels, II.*

Bright Phosphor, fresher for the night,
By thee the world's great work is heard
Beginning. *Tennyson, in Memoriam, cxli.*

2t. [*l. c.*] Phosphorus.

Of lambent flame you have whole sheets in a handful of phosphor. *Addison.*

phosphorate (fōs'fō-rāt), *v. t.*; pret. and pp. *phosphorated*, ppr. *phosphorating*. [*< phosphorus + -ate².*] To combine or impregnate with phosphorus.—**Phosphorated oil**. See *oil*.

phosphor-bronze (fōs'for-bronz), *n.* See *bronze*.

phosphor-copper (fōs'for-kop'er), *n.* A combination of phosphorus with copper, prepared by the reduction of phosphate of copper in a graphite crucible, or in some other similar way, for use in making phosphor-bronze.

phosphoreous (fōs'fō-rē-us), *a.* [*< phosphor + -eous.*] Same as *phosphorescent*. *Pennant.*

phosphoresce (fōs'fō-res'), *v. i.*; pret. and pp. *phosphoresced*, ppr. *phosphorescing*. [*< phosphor + -esce.*] To shine, as phosphorus, by exhibiting a faint light without sensible heat; give out a phosphorescent light.

phosphorescence (fōs'fō-res'ens), *n.* [= *F. phosphorescence = Sp. fosforescencia = Pg. phosphorescencia = It. fosforescenza; as phosphorescen(t) + -ce.*] The state or character of being phosphorescent; the property which certain bodies possess of becoming luminous without undergoing combustion. Phosphorescence is sometimes a chemical, sometimes a physical action. When chemical, it consists essentially in slow oxidation attended with evolution of light, as in the case of phosphorus. When physical, it consists in the continuation of the molecular vibrations causing the emission of light after the body has ceased to be exposed to the light-radiation (or, more generally, radiant energy) to which this motion is due; this is seen in the case of the diamond, chlorophane, sugar, barium and calcium sulphids, and many other substances. Phosphorescence is also produced in some crystals (diamond, calcite, etc.) by exposure to the electrical discharge in a vacuum-tube. The phosphorescence of the sea is produced by the scintillating or phosphorescent light emitted from the bodies of certain marine animals. The luminosity of plants is a condition under which certain plants (always, so far as now known, *Thallophytes*) evolve light. The so-called luminosity or phosphorescence of decaying wood is due to the presence of the mycelium of *Agaricus melleus*. Other luminous fungi are *Agaricus cleareus*, *A. igneus*, *A. noctilus*, and *A. Gardneri*. Various algae and diatoms also exhibit this phenomenon. See cut under *Noctiluca*.

What is correctly termed *phosphorescence* has nothing to do with phosphorus, but it is merely a species of fluorescence. *Tait, Light, § 204.*

phosphorescent (fōs'fō-res'ent), *a.* and *n.* [= *F. phosphorescent = Sp. fosforescente = Pg. phosphorescente = It. fosforescente; as phosphor + -escent. Cf. phosphoresce.*] 1. *a.* Shining with a faint light or luminosity like that of phosphorus; luminous without sensible heat. Various animals are phosphorescent; as, among infusorians, the noctiluca (see cut under *Noctiluca*); among polyps, certain sea-pens (*Pennatulæ phosphorea*, for example); among insects, the glow-worm and other beetles of the family *Lampyridæ* (see cut under *firefly, Lampyris* and *lightning-bug*), and many bugs of the family *Pulgoridæ* (see cut under *lantern-fly*); among acidulans, the pyrosomes or firebodies; and some fishes. A number of mineral substances exhibit a similar property after having been exposed to a bright light, though from a different cause, as calcium chlorid, anhydrous calcium nitrate, the sulphids of barium, strontium, calcium (luminous paint), the diamond, some varieties of fluor-spar, apatite, borax, and many other substances. Some mineral bodies become phosphorescent when strongly heated, as a piece of lime. See *phosphorescence*.—**Phosphorescent dial**, **paint**, **photograph**, etc. See the nouns.

II. *n.* A substance having the property of phosphorescence, or luminosity without heat.

The additions used by us as the third constituent are colorless salts, and all of them fusible at the temperature at which the phosphorescents are prepared.

Philosophical Mag., 5th ser., XXVIII. 428.

phosphoreted, phosphorette (fos'fō-ret-ed), *a.* Same as *phosphureted*.

phosphoric (fos'fō'ik), *a.* [= *F. phosphorique* = *Sp. fosfórico* = *Pg. phosphorico* = *It. fosforico*; as *phosphor* + *-ic*.] Pertaining to, obtained from, or resembling phosphorus; phosphorescent.

How the lit lake shines, a *phosphoric* sea,
And the big rain comes dancing to the earth!
Byron, *Child Harold*, III. 98.

The unseen figure . . . had caused to be thrown open the graves of all mankind; and from each issued the faint phosphoric radiance of decay.

Poe, *Tales*, I. 384.

Glacial phosphoric acid. See *glacial*.—**Phosphoric acid**, H_3PO_4 (sometimes called *orthophosphoric acid* in contradistinction to *metaphosphoric acid*), an acid usually obtained by decomposing bone-ash, which consists chiefly of calcium phosphate, with sulphuric acid, and separating from foreign matters the phosphoric acid thus liberated. It is also produced by the oxidation of phosphorus acid, by oxidizing red phosphorus with nitric acid, by the decomposition of apatite and other native phosphates, and in various other ways. It is a colorless odorless syrup, with an intensely sour taste. It is tribasic, forming three distinct classes of metallic salts. The three atoms of hydrogen may in like manner be replaced by alcohol radicals, forming acid and neutral ethers. Phosphoric acid is used in medicine as a tonic.

phosphorical (fos-for'i-kal), *a.* [*< phosphoric* + *-al*.] Phosphoric.

phosphoridrosis (fos'for-i-drō'sis), *n.* [NL., *< phosphorus* (see *Phosphor*) + *Gr. ἰδρωσις*, sweat; see *hidrosis*.] Luminous sweat, sometimes seen in the last stages of phthisis. *Lancet*.

Phosphorist (fos'fō-ris-t), *n.* [*< "Phosphoros,"* a Swedish periodical which was the organ of this movement.] In *Swedish literary hist.*, one of a class of poets and writers of romantic and idealistic tendencies who flourished about the beginning of the nineteenth century.

Among the *Phosphorists*, Atterbom was the man of most genius.

Encyc. Brit., XXII. 757.

phosphorite (fos'fō-rīt), *n.* [= *F. phosphorite* = *Sp. fosforita* = *Pg. phosphorita*; as *phosphor* + *-ite*.] A name applied originally to a massive variety of apatite, but now used to embrace the more or less impure earthy to compact calcium phosphate which forms beds of considerable magnitude in some localities (Estremadura in Spain, Bohemia, etc.), and is of much economic importance.

phosphorize (fos'fō-riz), *v. t.*; pret. and pp. *phosphorized*, ppr. *phosphorizing*. [= *F. phosphoriser* = *Pg. phosphorisar*; as *phosphor* + *-ize*.] To combine or impregnate with phosphorus.

phosphorogenic (fos'fō-rō-jen'ik), *a.* [*< NL. phosphorus*, *phosphorus*, + *Gr. γενής*, producing; see *-gen*.] Producing phosphorescence; specifically noting those rays of the spectrum which possess the property of continuing the phosphorescence of certain substances previously excited by exposure to light.

Glass is only less perfectly permeable than rock-crystal to the *phosphorogenic* rays that accompany the luminous ones.

Müller, *Elem. of Chem.*, § 112.

phosphorograph (fos-for'ō-grāf), *n.* [*< NL. phosphorus*, *phosphorus*, + *Gr. γράφειν*, write.] A representation, as of the solar spectrum, obtained by phosphorescence, as by projecting it upon a phosphorescent substance like luminous paint: in this way an impression of the invisible infra-red part of the spectrum is obtained.

J. W. Draper has obtained what he calls a *phosphorograph* of the solar spectrum, and has compared it with a photograph of the same spectrum.

Quoted in *Smithsonian Report*, 1881, p. 368.

phosphorographic (fos'fō-rō-grāf'ik), *a.* [*< phosphorograph* + *-ic*.] Of or pertaining to phosphorography.

Phosphorographic studies for the photographic reproduction of the stars.

Nature, XXXIII. 481.

phosphorography (fos-fō-rōg'ra-fi), *n.* [*< NL. phosphorus*, *phosphorus*, + *Gr. γράφειν*, write.] The art, method, etc., of making phosphorographs.

M. Ch. V. Zenger brought before the Academy of Sciences on August 30th a paper entitled "*Phosphorography* applied to the Photography of the Invisible."

Athenæum, No. 3073, p. 375.

phosphoroscope (fos'fō-rō-skōp), *n.* [= *F. phosphoroscope*, *< NL. phosphorus*, *phosphorus*, + *Gr. σκοπεῖν*, behold.] 1. An instrument for measuring the duration of evanescent phosphorescence in different substances. It consists of a hollow disk within which is placed the object to be tested. The disk is geared with multiplying-wheels so that it can be rotated at any desired speed, and is so perforated on op-

posite sides that the substance placed within it is alternately exposed to a light placed behind the disk and to the eye.

M. E. Becquerel has shown experimentally by his beautiful *phosphoroscope* the finiteness of duration of the emission of light in the case of solids in which it was so brief that its emission was described as "fluorescence."

Stokes, *Light*, p. 150.

2. A philosophical toy consisting of glass tubes containing different phosphorescent substances and arranged in a box. When exposed to sunlight or strong artificial light, and afterward put in a dark place, the tubes glow with lights of different colors.

Alumina . . . glowing with a rich red colour in the phosphoroscope.

Gordon, *Elect. and Mag.*, II. 116.

phosphorous (fos'fō-rus), *a.* [= *F. phosphoreux* = *Sp. It. fosforoso* = *Pg. phosphoroso*; as *phosphor* + *-ous*.] Pertaining to, obtained from, or containing phosphorus.—**Phosphorous acid**, H_3PO_3 , an acid produced by the action of water on phosphorous anhydride, by exposing sticks of phosphorus to moist air, and in several other ways. Phosphorous acid exists usually in the form of a thick uncrystallizable syrup, but it may also be obtained crystallized. This acid is dibasic, forming two series of metallic salts, named respectively *neutral* and *acid phosphites*.—**Phosphorous anhydride**, P_2O_3 , a soft, white, readily volatile powder prepared by burning phosphorus in a limited supply of air.

phosphoruria (fos-fō-rū'ri-ā), *n.* [NL., *< phosphorus*, *phosphorus*, + *Gr. οὐρον*, urine.] 1. Phosphaturia.—2. Photuria.

phosphorus (fos'fō-rus), *n.* [L. (in def. 2 NL.), *< Gr. φωσφόρος*, Lucifer; see *Phosphor*.] 1. [cap.] The morning star; Phosphor.

John Baptist was that *Phosphorus* or morning star, to signify the sun's approaching.

Rev. T. Adams, *Works*, III. 224.

2. Chemical symbol, P; atomic weight, 31; specific gravity, 1.826. A solid non-metallic combustible substance, hitherto undecomposed, not found by itself in nature, but occurring chiefly in combination with oxygen, calcium, and magnesium. It is widely distributed, being an essential constituent of all plants and of the bony tissue of animals. It was originally obtained from urine; but it is now manufactured from bones, which consist in large part of calcium phosphate. Common phosphorus, when pure, is semi-transparent and colorless. At common temperatures it is a soft solid, easily cut with a knife, the cut surface having a waxy luster; at 108° F. it fuses, and at 560° is converted into vapor. It is soluble, by the aid of heat, in naphtha, in fixed and volatile oils, and in sulphur chlorid, carbon disulphid, and phosphorus sulphid. It is exceedingly inflammable. Exposed to the air at common temperatures, it undergoes slow combustion, emits a white vapor of a peculiar garlic odor, and appears luminous in the dark. A very slight degree of heat is sufficient to inflame it in the open air. Gentle pressure between the fingers, friction, or a temperature not much above its point of fusion kindles it readily. It burns rapidly even in the air, emitting a splendid white light, and causing intense heat. Its combustion is far more rapid in oxygen gas, and the light far more vivid. The product of the perfect combustion of phosphorus is phosphorous pentoxid (P_2O_5), a white solid which readily takes up water, passing into phosphoric acid (which see, under *phosphoric*). Phosphorus may be made to combine with most of the metals, forming compounds called *phosphides*; when dissolved in fat oils it forms a solution which is luminous in the dark. It is chiefly used in the preparation of lucifer matches, and in the preparation of phosphoric acid. It is used to some extent in medicine in nervous affections, but is violently poisonous except in very minute doses. Phosphorus presents a good example of allotropy, in that it can be exhibited in at least one other form, known as *red* or *amorphous phosphorus*, presenting completely different properties from common phosphorus. This variety is produced by keeping common phosphorus for a long time slightly below the boiling-point. It is a red, hard, brittle substance, not fusible, not poisonous, and not readily inflammable, so that it may be handled with impunity. When heated to the boiling-point it changes back to common phosphorus.—**Bolognian, Bolognian, or Bononian phosphorus**, one of the most powerful of the solar phosphoric substances. It is prepared by heating barium sulphate intensely with powdered charcoal, and filling with it while hot glass tubes, which are at once sealed. After exposure to sunlight, the mass phosphoresces in the dark with a bright orange-colored light.—**Phosphorus bottle.** (a) A contrivance for obtaining instantaneous light. The light is produced by stirring a piece of phosphorus about in a dry bottle with a hot wire, and introducing a sulphur match. It is now superseded by lucifer matches and similar contrivances. (b) A small bottle containing 12 grains of phosphorus melted in half an ounce of olive-oil. On being uncorked in the dark this solution emits light enough to illuminate the dial of a watch, and it will retain this property for several years if not too frequently used.—**Phosphorus paste**, a poisonous compound containing phosphorus for the destruction of vermin, as rats, mice, cockroaches, etc.

phosphorus-box (fos'fō-rus-boks), *n.* A box containing oxymuriate matches, which first superseded the tinder-box.

When I was about 16 I joined in partnership with a man who used to make *phosphorus boxes*. I sold them for him. A piece of phosphorus was stuck in a tin tube, the match was dipped into the phosphorus, and it would ignite by friction. *Mayhew*, *London Labour and London Poor*, I. 373.

phosphuret (fos'fū-ret), *n.* [= *F. phosphure* = *Sp. fosforeto* = *Pg. phosphureto*; as *phosph* (*orus*) + *-uret*.] Same as *phosphide*.

phosphureted, phosphuretted (fos'fū-ret-ed), *a.* [*< phosphuret* + *-ed*.] Combined with phosphorus.

phorus.—**Phosphureted hydrogen**, PH_3 , a gas produced by boiling phosphorus with a caustic alkali. The gas so prepared is spontaneously inflammable, owing to the presence of traces of vapor of a liquid hydride of phosphorus, and during its combustion there are formed water and phosphoric acid. The pure gas, while very combustible, does not inflame spontaneously; it is colorless, is very poisonous, and has a disgusting smell, resembling that of decaying fish. When mixed with air or oxygen gas it explodes at a temperature of 800° F. It is produced by the decomposition of animal substances. When this gas is cooled below zero (C.) it deposits a liquid, hydrogen phosphide; the gaseous phosphide remaining is no longer spontaneously inflammable. Also called *phosphine*.

photalgia (fō-tal'ji-ā), *n.* [NL., *< Gr. φῶς* (*phōs*), light, + *ἀλγος*, pain.] Pain arising from light.

photantypimeter (fō-tan-tit-i-pim'e-tēr), *n.* [NL., *< Gr. φῶς* (*phōs*), light, + *ἀντίτυπος*, corresponding (see *antitype*), + *μέτρον*, measure.] A chemical actinometer proposed by Marchand, consisting of a solution of perchlorid of iron and oxalic acid in water. When it is exposed to the sunlight, carbonic-acid gas is set free, the measure of whose volume expresses the chemical intensity of the sun's rays.

photics (fō'tiks), *n.* [*< Gr. φῶς* (*phōs*), light, + *-ics*.] The science of light.

Photinia (fō-tin'i-ā), *n.* [NL. (Lindley, 1821), so called with ref. to the coriaceous and shining evergreen leaves and white flowers; *< Gr. φωτεινός*, shining, bright, *< φῶς* (*phōs*), light.] A genus of rosaceous shrubs and trees, of the tribe *Pomeæ*, known by the evergreen leaves and one- to five-celled berry-like pome, with thin partitions. There are about 20 species, natives of Japan, China, and the mountains of India, and one of California. They bear alternate undivided leaves, often with leaf-like stipules, and usually white flowers in terminal corymbs or panicles. The ovoid juicy fruit is crowned by the five ovate calyx-lobes, and is sometimes edible. *P. serrulata* and its varieties (often wrongly called *Crataegus glabra*) are the Chinese hawthorn, and *P. arbutifolia* is the Californian May-bush of ornamental lawn cultivation; both are hardy evergreens, growing to a height of 10 feet. The bark of *P. dubia* is used in Nepal to dye scarlet. *P. Japonica* yields a small scarlet fruit eaten by the Japanese, and is planted for ornament. See *lognat*.

Photinian (fō-tin'i-an), *n.* [*< LL. Photinianus*, an adherent of Photinus; *< Photinus*, *< Gr. φωτεινός*, Photinus (see def.), *< φωτεινός*, shining, bright, *< φῶς* (*phōs*), light.] One of a sect, disciples of Photinus, a bishop of Sirmium in Pannonia in the fourth century. Photinus denied Christ's essential divinity, and believed that his moral character developed from human to divine.

Photinianism (fō-tin'i-an-izm), *n.* [*< Photinian* + *-ism*.] The system of doctrine held by Photinus.

photo (fō'tō), *n.* A colloquial abbreviation of *photograph*.

photobiotic (fō'tō-bi-ōt'ik), *a.* [*< Gr. φῶς* (*phōs*), light, + *βιωτικός*, belonging to life.] Living habitually in the light: said of a class of plant-cells.

photocampsis (fō-tō-kamp'sis), *n.* [NL., *< Gr. φῶς* (*phōs*), contr. of *φῶς*, light (*< φάειν*, shine; see *phases*), + *κάμψις*, bending, *< κάμπτειν*, bend.] Refraction of light. *Thomas*, *Med. Dict.*

photochemical (fō-tō-kem'i-kal), *a.* [*< Gr. φῶς* (*phōs*), light, + *E. chemical*.] Of or pertaining to the chemical action of light.

photochemist (fō-tō-kem'is-t), *n.* [*< Gr. φῶς* (*phōs*), light, + *E. chemist*.] One who is versed in photochemistry.

photochemistry (fō-tō-kem'is-tri), *n.* [*< Gr. φῶς* (*phōs*), light, + *E. chemistry*.] That branch of chemistry which treats of the chemical action of light.

photochromatic (fō'tō-krō-mat'ik), *a.* [*< photochromy* + *-atic* (*after chromatic*).] Of or pertaining to or produced by photochromy. *Athenæum*, No. 3235, p. 562.

photochromolithograph (fō-tō-krō-mō-lith'ō-grāf), *n.* [*< Gr. φῶς* (*phōs*), light, + *E. chromolithograph*.] A chromolithograph in the production of which photographic processes have been used.

photochromotype (fō-tō-krō-mō-tip), *n.* [*< Gr. φῶς* (*phōs*), light, + *E. chromotype*.] A photograph picture printed in colors in a printing-press by any of the ordinary methods of typography in colors.

photochromy (fō'tō-krō-mi), *n.* [*< Gr. φῶς* (*phōs*), light, + *χρῶμα*, color.] The art of reproducing colors by photography, or of producing photographic pictures in which the originals are shown in their natural colors. There is as yet no process by which natural colors can be registered by photography by a single or simple operation, in such form that the resulting picture will be permanent. By the device of taking a separate negative for every color in the subject, using in every case such chemicals or methods as will reproduce only the desired color, and afterward combining prints or matrices from all the negatives, every one in its appropriate color, a remarkably close ap-

proximation is made to the natural appearance of the subject. This process is peculiarly adapted to the reproduction of such works of art as jewels, tapestries, potteries, and enamels.

photochronograph (fō-tō-kron-ō-grāf), *n.* [*Gr. φῶς* (phōs-), light, + *E. chronograph*.] 1. An instrument for taking photochronographic pictures. See *photochronography*.—2. A picture taken by this method.

photochronographic (fō-tō-kron-ō-grāf'ik), *a.* Of or pertaining to photochronography.

photochronography (fō-tō-kron-ō-grāf'ī), *n.* [*Gr. φῶς* (phōs-), light, + *χρόνος*, time, + *γράφειν*, write.] The method, practice, etc., of taking instantaneous photographs at regular and generally at short intervals of time, as of a bird, horse, projectile, etc., in motion.

photocrayon (fō-tō-krā'on), *n.* [*Gr. φῶς* (phōs-), light, + *E. crayon*.] Produced by photographic processes giving the effect of work in crayons, or finished in crayons upon a photographic groundwork: said of a picture.

photodermatic (fō-tō-dēr-mat'ik), *a.* [*Gr. φῶς* (phōs-), light, + *δέρμα*, skin: see *dermatic*.] Having a luminous or phosphorescent skin; phosphorescent, as the mantle of a mollusk. *Nature*, XL. 384.

photodrome (fō-tō-drōm), *n.* [*Gr. φῶς* (phōs-), light, + *δρόμος*, a running, < *δραμειν*, run.] An instrument for producing optical effects by flashes of light thrown upon revolving disks on which are painted various figures or devices.

photodynamic (fō-tō-di-nam'ik), *a.* [*Gr. φῶς* (phōs-), light, + *δύναμις*, power: see *dynamic*.] Of or pertaining to the energy or effect of light.

photodyphoria (fō-tō-dis-fō-rī-ā), *n.* [NL., < *Gr. φῶς* (phōs-), light, + *δυσφωρία*, pain hard to be borne: see *dysphoria*.] An intolerance of light; photophobia.

photo-electric (fō-tō-ē-lek'trik), *a.* [*Gr. φῶς* (phōs-), light, + *E. electric*.] Acting by the combined operation of light and electricity; producing light by means of electricity; also noting apparatus for taking photographs by electric light, or by a lamp whose illuminating power is derived from electricity.

photo-electrical (fō-tō-ē-lek'tri-kal), *a.* [*Gr. φῶς* (phōs-), light, + *E. electrical*.] Same as *photo-electric*.

photo-electrotype (fō-tō-ē-lek'trō-tīp), *n.* [*Gr. φῶς* (phōs-), light, + *E. electrotype*.] A photographic picture produced in relief, such as to afford, by the ordinary processes of electrotypy, a matrix for a cast from which impressions in ink may be obtained.

photo-engrave (fō-tō-en-grāv'), *v. t.* [*Gr. φῶς* (phōs-), light, + *E. engrave*.] To produce by or in photo-engraving.

photo-engraving (fō-tō-en-grā'ving), *n.* [*Gr. φῶς* (phōs-), light, + *E. engraving*.] A common name for many processes by which a photograph may be made to afford a plate-matrix from which can be taken prints in ink corresponding to the original of the photographic image. These processes depend upon the property, possessed by potassium bichromate and analogous chemicals, of rendering insoluble, under the action of light, gelatin or some similar body with which they are compounded. By applications of this property, varying according to the process, a picture or design can be produced on a metal surface, and the blank plates etched out with acid; or a matrix in relief can be formed, from which an electrotype plate can be made in ordinary ways. In general, the term *photo-engraving* is limited to a relief-block or -plate produced by photographic means for printing in an ordinary printing-press, to the art of making such blocks, and to prints from them; while the term *photogram* is commonly applied to a photographically engraved plate in intaglio from which prints may be taken in a copperplate-press, to the art of making such an incised plate, and to a print from it. In the Gillet process a zinc plate coated with asphaltum is exposed beneath a negative, and those portions unchanged by light are dissolved. The zinc is then etched. Photographs are reproduced in the form of half-tone plates for use in the printing-press by several methods, all of which depend upon breaking up the surface of the picture by dark lines in regular series. A gelatin film on which such a series of lines has been photographed is placed between the sensitized surface which is to receive the impression and a positive picture. The resulting print will consist of the subject appearing in half-tone on a ground of lines, and from it a typographical matrix is prepared in the usual ways. (For an example of a half-tone plate, see cut under *dekadrachm*.) Also called *photographic engraving*, *photographic-process printing*, *photographic process*. See *photo-etching* (Gillet process), and compare *heliotype* and *photogravure*.

photo-epinastic (fō-tō-ep-i-nas'tik), *a.* [*photo-epinast-y* + *-ic*.] In *bot.*, of, pertaining to, or of the nature of photo-epinasty.

photo-epinastically (fō-tō-ep-i-nas'ti-kal-i), *adv.* In *bot.*, in a photo-epinastic manner.

photo-epinasty (fō-tō-ep-i-nas-ti), *n.* [*Gr. φῶς* (phōs-), light, + *E. epinasty*.] In *bot.*, an

epinastic movement or state of curvature observed in certain organs when exposed to intense light, due to a more active growth of the dorsal surface. Compare *epinasty*.

photo-etching (fō-tō-ēch'ing), *n.* [*Gr. φῶς* (phōs-), light, + *E. etching*.] Any process of photo-engraving or photogravure, or any plate or print produced by such a process, in which a subject in line is transferred by photography to a metal surface in such a manner that either the ground or the lines of the design will resist acid, with which the plate is then etched: most commonly used for relief-plates on zinc, such as those of the Gillet process. See *photo-engraving*.

photogalvanography (fō-tō-gal-vā-nog'ra-fī), *n.* [*Gr. φῶς* (phōs-), light, + *E. galvanography*.] A process of obtaining from a photographic positive on glass an intaglio gutta-percha plate for printing like a plate. The gutta-percha plate is a hardened impression from a relief negative in bichromated gelatin, made according to the methods used in photo-process.

photogen (fō-tō-jen), *n.* [*F. photogène*, < *Gr. φῶς* (phōs-), light, + *-γενής*, producing: see *-gen*.] A paraffin-oil: same as *kerosene*.

photogene (fō-tō-jen), *n.* [*Gr. φῶς* (phōs-), light, + *-γενής*, producing: see *-gen*.] A more or less continued impression or picture on the retina. *H. Spencer*.

photogenic (fō-tō-jen'ik), *a.* [= *F. photogénique* = *It. fotogenico*; as *photogen*, *photogenesis*.] 1. Of or pertaining to photogeny.—2. In *biol.*, producing light without sensible heat, as an animal or vegetable organism; giving rise to luminosity or phosphorescence; photogenous.

According to Schulze the males of *Lampyrus splendula* possess two photogenic organs. *Huxley*, *Anat. Invert.*, p. 379.

Photogenic drawing. (a) A picture produced by the agency of light, according to any of the photographic processes. Specifically—(b) A reproduction of the configuration of any flat translucent object, as a leaf, or the wing of an insect, or a drawing upon translucent paper or tracing-cloth, made by confining it under glass in contact with a sensitive film, exposing to the action of light, and fixing or developing the image resulting in the film. A variety of photogenic processes are now in use for copying mechanical drawings. See *blue-printing*.

photogenous (fō-tō-jen'us), *a.* [*Gr. φῶς* (phōs-), light, + *-γενής*, producing: see *-genous*.] In *biol.*, same as *photogenic*.

Their further studies . . . enable them to reconcile their theory of photogenous fermentation with the hypothesis of the oxidation of a phosphorated substance, as proposed by some biologists. *Nature*, XXXVIII. 512.

photogeny (fō-tō-jen'ī), *n.* [*Gr. φῶς* (phōs-), light, + *-γενία*, < *-γενής*, producing: see *-geny*.] The art of taking pictures by the action of light on a chemically prepared ground; photography.

photoglyphic (fō-tō-glīf'ik), *a.* [*photoglyph-y* + *-ic*.] Of or relating to photoglyphy.

photoglyphy (fō-tō-glīf'ī), *n.* [*Gr. φῶς* (phōs-), light, + *γλύφειν*, engrave.] The art of engraving by means of the action of light and certain chemical processes; particularly, the production by photographic processes of a plate from which copies can be printed in ink. Often restricted to the production of intaglio plates, or photogravure.

photogram (fō-tō-gram), *n.* [*Gr. φῶς* (phōs-), light, + *γράμμα*, a writing, a drawing, a picture, < *γράφειν*, write: see *gram*.] Same as *photograph*. *Nature*, XXXVI. 317. [Rare.]

photogrammetry (fō-tō-gram'et-ri), *n.* The art of forming an orthogonal projection from two perspectives.

photograph (fō-tō-grāf), *n.* [= *F. photographie* = *It. fotografia*, a photograph (cf. *Sp. fotografía* = *Pg. fotografia* = *It. fotografia*, a photograph: see *photography*); *Sp. fotografo* = *Pg. fotografo* = *It. fotografo* = *G. fotograf* = *Sw. Dan. fotograf* = *Ngr. φωτογράφος*, a photographer, < *Gr. φῶς* (phōs-), light, + *γράφειν*, write.] A picture produced by any process of photography.—**Composite photograph.** See *composite*.—**Instantaneous photograph.** See *photography*.—**Phosphorescent photograph.** A photographic picture obtained by coating a plate with a mixture of dextrin, honey, and potassium bichromate, and exposing it under a negative. The parts affected by light through the transparent parts of the negative harden, while those which are protected from the light remain sticky, so that any fine powder dusted over will adhere to them, while having no hold on the hardened parts. If a phosphorescent powder is dusted on this positive, and the plate is then exposed to strong light, there will result a picture appearing luminous in the dark.

photograph (fō-tō-grāf), *v. t.* [*photograph*, *n.*] To produce a likeness or facsimile of by photographic means.

photographer (fō-tō-grāf'ēr), *n.* [*photograph* + *-er*.] One who makes pictures by means of photography.

photographic (fō-tō-grāf'ik), *a.* [= *F. photographique* = *Sp. fotográfico* = *Pg. fotografico* = *It. fotografico*; as *photograph-y* + *-ic*.] Of, pertaining to, using, or produced by photography.—**Photographic engraving.** Same as *photo-engraving*.—**Photographic lens, paper, etc.** See the nouns.—**Photographic process, photographic-process printing.** Same as *photo-engraving*.

photographical (fō-tō-grāf'ī-kal), *a.* [*photographic* + *-al*.] Of or pertaining to photography; more or less directly connected with photographic matters: as, a *photographical print*; a *photographical society*.

photographically (fō-tō-grāf'ī-kal-i), *adv.* By means of, or as regards, photography; as in a photograph.

photographometer (fō-tō-grā-fom'e-tēr), *n.* [*photograph* + *Gr. μέτρον*, measure.] 1. In *photog.*, an instrument for determining the sensibility of a film employed in photographic processes, relatively to the amount of radiation, luminous and chemical.—2. A rotating photographic apparatus for recording automatically the angular position of objects around a given point.

photography (fō-tō-grāf'ī), *n.* [= *F. photographie* = *Sp. fotografía* = *Pg. fotografica* = *It. fotografia* = *D. fotografie* = *G. fotografie* = *Sw. Dan. fotograf*, photography (in *Sp. Pg. It.* also a photograph); = *Ngr. φωτογραφία*, photography, < *Gr. φῶς* (phōs-), light, + *γράφειν*, write. Cf. *photograph*.] The art of producing images of objects by an application of the chemical change produced in certain substances, as silver chlorid, bromide, or iodide, by the action of light, or more generally of radiant energy. The rays which are in general most active in this way are those of the upper part of the spectrum, as the blue, violet, and ultra-violet rays. The red and yellow rays produce a much less marked effect on an ordinary sensitive plate; but it has been found possible to prepare a special gelatinobromide plate which is highly sensitive even to the less refrangible rays, as those in the infra-red region of the spectrum. (See *spectrum*.) Photography rests on the fact that silver nitrate and various other chemicals are decomposed by certain solar rays and reduced, becoming dark or black, or in other ways affected, according to the intensity and amount of actinic rays received on them. The process consists (1) in properly exposing a surface made sensitive to actinic rays to a projected image of the object to be reproduced; (2) in rendering visible if merely latent, or in coloring or toning, the reproduction of this image; (3) in removing the sensibility of those parts of the surface which have not been acted on, and in fixing permanently the image produced; and (4), if the image obtained is a negative, as in the majority of processes, in the mechanical production of positive copies from it. The knowledge of the principle on which photography depends reaches back to the time of the alchemists, who discovered that silver chlorid exposed to the sun's rays became black. Wedgwood and Davy in 1802 attempted to apply this fact to artistic purposes by throwing the shadow of an object on a sheet of white paper, or, preferably, of leather, covered with a solution of silver nitrate and exposed to the sun's rays, but they were unable to fix the pictures. About 1814 Niepce, a Frenchman, discovered a method of producing pictures on plates of copper or pewter covered with a sensitive resinous substance called bitumen of Judea, and also of rendering them permanent. This process he called *heliography*. Niepce associated himself with Daguerre, who elaborated, about 1838, from the former process the one which bears his name. (See *Daguerrotypy*.) This was soon superseded by various processes, especially the *calotype process* (see *calotype*) of Fox-Talbot, first patented in 1841, who revived Wedgwood's process of obtaining pictures on sensitized paper, and the *collodion process* (see *collodion*), first suggested by M. Le Grey, of Paris, and brought into practice by Archer in 1850; and all these later processes have been practically abandoned for the *gelatinobromide dry-plate process*, which is now in almost universal use. Photographs produced by any of these processes may be either *negative* or *positive*. Negative photographs exhibit the lights and shades as opposite to those in nature—that is, the lights appear dark and the shades transparent; positive photographs exhibit the lights and shades in accordance with nature. To produce a positive from a negative, the latter is placed in contact with a surface which has been rendered sensitive to light, and is exposed to the influence of light, which penetrates the negative and affects the parts of the underlying surface opposite the lights of the picture, while the parts opposite the opaque parts of the picture are protected. The operation for obtaining a positive from a negative is called *printing*. Modifications are constantly being introduced in photography. One of the most important has been the *carbon process*, popularized by Swan of Newcastle, according to which a solution of gelatin and potassium bichromate (the latter being the sensitizing agent) is mixed with a pigment, and applied as a coating to a sheet of paper. The positives are printed in the ordinary way on the black cake, or *tissue* as it is called, thus produced, and become visible and permanent by washing, as the pigment-coating is rendered more or less insoluble by the effect of the light passing through the negative. The *autotype process*, invented by Johnson, is a simpler method of carbon-printing than the carbon process proper, but the principles involved are the same. One of the most important developments of the art is the so-called *instantaneous photography*, by means of which, through the use of very sensitive plates and the shortness of the duration of exposure,

comes, motions, etc., are reproduced and registered which are too rapid or evanescent to be distinguishable by the eye. For various mechanical methods of multiplying photographic pictures, see *photo-electrotype*, *photo-engraving*, *photostereography*, *phototypy*, *photogravure*, *photolithography*, and *heliotypy*.

photogravure (fō'tō-grā-vūr'), n. [*Gr. φῶς* (fōs-), light, + *F. gravure*, engraving.] The art of producing on metal, by an application of the action of light on a sensitized surface, often supplemented by etching, an incised engraved plate for printing. There are several processes by which this may be accomplished. According to the Niepce process, which is suitable for the reproduction of line-engravings, a copperplate is coated with bitumen and is then exposed to light beneath a negative. The resulting print is brought out with olive-oil and turpentine, or with oil of spike, which dissolves the parts acted on by light and acts little on the rest, and the lines remain as bare copper. The plate is then etched. In the Fox-Talbot process the gelatin print is transferred to copper which has had a grain given to it by sprinkling the surface with powdered resin and then warming it. (See *aquatint*.) The plate is then etched with ferric acid, which renders the opaque portions of the gelatin film insoluble and impermeable. The acid should be weak and kept in motion during the biting, until the uncovered parts have been sufficiently attacked. To increase the regularity of the erosion, the plate should first be immersed in a weak solution of copper sulphate. In the Woodbury process, which resembles the Goupi process, a gelatin print in relief is applied under pressure upon a plate of soft metal, and is repeated on the metal in relief and depression. The mold thus formed is filled with pigmented gelatin, over which a sheet of paper which is to receive the picture is placed, and subjected to a level pressure in order to force out the superfluous gelatin. The depressed parts, which represent the dark parts of the picture, retain the most gelatin, and when the paper is lifted it raises the gelatin from the mold in such a manner that it forms a picture in low relief. In order to obtain a grained surface which will hold printing-ink, pounded glass may be mixed with the gelatin.

photogravure (fō'tō-grā-vūr'), v. t.; pret. and pp. *photogravured*, ppr. *photogravuring*. [*Gr. φῶς* (fōs-), light, + *E. heliograph*.] A photographic telescope designed for making photographs of the sun, particularly at a transit of Venus or at a solar eclipse. There are several forms of the instrument, differing widely in construction.

photoheliograph (fō'tō-hē'li-ō-grāf'), n. [*Gr. φῶς* (fōs-), light, + *E. heliograph*.] A photographic telescope designed for making photographs of the sun, particularly at a transit of Venus or at a solar eclipse. There are several forms of the instrument, differing widely in construction.

photoheliographic (fō'tō-hē'li-ō-grāf'ik), a. [*Gr. φῶς* (fōs-), light, + *E. heliograph*.] Of, pertaining to, or made by means of a photoheliograph: as, *photoheliographic observations*.

photohypnastic (fō'tō-hi-pō-nas'tik), a. [*Gr. φῶς* (fōs-), light, + *E. hypnasty*.] In bot., pertaining to or characteristic of photohypnasty.

photohypnasty (fō'tō-hi-pō-nas'ti), n. [*NL.*, *Gr. φῶς* (fōs-), light, + *E. hypnasty*.] In bot., a hypnastic movement or curvature brought about by the exposure of organs to intense light after they have had their growth arrested for a period.

photolithograph (fō'tō-lith-ō-grāf'), n. [*Gr. φῶς* (fōs-), light, + *E. lithograph*.] A print produced by photolithography.

photolithograph (fō'tō-lith-ō-grāf'), v. t. [*Gr. φῶς* (fōs-), light, + *E. lithograph*.] To produce or reproduce by the aid of photolithography.

photolithographer (fō'tō-li-thog'ra-fēr'), n. [*Gr. φῶς* (fōs-), light, + *E. lithograph*.] One who produces pictures by photolithography.

photolithographic (fō'tō-li-thog'ra-fēr'ik), a. [*Gr. φῶς* (fōs-), light, + *E. lithograph*.] Of, pertaining to, or produced by photolithography.—**Photolithographic process**, any one of the various processes by which photolithography is accomplished. All depend upon the property of a gelatin film, sensitized with potassium bichromate or an analogous chemical, of becoming insoluble when exposed to light, and thus of affording a photographic relief-plate, or a plate which will take lithographic ink in the parts affected by light, and repel it elsewhere, from which the design or picture can be transferred by the ordinary methods of lithography to a stone, or to a plate of zinc, etc.

photolithography (fō'tō-li-thog'ra-fēr'), n. [*Gr. φῶς* (fōs-), light, + *E. lithograph*.] The art of fixing on the surface of a lithographic stone by the agency of the action of light upon bichromated gelatin combined with albumen, and by other manipulations, an image suitable for reproduction in ink by impression in the manner of an ordinary lithograph; also extended to include processes of similar character in which the transfer is not made to stone; specifically, the process of reproducing in ink any design or picture executed on prepared stone by means of photography, either directly or by transfers from photographs. The process is analogous to several photo-engraving processes executed on metal. See *photolithographic process*, under *photolithography*. Also called *lithography*.

photologic (fō-tō-loj'ik), a. [= *F. photologique* = *Sp. fotológico* = *Pg. fotológico*; as *photology* + *-ic*.] Of or pertaining to photology.

photological (fō-tō-loj'ik-al), a. [*Gr. φῶς* (fōs-), light, + *-al*.] Same as *photologic*.

photologist (fō-tō-lō-jist), n. [*Gr. φῶς* (fōs-), light, + *-ist*.] One who devotes himself to the study or exposition of the science of light.

The painter should never forget that his notion of colour (as compared with that of the photologist) is a negative one. *Herschel, Light*, § 48.

photology (fō-tō-lō-jī), n. [= *F. photologie* = *Sp. fotología* = *Pg. fotología*, *Gr. φῶς* (fōs-), light, + *-λογία*, *Gr. λέγειν*, speak: see *-ology*. Cf. *MGr. φωτολογία*, announcing light.] The science of light.

photolysis (fō-tō-lī-sis), n. [*NL.*, *Gr. φῶς* (fōs-), light, + *λύσις*, a loosing, setting free, *Gr. λύνειν*, loosen, unbind, unfasten.] In bot., the movements of protoplasm under the influence of light: distinguished as *apostrophe* and *epistrophe*. In the first the chlorophyll-grains collect upon the cell-walls which are parallel to the plane of incident light; in the latter, upon those which are at right angles to it. *Moore*.

photomagnetism (fō-tō-mag'net-izm), n. [*Gr. φῶς* (fōs-), light, + *E. magnetism*.] The relation of magnetism to light. *Faraday*.

photomechanical (fō'tō-mē-kan'ik-al), a. [*Gr. φῶς* (fōs-), light, + *E. mechanical*.] Pertaining to or consisting in the mechanical production of pictures by the aid of light, as in photo-engraving, photolithography, etc.

Of all the perfected photomechanical processes, the colotype is about the most useful for general purposes. *The Engineer*, LXVI, 279.

photometallograph (fō'tō-mē-tal'ō-grāf'), n. [*Gr. φῶς* (fōs-), light, + *μέταλλον*, metal, + *γράφειν*, write (see *metallography*).] Same as *photozincograph*.

photometer (fō-tō-mē'tēr), n. [= *F. photomètre* = *Sp. fotómetro* = *Pg. fotómetro* = *It. fotometro*, *Gr. φῶς* (fōs-), light, + *μέτρον*, measure.] An instrument used to measure the intensity of light, specifically to compare the relative intensities of the light emitted from different sources. Many forms have been devised, most of which are based upon the determination of the relative distances

Bunsen's Photometer.

a, balance by which weight of candles burned in a given time is determined; b, candles; c, clock, and meter which measures the gas consumed in the test; d, gas-burner; e, flexible pipes for supplying gas to the burner; f, sight-box, supported on a carriage; g, scale having a guide-way for the carriage of the sight-box, and graduated to show the relative candle-power of gas which gives an illumination having intensity equal to that of the candles. This graduation corresponds with the position of the sight-box when the latter is adjusted so that equal intensity is obtained on both sides of the disk; h, a curtain to exclude other light during the adjustment of the sight-box; i, cord running over pulleys under the bottom of the instrument, by which an operator can start or stop the clock at the beginning and end of the test; j, disk, with the translucent serrated spot; k, sight-tube; l, mirrors. Light enters the sight-box from the candles through the opening g in the side of the sight-box, and from the gas-burner on the side of n. Images of both sides of the illuminated disk are simultaneously seen at n n' by reflection from the mirrors at o and o'.

at which the light from two sources produces equal intensities of illumination. One of the most common photometers is that of Bunsen, which consists of a screen of white paper with a grease-spot in its center. The lights to be compared are placed on opposite sides of this screen, and their distances are so adjusted that the grease-spot appears neither brighter nor darker than the rest of the paper, from whichever side it is viewed. When the distances have not been correctly adjusted, the grease-spot will appear darker than the rest of the paper when viewed from the side on which the illumination is most intense, and lighter than the rest of the paper when viewed from the other side. The intensities of the two lights are to one another as the squares of the distances from the screen at which they must be placed in order that the grease-spot may appear neither brighter nor darker than the rest of the paper. Another form is Rumford's photometer, which employs a screen in front of which is placed a vertical rod; the positions of the sources of light are so adjusted that the two shadows which they cast are sensibly equal.—**Dispersion photometer**, a form of photometer by means of which the intensity of a brilliant light, as that of an electric arc, may be determined. The dispersive effect of a thin concave lens acts like increase of distance in the common photometer to weaken the bright light to the required degree.—**Polarization photometer**, an instrument in which the measurement depends upon the properties of polarized light.—**Wedge photometer**, an astronomical photometer in which a wedge of neutral-

tinted dark glass is used to cause the apparent extinction of a star viewed through it. The thickness of the wedge at the point where the star vanishes determines its brightness.—**Wheel photometer**, an instrument in which the light to be measured is weakened in any required degree by transmission through adjustable apertures in a rapidly revolving wheel.

photometric (fō-tō-met'rik), a. [= *F. photométrique* = *Pg. fotométrico*; as *photometry* + *-ic*.] Pertaining to photometry, or the measurement of the intensity of light, or to the photometer, or instrument by which this is effected; employing or made by a photometer: as, *photometric researches* or *observations*.—**Lambert's photometric law** (named after Johann Heinrich Lambert (1728-77), an eminent mathematician and logician, the discoverer of this law), the fact that a smooth, irregularly reflecting surface appears equally bright under whatever angle it is seen.—**Photometric standard**, a carcel lamp burning 42 grams of refined colza-oil per hour, with a flame 40 millimeters high. It is equal to 9.5 British or 7.6 German standard candles. The unit of photometry adopted by the Electrical Congress at Paris (1884) is the amount of light emitted from a surface of one square centimeter of melted platinum at its temperature of solidification; in 1889 one twentieth of this unit was adopted as the practical unit, and called a *candle*. See *candle-power*.

photometrical (fō-tō-met'rik-al), a. [*Gr. φῶς* (fōs-), light, + *-al*.] Same as *photometric*.

photometrically (fō-tō-met'rik-al-i), adv. As regards photometry; by means of a photometer.

photometrician (fō'tō-mē-trish'an), n. [*Gr. φῶς* (fōs-), light, + *-ician*.] One who is versed in photometry. *E. A. Proctor, The Sun*, p. 302.

photometrist (fō-tō-mē'trist), n. [*Gr. φῶς* (fōs-), light, + *-ist*.] A photometrician.

The best way for a photometrist to be certain of his instruments is to test them himself. *W. R. Bowditch, Coal Gas*, III, 67.

photometry (fō-tō-mē'trī), n. [= *F. photométrie* = *Sp. fotometría* = *It. fotometria*, *Gr. φῶς* (fōs-), light, + *-μετρία*, *Gr. μέτρον*, measure.] The measurement of the relative amounts of light emitted by different sources. This is usually accomplished by determining the relative distances at which two sources of light produce equal intensities of illumination. See *photometer*.

photomicrograph (fō'tō-mī'krō-grāf'), n. [*Gr. φῶς* (fōs-), light, + *E. micrograph*.] An enlarged or macroscopic photograph of a microscopic object; an enlarged photograph. Compare *microphotograph*.

photomicrographer (fō'tō-mī'krō-grā-fēr'), n. [*Gr. φῶς* (fōs-), light, + *E. micrograph*.] A maker of photomicrographs; one who enlarges photographs, or makes enlarged pictures of small or microscopic objects.

photomicrographic (fō'tō-mī'krō-grāf'ik), a. [*Gr. φῶς* (fōs-), light, + *E. micrograph*.] Of, pertaining to, or used in photomicrography; obtained or made by photomicrography: as, *photomicrographic apparatus*; a *photomicrographic representation*.

photomicrography (fō'tō-mī'krō-grā-fēr'), n. [= *F. photomicrographie*; *Gr. φῶς* (fōs-), light, + *E. micrograph*.] The art or process of enlarging minute objects by means of the microscope, and reproducing the enlarged image by photography. It is to be distinguished from *microphotography*.

photonephograph (fō'tō-nēf'ō-grāf'), n. [*Gr. φῶς* (fōs-), light, + *νέφος*, a cloud, + *γράφειν*, write.] A name given by Abney to an apparatus for taking simultaneous photographs of a cloud from two points on the earth. It consists essentially of twin cameras, adjustable at any angle of elevation and azimuth, and, as used at Kew, England, placed 200 yards apart. Two sets of photographs are taken simultaneously at an interval of about a minute, and from these the heights and motions of the clouds are deduced.

photonephoscope (fō'tō-nēf'ō-skōp'), n. [*Gr. φῶς* (fōs-), light, + *νέφος*, a cloud, + *σκοπεῖν*, view.] Same as *photonephograph*.

photonosus, **photonosus** (fō-ton'ō-sos, -sus), n. [*NL.*, *Gr. φῶς* (fōs-), light, + *νόσος*, disease.] Any affection resulting from exposure to a glare of light, as snow-blindness.

photopapryography (fō'tō-pap-i-rog'ra-fēr'), n. [*Gr. φῶς* (fōs-), light, + *E. papryography*.] A photo-engraving process in which a relief-print on paper is formed as a matrix from which prints in ink can be struck off.

photophobia (fō-tō-fō'bi-ā), n. [= *F. photophobie* = *It. fotofobia*, *NL. photophobia*, *Gr. φῶς* (fōs-), light, + *φοβία*, *Gr. φόβος*, fear.] An intolerance or dread of light.

photophobic (fō-tō-fō'bi-ā), a. [*Gr. φῶς* (fōs-), light, + *-ic*.] Affected with photophobia; dreading or intolerant of light; unable to bear light.

photophone (fō'tō-fōn'), n. [*Gr. φῶς* (fōs-), light, + *φωνή*, sound, voice: see *phone*.] An instrument by which a beam of light may be made to transmit spoken words to a distance.

One form consists of a thin mirror of silvered mica which receives the vibrations from the person speaking, and upon which a beam of light falls at the same time. This light is reflected to the receiving-point at a distance. There it falls upon a concave mirror, and is brought to a focus upon a selenium-cell. The variation in the light produces a corresponding variation in the electrical resistance of the selenium, and this reproduces the spoken words in a telephone connected with it.

In the earlier papers describing it (the radiophone) and the experiments which led to its invention it is called *photophone*, because at that time the effects were supposed to be wholly due to light. Afterwards, in order to avoid ambiguity, Bell changed the name to radiophone, and suggested that, to distinguish between instruments depending on the different kinds of radiation, the names *photophone*, *thermophone*, &c., should be employed.

Encyc. Brit., XXIII. 130.

photophonic (fō'tō-fon'ik), *a.* [*Gr. φῶς* (phōs), light, + *E. phonē*, sound.] Pertaining to or produced by the photophone.

photophony (fō'tō-fō-ni), *n.* [*Gr. φῶς* (phōs), light, + *E. phonē*, sound.] The art or practice of using the photophone.

photophosphorescent (fō'tō-fos-fō-res'ent), *a.* [*Gr. φῶς* (phōs), light, + *E. phosphorescent*,] Exhibiting phosphorescence under the action of light. See *phosphorescence*.

photophysical (fō'tō-fiz'ik-al), *a.* [*Gr. φῶς* (phōs), light, + *E. physical*,] Pertaining to the physical effect of light: opposed to *photochemical*. *Athenæum*, No. 3235, p. 562.

photopolarimeter (fō'tō-pō-lā-rim'e-tēr), *n.* [*Gr. φῶς* (phōs), light, + *E. polarimeter*,] A form of polarimeter devised (1885) by Cornu. It has a doubly refracting prism mounted at one end of a tube, which at the other has a diaphragm of such size that the borders of the two images, polarized at right angles, just coincide with each other. A Nicol prism suitably mounted is made to revolve until these images have the same intensity, when the angular position of its plane of vibration gives a ready means of determining the degree of polarization in the light under examination.

photo-process (fō'tō-pros'es), *n.* [*Gr. φῶς* (phōs), light, + *E. process*,] Any process or method by which is produced, by the agency of photography, a matrix in relief or in intaglio from which prints can be made in ink; especially, the photographic production of relief-plates from which impressions are struck off in an ordinary printing-press. It thus includes photogravure, but is especially applicable to such processes of photo-engraving as photolithography and photozincography. The chief kinds of photo-process are differentiated as follows. Helio-type is the production of a matrix in gelatin, from which printing is done directly in lithographic press. Photogravure is the production of incised or intaglio plates in metal. Photo-engraving is (properly) the production of relief-plates of any kind suited for printing, together with type, in an ordinary printing-press; though the term is often used to include photogravure also. Photo-engraving is particularly applicable to the reproduction of pen-drawings; when used for pictures, such as ordinary photographs, it is necessary, in order to admit of printing, to employ some such device as the formation over the whole surface of the plate of an even series of fine lines, or a finely dotted or stippled ground. Such plates are called *half-tone plates*. (See *half-tone process*, under *photo-engraving*.) Also used attributively to note a relief-plate, or an impression from such a plate, made by photo-process.

photopsia (fō'tō-pō-si-ā), *n.* [*NL.*, < *Gr. φῶς* (phōs), light, + *ὄψις* (opsis), look, sight, < *ὥρ* (hor), see: see *optic*.] The condition of having the sensation as of light or of flashes of light without external cause.

photopsy (fō'tō-pō-si), *n.* [= *F. photopsie*, < *NL. photopsia*, *q. v.*] Same as *photopsia*.

photo-relief (fō'tō-rē-lēf'), *a.* [*Gr. φῶς* (phōs), light, + *E. relief*,] Noting any process for obtaining by photographic means a matrix in relief capable of receiving ink and communicating impressions, or any block, plate, or print produced by such a process. See *photography*, *photo-engraving*.

photoscope (fō'tō-skōp), *n.* [*Gr. φῶς* (phōs), light, + *σκοπεῖν* (skopein), view.] 1. An instrument or apparatus for exhibiting photographs. *E. H. Knight*.—2. An instrument consisting of a selenium-cell, or an arrangement of some other substance whose electrical resistance varies with the degree of illumination, together with a telephone-receiver placed in the same electrical circuit, by means of which the varying intensities of light may be detected.

photosculpture (fō'tō-skulp'tūr), *n.* [= *F. photosculpture*; < *Gr. φῶς* (phōs), light, + *E. sculpture*.] A process of sculpturing statuettes, medallions, and the like, by the aid of photography. The person whose likeness is to be taken is placed in the focus of a number of photographic cameras, placed at equal distances from one another, and is thus photographed all round. The resulting pictures are projected in succession by means of a magic lantern on a transparent screen. The operator works behind this screen on a piece of modeling-clay, turning it round as he proceeds, and copying the images on the screen by means of a pantograph which has its reducing-point armed with

a molding- or cutting-tool, so that, as the longer arm traces every figure on the screen, the shorter one reproduces it in the clay.

photosphere (fō'tō-sfēr), *n.* [= *F. photosphère*, < *Gr. φῶς* (phōs), light, + *σφαῖρα* (sphaîra), sphere: see *sphere*.] An envelop of light; specifically, the luminous envelop, supposed to consist of incandescent matter, surrounding the sun. According to Kirchhoff, the sun's photosphere is either solid or liquid, and is surrounded by an extensive atmosphere, composed of gases and vapors of the substances incandescent in the photosphere. According to the view now more generally accepted, the photosphere is a shell of luminous cloud—that is, the solid or liquid particles which produce the light are minute, and disseminated through the lower strata of the solar atmosphere.

photospheric (fō'tō-sfēr'ik), *a.* [*Gr. φῶς* (phōs), light, + *E. sphere*,] Of or pertaining to a photosphere, and specifically to the photosphere of the sun.

phototachometer (fō'tō-tā-kom'e-tēr), *n.* [*Gr. φῶς* (phōs), light, + *E. tachometer*.] An instrument for measuring the velocity of light.

phototachometrical (fō'tō-tāk-ō-met'ri-kal), *a.* [*Gr. φῶς* (phōs), light, + *E. tachometer*,] Pertaining to phototachometry.

phototachometry (fō'tō-tā-kom'et-ri), *n.* [*Gr. φῶς* (phōs), light, + *E. tachometry*.] The measurement of the velocity of light.

phototactic (fō'tō-tāk'tik), *a.* [*Gr. φῶς* (phōs), light, + *E. tactic*,] In bot., pertaining to, characteristic of, or exhibiting phototaxis.

phototaxis (fō'tō-tāk'sis), *n.* [*NL.*, < *Gr. φῶς* (phōs), light, + *τάξις* (taxis), arrangement: see *taxis*.] In bot., the taking by certain organisms or organs of a definite position with reference to the direction of the incident rays of light, as when the zoospores of various plants (*Hæmatococcus*, *Ulothrix*, etc.) place their long axes parallel to the direction of the incident rays.

phototelephone (fō'tō-tel'e-fōn), *n.* [*Gr. φῶς* (phōs), light, + *E. telephone*.] Same as *photophone*.

phototheodolite (fō'tō-thē-od'ō-lit), *n.* [*Gr. φῶς* (phōs), light, + *E. theodolite*.] An instrument for the performance of triangulation by means of photographs.

phototonic (fō'tō-ton'ik), *a.* [*Gr. φῶς* (phōs), light, + *τῶν* (ton), arrangement: see *taxis*.] In bot., exhibiting phototonus; characterized by phototonus. Compare *paratonic*.

phototonus (fō'tō-tō-nus), *n.* [*NL.*, < *Gr. φῶς* (phōs), light, + *τῶν* (ton), arrangement: see *taxis*.] A term proposed by Sachs for the peculiar condition in which the protoplasm is capable of exhibiting irritability induced in certain plant-organs by exposure to light of a certain intensity. This tonic influence of light is exhibited in the restoration of irritability in organs that have been kept for some days in continuous darkness.

phototopography (fō'tō-tō-pog'ra-fi), *n.* Topographical surveying based on perspective views of the terrain obtained by means of the camera. *U. S. Coast and Geodetic Survey Report*, 1893, Part II., p. 38.

phototype (fō'tō-tip), *n.* and *a.* [*Cf. F. phototypie*; < *Gr. φῶς* (phōs), light, + *τύπος* (typos), type.] 1. A type or plate for printing, of the same nature as an engraved relief-block, produced by an application of the photographic properties of gelatin sensitized with a bichromate (see *photo-engraving*), or by a combination of photographic and etching processes or a combination of photographic and mechanical processes, as when the lines in intaglio are produced by mechanical pressure, these processes when combined being commonly spoken of as a single general process; especially, the process known as photozincography. See *photozincography*, *photolithography*, and *photoglyphy*.—2. A picture printed from a relief-plate prepared by a phototype process.

II. *a.* Pertaining to or produced by means of phototypy: as, a *phototype* process, plate, or print.

phototype (fō'tō-tip), *v. t.*; pret. and pp. *phototyped*, ppr. *phototyping*. [*Cf. phototype, n.*] To reproduce in phototype or by phototypy.

phototypic (fō'tō-tip'ik), *a.* [*Cf. phototype + -ic*.] Of, pertaining to, or produced by means of phototypy.

phototypographic (fō'tō-tī-pō-graf'ik), *a.* [*Gr. φῶς* (phōs), light, + *τύπος* (typos), type, + *γράφειν* (graphein), write.] Of, pertaining to, or using a photographic relief-block adapted for printing in an ordinary press: as, the *phototypographic* process of Poitevin.

phototypy (fō'tō-tī-pi), *n.* [*Cf. phototype + -y*.] The art or process of producing phototypes.

photovoltaic (fō'tō-vol-tā'ik), *a.* [*Gr. φῶς* (phōs), light, + *E. voltaic*.] Relating to an elec-

tric current as produced or varied in intensity by the action of light, as when the electrical resistance of selenium is altered by light.

photoxylography (fō'tō-zī-log'ra-fi), *n.* [*Gr. φῶς* (phōs), light, + *E. xylography*.] The process of producing an impression of an object on wood by photography and subsequent processes, and then printing from the block.

photozincograph (fō'tō-zīng'kō-graf), *n.* [*Gr. φῶς* (phōs), light, + *E. zincograph*.] A plate or picture produced by photozincography. Also *photometallograph*.

photozincographic (fō'tō-zīng-kō-graf'ik), *a.* [*Cf. photozincograph + -ic*.] Of, pertaining to, or produced by photozincography.

photozincography (fō'tō-zīng-kō-graf'ik), *n.* [= *F. photozincographie*; as *Gr. φῶς* (phōs), light, + *E. zincography*.] A process of photo-engraving analogous to photolithography, but having the matrix formed on a plate of zinc instead of a lithographic stone; also, photo-etching executed on zinc. Also *photozincotypy*.

photozincotype (fō'tō-zīng'kō-tip), *n.* [*Gr. φῶς* (phōs), light, + *E. zincotype*.] A plate prepared for printing by photozincography.

In place of wood-cuts, *photo-zincotypes* are very often used. *Sci. Amer.*, N. S., LV. 42.

photozincotypy (fō'tō-zīng'kō-tī-pi), *n.* [*Cf. photozincotype + -y*.] Same as *photozincography*. *Sci. Amer.*, N. S., LV. 94.

photoria (fō'tū-rī-ā), *n.* [*NL.*, < *Gr. φῶς* (phōs), light, + *ὄριον* (orion), urine.] The passage of luminous urine.

Photuris (fō'tū-ris), *n.* [*NL.* (Leconte, 1851), < *Gr. φῶς* (phōs), light, + *οὐρά* (oura), tail.] A genus of fireflies of the coleopterous family *Lampyridæ*, with nearly 50 species, mainly South American, three only being found in North America. *P. pennsylvanica* is the common firefly or lightning-bug of eastern parts of the United States, about half an inch long and of a yellowish color. Its larva is also luminous. See *firefly*, and cut under *lightning-bug*.

Phoxinus (fōk-si-nus), *n.* [*NL.* (Agassiz, 1837), < *Gr. φῶξινος* (phoxinos), an unknown river-fish.] In *ichth.*, a genus of small cyprinoid fishes; the true minnows, of small size, tapering form, and brilliant colors, the lateral line incomplete if present, the dorsal fin behind the ventrals, and the mouth without barbels. The type is the common European minnow, *P. phoxinus*; several species of the United States are also described. See cut under *minnow*.

Phractamphibia (frak-tam-fib'i-ā), *n. pl.* [*NL.*, < *Gr. φρακτός* (phraktos), fenced, protected (< *φράσσειν* (phrassein), fence, protect: see *phragma*), + *NL. Amphibia*.] The mailed or loricate amphibians, as labyrinthodonts: opposed to *Lissamphibia*.

phragma (frag'mā), *n.*; *pl. phragmata* (-ma-tā). [*NL.*, < *Gr. φράγμα* (phragma), a fence, partition, < *φράσσειν* (phrassein), fence, in, fence, secure, fortify. *Cf. diaphragm*, etc.] 1. In bot., a spurious dissepiment or partition, as that which occurs at the nodes of certain calamites, and in various fruits.—2. In *zool.*, a partition, septum, dissepiment, or diaphragm. Specifically, in *entom.*: (a) A transverse partition descending from the dorsal surface into the cavity of the thorax. (b) The posterior inflexed border of the prothorax, concealed by the mesothorax and wing-covers: it is found only in those insects in which the prothorax is movable.

phragmacone (frag'mā-kōn), *n.* [*Cf. Gr. φράγμα* (phragma), a fence, partition (see *phragma*), + *κων* (kon), cone.] The conical, spiral, or otherwise shaped and chambered or septate internal skeleton of fossil cephalopods, contained in the anterior part of the cavity of a hollow hard structure called the *guard* or *rostrum*. It is homologous with the chambered shell of other cephalopods. See cut under *belemnite*.

phragmaconic (frag-ma-kōn'ik), *a.* [*Cf. phragmacone + -ic*.] Having the character of a phragmacone; relating to a phragmacone.

phragmata, *n.* Plural of *phragma*.

Phragmites (frag-mī'tēz), *n.* [*NL.*, < *Gr. φράγμις* (phragmis), growing in hedges, < *φράγμα* (phragma), a fence: see *phragma*.] A genus of grasses of the tribe *Festuceæ* and subtribe *Arundinææ*, distinguished from its relative *Arundo* by spikelets with the lowest flower staminate or sterile. There are 3 species, widely scattered throughout all temperate and sub-tropical regions. They are the tallest native grasses of the northern United States and of Great Britain, where they are useful in binding together the earth of river-banks by their creeping rootstocks. They are perennials with flat leaves and ample panicles, either dense and erect or loose and nodding, furnished with conspicuous tufts of long silky hairs enveloping the spikelets. *P. communis* is the marsh-reed of England and the Atlantic United States, with the aspect of broom-corn, and bearing ornamental plume-like panicles sought for decoration. Also known in England as *ditch-reed* and *bennets*, and in the western part of the United States as *cane*.

Phragmophora (frag-mof'ō-rā), *n. pl.* [NL., < Gr. φράγμα, a fence, partition (see *phragma*), + φέρω = E. bear.] A section of decacerocephalopods, having a phragmacone or internal shell with a row of air-chambers traversed by a siphon. It includes the extinct families *Belospiidae*, *Belopteridae*, and *Belemnitidae*.

phragmophorous (frag-mof'ō-rus), *a.* [*< Phragmophora + -ous.*] Having the characters of the *Phragmophora*; having a phragmacone.

phrase (frāz), *v. t.*; pret. and pp. *phrased*, ppr. *phrasing*. [Appar. merely a particular use of *phrase*.] To use coaxing or wheedling language; cajole; palaver. *Scott, Rob Roy, xxiii.* [Scotch.]

phrampelt, *a.* A bad spelling of *frampel*. *Midleton and Dekker, Roaring Girl, iii. 1.*

phrasal (frā'zāl), *a.* [*< phrase + -al.*] Of, pertaining to, or consisting of a phrase; consisting of two or more words.

A third series of prepositions are the *phrasal* prepositions consisting of more than one word. *J. Earle, Philology of the Eng. Tongue (4th ed.), p. 501.*

phrase (frāz), *n.* [= D. G. *phrase* = Sw. *fras* = Dan. *frase*, < F. *phrase*, OF. *frase* = Sp. *frase*, *frasis* = Pg. *phrasa* = It. *frase*, < L. *phrasis*, < Gr. φράσις, speech, manner of speech, phraseology, expression, enunciation, < φράσσειν, point out, show, tell, declare, speak.] 1. A brief expression; more specifically, two or more words expressing what is practically a single notion, and thus performing the office of a single part of speech, or entering with a certain degree of unity into the structure of a sentence.

"Convey," the wise it call. "Steal!" foh! a fco for the *phrase*! *Shak., M. W. of M., I. 3. 33.*

Now mine the sin,
And mollify damnation with a *phrase*.
Dryden, Spanish Friar, v. 2.

2. A peculiar or characteristic expression; a mode of expression peculiar to a language; an idiom.

The Bible is rather translated into English Words than into English *Phrases*. The Hebraisms are kept, and the *Phrase* of that Language is kept. *Selden, Table-Talk, p. 20.*

And, in his native tongue and *phrases*,
Prayed to each saint to watch his days. *Scott, Rokeby, iv. 9.*

But wixt them blossomed up
From out a common vein of memory
Sweet household talk, and *phrases* of the hearth.
Tennyson, Princess, II.

3. The manner or style in which a person expresses himself; diction; phraseology; language; also, an expression, or a form of expression.

The chief and principall [subject of poesy] is: the laud, honour, and glory of the Immortall gods (I speake now in *phrases* of the Gentiles). *Puttenham, Arte of Eng. Poesie, p. 39.*

The Sclanion dooth playnly vnderstande the Moscouite, although the Moscouian loonge be a more rude and harde *phrases* of speech. *R. Eden, tr. of John Faber (First Books on America, ed. [Arber, p. 290].)*

Thou speak'st
In better *phrases* and matter than thou didst. *Shak., Lear, iv. 6. 8.*

A frantic Gipsy now, the House he haunts,
And in wild *Phrases* speaks dissembled Wanta.
Prior, Henry and Emma.

4. In *music*, a short and somewhat independent division or part of a piece, less complete than a period, and usually closing with a cadence or a half-cadence. A phrase usually includes four or eight measures. The name is also given less technically to any short passage or figure that is performed without pause or break.

The singer who feels what he sings, and duly marks the *phrases* and accents, is a man of taste. But he who can only give the values and intervals of the notes without the sense of the *phrases*, however accurate he may be, 's a mere machine. *Rousseau, Dict. Music. (Tr. in Grove.)*

5. In *fencing*, a period between the beginning and end of a short passage at arms between fencers during which there is no pause, each fencer thrusting and parrying in turn.—*Adverbial, conditional, prepositional, etc., phrase.* See the adjectives.—*Extended phrase, in music*, a phrase that occupies, by exception, more than the usual number of measures.—*Irregular phrase, in music*, a phrase of an unusual number of measures.—*To learn the phrases of a house*, to become familiar with the habits of a family. *Holladay. [Cornwall, Eng.] = Syn. 1. See term.*

phrase (frāz), *v.*; pret. and pp. *phrased*, ppr. *phrasing*. [= F. *phraser* = Sp. *frasear* = Pg. *phrasear*; from the noun.] I. *intrans.* 1. To employ peculiar phrases or forms of speech; express one's self. [Rare.]

So Saint Cyprian *phrased*, to expresse effeminate, womanish, wanton, dishonest, mimical gestures, by the turbarship of an unchaat art. *Prynne, Histrio-Mastix, II., II. 2.*

2. In *music*, to divide a piece in performance into short sections or phrases, so as to bring out the metrical and harmonic form of the whole, and make it musically intelligible; also, to perform any group of tones without pause.

II. *trans.* To express or designate by a particular phrase or term; call; style.

When these suns—
For so they *phrase* 'em—by their heralds challenged
The noble spirits to arms, they did perform
Beyond thought's compass. *Shak., Hen. VIII., I. 1. 34.*

The Presbyters and Deacons writing to him think they doo him honour enough when they *phrase* him no higher than Brother Cyprian, and deare Cyprian in the 26. Epist. *Milton, Reformation in Eng., I.*

phrase-book (frāz'būk), *n.* A book in which the phrases or idiomatic forms of expression peculiar to a language are collected and explained.

I confess you are pretty well vers'd in *Phrase-Books*, and Lexicons, and Glossaries. *Milton, Answer to Salmasius, I. 82.*

phraseless (frāz'les), *a.* [*< phrase + -less.*] Not to be expressed or described.

O, then, advance of yours that *phraseless* hand
Whose white weighs down the airy scale of praise.
Shak., Lover's Complaint, I. 225.

phraseman (frāz'man), *n.*; pl. *phrasemen* (-men). One who habitually uses a set form of words with slight regard to their import; a phrasemonger. [Rare.]

The poor wretch . . .
Becomes a fluent *phraseman*, absolute
And technical in victories and defeats,
And all our dainty terms for fratricide.
Coleridge, Fears in Solitude.

phrase-mark (frāz'märk), *n.* In *musical notation*, a sweeping curve over or under notes that are to be performed connectedly and as forming a single phrase.

phrasemonger (frāz'mung'gēr), *n.* [*< phrase + monger.*] One who deals in mere phrases; one who is an adept at stringing words or phrases together.

phraseogram (frā'zē-ō-gram), *n.* [*< Gr. φράσις* (gen. φράσεως), speech, phrase, + γράμμα, letter: see *gram*.] In *phonog.*, a combination of short-hand characters to represent a phrase or sentence.

phraseograph (frā'zē-ō-gráf), *n.* [*< Gr. φράσις* (gen. φράσεως), speech, phrase, + γράφειν, write.] Same as *phraseogram*.

It contains an exhaustive list of reporting logographs, word signs, *phraseographs*, etc., all of which will, of course, be of great interest to the reporter. *Sci. Amer., N. S., LXL, p. 27 of adv'ta.*

phraseography (frā'zē-ō-grā-fī), *n.* [*< Gr. φράσις* (gen. φράσεως), speech, phrase, + -γραφία, < γράφειν, write.] The combining of two or more shortened phonographic or stenographic signs to represent a phrase or sentence; the use of phraseograms.

phraseologic (frā'zē-ō-loj'ik), *a.* [= F. *phraseologique* = Sp. *fraseológico* = Pg. *phraseologico* = It. *fraseologico*; as *phraseology + -ic.*] Of or pertaining to phraseology; as, *phraseologic peculiarities*.

phraseological (frā'zē-ō-loj'i-kāl), *a.* [*< phraseologic + -al.*] Same as *phraseologic*.

It is the vocabulary and the *phraseological* combinations of the man, or class of men, which must serve as the clue to guide us into the secret recesses of their being. *Marsh, Lects. on Eng. Lang., x.*

phraseologically (frā'zē-ō-loj'i-kāl-i), *adv.* As regards phraseology, or style of expression.

phraseologist (frā'zē-ō-lōj'ist), *n.* [= Pg. *fraseologista*; < *phraseology + -ist.*] 1. A stickler for phraseology, or a particular form of words; a coiner of phrases.

The author of *Poetes Rusticitatis Literatum Otium* is but a meer *phraseologist*. *Guardian, No. 39.*

2. A collector of phrases.

phraseology (frā'zē-ō-lōj'i), *n.* [= F. *phraseologie* = Sp. *fraseologia* = Pg. *phraseologia* = It. *fraseologia*, *frastologia*, < Gr. φράσις (gen. φράσεως), speech, phrase, + -λογία, < λέγειν, speak: see *-ology*.] 1. The form of words used in expressing some idea or thought; mode or style of expression; the particular words or phrases combined to form a sentence, or the method of arranging them; diction; style.

From me they [auctioneers] learned to inlay their *phraseology* with variegated chips of exotic metaphor. *Sheridan, The Critic, I. 2.*

Mr. Fox winnowed and sifted his *phraseology* with a care which seems hardly consistent with the simplicity and elevation of his mind. *Macaulay, Mackintosh's Hist. Rev.*

2. A collection of phrases and idioms. = *Syn. 1. Style, etc. See diction.*

phrasical (frā'zi-kāl), *a.* [*< phrase + -ical.*] Having the character of a phrase; idiomatic. [Rare.]

Here it is *phrasical*, and therefore not to be forced. *Rev. T. Adams, Works, I. 396.*

phrasing (frā'zing), *n.* [Verbal *n.* of *phrase*, *v.*] 1. The wording of a speech or passage.—2. In *music*, the act, process, or result of dividing a piece in performance into short sections or phrases, so as to give it form and clearness. Skill in phrasing is one of the chief qualities of a good performer.

phratría (frā'tri-ā), *n.*; pl. *phratríæ* (-ē). [NL.: see *phratry*.] Same as *phratry*.

This tribunal (the Areopagus) however, did not interfere with the ancestral claims of families and *phratríæ*. *Von Ranke, Univ. Hist. (trans.), p. 128.*

phratric (frā'trik), *a.* [*< phratry + -ic.*] Of or pertaining to a phratry.

The *phratric* organization has existed among the Iroquois from time immemorial. *Morgan, Contributions to North Amer. Ethnology, IV. 11.*

phratry (frā'tri), *n.*; pl. *phratríes* (-tríz). [Also *phratría*; = F. *phratric*, < Gr. φράτριά, φρατρία, a tribe, a political division of people, < φράτρη, clansman, orig. 'brother,' = L. *frater* = E. *brother*: see *brother*.] A brotherhood or clan; specifically, in the states of ancient Greece, a politico-religious group of citizens, which appears to have been originally based on kinship and to have been a subdivision of the phyle or tribe. By modern ethnologists the term is applied to somewhat analogous brotherhoods existing among the aborigines of Australia and America.

In Australia the *phratríes* are still more important than in America. Messrs. Howitt and Fison, who have done so much to advance our knowledge of the social system of the Australian aborigines, have given to these exogamous divisions the name of classes; but the term is objectionable, because it fails to convey (1) that these divisions are kinship divisions, and (2) that they are intermediate divisions; whereas the Greek term *phratry* conveys both these meanings, and is therefore appropriate. *J. G. Frazer, Encyc. Brit., XXIII. 472.*

phreatic (frē-at'ik), *a.* [*< F. phrétique*, < Gr. φρέαρ (phēar-), an artificial well.] Subterranean, as the sources of wells.

phren (fren), *n.*; pl. *phrenes* (frē'nēz). [NL., < Gr. φρήν, the midriff, diaphragm, also, commonly in pl. φρένες, the parts about the heart, the breast, the heart as the seat of the passions or of the mind.] 1. The thinking principle, or power of thought and perception; mind.—2. The diaphragm. See *phrenic*.

phrenalgia (frē-nāl'jī-ā), *n.* [NL., < Gr. φρήν, mind, + άλγος, pain.] Psychalgia.

phrenesiact (frē-nē'si-ak), *a.* [*< phrenesis + -iac.*] Same as *phrenetic*.

Like an hypochondriac person, or, as Burton's *Anatomia* hath it, a *phrenesiact* or lethargic patient. *Scott, Waverley, xlii.*

phrenesis (frē-nē'sis), *n.* [*< L. phrenesis*, < Gr. φρένησις, inflammation of the brain, < φρήν, mind: see *frenzy*.] Delirium; frenzy. *Thomas, Med. Dict.*

phrenetic (frē-net'ik), *a.* and *n.* [Also *frenetic*, *frantic* (see *frantic*); < ME. *frenetike*, *frenetík*, *frenetik*, < OF. *frenetique*, F. *phrénétique*, *frénétique* = Fr. *frenetic* = Sp. *frenético* = Pg. It. *frenetico*, < L. *phreneticus*, *phreneticus*, < Gr. φρενικός, frenzied, distracted, < φρενίτις, frenzy, phrenitis: see *phrenitis*.] I. *a.* See *frenetic*.

II. *† n.* A frantic or frenzied person; one whose mind is disordered.

You did never hear
A *phrenetic* so in love with his own favour!
B. Jonson, Devil is an Ass, iv. 3.

phrenetical (frē-net'ikāl), *a.* See *frenetic*.

phrenetically, *adv.* See *frenetically*.

phreniatric (frē-ni-at'rik), *a.* [*< Gr. φρήν*, mind, + ιατρικός, medicinal: see *iatic*.] Pertaining to the cure of mental diseases; psychiatric.

phrenic (frē'nik), *a.* and *n.* [= F. *phrénique* = Pg. *phrenico* = It. *frenico*, < NL. *phrenicus*, < Gr. as if φρενικός, of or pertaining to the diaphragm, < φρήν (phēn-), the diaphragm, the mind: see *phren*.] I. *a.* In *anat.*, of or pertaining to the diaphragm; diaphragmatic: as, a *phrenic* artery, vein, or nerve.—*Phrenic arteries*, arteries supplying the diaphragm. (a) *Inferior*, two small branches of the abdominal aorta. (b) *Superior*, a slender branch from each internal mammary. Also called *comes nervi phrenici*.—*Phrenic ganglion*, *hemia*, etc. See the nouns.—*Phrenic glands*, a group of small lymphatic glands surrounding the termination of the inferior cava.—*Phrenic nerve*, a deep branch of the fourth cervical nerve, with accessions from the third or fifth, descending through the thorax to be distributed to the diaphragm, giving also filaments to the pericardium and pleura. Also called *internal respiratory nerve of Bell*.—*Phrenic plexus*. See *plexus*.—*Phrenic veins*, tributaries of the inferior vena cava, accompanying the inferior phrenic arteries.

II. n. A mental disease; also, a medicine or remedy for such a disease. *Imp. Dict.*

phrenicocolic (fren'i-kō-kol'ik), *a.* Same as *phrenocolic*.

phrenicogastric (fren'i-kō-gas'trik), *a.* Same as *phrenogastric*.

phrenicoplemic (fren'i-kō-splen'ik), *a.* Same as *phrenosplenic*.

phrenics (fren'iks), *n.* [Pl. of *phrenic*: see *-ics*.] Mental philosophy; metaphysics. *E. Parke.* [Rare.]

phrenicus (fren'i-kus), *n.* [NL.: see *phrenic*.] Same as *diaphragm*.

phrenism (fren'izm), *n.* [*< phren* + *-ism*.] The power of one feeling to influence another; thought-force.

phrenitic (frē-nit'ik), *a.* [*< phrenitis* + *-ic*.] Affected with or characterized by phrenitis.

phrenitis (frē-ni'tis), *n.* [NL., *< L. phrenitis*, *< Gr. φρενίτις*, inflammation of the brain, *< φρήν*, the diaphragm, heart, mind: see *phren*.] 1. In *med.*, an inflammation of the brain or its meninges, attended with acute fever and delirium.—2. Delirium; frenzy.

Phrenitis... is a disease of the mind, with a continual madness or dotage, which hath an acute fever annexed, or else an inflammation of the brain. . . . It differs from Melancholy and Madness. . . . Melancholy is most part silent, this clamorous. *Burton, Anat. of Mel.*, l. 1.

phrenocolic (fren-ō-kol'ik), *a.* [*< Gr. φρήν* (*phren*), diaphragm, + *κόλον*, colon: see *colic*.] Pertaining to the diaphragm and the colon.—**Phrenocolic ligament**, a narrow fold of the peritoneum connecting the splenic flexure of the colon with the diaphragm.

phrenogastric (fren-ō-gas'trik), *a.* [*< Gr. φρήν* (*phren*), diaphragm, + *γαστήρ* (*gastēr*), stomach: see *gastric*.] Pertaining to the diaphragm and the stomach.—**Phrenogastric ligament**, a short fold of the peritoneum connecting the diaphragm with the fundus of the stomach.

phrenography (frē-nog'ra-fi), *n.* [*< Gr. φρήν* (*phren*), diaphragm, + *γράφω* (*grapō*), write.] The observing and descriptive stage of comparative psychology, or phrenology in sense 2. *Smithsonian Report*, 1881, p. 501.

phrenologer (frē-nol'ō-jēr), *n.* [*< phrenology* + *-er*.] A phrenologist.

phrenologic (fren-ō-loj'ik), *a.* [= *F. phrenologique* = *Sp. frenológico* = *Pg. phrenológico* = *It. frenologico*; as *phrenology* + *-ic*.] Of or pertaining to phrenology.

phrenological (fren-ō-loj'ik-al), *a.* [*< phrenologic* + *-al*.] Same as *phrenologic*.

A particularly short, fat, greasy-looking gentleman, with a head as free from *phrenological* development as a billiard-ball. *C. Lever, Harry Lorrequer*, xvii.

phrenologically (fren-ō-loj'ik-al-i), *adv.* In a phrenological manner; according to the principles of phrenology; as regards phrenology.

phrenologist (frē-nol'ō-jist), *n.* [= *F. phrenologue* = *Pg. frenologista* = *It. frenologista*; as *phrenology* + *-ist*.] One who is versed in phrenology.

phrenology (frē-nol'ō-jī), *n.* [= *F. phrenologie* = *Sp. frenologia* = *Pg. phrenologia* = *It. frenologia*, *< Gr. φρήν* (*phren*), heart, mind, + *-λογία*, *< λέγειν*, speak: see *-ology*.] 1. The theory that the mental powers of the individual consist of independent faculties, each of which has its seat in a definite brain-region, whose size is commensurate with the power of manifesting this particular faculty. This theory, which originated at the close of the eighteenth century, assumes, moreover, as an essential part, the plasticity of the cranial envelop, by which the skull conforms externally, in the normal subject, to the shape and configuration of the brain within, so that its form and faculties may be determined, with sufficient exactness, from the skull itself, whether in the skeleton or in the living person. The different powers of the mind or faculties are divided into two classes, the feelings and the intellect, or the affective and intellectual faculties, the former of which is again divided into the propensities and sentiments, the latter into the perceptive and reflective faculties. Each of these groups, as well as each of the individual faculties composing them, is located upon the exterior of the skull with more or less exactness, and it is by the prominence or depression of the different regions that the mental powers and faculties are ascertained. The system was founded by Dr. Franz Joseph Gall (1758-1820), a Viennese physician, and was extended and promulgated by his pupil and associate, Dr. Spurzheim, and by George and Andrew Combe and others. The term is sometimes applied, in the phrase *new phrenology*, to the localization of cerebral functions which has been established by experimental and pathological investigations, almost exclusively of the last twenty years, and which has reached such a degree of certainty and definiteness as to furnish a basis for surgical operations on the brain. But there is nothing in common between modern cerebral localization and the views of Gall and Spurzheim. See out in next column.

AFFECTIVE FACULTIES.—1. *Propensities*: 1, alimentiveness; 2, destructiveness; 3, amativeness; 4, philoprogenitiveness; 5, adhesiveness; 6, combativeness; 7, secretiveness; 8, acquisitiveness; 9, constructiveness. **II. Sentiments**: 10, cautiousness; 11, approbation; 12, self-esteem; 13, benevolence; 14, reverence; 15, firmness; 16, conscientiousness; 17, hope; 18, marvelousness; 19, ideality; 20, mirthfulness; 21, imitation. **INTELLECTUAL FACULTIES.**—1. *Perceptive*: 22, individuality; 23, configuration; 24, size; 25, weight and resistance; 26, coloring; 27, locality; 28, order; 29, calculation; 30, eventuality; 31, time; 32, tune; 33, language. **II. Reflective**: 34, comparison; 35, causality.

phrenomagnetic (fren'ō-mag-net'ik), *a.* [*< Gr. φρήν* (*phren*), mind, + *E. magnetic*.] Pertaining to phrenomagnetism: as, *phrenomagnetic phenomena*. *J. R. Buchanan.*

phrenomagnetism (fren-ō-mag-net-izm), *n.* [*< Gr. φρήν* (*phren*), mind, + *E. magnetism*.] Animal magnetism, directed and controlled by will-power; pathetism.

The simple physiological phenomena known as spirit-rapping, table-turning, *phreno-magnetism*. *Huxley, Lay Sermons*, p. 90.

phrenomesmerism (fren-ō-mez'mēr-izm), *n.* [*< Gr. φρήν* (*phren*), mind, + *E. mesmerism*.] Same as *phrenomagnetism*.

phrenonomy (frē-non'ō-mi), *n.* [*< Gr. φρήν* (*phren*), heart, mind, + *νόμος*, law.] The deductive and predictive stage of phrenology in sense 2. *Smithsonian Report*, 1881, p. 501.

phrenopathia (fren-ō-path'i-ā), *n.* [NL., *< Gr. φρήν* (*phren*), mind, + *πάθος*, disease: see *pathos*.] Mental disease; insanity; psychopathia.

phrenopathic (fren-ō-path'ik), *a.* [*< phrenopathia* + *-ic*.] Of or pertaining to mental disease; psychopathic.

phrenoplegia (fren-ō-plē'ji-ā), *n.* [NL., *< Gr. φρήν* (*phren*), mind, + *πληγή*, a blow, stroke, *< πλήσσειν*, strike.] Sudden loss of mental power.

phrenosis (frē-nō'sis), *n.* [NL., *< Gr. φρήν* (*phren*), heart, mind, + *-osis*.] Psychosis.

phrenosplenic (fren-ō-splen'ik), *a.* Pertaining to the diaphragm and the spleen.—**Phrenosplenic ligament**, a short triangular fold of the peritoneum descending from the diaphragm to the upper end of the spleen.

phrensic (fren'zik), *a.* [*< phren* + *-ic*. Cf. *phrenetic*, *frantic*.] Phrenetic; mentally disordered; insane.

Peace, and be nought! I think the woman be *phrensic*. *B. Jonson, Tale of a Tub*, ii. 1.

phrensy, **phrenzy**, *n.* and *v.* Obsolete forms of *frenzy*.

phrenetic, *a.* and *n.* An obsolete form of *frantic*.

phrenesis (fren-nē'sis), *n.* [NL., *< Gr. φρόνησις*, practical wisdom, *< φρονεῖν*, think, *< φρήν*, mind: see *phren*.] Practical judgment; the faculty of conducting one's self wisely.

phrontisterion (fron-tis-tēr-i-on), *n.*; pl. *phrontisteria* (-i-ā). [Also *phrontistery*, *< OF. phrontistère*; *< Gr. φροντιστήριον*, a place for deep thinking, a "thinking-shop" (as Socrates's school was called by Aristophanes in "The Clouds"), later a school, a monastery, *< φροντίζω*, a deep thinker, *< φροντίζω*, think, consider, meditate, take thought of, be anxious for, *< φρονέω*, thought, care, *< φρονεῖν*, think: see *phronesis*.] A school or seminary of learning; a college.

His lodging! no! 'tis the learn'd *phrontisterion* Of most divine Albumazar. *T. Tomkis (?), Albumazar*, l. 3.

phrontistery (fron'tis-ter-i), *n.*; pl. *phrontisteries* (-iz). Same as *phrontisterion*.

As to the scenery [in the old Greek comedies], he holds that the inside of the *phrontistery* is never seen. *Amer. Jour. Philol.*, IX. 344.

Phryganea (fri-gā'nē-ā), *n.* [NL., so called in allusion to the appearance of the cases of caddis-flies; *< Gr. φρύγανον*, a dry stick, *< φρύγειν*, roast.] The typical genus of the important neuropterous family *Phryganeidae*. It formerly included all the caddis-flies then known, and was thus more nearly continuous with the modern family and equal to the order or suborder *Trichoptera*. It is at present restricted to about 12 species, widely distributed in Europe, Asia, and North America, having rather slender wings with dense pubescence on the anterior pair, and an oblique transverse nervule between the costa and the subcosta.

Phryganeidae (frig-a-nē'i-dē), *n. pl.* [NL., *< Phryganea* + *-idae*.] A family of trichopterous neuropterous insects, typified by the genus *Phryganea*, to which different limits have been assigned; the caddis-flies. (a) Including all caddis-flies, and synonymous with the order *Trichoptera* or the family *Plecoptera*. (b) Restricted to those caddis-flies in which the maxillary palpi of the male are four-jointed, only slightly pubescent, and shaped alike in both sexes. This group contains the giants of the order *Trichoptera*, and occurs only in the northern hemisphere. The larvae live in still waters and make cylindrical cases of bits of leaves and fibers spirally arranged. See out under *caddis-sworm*.

Phrygian (frij'i-an), *a.* and *n.* [= *F. Phrygien*, *< L. Phrygius*, *< Phrygius*, *< Gr. Φρύγιος*, Phrygian, *< Φρύξ* (*Phryx*), a Phrygian.] 1. *a.* Pertaining to Phrygia, an ancient province or country in the interior of Asia Minor, or to the Phrygians. — **Phrygian cap**. See *cap*. — **Phrygian helmet**, a form of helmet suggesting the classical Phrygian cap. This form, which is very rare in medieval representations, is given to St. George, possibly with intention on the part of the artist to denote the Oriental origin of the saint. — **Phrygian marble**. See *marble*, 1. — **Phrygian mode**. See *mode*, 7. — **Phrygian work**, gold embroidery; orphrey-work. See *auriphrigia*.

II. n. 1. A native or an inhabitant of Phrygia. — 2. In *eccles. hist.*, same as *Montanist*. **Phryma** (fri'mā), *n.* [NL. (Linnaeus, 1756), of unknown origin.] A genus of plants, of the gamopetalous order *Verbenaceae*, constituting the tribe *Phrymeae*, known by the uniformly one-celled ovary in a family characterized by two- or four-celled ovaries. The only species, *P. leptostachya*, is a plant widely diffused but nowhere abundant, native of North America, Japan, and the Himalayan region. It is an erect herb, with a few stiff straggling branches, opposite toothed leaves, and a long slender spike of small scattered purplish flowers, at first erect, then spreading, and in fruit reflexed, whence its popular name, *looseleaf*. The fruit is a small, dry, short-stalked utricle, hooked at the apex, and adapted to distribution by catching in the hair of animals.

Phrymex (fri'mē-ē), *n. pl.* [NL. (Bentham and Hooker, 1876), *< Phryma* + *-ex*.] A tribe of plants, of the order *Verbenaceae*, consisting of the genus *Phryma*, characterized by the one-celled and one-ovuled ovary, erect orthotropous ovule, seed destitute of albumen, and reflexed radicle.

Phrynichus (frin'i-kus), *n.* [NL. (Karsch, 1880).] A genus of arachnids, of the family *Phrynidae*, in which the tibiae of the hind legs have no subjoints, the maxillary palpi are much longer than the body, which is slender and tubuliform, and the hand has four finger-like spines. The genus is represented in southern California.

Phrynida (frin'i-dā), *n. pl.* [NL., *< Phrynus* + *-ida*.] An order of pulmonate *Arachnida*: synonymous with *Thelyphronida*. See *Pedipalpi*, 2.

Phrynidae (frin'i-dē), *n. pl.* [NL., *< Phrynus* + *-idae*.] A family of pulmonate *Arachnida* of the order *Phrynida* or *Thelyphronida*, typified by the genus *Phrynus*.

The abdomen is flat, oval, and eleven-jointed; the postabdomen is a mere rudiment, like a button; the cephalothorax is flat, and covered with a horny carapace; the pedipalps are long, strong, six-jointed, and variously armed, but their terminal claw does not form a pincer; the first pair of legs are extremely long, slender, paliform or even antenniform, and multiaarticulate, the fifth and sixth joints being divided into ninety or more subjoints; and the eyes are eight in number, two in the central anterior region, and a cluster of three on each side. The species resemble spiders with (apparently) long feelers and a pair of great claws. They are readily distinguished from the only other family (*Thelyphronidae*) of this order by not having a long tail like a scorpion. They are nocturnal and sluggish, and live under stones and logs. Compare also cut under *Pedipalpi*.

A Species of *Phrynus*, about life-size.

Phrynorhombus (fri-nō-rom'bus), *n.* [NL. (Günther, 1862), < Gr. *φρύνωρ*, a toad, + *ῥόμβος*, a turbot.] A genus of flatfishes of the family *Pleuronectidae*, having no vomerine teeth. *P. unimaculatus* is known as the *topknot*.

Phrynosoma (fri-nō-sō'mā), *n.* [NL., < Gr. *φρύνωρ*, a toad, + *σῶμα*, body.] A genus of lizards of the family *Iguanidae*, including the curious creatures known as *horned toads* or *horned frogs*, as *P. cornutum*, *P. orbiculare*, *P. douglasi*, etc. Some of them are very abundant in most parts of the western and southwestern United States and southward. Some attain a length of six inches, but they are usually small. The body is very flat, and more or less orbicular, with a short tail tapering from a stout base, and shorter legs than

Horned Frog (*Phrynosoma cornutum*).

is usual in related lizards. The head is surmounted with several pairs of stout spines, largest in some of the southern and Mexican forms, and the whole upper surface of the body is roughly granular or tuberculous; the under side is smooth. The coloration of the upper parts is variegated with black, brown, gray, and reddish, in a blotched pattern, and varies greatly, not only with the different species, but in different individuals of the same kind. The creatures have nothing of the agility of most lizards; they are clumsy in their motions, rather sluggish, and cannot jump. They are perfectly harmless, become tame as soon as handled, and are often kept as pets for their oddity. They feed on flies and other insects, but can fast long, and may be safely sent by mail alive to any part of the United States. They bring forth alive. One species (*P. douglasi*) occurs as far north at least as the British boundary of the United States.

Phrynus (fri'nus), *n.* [NL. (Olivier, 1793), < Gr. *φρύνωρ*, a toad.] The typical genus of the family *Phryniidae*. See cut under *Phryniidae*.

Phryxis (frik'sis), *n.* [NL. (Cope, 1872).] A genus of cave-dwelling arachnidans, contain-

*Phryxis longipes*. (Line shows natural size.)

ing such forms as *P. longipes* of the Wyandotte cave in Indiana; now considered synonymous with *Phalangodes*.

Phthartolatras (thār-tol'ā-trē), *n. pl.* [NL., < LGr. *φθαρτολάτρης* (one of the sect noted in def.), < *φθαρός*, corruptible, + *λατρεύω*, worship; see *latría*.] A sect of the sixth century: same as *Corrupticolæ*.

Phthiriasis (thi-rī'a-sis), *n.* [= F. *phthiriase*, *phthiriasis* = Sp. *tiriasis*, < L. *phthiriasis*, < Gr. *φθειράσις*, the lousy disease, < *φθειράω*, have lice or the lousy disease, < *φθειρά*, a louse.] The presence of lice on the body, with the irritation produced thereby and its effects; the lousy disease, formerly called *morbus pediculosus*.

Phthiriomyia (thir'ī-mī'ā), *n. pl.* [NL., < Gr. *φθειρά*, a louse, + *μύια*, a fly.] A division of pupiparous *Diptera*, consisting of the family *Nycteribiidae*, parasitic upon bats.

Phthirius (thir'ī-us), *n.* [NL. (W. E. Leach, 1815), < Gr. *φθειρά*, a louse.] A genus of *Pediculidae* or true lice, having the body broad and flat, and the two hinder pairs of legs very much thickened; the crab-lice (so called from their appearance). *P. pubis* or *inguinalis* is found on the hair of the genitalia, groin, and perineum, and occasionally on other parts of the body. See cut under *crab-lice*.

phthisic (tiz'ik), *a. and n.* [I. *a.* (and II. *n.*), 2). Formerly also *phthisick*, *ptisike*; = OF. *tisique*, *tenike*, F. *phthisique*, now *phthisique* = Sp. *tisico* = Pg. *tisico* = It. *tisico*, *fisico*, < L. *phthisicus*, *phthisicus*, *tisicus*, < Gr. *φθισικός*, consumptive, < *φθίω*, consumption; see *phthisis*. II. *n.* 1. Formerly also *phthisick*, *tisick*, *tissick*, *tizick*, *tytke*, *izio*; < ME. *tisike*, < OF. *tisique*, F. *phthisique* = Sp. *tisica* = Pg. *tisica*, *phthisica* = It. *tisi-*

ca, consumption, < L. *phthisica*, fem. of *phthisicus*, < Gr. *φθισικός*, consumptive; see I.] I. *a.* Same as *phthisical*.

II. *n.* 1. A consumption or wasting away; phthisis.—2. A person affected with phthisis.

Liberty of speaking, then which nothing is more sweet to man, was girded and straight laced almost to a broken-winded tizzick. *Milton*, On Def. of Humb. Ramonst.

phthisical (tiz'i-kal), *a.* [Formerly *ptisical*, *ptisical*; < *phthisic* + *-al*.] Of or belonging to phthisis; affected by phthisis; wasting the flesh: as, a *phthisical* consumption.

He . . . sobs me out half a dozen *ptisical* mottoes whenever he had them, hopping short in the measure of convulsion-fits. *Milton*, Apology for Smectymnus, § 3.

phthisicky (tiz'i-ki), *a.* [*phthisic*(k) + *-y*.] *Phthisical*.

Phthisicky old gentlewomen and frolicsome young ones. *Colman*, The Spleen, I.

phthisiology (tiz-i-ol'ō-jī), *n.* [= F. *phthisiologie*, < Gr. *φθισιολογία*, < *φθισις*, < *λέγω*, speak; see *-ology*.] The sum of scientific knowledge concerning phthisis.

phthisipneumonia (thiz'ip-nū-mō'ni-ā), *n.* [NL., < Gr. *φθισις*, consumption (see *phthisis*), + *πνεῦμα*, lungs; see *pneumonia*.] In *pathol.*, phthisis.

phthisis (thi'sis), *n.* [= F. *phthisie* = Sp. *tisis* = Pg. *phthisis* = It. *tisi*, *fisi*, *fisia*, < L. *phthisis*, < Gr. *φθισις*, a wasting away, consumption, wane, decline, decay, < *φθίω*, waste away, decline, wither, wane, decay.] A disease of the lungs, characterized by progressive consolidation of pulmonary tissue, with breaking down and the formation of cavities. This is so extensively, if not exclusively, pulmonary tuberculosis that the two names are often considered as equivalent. Also called *consumption*.—**Fibroid phthisis**, slow-going phthisis, with considerable production of connective tissue.—**Grinders' phthisis**. Same as *grinders' asthma* (which see, under *grinder*).—**Phthisis florida**, very rapid phthisis; galloping consumption.

phthisozoics (thi-zō-zō'iks), *n.* [*Gr. φθίω* (φθισ-), consume, destroy, + *ζῷον*, an animal.] See the quotation.

[*Phthisozoics*.] From two Greek words: one of which signifies to destroy; the other, an animal . . . :—the art of destroying such of the inferior animals as, in the character of natural enemies, threaten destruction or damage to himself, or to such animals from which, in the character of natural servants or allies, it is in man's power to extract useful service. *Bentham*, Chrestomathia, note to table I. § 82.

phthongometer (thong-gom'e-tēr), *n.* [NL., < Gr. *φθόγγος*, the voice, a sound (see *diphthong*), + *μέτρον*, measure.] An instrument used for measuring vocal sounds. *Whewell*. (*Imp. Dict.*)

phulkari (fūl'kārī), *n.* [Hind. *phūlkārī*, a tissue flower on cloth, etc., also an alkaline efflorescence used to adulterate salt, < *phūl*, a flower, + *-kār*, a suffix of agent.] A kind of flower embroidery done by the natives of the Panjāb in India; also, a cloth so embroidered.

phulwara (fūl-wā'rā), *n.* [E. Ind.] Same as *fuwa*.

phy† (fi), *interj.* An obsolete spelling of *fie*!

But, phy for shame, when shall we cease this gear?

I to defile, and you to fly for fear?

Sylvestre, tr. of Du Bartas's Weeks, II, The Trophies.

Phycidae† (fis'i-dē), *n. pl.* [NL., < *Phycis* + *-idae*.] A family of pyralid moths, typified by the genus *Phycis*: now called *Phycitidae*.

Phycinae (fi-sī'nē), *n. pl.* [NL., < *Phycis* + *-inae*.] A subfamily of gadoid fishes, named by Swainson in 1839 from the genus *Phycis*; codlings. Two species are known in the United States as *squirrel-hakes*.

Phycis (fi'sis), *n.* [NL. (Artedi, 1738), < Gr. *φύκις*, *f.*, *φύκης*, *m.*, a fish living in seaweed, < *φύκος*, seaweed.] 1. In *ichth.*, a genus of gadoid fishes, typical of the subfamily *Phycinae*, having a ray of the first dorsal more or less elongated and filamentous; squirrel-hakes. *P. chuss* and *P. tenuis*, together with a third species, *P. chertsi*, are found along the Atlantic coast of the United States. They are also known as *codlings*, and *P. tenuis* sometimes as *silver hake*. They are quite different from the fishes more properly called *hake* (which see).

2†. In *entom.*, a genus of pyralid moths, erected by Fabricius in 1798, and giving name to the *Phycidae* or *Phycitidae*. The name was changed by

Squirrel-hake (*Phycis chuss*)

tenuis, together with a third species, *P. chertsi*, are found along the Atlantic coast of the United States. They are also known as *codlings*, and *P. tenuis* sometimes as *silver hake*. They are quite different from the fishes more properly called *hake* (which see).

2†. In *entom.*, a genus of pyralid moths, erected by Fabricius in 1798, and giving name to the *Phycidae* or *Phycitidae*. The name was changed by

Curtis in 1828 to *Phycita*, on account of its preoccupation in ichthyology. See *leaf-crumpler*.

Phycita (fis'i-tā), *n.* [NL. (Curtis, 1828), < Gr. *φύκος*, seaweed, fungus; see *fucus*.] The typical genus of *Phycitidae*, having ciliate antennae: same as *Phycis*, 2.

Phycitidae (fi-sit'i-dē), *n. pl.* [NL., < *Phycita* + *-idae*.] A family of pyralid moths, named from the genus *Phycita*. The maxillary palps are equal in the two sexes; the labial palps are concealed or wanting; the fore wings have eleven, ten, or nine veins, the first one not forked; the hind wings have the middle cell closed and the midrib hairy at the base. It is a large and wide-spread group, whose members differ in habits, some being leaf-crumplers or leaf-folders, others borers, and others carnivorous. Formerly *Phycidae*.

Phycitaceae (fi'kō-krō-mā'sē-ē), *n. pl.* [NL., < Gr. *φύκος*, seaweed, + *χρῶμα*, color, + *-aceae*.] Same as *Cryptophyceae*.

phycocchromaceous (fi'kō-krō-mā'shius), *a.* Resembling or belonging to the order *Phycocchromaceae*.

phycochrome (fi'kō-krōm), *n.* [*Gr. φύκος*, seaweed, + *χρῶμα*, color.] The bluish-green coloring matter of some algae, a mixture of chlorophyll and phycocyanin.

Phycocchromophyceae (fi'kō-krō-mō-fi'sē-ē), *n. pl.* [NL., < Gr. *φύκος*, seaweed, + *χρῶμα*, color, + *φύκος*, seaweed, + *-eae*.] An order of *Algae*: same as *Cryptophyceae*.

phycocyan (fi'kō-si'an), *n.* [*Gr. φύκος*, seaweed, + *κυανός*, blue.] Same as *phycocyanin*.

phycocyanin, **phycocyanine** (fi'kō-si'ā-nin), *n.* [*Gr. φύκος*, seaweed, + *κυανός*, blue, + *-ίνη*, *-ine* (cf. *cyanine*).] A blue coloring matter which is present, in addition to chlorophyll, in the cells of certain algae, and imparts to them a bluish-green color, as in the *Cyanophyceae* or *Phycocchromaceae*. It is soluble in water, but insoluble in alcohol or ether.

phycocerythrin (fi'kō-e-rith'rin), *n.* [NL., < Gr. *φύκος*, seaweed, + *ερυθρός*, red.] A red coloring matter to which the red seaweeds or *Florideae* owe their peculiar coloring, which is present, in addition to chlorophyll, in the cells. It is soluble in water.

phycography (fi'kō-g'ra-fi), *n.* [*Gr. φύκος*, a seaweed, + *-γραφία*, < *γράφω*, write.] A scientific or systematic description of algae or seaweeds.

phycologist (fi'kol'ō-jist), *n.* [*Gr. phycology* + *-ist*.] One who is skilled in phycology; one who studies algae or seaweeds; an algologist.

phycology (fi'kol'ō-jī), *n.* [= F. *phycologie*, < Gr. *φύκος*, seaweed, + *-λογία*, < *λέγω*, speak; see *-ology*.] That department of botanical science which treats of algae or seaweeds; algology. [Rare.]

phycometer (fi'kō-mā'tēr), *n.* [NL., < Gr. *φύκος*, seaweed, + *μέτρον*, Doric *μάτρη* = L. *mater*, mother.] The gelatin in which the sporules of algaceous plants first vegetate.

Phycomycetes (fi-kōm'i-sēz), *n.* [NL. (Kunze), < Gr. *φύκος*, seaweed, + *μύκης*, a fungus.] A genus of phycomycetous fungi of the family *Mucoraceae*. The spore-bearing hyphae are erect, not branching, the sporangia spheroid or pyriform, and the spores ovoid or spheroidal and hyaline. Three species are known, of which *P. nitens* is very common, growing on greasy substances, as old bones and oil-cakes.

Phycomycetæ (fi'kō-mī-sē'tē-ē), *n. pl.* [NL. (De Bary), < *Phycomycetes* (-et-) + *-æ*.] A division of fungi, named from the genus *Phycomycetes* and embracing the families *Mucoraceae*, *Peronosporaceae*, *Saprolegniaceae*, *Entomophthoraceae*, *Chytridiaceae*, and *Protomycetaceae*. They are mostly parasitic on plants or animals; a few are saprophytic. See the above families or orders for special characterization and illustration.

Phycomycetes (fi'kō-mī-sē'tēz), *n. pl.* [NL., *pl.* of *phycomycetes*.] Same as *Phycomycetæ*.

phycocyanin (fi'kō-si'ā-nin), *n.* [*Gr. φύκος*, seaweed, + *κυανός*, blue, + *-ίνη*, *-ine* (cf. *cyanine*).] A yellow coloring matter: same as *diatomine*.

phycocyanin, **phycocyanine** (fi'kō-si'ā-nin), *n.* [*Gr. φύκος*, seaweed, + *κυανός*, blue, + *-ίνη*, *-ine* (cf. *cyanine*).] A yellow coloring matter: same as *diatomine*.

phycocyanin, **phycocyanine** (fi'kō-si'ā-nin), *n.* [*Gr. φύκος*, seaweed, + *κυανός*, blue, + *-ίνη*, *-ine* (cf. *cyanine*).] A yellow coloring matter: same as *diatomine*.

Phycis nebula.
Moth and Case. (Line shows natural size of moth.)

phygogalactic (fi'gō-ga-lak'tik), *a.* and *n.* [*Gr. φυγεῖν, phugein, shun, avoid, + γάλα (galakt-), milk.*] *I. a.* Preventing the formation of milk and promoting the reabsorption of what has been already secreted.

II. n. An agent having these qualities.

phyla, *n.* Plural of *phylum*.

phylactery (fi-lak'tēr), *n.* [*F. phylactère: see phylactery.*] A phylactery. *Sandys.*

phylactered (fi-lak'tērd), *a.* [*phylactery + -ed.*] Wearing a phylactery; hence (because the wearing of phylacteries was assumed to be a sign of bigotry and of a desired separation from the body of worshippers), narrow-minded; bigoted; pharisaical.

Who for the spirit hug the spleen,
Phylacter'd throughout all their men;
Who their ill-tasted home-brewed prayer
To the State's mellow forms prefer.

M. Green, The Spleen.

phylacteria, *n.* Plural of *phylactery*.

phylacteric (fi-lak'ter'ik), *a.* [= *Sp. filacterico* = *Pg. phylacterico*; as *phylactery + -ic.*] Of or pertaining to the phylactery; accompanied by the assumption of the phylactery.

phylacterical (fi-lak'ter'ikal), *a.* [*phylactery + -al.*] Same as *phylacteric*. *L. Addison, Christian Sacrifice, p. 128.*

phylacterium (fi-lak'tēr-i-um), *n.*;

pl. *phylacteria* (-i-ā).

[*NL.*: see *phylactery*.] A portable reliquary. See *phylactery*.

phylactery (fi-lak'tēr-i), *n.*;

pl. *phylacteries* (-riz).

[Now written according to the *L.* spelling; formerly *philactery*, *ME. philaterie*, earlier *filaterie*, *OF. filaterie, philaterie*, also *filatiere, philatiere*, later *phylacterie, phylactere*, *F. phylactère* = *Sp. filacteria* = *Pg. phylacteria* = *It. filateria*; *Gr. φυλακτήριον, phylaktērion*, a phylactery, *Gr. φυλακτήριον*, a post for watchmen, or a garrison, a fort, castle, outpost, also safeguard, preservative, esp. an amulet (whence the Jewish use), *Gr. φυλακτήριον*, a guard, *Gr. φυλάσσειν*, watch, guard.] A charm or amulet.

And Fathers, Councils, Church, and Church's head
Were on her reverend *phylacteries* read.

Dryden, Hind and Panther, l. 399.

Happy are they who verify their amulets, and make their *phylacteries* speak in their lives and actions.

Sir T. Browne, Christ, Mor., III. 10.

Specifically — (a) In *Jewish antiqu.*, an amulet consisting of a strip or strips of parchment inscribed with certain texts from the Old Testament, and inclosed within a small leather case, which was fastened with straps on the forehead just above and between the eyes, or on the left arm near the region of the heart. The four passages inscribed upon the phylactery were *Ex. xiii. 2-10, 11-17*, and *Deut. vi. 4-9, 13-22*. The custom was founded on a literal interpretation of *Ex. xiii. 16*, and *Deut. vi. 8* and *xi. 18*.

He which hath his *Phylacteries* on his head and armes, and his knots on his garment, and his Schedule on his doore, is so fenced that he cannot easily sinne.

Purchas, Pilgrimage, p. 184.

(b) Among the primitive Christians, etc., a case in which were inclosed relics of the saints. = *Syn.* (a) See *defa. of amulet, talisman, and mezuzah*.

Phylactolamata (fi-lak-tō-lē-ma-tā), *n. pl.*

[*NL.*: *Gr. φυλάκτος, verbal adj. of φυλάσσειν, guard, + λαμῶς, throat.*] A subclass or order of *Polyzoa*, containing those whose lophophore is bilateral, crescentic, or hippocrepiform, provided with a circlet of tentacles, and defended by an epistoma. These polyzoans are larger, softer, and more homogeneous than the *Gymnolamata*, and are specially characteristic of fresh water. The families *Plumatellidae* and *Cristatellidae* are characteristic components of the group. Also called *Lophopoda* and *Hippocrepia*. See cut under *Polyzoa*.

phylactolamatus (fi-lak-tō-lē-ma-tus), *a.* Pertaining to the *Phylactolamata*, or having their characters.

phylæ, *n.* Plural of *phyle*.

phylarch (fi'lärk), *n.* [= *F. phylarque*, *Gr. φύλαρχος*, chief of a tribe, *Gr. φύλη, a tribe (see phyle), + ἀρχεῖν, rule.*] In ancient Greece, the chief or head of a tribe; in Athens, the commander of the cavalry of a tribe, the ten phylarchs being under the orders of the two state hipparchs, the commanders-in-chief of the cavalry.

phylarchy (fi'lär-ki), *n.*;

pl. *phylarchies* (-kiz).

[= *F. phylarchie*, *Gr. φύλαρχια*, the office of phylarch, *Gr. φύλαρχος*, a phylarch: see *phylarch*.]

In ancient Greece, the headship of a tribe or clan; the office or authority of a phylarch.

phyle (fi'lē), *n.*;

pl. *phylæ* (-lē).

[*NL.*: *Gr. φύλη, a body of men joined by ties of birth, a tribe, clan, class, phyle (cf. φύλον, a tribe: see phylum), + φύνεω, produce, φίσσεται, grow: see bel.*] In ancient Greece, a tribe or clan; one of the subdivisions normally based on ties of blood, of which the aggregate constituted a community. In Athens the tribes did not rest on family relationship, but were at first geographical divisions, then classes formed according to occupation or wealth. Clisthenes abolished the old tribes, and distributed his fellow-citizens among ten new ones, named after ancient Attic heroes, and arranged upon geographical lines and democratic ideas; and this arrangement persisted through the glorious time of Attic history. Every full citizen of Athens was registered in a phyle, in a deme, and in a phratry. Every phyle was a political unit, to which were allotted the choice of 50 of the 500 senators and that of its due proportion of dicasts and of the higher civil and military officers of the state; and every phyle was required to contribute in a fixed proportion to the military service, to the various liturgies, etc.

phyletic (fi-lēt'ik), *a.* [*Gr. φυλετικός, Gr. φύλη, a tribesman, Gr. φύλη, a tribe: see phyle.*] 1. Pertaining to a race or tribe. Hence — 2. In *biol.*, pertaining to a phylum of the animal kingdom, or to the construction of phyla; phylogenetic.

Phyllactinia (fi-lak-tin'i-ā), *n.* [*NL. (Léveillé), Gr. φύλλον, leaf (see phylary), + ακτίς (aktis-), ray.*] A genus of pyrenomycetous fungi of the family *Erysiphæ*. Each peritheciom contains several asci, and the appendages are needle-shaped and abruptly swollen at the base. The only well-known species is *P. suffulta*, which grows upon the leaves of a great variety of plants, especially woody plants.

phyllade (fi'lād), *n.* [*Gr. φύλλας (φυλλάδ-), a bunch of leaves, Gr. φύλλον = L. folium, leaf.*] In *bot.*, one of the small imperfect leaves in *Isoetes*, alternating with the fertile leaves. In the submerged species these consist of a small lamina with no sheath, and in the terrestrial species they are reduced to mere scales.

Phyllanthæ (fi-lan'thē-ē), *n. pl.* [*NL. (Bartling, 1830), Gr. Φυλλανθός + -æ.*] A tribe of plants of the order *Euphorbiaceæ*, distinguished by carpels with two contiguous ovules in the central angle, and the seed-leaves much broader than the radicle. It includes 64 genera, mainly tropical, of which *Phyllanthus* is the type. For other principal genera, see *Putranjiva* and *Toxicodendron*.

Phyllanthus (fi-lan'thus), *n.* [*NL. (Linnaeus, 1737), so called from species with flowers seated on leaf-like flattened branches; Gr. φύλλον, a leaf, + ἄνθος, flower (cf. L. phyllanthos, Gr. φύλλανθος, a plant with prickly leaves, prob. scabious).*] A large genus of plants, of the order *Euphorbiaceæ*, type of the tribe *Phyllanthæ*, characterized by the entire alternate leaves and apetalous monœcious flowers, the male in glomerate clusters and with from two to six stamens, and by the pistil consisting of from three to many carpels, their two-cleft styles not dilated below the apex. There are about 450 species, very widely dispersed throughout the warmer parts of the world, rarer in temperate climates. They are either herbs, shrubs, or trees, of great variety in appearance. The leaves are generally two-ranked, and so arranged as to make the branches resemble pinnate leaves. The small greenish flowers are axillary or at the nodes of leafless and often flattened branches, and are often tinged with yellow or purple. Several species are in medicinal repute as diuretics in India, as *P. Niruri* and *P. urinaria*. The bruised leaves of *P. Conami* are there used to stupefy fish. (Compare *Piscidia*.) Many species are cultivated under the name *leaf-flower*, from the blooming leaf-like branches, or cladodia. (See cut under *cladodia*.) The snow-bush, cultivated for its white flowers, is *P. nivalis*, native of the New Hebrides. Many others are cultivated as ornamental evergreen shrubs under the names of *Embothia* and *Xylophylla*, the latter a numerous group of woody-branched shrubs with orange-red flowers, chiefly from the West Indies. For other species, see *Otaheite gooseberry* (under *gooseberry*), *seaside laurel* (under *laurel*, 3), and *embothia myrobalan* (under *myrobalan*). The last produces an edible fruit, used for preserves and in dyeing and tanning, and long famed as an astringent medicine (but not now so used), and a durable wood, used for implements, building, and furniture in India and Burma. The so-called *Otaheite gooseberry* is also known as star-gooseberry.

phyllary (fi'lā-ri), *n.*;

pl. *phyllaries* (-riz).

[*NL. phyllarium, Gr. φύλλάριον, a leaflet, dim. of φύλλον = L. folium, a leaf: see foil.*] In *bot.*, one of the leaflets forming the involucre of composite flowers.

phyllidia, *n.* Plural of *phyllidium*.

Phyllidiobranchiata (fi-lid'i-ō-brang-ki-ā'tā), *n. pl.* [*NL.*: *Gr. phyllidium + L. branchiæ, gills: see branchiate.*] A suborder of palliate or tectibranchiate opisthobranchiate gastropods, in which the etenidia are replaced by lateral lamellar functional gills. It contains the limpets only. See *Patellidae*.

phyllidiobranchiate (fi-lid'i-ō-brang-ki-āt), *a.* Pertaining to the *Phyllidiobranchiata*, or having their characters, as a limpet.

phyllidium (fi-lid'i-um), *n.*;

pl. *phyllidia* (-i-ā).

[*NL.*: *Gr. φύλλον, leaf, + dim. suffix -idium.*] One of the rudimentary etenidia of the phyllidiobranchiate gastropods, as limpets, called by Lankester *capitopodal bodies*.

Phyllirhoë (fi-lir'ō-ē), *n.* [*NL.*, prop. **Phyllirrhoë*, *Gr. φύλλορροός*, shedding leaves, *φύλλορροειν*, shed leaves, *Gr. φύλλον, leaf, + ῥόν, flow, Gr. ρεῖν, flow.*] 1. The typical genus of *Phyllirhoidea*. *P. bucephalus*, the best-known species, is a highly

Phyllirhoë bucephalus.

phosphorescent oceanic organism, bearing little resemblance to a mollusk. It is thin and translucent, without gills, shell, or foot, ending in a rounded tail-like fin with which it swims like a fish, and bearing upon the head a pair of long tentacles. Also *Phyllirhoa* and *Phyllirrhæ*. 2. [*L. c.*] A member of this genus.

phyllirrhoid (fi-lir'roid), *a.* and *n.* *I. a.* Pertaining to the *Phyllirrhoidea*, or having their characters.

II. n. A member of the *Phyllirrhoidea*.

Phyllirrhoidea (fi-lir'ō-i-dē), *n. pl.* [*NL.*: *Gr. Phyllirrhoë + -idea.*] A family of nudibranchiate gastropods, typified by the genus *Phyllirhoë*. These singularly degenerate and simple mollusks have no etenidia, cerata, mantle-skirt, or other processes of the body-wall, even the foot being aborted. The intestine ends on the right side, and the head has two long tentacles. They are now sometimes ranked with *Polybranchiata* in a distinct section called *Abranchiata*, but were formerly referred to the pteropods, the heteropods, and even the tunicates. Also called *ocean slugs* and *Pulcomata*.

phyllis (fi'lis), *n.* [*L. Phyllis* (Virgil, *Horace*), *Gr. Φύλλις*, a fem. name: so called in allusion to Phyllis as the name in old plays and romances and pastoral poems of a country girl, or shepherdess, or sweetheart. Cf. *philander*.] A country girl; a shepherdess; a sweetheart: a common name for such in old romances, pastoral poems, etc.

phyllis (fi'lis), *v. t.* [*phylis*, *n.* Cf. *philander*, *v.*] To address or celebrate in amatory verses. [Rare.]

He passed his easy hours, instead of prayer,
In madrigals and *phylising* the fair.

Garth, Dispensary, l.

Phyllis (fi'lis), *n.* [*NL. (Linnaeus, 1737), so called from the handsome green leaves and their ornamental venation; Gr. phyllis, an almond-tree, Gr. φύλλις, foliage, Gr. φύλλον, a leaf.*] A genus of undershrubs of the gamopetalous order *Rubiaceæ* and the tribe *Anthospermeæ*, characterized by stamens inserted on the base of the corolla, and fruit consisting of two pyriform indehiscent carpels. The only species is a native of the Canaries and the island of Madeira. It bears opposite or whorled, broadly lanceolate leaves, stipules united with the petioles into a sheath, and numerous minute whitish flowers in panicles, with thread-like erect stems, nodding in fruit. It is cultivated as a hardy evergreen, sometimes under the name of *bastard hare's-ear* (which see, under *hare's-ear*).

phyllite (fi'līt), *n.* [= *F. phyllithe* (for **phylite*) = *Pg. phyllite* = *It. fillite*, *Gr. φύλλιτης, of or belonging to leaves, Gr. φύλλον, leaf: see phylary.*] One of the names given to clay-slate or argillaceous schist. It was introduced by Naumann as a substitute for the *phyllade* of D'Aubuisson. It is little used by authors writing in English. By some later lithologists *phyllite* has been used as the equivalent of *ottrelite-slate*, a schistose rock containing fine lamellæ of the mineral ottrelite.

Phyllites (fi-lī'tēz), *n.* [*NL.*: see *phyllite*.] A name under which a great variety of fossil leaves have been placed, in regard to whose affinities nothing definite was known.

phyllitic (fi-līt'ik), *a.* [*phyllite + -ic.*] Having the characters of phyllite, or composed of that rock.

Generally the slates are schistose, *phyllitic*, and chalcitolic. *Nature*, XXXIX. 31.

Phyllium (fi'lī-um), *n.* [*NL.*: *Gr. φύλλον, dim. of φύλλον, a leaf: see phylary.*] A genus of orthopterous insects belonging to the family *Phasmidae*, and popularly known by the

Leaf-insect (*Phyllium pulcherrimum*, female, reduced).

name of leaf-insects or walking-leaves. Some of them have wing-covers so closely resembling the leaves of plants that they are easily mistaken for the vegetable productions around them. The eggs, too, bear a curious resemblance to the seeds of plants. They are for the most part natives of the East Indies, Australia, and South America. The males have long antennae and wings, and can fly; the females have short antennae, and are incapable of flight.

phyllorhynchia (fil-ō-brang'ki-ā), *n.*; pl. *phyllorhynchiae* (-ē). [*Gr. φύλλον*, leaf, + *ῥάγχις* (L. *branchia*, sing. *branchia*), gills; see *branchia*.] One of the lamellar or foliaceous gills of crustaceans.

In the prawns and shrimps, in Gebia and Callinassa, in all the Anomura and Brachyura, the gills are *phyllorhynchia*. Huxley, Proc. Zool. Soc., 1878, p. 777.

Phyllobranchia (fil-ō-brang'ki-ā), *n.* pl. [*NL.*, < *Gr. φύλλον*, leaf, + *βράγχια*, gills; see *branchia*.] A division of crustaceans, containing those decapods which are phyllobranchiate.

phyllobranchial (fil-ō-brang'ki-āl), *a.* [*Phyllobranchia* + *-al*.] Lamellar or foliaceous, as gills; of or pertaining to phyllobranchia.

phyllobranchiate (fil-ō-brang'ki-āt), *a.* [*Phyllobranchia* + *-ate*.] Having phyllobranchia, as a crab.

phyllolade (fil'ō-kī-lād), *n.* Same as *phylloladum*.

phylloladium (fil-ō-kī-lā-di-um), *n.*; pl. *phylloladia* (-ā). [*NL.*, < *Gr. φύλλον*, leaf, + *κλάδος*, branch.] In bot., a stem or branch which assumes the functions of foliage. The broad, succulent stems of the *Cactaceae* are familiar examples.

phyllorhynchia (fil-ō-sī'a-nin), *n.* [*Gr. φύλλον*, leaf, + *κίανος*, blue; see *cyanine*.] See *chlorophyll*.

phyllorhynchia (fil'ō-sist), *n.* [*Gr. φύλλον*, leaf, + *κύστις*, bladder; see *cyst*.] A cyst or cavity in the hydrophyllium of certain oceanic hydrozoans. See cut under *diphyzooid*.

phyllorhynchia (fil'ō-sis'tik), *n.* [*Gr. phyllorhynchia* + *-ic*.] Pertaining to or having the character of a phylloceyst.

phyllode (fil'ōd), *n.* [= *F. phyllode*, < *NL. phyllodium*; see *phyllodium*.] Same as *phyllodium*.

phyllodia, *n.* Plural of *phyllodium*.

phyllodineous (fil-ō-din'ē-us), *a.* [*Phyllodium* + *-in* + *-eous*.] In bot., resembling or belonging to a phyllodium.

phyllodination (fil-ō-din-i-ā'shon), *n.* [*Phyllodineous* + *-ation*.] In bot., the state of being phyllodineous; the formation of twig-like parts instead of true leaves. *R. Brown*.

phyllodium (fil-lō'di-um), *n.*; pl. *phyllodia* (-ā). [*NL.*, < *Gr. φύλλον*, like leaves, rich in leaves, < *φύλλον*, leaf, + *εἶδος*, form.] In bot., a petiole which usurps the form and function of a leaf-blade, as in many species of *Acacia*. It has usually been further distinguished from a true blade by the statement that it normally presents the edges instead of the faces to the earth and sky; but recent investigation proves that this does not always hold good, since some undoubted phyllodia are not vertical, but are dorsiventrally placed, like true leaves. The South American *Oxalis duplexifolia* is an example. Also *Phyllode*. See also cut under *petiole*.

Phyllodoce (fil-lōd'ō-sē), *n.* [*NL.* (Brown, 1756), < L. *Phyllodoce*, a sea-nymph, daughter of Neireus and Doris; no corresponding *Gr.* form appears.] 1. A genus of oceanic hydrozoans of the family *Physophoridae*. Also *Phyllodoce*. Lesson, 1843.—2. The typical genus of *Phyllodoceidae*. *P. viridis* is the palolo, also, however, placed in the genus *Lysidice*, and now in *Palolo*.

Phyllodoceidae (fil-ō-dōs'i-dē), *n.* pl. [*NL.*, < *Phyllodoce* + *-idae*.] A family of polychaetous annelids, having the parapodia modified as swimming-plates by a widening of the ends of the separated or fused parapodia, or of their cirri; typified by the genus *Phyllodoce*. They are known as leaf-bearing worms.

phyllody (fil'ō-di), *n.* [*Gr. φύλλωδης*, like leaves; see *phyllodium*.] In bot., the condition in which true leaves are substituted for some other organ—that is, in which other organs are metamorphosed into green leaves. This condition may occasionally occur in bracts, the calyx, corolla, ovules, pistils, and stamens. Called *frondescence* by Engemann, and *phyllomorphy* by Morren.

phyllomen (fil'ō-jen), *n.* [*Gr. φύλλον*, leaf, + *γενής*, producing; see *-gen*.] Same as *phyllorhynchia*.

phyllogenous (fi-loj'e-nus), *a.* [*Gr. φύλλον*, leaf, + *-γενής*, producing; see *-genous*.] Growing upon leaves. *Thomas*, Med. Dict.

Phylloglossum (fil-ō-glos'um), *n.* [*NL.* (Kunze, 1843), < *Gr. φύλλον*, leaf, + *γλῶσσα*, tongue.] A peculiar monotypic genus of plants of the natural order *Lycopodiaceae*. They are acaulescent plants, with a basal rosette of from six to nine linear-subulate leaves, and a peduncled spike crowded with reniform one-celled two-valved sporangia, each subtended by a cuspidate bract. *P. Drummondii*, the only species, is found in Australia, Tasmania, and New Zealand.

phylloid (fil'oid), *a.* [= *F. phylloide*, < *Gr. φύλλοειδής*, contr. *φύλλωδης*, leaf-like, < *φύλλον*, leaf, + *εἶδος*, form.] Leaf-like; foliaceous. Also *phylloideous*.

phylloideous (fi-loi'dē-us), *a.* [*Gr. phylloid* + *-eous*.] Same as *phylloid*.

phyllomania (fil-ō-mā'ni-ā), *n.* [*NL.*, < *Gr. φύλλον*, leaf, + *μανία*, madness (see *mania*). Cf. *Gr. φύλλομανεῖν*, run wildly to leaf.] In bot., the production of leaves in unusual numbers or in unusual places.

phyllome (fil'ōm), *n.* [*Gr. φύλλωμα*, leafage, foliage, < *φύλλον*, clothe with leaves, < *φύλλον* = L. *folium*, leaf; see *foil*.] In bot., the leaf in all its modifications; foliage. Also *phylloma*.

We call foliage leaves, tendrils, and anthers in their various adaptations, metamorphosed leaves or *phyllomes*. De Bary, Fungi (trans.), p. 256.

Phyllomedusa (fil'ō-mē-dū'sā), *n.* [*NL.* (Wagler), < *Gr. φύλλον*, leaf, + *NL.* (L.) *Medusa*.]

Phyllomedusa bicolor.

The typical genus of *Phyllomedusidae*, having appposable digits, so that the feet can be used for grasping. There are several species, as *P. bicolor* of South America.

Phyllomedusidae (fil'ō-mē-dū'si-dē), *n.* pl. [*NL.* (Günther), < *Phyllomedusa* + *-idae*.] A family of salient anurous *Batrachia*, typified by the genus *Phyllomedusa*. They have free platyactyl digits, maxillary teeth, ears perfectly developed, parotoids present, and sacral apophyses dilated. The family is now usually merged in *Hylidae*.

phyllomic (fi-lom'ik), *a.* [*Gr. phyllome* + *-ic*.] In bot., of the nature of a phyllome; resembling a phyllome. *Nature*, XXXIV, 17.

phyllomorphy (fil'ō-mōr-fi), *n.* [*Gr. φύλλον*, leaf, + *μορφή*, form.] Same as *phyllody*. Also *phyllomorphosis*.

Phyllophaga (fi-lof'a-gā), *n.* pl. [*NL.* (Hartig, 1837), < *Gr. φύλλον*, leaf, + *φαγεῖν*, eat.] 1. In entom.: (a) A series of securiferous hymenopterous insects, including the saw-flies or *Tenthredinidae*. They have the trochanters two-jointed, anterior tibiae two-spurred, abdomen connate with the thorax, and the ovipositor formed of two saws which are alternately protruded. (b) A section of lamellicorn beetles which are leaf-eaters, as the chafers, conterminous with Macleay's two families *Anoplognathidae* and *Melolonthidae*. Latreille. Also *Phyllophagi*.—2. In mammal., a group of edentates corresponding to the *Bradypoda*, or sloths. Owen, 1842.

phyllophagous (fi-lof'a-gus), *a.* [= *F. phyllophage*, < *Gr. φύλλον*, leaf, + *φαγεῖν*, eat.] Leaf-eating; feeding on leaves; of or pertaining to the *Phyllophaga* or *Phyllophagi*.

phyllorhine (fil'ō-rī-nē), *n.* [*NL.*, < *Gr. φύλλον*, leaf, + *ῥίς* (L. *rhiza*), root.] A member of the *Phyllophaga*, in either sense.

phyllophagous (fi-lof'a-gus), *a.* [= *F. phyllophage*, < *Gr. φύλλον*, leaf, + *φαγεῖν*, eat.] Leaf-eating; feeding on leaves; of or pertaining to the *Phyllophaga* or *Phyllophagi*.

phyllorhine (fil'ō-rī-nē), *n.* [*NL.*, < *Gr. φύλλον*, leaf, + *ῥίς* (L. *rhiza*), root.] A member of the *Phyllophaga*, in either sense.

phyllophagous (fi-lof'a-gus), *a.* [= *F. phyllophage*, < *Gr. φύλλον*, leaf, + *φαγεῖν*, eat.] Leaf-eating; feeding on leaves; of or pertaining to the *Phyllophaga* or *Phyllophagi*.

phyllorhine (fil'ō-rī-nē), *n.* [*NL.*, < *Gr. φύλλον*, leaf, + *ῥίς* (L. *rhiza*), root.] A member of the *Phyllophaga*, in either sense.

the terminal bud or growing-point in a palm. Also *phyllorhine*.

phyllorhine (fi-lof'ō-rus), *a.* [*Gr. φύλλωδης*, bearing leaves, < *φύλλον*, leaf, + *ῥέειν* = E. *bear*.] 1. Leaf-bearing; producing leaves.—2. In zool., having foliaceous or leaf-like parts or organs; specifically, provided with a nose-leaf, as a bat.

Phyllopus (fil-ō-pūs), *n.* See *Phyllopus*.

phyllorhine (fil'ō-rī-nē), *a.* and *n.* [*NL.*, < *Gr. φύλλον*, leaf, + *ῥίς* (L. *rhiza*), root.] 1. A. Having foliaceous feet; having the limbs expanded and flattened like leaves; specifically, of or pertaining to the *Phyllopus*.

II. *n.* A crustacean of the order *Phyllopoda*.

Phyllopoda (fi-lof'ō-dā), *n.* pl. [*NL.*; see *phyllopod*.] 1. An order of entomostracous crustaceans, the leaf-footed crustaceans, sometimes forming (with *Ostracopoda* and *Cladoceera*) a suborder of *Branchiopoda*. In Latreille's classification the phyllopoda were a section of his branchiopoda, corresponding to the modern order of *Phyllopoda*, and divided into (a) *Ceratophthalma*, with the genera *Limnadia* and *Etheria* (comprising the modern family *Etheriidae*) and *Artemia* and *Branchipus* (the modern family *Branchipodidae*), and (b) *Aspidophora*, with the genera *Apus* and *Lepidurus* (the modern family *Aspididae* or *Apusidae*). The feet in phyllopoda are very variable in number, and those of the locomotory series are membranous or foliaceous, as implied in the name. Excepting in *Branchipodidae*, the body bears a very large carapace, which in the *Limnadia* takes the form of a bivalve shell with a hinge, closed by adductor muscles, into which the legs can be withdrawn. But this carapace is not a cephalothorax as is usual in crustaceans. Two pairs of antennae are usually present. The mouth-parts are a pair of mandibles, two pairs of maxillae, and in some forms a pair of maxillipeds. Phyllopoda hatch from the egg in the nauplius stage; in some of them parthenogenesis occurs, and the eggs are notable for their ability to withstand desiccation without losing their vitality. Phyllopoda inhabit chiefly fresh-water ponds, sometimes swarming in vast numbers. The species of *Artemia*, as *A. salina*, are known as brine-shrimps. The phyllopoda are an old type, going back to the Devonian, and have some resemblance to trilobites. See cuts under *Apus*, *Etheriidae*, and *Limnadia*. 2. In conch., in J. E. Gray's classification (1821), one of several orders of *Conchophora*, containing dimyarian bivalve mollusks having the foot lamellar or elongate.

phyllopodal (fi-lof'ō-dāl), *a.* [*Gr. phyllopod* + *-al*.] Same as *phyllopod*. *Claus*, quoted in *Encyc. Brit.*, VI, 650, note. [Rare.]

phyllopodan (fi-lof'ō-dān), *a.* and *n.* [*Gr. phyllopod* + *-an*.] Same as *phyllopod*.

phyllopode (fil'ō-pōd), *n.* [*Gr. φύλλον*, leaf, + *ποῖς* (L. *pod*) = E. *foot*. Cf. *phyllopod*.] In bot., the dilated sheathing-base of the frond of *Isoetes*, an organ analogous to the petiole of a leaf. It is hollowed into a pouch which incloses the sporangium. *J. Gay*.

phyllopodiform (fil'ō-pōd'i-tōrm), *a.* [*Gr. phyllopod* + *-form*.] A phyllopod, + *L. forma*, form.] Resembling or related to a phyllopod. *Encyc. Brit.*, VI, 650.

phyllopodous (fi-lof'ō-dūs), *a.* [*Gr. phyllopod* + *-ous*.] Same as *phyllopod*.

Phyllopus (fi-lof'ō-sūs), *n.* [*NL.* (Meyer, 1815), also *Phyllopus* (Gloger, 1834), also, appar. by a typographical error long afterward current, *Phyllopus* (Boie, 1828), and *Phyllopus* (Bonaparte, 1838); appar. so called from some deceptive similarity to leaves; < *Gr. φύλλον*, leaf, + *ψεύς*, a liar, cheat, as adj. false, < *ψεύδω*, deceive, cheat, *ψεύδωμαι*, lie.] An extensive genus of small warblers of the family *Sylviidae*, now commonly called *Phylloscopus*. See cut under *Phylloscopus*.

phylloptosis (fi-lof'ō-tō'sis), *n.* [*NL.*, < *Gr. φύλλον*, leaf, + *πτῶσις*, a falling, < *πίπτειν*, fall.] In bot., the fall of the leaf.

Phyllorhina (fil'ō-rī-nā), *n.* [*NL.*; see *phyllo-rhine*.] The typical genus of horseshoe-bats of the family *Rhinolophidae* and subfamily *Phyllorhininae*, containing about 20 species which have the leaf not lanceolate behind and not covering the nostrils. They have 1 incisor, 1 canine, 1 or 2 premolars, and 3 molars in each upper half-jaw, and 2 incisors, 1 canine, 2 premolars, and 3 molars in each under half-jaw. See cut on following page.

phyllophagous (fi-lof'a-gus), *a.* and *n.* [*NL.*, < *Gr. φύλλον*, leaf, + *φαγεῖν*, eat.] 1. A. Having a nose-leaf, as a bat; specifically, of or pertaining to the *Phyllorhininae*.

II. *n.* A bat of the subfamily *Phyllorhininae*. **Phyllorhininae** (fil'ō-rī-ni'nē), *n.* pl. [*NL.*, < *Phyllorhina* + *-inae*.] A subfamily of leaf-nosed bats of the family *Rhinolophidae*, typified by the genus *Phyllorhina*, having the toes with only two phalanges apiece, and the iliopec-

Phyllodium (a) of *Acacia heterophylla*.

Head of Leaf-nosed Bat (*Phyllorhina tridens*).

tineal spine united with a bony process of the ilium.

Phyllornis (fi-lôr'nis), *n.* [NL. (Temminck, 1829, appar. from a manuscript name of Boie's), < Gr. φύλλον, a leaf, + ὄρνις, bird.] A genus of birds, giving name to the *Phyllornithinae*; the green bulbuls; synonymous with *Chloropsis*.

Phylloscopine (fi-lôs'kô-pin), *a.* [*Phylloscopus* + -ine¹.] In ornith., resembling a species of *Phylloscopus* in the character of the bill: said of certain warblers. *H. Seebohm*.

Phylloscopus (fi-lôs'kô-pus), *n.* [NL. (Boie, 1826), < Gr. φύλλον, leaf, + σκοπεῖν, view.] An extensive genus of Old World warblers of the family *Sylviidae* and subfamily *Sylviniæ*. The type is *Sylvia trochilus*; it has twelve rectrices, yellow ax-

illaries and the greater wing-coverts with pale tips. The four British species are *P. rufus*, the chiffchaff; *P. trochilus*, the willow-warbler; *P. sibilatrix*, the wood-warbler; and *P. superciliosus*, the yellow-browed warbler. See also cut under *chiffchaff*. Compare *Phylloscopus*.

Phyllosoma (fi-lô-sô'mă), *n.* [NL., < Gr. φύλλον, leaf, + σώμα, body.] A spurious genus of crustaceans, based on certain larval forms called by Leach *Phyllosoma clavicornis*. See *glass-crab*.

Phyllosomata (fi-lô-sô'mă-tă), *n. pl.* [NL., < Gr. φύλλον, leaf, + σώμα (σωματ-), body.] A spurious group of crustaceans, based on certain larval forms; the glass-crabs. They were by Latreille made the second family of *Stomatopoda*, under the name of *Bipeltata*, composed of forms which are remarkable for their rounded shape and the transparency of their teguments. They are now known to be larval forms of macrurous decapods, as *Palaemonidae* and *Seyllaridae*. The name is retained for such larvae. See cut under *glass-crab*.

Phyllostachys (fi-lôs'tă-kis), *n.* [NL. (Siebold and Zuccarini, 1837), so called with ref. to the leaf-bearing lower branches of the inflorescence; < Gr. φύλλον, leaf, + στάχυς, spike.] A genus of arborescent grasses, of the tribe *Bambuseae* and subtribe *Arundinarieae*, characterized by the one- to four-flowered spikelets, in spikes partly included within imbricated spatheaceous bracts. They are tall grasses with cylindrical culms and prominent nodes, producing numerous dense or loose panicle spikes, and short-petioled leaves, jointed with the sheath and tessellated with little transverse veinlets. The 4 or 5 species are natives of China and Japan, resemble the bamboo, and furnish material for walking-sticks and bamboo chairs. *P. nigra* is the wanghee-cane of China, with black, nearly solid stems reaching 25 feet. *P. bambusoides* is a dwarf species from which yellowish canes are made.

Phyllosticta (fi-lô-stik'tă), *n.* [NL. (Persoon), < Gr. φύλλον, leaf, + στικτός, spotted, < στίζειν, prick, stab: see *stigma*.] A genus of parasitic fungi of the class *Sphaeropsidæ*, order *Sphaerarioides*, probably representing stages in the life-history of other forms. The perithecia, which occupy discolored spots on the leaves, are minute, opening with a terminal pore. About 350 species are recognized, which cause the well-known leaf-spot disease in many plants—*P. Oculopus* on the catalpa, *P. pririna* on the apple, *P. Rosa* on roses, *P. Ribis* on cultivated species of *Ribes*, *P. La-*

brusæ on the grape (thought to be one form of the black-rot), *P. acercola* on the maple, etc.

Phyllostoma (fi-lôs'tô-mă), *n.* [NL. (Geoffroy, 1797): see *phyllostomatous*.] A South American genus of phyllostomine bats from which the subfamily and the family each takes its name. *P. hastatum* is one of the largest bats of South America, next in size to *Vampirus spectrum*; *P. elongatum* is smaller, with a larger nose-leaf.

Phyllostomatidae (fi-lô-stô-mat'i-dê), *n. pl.* [NL., < *Phyllostoma* (-stomat-) + -idae.] A family of tropical and subtropical American bats of the emballonurine series. They have a nose-leaf or other cutaneous appendages of the snout (somewhat as in *Rhinolophidae* or horseshoe-bats, which are, however, of a different alliance (the vespertilionine), three phalanges of the middle finger, and large middle upper incisors. The eyes are comparatively large, and there is a distinct tragus (wanting in *Rhinolophidae*). The family includes the vampire-bats, some of which are true blood-suckers, as the genera *Desmodon* and *Diphylla*. The presence of variously formed appendages of the snout has often caused bats of this group to be confused with the horseshoe-bats; but the presence of a tragus alone is sufficient to distinguish the phyllostomes. Leading genera are *Mormope*, *Vampirus*, *Phyllostoma*, *Glossophaga*, *Stenoderma*, and *Desmodon*. The family is divisible into *Phyllostomatinae* and *Lobostomatinae*. Also *Phyllostomidae*.

Phyllostomatinae (fi-lô-stô-ma-ti-nê), *n. pl.* [NL., < *Phyllostoma* (-stomat-) + -inae.] A subfamily of New World bats of the family *Phyllostomatidae*, having a distinct diversiform nose-leaf and either foliaceous or warty appendages of the chin. See cuts under *Desmodontes*, *Glossophaga*, *Stenoderma*, and *Vampyrus*.

phyllostomatous (fi-lô-stô-ma-tus), *a.* [*Phyllostoma*, leaf, + στόμα, mouth.] Leaf-nosed, as a bat; belonging to the family *Phyllostomatidae*.

phyllostome (fi-lô-stôm), *n.* [*Phyllostoma*.] A leaf-nosed bat of the genus *Phyllostoma* or family *Phyllostomatidae*.

Phyllostomidae (fi-lô-stô-mi-dê), *n. pl.* [NL., < *Phyllostoma* + -idae.] Same as *Phyllostomatidae*.

phyllostomine (fi-lôs'tô-min), *a.* [*phyllostome* + -ine¹.] Leaf-nosed, as a bat; phyllostomatous or phyllostomous; of or pertaining to the *Phyllostomatinae*.

phyllostomous (fi-lôs'tô-mus), *a.* Same as *phyllostomine*.

phyllotactic (fi-lô-tak'tik), *a.* [*phyllotaxis*, after *tactic*.] Of or pertaining to phyllotaxis.

phyllotaxis (fi-lô-tak'sis), *n.* [NL.: see *phyllotaxy*.] In bot., the distribution or arrangement of leaves on the stem; also, the laws collectively which govern such distribution. Leaves are distributed so as to economize space and give a good exposure to light; and to accomplish this they are arranged in a variety of ways, which all fall under two principal modes. These are the *verticillate* or *cyclical*, in which there are two or more leaves at the same height of the stem, and the *alternate* or *spiral*, in which the leaves stand singly, one after another. In the verticillate arrangement the leaves form a succession of whorls or circles around the stem, with two, three, four, five, or more in each whorl. In the alternate or spiral arrangement the leaves are distributed singly at different heights of the stem and at equal intervals. The simplest is the two-ranked or distichous arrangement, which prevails in all grasses, in the linden, elm, etc., in which the leaves are disposed alternately on exactly opposite sides of the stem. The second leaf is therefore the furthest possible from the first, and the third is the furthest possible from the second, and consequently is exactly over the first, and so on. They thus form two vertical ranks in which the angular divergence is half the circumference, or 180°. In all cases the angular divergence may be represented by a fraction, in which the numerator designates the number of turns of the spiral that are made in passing from one leaf to the next one that is precisely vertical to it, while the denominator expresses the number of vertical rows thus formed, from which the class of phyllotaxis takes its name, as the tristicous or three-ranked ($\frac{1}{3}$), the pentastichous or five-ranked ($\frac{1}{5}$), the octostichous or eight-ranked ($\frac{1}{8}$), and even as high as a thirteen-ranked ($\frac{1}{13}$) phyllotaxis has been made out.

phyllotaxy (fi-lô-tak-si), *n.* [= F. *phyllotaxie*, < NL. *phyllotaxis*, < Gr. φύλλον, leaf, + τάξις, order: see *taxis*.] In bot., same as *phyllotaxis*.

Phyllotreta (fi-lô-trê'tă), *n.* [NL. (Chevrolat, 1834), < Gr. φύλλον, leaf, + τρητός, verbal adj. of τρεπαίνειν (√ τρε), bore.] A genus of leaf-beetles or *Chrysomelidae*, of wide distribution in temperate and tropical parts of both the Old and the New World. They are of small size, often of metallic colors, and frequently very destructive to vegetation; the larvæ are white and usually linear. *P. vittata* is the wavy-striped flea-beetle of the United States, abundant in vegetable-gardens, where it attacks cabbages and other cruciferous plants. *P. nemorum* of Europe, known as the turnip flea-beetle, has similar habits.

phylloxanthin (fi-lô-kan'thin), *n.* [= F. *phylloxanthine*; < Gr. φύλλον, leaf, + ξανθός, yellow, + -in².] Same as *xanthophyl*. See *chlorophyl*.

Phylloxera (fi-lô-sê'ră), *n.* [NL. (Fonscolombe, 1834), < Gr. φύλλον, leaf, + ξηρός, dry.]

1. A genus of plant-lice or homopterous insects of the family *Aphididae* and subfamily *Chermesinae*, usually of gall-making habits. The front wings have two discoidal veins, and the antennæ are three-jointed, the third joint being much the longest. The young larvæ have one-jointed tarsi, and all forms are destitute of honey-tubes. It is a somewhat large genus, nearly all of whose species are North American, forming galls on the leaves of the hickory in particular, but also on those of the chestnut, butternut, and oak, as *P. rileyi*, the oak-pest. One species, *P. vastatrix*, is a formidable pest of the European grape (*Vitis vinifera*). See def. 2.

2. [i. c.] A member of this genus, especially the species just named, known as the *grape-vine phylloxera* and *vine-pest*, the worst enemy of the European or *vinifera* grape. The fact that a vine-disease which had long existed in southern France was due to this insect was discovered in 1865 by Planchon, who described the insect as *P. vastatrix*. The species

Vine-pest (*Phylloxera vastatrix*).

a, healthy vine rootlet; *b*, rootlet showing nodosities; *c*, rootlet in decay (natural size); *d*, female pupa; *e*, winged female, or migrant (Hair-line show natural sizes.) (After Riley.)

had been named before (though Planchon's name holds by common consent); for in 1854 Fitch had described an American gall-louse on grape-leaves as *Pemphigus vitifoliae*, and this was identified with the European root-louse (*Phylloxera vastatrix*) by Riley in 1870. The same discovery was made by European observers in the same year. It is now established that the native country of this phylloxera is North America east of the Rocky Mountains from Canada to the Gulf of Mexico, whence it spread to Europe, and more recently to California, South Africa, New Zealand, and Australia. The insect exists under two distinct forms: the root-form, called *radicicola*, on the roots of the vine, and the gall-form, called *gallicola*, in galls on the leaves of the grape. The galls are transient, being numerous one year and scarce the next. The root-form is like the gall-form at first, but later acquires certain characteristic tubercles. The phylloxera hibernates as a winter egg above or below ground, or as a young larva on the roots. Late in the summer a generation of winged agamic females is produced; these fly abroad and spread the pest. One of the females lays from three to eight delicate eggs in or on the ground or on the under side of the leaf, and from these eggs issue the true males and females, both of which are wingless. These mate, and the female lays the winter egg. The wingless hypogaeal female may occasionally lay eggs which bring forth the sexual brood without the intervention of a winged generation, but this is exceptional. The wingless individuals spread from vine to vine, and the winged ones carry the pest from one vineyard to another. The symptoms of the disease above ground are the yellowing of the leaves the second year and the death of the vine the third year. Below ground, little knots are formed on the small fibrous roots the first year; these roots decay the next year, and the lice settle on the main roots. The third year these rot, and then the vine dies. The vines susceptible to this infestation include all the varieties of the *Vitis vinifera*, the wine-grape of Europe and California and the hothouse-grape—the most valuable of the grape family. The French government early offered a reward of 300,000 francs for a satisfactory remedy, but this prize has never been awarded. The most effectual methods of dealing with the phylloxera thus far ascertained are the underground injection of bisulphid of carbon by means of a specially contrived apparatus, the application of a watery solution of sulphocarbonate of potassium, and the grafting of the European vine upon hardy American varieties, as the Taylor, Clinton, and Jacques. See also cut under *gall-louse*, *oak-pest*, and *vine-pest*.

3. A genus of lepidopterous insects. *Rambur*, 1869.

phylloxera-mite (fi-lô-sê'ră-mit), *n.* An acarine, *Tyroglyphus phylloxerae*, one of the natural enemies of the vine-pest, formerly described in its transitional and quiescent stage as *Hoplophora arctata*. *Hoplophora* was supposed to be a genus of *Oribatida*, characterized by the hard covering or shield capable of being folded together to inclose the head and limbs, but the members of that ge-

nus are now known to belong to *Tyroglyphus*. The figures show the mite in this stage, in several positions.

phyloxerated (fi-lok-sē-rā-ted), a. [*Phylloxera* + -ate² + -ed².] Infested with phylloxera.

phyloxeric (fi-lok-sēr-ik), a. [*Phylloxera* + -ic.] Of or pertaining to the phylloxera or grape-louse. *Edinburgh Rev.*, CLXIV. 378.

Phylloxerinae (fi-lok-sē-rī-nē), n. pl. [*Phylloxera* + -inae.] A subfamily of *Aphididae*, typified by the genus *Phylloxera*; the vine-pests. See *Chermesinae*.

phyloxerize (fi-lok-sē-riz), v. t.; pret. and pp. *phyloxerized*, ppr. *phyloxerizing*. [*Phylloxera* + -ize.] To contaminate or infect with phylloxera.

phyllula (fi-lū-lā), n. [*NL.*, < *Gr.* φύλλον, leaf, + στήλη, scar.] In bot., the scar left on a branch by the fall of a leaf.

phylogenesis (fi-lō-jen'e-sis), n. [*NL.*, < *Gr.* φύλον, φυλή, a race, tribe (see *phyle*, *phylum*), + γένεσις, origin: see *genesis*.] Same as *phylogeny*.

phylogenetic (fi-lō-jē-net'ik), a. [*phylogenesis*, after *genetic*.] Same as *phylogenetic*. *Huxley*, *Anat. Invert.*, p. 43.

phylogenetically (fi-lō-jē-net'i-kal-i), adv. According to the doctrine or principle of phylogenesis; by means of phylogeny.

phylogenic (fi-lō-jen'ik), a. [*phylogeny* + -ic.] Of or pertaining to phylogeny, as distinguished from *ontogeny*. Also *phylogenetic*.

phylogeny (fi-lō-jē-ni), n. [= *F.* *phylogénie*, < *Gr.* φύλον, φυλή, a tribe, + -γένεσις, < -γενής, producing: see *geny*.] That branch of biology which attempts to deduce the ancestral history of an animal or a plant from its ontogeny or individual developmental metamorphoses; tribal history: opposed to *ontogeny*, or the origin and development of individual organisms. Also *phylogenesis*.

Phyloptera (fi-lōp'tē-rā), n. pl. [*NL.* (Packard), < *Gr.* φύλον, φυλή, a tribe, + πτερόν, wing.] A superorder of hexapod insects, including the orders *Neuroptera*, *Pseudoneuroptera*, *Orthoptera*, and *Dermatoptera*.

phylopterous (fi-lōp'tē-rus), a. Pertaining to the *Phyloptera*, or having their characters.

phylum (fi'lum), n.; pl. *phyla* (-lā). [*NL.*, < *Gr.* φύλον, φυλή, a tribe: see *phyle*.] 1. Any primary division or subkingdom of the animal or vegetable kingdom. Cuvier recognized four animal types which would now be called phyla: the *Radiata*, *Mollusca*, *Articulata*, and *Vertebrata*. Zoologists now recognize at least seven such phyla: (1) *Protozoa*, (2) *Ctenophora*, (3) *Echinodermata*, (4) *Vermes*, (5) *Arthropoda*, (6) *Mollusca*, (7) *Vertebrata*. The main branches of a phylum are called *subphyla*.

2. The graphic representation of the evolution of one or several forms of animal life by descent with modification from preëxisting ancestors, on the principle of the construction of a genealogical table or "family tree."

Phymata (fi-mā-tā), n. [*NL.* (Latreille, 1802), < *Gr.* φύμα (φυμαρ-), a tumor (< φύειν, produce, < φύω, grow), + -ατ-]. The typical genus of *Phymatidae*, having very broad curved fore femora, of raptorial character.

P. erosa or *P. wolfi* is a common North American bug of curious form and greenish-yellow color, banded and spotted with black, found on goldenrod and various other plants of meadows and gardens, preying on the insects which come to collect honey or pollen. The species abound in tropical and subtropical America.

Phymata erosa.

Phymatidae (fi-mat'i-dē), n. pl. [*NL.* (Amyot and Serville, 1843), < *Phymata* + -idae.] A family of raptorial heteropterous insects, typified by the genus *Phymata*, belonging to the coreoid series, and forming a connecting-link with the reduvioids. It contains six genera. Most of the species are tropical or subtropical.

phyogemmaria (fi'ō-jē-mā-rī-ā), n. pl. [*NL.*, < *Gr.* φύή, growth (< φύεσθαι, grow), + *L.* *gemma*, bud: see *gemmary*.] The small gonoblasts or reproductive buds of some physophoran hydrozoans, as the *Veellidae*.

phyogemmarian (fi'ō-jē-mā-rī-an), a. [*phyogemmaria* + -an.] Of or pertaining to phyogemmaria.

Physa (fi'sā), n. [*NL.*, < *Gr.* φύσα, a pair of bellows, breath, wind.] A large genus of pond-snails or fresh-water gastropods of the family *Limnæidae*, or made type of the *Physidae*, having the shell sinistral. There are many species, found on aquatic plants in ponds, as *P. fontinalis* of Europe and *P. heterostrophia* of America. The genus was named by Draparnaud in 1801.

Physalia (fi-sā'li-ā), n. [*NL.* (Lamarck, 1819), < *Gr.* φυσάλις, φυσάλλις, a bladder: see *Physalis*.] 1. The typical genus of *Physaliidae*. These oceanic hydrozoans, known as *Portuguese men-of-war*, are remarkable for their size, brilliancy, and power of urticating. There is a large oblong crested float which buoys the animal up, from which hang many processes, some of which attain a length of 12 feet or more in individuals whose float is only a few inches long. *P. atlantica* or *pelagica* is an example.

2. [*L.* c.] A member of this genus.

physalian (fi-sā'li-an), a. and n. 1. a. Pertaining to the genus *Physalia*, or having its characters.

II. n. A member of the genus *Physalia*.

Physaliidae (fis-ā-lī'i-dē), n. pl. [*NL.*, < *Physalia* + -idae.] A family of oceanic hydrozoans of the order *Siphonophora* and suborder *Physophora*, represented by the genus *Physalia*. The family is sometimes raised to the rank of a suborder. Also *Physaliæ*, *Physaliadæ*.

Physalis (fi-sā'li-s), n. [*NL.* (Linnaeus, 1737), < *Gr.* φυσάλις, prop. φυσάλλις, some plant with a bladder-like husk or calyx (prob. *Physalis Alkekengi*), < φυσάλλω, a bladder, < φυσάω, blow up, puff, < φύω, a pair of bellows: see *Physa*.] A genus of herbaceous plants, of the gamopetalous order *Solanaceæ* and tribe *Solanææ*, characterized by the five-angled, broadly bell-shaped corolla, and the five- or ten-angled bladderly fruiting calyx remotely inclosing the much smaller globose berry. There are about 30 species, mainly American, especially in Mexico (17 in the United States). They are hairy or clammy annuals or perennials, with sinuate leaves, and rather large flowers, solitary in the axils, violet, yellow, or white, often with a purple eye, and with yellow or violet anthers. Some yellow-flowered species have been cultivated for ornament. The two white-flowered species, once much cultivated in the United States for their edible berries, under the name of *strawberry-tomato* (which see), are *P. Alkekengi*, the winter-cherry of the south of Europe, with red berry and calyx (see *Alkekengi* and *bladder-herb*), and *P. Peruviana*, with yellow berries (see *Alkekengi*, winter-cherry (a) (under *cherry*), and *bladder-herb*). Among the native American species, all commonly known as ground-cherry, the berries of *P. angulata* are considered edible, and those of *P. viscosa* are strongly diuretic.

physalite (fi-sā-lit), n. [= *F.* *physalite*, < *Gr.* φυσάλις, prop. φυσάλλις, a bladder, + -ite².] A coarse, nearly opaque variety of topaz. Also called *pyrophyllite*.

Physarum (fis-ā-rā-sē-ō), n. pl. [*NL.* (Rostafinski, 1875), < *Physarum* + -aceæ.] A family of myxomycetous fungi, named from the genus *Physarum*. They have the capillitium (with the tube) delicate, reticulate, hyaline, or pellucid, and the columella is small or wanting.

Physarum (fis-ā-rum), n. [*NL.* (Persoon), < *Gr.* φυσάριον, dim. of φύσα, a pair of bellows: see *Physa*.] A genus of myxomycetous fungi, giving name to the family *Physaraceæ*. The peridium is composed of a simple or double membrane which dehisces irregularly. Sixty species are known. See *fairy ring*, under *fairy*.

Physcia (fis'i-ā), n. [*NL.* (Fries, 1825), < *Gr.* φυσκία, a sausage, a blister, < φυσάω, blow up, < φύω, a pair of bellows, breath, wind: see *Physa*.] A large genus of parmeliaceous lichens, with a foliaceous cartilaginous thallus, seutelliform apothecia, and ellipsoid, usually bilocular

brown spores. Several of the species are used in the arts for coloring, etc.

physcioid (fis'i-oid), a. [*Physcia* + -oid.] Belonging to or resembling the genus *Physcia*.

Physcomitriæ (fis'kō-mi-trī'ē-ē), n. pl. [*NL.*, < *Physcomitrium* + -æe.] A tribe of bryaceous mosses, named from the genus *Physcomitrium*. They are short soft plants with relatively large leaves and a usually corneous or gibbous capsule. The peristome is absent, or has 16 teeth.

Physcomitrium (fis-kō-mi-tri-um), n. [*NL.* (Bridel, 1826), < *Gr.* φυσκος, something inflated, + μίτριον, a little cap, dim. of μίτρα, a cap, miter: see *miter*.] A genus of mosses, giving name to the tribe *Physcomitriæ*. They are simple or sparingly branched plants, with pyriform capsule and no peristome. See cut under *mitriform*.

physema (fi-sē-mā), n. [*NL.*, < *Gr.* φύσημα, that which is blown, a bubble, < φυσάω, blow, blow up, < φύω, a pair of bellows, breath, wind: see *Physa*.] 1. A mock pearl; an empty bubble instead of pearl. *E. Phillips*, 1706.—2. The resin of the pine-tree. *E. Phillips*.—3. A swelling or puffing in any part of the body. *E. Phillips*.

Physemaria (fis-ē-mā-rī-ā), n. pl. [*NL.*, < *Gr.* φύσημα, a bubble: see *physema*.] A group formed by Haeckel for the reception of two genera of low metazoic animals, *Haliphysema* and *Gastrophysema*, which had been confounded partly with the sponges and partly with the protozoans. The validity of the group has been denied.

physemarian (fis-ē-mā-rī-an), a. and n. [*Physemaria* + -an.] 1. a. Of or pertaining to the *Physemaria*. *Huxley*.

II. n. A member of the *Physemaria*.

physeter (fi-sē'tēr), n. [= *F.* *physetère* = *Sp.* *fiseter*, *fisetera*, < *L.* *physeter*, < *Gr.* φυσήτης, a blowpipe, a kind of whale, < φυσάω, blow, < φύω, a pair of bellows, wind: see *Physa*.] 1. A sperm-whale or cachalot.

When on the surges I perceive from far
Th' Ork, Whirl-pool, Whale, or huffing *Physeter*.
Sylvestre, tr. of *Du Bartas's Weeks*, l. 5.

2. [*cap.*] [*NL.*] The typical genus of *Physeterinæ*, containing the ordinary large sperm-ceti-whales, or cachalots. The head is very large, truncate in front, and about one third of the total length

Top (A), Bottom (B), and Side (C) of Skull of Fetal Sperm-whale or Cachalot (*Physeter*). *Av*, auditory; *BO*, basioccipital; *EO*, exoccipital; *Eth*, ethmoid; *Fr*, frontal; *Ju*, jugal (displaced behind in fig. C); *Mn*, mandible; *Mx*, maxilla; *N'*, nasal opening; the bones not represented: *Pmx*, premaxillaries of right and left sides (unsymmetrical); *Pa*, parietal; *Pl*, palatine; *Pt*, pterygoid; *Sq*, squamosal; *SO*, supraoccipital; *Vo*, vomer; *BS*, basisphenoid; *AS*, alisphenoid.

of the body; the blow-hole is near the edge of the snout; and the brain-cavity is declivous. *P. macrocephalus* is the common cachalot, from which sperm-ceti is obtained. Also called *Catodon*. See also cut under *Catodonta*.

Physeteridae (fis-ē-ter'i-dē), n. pl. [*NL.*, < *Physeter* + -idae.] 1. A family of existent delphinoid *Cetacea*, of the group *Delphinoidea*, having functional teeth in the lower jaw only, and the skull strongly asymmetrical. To this family belong the sperm-whales proper (*Physeterinæ*), and such forms as the bottle-nosed whale (*Hyperoodon*).

2. In stricter use, a family of sperm-whales, typified by the genus *Physeter*, and containing the subfamilies *Physeterinæ* and *Kogiinæ*, or ordinary and pygmy sperm-whales. They have the head neither rostrate nor marginate; the snout high toward the front and projecting beyond the mouth; the skull high behind or retroscely convex; the supraoccipital bone projecting forward laterally to or beyond the ver-

tical of the temporal fossae, and the frontal bones visible above as erect triangular or retrosclyrical falciform wedges between the maxillaries and the supraoccipital. Sometimes called *Catodontia*.

Physeterinae (fi-sē-tē-rī-nē), *n. pl.* [NL., < *Physeter* + *-inae*.] 1. The typical subfamily of the *Physeteridae*, containing the genera *Physeter* and *Kogia*.—2. This subfamily restricted, by the exclusion of the genus *Kogia* as the type of a separate subfamily, to the ordinary large sperm-whales of the genus *Physeter*.

physeterine (fi-sē-tē-rīn), *a. and n.* [*physeter* + *-ine*.] 1. *a.* Like or related to a sperm-whale; or of pertaining to the *Physeterinae*.

II. *n.* A member of the *Physeterinae*.

physeteroid (fi-sē-tē-roid), *a. and n.* [*physeter* + *-oid*.] 1. *a.* Belonging to the *Physeteroidea*, or having their characters; resembling the genus *Physeter*; xiphioid.

II. *n.* A member of the *Physeteridae*, in either sense; a xiphioid. *Encyc. Brit.*, XV. 393.

Physeteroidea (fi-sē-tē-roi-dē-ō), *n. pl.* [NL., < *Physeter* + *-oidea*.] The *Physeteridae*, in sense 2, regarded as a superfamily. *Gill*.

physaharmonica (fis-hār-mon'ī-kā), *n.* [NL., < Gr. *phōa*, bellows, + NL. *harmonica*, *q. v.*] A small reed-organ originally intended to be attached to a pianoforte, so as to sustain melodies. It was invented in 1818, and was the precursor of the harmonium. See *reed-organ*.

physianthropy (fiz-i-an'thrō-pi), *n.* [*Gr. phōs*, nature (see *physic*), + *anthropos*, man.] The science which treats of the constitution and diseases of man, and of medical remedies. [Rare.]

physiatrix (fiz-i-at'riks), *n.* [*Gr. phōs*, nature, + *iatrikē* (see *physic*), medicine, prop. fem. of *iatrikōs*, for a physician: see *iatrix*.] That department of medical science which treats of the healing powers of nature.

physic (fiz'ik), *n.* [Formerly *physick*, *phisick*, < ME. *phisik*, *fisike*, natural philosophy, the science of medicine, < OF. *fisique*, *fusike*, *phisique*, natural philosophy, the science of medicine, F. *physique*, *f.*, natural philosophy (*physique*, *m.*, natural constitution, *physique*), = Sp. *física* = Pg. *física* = It. *fisica* = D. *fysika* = MHG. *fisike*, G. *fysik* = Sw. Dan. *fysik*, natural philosophy, physics; < L. *physica*, *physice*, ML. also *phísica*, *física*, natural philosophy, physics, ML. also the science of medicine, < Gr. *phōs*, *f.*, *phōs*, neut. pl., natural philosophy, physics; as adj., F. *physique* = Sp. *físico* = Pg. *físico* = It. *físico* (G. *fysisch* = Sw. Dan. *fysisk*), physical, < L. *physicus*, < Gr. *phōs*, natural; as noun, Sp. *físico* = Pg. *físico* = It. *físico*, a natural philosopher, physician, < L. *physicus*, ML. also *phísicus*, *físicus*, Gr. *phōs*, a natural philosopher, scientist; < *phōs*, nature, < *phōs*, produce, *phōs*, grow: see *be*.] 1. Natural philosophy; physics. See *physics*.

Physique is after the seconde (part of theorike),
Through which the philosophic hath fonde,
To teach sondry knouelings
Upon the bodeliche things
Of man, of beste, of herbe, of stone,
Of flashe, of foule, of everichone
That ben of bodely substance,
The nature and the substance.

Gower, Conf. Amant., vii.

Physic should contemplate that which is inherent in matter, and therefore transitory; and metaphysic that which is abstracted and fixed.

Bacon, Advancement of Learning, II. 160.

2. The science of medicine; the medical art or profession; the healing art; medicine.

Seynt Luke the Evangelist was Disciple of seynt Poul, for to lerne *Physik*; and many other.

Mandeville, Travels, p. 124.

Of late yeaeres I practised bodely *phisick* in Englande, in my lorde of Sumersettes house.

W. Turner, Spiritual Physic (1555).

3. A medicine; a drug; a remedy for disease; also, drugs collectively.

The frere with his *phisik* this folke hath enchanted,
And plasted hem so easily theif drede no synne.

Piers Plouman (B), xx. 377.

Attempre dyete was all hire *phisik*.

Chaucer, Nun's Priest's Tale, l. 18.

Throw *physic* to the dogs; I'll none of it.

Shak., Macbeth, v. 3. 47.

But in this point
All his tricks founder, and he brings his *physic*
After his patient's death: the King already
Hath married the fair lady.

Shak., Hen. VIII., III. 2. 40.

4. A medicine that purges; a cathartic; a purge.

The people used *physic* to purge themselves of humours.
Abp. Abbot, Descrip. of World.

Affliction is my *physic*; that purges, that cleanses me.
Donne, Sermons, xiv.

5. In *dyeing*, the nitromuriate of tin, or tin-spirits.—*Culver's physick*. See *Culver's physick*.—*Indian physick*. See *bowman's-root* and *Gallenia*.—*Physic garden*, a botanic garden.—Syn. 2. See *surgery*.

physic (fiz'ik), *v. t.*; pret. and pp. *physicked*, ppr. *physicking*. [*Gr. physis*, *n.*] 1. To treat with physick or medicines; cure; heal; relieve.

The labour we delight in *physics* pain.

Shak., Macbeth, II. 8. 55.

It *physics* not the sickness of a mind

Broken with griefs. Ford, Broken Heart, II. 2.

2. To use cathartics or purgatives upon; purge.—3. To mix with some oxidizing body in order to eliminate phosphorus and sulphur, as in the manufacture of iron.

He contended that sulphur could only be eliminated by two processes, "puddling" and "physicking."

Ure, Dict., IV. 474.

physical (fiz'ik-al), *a.* [Formerly also *physical*; = It. *fisicale*, < ML. *physicalis*, pertaining to physick or medicine, < L. *physica*, natural philosophy, medicine: see *physic*.] 1. Pertaining to physics or natural philosophy: as, *physical science*; *physical law*.—2. Of or pertaining to material nature; in accordance with the laws of nature; relating to what is material and perceived by the senses; specifically, pertaining to the material part or structure of an organized being, as opposed to what is mental or moral; material; bodily: as, *physical force*; *physical strength*.

Labour, then, in the *physical* world is always and solely employed in putting objects in motion; the properties of matter, the laws of nature, do the rest.

J. S. Mill, Pol. Econ., I. 1. § 2.

"Real and *physical* things," Spinoza tells us, "cannot be understood so long as their essence is unknown."

Vetich, Intro. to Descartes's Method, p. xcvi.

3. External; obvious to the senses; cognizable through a bodily or material organization: as, the *physical* characters of a mineral: opposed to *chemical*. See *mechanical*.—4. Of or pertaining to physick, or the art of curing disease or preserving health, or one who professes or practises this art; of or pertaining to a physician.

To take Tobacco thus were *physical*l,

And might perhaps doe good.

Times' Whistle (E. E. T. S.), p. 71.

I have therefore sent him just now the following letter in my *physical* capacity.

Taller, No. 246.

5. In need of physick or of a physician; sick; ill. [Rare.]

Thou look'st dull and *physical*, methinks.

Shirley, Bird in a Cage, III. 2.

Aimwell. How now? what means this apothecary's shop about thee? art *physical*?

Fowler, Sick, sick. Shirley, Witty Fair One, III. 4.

6. Of or pertaining to the drugs or medicines used in the healing art; of use in curing disease or in preserving health; medicinal; remedial.

Attalus . . . would plant and set *physical* herbs, as heliborum.

North, tr. of Plutarch, p. 739.

Is Brutus sick? and is it *physical*
To walk unbraced and suck up the humours
Of the dark morning?

Shak., J. C., II. 1. 261.

Balmes, Oiles, Medicinals and Perfumes, Sassa-parilla, and many other *physical* drugs.

Quoted in Capt. John Smith's Works, II. 74.

The tree hath a pretty *physical* smell like an apothecary's shop.

Rob. Knox (Arber's Eng. Garner, I. 338).

7. Purgative; cathartic.—*Physical abstraction*, *equation*, etc. See the nouns.—*Physical astronomy*.

See *astronomy*, I.—*Physical examination*, an examination for the determination of the presence or absence of the various signs of bodily disease.—*Physical force*.

See *Chartist*.—*Physical fraction*.—*Physical geography*, that branch of science which has for its object the comparison and generalization of geographical facts. It differs chiefly from geology in that it regards the present rather than the past condition of the earth, but many authors include in their text-books of physical geography more or less of that which is generally considered as belonging to geology. Physical geography may be subdivided into various branches, of which the most important are—*orography*, the study of mountain-chains, and in general of the relief of the surface, in which branch geology can only with difficulty be separated from geography; *thalassography*, the study of the ocean, its outline, depths, currents, temperature, salinity, and the nature and distribution of animal and vegetable life on and beneath its surface; *hydrography*, the study of the river-systems, rivers, and lakes; *climatology*, the practical side of meteorology, or the study of the climatic conditions of various parts of the earth's surface; *botanical geography*, the study of the geographical distribution of plants; *zoological geography*, the distribution of animal life; and, finally, *ethnology* and *anthropology*, the study of the races of man and their distributions, and their manners and customs. The last two branches, however, are special sciences, and are rarely treated, except in the most succinct manner, in the text-books of physical geography.—*Physical geology*, the study of the geological changes which have taken place on the earth's surface, and of the causes by which these

events have been brought about; geology separated, as far as possible, from paleontology, or from any consideration of the order of succession and the nature of organic life upon the globe, and of the classification of the stratified formations in accordance therewith.—*Physical horizon*, *influx*, *mineralogy*, *necessity*, *optics*. See the nouns.—*Physical influence*. Same as *physical influx*.—*Physical partition*, a partition by which the parts are really separated; real partition: opposed to *ideal partition*.—*Physical perfection*, *possibility*, *power*. See the nouns.—*Physical signs*, such features of disease as are directly appreciable by the examiner and are not the expression by the patient of his own feelings, as those elicited by palpation, inspection, auscultation, percussion, etc.—*Physical truth*, the harmony of thought with the phenomena of outward experience.—*Physical whole*, a whole composed of matter and form.—Syn. 2. *Corporal*, *corporeal*, etc. See *bodily*.—3. *Chemical*, etc. See *mechanical*.

physicist (fiz'ik-ist), *n.* [*Gr. physis*, *n.*] 1. One who maintains that man's intellectual and moral nature depends on and results from his physical constitution, or that human thought and action are determined by physical organization.

physically (fiz'ik-al-i), *adv.* 1. In a physical manner; according to nature; according to physics or natural philosophy; not intellectually or morally.

I am not now treating *physically* of light or colours.

Locke.

2. According to the art or rules of medicine.

And for *physic*, he [Lord Bacon] did indeed live *physically*, but not miserably.

Rawley, in Spedding's Bacon, I. 55.

He that lives *physically* must live miserably. G. Cheyne.

physicalness (fiz'ik-al-nes), *n.* The state of being physical. Worcester.

physician (fiz'ish'an), *n.* [Early mod. E. also *physicion*, *phiscion*, *physitan*, *physition*, *phision*; < ME. *fiscien*, *fiscien*, *fiscion*, *fiscian*, *fyscian*, *phiscien*, *phiscien*, etc., < OF. *fiscien*, *fiscian*, *fusien*, etc., < *phiscien*, *phiscien*, a natural philosopher, also and usually a medical man, a physician (F. *physicien*, a natural philosopher), = Pr. *phiscian* = It. *fisciano*, a medical man, < ML. as if **physicianus*, < L. *physicus* (> It. *físico* = Sp. *físico* = Pg. *físico*), a natural philosopher, a physician, ML. *phísica*, physics, medicine, *physic*: see *physic*.] 1. One who practises the art of healing disease and of preserving health; a prescriber of remedies for sickness and disease; specifically, a person licensed by some competent authority, such as a medical college, to treat diseases and prescribe remedies for them; a doctor; a medical man. The *physician* as a prescriber of remedies is distinguished from the *pharmacist*, whose business is the compounding or preparing of medicines, and from the *surgeon*, who performs remedial operations. The last, however, often follows the practice of medicine, as does the licensed apothecary in England.

Seint Poul him self was there a *Phiscien*, for to kepen mennes Bodies in heile, before he was converted; and aftra that he was *Phiscien* of Soules.

Mandeville, Travels, p. 123.

It sometimes falls out that he that visits a sick Man is forced to be a Fighter instead of a *Physician*.

N. Bailey, tr. of Colloquies of Erasmus, I. 324.

He was less directly embarrassing to the two *physicians* than to the surgeon-apothecaries who attended paupers by contract.

George Eliot, Middlemarch, xviii.

2. A student of physics; a naturalist; a physicist; specifically, in mediæval universities, a student of the Aristotelian physics.

physiciancy (fiz'ish'an-si), *n.*; pl. *physiciancies* (-siz). [*Gr. physis*, *n.*] Appointment as physician; the post or office of physician.

He had in the previous year put himself forward as a candidate for a *physiciancy* to St. George's Hospital.

Lancet, No. 3423, p. 711.

physicianed (fiz'ish'an-d), *a.* [*Gr. physis*, *n.*] Made a physician; educated or licensed as a physician. [Rare.]

One Dr. Lucas, a *physicianed* apothecary. H. Walpole.

physicianly (fiz'ish'an-li), *a.* [*Gr. physis*, *n.*] Pertaining to or characteristic of a physician.

Real knowledge of man and of men, of the causes and courses of human failure, . . . is indescribably rich in *physicianly* force.

Contemporary Rev., LIII. 508.

physicianship (fiz'ish'an-ship), *n.* [*Gr. physis*, *n.*] The post or office of physician. *Lancet*, No. 3543, p. 941.

physicism (fiz'is-izm), *n.* [*Gr. physis*, *n.*] Belief in the material or physical as opposed to the spiritual. [Rare.]

In the progress of the species from savagery to advanced civilization, anthropomorphism grows into theology, while *physicism* (if I may so call it) develops into science.

Huxley, Lay Sermons, p. 163.

physicist (fiz'is-ist), *n.* [*Gr. physis*, *n.*] 1. A student of physics; a natural philosopher.

see, write.] A word of rather variable meaning, but, as most generally used, nearly or quite the equivalent of *physical geography* (which see, under *physical*). Also called *geophysics*.

This term [*physical geography*] as here used is synonymous with *Physiography*, which has been proposed in its stead. *Geikie*, Elem. Lessons in Phys. Geog., p. 3, note. [For the use of the word *physiography* by Huxley, as meaning a peculiar kind of physical geography, see the following quotation.]

The attempt to convey scientific conceptions without the appeal to observation which can alone give such conceptions firmness and reality appears to me to be in direct antagonism to the fundamental principles of scientific education. *Physiography* has very little to do with this sort of "Physical Geography."

Huxley, *Physiography* (2d ed.), vii.]

Microscopic physiography. Same as *lithology* or *petrography*: a term thus far used only in the translation from the German of an important work by Rosenbusch, bearing the title "Mikroskopische Physiographie."

physiolatry (fiz-i-ol'ā-trī), *n.* [*Gr.* *φῆσις*, nature, + *λατρεία*, worship.] The worship of the powers or agencies of nature; nature-worship.

A pantheistic philosophy based on the *physiolatry* of the Vedas. *M. Williams*.

physiologist (fiz-i-ol'ō-jēr), *n.* [*Gr.* *φῆσις*, nature, + *λογία*, *logia*, study.] A physical philosopher, or philosopher of the Ionic school. See *Ionic*.

The generality of the old *physiologists* before Aristotle and Democritus did pursue the atomical way, which is to resolve the corporeal phenomena, not into forms, qualities, and species, but into figures, motions, and phanices. *Cudworth*, Intellectual System, p. 171.

The earliest philosophers or *physiologists* had occupied themselves chiefly with what we may call cosmology. *Encyc. Brit.*, XVIII. 792.

physiologic (fiz'i-ō-loj'ik), *a.* [= *F.* *physiologicus* = *Sp.* *physiologicus* = *Pg.* *physiologicus* = *It.* *fisilogico*, < *L.* *physiologicus*, < *Gr.* *φῆσις*, nature, + *λογία*, *logia*, study.] Of or pertaining to physiology.

In early society, incest laws do not recognize *physiologic* conditions, but only social conditions. *J. W. Powell*, Science, IV. 472.

No method is more alluring in *physiologic* studies than this of accurate measurement and description. *N. A. Rev.*, CXXVI. 558.

physiological (fiz'i-ō-loj'i-kal), *a.* [*Gr.* *φῆσις*, nature, + *λογία*, *logia*, study.] Of a *physiologic* character.

The Mosalcal philosophy in the *physiological* part thereof is the same with the Cartesian. *Dr. H. More*, Def. of Philosophic Cabbala, App. I. § 8.

The most characteristic *physiological* peculiarity of the plant is its power of manufacturing protein from chemical compounds of a less complex nature. *Huxley*, Anat. Invert., p. 47.

Physiological antidote, an antidote of opposite pharmacodynamic properties to the poison.—*Physiological botany*, chemistry, illusion, optics, etc. See the nouns.—**Physiological test**, the test for a poison of giving the suspected substance to some living animal.—**Physiological time**, the entire interval of time between an impression on an organ of sense and the muscular reaction; reaction-time.

physiologically (fiz'i-ō-loj'i-kal-i), *adv.* According to the principles of physiology; as regards physiology.

physiologist (fiz-i-ol'ō-jist), *n.* [= *F.* *physiologiste* = *Sp.* *physiologista* = *Pg.* *physiologista*; as *physiolog-y* + *-ist*.] One who is versed in physiology.

physiologize (fiz-i-ol'ō-jīz), *v. i.*; pret. and pp. *physiologized*, ppr. *physiologizing*. [*Gr.* *φῆσις*, nature, + *λογία*, *logia*, study.] To reason or discourse of the nature of things.

They who first theologized did *physiologize* after this manner. *Cudworth*, Intellectual System, p. 120.

physiology (fiz-i-ol'ō-jī), *n.* [Formerly also *physiologie*; < *F.* *physiologie* = *Sp.* *physiologia* = *Pg.* *physiologia* = *It.* *fisilogia*, < *L.* *physiologia*, < *Gr.* *φῆσις*, nature, + *λογία*, *logia*, study.] A natural philosophy, < *φῆσις*, nature (see *physic*), + *-λογία*, < *λέγω*, speak: see *-ology*.] 1. Natural philosophy.

The unparalleled Des Cartes hath unridled their dark *physiology* and to wonder solv'd their motions. *Glennville*, Vanity of Dogmatizing, xviii.

2. The sum of scientific knowledge concerning the functions of living things. The subject comprises two grand divisions, namely *animal* and *vegetable physiology*; when specially applied to the functions in man, the term *human physiology* is used.

Physiology is the science of vital power. *Huxley and Youmans*, Physiol., § 370.

physiomedicalism (fiz'i-ō-med'i-kal-izm), *n.* [*Gr.* *φῆσις*, nature, + *E.* *medical* + *-ism*.] The doctrines or practices of the physiomedicalists. **physiomedicalist** (fiz'i-ō-med'i-kal-ist), *n.* [*Gr.* *φῆσις*, nature, + *E.* *medical* + *-ist*.] An adherent or practitioner of that school of medicine which, in its treatment of disease, uses

only botanic remedies, discarding those which are poisonous.

physionotrace (fiz-i-on'ō-trās), *n.* [*F.*, < *physiōno(mie)*, physiognomy, + *trace*, trace.] An instrument for tracing the outlines of a face.

Chrétien, in 1786, had invented an instrument which he denominated the *physionotrace*, by which the profile outline of a face could be taken with mathematical precision, both as to figure and dimensions. *The Century*, XXVIII. 779.

physiophilosophy (fiz'i-ō-fil'os'ō-fi), *n.* [*Gr.* *φῆσις*, nature, + *φιλοσοφία*, philosophy.] The philosophy of nature.

physiophyly (fiz-i-ōf'i-li), *n.* [*Gr.* *φῆσις*, nature, + *φυλόν*, a tribe: see *phylum*, *phyle*.] The tribal history of function; that branch of phylogeny which treats of function alone, without reference to form, the tribal history or phylogeny of which latter Haeckel calls *morphophyly*.

Physiophyly, . . . the tribal history of the functions, or the history of the paleontological development of the vital activities, has, in the case of most organisms, not yet been examined. In the case of man, a large part of the history of culture falls under this head. *Haeckel*, Evol. of Man (trans.), I. 24.

physiosophic (fiz'i-ō-sōf'ik), *a.* [*Gr.* *φῆσις*, nature, + *-ία*, pertaining to.] Pertaining to physiosophy.

physiosophy (fiz-i-ōs'ō-fi), *n.* [*Gr.* *φῆσις*, nature, + *σοφία*, wisdom.] A doctrine concerning the secrets of nature.

Fanciful ideas of the vaguest kind of *physiosophy*. *Gunther*, Encyc. Brit., XX. 437.

physiotypy (fiz'i-ō-tī-pi), *n.* [*Gr.* *φῆσις*, nature, + *τύπος*, type.] Same as *nature-printing*.

Physiphora (fiz-zif'ō-rā), *n.* Same as *Physophora*.

physique (fiz-zēk'), *n.* [*F.* *physique*, *m.*, natural constitution, physique: see *physic*.] Physical structure or organization, especially of a human being.

Out of this strong, ancient, and far-spreading root of domestic plety the powerful *physique* and the healthy mental and moral nature of the Roman grew. *Faiths of the World*, p. 191.

physitheism (fiz'i-thē-izm), *n.* [*Gr.* *φῆσις*, nature, + *θεός*, God, + *-ism*.] The attribution of physical or bodily form to the Deity.

physitheistic (fiz'i-thē-ist'ik), *a.* [*Gr.* *φῆσις*, nature, + *θεός*, God, + *-ist-ic*.] Of or pertaining to physitheism. *Pop. Sci. Mo.*, XXXVI. 208.

physiurgic (fiz-i-ēr'jik), *a.* [*Gr.* *φῆσις*, nature, + *εργον*, work. Cf. *theurgic*.] See the quotation.

Thus Natural History and Natural Philosophy are respectively represented by *Physiurgic* Somatology and *Anthropurgic* Somatology: the one signifying the science of bodies, in so far as operated upon in the course of nature, without the intervention of man; the other, the science of bodies so far as man, by his knowledge of the convertible powers of nature, is able to operate upon them. *Bourring*, in Int. to Bentham's Works, § 6.

physiomy (fiz'nō-mi), *n.* Same as *physiognomy*.

Physocalymma (fiz'ō-kā-lim'ā), *n.* [*NL.* (Pohl, 1827), < *Gr.* *φύσα*, a bladder, + *κάλυμμα*, a covering (calyx): see *Calymma*.] A genus of poly-petalous trees of the order *Lythraceæ* and tribe *Lythreæ*, characterized by the change of the four-celled ovary in fruit into a small one-celled and many-seeded thin-walled capsule, inclosed within the enlarged bladderlike calyx. The only species, *P. floribundum*, is a Brazilian tree with opposite oblong roughish leaves and ample terminal loose-flowered purple panicles. Each flower is composed of two broad concave bracts which at first inclose the roundish flower-bud, an eight-toothed and bell-shaped purple calyx, eight wavy petals, and a row of twenty-four long stamens bearing curved versatile anthers. The beautifully striped rose-colored wood is the *tulip-wood* of English cabinet-makers, also known as *Brazilian pink-wood*. See *tulip-wood*.

physocèle (fiz'ō-sēl), *n.* [*Gr.* *φύσα*, breath, wind, air-bubble, + *κύλη*, tumor.] A hernia containing gas.

physoclist (fiz'ō-klist), *n.* and *a.* I. *n.* A member of the *Physoclisti*.

II. *a.* Same as *physoclistous*.

Physoclisti (fiz'ō-klist'i), *n. pl.* [*NL.*, pl. of *physoclistus*: see *physoclistous*.] In *ichth.*, a group of teleost fishes having the duct between the air-bladder and the intestine closed: opposed to *Physostomi*. It includes the acanthopterygian fishes, and also the syngnathous fishes, the subbrachial and jugular malacopecterygian, the lophobranchials, and the plectognaths. In Cope's system of classification it is a primary group of actinopterygian fishes without a pneumatic duct, with the parietal bones separated by the supraccipital, and the ventrals thoracic or jugular and without basilar segments.

physoclistic (fiz'ō-klist'ik), *a.* Same as *physoclistous*. *Encyc. Brit.*, XVI. 671.

physoclistous (fiz'ō-klist'us), *a.* [*NL.*, *physoclistus*, < *Gr.* *φύσα*, bellows, + *κλειστός*, that may be closed, < *κλείω*, close: see *close*.] Hav-

ing no air-bladder, or having the air-bladder closed, as a fish; belonging to the *Physoclisti*, or having their characters.

Physograda (fiz-sog'rā-dā), *n. pl.* [*NL.*, neut. pl. of *physogradus*: see *physograde*.] 1. In De Blainville's classification of acalaphs, a group of oceanic hydrozoans, provided with hollow vesicular organs which buoy them up and enable them to float.—2. In a restricted sense, an order or suborder of siphonophorous hydrozoans, represented by such forms as the *Physaliidæ*: distinguished from the *Chondrograda*, as *Velellidæ*. See cut under *Physalia*.

physograde (fiz'sō-grād), *a.* and *n.* [*NL.* *physogradus*, < *Gr.* *φύσα*, bellows, + *L.* *gradi*, step, walk, go.] I. *a.* Moving by means of a vesicular float or buoy; of or pertaining to the *Physograda*.

II. *n.* A member of the *Physograda*.

physohematometra, **physohæmatometra** (fiz-sō-hem'a-tō-mē'trā), *n.* [*NL.*, < *Gr.* *φύσα*, a bubble, + *αἷμα* (-r-), blood, + *μήτρα*, uterus.] The presence of blood and gas in the uterus.

physohydrometra (fiz-sō-hi-drō-mē'trā), *n.* [*NL.*, < *Gr.* *φύσα*, a bubble, + *ὕδωρ* (hōp-), water, + *μήτρα*, uterus: see *hydrometra*.] The presence of gas and serum in the uterus.

physoid (fiz'soid), *a.* [*NL.* *Physa*, *q. v.*, + *Gr.* *ειδός*, form.] Of or relating to the *Physidæ*; like the *Physidæ*, although not of that family; physiform.

Physolobium (fiz-sō-lō-bi-um), *n.* [*NL.* (Huegel, 1837), < *Gr.* *φύσα*, bellows, + *λόβος*, a pod, lobe: see *lobe*.] A section of the plant-genus *Kennedya*. See *bladder-pod*.

physometra (fiz-sō-mē'trā), *n.* [*NL.*, < *Gr.* *φύσα*, a bubble, + *μήτρα*, uterus.] The presence of gas in the uterus.

Physomycetes (fiz'sō-mī-sē'tēz), *n. pl.* [*NL.*, < *Gr.* *φύσα*, bellows, + *μύκης*, *pl.* *μύκητες*, a fungus, mushroom.] A small section of *Fungi*, characterized by the total absence of a hymenium, and by the vesicular fruit inclosing an indefinite number or mass of sporidia. Also called *Vesiculiferi*.

Physonota (fiz-sō-nō'tā), *n.* [*NL.* (Bohemian, 1854), < *Gr.* *φύσα*, bellows, + *νότος*, back.] An American genus of leaf-beetles or chrysomelids, with about 50 species, characterized by having the third antennal joint longer than the second, and the fourth equal to the third. *P. unipunctata*, var. *quinquepunctata*, is the so-called five-spotted tortoise-beetle, whose larva has 20 smooth spines and feeds on the leaves of sunflowers.

Five-spotted Tortoise beetle (*Physonota unipunctata*, var. *quinquepunctata*). *a.* larva; *b.* beetle. (Lines show natural sizes.)

Physophora (fiz-sōf'ō-rā), *n.* [*NL.*, < *Gr.* *φύσα*, bellows, + *-φόρος*, < *φέρω* = *E.* bear.] 1. The typical genus of *Physophoridae*, containing such species as *P. hydrostatica*, which float by numerous vesicular organs.—2. In *entom.*, a genus of dipterous insects. Also *Physiphora*. *Fallen*, 1810.—3. [Used as a plural.] Same as *Physophoræ*.

Physophoræ (fiz-sōf'ō-rē), *n. pl.* [*NL.*, pl. of *Physophora*.] An order of siphonophorous oceanic hydrozoans, having the proximal end modified into a float or pneumatophore (as distinguished from a somatocyst). They are mostly monocious, and are sometimes provided with neotocytes, and the polypites are united by an unbranched or little-branched cenosarc, of filiform, globular, or discoidal shape. The group is contrasted with *Calycophoræ*, as one of two orders of *Siphonophora*, and contains a number of families, as *Physophoridae* and others. Also written *Physophora*, *Physophorida*, *Physophoræ*. See cuts under *Hydranth*, *hydrorhizium*, and *Hydrozoa*.

physophoran (fiz-sōf'ō-ran), *a.* and *n.* [*Physophora* + *-an*.] I. *a.* Of or pertaining to the *Physophoræ*.

II. *n.* A member of the order *Physophoræ*; a physophorous hydrozoan.

physophora (fiz'sō-fōr), *n.* [*NL.* *Physophora*.] Same as *physophoran*.

Physophorida (fiz-sō-fōr'i-dā), *n. pl.* [*NL.*, < *Physophora* + *-ida*.] Same as *Physophoræ*.

Physophoridae (fiz-sō-fōr'i-dē), *n. pl.* [*NL.*, < *Physophora* + *-idae*.] 1. A family of physophorous hydrozoans, represented by the genus *Physophora*; one of several families of the order *Physophoræ*. See cuts under *hydranth*, *hydrorhizium*, and *Hydrozoa*.—2. Same as *Physophoræ*.

physophorous (fiz-sōf'ō-rus), *a.* [*Physophora* + *-ous*.] Same as *physophoran*.

physopod (fī-sō-pod), *a.* and *n.* [*< Gr. φυσά, bellows, + ποδς (pod-) = E. foot.*] *I. a.* Having a sort of sucker on the feet; specifically, of or pertaining to the *Physopoda*.

II. n. A member of the *Physopoda*.

Physopoda (fī-sop'ō-dā), *n. pl.* [NL., *< Gr. φυσά, bellows, + ποδς (pod-) = E. foot.*] Same as *Thysanoptera*.

Physospermum (fī-sō-spér'mum), *n.* [NL. (Cusson, 1782), so called with reference to the looseness of the outer coat of the young fruit; *< Gr. φυσά, bellows, + σπέρμα, seed: see sperm.*] A genus of umbelliferous plants of the tribe *Ammineae* and subtribe *Smyrniaceae*, distinguished by the large oil-tubes solitary in their channels, and the very slight ridges on the ovate or compressed fruit. There are about 5 species, natives of Europe and the Caucasus. They are smooth perennials, with ample and minutely dissected leaves, and compound umbels of many white flowers with many linear bracts and bractlets. Several species are cultivated for ornament, under the name *bladder-plant*.

Physostegia (fī-sō-stē-jī-ā), *n.* [NL. (Bentham, 1829), so called with reference to the enlarged and somewhat inflated fruiting calyx; *< Gr. φυσά, bellows, + στέγη, a roof or covering.*] A genus of erect herbs of the order *Labiatae*, the mint family, belonging to the tribe *Stachydeae* and subtribe *Melitteae*, and characterized by the broad and five-toothed calyx, long-exserted ample corolla-tube, parallel anther-cells, and two-flowered spiked verticillasters. There are 3 species, all North American, called *false dragon's-head* (which see, under *dragon's-head*). They are tall and smooth perennials, with narrow toothed leaves, and showy sessile pink or flesh-colored flowers, forming one or many dense or interrupted terminal spikes. *P. Virginiana*, the variable eastern species, is often cultivated in gardens.

Physostigma (fī-sō-stig'mā), *n.* [NL. (Balfour, 1861), so called with reference to the bladder-like apex of the style; *< Gr. φυσά, bellows, + στίγμα, stigma.*] A genus of leguminous plants of the tribe *Phaseoleae* and subtribe *Euphaseoleae*, characterized by the spiral keel and by the continuation of the bearded style above the stigma into a large and oblique hollow hood. The only species, *P. venenosum*, is a high-climbing vine of tropical Africa, with leaves of three large leaflets, and axillary pendulous racemes of purplish flowers, followed by long dark-brown compressed pods, each with two or three thick oblong highly poisonous seeds of valuable medicinal powers. See *Calabar bean* (under *bean*), *chop-nut*, *eserine*, and *physostigmine*.

physostigmine (fī-sō-stig'mīn), *n.* [*< Physostigma + -ine.*] An alkaloid constituting the active principle of the Calabar bean. It is highly poisonous, and when separated by the usual process presents the appearance of a brownish-yellow amorphous mass. It is tasteless, being only slightly soluble in water.

physostomatous (fī-sō-stom'ā-tus), *a.* Same as *physostomous*.

physostome (fī-sō-stōm), *a.* and *n.* *I. a.* Same as *physostomous*.

II. n. A physostomous fish.

Physostomus (fī-sos'tō-mī), *n. pl.* [NL., *pl. of physostomus: see physostomous.*] An order of teleost fishes established by J. Müller in 1845, containing those whose air-bladder, when present, is connected with the alimentary canal by an air-duct, the bladder thus having an outlet or mouth: contrasted with *Physoclisti*. The order was divided by Müller into 2 suborders and 14 families. It includes most of the abdominal malacopterygian fishes of the older authors. In Cope's system of classification it is ranked as a primary group of actinopterygian fishes, with the basilar segments of the ventral fin rudimental and abdominal, the parietal bones usually united, branchiostegal rays developed, and the pneumatic duct open. It includes, in addition to the forms recognized by Müller, certain ganoids, as the *Amiidae* (order *Halecomorphi*) and *Lepidosteidae* (order *Ginglymodi*). See cuts under *Percopsis*, *pike*, and *Esoc*.

physostomous (fī-sos'tō-mus), *a.* [*< NL. physostomus, < Gr. φυσά, bellows, + στόμα, mouth.*] Having the mouth and air-bladder connected by an air-duct, as a fish; specifically, of or pertaining to the *Physostomi*. Also *physostomatous*, *physostome*.

physy (fīz'ī), *n.* [A corrupt form for *fusee* (simulating *Gr. φυσά, a bellows* f).] A fusee.

Some watches . . . are made with four wheels, others with five; . . . some have strings and *physies*, and others none. Locke, *Human Understanding*, III. vi. § 39.

phytalbumose (fī-tal'bū-mōs), *n.* [*< Gr. φυτόν, plant, + album(en) + -ose.*] A form of albumen occurring in plants: so named to distinguish it from similar forms occurring in animals.

Phytastrea (fī-tas'trā), *n. pl.* [NL., *< Gr. φυτόν, plant, + αστήρ, star.*] In Lankester's classification, one of two orders of *Ophiuroidea*, contrasted with *Ophiastrea*.

Phytelephantinae (fī-tel'ē-fan-tī-nē), *n. pl.* [NL. (Drude, 1887), *< Phytelephas (-elephant-) + -inae.*] A tribe of palms, distinguished by the

confluence of the ovaries in fruit into a globose syncarp, and including the two genera *Phytelephas* and *Nipa*, both very different from all other palms and from each other, but alike in their growth from partly or wholly prostrate stems, their corneous albumen, and their flowers of one or both sexes crowded upon long drooping spadices resembling catkins.

Phytelephas (fī-tel'ē-fas), *n.* [NL. (Ruiz and Pavon, 1798), so called with reference to the hard albumen, called vegetable ivory; *< Gr. φυτόν, plant, + ἑλέφας, ivory: see elephant.*] An aberrant genus of palms, type of the tribe *Phytelephantinae*, and from its singularity long separated as an order *Phytelephantaceae* (Martius, 1835). It is unlike all other palms in its numerous stemless, filiform stigmas, and unbranched spadices, and in the elongated petals of its female flower. There are 3 species, natives of Peru and the United States of Colombia, known from the nut as *ivory-palm*. They are dioecious trees growing in dense and extensive groves, with a short robust trunk sometimes 6 feet high from a creeping and prostrate base often 20 feet long. They bear a crown of a dozen or more pinnate leaves, reaching 18 or 20 feet in length, resembling those of the cocconut-palm, and used by the natives in roofing. The male trees are taller, and bear a fleshy and pendulous cylindrical fragrant spadix about 4 feet long, crowded with small flowers between minute bracts, each with about thirty-six stamens, and

Fruiting Female Plant of Vegetable Ivory (*Phytelephas macrocarpa*).

exhaling a penetrating odor of almonds. The female tree produces a shorter and erect spadix, six or eight at once, each with six or seven pure-white flowers, which are far the largest among palms, with from five to ten fleshy petals (each from 2 to 3 inches long), three papery triangular sepals, numerous imperfect stamens, and a roundish ovary with from four to nine furrows, carpels, and stigmas, becoming a drupe in fruit. The mass of six or seven drupes from one spadix consolidates into a heavy pendulous globose syncarp, or multiple fruit (from its size known locally as *negro's-head*), covered with hard woody prominence. Each drupe contains about six large seeds; these, when young, are filled with a clear liquid, which is sought by travelers as a drink, and solidifies first into a pulp eagerly eaten by animals, and later into the hardest albumen known, whence its name *ivory-nut*. This again softens in germinating, turning into a milk and pulp, which feeds the young plant until it has grown for a year or more.

Phyteuma (fī-tū-mā), *n.* [NL. (Linnaeus, 1737), *< L. phyteuma, < Gr. φύτευμα, a kind of plant, perhaps Reseda phyteuma; a particular use of φύτευμα, anything planted, < φύτεναι, plant, < φυτόν, a plant: see phytom.*] A genus of ornamental plants of the order *Campanulaceae*, distinguished by a five-parted corolla with narrow spreading or long cohering lobes, and a fruit closed at the apex and dehiscence laterally. There are about 50 species, natives of Europe, the Mediterranean region, and the temperate parts of Asia. They are perennial herbs, with long-stalked radical leaves, and small alternate stem-leaves. The flowers are commonly blue, sessile, and handsome, often in a dense head or spike. Some species are well known in cultivation, especially as hardy ornaments in rockwork, by the name of *horned rampion* (which see, under *rampion*), and often under a former generic name, *Rapunculus*.

phytiform (fī-tī-fōrm), *a.* [*< Gr. φυτόν, plant, + L. forma, form.*] Resembling a plant.

phytihanagan (fī-tif'ā-gan), *a.* and *n.* See *phytophagan*.

phytivorous (fī-tiv'ō-rus), *a.* [*< Gr. φυτόν, plant, + L. vorare, devour.*] Feeding on plants or herbage; herbivorous; phytophagous. Ray, *Works of Creation*.

phytobiology (fī-tō-bī-ol'ō-jī), *n.* [*< Gr. φυτόν, plant, + E. biology.*] That branch of biology which deals with plants; vegetable biology. *Athenæum*, No. 3253, p. 278.

phytobranchiate (fī-tō-brang'ki-āt), *a.* [*< Gr. φυτόν, plant, + βράγχια, gills.*] Having leafy

gills; noting a division of isopods, in distinction from *pteryobranchiate*.

phytochemical (fī-tō-kem'i-kal), *a.* [*< Gr. φυτόν, plant, + E. chemical.*] Pertaining or relating to phytochemistry.

phytochemistry (fī-tō-kem'is-trī), *n.* [*< Gr. φυτόν, plant, + E. chemistry.*] Vegetable chemistry; the chemistry of plants.

phytochimy (fī-tō-kim-i), *n.* [*< F. phytochimie, < Gr. φυτόν, plant, + F. chimie, chemistry: see alchemy, chemist.*] Same as *phytochemistry*.

phytochlore (fī-tō-klōr), *n.* [*< Gr. φυτόν, plant, + χλωρός, pale-green: see chlorin. Cf. chlorophyll.*] In bot., same as *chlorophyll*.

Phytocoridae (fī-tō-kor'i-dē), *n. pl.* [NL. (Fieber, 1861), *< Phytocoris + -idae.*] A very large family of heteropterous insects, typified by the genus *Phytocoris*, and collectively called *plant-bugs*. They are mostly of small size, and are extremely variable in form: the base of the wings has usually a looped nervure; and the ocelli are extremely minute or wanting. They are divided into more than a dozen subfamilies, among them being the bugs commonly known as *Capsidini* or *Capsidina*.

Phytocoris (fī-tōk'ō-ris), *n.* [NL. (Fallen, 1814), *< Gr. φυτόν, plant, + κόρυς, bug.*] A genus of plant-bugs, typical of the family *Phytocoridae*, having the beak extending to the middle of the abdomen, and the sides of the head angular. There are about 20 species, 7 of which inhabit North America. *P. tripustulatus* is blackish, spotted with orange, and found on nettles.

Phytocoris linearis. (Line shows natural size.)

Phytocrene (fī-tō-kre'-nē), *n.* [NL. (Wallich, 1832), so called with reference to a copious watery sap which flows from the porous wood when pierced, and is used as a drink; *< Gr. φυτόν, plant, + κρήνη, fountain.*] A genus of polypetalous shrubs of the order *Olacineae*, type of the tribe *Phytocreneae*, characterized by capitate flowers with filaments longer than the anthers. The 8 species are natives of tropical Asia and Africa. They are high climbing and twining shrubs, with alternate leaves, and small dioecious hairy flowers, the staminate heads the size of peas and densely crowded in elongated panicles, the pistillate heads solitary and reaching the size of the human head, followed by a globular mass of hairy or spiny drupes with resinous stones. *P. gigantea*, with white flowers, from Martaban in Burma, is cultivated under glass by the names of *water-vine*, *vegetable fountain*, and *East Indian fountain-tree*.

Phytocreneae (fī-tō-kre'-nē-ē), *n. pl.* [NL. (Arnott, 1834), *< Phytocrene + -ae.*] A tribe of polypetalous plants of the order *Olacineae*, characterized by equal and alternate stamens and petals, and broad leaf-like or fleshy cotyledons. It includes 11 genera and about 37 species, all tropical climbers, of which *Phytocrene* is the type.

phytogenesis (fī-tō-jen'e-sis), *n.* [NL., *< Gr. φυτόν, plant, + γένεσις, origin: see genesis.*] The doctrine of the generation of plants.

phytogenetic (fī-tō-jē-net'ik), *a.* [*< phytogenesis, after genetic.*] Of or pertaining to phytogeny; of vegetable or plant origin.

phytogenetical (fī-tō-jē-net'i-kal), *a.* [*< phytogenetic + -al.*] Same as *phytogenetic*.

The morphological and *phytogenetical* study of the higher plants. Pop. Sci. Mo., XXXIII. 479.

phytogeny (fī-toj'e-nī), *n.* [*< Gr. φυτόν, plant, + γένεσις, -γενεσις, producing: see -geny.*] Same as *phytogenesis*.

phytogeographer (fī-tō-jē-og'ra-fēr), *n.* [*< phytogeograph-y + -er.*] One who is versed in phytogeography. *Nature*, XL. 98.

phytogeographic (fī-tō-jē-ō-graf'ik), *a.* [*< phytogeograph-y + -ic.*] Of or pertaining to phytogeography.

Islands may be arranged, . . . for *phytogeographic* purposes in three categories, according to their endemic element. *Nature*, XXXIII. 338.

phytogeographical (fī-tō-jē-ō-graf'i-kal), *a.* [*< phytogeographic + -al.*] Same as *phytogeographic*.

phytogeography (fī-tō-jē-og'ra-fī), *n.* [= F. *phytographie* = It. *fitogeografia*, *< Gr. φυτόν, plant, + γεωγραφία, geography: see geography.*] The geography or geographical distribution of plants: correlated with *zoogeography*.

phytogliphic (fī-tō-glīf'ik), *a.* [*< phytologyph-y + -ic.*] Of or pertaining to phytoglyphy.

phytoglyphy (fī-tog'li-fī), *n.* [*< Gr. φυτόν, plant, + γλύφειν, engrave: see glyph.*] Nature-printing, as applied to the portraying of plants,

for which the process was especially devised. Also *phytography*.

phytographer (fi-tog'ra-fēr), *n.* [*< phyto-graph-y + -er.*] One who describes, names, and classifies plants.

phytographic (fi-tō-graf'ik), *a.* [*< phyto-graph-y + -ic.*] Of or pertaining to phytography or phytographers; relating or related to the describing, naming, and classifying of plants. *Nature*, XXXVIII. 220.

phytographic (fi-tō-graf'ik-al), *a.* [*< phyto-graphic + -al.*] Same as *phytographic*.

phytography (fi-tog'ra-fī), *n.* [= *F. phytographia* = *Sp. fitografia* = *Pg. phytographia* = *It. fitografia*, *< Gr. φυτόν*, plant, + *-γραφία*, *< γράφειν*, write.] 1. The description of plants; that branch of botany which concerns itself with the rules to be observed in describing, naming, and classifying plants.

Phytography is entirely subordinate to Taxonomy, or Systematic Botany.

Henslow, Descriptive and Physiological Botany, § 3.

2. Same as *phytology*.

phytoid (fi'toid), *a.* [*< Gr. φυτόειδής* (in adv. *φύτειδης*), *contr. φύττειδης*, like a plant, *< φυτόν*, plant, + *είδος*, form.] Plant-like: specifically, in zoölogy, noting animals and organs which resemble plants in appearance.

Phytolacca (fi-tō-lak'ā), *n.* [NL. (Tournefort, 1700), so called in allusion to the crimson juice of the berries; *< Gr. φυτόν*, plant, + NL. *lacca*, lac, *F. lac*, lake: see *lac*², *lake*³.] A genus of plants, type of the order *Phytolaccaceae* and tribe *Euphytolaccæ*, characterized by the depressed-globose berry of from five to twelve sessile carpels. There are 10 species, mainly tropical and American, a few African and Asiatic. They vary greatly in habit, being shrubs, herbs, or trees, erect or climbing, smooth or hairy, and with round, grooved, or angled branches. They bear alternate undivided leaves, and small flowers in axillary racemes or opposite the leaves, at first apparently terminal. They are usually of marked poisonous and medicinal properties, especially *P. decandra*, one of the most characteristic of American plants (for which see *poke-weed*, also called *coakum*, *coke*, *reduced*, *red-ink plant*, *ink-berry-weed*, *pigeonberry*, *garget*, and *fozgle*). *P. icosandra*, a small and shrubby plant, is cultivated for its graceful drooping racemes of white flowers, under the name of *Hydrangea-leaved poke*. *P. octandra* is the Spanish calalu, or West Indian foxglove. (For *P. dioica*, also called *tree-poke* and *umbra-tree*, see *bellasombra-tree*.) *P. esculenta* has been cultivated, often under the name of *Piscunia*, as a substitute for asparagus and for spinach.

Phytolaccaceae (fi'tō-la-kā'sē-ē), *n. pl.* [NL. (Lindley, 1835), *< Phytolacca* + *-aceae*.] An order of apetalous plants of the series *Curvembryæ*, distinguished by the usually many carpels in a ring, each with an undivided style. It includes about 60 species, of 8 tribes and 10 genera, of which *Phytolacca* (the type), *Rivina*, and *Petteria* are the best-known. They are trees, shrubs, or herbs with a woody base, bearing alternate entire leaves, generally smooth branches, and racemed flowers, of greenish or whitish tinge, with one bract at the base of the pedicel and two smaller at its middle.

phytolite (fi'tō-lit), *n.* [= *F. phytolithe* = *It. fitolite*, *< Gr. φυτόν*, plant, + *λίθος*, stone.] A fossil plant.

phytolithologist (fi'tō-li-thol'ō-jist), *n.* [*< phytolitholog-y + -ist.*] One who is skilled in or who writes upon fossil plants.

phytolithology (fi'tō-li-thol'ō-jī), *n.* [*< Gr. φυτόν*, plant, + *E. lithology*.] The science of fossil plants.

phytological (fi-tō-loj'i-kal), *a.* [*< phytology + -ic-al.*] Of or pertaining to phytology; botanical.

phytologist (fi-tol'ō-jist), *n.* [*< phytology + -ist.*] One who is versed in phytology, or the science of plants; a botanist.

As our learned *phytologist* Mr. Ray has done. *Evelyn*.

phytology (fi-tol'ō-jī), *n.* [= *F. phytologie* = *Sp. fitologia* = *Pg. phytologia* = *It. fitologia*, *< Gr. φυτόν*, plant, + *-λογία*, *< λέγειν*, speak: see *-ology*.] The science of plants; botany. [Rare.]

We pretend not to multiply vegetable divisions by quincuncial and reticulate plants, or erect a new *phytology*. *Sir T. Browne*, Garden of Cyrus, Ep. Ded.

phytomer (fi'tō-mēr), *n.* [*< Gr. φυτόν*, plant, + *μέρος*, part.] In *bot.*, a plant-part, or plant-unit—that is, one of the structures or elements which, produced in a series, make up a plant of the higher grade. The ultimate similar parts into which a plant may be analyzed are the serial leaf-bearing portions, since they are produced from and in time may produce similar parts. Also called *phyton*, *phytonema*.

Phytomyia (fi-tō-mī'i-ā), *n.* [NL. (Haliday, 1833), emended from *Phytomyza* (Fallen, 1810), *< Gr. φυτόν*, plant, + *μύια*, fly.] A genus of dipterous insects formerly of the family *Muscidæ*, now giving name to the *Phytomyiidae*. They are small flies, of a blackish-gray color often spotted with

yellow, and characterized by a peculiar venation of the wings. The larvae are leaf-miners, some transforming to pupae in the mine, while others pupate in the earth. The genus is large and wide-spread, with over 60 European and 7 North American species.

Phytomyiidae (fi-tō-mī'i-dē), *n. pl.* [NL., *< Phytomyia* + *-idae*.] A family of dipterous insects named from the genus *Phytomyia*, formerly merged in *Muscidæ*. Often called *Phytomyzidae*, as by Osten Sacken, 1878.

phyton (fi'ton), *n.* [NL., *< Gr. φυτόν*, plant, *< φύν*, produce, pass. *φύεσθαι*, grow, become: see *be*¹.] 1. In *bot.*, same as *phytomer*.—2. [*cap.*] In *entom.*, a genus of *Cerambycidae*. Newman, 1840.

phytonomy (fi-ton'ō-mī), *n.* [= *F. phytonomie* = *Sp. fitonomia* = *It. fitonomia*, *fitonimia*, *< Gr. φυτόν*, plant, + *νόμος*, law.] The science of the laws of plant-growth.

phytopaleontologist (fi-tō-pā'lē-on-tol'ō-jist), *n.* [*< phytopaleontolog-y + -ist.*] Same as *paleobotanist*.

The nature of some impressions described by *phytopaleontologists* as remains of fossil Algae. *Science*, I. 252.

phytopaleontology (fi-tō-pā'lē-on-tol'ō-jī), *n.* [*< Gr. φυτόν*, plant, + *E. paleontology*.] Same as *paleobotany*.

It is to defend his position, and that, indeed, of *phytopaleontology*. *Science*, I. 253.

phytopathological (fi-tō-path'ō-loj'i-kal), *a.* [*< phytopatholog-y + -ic-al.*] Of or pertaining to phytopathology.

phytopathologist (fi'tō-pā-thol'ō-jist), *n.* [*< phytopatholog-y + -ist.*] One who is skilled in phytopathology, or in knowledge of the diseases of plants; a mycologist.

phytopathology (fi'tō-pā-thol'ō-jī), *n.* [*< Gr. φυτόν*, plant, + *E. pathology*.] The science of the diseases of plants; an account of the diseases to which plants are liable; mycology.

Phytophaga (fi-tof'a-gā), *n. pl.* [NL. (Duméril, 1806); see *phytophagous*.] 1. In *entom.*: (a) A very large group of phytophagous tetramerous coleopters, having the head not rostrate, the maxillæ with two lobes, the antennæ linear and of moderate length or short, the body ovate, oblong, or rounded, and the elytra covering the sides of the abdomen. They are found on plants, on which they feed, and number upward of 10,000 described species, representing several different families. The leaf-beetles, *Chrysomelidæ*, are characteristic examples, and the name is sometimes restricted to these, though in a wider sense the *Cerambycidae*, *Spondyliidæ*, and *Bruchidæ* are also included. See also cuts under *Cerambyx*, *Chrysomela*, and *Bruchus*. (b) A division of terebrant hymenopterous insects represented by the families *Tenthredinidæ* and *Uroceridæ*, or the saw-flies and horn-tails; the *Securisera* of Latreille: contrasted with *Entomophaga* and *Galicole*. (c) [Used as a singular.] A genus of dipterous insects of the family *Tipulidæ*. Rondani, 1840.—2. In *ichth.*, a group of cyprinoid fishes.—3. In *mammal.*: (a) One of two primary groups into which the *Edentata* or *Bruta* have been divided, the other being *Entomophaga*. The *Phytophaga* are the vegetable-feeders.

The *Phytophaga* are divisible into two groups, one existing, and the other extinct. The former consists of the sloths, or Tardigrada; . . . (the latter are) the Gravigrada. *Huxley*, *Anat. Vert.*, p. 333.

(b) One of two prime divisions of placental mammals, including the pachyderms, herbivorous cetaceans (*Sirenia*), rodents, and ruminants of Cuvier (minus the monotremes) on the other hand, together forming two orders, *Dipodontia* and *Aplodontia*, collectively contrasted with *Zoöphaga*.

phytophagan (fi-tof'a-gan), *a. and n.* [*< phytophagous + -an.*] 1. *a.* Same as *phytophagous*.

2. *n.* A phytophagous animal; specifically, a member of the *Phytophaga*, in any sense. Also *phytiphagan*.

Three species are described, *P. rara*, *P. angustirostris*, and *P. rutela*. These birds are said to do much damage by cutting tender sprouts and buds with their serrated bill. Their voice is harsh and grating.

phytophagic (fi-tō-faj'ik), *a.* Same as *phytophagous*.

phytophagous (fi-tof'a-gus), *a.* [= *F. phytophage* = *Pg. phytiphago* = *It. fitofago*, *< Gr. φυτόν*, plant, + *φαγειν*, eat.] Plant-eating; feeding on plants; herbivorous; specifically, of or pertaining to the *Phytophaga*, in any sense. Also *phytophagan* and *phytophagic*.

phytophagy (fi-tof'a-jī), *n.* [*< Gr. φυτόν*, a plant, + *-φαγία*, *< φαγειν*, eat.] The habit of feeding on plants; a phytophagous regimen.

phytophilous (fi-tof'i-lus), *a.* [*< NL. phytophilus*, *< Gr. φυτόν*, plant, + *φιλεῖν*, love.] Fond of plants, as an insect.

phytophthire (fi'tof-thir), *n.* [*< Gr. φυτόν*, a plant, + *θηρ*, louse.] Same as *phytophthirian*.

Phytophthiria (fi-tof-thir'i-ā), *n. pl.* [NL.: see *phytophthire*.] A tribe or suborder of hemipterous insects; plant-lice, etc. They have the thorax normally constructed of three segments, the mouth suctorial without palpi: the wings four, two, or none, and membranous when present; the antennæ of more than five joints; and the tarsus of one or two joints. It contains several families, as the *Coccidæ* or scale-insects, *Aphididæ* or plant-lice proper, *Aleurodidæ*, or moth-blight insects, and *Psyllidæ*, jumping plant-lice, or flea-lice. Also called *Stenorhynchæ*. See cuts under *coccus*, *cochineal*, *Aphis*, and *Psylla*.

phytophthirian (fi-tof-thir'i-an), *a. and n.* [*< phytophthire + -an.*] 1. *a.* Infesting plants, as a plant-louse, scale-insect, or aphid; specifically, of or pertaining to the *Phytophthiria*.

2. *n.* A member of the *Phytophthiria*; a plant-louse. Also *phytophthire*.

Phytophthora (fi-tof-thō-rā), *n.* [NL. (De Bary, 1876), *< Gr. φυτόν*, a plant, + *φθορά*, destruction, *< φθείρειν*, destroy.] A genus of parasitic fungi closely allied to the genus *Peronospora*, from which it differs by the spores being lateral instead of terminal. There are only 2 species, of which *P. infestans*, the downy mildew of the potato or potato-rot, is the most destructive. See *potato-rot*.

phytophysiology (fi-tō-fiz-i-ol'ō-jī), *n.* [*< Gr. φυτόν*, a plant, + *φυσιολογία*, physiology.] Vegetable physiology.

Phytoptidae (fi-top'ti-dē), *n. pl.* [NL., *< Phytotus* + *-idae*.] A family of atacheate *Acarina* with two pairs of hind legs abortive, typified by the genus *Phytoptus*. They are commonly known as *gall-mites* or *rust-mites*.

phytoptosis (fi-top'tō'sis), *n.* [NL., *< Phytotus* + *-osis*.] A disease of plants caused by the attacks of mites of the genus *Phytoptus*. It is accompanied by an abnormal growth of the plant-tissue. See *erineum*.

Phytoptus (fi-top'tus), *n.* [NL. (Dujardin, 1851), *< Gr. φυτόν*, plant, + *ὄπρος*, verbal adj. of *φωρ*, see: see *optic*.] A genus of gall-mites, giving name to the *Phytoptidæ*, and containing such species as *P. quadripes*, which galls the soft maple in the United States.

phytoxis (fi-tō'sis), *n.* [NL., *< Gr. φυτόν*, plant, + *-osis*.] The presence of vegetable parasites, or the morbid conditions produced by them: especially used in designation of the dermatomycoses.

phytotaxy (fi'tō-tak-si), *n.* [*< Gr. φυτόν*, plant, + *τάξις*, order, arrangement.] The science of the classification of plants; systematic botany. Compare *zoötaxy*. *Lester F. Ward*, *Dynamic Sociology*, I. 120.

Phytotoma (fi-tot'ō-mā), *n.* [NL. (Molina, 1789), *< Gr. φυτόν*, plant, + *-τομος*, *< τέμνειν*, cut.] The only genus of *Phytotomidæ*.

A member of the *Phytophaga* (*Prionus latellus*), female, natural size.

Phytotoma rara.

Three species are described, *P. rara*, *P. angustirostris*, and *P. rutela*. These birds are said to do much damage by cutting tender sprouts and buds with their serrated bill. Their voice is harsh and grating.

or three wires, which are tuned in unison, and placed so that they shall be struck simultaneously by a single hammer. (c) The *sounding-board* is a thin plate of selected wood so placed under the strings that it is drawn into sympathetic vibration with them. The sonority and quality of the tones depend much upon its material, form, and attachment. At the side or end next the string-plate there is an opening in the sounding-board for the hammers. (d) The *action* comprises the entire system of levers, hammers, etc., by which the player causes the strings to sound. It includes a keyboard (which see) made up of keys or digitals, each of which works on a pivot near its center. When the front end of a key is depressed, the back end is raised, carrying with it a rod called a *jack*, the upper end of which propels a felt-tipped hammer against one or more strings with a blow. At the same instant a *dampener* is lifted from the strings so that they can vibrate freely. After the blow is given the hammer falls back against a *check*, while the dampener remains lifted until the key is released. Various exceedingly ingenious devices are used to prevent noise, to insure ease, precision, and power, and to provide for extreme rapidity of manipulation. Various mechanical effects are produced by means of pedals, such as the *dampener* or *loud pedal*, which lifts the dampeners from all the strings at once, so that all the strings sounded shall continue to sound, and other strings shall be drawn into sympathetic vibration until the pedal is released; a *sustaining pedal*, which holds up all the dampeners that happen to be raised when it is pressed down, so that selected tones may be prolonged at will; and a *soft pedal*, which either interposes a strip of thin felt between the hammers and the strings, or diminishes the distance from which the hammers strike, or moves them to one side, so that they may strike only one instead of two or three strings, so that a soft tone shall be produced. The compass of the keyboard varies from five to seven and a half octaves. Great care is taken that the hammers shall strike the strings at such a point as to bring out their desirable harmonies, and suppress the others. (e) The *case* is a wooden box in which the whole instrument is contained. Its form varies according to the variety of the pianoforte. A *grand piano*, the largest form of which is called a *concert grand*, is harp-shaped, like the harpsichord, and has the strings strung horizontally at right angles to the keyboard. A *square piano*, until lately the commonest form for private use, is rectangular, like the clavichord, and has the strings strung horizontally, parallel with the keyboard. An *upright* or *cabinet piano* is like a square set up on edge, and has the strings strung vertically behind the keyboard. In both these varieties the case is often made of precious woods elaborately carved and inlaid. The importance of the pianoforte rests upon its powerful and finely graduated tone, its convenience for the production of concerted music, and its universal popularity. Its wide-spread use brings into prominence, however, the disadvantages of a percussive tone, which cannot be sustained or varied after the initial stroke, of an ease of manipulation which invites slovenly and vulgar use, and of a temperament which, with the common neglect of frequent tuning, often hopelessly corrupts the player's musical ear. The technique of the pianoforte has developed gradually out of that of the harpsichord and clavichord. Abbreviated *pl*—Oblique pianoforte. See *oblique*.—Pianoforte-player's cramp, an occupation-neurosis, allied to writer's cramp, developing in pianoforte-players.—*Sordimento pianoforte*, a name given to various forms of the pianoforte constructed with a view to sustain the full tone like an organ. No such instruments have remained long in use.

pianograph (pi-an'ô-gráf), *n.* [*E. piano* + *Gr. γράφω*, *to write*.] A form of music-recorder. See *music-recorder*.

piano-maker (pi-an'ô-má'kér), *n.* A maker of pianofortes.

piano-music (pi-an'ô-mú'zík), *n.* Music written for or performed on a pianoforte.

piano-school (pi-an'ô-skól), *n.* 1. A school for giving instruction in playing on the pianoforte.—2. A particular method or system of pianoforte instruction; also, a book showing such method.

piano-stool (pi-an'ô-stól), *n.* A stool, generally adjustable in height, used by a performer on the pianoforte.

piano-violin (pi-an'ô-vi'ô-lín'), *n.* Same as *harmonichord*.

piarachnoid (pi-a-rák'noid), *n.* [*pi(a mater)* + *arachnoid*: see *arachnoid*, 2 (*a*).] The pia mater and the arachnoid taken together.

Piarist (pi'a-ríst), *n.* [*NL. *Piarista*, < *L. pius*, pious: see *pious*.] In the *Rom. Cath. Ch.*, a member of the Pauline Congregation of the Mother of God, a secular order founded at Rome by Joseph Calasanza about 1600 and sanctioned a few years later. In addition to the three usual monastic vows, the Piarists devoted themselves to the free instruction of youth. They are found especially in the Austrian empire.

piarrhæmia (pi-a-ré'mi-ä), *n.* [*NL.*, < *Gr. πιαρρῆ, fat*, + *αἷμα, blood*.] Same as *lipæmia*.

piassava, piassaba (pi-as'a-vä, -bä), *n.* [*Pg. piassava, piapaba*; a *Braz. name*.] 1. A coarse fiber yielded by two palms, *Attalea funifera* and *Leopoldinia piassaba*. In South America it is made into coarse but durable ropes; in Europe it is used chiefly for street-brooms. The product of the latter species is less valued, and forms but a small percentage of the commercial article. See *Attalea, bat-palm, Leopoldinia, Para grass*, and cut in next column.

Since the introduction of *piassava* . . . the manufacture of "bass brooms" has become an important branch of the brush-making industry. *Spon's Encyc. Manuf.*, I. 554.

2. Either of the above palms.

Piassava (*Attalea funifera*).
a, the upper part of the stem with the fibers.

piaster, piastre (pi-as'tér), *n.* [*F. piastre* = *Sp. Pg. piastra*, piaster, < *It. piastra* (*ML. piastra*, a piaster), a thin plate of any metal, a dollar, < *L. emplastrum*, a piaster: see *piaster*.]

1. The unit of Turkish currency, represented by a silver coin worth about 4.4 United States cents (the Turkish name for it is *ghürüş*).—2. The Spanish dollar. See *dollar*, 1, and *peso*.

piation (pi-ä'shön), *n.* [*L. piatio* (*n.*), an appeasing of the gods by offerings, < *piare*, appease: see *piacle*.] The act of making atonement; expiation. *Imp. Diet.*

piazza (pi-az'ä; *It. pron. piät'sä*), *n.* [*It. piazza*, a square, market-place, = *Sp. plaza* = *Pg. praça* = *F. place*, < *L. platea*, place: see *place*.] 1. An open square in a town surrounded by buildings or colonnades; a plaza: as, the piazza of Covent Garden; the Piazza del Popolo in Rome; the Piazza dell' Annunziata in Florence.

Whereupon the next morning, being Sunday, Wolfe came to Chaloner's Chamber, and prayed him familiarly to go walk with him abroad to the piazza or marketstead. *Pope, Martyrs*, an. 1555.

Din'd at my Lo. Treasurer's, the Earle of Southampton, in Blomesbury, where he was building a noble square or piazza, a little towne. *Evelyn, Diary*, Feb. 9, 1665.

The benediction was much finer than on Thursday, the day magnificent, the whole piazza filled with a countless multitude, all in their holiday dresses. *Greville, Memoirs*, April 11, 1830.

2. An arcaded or colonnaded walk upon the exterior of a building; a veranda; a gallery. [A less correct use.]

The low projecting eaves forming a piazza along the front, capable of being closed up in bad weather. *Irving, Sketch-Book*, p. 429.

He has put a broad verandah (what we so commonly call a piazza) all around the house. *Motley, Correspondence*, II. 283.

piazian (pi-az'i-an), *a.* [*piazza* + *-ian*.] Pertaining to, resembling, or characteristic of a piazza.

Where in Pluto's gardens palatine
Mulciber's columns gleam in far piazian line. *Keats, Lamia*, I.

pibblet, *n.* An obsolete form of *pebble*.

pibble-pabble (pi'b'l-pab'l), *n.* [*An imitative word*, a varied reduplication of **pabble*, equiv. to *babble*.] Tattle; babble. *Worcester*.

piobrach (pi'bröch), *n.* [*Gael. piobaireachd*, the art of playing on the bagpipe, pipe-music, < *piobair*, a piper, < *piob*, a pipe, bagpipe (see *pipe*), & *feair*, a man.] A wild, irregular kind of music, peculiar to the Scottish Highlands, performed upon the bagpipe. It consists of a ground-theme of air called the *urlar*, followed by several variations, generally three or four, the whole concluding with a quick movement called the *creannuidh*. Piobrochs usually increase in difficulty from the beginning to the end, and are profusely ornamented with grace-notes called *varblers*. They are generally intended to excite a martial spirit. They also often constitute a kind of program-music, intended to represent the various phases of a battle—the march, the attack, the conflict, the flight, the pursuit, and the lament for the fallen. The names they bear are often derived from historical or legendary events, as "The Raid of Kilchrist," attributed to the piper of Macdonald of Glengarry, and supposed to have been composed in 1603. The term is sometimes used figuratively by poets to denote the bagpipe itself.

Piobrach of Donull Dhu,
Piobrach of Donull,
Wake thy wild voice anew,
Summon Clan Conuill. *Scott, in Albyn's Anthology*.

picl, *n.* A Middle English form of *pike*.¹

picl (pik), *n.* [*Turk. pik*.] A measure of length, varying from 18 to 28 inches, common throughout Moslem nations, and used especially for measuring textile fabrics.

Pica (pi'kä), *n.* [*NL.* (Brisson, 1760), < *L. pica*, a magpie: see *pie*.] 1. A genus of oscine passerine birds of the family *Corvidæ* and sub-family *Garrulinae*, having an extremely long graduated tail, the nostrils covered with antrorse plumules, and the plumage iridescent black and white; the magpies. The common magpie of Europe is *P. rustica*, *P. caudata*, or *P. pica*. That of America is commonly called *P. audacissima*, but it is scarcely a distinct species. The yellow-billed magpie of California is *P. nuttalli*. See cut under *magpie*.

2. [*L. c.*] A bird of the genus *Pica*; a pie; a magpie.—*Pica marina*, an old name, not technical, of the oyster-catcher, translating the popular name *sea-pie*.

pica (pi'kä), *n.* [= *F. Sp. Pg. It. pica*, < *NL. pica*, a vitiated appetite, so called in allusion to the omnivorous habits of the magpie; < *L. pica*, a magpie: see *Pica*.] In *med.*, a vitiated craving for what is unfit for food, as chalk, ashes, or coal.

pica (pi'kä), *n.* [*ML. pica*, the ordinal, so called on account of the color and confused appearance of the rules, they being printed in the old black-letter type on white paper, and thus looking pied; < *L. pica*, a magpie: see *Pica* and *pie*.] 1. *Eccles.*, same as *ordinal*, 2 (*c*).

Suppose then one that is sick should have this *Pica*, and long to be anointed; why might not a lay-friend anoint as well as baptize? *Bp. Hacket, Abp. Williams*, p. 218.

2. An alphabetical catalogue of names and things in rolls and records.

pica (pi'kä), *n.* [So called with ref. to the black-letter type in which the pica or ordinal was printed: see *pica*.] A size of printing-type, about 6 lines to the inch, intermediate between the sizes English (larger) and small-pica (smaller). It is equal to 12 points in the new system of sizes. (See *point*, 14 (*b*)). The sizes of type respectively called 2-, 3-, 4-, 5-, 6-, and 6-line pica have bodies that are equal to 2, 3, 4, 5, and 6 lines of pica. Leads are described by their numerical relation to the pica body, as 6-to-pica or 10-to-pica, according as 6 or 10 set together make a line of pica.

This is Pica Type.

Double pica, in England, a size of type equal to 2 lines of small-pica.—Double small-pica, in printing, a size of type giving about 8½ lines to the inch. In Great Britain this size is known as *double pica*.—Two-line pica, a size of type of about 8 lines to the inch, equal to 2 lines of pica, or to 24 points in the new system of sizes.

picador (pi-kä-dör'), *n.* [*Sp.*, < *pica*, a pike, lance: see *pike*.] In *bull-fighting*, one of the horsemen armed with a lance who commence the combat in the arena by pricking the bull to madness with their weapons, but purposely avoid disabling him. The horse of the picador is often disemboweled by the bull; the man has armor for the legs, as much to keep them from being crushed by the weight of the horse falling on them as to protect them against the bull.

The light darts of the picador . . . sting, but do not wound. *G. W. Curtis, Harper's Mag.*, LXXVI. 687.

Pica (pi'sä), *n. pl.* [*NL.*, pl. of *Pica*: see *Pica*.] In the Linnean system of classification, the second order of birds, more fully called *Aves piceæ*. It consisted of the genera *Ptiliacus*, *Ramphastos*, *Buccones*, *Buphaga*, *Crotophaga*, *Corvus*, *Coracias*, *Oriolus*, *Gracula*, *Paradisæa*, *Trogon*, *Bucco*, *Cuculix*, *Yunx* (*lynx*), *Picus*, *Sitta*, *Todus*, *Alcedo*, *Merops*, *Urupa*, *Certhia*, and *Trochilus*. Though thus a heterogeneous and artificial group, it corresponds in the main with the modern order *Picariæ*, of which it is the prototype. Elimination of the passerine forms (namely, *Corvus*, *Oriolus*, *Gracula*, *Paradisæa*, *Sitta*, and *Certhia*) would leave it very nearly the same as *Picariæ*.

picamar (pi-kä-mär), *n.* [= *F. picamare*, < *L. piz* (*pic-*), pitch, + *amarus*, bitter.] The bitter principle of tar. It can be separated in the form of a colorless oil.

picaninny, *n.* See *piccaninny*.
Picard (pi-kärd), *n.* [Perhaps from one *Picard*, the alleged founder.] *Eccles.*, one of a sect in Bohemia about the beginning of the fifteenth century, suppressed by Ziska in 1421. The Picards are accused of an attempt, under the guise of restoring man's primitive state of innocence, to renew the practices of the Adamites, in going absolutely unclothed and in maintaining the community of women, etc. See *Adamite*, 3.

picard (pi-kärd), *n.* [*F. Picard*, belonging to Picardy.] A shoe worn by men, introduced into England as the fashion of the French about 1720. It was high-quartered, and not unlike the modern brogan.

Picardist (pi-kärd-ist), *n.* [*Picard* + *-ist*.] An occasional form of *Picard*.¹

picaresque (pi-kä-res'k), *a.* [*F.*, < *Sp. picaresco* (= *Pg. picaresco*), < *picaro*, a rogue: see *picaro*.] Pertaining to or dealing with rogues or pica-rooms: said of literary productions that deal with the fortunes of rogues or adventurers, and especially of works in Spanish literature about

the beginning of the seventeenth century, of which "Guzman de Alfarache" was a type.

The rise of the taste for *picaresque* literature in Spain towards the close of the 16th century was fatal to the writers of pastoral.

Encyc. Brit., XVIII. 346.

Picariæ (pi-kā'ri-ē), *n. pl.* [NL., fem. pl. of *picarius*, < L. *picus*, a woodpecker: see *Picus*.] In Nitzsch's system of classification, as edited by Burmeister in 1840, an order of birds, instituted for the reception of the *Macrochires*, *Cuculines*, *Picines*, *Psittacines*, and *Amphibolæ* of his earlier arrangement, with the addition of the *Caprimulgines*, *Todidæ*, and *Lipoglossæ* (the last consisting of the genera *Buceros*, *Upupa*, and *Alcedo*). With various modifications, and especially with the exclusion of the *Psittaci*, the term continues in general use by ornithologists as the name of a group of non-passerine non-raptorial land-birds; but it is so heterogeneous that no diagnostic characters can be assigned, and the tendency now is to drop the term and elevate several of the groups of genera which it formerly covered to ordinal or subordinal rank, under the names *Macrochires*, *Coccygæ*, and *Piciformes*, or their equivalents.

picarian (pi-kā'ri-an), *a. and n.* [*< Picariæ + -an.*] *I. a.* Of or pertaining to the *Picariæ*; being or resembling one of the *Picariæ*.

II. n. One of the *Picariæ*.

picarot (pi-kā'rō), *n.* [Also *pickaro*; < Sp. *picaro* = Pg. *picaro* = It. *piccaro*, a rogue; cf. F. *picor*, steal cattle, forage: see *pickeeper*, *pickery*.] *A* rogue; a thief.

The arts . . . used by our Spanish *pickaroos*—I mean fishing, foisting, nimming, jilting.

Middleton, Spanish Gypsy, II. 1.

picaroon¹ (pi-kā'rōn'), *n.* [Formerly also *pickaroune*, *pickeroon*; < Sp. *picaron*, a rogue, < *picaro*, a rogue: see *pickeeper*, *pickery*.] *I.* A rogue or cheat; one who lives by his wits; an adventurer.

I could not recover your Diamond Hatband, which the *Picaroon* snatched from you in the Coach, tho' I used all Means Possible.

Howell, Letters, I. iii. 80.

I think I see in thy countenance something of the pedlar—something of the *picaroon*. *Scott*, *Kenilworth*, xx. 2. A plunderer; especially, a plunderer of wrecks; a pirate; a corsair.

This poor vessel . . . the next day was taken by a French *Pickaroune*, so that the Frigate, out of hope of her prize, makes a second time for the West Indies.

Quoted in *Capt. John Smith's Works*, II. 132.

Some frigates should be always in the Downs to chase *picarons* from infesting the coast.

Lord Clarendon.

picaroon² (pi-kā'rōn'), *n.* [Origin uncertain.] An instrument like a boat-hook, used in mooring logs or deals. [Canada.]

Picathartes (pi-kā-thā'r'tēz), *n.* [NL. (Lesson, 1828), for **Picathartes*, < *Pica* + *Cathartes*, in allusion to the long tail, like a magpie's, and the bare head, like that of an American vulture of the genus *Cathartes*.] A remarkable genus of *Corvidæ*. The only species, *P. gymnocephalus*, is found in the forests of Denker, in the interior of

Vulturine Pie (*Picathartes gymnocephalus*).

the Gold Coast, western Africa. It is 16½ inches long, the tail 7½; the head is bald and of a bright-yellow color, with a round black patch behind; the upper parts are slaty-gray, inclining to blackish on the back, and the under parts are creamy-white. This singular bird was called *tafted grackle* in some of the old books, and Wagler named the genus *Galynus* in 1827; but the latter name is pre-occupied in another connection (*Brisson*, 1780).

picayune (pi-kā-yōn'), *n. and a.* [Prob. for **picayoon* (with term. as *doubloon*, etc.), < F. *picailon*, a farthing, in slang use cash, "tin"; cf. It. *picciolino*, a farthing; *piccolo*, little.] *I.* Formerly, in Florida, Louisiana, and adjacent regions, the Spanish half-real, equal to ½ of a dollar, or 6½ cents; now, the five-cent piece or any similar small coin.

Still, the fact remains that the average "Communist" has not one *picayune's* worth of interest in the State as such.

New Princeton Rev., I. 38.

II. a. Small; petty; of little value or account: as, *picayune* politics. [U. S.]

If only two cents are required, you will have prevented a *picayune* waste.

The Writer, III. 112.

picayunish (pi-kā-yō'nish), *a.* [*< picayune + -ish.*] Of little value or account; small; petty; paltry; mean. [Colloq., U. S.]

piccadill (pi-kā'dil), *n.* [Also *pickadill*, *pickadil*, *picadill*, *piccadell*, *picadell*, *pickadel*, *pickadell*, *pickardill*; < OF. *piccadille*, *picadille*, a *picadill*, with dim. suffix, < Sp. *picado*, pricked, pierced, punctured (cf. *picada*, a puncture, *picadura*, an ornamental gusset), < *picar*, prick, pierce, puncture, < *pica*, a pike: see *pikel*.] *1.* A large stiff collar in fashion about the beginning of the reign of James I., but the precise character of which is unknown. It appears to have been of French origin.

This [halter] is a coarse wearing;

'Twill sit but scurvily upon this collar;

But patience is as good as a French *pickadell*.

Fletcher, *Pilgrim*, II. 2.

Which for a Spanish blocke his lands doth sell,

Or for to buy a standing *pickadell*!

Pasquil's Night-cap (1612). (*Nares*.)

2. An edging of lace or cut-work, forming the ornamental part of the broad collar worn by women early in the seventeenth century.

A short Dutch waist, with a round Catherine-wheel fardingle, a close sleeve with a cartoose collar, and a *pickadil*.

Dekker and Webster, *Northward Ho*, III. 1.

And in her fashion she is likewise thus,

In ev'ry thing she must be monstrous.

Her *pickadil* above her crown up-bears,

Her fardingle is set above her ears.

Drayton, *Mooncalf*.

piccaget, **pickaget** (pi-kā'jē), *n.* [ME. *picagium*; prob. < OF. *piquer* (†), Norm. *pecker*, break open: see *pick*.] Money paid by strolling players and others for the privilege of breaking ground for the erection of their booths at fairs, etc.

Know ye that King Athelstan of famous memory did grant . . . an exemption of all manner of Imposts, Toll, Tallage, Stallage, Tunnage, Lastage, *Picage*, Wharfage.

Dejeu, *Four thro' Great Britain*, III. 188. (*Davies*.)

Courts of pie-powder, stallages, tolls, *picages*, with the fullest privileges ever enjoyed by the prior in the prepossession of Cartmel.

Quoted in *Baines's Hist. Lancashire*, II. 680.

Picea (pi'sē-ā), *n.* [NL. (Link, 1827), < L. *picea*, the pitch-pine, or perhaps the spruce or the fir (cf. Gr. *πείκη*, the fir), < *pix* (*pic-*), pitch: see *pitch*.] A genus of coniferous trees, of the tribe *Abietinæ*, including the spruce. It is characterized by the evergreen four-sided leaves jointed to the persistent petiole-base, staminate flowers solitary in the axils of the upper leaves, and reflexed cones with persistent scales, hanging near the end of the branches. Great confusion regarding the spruce and fir existed among the Greeks and Romans, and later among moderns; many authors (following Don, 1888) long wrote *Picea* for the fir, *Abies* for the spruce. Asa Gray and others (following Jusieu, 1789) united both under *Abies*; present usage adopts *Abies* for the fir. *Picea* includes about 12 species, natives of north temperate and arctic regions. They bear long and narrow spirally scattered leaves spreading in all directions, and long cones with double thin-margined scales each with two winged seeds. See *spruce* and *king-pine*, and compare *fir* and *pitch*².

Picentine (pi'sen-tin), *a.* [*< L. Picentinus*, equiv. to *Picens* (*Picent-*) and *Picenus*, pertaining to Picenum, < *Picenum*, Picenum (see *def.*).] Of Picenum, a district in the eastern part of Italy noted for its fruits and oil.

Picicorvus (pi-si-kōr'vus), *n.* [NL. (Bonaparte, 1850), lit. 'pie-crow', < L. *pica*, a magpie, + *corvus*, crow.] A genus of corvine birds of western North America, having the form of the Old World nutcrackers of the genus *Nucifraga*,

Clarke's Crow, or American Nutcracker (*Picicorvus columbianus*).

but the plumage gray, with black and white wings and tail. The only species is *P. columbianus*, commonly called *Clarke's crow* or *American nutcracker*. Inhabiting mountainous and especially coniferous regions.

Picidæ (pi'si-dē), *n. pl.* [NL., < *Picus* + *-idæ*.] A large family of scansorial zygodactyl picarian birds, named from the genus *Picus*, characterized by the habit of picking the wood of trees

both to procure food and to construct nesting-places; the woodpeckers. (a) In a broad sense, a family including the piculets and wrynecks, which have soft tail-feathers not used in climbing, and divided into *Picidae*, *Picumninae*, and *Lynginae*. See cuts under *Picumnus*, *Picus*, and *wryneck*. (b) By exclusion of the last two as respectively types of different families, the woodpeckers proper, which have stiff acuminate tail-feathers used in climbing, being pressed against the tree, and forming with the feet a tripod of support. The tail consists always of twelve rectrices, but the next to the outer pair are very small and concealed, so that there appear to be only ten. The wing is more or less pointed, with ten primaries, of which the first is short or apurious; the coverts are short, as in passerine birds. The feet are four-toed and zygodactyl (excepting in the genus *Picoides*). The arrangement of the flexor tendons of the toes is antipalmous, the oil-gland is tufted, the carotid is single, caeca are wanting, and the manubrium of the breast-bone is bifurcate. The principal peculiarities are found in the skull, beak, and tongue. The palatal structure is unique and of the type called by Parker *saurognathous*, and the whole skull is remarkably solid and firm. The beak is eminently fitted, like a gouge or chisel, for boring into wood. In some of the less typical *Picidae* this instrument is a little curved, acute, and not ridged on the sides; in most woodpeckers, however, it is perfectly straight, very hard, truncated chisel-wise (perpendicularly) at the end, and beveled and strengthened with ridges on the sides. Except in a few genera (as *Sphyrapicus*), the tongue is lumbiciform or cylindrical, barbed at the end, and capable of great extension; it is used as a spear to capture insects. The horns of the hyoid bone are very highly developed, as a rule, curling up over the back of the head, even as far as the orbital or nasal cavities, and the salivary glands are very large. The species are numerous (upward of 300), placed in many modern genera, inhabiting nearly all parts of the world. They are chiefly insectivorous, but also frugivorous to some extent, nest in holes which they excavate with the bill, and lay crystal-white eggs. They are not regularly migratory, and not musical. Besides their vocal cries, they make a loud rattling noise by tapping trees. See cuts under *Campophylus*, *Centurus*, *Dryocopus*, *flicker*, *Melanerpes*, *pair-toed*, *Picus*, *piledated*, *pitahaya*, *popinjay*, *sapsucker*, *woodpecker*, and *Xenopicus*.

piciform (pis'i-fôr-m), *a.* [*< NL. piciformis, < L. picus, a woodpecker, + forma, form.*] Having the form or structure of a woodpecker; related to the woodpeckers; picoideous; specifically, of or pertaining to the *Piciformes*.

Piciformes (pis-i-fôr-mêz), *n. pl.* [*NL., pl. of piciformis: see piciform.*] 1. In Garrod's classification, a superfamily of anomalognatous picarian birds, having a tufted oil-gland, one carotid, and no caeca, including the *Picidae* and some related families: contrasted with *Cypseliformes*.—2. In Coues's system (1884), the woodpeckers alone as a suborder of *Picariae*, composed of the three families *Picidae*, *Picumnidae*, and *Lyngidae*.

Picidae (pi-si'nê), *n. pl.* [*NL., < Picus + -idae.*] *In ornith.*: (a) In Nitzsch's classification (1829), a superfamily of birds, equivalent to the *Dendrocolaptæ* of Merrem. (b) A subfamily of *Picidae* (a), made by elimination of the *Picumninae* and *Lynginae*: same as *Picidae* (b). (c) A subfamily of *Picidae* (b), containing the most typical woodpeckers, which have the bill perfectly straight, ridged and beveled on the sides, and truncate at the end, and the tongue usually extensible.

picine (pi'sin), *a. and n.* [*< NL. *picinus, < L. picus, a woodpecker: see Picus.*] 1. *a.* Like a woodpecker; being or resembling one of the *Picidae*.

II. *n.* One of the *Picidae*.

pick¹ (pik), *v.* [Early mod. E. also *pike*, *pyke* (partly merged in *pick*¹, *v.*); also *peck*, which is partly differentiated in use (see *peck*¹); *< ME. picken, pikken*, also *pekken*, also *piken, pyken* (*piken*), *pick*; perhaps *< AS. pycan* (found but once, in the passage "and lét him pycan út his eagan." and caused [one] to pick out his eyes" (AS. Chron., an. 796), where Thorpe prints *pytan*, and Bosworth (ed. Toller) explains the word as *pycan* for **pican*); the AS. form corresponding to ME. *pikken* would be **piccan*; cf. pick¹ (pik), *n.* [In most uses from the verb; but in senses 1 and 2 prob. a mere var. of *pike*¹, *n.*, which is in part ult. the source of the verb *pick*: see *pick*¹, *v.*, *pike*¹, *n.*] 1. A pointed instrument of various kinds. (a) A tool used for loosening and breaking up closely compacted soil and rock. It is ordinarily a bar of iron tipped with steel at both ends, about eighteen inches long, sometimes straight but more generally slightly curved, and having an eye in

a and *c*, pickaxes, *a* (sometimes called a pick-mattock) having an adze-like edge on the end opposite the point, and *c* having its edge in line with the handle, like a common ax; *b*, a push-pick, having a crutch-handle *h*, which is grasped by the hands, and a step *s* for the foot; *d*, a miners' pick; *e*, the common pick used in excavation, etc.

the middle to receive a handle or helve. The tips of the pick are usually sharpened to a point by a square taper; sometimes, however, to a chisel-edge. The tapering extremities of the pick possess the property of the wedge, so that this tool is really hammer and wedge in one. Its form allows it also to be advantageously used as a bent lever. The pick is known in England by the names *pike*, *mandrel*, *mattock*, and *hack*: the last two, however, belong properly to forms of the pick with only one point and that ending in a chisel-edge. The pick is largely employed by miners, especially by coal-miners. (b) An edged or pointed hammer used in dressing stones. (c) A tooth-pick. [Colloq.] (d) A fork.

Undone, without redemption, he eats with *picks*.

Fletcher, Monsieur Thomas, l. 2.

Pickwickian (pik-wik'i-an), *a.* [*< Pickwick* (see def.) + *-ian*.] Relating to or resembling Mr. Pickwick, the hero of Dickens's "Pickwick Papers." — *Pickwickian sense*, a merely technical or constructive sense: a phrase derived from a well-known scene in Dickens's novel (see the first quotation).

The chairman felt it his imperative duty to demand of the honourable gentleman whether he had used the expression that had just escaped him in a common sense. Mr. Blotton had no hesitation in saying that he had not — he had used the word in its *Pickwickian sense*. (Hear, hear.)

Dickens, Pickwick Papers, l. Unitarianism and Universalism call themselves the church in an altogether *Pickwickian sense* of the word, or with pretensions so adfable as to offend nobody.

H. James, Subs. and Shad., p. 199. **picie**, *n.* A variant of *pickles³*. *Minshew.*

picnic (pik'nik), *n.* [Formerly and more prop. *picknick* (*> F. picnic, piquenique* (before 1740) = *G. picknick* = *Sw. picknick* (1788) = *Dan. pikkenik*, a picnic); a riming name of popular origin, appar. *< pick¹, v., + *nick*, for **knick* or *knack* in *knickknack*, *nicknack*, a trifle, but also a picnic. As in many other riming names, the elements are used without precision, but the lit. sense is appar. 'a picking or nibbling of bits,' a snatch, snack (cf. *snatch, snack*, in this sense, as related to *snatch*, *v.*.)] Formerly, an entertainment in which every partaker contributed his share to the general table; now, an entertainment or pleasure-party the members of which carry provisions with them on an excursion, as from a city to some place in the country: also used adjectively: as, a *picnic party*; *picnic biscuits* (a kind of small sweet biscuits).

picnic (pik'nik), *v. t.*; pret. and pp. *picnicked*, ppr. *picnicking*. [*< picnic, n.*] To attend a picnic party; take part in a picnic meal: as, we *picnicked* in the woods.

picnicker (pik'nik-ēr), *n.* One who takes part in a picnic.

picnid (pik'nid), *n.* Same as *pycnidium*.

picnohydrometer (pik'nō-hi-drom'e-tēr), *n.* [*< picno(meter) + hydrometer*.] A combination of the pycnometer and the hydrometer. *E. H. Knight.*

picnometer, *n.* An erroneous spelling of *pycnometer*.

Piconotus, *n.* See *Pycnonotus*.

Picoides (pi-koi'dē-s), *n. pl.* [NL., *< Picus + -oides*.] A superfamily of birds, including the families *Picidae*, *Indicatoridae*, *Megalamidae*, *Rhamphastidae*, *Galbulidae*, and *Bucconidae*, or the woodpeckers, indicators, barbets, toucans, jacamars, and puff-birds.

picoides (pi-koi'dē-us), *a.* Pertaining to the *Picoides*.

Picoides (pi-koi'dēz), *n.* [NL. (Lacépède, 1801), *< Picus + -oides*.] A genus of *Picidae* lacking the first toe, having but one behind and two in front, but in other respects agreeing with *Picus* proper; the three-toed woodpeckers. There are several species, of Europe, Asia, and North America, spotted with black and white, the male with red on the head, as the European *P. tridactylus* and the American *P. americanus* or *hirunus*. Another common American species is the black-backed three-toed wood-

pecker, *P. arcticus*. Also called *Tridactyla*, *Apternus*, *Pipodes*, and *Dinopium*.

Picoides (pi-koi'dēz), *n. pl.* [NL., *< Picus + -oides* (pl.).] In Blyth's system of classification (1849), a series of his *Zygodactyli*, consisting of the woodpeckers, honey-guides, barbets, and the toucans, touracous, and colies, the first three of these being grouped as *Cuneirostres*, the last three as *Levirostris*.

picot (pē-kō'), *n.* [*< F. picot*, a pearl, purl, OF. *picot, piquot, picquot*, a point, dim. of *pic*, a point: see *pik¹*.] 1. A small loop forming part of an ornamental edging, but larger than the pearl and thicker, consisting of a thread upon which other thread has been wound, or to which small stitches or knots have been added.

— 2. The front or outer edge of a flounce or border, as of lace. Compare *footing*, 11.

picotee (pik-ō-tē'), *n.* [Formerly also *picketee*, *piquette*; said to be *< F. picotie*, named after *Picot*, Baron de la Peyrouse (1744–1818), a French botanist.] One of a group of florists' varieties of the carnation, having petals with a white or yellow ground, marked at the outer margin only with red or other color. In older usage the *picotee* had a white ground, spotted or dusted with the secondary color. Also called *picotee pink*. See *carnation*, and *cut* under *Dianthus*.

picotite (pik-ō-tit), *n.* [Named after *Picot*, Baron de la Peyrouse (see *picotee*).] A variety of spinel containing 7 or 8 per cent. of chromium sesquioxide. See *spinel*.

picot-ribbon (pē-kō'rib'on), *n.* Ribbon having a pearl-edge or a sort of fringe of loops made by the projecting threads of the weft.

picotté (pi-kō-tā'), *a.* [*< F. picoté, < picot: see picot*.] 1. In *her.*, speckled and spotted. — 2. Furnished with picots: as, a *picotté* ground of lace.

picquet, *n.* and *v.* An obsolete spelling of *piquet¹*. *Bp. Parker.*

picqueret, *n.* See *pickeerer*.

picquett, *n.* See *piquet*, 2.

picqué-work (pē-kā'wērk), *n.* Decoration by means of dots or slight depressions. Compare *pounced work*, under *pounce*.

picra (pik'rā), *n.* [LL., a medicine made of aloes, *< Gr. πικρός*, bitter. Cf. *hierapicra*.] A powder of aloes with canella, composed of four parts of aloes to one part of canella. It is used as a cathartic.

Picraena (pik-rē-nā), *n.* [NL. (Lindley, 1849), *< Gr. πικρός*, bitter.] A genus of polypetalous trees of the order *Simarubaceae* and tribe *Simarubae*, characterized by its four or five stamens without hairs, four or five petals not increasing in size, a four- or five-lobed disk, and solitary seeds without albumen. The 3 species are natives of tropical America. They resemble the allantua-tree in habit, bearing alternate pinnate leaves, and cymose panicles of greenish flowers, followed by small drupes resembling peas. Their wood is whitish or yellow, and extremely bitter. See *bitter-wood*, 2, *bitter ash* (under *ash*), and *quassia*.

Picramnia (pik-ram'ni-ā), *n.* [NL. (Swartz, 1797), *< Gr. πικρός*, bitter, + *θάμνος*, shrub.] A genus of shrubs and trees, of the order *Simarubaceae*, type of the tribe *Picramnieae*, characterized by carpels with two or more ovules, and dioecious flowers with from three to five stamens opposite as many linear petals. There are about 20 species, natives of tropical America. They bear alternate pinnate leaves, and small green or reddish flowers in clusters forming long slender drooping racemes, followed by two-celled fruits resembling olives. They are known as *bitter-wood*, and *P. antidemna*, the species most used medicinally, as *cascara amara bark* (which see, under *bark*), also *monacary-bitter*, *majoe-bitter*, *old-woman's-bitter*, and *Tom-Bontryn's-bush*.

Picramnieae (pik-ram-ni-ā-ē), *n. pl.* [NL. (Benth and Hooker, 1862), *< Picramnia + -ae*.] A tribe of plants of the order *Simarubaceae*, distinguished by the entire ovary of from two to five cells. It includes 11 genera of tropical trees or shrubs, of which *Picramnia* (the type) is the chief.

picrate (pik'rāt), *n.* [*< picric + -ate¹*.] A salt of picric acid.

picrated (pik'rā-ted), *a.* [*< picrate + -ed²*.] In *pyrotechnics*, mixed with a picrate as in a composition for a whistling rocket.

picric (pik'rik), *a.* [*< Gr. πικρός*, bitter, + *-ic*.] Same as *carbazotic*. — *Picric acid*, an acid which is used as a dye on silk and wool, but more often in conjunction with other colors as a modifier of shades than as an unmixed dye. Also used as an explosive. See *carbazotic*.

Picris (pik'ris), *n.* [NL. (Linneus, 1737), *< L. picris*, *< Gr. πικρίς*, a bitter herb, *< πικρός*, bitter.] A genus of composite plants, of the tribe *Cichoriaceae* and subtribe *Crepideae*, distinguished by its plumose pappus. There are about 25 species, in Europe, northern Africa, and temperate regions of Asia;

one, *P. hieracifolia*, the German *bitterkraut*, is also widely diffused throughout the northern hemisphere. All are erect, branching, bristly, and rough, with many alternate coarsely cut or entire leaves and bright-yellow flowers. Several species are cultivated for the flowers. *P. echinoides* (often called *Helminthia*) is the British seaside weed *ox-tongue*, so called from the shape of its leaves.

picrite (pik'rit), *n.* [*Gr. πικρός, bitter, + -ite².*] A name proposed for one of the many varieties of olivine-rock, in regard to whose nomenclature lithologists are far from being in accord. Gumbel used the term *palaeopicroite* to designate a rock occurring in the Fichtelgebirge, which, as he believed, consisted originally of olivine, with more or less of enstatite, diopside, augite, and magnetite—at present, however, almost entirely altered to serpentine and chlorite. Rosenbusch considers the *palaeopicroite* of Gumbel to be an olivine-dialase destitute of a feldspathic constituent. See *peridotite*.

picrocarmine (pik-rō-kär'min), *n.* [*Gr. πικρός, bitter, + E. carmine.*] In *histol.*, a stain made from carmine and picric acid.

Picrodendron (pik-rō-den'dron), *n.* [*NL. (Planchon, 1846), < πικρός, bitter, + δένδρον, tree.*] A genus of polypetalous trees, of the order *Simarubaceae* and tribe *Pierarnieae*, characterized by the solitary pistillate and amentaceous staminate flowers, the ovary with two pendulous ovules in each of the two cells, and the fruit a one-celled one-seeded drupe. The only species, *P. Juglans*, is a native of the West Indies, a small and exceedingly bitter tree, with alternate leaves of three leaflets, known as *Jamaica walnut* (which see, under *walnut*).

picrolite (pik-rō-lit), *n.* [*Gr. πικρός, bitter, + λίθος, stone.*] A fibrous or columnar variety of serpentine.

picromerite (pik-rom'e-rit), *n.* [*Gr. πικρός, bitter, + μέρος, part, + -ite².*] A hydrous sulphate of magnesium and potassium, obtained in monoclinic crystals and in crystalline crusts at the salt-mines of Stassfurt in Prussia.

picrophyll (pik-rō-fil), *n.* [*MGR. πικρόφυλλος, with bitter leaves, < Gr. πικρός, bitter, + φύλλον, leaf.*] A massive, foliated or fibrous, greenish-gray mineral from Sala in Sweden. It is an altered pyroxene.

picrophyllite (pik-rō-fil'it), *n.* [*< picrophyll + -ite².*] Same as *picrophyll*.

picrosamine (pik-ros'min), *n.* [*Gr. πικρός, bitter, + σμή, odor, + -ine².*] A mineral occurring in fibrous massive forms, having a bitter argillaceous odor when moistened. It is essentially a hydrous silicate of magnesium, and is found in the iron-mine of Engelsberg, near Pressnitz, in Bohemia.

picrotoxic (pik-rō-tok'sik), *a.* [*< picrotoxin + -ic.*] Of or derived from picrotoxin; having picrotoxin as the base; as, *picrotoxic acid*.

picrotoxin, picrotoxine (pik-rō-tok'sin), *n.* [*Gr. πικρός, bitter, + τοξ(ικόν), poison (see toxic), + -in².*] A bitter poisonous principle which exists in the seeds of *Anamirta cocculus* (*A. paniculata*), from which it is extracted by the action of water and alcohol. It crystallizes in small white needles or columns, and dissolves in water and alcohol. It acts as an intoxicating poison.

Pict' (pikt), *n.* [= *F. Pict* = *It. Picti, Pitti* (pl.), < *LL. Picti* (AS. *Pihtas, Pehtas*, pl., > *Sc. Pecht, Peaght*, etc.), the Picts (appar. so named from their practice of tattooing themselves), pl. of *L. pictus*, pp. of *pingere*, paint: see *picture, paint*; but the name (*LL. Picti*, etc.) may be an accom. of a native name.] One of a race of people, of disputed origin, who formerly inhabited a part of the Highlands of Scotland and other regions. Their language was Celtic. The Picts and Scots were united in one kingdom about the reign of Kenneth Macalpine (in the middle of the ninth century).

With Arts and Arms shall Britain tamely end,
Which naked Picts so bravely could defend?
Steele, *Grief A-la-Mode*, Epil.

Picts' houses. See *beehive house*, under *beehive*.

pict³ (pikt), *v. t.* A dialectal (Scotch) form of *picks³* for *pitch²*.

pictorially (pik-tō'ri-āl-i), *adv.* In the manner of a picture; as regards pictures; with or by means of pictures or illustrations.

pictoric, pictorical (pik-tor'ik, -i-kal), *a.* [= *Sp. pictórico = It. pittorico; < L. pictor, a painter (see Pictor), + -ic, -ical.*] Same as *pictorial*. [Rare.]

pictura (pik-tū'rā), *n.* [*L., painting, picture: see picture.*] In *zool.*, the pattern of coloration; the mode or style of coloring of an animal. *Pictura* differs from *coloration* in noting the disposition and effect of coloring, not the color itself.

picturable (pik-tū-ra-bl), *a.* [*< picture + -able.*] Capable of being pictured or painted. *Coloridge*.

pictural (pik-tū-rāl), *a. and n.* [*< picture + -al.*] 1. *a.* Relating to or represented by pictures. *Foreign Quarterly Rev.*
II. *n.* A picture.

The second rowme, whose walls
Were painted faire with memorable gestes
Of famous Wisards, and with picturals
Of Magistrates, of courts, of tribunals.
Spenser, *F. Q.*, II. ix. 52.

picture (pik'tūr), *n.* [*ME. pycture, < OF. picture, also peinture, F. peinture (with n due to orig. inf.) = Sp. Pg. pintura = It. pittura, pintura, < L. pictura, the art of painting, a painting, < pingere, fut. part. picturus, paint, = Skt. √ piç, adorn. From L. pingere are also ult. E. paint, depict, Pictor, pictorial, etc., pigment, pimento, pint, etc.] 1. The art or work of a painter; painting.*

Picture is the invention of Heaven; the most ancient, and most a-kin to Nature. It is itself a silent Work, And always of one and the same Habit; Yet it doth so enter and penetrate the inmost affection (being done by an excellent Artificer) as sometimes it overcomes the Power of Speech and Oratory.
B. Jonson, *Discoveries*.

Mr. Blomwell was allowed of Lely to have had a very good judgment in the art of picture, but his performances were not equal to his skill.
Roger North.

2. A painting intended to exhibit the image of any person, scene, object, etc., in the natural colors, and with a more or less close approximation to the appearance of reality; especially, such a painting having sufficient merit to rank as a work of art.

That only should be considered a picture in which the spirit, not the materials, observe, but the animating emotion of many such studies, is concentrated, and exhibited by the aid of long studied, painfully chosen forms, idealized in the right sense of the word.
Ruskin.

3. Hence, any resemblance or representation executed on a surface, as a sketch or drawing, or a photograph.

The buildings they [the Romans] most used to make were walls for Cities, Calcsies [caneeways] in high ways, Bridges over Rivers, fountains artificially made, statues, or greates pictures outer gates.
Guevara, *Letters* (tr. by Hellowes, 1577), p. 14.

4. An image; a representation as in the imagination.

Pictures and shapes are but secondary objects. Bacon.
My eyes make pictures when they are shut.
Coleridge, *Day Dream*.

But still she heard him, still his picture form'd
And grew between her and the pictured wall.
Tennyson, *Lancelot and Elaine*.

5. Any actual scene, group, combination, or play of colors, etc., considered as supplying the elements or as a suitable subject of a painting: as, the children at play formed a pretty picture.
—6. A vivid or graphic representation or description in words.

A complete picture and Genetical History of the Man and his spiritual Endeavour lies before you.
Carlyle, *Sartor Resartus*, I. 11.

7. In *entom.*, a colored pattern on a white or clear surface: generally used in describing the wings of *Hymenoptera*, *Diptera*, and *Neuroptera*. See *pictura*.—Dissected picture. See *dissect*.—Easel-picture. See *easel*.—Plane of the picture. Same as *perspective plane* (which see, under *perspective*).

picture (pik'tūr), *v. t.*; pret. and pp. *pictured*, ppr. *picturing*. [*< picture, n.*] 1. To depict or represent pictorially.

Your death has eyes in 's head then; I have not seen him so pictured.
Shak., *Cymbeline*, v. 4. 185.

An Attic frieze you give, a pictured song.
Lowell, *To Miss D. T.*

2. To form a mental image or picture of; spread out before the mind's eye as in a picture.

Do picture it in my mind.
Spenser.

Father Malachi Brennan, P. P. of Carrigaholt, was what I had often pictured to myself as the beau ideal of his caste.
Lever, *Harry Lorrequer*, vi.

3. To depict or describe in words; give a picture or vivid description of.

The animated strain of Pindar, where virtue is pictured in the successful strife of an athlete at the Isthmian games.
Sumner, *Orations*, I. 143.

picture-board (pik'tūr-bōrd), *n.* A deceptive painting of any object or figure on a shaped plank, such as a fierce dog in a garden, a bird on a balcony, or a porcelain bowl on a book-case. This conceit perhaps originated in Holland, but was prevalent in other countries of Europe in the eighteenth century.

picture-book (pik'tūr-būk), *n.* A book of pictures; also, a book illustrated with pictures.

To gie good lawful coin for ballants and picture-books.
Scott, *St. Ronan's Well*, vi.

The devil's picture-books. See *book*.

picture-nail (pik'tūr-nāl), *n.* A form of nail the shank of which can be driven into a wall without the (more or less ornamental) head, which is afterward screwed on or slid into its place.

picture-plane (pik'tūr-plān), *n.* Same as *perspective plane* (which see, under *perspective*).

picturer (pik'tūr-er), *n.* [*< picture + -er¹.*] A painter.

Zeuxis, the curious picturer, painted a boy holding a dish full of grapes in his hand, done so lively that the birds, being deceived, flew to peck the grapes.
Fuller, *Holy State*, III. xiii. § 10.

picture-rod (pik'tūr-rod), *n.* A rod attached horizontally to a wall near the ceiling as a support for pictures. Brass tubing was much used for this purpose; but the picture-rod has been largely superseded by the picture-molding.

picturesque (pik-tū-resk'), *a.* [= *F. pittoresque, < It. pittoresco (= Sp. pintoresco = Pg. pittoresco, pinturesco), < pittura, a picture, painting: see picture.*] 1. Picture-like; possessing notably original and pleasing qualities such as would be effective in a picture; forming or fitted to form an interesting or striking picture, as a mountain waterfall, or a pine-covered headland, or a gay costume amid appropriate surroundings. The word does not imply the presence of the highest beauty or of sublimity—qualities which belong to a more elevated plane.

Picturesque properly means what is done in the style and with the spirit of a painter; and it was thus, if I am not much mistaken, that the word was commonly employed when it was first adopted in England.

D. Stewart, *Philos. Essays*, i. 5.

We all know what we mean by the word *picturesque* as applied to real objects: for example, we all consider that a feudal castle or abbey, when it has become an ivied ruin, is a picturesque object.
Encyc. Brit., VII. 450.

Measured by its hostility to our modern notions of convenience, Chester is probably the most picturesque city in the world.
Henry James, Jr., *Trans. Sketches*, p. 12.

He [the traveler] will miss . . . the picturesque costumes to which he has become used further south.
E. A. Freeman, *Venice*, p. 58.

2. Strikingly graphic or vivid; abounding or diversified with striking and vivid imagery: as, *picturesque* language.

The epithet *picturesque* . . . means that graphical power by which Poetry and Eloquence produce effects on the mind analogous to those of a picture.

D. Stewart, Philos. Essays, I. 6.

Where he (Dryden) is imaginative, it is in that lower sense which the poverty of our language, for want of a better word, compels us to call *picturesque*.

Lowell, Among my Books, 1st ser., p. 64.

picturesquely (pik-tŭ-resk'li), *adv.* In a picturesque manner.

picturesqueness (pik-tŭ-resk'nes), *n.* The character of being picturesque.

picture-writing (pik-tŭr-rī'ting), *n.* 1. The use of pictures or of pictured representations in recording events or expressing ideas; pictography: as, the *picture-writing* of the North American Indians.

There was a period when art and writing were not divorced as they are at present, but so blended into one that we can best express the union by such a compound as *Picture-writing*. C. T. Newton, Art and Archaeol., p. 9.

2. A writing or inscription consisting of pictures or pictorial signs.

pical, pecul (pik'ul), *n.* [Malay.] A weight in use in China and the East generally, containing 100 kin or catties, and equal to about 133½ pounds avoirdupois. By the Chinese it is called *tan*.

picule (pik'ul), *n.* [*< NL. *piculus*, dim. of *L. picus*, a woodpecker: see *Picus*.] A piculet.

piculet (pik'ul-et), *n.* [*< picule + -et*.] Any one of the small soft-tailed woodpeckers of the subfamily *Picumninae*, family *Picidae*, of the genera *Picumnus*, *Vicia*, *Sasia*, and *Verreauxia*. See *cut* under *Picumnus*.

piculule (pik'ul-lul), *n.* [*< picule + -ule*.] A bird of the family *Dendrocolaptidae*.

Picumninae (pik-um-nī'nē), *n. pl.* [*NL. (G. R. Gray, 1840), < Picumnus + -inae*.] A subfamily of *Picidae*, typified by the genus *Picumnus*, and characterized by the soft non-scapular tail; the picules, piculets, or pygmy woodpeckers. It is a small group of small woodpeckers of a low or generalized type, inhabiting tropical regions of both hemispheres, as South America, the East Indies, and Africa. The species have generally four toes, yoked in pairs as in the true woodpeckers, but the East Indian genus *Sasia* has only three. Also *Picumnidae*, as a separate family.

Picumnus (pi-kum'nus), *n.* [*NL. (Temminck), < L. Picumnus*, a deity of the Romans, a personification of the woodpecker, *< picus*, a woodpecker: see *Picus*.] The typical genus of *Picumninae*, formerly conterminous with the subfamily, now usually restricted to the American species, as *P. lepidotus*, all of

Piculet (*Picumnus lepidotus*).

which have four toes. Also called *Piculus*, *As-thenurus*, and *Microcolaptes*.

Picus (pi'kus), *n.* [*NL. < L. picus*, a woodpecker, perhaps *< pingere* (*< pic*), paint, in allusion to the painted or spotted appearance of the bird. Cf. *Pica*, *pie*.] A Linnean genus of woodpeckers, formerly coextensive with the family *Picidae*, later variously restricted. The name is at

Greater Spotted Woodpecker (*Picus major*).

present used: (a) for the generic group of which the great black woodpecker of Europe, *Picus martius*, is the type, otherwise called *Dryocopus* (see *cut* under *Dryocopus*); (b) for a large series of smaller species, spotted with black and white, such as *P. major* and *P. minor* of Europe, and the hairy and downy woodpeckers of America, *P. villosus* and *P. pubescens*.

piddle (pid'l), *v. i.*; pret. and pp. *piddled*, ppr. *piddling*. [A var. of *pittle*, the variation being due perhaps to association with *peddle*. Cf. *peddling*, var. of *piddling*.] 1. To deal in trifles; spend time in a trifling way or about trifling or unimportant matters; attend to trivial concerns, or to the small parts rather than to the main; trifle.

She plays and sings too, dances and discourses,
Comes very near essays, a pretty poet,
Begins to piddle with philosophy.

Fletcher, Wit without Money, I. 2.

2. To pick at table; eat squeamishly or without appetite. *Swift*.

Content with little, I can piddle here
On brocol and mutton, round the year.

Pope, Imit. of Horace, II. ll. 137.

3. To make water; urinate: a childish word. **piddler** (pid'lər), *n.* [*< piddle + -er*.] 1. One who piddles; a mere trifler or good-for-nothing.

Coz. You are good at the sport.
Cal. Who, I? a piddler, sir.

Massinger, Great Duke of Florence, IV. 2.

2. A squeamish eater.

piddling (pid'ling), *p. a.* 1. Trifling. Also *peddling*.

Nine geese, and some three larks for piddling meat.

Middleton, Mayor of Queenborough, v. 1.

Let children, when they versify, stick here
And there these piddling words for want of matter.
Poets write masculine numbers.

Shirley, Love in a Maze, II. 2.

The ignoble Hucsterage of piddling Tithes.

Milton, Reformation in Eng., II.

2. Squeamish; difficult to please, especially in eating.

A piddling reader . . . might object to almost all the
rhymes of the above quotation. Goldsmith, Criticisms.

piddock (pid'ok), *n.* [Origin obscure.] A mollusk of the genus *Pholas* or family *Pholadidae*; especially, a name of those species which are found in British waters, used rarely for food but much for bait, as *P. dactylus*; a pholad.

Piddocks (*Pholas dactylus*) in their holes.

It has a long ovate shell with a narrowed tongue-like extension in front, and the entire surface marked with longitudinal and concentric grooves and ridges, and radiating rows of sharp spines. The beaks are anterior and covered with callousities. The piddock is capable of perforating the soft rocks, into which it burrows. It is a common inhabitant of European seas, and in winter is frequently killed by the cold when left exposed by low tide. It is edible, and is sought for by digging it out of the clay or shale. After being removed from the water for a day or so, the animal changes color, and is said to shine like a glow-worm. Also called *clam*, *dactyl*, and *long oyster*. See *Pholas*, and *cut* under *accessory*.

II. *n.* A native or an inhabitant of Piedmont. **pie** (pid), *a.* [*< Piedmont + -ite*]. A mineral closely related in form and composition to epidote, but containing manganese, hence sometimes called *manganepidote*. It is of a reddish-brown color, and is found at St. Marcel in Piedmont.

pie (pid), *n.* The state of being *pie*; diversity of colors in spots. Shak., *W. T.*, IV. 4. 87.

pie (pid), *a.* [*< F. piedouche, < It. peduccio, a corbel; dim. of piede, pie, foot, < L. pes (ped-) = E. foot: see foot.*] In arch., a bracket, pedestal, or socle, serving to support a bust, candelabrum, or other ornament.

pie (pid), *n.* See *piepoudre*.

pie (pid), *a.* [*< F. pied-droit, < L. pes directus, 'straight foot': see pedal and direct.*] In arch., an engaged pier, or a square pillar, projecting from the face of a wall. It differs from a pilaster in that it has neither base nor capital.

pie (pid), *a.* Having *pie* wings: specific in the name *pie*-winged coot, the velvet scoter. [New Eng.]

pie (pid), *n.* The chaffinch.

pie (pid), *n.* [Perhaps a var. spelling and use of *peel*.] A wedge for piercing stones. *Simmonds*.

pie (pid), *a.* An obsolete spelling of *peeled*.

pie (pid), *a.* Same as *magpie*.

pie (pid), *n.*; pl. *piemen* (-men). A man who sells *pies*; also, a man who makes *pies*.

There are fifty street *piemen* plying their trade in London: the year through, their average takings are one guinea a week. *Mayhew*, *London Labour and London Poor*, I. 224.

pie (pid), *n.* The magpie. Also *nanpie*.

pie (pid), *n.* 1. Same as *peen*.—2. In arch., an arsis; a salient angle.

pie (pid), *n.* A rebate on the bottom *pie* or angle of the riser of a step in

a stone stair. It is intended to rest upon the upper angle of the next lower step. [Scotch.]

pie (pid), *n.* Same as *angle-rafter*. [Scotch.]

pie (pid), *v. i.* An obsolete spelling of *peep*.

pie (pid), *n.* Garden-rhubarb, *Rheum Rhabarbarum*: so named from its use for *pies*.

His *pie*-plants (the best in town), compulsory monastics, blanched under barrels, each in his little hermitage, a vegetable Certosa. *Lovell*, *Cambridge Thirty Years Ago*.

Wild pie-plant. In Utah and California, *Rumex hymenosepalus*, with acid stem and leaves, used as a *pie*-plant. See *canadagre*.

pie (pid), *n.* [Also *piepoudre* (ML. *curia pedis pulverizati*, 'court of dusty foot'); *< OF. piepoudreux* (ML. *pedepulverosus*), a stranger, peddler, or hawk who attends fairs, *F. pied poudreux*, lit. 'dusty foot' (cf. equiv. *OF. pied gris* 'gray foot'): *pie*, *< L. pes (ped-)* = *E. foot*; *poudreux*, *< poudre*, powder: see *powder*.] An ancient court of record in England, once incident to every fair and market, of which the steward of the owner or holder of the toll was the judge. It was instituted to administer justice for all commercial injuries done in that fair or market, but not in any preceding one. *Imp. Dict.*

For chydres of Chester were chose many dales To ben of conceill nor causa that in the court hangid, And peldid *piepoudris* alle manere pleyntis.

Richard the Redeless, III. 319.

Is this well, goody Joan, to interrupt my market in the midst, and call away my customers? can you answer this at the *pie-poudres*? *B. Jonson*, *Bartholomew Fair*, III. 1.

The lowest, and at the same time the most expeditious, court of justice known to the law of England is the court of *piepoudre*, *curia pedis pulverizati*, so called from the dusty feet of the suitors; or, according to Sir Edward Coke, because justice is there done as speedily as the dust can fall from the foot. *Blackstone*, *Com.*, III. iv.

pie (pid), *n.* [*< piepoudre*] Having dusty feet. [Rare.]

One day two peasants arrived in the Eschenheimer Gasse *pie-powdered*, having walked many hundred miles from the Polish backwoods. *Westminster Rev.*, LXXIV. 84.

pie (pid), *n.* [*< ME. pere, < OF. pere, pierre, pierre*, stone, a pier, *F. pierre*, a stone, = *Pr. petra*, *petra*, *peya* = *Sp. piedra* = *Pg. pedra* = *It. pietra*, a stone, rock, *< L. petra*, a mass of rock, crag (ML. also a castle on a rock, a tomb of stone, slate), *< Gr. πέτρα*, *Epic* and *ionic πέτρα*, a rock, mass of rock, crag, ridge, ledge, *πέτρος*, a piece of rock, a stone (in prose usually λίθος), later also, like πέτρα, a mass of rock. From the *Gr. πέτρα*, *πέτρος*, besides *petrary*, *perrier*, etc., are also ult. *E. peter*¹, *petrel*, and in comp. *petrific*, *petrify*, *petroleum*, etc., *saltpeter*, *samphire*, etc.] 1. (a) A mole or jetty carried out into the sea, to serve as an embankment to protect vessels from the open sea, to form a harbor, etc. (b) A projecting quay, wharf, or other landing-place.

But before he could make his approach, it was of necessity for him to make a *pere* or a mole, whereby they might passe from the mayne land to the citie.

J. Brende, tr. of Quintus Curtius, fol. 54.

(c) One of the supports of the spans of a bridge, or any structure of similar character.—2. In arch. or building: (a) The solid support from which an arch springs. See first cut under *arch*.

For an interior, an arch resting on a circular column is obviously far more appropriate than one resting on a pier. *J. Ferguson*, *Hist. Arch.*, I. 305.

(b) In medieval architecture, a large pillar or shaft; specifically, a compound or a square pillar.

At Siena there is not merely a slight difference in the size of corresponding piers, but in many of them the centres, as well as the circumscribing lines of the bases and capitals, are out of line one with another.

C. E. Norton, *Church-building in Middle Ages*, p. 128.

(c) One of the solid parts between openings in a wall, such as doors and windows.

On the facade of the Duomo of Orvieto, upon one of the piers at the side of its doors of entrance, were sculptured representations of the Last Judgment and of Hell. *C. E. Norton*, *Travel and Study in Italy*, p. 127.

(d) The wall or post, of square or other form, to which a gate or door is hung.

(e) In a physical laboratory or observatory, a structure, generally of masonry, designed by its stability to prevent vibration in instruments which are supported by it.—*Abutment pier*, the pier of a bridge next the shore.—*Floating pier*, a decked

barge or calson used as a landing-stage, and connected with the shore by a pivoted bridge that enables it to rise and fall with the tide; a landing-stage.

piéage (pî'âj), *n.* [*< pier + -age.*] Toll paid for using a pier.

pier-arch (pîr'ârch), *n.* An arch resting upon piers.

perce (pêrs, formerly also pèrs), *v.*; pret. and pp. *perceod*, ppr. *percing*. [Early mod. E. also *perse*, *pearce*, *pearce*, *perce*; dial. *pearch*, *peerch*; < ME. *percen*, *percyn*, *persen*, *parcen*, *perchen*, *perishen*, *perishen*, < OF. *percer*, *perser*, *percier*, *perchier*, *parchier*, F. *percer* (Walloon *percher*), *pierce*, bore; origin uncertain; by some regarded as contracted < OF. *pertuisier*, F. *pertuiser* (= It. *pertugiare*), < *pertuis* = It. *pertugio*, a hole, < ML. **pertusium*, also *pertusius*, a hole, < L. *pertusus*, pp. of *pertundere*, perforate, < *per*, through, + *tundere*, beat: see *pertuse*. Cf. *partizan*, from the same source. Cf. also *parch*.] I. *trans.* 1. To thrust through with a sharp or pointed instrument; stab; prick.

Mordrains to whom almighty God after that appeared & shewed to hym his syde handes & feet *perysshed* with the spere and nayles.

Joseph of Arimathe (E. E. T. S.), p. 31.

One of the soldiers with a spear *perceod* his aide, and forthwith there came out blood and water. John xix. 34.

If Percy be alive, I'll *perce* him.

Shak., 1 Hen. IV., v. 3. 59.

If thou wilt strike, here is a faithful heart;

Pierce it, for I will never heave my hand

To thine. Beau. and Fl., Maid's Tragedy, III. 2.

2. To cut into or through; make a hole or opening in.

This must be doon by *percing* the mountayne,

The water so to lede into the playne.

Palladius, Husbandrie (E. E. T. S.), p. 176.

A Cask *pearce't* to be spent,

Though full, yet runs not till we glue it vent.

Sylvester, tr. of Du Bartas's Weeks, I. 1.

The mountain of Quarantina, the scene of the forty days temptation of our Saviour, is *perceod* all over with the caves excavated by the ancient anchorites, and which look like pigeons' nests.

R. Curzon, Monast. in the Levant, p. 179.

3. To penetrate; enter into or through; force a way into or through: as, to *perce* the enemy's center.

A short orison of the rightous man or of the iust man thirllith or *perisheth* heuen.

Gesta Romanorum (E. E. T. S.), p. 47.

Steed threatens steed in high and boastful neighs,

Piercing the night's dull ear.

Shak., Hen. V., iv., Prol., I. 11.

The Riuer doth *perce* many daies Iourney the entrafles of that Country.

Capt. John Smith, Works, II. 194.

In May, when sea-winds *perceod* our solitudes,

I found the fresh Rhodora in the woods.

Emerson, The Rhodora.

4. To penetrate with pain, grief, or other emotion; wound or affect keenly; touch or move deeply.

Did your letters *perce* the queen to any demonstration of grief?

Shak., Lear, iv. 3. 11.

Tears did gush from every eye, and pithy speeches *perceod* each others heart.

N. Morton, New England's Memorial, p. 24.

perforate, *transf.*, etc. See *perforate*.

II. intrans. To enter or penetrate; force a way.

She would not *perce* further into his meaning than himself should declare.

Shak., Lear, iv. 3. 11.

These words *perce* deeper than the wounds I suffer, The smarting wounds of loss.

Fletcher, Humorous Lieutenant, II. 2.

But see! the mists are stirring, rays of light

Pierce through the haze, as struggling to be free.

Jones Very, Poema, p. 99.

perceable (pêr'sa-bl), *a.* [*< pierce + -able.*] Capable of being pierced.

perceod (pêrst), *p. a.* 1. Penetrated; entered by force; perforated.—2. In *her.*: (a) Cut through with an opening not so large as that implied in *cleché*, and not of the shape of the bearing.

The shape of the opening should be stated in the blazon, as triangular, lozenge, etc.; when not stated, the opening is supposed to be circular. Compare *quarter-perceod*, *quarterly pierceod*, under *quarterly*.

(b) Having an arrow, spear, or other weapon thrust into it but not passing through, as an animal used as a bearing. Compare *transfired*.—**Mullet pierceod**.

See *mullet*.—**Pierced medallion**, a thin plate ornamented by a pattern cut through its whole substance and applied to the surface of a vase or similar object, the body of the piece showing through the openings in the medallion: used in metal-work of some kinds, and in some manufactures of porcelain. Also *perforated medallion*.—**Pierced work**, decoration produced by numerous openings, generally small. The solid pattern is usually heightened by chasing, embossing, or some inlaid ornamentation such as niello.

percel (pêr'sel), *n.* [*< pierce + -el.* Cf. *percer*.] An instrument for forming vents in casks; a piercer.

percer (pêr'sér), *n.* [Early mod. E. also *percer*; < ME. *persour*, < OF. *perceur*, piercer, < *percer*, pierce: see *pierce*.] 1. One who or that which pierces.

Such a strong *percer* is money, and such a gredie glotton is avarice.

Hall, Hen. VI., an. 16.

2. Any sharp instrument used for piercing, boring, perforating, etc., such as an awl, a gimlet, or a stiletto. Specifically—(a) A piercer. (b) An instrument used in making eyelets. (c) A vent-wire used by founders in making holes. (d) A bow-drill.

3. In *entom.*, that organ of an insect with which it pierces bodies; the ovipositor. Also called *terebra*.

The hollow instrument *terebra* we may English *percer*. Ray, Works of Creation.

piercing (pêr'sing), *n.* [Verbal *n.* of *pierce*, *v.*] 1. Penetration. Specifically—2. In *metal-working*, the operation of sawing out a pattern or an object from a plate, as distinguished from punching it out. It is done with a jig or band-saw.

piercing (pêr'sing), *p. a.* 1. Penetrating; sharp; keen: as, *piercing* eyes; a *piercing* wind.

The air in this bishopric is pretty cold and *piercing*. DeFoe, Tour thro' Great Britain, III. 220.

2. That touches or moves with pity, alarm, anguish, etc.: as, a *piercing* cry.

In *piercing* phrases, late, The anatomy of all my woes I wrote.

Sir P. Sidney (Arber's Eng. Garner, I. 532).

piercing-drill (pêr'sing-dril), *n.* See *drill*.

piercing-file (pêr'sing-fil), *n.* A sharp narrow file used for enlarging drilled holes. E. H. Knight.

piercingly (pêr'sing-li), *adv.* In a piercing manner; with penetrating force or effect; sharply.

piercingness (pêr'sing-nes), *n.* The power of piercing or penetrating; sharpness; keenness.

piercing-saw (pêr'sing-sâ), *n.* A very fine thin saw-blade clamped in a frame, used by goldsmiths and silversmiths for sawing out designs, the blade being introduced into holes previously drilled; a buhl-saw. E. H. Knight.

pierrille (piêr-el'), *n.* [*< F. pierre*, stone (see *pier*), + dim. *-elle*.] A filling for a ditch, composed of stones thrown in without regularity, and covered with earth or clay to afford a smooth upper surface.

pier-glass (pêr'glâs), *n.* A mirror used in an apartment to cover the whole or a large part of the wall between two openings; especially, such a mirror set up between two windows, and forming a part of the decoration of a room. Compare *pier-table*.

Pierian (piêr'i-an), *a.* [*< L. Pierius* (> It. Sp. *Pierio*), Pierian, sacred to the Muses, poetic, < *Pieria*, < Gr. *Πιερία*, a district, *Πιερος*, a mountain, in the north of Thessaly, haunted by the Muses (hence called *Pierides*).] 1. Of or belonging to Pieria, or the Pierides or Muses.

A little learning is a dangerous thing; Drink deep, or touch not the *Pierian* spring.

Pope, Essay on Criticism, II. 15.

And ye, *Pierian* Sisters, sprung from Jove And sage Mnemosyne. Wordsworth, Ode, 1814.

2. [*i. c.*] In *entom.*, same as *pieridine*.

Pieridæ (piêr'i-dê), *n. pl.* [NL., < *Pieris* + *-idæ*.] The *Pieridæ* or *Pierinæ* as a separate family.

Pierides (piêr'i-dêz), *n. pl.* [L., < Gr. *Πιερίδες*, < *Πιερος*, a mountain in northern Thessaly: see *Pierian*.] The nine Muses.

Pieridinae (piêr'i-di-nê), *n. pl.* [NL., < *Pieris* (*Pierid-*) + *-inae*.] A very large subfamily of *Papilionidæ*, typified by the genus *Pieris*. They have no concavity of the abdominal edge of the hind wings, the discoidal cellule is closed, the tarsal hook not indented, and the slightly pubescent larva attenuated at the extremity. The subfamily includes about 30 genera and 800 species, and is of world-wide distribution. The larvae, in many cases, are of great economic importance from their destructive habits. Also *Pierinae*.

pieridine (piêr'i-di-n), *a.* Of or pertaining to the *Pieridæ*. Also *pierian*.

Pieris (piêr-is), *n.* [NL. (Schränk, 1801), < Gr. *Πιερίς*, sing. of *Πιερίδες*, the Muses: see *Pierides*.] A genus of butterflies, typical of the *Pieridinae*. They are rather small whitish or yellowish butterflies, whose fore wings are rounded at the tip and marked with black. The genus is now restricted has over 120 species, of all parts of the world. Most of those of North America are known as *cabbage-butterflies*, with a qualifying word, because their caterpillars feed on the

cabbage and other cruciferous plants. *P. oleracea* is the pot-herb or northern cabbage-butterfly (see cut under *pot-herb*); *P. protodice*, the southern cabbage-butterfly; *P. monardæ*, the larger cabbage-butterfly. The commonest one in the United States now is *P. rapæ*, imported from Europe in 1856 or 1857, and known as the *rape-butterfly* in England. See also cuts under *cabbage-butterfly* and *cabbage-worm*.

pierre perdue (pyâr per-dü'), [*F.*, lit. 'lost stone': *pierre*, stone; *perdue*, fem. of *perdu*, pp. of *perdre*, lose: see *pier* and *perdue*.] In *engin.*, masses of stone thrown down at random on a given site to serve as a subfoundation for regular masonry, as in the construction of a breakwater, etc.

pierrier, *n.* Same as *perry*.

pierrier, *n.* See *perrier*.

pierrot (pye-rô'), *n.* [*F.*, dim of *Pierre*, Peter.] 1. A form of woman's basque cut low in the neck, but having sleeves, worn toward the close of the eighteenth century.—2. A buffoon whose costume was white, or white with stripes, large and loose, and with very long sleeves: a popular character in masked balls.

pier-table (pêr'tâ-bl), *n.* An ornamental table intended to stand between two windows and to occupy the whole of the lower part of the pier between the windows. It is often combined with a pier-glass, and the glass is sometimes carried down below the top of the table and between its uprights.

piet, *n.* See *pize*.

piet, *piot* (pi'et, pi'ot), *n.* [Also *pyot*, *piat*, *pyat*; < *pie* + *-et*.] 1. The magpie.—2. The water-ouzel or water-piet, *Cinclus aquaticus*: so called from the party-colored plumage. [Scotland.]

pieted, *pioted* (pi'et-ed, pi'ot-ed), *a.* [*< piet*, *piot*, + *-ed*.] *Pied* or *piebald*. [Scotch.]

Pietism (piê-tizm), *n.* [= *F. piétisme* = Pg. *pietismo*; as *piet-y* + *-ism*.] 1. The movement inaugurated by the Pietists, who, from the latter part of the seventeenth century onward, sought to revive the declining piety of the Lutheran churches in Germany; the principles and practices of the Pietists.—2. [*i. c.*] Devotion or godliness of life, as distinguished from mere intellectual orthodoxy: sometimes used approbatively for mere affectation of piety.

Pietist (piê-tist), *n.* [= *F. piétiste* = Pg. It. *pietista*; as *piet-y* + *-ist*.] One of a class of religious reformers in Germany in the seventeenth and eighteenth centuries. Their principles as defined by the originator of the movement, Spener (later part of the seventeenth century), included the most earnest study of the Bible, the participation of the laity in the spiritual work of the church, a more practical type of piety, charity in the treatment of heretics, infidels, and others, a reorganization of the systems of religious and theological instruction in accordance with these principles, and a more enlightened style of preaching. Spener's disciples were led into extravagances of feeling; hence the term is sometimes applied approbatively to any one who lays stress on mere emotionalism in religion, as distinguished from intelligent belief and practical life.

Pietistic (piê-tis'tik), *a.* [= Pg. *pietístico*; as *Pietist* + *-ic*.] 1. Of or pertaining to the Pietists.—2. [*i. c.*] Characterized by strong religious feeling as distinguished from mere intellectual orthodoxy, or doctrinalism.

Pietistical (piê-tis'ti-kal), *a.* [*< Pietistic* + *-al*.] Same as *Pietistic*, in either sense.

pietra dura (pyâ'trâ dô-râ'), [*It.*, hard stone: see *pier* and *dure*.] Ornamental work in inlay of hard stones, such as agates and jaspers, especially when on a somewhat large scale.

pietra serena (pyâ'trâ se-râ-nâ'), [*It.*, clear stone: see *pier* and *serene*.] A hard gray sandstone quarried in the hills near Fiesole, and much used for building in Florence and other cities of Tuscany.

Pieris (piêr-is), *n.* [NL. (Schränk, 1801), < Gr. *Πιερίς*, sing. of *Πιερίδες*, the Muses: see *Pierides*.] A genus of butterflies, typical of the *Pieridinae*. They are rather small whitish or yellowish butterflies, whose fore wings are rounded at the tip and marked with black. The genus is now restricted has over 120 species, of all parts of the world. Most of those of North America are known as *cabbage-butterflies*, with a qualifying word, because their caterpillars feed on the

piety (pi'e-ti), *n.* [Formerly also *pietie* (earlier *pite*, etc.: see *pity*); < OF. *piete*, F. *piété* = Pr. *pietat*, *pietat*, *pidat* = Sp. *piEDAD* = Pg. *piEDAD* = It. *pietà*, < L. *pieta*(-t)s, piety, < *pius*, pious: see *pious*. Cf. *pity*, an earlier form of the same word.] 1. The character of being pious or having filial affection; natural or filial affection; dutiful conduct or behavior toward one's parents, relatives, country, or benefactors.

If any widow have children or nephews, let them learn first to shew piety at home, and to requite their parents: for that is good and acceptable before God. 1 Tim. v. 4.

How am I divided
Between the duties I owe as a husband
And piety of a parent!

Fletcher, Spanish Curate, iv. 1.

2. Faith in and reverence for the Supreme Being; filial obedience inspired by these sentiments; godliness.

Goodness belongs to the Gods, Piety to Men, Revenge and Wickedness to the Devils. Howell, Letters, ii. 11.

The Common wealth which maintains this discipline will certainly flourish in vertu and piety.

Milton, Church-Government, ii. 3.

Pelican in her piety. See *pelican*. = Syn. 2. Devotion, Sanctity, etc. See *religion*.

piewipe (pi'wip), *n.* [Imitative.] Same as *peewit* (b).

piezo-electricity (pi'e-zō-ē-lek-tris'i-ti), *n.* [Irreg. < Gr. *πιέζειν*, press, + E. *electricity*.] Electricity produced by pressure, as that of a sphere of quartz, which becomes electrified by pressure.

piezometer (pi-e-zom'e-tēr), *n.* [= F. *piézomètre* = Pg. *piezometro*; irreg. < Gr. *πιέζειν*, press, + *μέτρον*, measure.] 1. Any instrument for ascertaining or testing pressure.

—2. An instrument for showing the compressibility of water or other liquid, and the degree of such compressibility under varying pressures. A common form (see figure) consists of a strong glass cylinder, within which is supported a small vessel (C) with a graduated stem containing the liquid under experiment, also a thermometer (T) and manometer (M). The pressure is exerted by the piston moved by a screw at the top, and transmitted by the water with which the cylinder is filled to the liquid in the vessel C. The amount of this pressure is measured by the manometer. The compressibility is shown by the fall of the liquid (and index) in the graduated stem, and its amount can be readily calculated if the capacity of C, in terms of these scale-divisions, is known.

3. An instrument consisting essentially of a vertical tube inserted into a water-main, to show the pressure of the fluid at that point, by the height to which it ascends in the tube of the piezometer.—4. A sounding-apparatus in which advantage is taken of the compression of air in a tube by the pressure of the water at great depths to indicate the depth of the water.—5. An instrument for testing the pressure of gas in the bore of a gun.

piff (pi'), *n.* See *paff*.

piffero (pi'f'e-rō), *n.* [It. *piffero*, *piffera*, *pifara*, formerly also *pifera*, *pifaro* = Sp. *pifaro* (also *pifano*) = Pg. *pifaro* (also *pifano*), a fife, < OHG. *pfisfa*, a pipe, fife: see *pipe*, *fife*.] 1. A musical instrument, either a small flageolet or a small oboe, used by strolling players in some parts of Italy and Tyrol.—2. The name of an organ-stop: same as *bifara*.

big (pig), *n.* [Also dial. *peg*; early mod. E. *pygge*; < ME. *pygge*, *pygge* = D. *bigge*, *big* = LG. *bigge*, a pig; origin obscure. An AS. **pecg* is mentioned as occurring "in a charter of Swinford copied into the Liber Albus at Wells" (Skeat, on authority of Earle); but this is doubtful; an AS. **pecg* would hardly produce the E. form *big*. Whether the word is related to LG. *bigge*, a little child, = Dan. *pige* = Sw. *piga* = Icel. *pika*, a girl, is doubtful.] 1. A hog; a swine; especially, a porker, or young swine of either sex, the old male being called *boar*, the old female *sow*. It is sometimes used in composition to designate some animal likened to a pig: as, a *guinea-pig*. See *hog*, *Suida*.

Together with the cottage . . . what was of much more importance, a fine litter of new-farrowed pigs no less than nine in number perished. Lamb, Roast Pig.

2. The flesh of swine; pork.

Now pig it is a meat, and a meat that is nourishing and may be longed for, and so consequently eaten; it may be eaten; very exceedingly well eaten.

B. Jonson, Bartholomew Fair, i. 1.

3. An oblong mass of metal that has been run while still molten into a mold excavated in sand; specifically, iron from the blast-furnace run into molds excavated in sand. The molds are a series of parallel trenches connected by a channel running at right angles to them. The iron thus cools in the form of semi-cylindrical bars, or pigs, united at one end by another bar called the *sow*: so called from a coarse comparison with a litter of pigs suckling.

[We found] many barres of Iron, two pigs of Lead, foure Fowlers, Iron shot, and such like heaule things throwne here and there.

Quoted in Capt. John Smith's Works, I. 104.

Sometimes a pig will solidify partly as white iron partly as grey, the crystallization having commenced in patches, but not having spread throughout the whole mass before it solidified; such iron is known as mottled pig.

Encyc. Brit., XIII. 284.

4. A customary unit of weight for lead, 301 pounds.—**All-mine pig**, pig-iron smelted entirely from ore or mine material.—**A pig in a poke**. See *poke*.—**Hunt the pig**. See *hunt*.—**Long pig, masked pig**, etc. See the adjectives.—**Pig's whisper**. (a) A low or inaudible whisper. (b) A very short space of time. [Slang.]

You'll find yourself in bed in something less than a pig's whisper.

Dickens, Pickwick, xxxii.

Please the pigs, if circumstances permit: a trivial rustic substitute for please God or if it please Providence. Pigs is here apparently a mere alliterative caprice; it has been variously regarded as an altered form of *pie*, *pyz*, the box which held the host; or of *piezies*, fairies; or of the "Saxon pig, a virgin" (as if meaning the Virgin Mary). These conjectures are all absurd. As to the last, no "Saxon pig" exists; the entry "*piga*, puellula," in Somner, Lye, etc., is an error.

I'll have one of the wigs to carry into the country with me, and if (it) please the pigs. T. Brown, Works, ii. 198.

Sussex pig, a vessel in the form of a pig, made at the Bellevue or other Sussex pottery. When empty it stands upon the four feet, but when in use it stands upright, its head is lifted off to allow of its being filled, and it serves as a drinking-cup. The feat of being ordered to drink a "hog'shead" of beer in response to a toast, or the like, refers to the emptying of such a cup. See *Sussex rustic ware*, under *ware*.—**To bring one's pigs to a pretty market**, to make a very bad bargain, or to manage anything in a very bad way.

pig¹ (pig), *v. t.*; pret. and pp. *pigged*, ppr. *pigging*. [*pig¹*, *n.*] 1. To bring forth pigs; bring forth in the manner of pigs; litter.—2. To act as pigs; live like a pig; live or huddle as pigs: sometimes with an indefinite *it*.

But he hardly thinks that the sufferings of a dozen fellows pigging together on bare bricks in a hole fifteen feet square would form a subject suited to the dignity of history.

Macaulay, Sir William Temple.

To pig it like the prodigal son in the solitudes of ostracism.

Westminster Rev., CXXVIII. 873.

The working man here is content to pig in, to use an old-country term, in a way that an English workman would not care to do.

The Engineer, LXV. 480.

pig² (pig), *n.* [Abbr. of *earthen*.] 1. An earthen vessel; any article of earthenware.

Quhair the pig breaks let the shells lie.

pigeon (pi'j'on), *n.* [Early mod. E. also *pidgeon*, *pigion*; < ME. *pigeon*, *pijon*, *pygeon*, *pyjon*, < OF. *pigeon*, *pyjon*, *pyjon*, *pignon*, also *pipion*, F. *pigeon* = Pr. *pijon* = Sp. *pichon* = It. *picione*, *pipione*, a pigeon, a young bird, < L. *pipio*(-n), a young piping or chirping bird, a squab, < *pipire*, chirp: see *pipe*, *peep*.] For the form, cf. *widgeon*. The native (AS.) word for 'pigeon' is *dove*: see *dove*.] 1. Any bird of the family *Columbidae* (which see for technical characters); a dove. The species are several hundred in

number, and are found in nearly all parts of the world. Many kinds are distinguished by qualifying terms, as *fruit-pigeon*, *ground-pigeon*, *passenger-pigeon*, *nutmeg-pigeon*, *rock-pigeon*, and any of them may be called *dove*, as *stock-dove*, *rock-dove*, *ring-dove*, *turtle-dove*, *wood-dove*. (See the compound names, and *dove*.) Few species are commonly seen in confinement, except in very extensive aviaries, one of the commonest being the ring-dove; but the rock-pigeon or rock-dove, *Columba livia*, is everywhere thoroughly domesticated, and perhaps all the artificial varieties have been produced by careful breeding from this one. Fancy pigeons have naturally received many fanciful names of their breeds, strains, and endless color-variations. Some of these names are—(a) from localities, actual or alleged, as Antwerp, barbs (from Barbary), Brunswicks, Burmeses, Damascenes, Florentines, Lahores, Orientals, Swabians; (b) from resemblance to other birds, as magpies, owls, starlings, swallows, swifts; (c) from characteristic actions, as carriers, croppers, dragoons, homers, pouters, rollers, shakers, trumpeters, tumbler; (d) from peculiarities of size, shape, or color, as capuchins, fantails (see cut under *fantail*), fire-pigeons, frills or frill-backs, helmets, hycinths, ice-pigeons, jacobins (see cut under *jacobin*), nuns, porcelains, priests, runts, shields, turbits. Some names, like *archangel*, *marvel*, and *victoria*, are unclassifiable, and others are quite peculiar to fanciers' nomenclature, as *blondinette*, *silverette*, and *turbiten*. Young pigeons are known as *squabs* and *squealers*. The name *pigeon* is also used, with a qualifying word, to designate some bird like or likened to a pigeon, as *prairie-pigeon*, *sea-pigeon*, etc.

2. A simpleton to be swindled; a gull: opposed to *rook*. See *stool-pigeon*. [Slang.]—**Barbary pigeon**. Same as *barb*, 2.—**Blue pigeon**, a deep-sea lead; a sounding-lead.—**Cape pigeon**, a small petrel, spotted black and white, abundant off the Cape of Good Hope; the damier. *Procellaria* or *Daption capensis*, belonging to the family *Procellariidae*. See cut under *Daption*.—**Clay pigeon**. See *clay*.—**Crown pigeon**, *Goura coronata*. See cut under *Goura*.—**Diving pigeon**, the sea-pigeon, sea-dove, or black gull-mot, *Uria grylla*. See cut under *gull-mot*.—**Mechanical pigeon**. (a) A device to which a flying motion is imparted by means of a spring released by a trigger, or otherwise, to supply the place of living pigeons in shooting-matches, or to afford practice to marksmen in shooting birds on the wing. It may be a strip of sheet-metal with blades bent in a propeller form, and caused to rise by being rotated rapidly, or it may be a ball of glass, terna-cotta, or the like. (b) A toy consisting of a light propeller-wheel, which, on being made to revolve rapidly by means of a string wound about a shaft on which it rests, rises in the air in a short flight.—**Nicobar pigeon**, *Caloenas nicobarica*. See cut under *Caloenas*.—**Pigeon's egg**, a bead of Venetian glass, the form and size of which give rise to the name. Such beads were produced as early as the fifteenth century, and very ancient ones are preserved.—**Pigeon's milk**, a non-existent article, in search of which April fools are despatched. *Hall's-well*. [Humorous.]—**Tooth-billed pigeon**, *Didunculus strigirostris*. See cut under *Didunculus*. To pluck a pigeon, to swindle; fleece. [Slang.]—**Wild pigeon**, in the United States, specifically, the passenger-pigeon, *Ectopistes migratorius*. See cut under *passenger-pigeon*.

pigeon (pi'j'on), *v. t.* [*pij'on*, *n.*] To pluck; fleece; strip of money by the tricks of gambling. [Slang.]

pigeon's-blood (pij'onz-blud), *n.* The color of a fine dark ruby, scarcely so dark as the beef's-blood. These two shades are the most admired in that stone.

pigeon's-grass (pij'onz-gräs), *n.* [*Cf. Gr. πεπτερον*, a kind of verbena, also a dove-cote, *< πεπτερον*, a pigeon, dove.] The common vervain, *Verbena officinalis*, said to be frequented by doves, and sometimes fancied to be eaten by them to clear their sight.

pigeontail (pij'on-täl), *n.* The pintail duck, *Dafla acuta*: so called from the resemblance of the tail to that of the wild pigeon or passenger-pigeon. *W. H. Herbert.* See cut under *Dafla*.

pigeon-toed (pij'on-töd), *a.* 1. Having that structure of the feet which characterizes pigeons; peristeropod: said of gallinaceous birds. The pigeon-toed fowl are the mound-birds or *Megapodidae* of the Old World and the curassows or *Cracidae* of America.—2. Having the toes turned in: said of persons. [*Colloq.*]

The *pigeon-toed* step and the rollicking motion Bespoke them two genuine sons of the Ocean.

Barham, Ingoldsby Legends, II. 171.

pigeon-tremex (pij'on-tré'meks), *n.* A hymenopterous insect of the family *Uroceridae*, or horn-tails, *Tremex columba*: a book-name. The adult oviposits in the trunks of maples and other shade-trees, and the larva is a wood-borer.

pigeonwing (pij'on-wing), *n.* 1. A mode of dressing the side hair adopted by men especially in the latter part of the eighteenth century; also, a wig so called.

A young man slightly overdressed. His club and *pigeon-wings* were fastened with three or four pins of gold, and his white-powdered queue was wrapped with a black velvet ribbon shot with silver.

G. W. Cable, Stories of Louisiana, xiii.

2. A brisk fancy step or caper in dancing, skating, etc.: as, to cut a *pigeonwing*.

Shaking off straw and furs, wraps and pattens, the ladies had no sooner swallowed cups of tea than they were whisked into line for the Virginia reel, over against a row of cavaliers arrayed with back-seam coat-buttons coming beneath their shoulder-blades, who cut the *pigeon-wing* in square-toed pumps. Then what life, what joyous frisking! *The Century, XXXVII. 358.*

pigeonwood (pij'on-wüd), *n.* A name of various trees or their wood, from the marking or coloring of the latter. (a) *Pisonia obtusata* of the West Indies and Florida: also called *bee-wood*, *corkwood*, and *porkwood*. (b) *Dipholia salicifolia*, a large fragrant tree; *Diospyros tetrasperma*, a shrub; and several species of *Coccoloba*—all of the West Indies. (c) *Guetarda speciosa*, a small evergreen of tropical shores in both hemispheres. (d) *Connarus Guianensis* (*Omphalobium Lambertii*) of South America and the West Indies. Also called *zebrawood*.

piggle (pig'gl), *n.* [*< piggle, v.*] A many-pronged hook, with a handle like that of a hoe, used in digging potatoes, and in mixing various materials, as clay, mortar, compost, etc.

pig-headed (pig'hed'ed), *a.* [*< pig¹ + head + -ed².* *Cf. pig-sconce.*] Stupid and obstinate as a pig; stupidly perverse; unreasonably set in mind.

You should be some dull tradesman by your *pig-headed* sconce now. *B. Jonson, News from the New World.*

If Mr. Tulliver had in the end declined to send Tom to Stelling, Mr. Riley would have thought his friend of the old school a thoroughly *pig-headed* fellow.

George Eliot, Mill on the Floss, I. 3.

pig-headedly (pig'hed'ed-li), *adv.* In a pig-headed, obstinate, or perverse manner.

pig-headedness (pig'hed'ed-nes), *n.* The character of being pig-headed; stupid perversity or obstinacy.

pig-hole (pig'höl), *n.* In some metallurgic operations, a hole, provided with a cover, in the wall of a furnace, through which a crucible may have an additional supply of pig-metal put in it without the operation of the furnace being interrupted.

pight (pit). An obsolete preterit and past participle of *pick¹*.

pightle (pi'tl), *n.* [*See pick¹.*] A small meadow; any small inclosed piece of land. [*Prov. Eng. and U. S. (eastern end of Long Island).*]

pig-iron (pig'f'ern), *n.* 1. Iron in pigs, as it comes from the blast-furnace. See *pig¹*, 3.—2. A flat piece of iron, which is hung so as to be interposed between the fire and meat roasting, when it is desirable to retard the cooking. *Hallivell.*—*Pig-iron breaker*, a power-hammer adapted for breaking pig-iron into pieces suitable for charging a furnace.

pig-lead (pig'led), *n.* Lead in pigs; lead in the form in which it is ordinarily offered for sale after reduction from the ore. See *pig¹*, 3.

pigmean, *a.* See *pygmean*.

pigment (pig'ment), *n.* [*< ME. pigment*, speeded wine (see *piment*), *< OF. pigment* (also *piment*). *F. pigment*, *< L. pigmentum*, a pigment. *< pin-gere* (*< pig*), paint: see *picture*.] 1. Any substance that is or can be used by painters to impart color to bodies; technically, a dry substance, usually in the form of a powder or in lumps so lightly held together as to be easily pulverized, which after it has been mixed with a liquid medium can be applied by painters to surfaces to be colored. *Pigment* is properly restricted to the dry coloring matter which when mixed with a vehicle becomes a *paint*; but the two words are commonly used without discrimination. (See *paint*.) In oil-painting, the pigments are ground or triturated to render them smooth, usually in poppy or nut-oil, since these dry best and do not deaden the colors.

If you will allow me, Pyrophilus, for the avoiding of ambiguity, to employ the word *pigments* to signify such prepared materials (as cochineal, vermilion, orpiment) as painters, dyers, and other artificers make use of to impart or imitate particular colours. *Boyle, Works, II. 48.*

2. In *biol.*, organic coloring matter; any organized substance whose presence in the tissues of animals and plants colors them. *Pigment* is the generic or indifferent term, most kinds of pigment having specific names. Coloring matter of one kind or another is almost universal in animals and plants, comparatively few of which are colorless. Pigments are very generally distributed in the integument and its appendages, as the skin, and especially the fur, feathers, scales, etc., of animals, and the leaves and other soft parts of plants. The dark color of the negro's skin is due to the abundance of pigment in the epidermis. The black appearance of the pupil of the eye is due to the heavy pigmentation of the choroid, and various colors of the iris depend upon specific pigments. Such coloring matters are often collected in special sacs which open and shut, producing the "shot" or play of color of the chameleon, dolphin, cuttlefish, and other animals. In many low animals and plants the color of the pigment is characteristic of genera, families, or even higher groups, as among infusorians, algae, etc. See cut under *cell*.

3†. Highly spiced wine sweetened with honey; piment.

It may be made with puttying to *pigment*, Or piper, or sum other condiment.

Palladius, Husbandrie (E. E. T. S.), p. 155.

Pigment color, in *dyeing*, a color prepared in the form of powder, and insoluble in the vehicle by which it is applied to the fabric. *O'Neill, Dyeing and Calico Printing, p. 375.*

pigmental (pig'men-tal), *a.* [*< pigment + -al.*] Of or pertaining to pigment; especially, secreting or containing pigment, as a cell or a tissue.

pigmentary (pig'men-tä-ri), *a.* [= *F. pigmentaire*; *< pigment + -ary.*] Same as *pigmental*.—*Pigmentary degeneration*. See *degeneration*.—*Pigmentary layer of the iris*, the innermost layer of the iris.—*Pigmentary layer of the retina*, the ectoretina; the outermost layer of the retina, composed of thick hexagonal pigment-cells united by a colorless cement.

pigmentation (pig-men-tä'shon), *n.* [= *F. pigmentation*; as *pigment + -ation*.] Discoloration by the deposition of a pigment in the tissues.

pigment-cell (pig'ment-sel), *n.* 1. A cell which secretes or contains pigment. See cut under *cell*.—2. A case or receptacle containing a special pigment; a chromatophore.

pigmented (pig'men-ted), *a.* [*< pigment + -ed².*] Charged with pigment; colored.

pigment-granule (pig'men-t-gran'ül), *n.* A grain or particle of pigment; one of the minute

structureless masses of which pigment usually consists.

pigmentless (pig'ment-less), *a.* [*<* *pigment* + *-less*.] Free from pigment; destitute of coloring matter.

pigment-molecule (pig'ment-mol'e-kül), *n.* Same as *pigment-granule*.

pigmentosa (pig'men-tō'sā), *n.* [NL., fem. of *pigmentosus*: see *pigmentose*.] Same as *tape-tum*.

pigmentose (pig'men-tō'se), *a.* [*<* NL. **pigmentosus*, *<* L. *pigmentum*, pigment: see *pigment*.] Full of pigment.

pigmentous (pig'men-tus), *a.* [*<* *pigment* + *-ous*.] Same as *pigmentose*.

pigment-printing (pig'ment-prin'ting), *n.* A style of calico-printing in which ordinary pigments are mechanically fixed on the fabric by means of albuminous cement. *E. H. Knight*.

pigment-spot (pig'ment-spot), *n.* 1. A definite pigmented spot, or circumscribed pigmentary area; specifically, the so-called eye-spot of certain animalcules, as infusorians and rotifers. — 2. In bot., a reddish or brownish spot present in certain spores.

pig-metal (pig'met'al), *n.* Metal in pigs, as it is produced from the ore in the first operation of smelting. — **Pig-metal scales**, a pair of scales arranged for weighing pig-metal. An iron truck of proper dimensions to receive a furnace-charge traverses on rails upon the platform of the scales.

pigmyt, *n.* An obsolete form of *pygmy*.

pigmy, *n.* See *pygmy*.

pignorate, *v. t.* See *pignorare*.

pignon (pin'yōn), *n.* [*<* F. *pignon*, the kernel of a pine-cone, also a gable, gable-end, = Sp. *piñon* = Pg. *pinhão*, the kernel of a pine-cone, *<* L. *pinex*, a pine-nut, pine-cone, pine: see *pine-al*.] 1. An edible seed of the cones of certain pines, as *Pinus Pinea*, the nut- or stone-pine of southern Europe. — 2. In arch., a gable: the usual French architectural term, sometimes used in English.

pignorate, **pignorate** (pig'nō-, -nē-rāt), *v. t.*; pret. and pp. *pignorated*, *pignorated*, ppr. *pignorating*, *pignorating*. [*<* L. *pignoratus* (ML. also *pignoratus*), pp. of *pignorare* (ML. also *pignorare*), pledge, *pignorari*, take as a pledge (*>* It. *pignorare* = Pg. *penhorar* = OF. *pignorer*, pledge), *<* *pignus* (*pigner*-, *pignor*-), a pledge: see *pignus*.] 1. To pledge; pawn; mortgage. — 2. To take in pawn, as a pawnbroker. *Blount*.

pignorate (pig'nō-rāt), *a.* [*<* ML. *pignoratus*, pp.: see the verb.] Pignorative.

Pignorate and hypothecary rights were unknown as rights protected by action at the time now being dealt with. *Encyc. Brit.*, XX. 680.

pignoration (pig-nō-rā'shon), *n.* [= OF. *pignoration*, *<* ML. *pignoratio* (n-), LL. *pignoratio* (n-), a pledging, pawning, *<* L. *pignorate*, pp. *pignoratus*, pledge: see *pignorate*.] 1. The act of pledging or pawning. — 2. In civil law, the holding of cattle that have done damage as security till satisfaction is made. See *pignus*.

pignorative (pig'nō-rā-tiv), *a.* [= F. *pignoratif* = Sp. *pignorativo* = Pg. *penhorativo* = It. *pignorativo*, *<* ML. **pignorativus*, *<* *pignorate*, pp. *pignoratus*, pawn, pledge: see *pignorate*.] Pledging; pawning. *Bouvier*. [Rare.]

pignus (pig'nus), *n.* [*<* L. *pignus* (*pigner*-, *pignor*-), a pledge, *<* *pac*, in *pangere*, fix, fasten, *pacisci*, agree, contract.] A pledge; the deposit of a thing, or the transfer of possession of it or dominion over it, as security for the performance of an obligation. The essential idea in the Roman and civil law is the putting of property, whether of a chattel, or land, or territorial jurisdiction (or servants or children, when they are regarded as property), under the hand of the creditor or pledgee as security, so that, although the right of the owner was not extinguished, the creditor or pledgee could enforce his claim without legal proceedings or any effort to gain possession; and this is also the essential idea in *pawn* and also in the strict use of *pledge*; while *hypothec* and *mortgage* imply that the owner retains possession, and that the creditor has only a right of action, or a right to demand possession in the contingencies agreed on.

pignut (pig'nut), *n.* 1. Same as *hawknut*.

I with my long nails will dig thee pig-nuts.
Shak., *Tempest*, II. 2. 172.

First Sold. Fight like hogs for acorns!
Sec. Sold. Venture our lives for pig-nuts!
Fletcher, *Bondage*, I. 2.

2. The fruit of a North American tree, the brown hickory, *Hicoria glabra* (*Carya porcina*); also, the tree itself. The nut is thin-shelled, oily, at first sweet, then bitterish: it is eaten by swine. The wood is very tough and is used like that of the shellbark, though the tree is not so large.

There are also several sorts of hickories, called *pig nuts*, some of which have as thin a shell as the best French wal-

nuts, and yield their meat very easily; they are all of the walnut kind. *Beverley*, Virginia, II. ¶ 14.

3. The fruit of *Omphalea triandra* and *O. diandra*, of the West Indies and South America. The kernel with the embryo removed is edible, and yields (one species at least) a fine limpid oil. In Guiana a species of *Omphalea* affords an oil said to be admirably adapted for lubricating, there called *ouabe-oil*. Also called *cobnut* and *breadnut*.

pig-pen (pig'pen), *n.* A pen for pigs; a pigsty.

pig-rat (pig'rat), *n.* The large bandicoot-rat of India, *Nesokia bandicota*. See cut at *Nesokia*.

pigroot (pig'rōt), *n.* Any plant of the genus *Sisyrinchium*.

pigsconce (pig'skons), *n.* A pig-headed fellow; a blockhead.

Ding. He is
No pig-sconce, mistress.
Secret. He has an excellent headpiece.
Messinger, City Madam, III. 1.

That Penitencia his *pyke* he schulde polsche newe.

Piers Plowman (B), v. 482.

Pikes.

(b) (1) A sharp-pointed weapon consisting of a long shaft or handle with an iron head. It has been in use from ancient times, but the word dates apparently from the fifteenth century. About that period, and for some time later, it was the arm of a large part of the infantry, and was from 15 to 20 feet long. It continued in use, although reduced in length, throughout the seventeenth century, and was replaced by the bayonet as the latter was improved. It was retained in the British army until a very late date as a mere ensign of rank. (See *half-pike* and *sponoon*.) The pike has always been the arm of hastily levied and unequipped soldiers; thousands were used in the French revolution. Such pikes have usually a round conical head, a mere ferrule of thin iron bent into that form, but long, sharp-pointed, and formidable. The pike of regular warfare had sometimes a round, sometimes a flat or spear-like head.

In the Court there was a Soldier pourtrayed at length with a blacke pike in his hand. *Coryat*, *Crudities*, I. 223.
(2) A weapon which replaced for a short time the simple pointed pike; it had an ax-blade on one side and a pointed beak or hook on the other. In this form it was retained in the French army as a badge of rank as late as the first empire. (c) A pitchfork used by farmers.

A rake for to hale up the fitches that lie.

A pike for to pike them up, handsome to dry.

Tusser, *September's Husbandry*.

3. A sharp-pointed hill or mountain summit; a peak. [North. Eng.]

A gathering weight of shadows brown
Falls on the valleys as the sun goes down;
And Pikes, of darkness named and fear and storms,
Uplift in quiet their illumined forms.

Wordsworth, *Descriptive Sketches*.

Masses of broken crag rising at the very head of the valley into a fine pike, along whose jagged edges the rain-clouds were trailing.

Mrs. Humphry Ward, *Robert Elsmere*, I. vii.

4. A point of land; a gore. See *gore*, n., 2. [Prov. Eng.]—5. A large cock of hay. [Prov. Eng.]—6. Same as *pikeman*, 1.

Your halbardiers should be armed in all points like your pike.

Markham, *Soldiers Accidence*, p. 4.

7. A measure of length, originally based on the length of the weapon so called.

He had nineteene and a halfe pikes of cloth, which cost in London twenty shillings the pike.

Hakluyt's Voyages, II. 249.

jaw shorter, the back more elevated, the belly less sharp, and the mouth edentulous. These fishes appear on the Cornish coast in England about the middle of July in immense numbers, and furnish a considerable article of commerce. See *white-bait*.
Fools are as like husbands as *pilchards* are to herrings.
Shak., T. N., III. 1. 38.

2. A fish, *Clupea sagax*, closely related to the pilchard. [*California*.]—3. A third fish of the family *Clupeidae*, *Harengula macrophthalma*. [*Bermudas*.]—4. The young menhaden. [*Chesapeake Bay, U. S.*]

pilcher (pil'chēr), *n.* [*< pilch* + *-er* (used indefinitely).] 1. One who wears a pilch.

You mungrels, you curs, you ban-dogs [the sergeants of the Counter] we are Captain Tucoo that talk to you, you inhuman pilchers.
B. Jenson, Postmaster, III. 1.

2. A pilch.—3. A scabbard. [*Cont.*]

Will you pluck your sword out of his *pilcher* by the ears?
Shak., R. and J., III. 1. 84.

pilcher², *n.* Same as *pilchard*.

Doyt. What meat eats the Spaniard?

Pilch. Dried pilchers and poor-john.
Middleton, Blurt, Master-Constable, l. 2.

pilcorn, *n.* See *pilicorn*.

pilcrow (pil'krō), *n.* [Formerly also *pillorow*, *pilkrow*, *pylorow*, *peelerow*, corrupted forms, simulating *crow* (the character ¶, in older form ¶, with its black body, and with its stem variously curled or flourished, suggesting that sable bird), of *pylorafte*, *parcraft*, *pargrafte*, corrupted forms of *paragraph*: see *paragraph*.] The character ¶, used to mark the beginning of a new paragraph: same as *paragraph*, 4.

A lesson how to confer every abstract with his moneth, and how to find out huswifery verses by the *pilcrow*.
Tusser, l.

Lapet. But why a *peel-crow* here?

Gal. I told him so, sir:

A scare-crow had been better.

Fletcher (and another), Nice Valour, iv. 1.

pil¹ (pil), *n.* [*< ME. pile*, *pil*, < *AS. pīl*, a sharp stake or stick, as the gnomon of a dial, a stake or pile driven in the bed of a river, a prickle of the holly, a nail, also in comp. an arrow or dart (*hilde-pil*, 'war-dart,' *orthanc-pil*, 'subtle dart,' *searo-pil*, 'subtle dart,' *wælpil*, 'slaughter-dart'); also *pile*, a stake, in comp. *temes-pile*; = *D. pijl* = *MLG. pil* = *OHG. pīl*, *pīl*, *MHG. pīl*, *pīl*, *G. pfeil*, an arrow, dart, bolt, shaft, = *Ice. pila* = *Sw. Dan. pil*, an arrow, = *OF. pile*, m., a javelin, = *Sp. Pg. pilo*, a javelin, = *It. pilo*, a javelin, dart, pestle, < *L. pilum*, a javelin, a heavy javelin used by infantry, lit. a poulder, pestle, contr. of **pislum*, **pisulum* (cf. *pistillum*, a pestle, > *E. pestle* and *pistil*); cf. *pila*, a mortar (> *AS. pile*, a mortar, also in comp. *pil-staf*, a pestle, *pilstamp*, a pestle, *pilstoc*, a pestle, deriv. *pilstre*, a pestle), contr. of **pīsla*, **pīsula*; > *pisere*, *pinere*, pound, beat, bray, crush.] 1. The pointed head of a staff, pike, arrow, or the like, when not barbed, generally of a rounded form and serving as a ferrule; also, an arrow.

Pile of an arrow, 13th or 14th century.

Cut off the timber of this cursed shaft,
And let the fork'd *pil* canker to my heart.

Chapman, Gentleman Usher, iv. 1.

The artist has carefully distinguished the barbed head of the arrow and the *pil* of the crossbow bolt.

Herwitz, Anc. Armour, I, p. xiii.

With the right hand draw the arrow from the quiver, pass it across the bow until the steel *pil* projects ten inches beyond the handle. *M. and W. Thompson, Archery*, p. 16.

2. A javelin. [*Rare*.]

That was but civil war, an equal set,
Where *piles* with *piles*, and eagles eagles met.

Dryden, Hind and Panther, II. 161.

[The above is an imitation of the following passage:

"Infestisque obvia signis

Signa, pares aquilas, et *pila* minantia *pilis*."

Lucretius, Pharsalia, III. 7.]

3. A pointed stake; specifically, in *arch*, and *engin*., a beam, heavy, generally of timber, often the roughly trimmed trunk of a tree, pointed or not at the end and driven into the soil for the support of some superstructure or to form part of a wall, as of a coffer-dam or quay. For permanent works piles are driven in loose or uncertain strata in rows, leaving a space a few feet in width between them, and upon the heads of the piles the foundations of the superstructure are erected. In temporary constructions they are driven close together in single or double rows, so as to inclose a space of water and form a coffer-dam, from which the water is subsequently pumped out, and thus a dry space is obtained for laying the foundation of piers, etc., in bridges and other similar works. Iron piles are used for wharf-walls and other purposes; they are hollow or tubular within, and are cast in various forms. See cuts under *lake-dwelling*, *pile-driver*, and *piledwork*.

They ramme in great piles of woodde, which they lay very deepe, upon the which they place their bricke.

Coryat, Crudities, I. 206.

What rotten *piles* uphold their mason-work.

Tennyson, Sir John Oldcastle, Lord Cobham.

4. A post such as that used in the exercise of the quintain.

Of fight, the discipline and exercise
Was this. To have a pale or *pil* upright
Of manny's hight, thus writeth olde and wise;
Therwith a bachelier, or a young knyght,
Shal first be taught to stonde and lerne to fight.
And fenne of doubl wight, tak him his shelde
Of doubl wight, a mace of tre to welde.
This fenne and mace whiche either doubl wight
Of shelde, and swayed in conflicte or bataille,
Shal exercise as well swordmen as knyghtes.
MS. Cott. Titus, A. xxiii. fol. 617.

And noe man, as they sayn, is seyn prevaille,
In field or in castell, though he assayle,
That with the *pil* nathe [*i. e.* he hath, hath not] frste grete exercise;

Thus writeth Werrouris olde and wyse.

Knighthode and Batayle (quoted in *Strutt's Sports and Pastimes*, p. 186).

False pile, an additional length given to a pile after driving. *E. H. Knight*.—**Gaged piles**, large piles placed at regular distances apart, with horizontal beams called *runners* fitted to each side of them by notching, and secured by bolts. They form a guide for the filling-piles, which are driven between the runners, filling up the spaces between them.—**Hollow pile**, a large wrought- or cast-iron cylinder sunk in sandy strata by digging away or forcing out the sand from the inside. Sections of cylinder are added above, as may be necessary, and secured by flanges and bolts.—**Hydraulic pile**, a pile sunk in sand by means of a water-jet. Two methods are followed. In one, a hollow iron pile is set upright in the sand in the position it is to occupy, while a powerful stream of water is forced into the tube, forcing up the sand, so that the tube rapidly sinks. In the other method, solid wooden piles are sunk in the same manner, the jet being delivered at the foot of the pile by means of an iron pipe let down beside the pile and afterward withdrawn. On stopping the water-jet the sand quickly settles around the pile and holds it firmly in position.—**Pneumatic pile**. See *pneumatic*. (See also *screw-pile*, *sheet-pile*.)

pil¹ (pil), *v. t.*; pret. and pp. *piled*, ppr. *piling*. [*< pil¹*, *n.*] 1. To furnish with a pile or head.

At Delope Magus threw

A speare well *pilde*, that strooke his cakeful in the height;
off flew
His purple feather, newly made, and in the dust it fell.

Chapman, Illud, xv.

2. To furnish, strengthen, or support with piles; drive piles into.

pil² (pil), *n.* [*< ME. pile*, *pyle*, a pile (tower or castle) the alleged *AS. *pīl*, a pillar, is not authorized), < *OF. pile*, *t.*, a pier, mole, pyramid, etc., *F. pile*, a pier, mole, pile or reverse of a coin, = *Sp. pila*, a pillar, font, holy-water font, trough, = *Olt. pila*, a dam, bowl of a font, laver, cistern, *It. pila*, a flat pillar, trough, holy-water font, < *L. pila*, a pillar, a pier or mole of stone. *Pile* in the senses given below is generally included with *pil³*, 'a heap,' etc.; but see *pil³*. *Pile²* is also more or less confused in various senses with the related *pil¹*. Cf. *peel⁴*.] 1. A pillar; specifically, a small pillar of iron, engraved on the top with the image to be given to the under side of a coin stamped upon it; hence, the under side or reverse of the coin itself: opposed to the *cross*.—2. A tower or castle: same as *peel⁴*.

For to deluen a dyche depe a-boute Vnite,

That holy-cherche stode in Vnite as it a *pyle* were.

Piers Plouman (B), xix. 860.

Alle men children in towne & *pyle*

To see them, that theus myght with hem die.

Hymns to Virgyn, etc. (E. E. T. S.), p. 45.

The inhabitants at this day call it Milnesse; and as small a village as it is, yet hath it a *pyle*.

Holland, tr. of Camden, p. 775. (*Davies*.)

3. A large building or mass of buildings of stone or brick; a massive edifice: as, a noble *pyle*; a venerable *pyle*.

Went to see Clarendon House, now almost finish'd, a goodly *pyle* to see to.

Eselyn, Diary, Nov. 23, 1666.

In the midst of the ruins, there stands up one *pyle* higher than the rest, which is the East end of a great Church, probably of the Cathedral of Tyre.

Maundrell, Aleppo to Jerusalem, p. 49.

High Whitby's cloistered *pyle*. *Scott, Marmion*, II. 1.

4. A pyramid; a pyramidal figure; specifically, in *her.*, a bearing consisting of a pyramidal or wedge-shaped figure (generally assumed to represent an arrow-head), which, unless otherwise blazoned, seems to emerge from the top of the escutcheon with its point downward. It is usually considered one of the subordinaries, but by some authors as an ordinary. See *pil¹*, 1, and phrases below.—**Cross and pile**. See *cross*.—**Cross pile**, a pile in which boards, iron bars, or the like are placed in alternate layers at right angles to each other.—**Per pile**, in *her.*, divided by lines in the form of a pile—that is, forming a V-shaped figure in the field. If this V-shaped figure has not its point downward, the blazon must express it as *per pile transposed*, *per pile reversed*, *per pile trasverse*, etc.—**Pile solid**, in *her.*, a pile represented as in relief, having three lines, which give it the appearance of a blunt pyramid, projecting upward from the field. One of the three triangles thus formed is of a different tincture from the others, to help the solid appearance.—**Triple pile**, **triple-pointed pile**, in *her.*, a pile

cut short at the pointed end, and having the end divided into three projecting points.

pile³ (pil), *n.* [*< ME. pile, a heap (the AS. *pīl, a heap, is not authorized, being due to a misinterpretation), < OF. pile, f., a heap, pile, stack, F. pile, a heap, voltaic pile, etc.; appar. a particular use of pile, a pier of stone, etc. (whence any pile of stones or other things, etc.); but according to some < L. pila, a ball (cf. piles). Cf. pile².]* 1. A heap consisting of an indefinite number of separate objects, commonly of the same kind, arranged of purpose or by natural causes in a more or less regular (cubical, pyramidal, cylindrical, or conical) form; a large mass, or a large quantity: as, a *pile of stones*; a *pile of wood*; a *pile of money* or of grain.

What *piles of wealth* hath he accumulated
To his own portion! *Shak.*, *Hen. VIII.*, III. 2. 107.

You *pile of mountains*, shining like a white summer cloud
In the blue sky. *Irving*, *Alhambra*, p. 121.

Specifically—2. A funeral pile; a pyre. See *funeral pile*, under *funeral*.

Woe to the bloody city! I will even make the *pile* for fire
great. *Ezek.* xxiv. 9.

The father makes the *pile*: hereon he layes
His bond-led, blind-led Son.
Sylvester, *Maiden's Blush* (trans.).

3. An oblong rectangular mass of cut lengths of puddled bars of iron, laid together and ready for being rolled after being raised to a welding-temperature in a reheating-furnace. The size of a pile and the quality of the iron of which it is composed vary according to special requirements, the same pile sometimes containing widely different qualities of iron in its different parts.

4. In *elect.*, a series of plates of two dissimilar metals, such as copper and zinc, laid one above the other alternately, with cloth or paper placed between each pair, moistened with an acid solution, for producing a current of electricity. See *electricity*. The term is sometimes used as synonymous with *battery*, for any form of apparatus designed to produce a current of dynamic electricity. It is also applied to an apparatus for detecting slight changes of temperature. See *thermopile*.

5. A large amount of money; a fortune: as, he has made his *pile*. [*Slang*, U. S.]

Great fortunes grow with the growing prosperity of the country, and the opportunity it offers of amassing enormous *piles* by bold operations.
Bryce, *Amer. Commonwealth*, II. 704.

Dry pile, an electric pile or battery consisting of a series of disks, generally of paper or leather, coated on one side with silver or tin and on the other with finely powdered binoxide of manganese. These are arranged with the silver of each disk in contact with the manganese of the next, the whole forming a battery the action of which, due to the hygroscopic character of the paper disk, is remarkably permanent.—*Funeral pile*. See *funeral*.

They conveyed them unto the *funeral pile* on beeres.
Sandys, *Travels*, p. 65.

Poles of a voltaic pile. See *pole*².—**Volta's pile**. See *battery*, 8.

pile³ (pil), *v. t.*; pret. and pp. *piled*, ppr. *piling*. [*< pile², n.*] 1. To lay or throw into a heap; heap, or heap up; collect into a pile or mass: as, to *pile wood* or stones.

Or *pile* ten hills on the Tarpelan rock.
Shak., *Cor.*, III. 2. 8.

The sickening toll
Of *piling* straw on straw to reach the sky.
William Morris, *Earthly Paradise*, III. 211.

2. To bring into an aggregate; accumulate: as, to *pile* quotations or comments.

Life *piled* on life
Were all too little. *Tennyson*, *Ulysses*.

3. Same as *fagot*, 2.—To *pile arms*, in *milit. tact.* to place three muskets or rifles with fixed bayonets in such a relative position that the butts shall remain firm upon the ground, and the muzzles be close together in an oblique direction. Called to *stack arms* in modern tactics.

pile⁴ (pil), *n.* [= *OF. pel, poil, F. poil = Pr. pel, pelh, poil = Sp. pelo = Pg. pello = It. pelo, < L. pilus, a hair, the hair. Hence ult. (from L. pilus) E. depile, depilate, depilatory, pill², pellice, plush, peruke (with perwig and wig), and prob. also pluck¹.]* 1. Hair.

The beard is represented by two tangled tufts upon the chin; where whiskers should be, the place is either bare or thinly covered with straggling *pile*.
R. F. Burton, *El-Mednab*, p. 320.

2. Specifically, in *hunting*, in the plural, the hair or fur of an animal, as the boar, wolf, fox, etc.; hence, hairs collectively; pelage.—3. The lay or set of the hair.—4. A fiber, as of wool or cotton.—5. In *entom.*, thinly set fine hairs which are ordinarily rather long.—6. Nap of a regular and closely set kind, consisting of threads standing close together and shaved off smooth, so as to form a uniform and even surface. The threads of pile always have a certain inclination in one direction as regards the stuff, and can be smoothed or depressed in that direction, while pressing

them the other way roughens the surface. The longest pile of any textile fabric is perhaps that of certain Oriental carpets; this, when of fine goat's hair, has a beautiful gloss. The pile of velvet is sometimes of two different heights or lengths.

Velvet soft, or plush with shaggy *pile*.
Couper, *Taak*, I. 11.

Cut pile, in a fabric, a pile woven in loops which are afterward cut so as to give a smooth surface composed of the ends of the fibers, as in velvet, plush, etc.—**Double pile**. Same as *pile upon pile*: said of velvet.—**Pile carpet**. See *carpet*.—**Pile upon pile**, an arrangement in which a part of the pile is shorter than another part, as in velvet, in which a pattern is produced in this way, the pile of a flower or leaf being perhaps twice as high as that of the background.

pile⁴ (pil), *v. t.*; pret. and pp. *piled*, ppr. *piling*. [*< pile², n.*] To furnish with pile; make shaggy.

Thou art good velvet; thou 'rt a three-*piled* piece, I warrant thee: I had as lief be a list of an English kersey as be *piled* as thou art *piled* for a French velvet.
Shak., *M. for M.*, I. 2. 38.

His cloak of crimson velvet *piled*,
Trimmed with the fur of marten wild.
Scott, *Marmion*, v. 8.

pile⁵ (pil), *v. t.*; pret. and pp. *piled*, ppr. *piling*. [*< ME. pilen, var. of pilen, ult. < L. pilare, deprive of hair: see pill², of which pile⁵ is thus ult. a variant. Cf. peel¹, with which pile⁵ may have been confused.*] To break off the awns of (threshed barley). [*Prov. Eng.*]

pile⁶, *v.* A Middle English form of *pill*¹.

Pilea (pi-lē-ā), *n.* [*NL. (Lindley, 1821), so called with ref. to the original species, in which one of the three sepals is enlarged into a hood over the fruit; < L. pileus, a felt cap: see pileus.*] 1. A genus of apetalous herbs of the order *Urticaceae*, tribe *Urticeae*, and subtribe *Procridae*, distinguished by the equilateral opposite leaves and loosely branched or somewhat condensed greenish cymes. There are about 175 species, for the most part small weedy plants, widely dispersed throughout the tropics except in Australia, with one, *P. pumila*, the clearweed or richweed, with translucent watery stem, common in rich woodlands of the United States. Many species have the peculiarity of developing one leaf of a pair very much larger than that opposite. See *artillery-plant*, *burning-bush*, 2 (b), *clearweed*, *coolweed*, and *dwarf elder* (under *elder*), the last peculiar in this genus (mainly of weeds) from having a woody stem.

2. [*l. c.*] Plural of *pileum*.

pileata (pil-ē-ā-tā), *a.* [*L., fem. of pileatus, capped: see pileate.*] Capped—that is, covered or stopped: applied to organ-pipes.—**Pileata diapenta**, a stopped quint.—**Pileata major**, a stopped 16-foot pipe.—**Pileata minor**, a stopped 4-foot pipe.

pileate (pil-ē-āt), *a.* [*< L. pileatus, pileatus, capped, bonneted, < pileus, pileus, a cap: see pileus.*] 1. Capped; specifically, in *bot.*, having a pileus or cap, as certain fungi. See *Agaricus*.—2. Having the form of a cap or cover for the head. See cut under *Crypturus*.

A *piled* echinus taken up with different shells of several kinds. *Woodward*.

piledated (pil-ē-ā-ted), *a.* [*< pileate + -ed².*] 1. Same as *pileate*.—2. In *ornith.*, crested; having the feathers of the pileum elongated and conspicuous: as, the *piledated woodpecker*.—**Piledated woodpecker**, *Hylotomus* (or *Ceophloeus*) *piledatus*, the largest woodpecker of North America excepting the Ivorybill, locally known as *logcock* or *black logcock*. It is usually 16 to 18 inches long, and about 28 in extent of wings; the color is slaty-black, conspicuously striped with white or pale yellowish on the head and neck, this color also varying the hidden parts of the wings; the male has the whole pileum scarlet; in

Piledated Woodpecker (*Hylotomus pileatus*).

the female the crest is scarlet on the posterior half only. This fine bird inhabits all the heavily wooded regions of the country, where it represents the great black woodpecker of Europe, *Picus* or *Dryocopus martius*.

pile-beam (pil'bēm), *n.* A separate warp-beam, upon which is wound and carried the pile-warp: distinguished from the usual warp-beam of a loom.

pile-bridge (pil'brij), *n.* A bridge consisting of a platform supported by piles. It is probably the earliest form of bridge, and is still largely used, especially over shallow water and marshy ground.

pile-builder (pil'bil'dēr), *n.* One who erects a structure on piles; specifically, one of a community which customarily dwells in huts or

cabins erected on piles over a body of water, as the ancient lake-dwellers, and some savage peoples of the present day. See *lake-dwelling*, *palafitte*.

As regards India, it seems to me there are good reasons for believing these *pile-builders* are the direct descendants of the pre-Aryan aboriginals. *Nature*, XXX. 109.

pile-cap (pil'kap), *n.* In *hydraulic engin.*, a beam connecting the heads of piles.

pile-clamp (pil'klamp), *n.* In *surg.*, an instrument for clamping hemorrhoids previous to excision.

piled (pild), *a.* [*< pile¹ + -ed².*] 1. Having a pile, as an arrow.—2. Supported on or by piles.

Among those who build on piles many live and sleep on the ground, using the *piled* part of the house for other purposes. *Nature*, XXX. 109.

pile-dam (pil'dam), *n.* A dam made by driving piles and filling the interstices with stones. The surfaces are usually protected with plank-ing.

pile-driver (pil'drī'vēr), *n.* 1. A workman occupied in driving piles.—2. A machine or contrivance, usually worked by steam, for driving piles. A common form, shown in the cut, consists of a

Pile-driver.

a b, framework; c, the monkey—a block of cast-iron with guide-ways which slide on vertical guides on the inner faces of the upright parts d of the framework; d, nippers; e, inclines which engage the arms of the nippers and release the monkey; f, hoisting-pulley. The hoisting-rope is attached to the nippers, and the nippers engage a shouldered projection on the top of the monkey.

large ram or block of iron, which slides between two guide-posts. Being drawn up to the top, and then let fall from a considerable height, it comes down on the head of the pile with a violent blow.

pile-dwelling (pil'dwel'ing), *n.* A dwelling built on piles, especially an ancient lake-dwelling; a palafitte. Compare *pile-builder*.

pile-engine (pil'en'jin), *n.* An engine for driving piles. See *pile-driver*.

pile-hoop (pil'hōp), *n.* An iron band put round the head of a timber pile to prevent splitting.

pilai, *n.* Plural of *pileus*.

pileiform (pil-ē-i-fōrm), *a.* [= *F. pileiforme*, *< L. pileus, pileus, a cap, + forma, shape.*] Having the form of a pileus; pileated in shape.

pilement (pil'ment), *n.* [*< pile³, v., + -ment.*] An accumulation.

Costly *pilements* of some curious stone.
Bp. Hall, *Satires*, III. II. 16.

Pileolares (pil-ē-ō-lā-rēs), *n.* [*NL. (Fries, 1825), < L. pileolus, etc., dim. of pileus, a cap: see pileolus.*] A tribe of hymenomycetous fungi of the suborder *Tremellini*, according to Endlicher. The receptacle is membranaceous, and the hymenium inferior, free. Also *Helotici*.

pileolus (pi-lē-ō-lus), *n.*; pl. *pileoli* (-li). [*NL., < L. pileolus, pileolus, also pileolum, pileolum, dim. of pileus, pileus, a cap: see pileus.*] 1. In *zool.* and *bot.*, a little pileus; some small cap-like or lid-like body; specifically, the receptacle of certain fungi.—2. [*cap.*] A genus of gastropods of the family *Neritidae*, belonging to the Oolite, having no spire, the shell resembling that of a limpet.

Pileopsidae (pil-ē-op'si-dē), *n. pl.* [*NL., < Pileopsis + -idae.*] A family of gastropods, named from the genus *Pileopsis*: same as *Calyptorhæidæ*.

Footscap-limpet (*Pileopsis hungarica*).

Pileopsis (pil'-ē-op'-sis), *n.* [NL. (Lamarck, 1812), < *L. pileus*, *pilleus*, a cap, + Gr. *opsis*, appearance.] A genus of bonnet-limpets of the family *Calyptraeidae*, having the shell pileate in form, with rounded aperture, posterior spirally recurved apex, and horseshoe-shaped muscular impression. *P. hungarica* is a common European species, known as the *Hungarian bonnet-limpet* or *footscap-limpet*. *Capulus* is a synonym.

Cast-iron Pilework in Wharves at Deptford and Blackwall, England. A, elevation; B, plan; C, C', sections. a, piles; b, a guide-pile; c, a stay-pile; d, d', iron land-ties.

pileorhiza (pil'-ē-ō-ri'-zā), *n.*; pl. *pileorhizae* (-zē). [NL., < *L. pileus*, *pilleus*, a cap, + Gr. *rhiza*, a root.] In bot., the root-cap.

pileorhize (pil'-ē-ō-riz), *n.* Same as *pileorhiza*.

pileous (pil'-ē-us), *a.* [< *L. pilus*, a hair, the hair: see *pila*.] Same as *pilosus*.

pile-pier (pil'-pēr), *n.* In *hydraul. engin.*, a pier supported on piles.

pile-plank (pil'-plangk), *n.* One of a number of planks, about nine inches broad and from two to four inches thick, sharpened at their lower end, and driven with their edges close together into the ground in hydraulic works, as to make a coffer-dam.

piller (pil'-lēr), *n.* [< *pila*, *v.*, + *-er*.] One who piles or forms into a heap.

piller, *n.* A Middle English form of *pillar*.

piles (pilz), *n.* pl. [< NL. *pila*, piles, pl. of *L. pila*, a ball: see *pila*.] A disease originating in the morbid dilatation of the veins of the lower part of the rectum, and upon the verge of the anus; hemorrhoids. Constipation favors their development.

pile-shoe (pil'-shō), *n.* An iron point fitted on a pile.

pile-start (pil'-stārt), *n.* The pintail duck, *Dafla acuta*. J. P. Giraud, 1844. [Long Island.]

pileti, *n.* Plural of *piletus*.

pile-tower (pil'-tō-er), *n.* Same as *pila*, 2.

piletus (pil'-ē-tus), *n.*; pl. *pileti* (-ti). [ML., < *L. pilum*, a javelin: see *pila*.] A form of arrow used in the middle ages, having a knob upon the shaft, near the head, to prevent it from penetrating too deeply.

pileum (pil'-ē-um), *n.*; pl. *pilea* (-ā). [NL., < *L. pileum*, a cap: see *pila*.] In *ornith.*, the cap or whole top of the head, from the base of the bill to the nape, and laterally about to the level of the upper border of the eyes. It is divided into three sections, the forehead or front, the vertex or corona, and the hindhead or occiput. See diagram under *bird*.

pileus (pil'-ē-us), *n.*; pl. *pilei* (-i). [L. *pileus*, also *pilleus*, also *pilleus*, *pilleum*, a cap or brimless hat of felt, made to fit close, a felt skull-cap, = Gr. *πίλος*, felt, a felt cap or hat, felt cloth, etc.] 1. Among the ancient Romans, a conical cap or hat of felt; a cap or skull-cap. 2. In bot., the expanded cap-like or umbrella-like summit of the stipe, bearing the hymenium, in hymenomycetous fungi: same as *capit.* 2 (a). See cuts under *Agaricus* and *Fungi*. 3. In *ornith.*, same as *pileum*. 4. [cap.] [NL.] A genus of echinoderms.

pile-warp (pil'-wārp), *n.* Same as *nap-warp*.

pile-weaving (pil'-wē-ving), *n.* A process of weaving in which a third thread is introduced, and formed into loops by weaving it over wires laid across the entire breadth of the cloth. The wires are subsequently drawn out, leaving the loops standing, or the loops may be cut so as to form a nap or cut pile.

pile-wire (pil'-wir), *n.* A wire used in pile-weaving. In the manufacture of cut-pile fabrics grooved pile-wires are used, laid with the grooves facing the outer parts of the loops of the pile. In cutting the pile-threads the knife slides edge upward through the groove or channel in the wire, thus making the cutting uniform, without danger of injuring the warp or weft.

pilework (pil'-wērk), *n.* Work consisting of piles, as that upon which lacustrine dwellings are supported, or that constructed for many purposes in hydraulic engineering. See cut in next column.

The wants and habits of the people had changed, and the age of the Swiss *pileworks* was at an end.

Sir J. Lubbock, Pre-historic Times, vi.

pile-worm (pil'-wērm), *n.* A worm or some similar animal, as a gribble or shipworm, found embedded in the timber of submerged piles. See *Limnoria*, *Teredo*.

pile-worn (pil'-wōrn), *a.* Worn to such a point that the pile or nap has grown thin, so as to show the threads of the stuff; threadbare.

Your *pileworn* coat.

pilgrim

stranger, foreign resident, prop. adj., foreign: see *peregrine*.] I. *n.* 1. A traveler; specifically, one who journeys to some place esteemed sacred, either as a penance, or in order to discharge some vow or religious obligation, or to obtain some spiritual or miraculous benefit; hence, a wanderer; a sojourner in a foreign land. The custom of pilgrimages has prevailed especially in India, among Mohammedan peoples, and among Christians in the middle ages. Frequent places of Christian pilgrimage have been (besides Jerusalem and the Holy Land) Rome, Canterbury, Compostela in Spain, Einsiedeln in Switzerland, and in modern times Lourdes in France.

Pilgrim, in the recognized dress worn at Rome in the 18th century.

And on Monday we met with the shippe with *pilgrymes* that went out of Venyce. [i. e.] weeks before vs, whiche *pilgrymes* had done theyr *pilgrimage* and returned homewards.

Sir R. Guylforde, *Pilgrimage*, p. 15.

These all died in faith, not having received the promise, but having seen them afar off, and were persuaded of them, and embraced them, and confessed that they were strangers and *pilgrims* on the earth.

Heb. xi. 13.

With naked foot, and sackcloth vest,
And arms enfolded on his breast,
Did every *pilgrim* go.

Scott, *L. of L. M.*, vi. 29.

2. In *Amer. hist.*, specifically, one of the English separatists who sailed from Delfthaven (in the Netherlands) in the "Mayflower" touching at Southampton, England, and founded the colony of Plymouth, Massachusetts, at the end of 1620.

—3. A new-comer, whether a person or an animal; a "tenderfoot." [Slang, western U. S.]

Pilgrim and "tenderfoot" were formerly applied almost exclusively to newly imported cattle, but by a natural transference they are usually used to designate all new-comers, tourists, and business-men.

L. Swinburne, *Scribner's Monthly*, II. 508.

4. A curtain or screen of silk hanging from the back of a woman's bonnet to protect the neck, worn in the latter part of the eighteenth century. —*Pilgrim-bottle*, a round, flat bottle having on each side of the mouth or neck a ring for the insertion of a cord. The type is a common one in pottery of many nations and times, and is especially frequent in Italian work of the fifteenth and sixteenth centuries, and in imitations of it. The simplest *pilgrim-bottles* are circular or oval and without a foot; but more elaborate vases, if preserving the flat form and the rings for a cord, are also known by this name. See *costrel*. —*Pilgrim fathers*, in *Amer. hist.*, the founders of Plymouth Colony in 1620. See def. 2. above. —*Pilgrim's pouch*, a badge of lead or other material, having the form of a pouch and hollow like it, but very small: a variety of *pilgrim's sign*. —*Pilgrim's shell*. (a) A scallop- or cockle-shell used as an emblem of pilgrimage, or a sign that one has visited the Holy Land. One of the scallops, *Pecten jacobaeus*, is known as *St. James's shell*, from this circumstance. See *Pecten*, 2 (a).

(b) In modern times, a carved pearl shell such as are brought by travelers from the Holy Land. P. L. Simonds, *Art Jour.*, N. S., XII. 72. —*Pilgrim's sign*, a small object given to pilgrims at a shrine or sacred place as evidence of their having visited it. It was sometimes a medal, sometimes a small ampulla of lead or pewter, and bore the mark of the monastery, church, etc., which issued it. —*Pilgrim's staff*. (a) The long staff which was one of the badges of a pilgrim. (b) In *her.*, same as *bourdon*. —*Pilgrim's vase*, a decorative vase having a flat and disk-like body, in partial imitation of a pilgrim's bottle.

II. *a.* Of, pertaining to, used by, or characteristic of a pilgrim, or one who travels to a sacred place in performance of some religious duty; wandering as a pilgrim; consisting of pilgrims.

A parish priest was of the *pilgrim* train. Cowley.

Till Morning fair

Came forth, with *pilgrim* steps, in amice gray.

Milton, *P. R.*, iv. 427.

She remembered the parting words of the *pilgrim* count.

Irving, *Moorish Chronicles*, p. 81.

pilgrim (pil'-grim), *v. i.* [< *pilgrim*, *n.*] To journey or travel as a pilgrim; undertake or accomplish a pilgrimage.

The ambulo hath no certain home or diet, but *pilgrims* up and down everywhere, feeding upon all sorts of plants.

Grev.

Pilgrim's Sign.

(From "Journal of the British Archaeological Association," 1846.)

pilgarlick (pil-gär'-lik), *n.* [< *pill*, *v.*, + obj. *garlic* (formerly *garlick*).] See to *pill* *garlic*, under *pill*. The word came to be applied, with the stress laid on *pill* with ref. to *pilled*, bald, to lepers or to other persons who have become bald by disease, acquiring a particularly opprobrious meaning.] A poor forsaken wretch: a vague term of reproach. [Low.]

And there got he a knock, and down goes *pilgarlick*.

Fletcher, *Humorous Lieutenant*, II. 2.

Scott, Abbot, xv.

pilgrimize (pil'grī-mīz), *v. t.*; pret. and pp. *pilgrimized*, ppr. *pilgrimizing*. [*pilgrim* + *-ize*.] To wander or journey about as a pilgrim: sometimes with an impersonal *it*.

I'll bear thy charges, an thou wilt but *pilgrimize* it along
With me to the land of Utopia.

B. Jonson, *Case is Altered*, ll. 4.

pili, *n.* Plural of *pilus*.

Pilidium (pi-lid'i-um), *n.* [NL., < Gr. *πυλίδιον*, a little hat or cap, dim. of *πίλος*, a felt hat or cap: see *pilus*.] 1. A generic name given to the larvæ of rhynchocæle turbellarians, or nemertean worms, under the impression that they are distinct animals.

Pilidium gyrans is the larva of a species of the genus *Lanceus*. The name is retained as a convenient designation of such pileate or helmet-shaped nemertean larvæ: in this use it is written without the capital, and has a plural *pilidia*. 2. In *conch.*, a genus of false limpets of the family *Acmaeidae*. — 3. In *bot.*, a hemispherical apothecium in certain lichens.

piliferous (pi-lif'e-rus), *a.* [*L. pilus*, hair (see *pilus*), + *ferre* = E. *bear*.] 1. In *bot.*, bearing or tipped with hairs. — 2. In *zool.*, bearing hairs; hairy; piligerous: specifically, in entomology, noting the tubercles of caterpillars whence bundles of hairs arise. — **Piliferous layer**, in *bot.*, the layer of young superficial tissue of active roots that is provided with root-hairs.

piliform (pi-li-fōrm), *a.* [*L. pilus*, hair, + *forma*, form.] Slender or fine as a hair; filiform; filamentous.

piligerous (pi-lij'e-rus), *a.* [*L. pilus*, hair, + *gerere*, carry.] Covered with hair or fur; pilous or pilose; piliferous.

piling (pi'ling), *n.* [Verbal *n.* of *pile*, *v.*] 1. In *engin.*, the operation of placing and driving piles in position. — 2. Piles collectively; pilework. —

To *pill* garlick, to do some unpleasant office; endure mortification. Compare *pilgrimage*.

And ye shal here how the tapster made the pardonere *pill* Garlick al the long nyghte til it was ner end day; For the more chere he made of love, the falsar was her lay.

The Merry Adventure of the Pardonere and Tapster at the Inn at Canterbury (printed in Urry's ed. of Chaucer, 1721), l. 122.

II. *intrans.* To peel; come off in flakes.

pill (pil), *n.* [*pill*, *v.*; a var. of *peel*, *n.*] 1. Peel; skin; rind; outer covering.

Sweet is the Nut, but bitter is his *pill*.

Spenser, *Sonnets*, xxvi.

The huske or *pill* of a greene nut which blacketh one's fingers and hands. *Hollyband*, Dict., 1598. (*Hallivell*.) These [hazel-shoots] prune and cleanse of every leaf and spray.

But periah not the rine and utter *pill*.

J. Denney (Arber's Eng. Garner, I. 149).

2. The refuse of a hawk's prey. *Hallivell*. **pill** (pil), *n.* [Early mod. E. also *pil*, *pille* (= MD. *pille*, *pil* = G. *pille* = Dan. *pille* = Sw. *pl. piller*, a pill); an abbr. (as if of *pilule* (= MHG. *pillele*), which actually appears later), perhaps due in part to the written abbr. *pil.*, pl. *pill.*, in physicians' prescriptions, of *L. pilula*, a pill, a little ball, dim. of *pila*, a ball (> OF. *pila*, a ball, a pill): see *pilule*. *Pill* is thus not directly < L. *pila*, which is not used in the sense of 'pill,' but from its dim. *pilula*.] 1. A globular or ovoid mass of medicinal substance, of a size convenient for swallowing.

Hard is it for the patient which is ill
Fulsome or bitter potions to digest,
Yet must he swallow many a bitter *pill*,
Ere he regaine his former health & rest.

Times' Whistle (E. E. T. S.), p. 127.

Hence — 2. Something unpleasant that has to be accepted or (metaphorically) swallowed: usually qualified by *bitter*.

Yet cannot thei abyde to swallow down the holosome *pille* of vilitie, being *bitter* in their mouthes.

J. Udall, *On Lake* iv.

He said the renunciation of this interest was a *bitter pill* which they could not swallow.

Jefferson, To Madison (Bancroft's Hist. Const., I. 430).

3. A disagreeable or objectionable person. [*Slang.*] — 4. *pl.* A doctor or surgeon. [*Milit. and naut. slang.*] — 5. In *varnish-making*, the cooked mass of linseed-oil and gum before turpentine is added to thin it down and complete the varnish.

pill (pil), *v. t.* [*pill*, *n.*] 1. To form into pills. — 2. To dose with pills. [*Colloq.*] — 3. To reject by vote; blackball. [*Club slang.*]

He was coming on for election at Bay's, and was as nearly *pill'd* as any man I ever knew in my life.

Thackeray, *Newcomes*, xxi.

pill (pil), *n.* [*ME. *pyll*, < AS. *pyll*, *pull*, a creek, = Icel. *pollr*, a creek, < W. *puil*, a pool, = Ir. *poll*, *pull*, a creek. Cf. *pool*.] A small creek; one of the channels through which the drainings of a marsh enter a river. *Hallivell*. [*Prov. Eng.*]

From 8. Juste *pille* or creke to 8. Manditus creeke is a nile dim.

Leland's Itinerary (1769), iii. 29. (*Hallivell*.)

The *pills* being the little streams which wear away a sort of miniature tidal estuary in the mud-banks as they empty themselves into the Severn and the Wye.

Seeborn, *Eng. Vil. Community*, p. 150.

pillaffe, *n.* Same as *pilau*.

pillage (pil'āj), *n.* [*ME. pillage*, *pyllage*, *pillage*, < OF. (and F.) *pillage* = Pr. *pilatge* = Sp. *pillaje* = Pg. *pilhagem*, plunder, pillage, < ML. as if **piliatcum*, after Rom. *piliagium*, plunder, < L. *pilare* (> OF. *piller*, etc.), plunder: see *pill*.] 1. The act of plundering.

Pillage and robbery. *Shak.*, *Hen. V.*, iv. 1. 174.

2. Plunder; spoil; that which is taken from another by open force, particularly and chiefly from enemies in war.

Which *pillage* they with merry march bring home
To the tent-royal of their emperor.

Shak., *Hen. V.*, l. 2. 126.

= *Syn.* *Pillage*, *Plunder*, *Booty*, *Spoil*, *Prey*. These words denote that which is violently got or carried off: all except *prey* suggest a considerable amount seized. *Pillage* also denotes the act; the others only the thing or things taken. *Pillage* and *spoil* especially suggest the great loss to the owners, completely stripping or despoiling them of their property; *plunder* suggests the quantity and value of that which is taken: as, loaded with *plunder*; *booty* is primarily the spoils of war, but also of a raid or combined action, as of pirates, brigands, or burglars; *spoil* is the only one of these words that is used in the plural, except, rarely, *prey*. *Prey* now seems figurative or archaic when not applied to the objects of pursuit by animals: as, the mouse falls a ready *prey* to both beasts and birds; hence, when applied to that which is pursued or taken by man, it expresses condemnation of the act.

pillage (pil'āj), *v. t.*; pret. and pp. *pillaged*, ppr. *pillaging*. [*pillage*, *n.*] To strip of money or goods by open violence; plunder; despoil.

Antwerp, the most famous Town of Traffick in all Europe, was miserably *pillaged*.

Baker, *Chronicles*, p. 861.

Our modern compilers, like sextons and executioners, think it their undoubted right to *pillage* the dead.

Goldsmith, *Essays*, Pref.

pillager (pil'ā-jēr), *n.* [*pillage* + *-er*.] One who pillages or plunders by open violence; a plunderer.

pillar (pil'ār), *n.* [Early mod. E. *pillier*; < ME. *pillier*, *pillare*, *pyllare*, *pyllour*, *piler*, *pyler*, *pylere*, *pelere*, *pyleer*, *pylour*, < OF. *pilier*, *pilier*, F. *pilier* = Pr. Of Almes-dedes at the hokes that the gates hangen on.
Piers Plowman (B), v. 602.

The *Pillar* is a figure among all the rest of the Geometrical most beawtfull, in respect that he is tall and vpright and of one bignesse from the bottom to the toppe.
Puttenham, *Arte of Eng. Poetrie*, p. 80.

And Jacob set a *pillar* upon her grave. Gen. xxxv. 20.
There are erected two wooden *pillars* in the water.
Coryat, *Cruddies*, I. 8.

2. A support or supporter; one who or that which sustains or upholds.

The *pillers* elm, the cofere unto carayne.
Chaucer, *Parliament of Fowls*, l. 177.

He is a maine *pillar* of our church, though not yet Deane nor Canon, and his life our Religions best Apologie.
Bp. Earle, *Micro-cosmographie*, A Graue Diuine.

With grave
Aspect he rose, and in his rising seem'd
A *pillar* of state. *Milton*, P. L., li. 302.

3. The upright and supporting part of something, as of a table having but one support, or of a candlestick.—4. In *anat.* and *zool.*, a pillar-like or columnar structure, part, or organ; a column or columella; a crus: as, the *pillar* (columella or modiolus) of a spiral shell; the *pillars* (crura or peduncles) of the brain. See cut under *Discophora*.—5. One of the posts which serve to connect the plates of a clock-movement, and also to keep them the necessary distance apart.—6. In the *manège*, the raised center of the ring or manège-ground around which a horse turns. There are also pillars at regular intervals around the ground.—7. A portable emblem in the form of an ornamented column, formerly carried before an ecclesiastical dignitary as typical of his function as a support to the church.

With worldly pompe incredible,
Before him rydeth two prestes stronge,
And they bear two crosses right longe,
Gapyng in every man's face.
After them folowe two laye-men secular,
And each of them holdyng a *pillar*
In their handes, steade of a mace.
Skellon, *Works*. (Nares.)

8. Something resembling a pillar in appearance.

And the Lord went before them by day in a *pillar* of cloud, to lead them the way; and by night in a *pillar* of fire, to give them light. Ex. xiii. 21.

9. A solid mass of coal left either temporarily or permanently to support the roof of a mine.—10. In *harp-making*, the upright post on the side furthest from the player. It is usually hollow, and contains the rods of the pedal-action.—11. A frame for supporting tobacco-pipes in a kiln. *E. H. Knight*.—12. The nipple of a firearm. *E. H. Knight*.—Compound *pillar*, in *arch.*, a clustered column.—From *pillar* to *post*, or from *post* to *pillar*, from one thing to another without any apparent definite purpose: as, to run or be driven from *pillar* to *post*. The allusion, according to Brewer, is to the pillar in the center of a manège-ground and the posts placed at regular intervals around its circumference. See def. 6, above.

From the post to *pillar* with thought his ract wyte he toseth.
Stanikurst, *Eneld*, iv. 296. (Davies.)

Our Guards, from *pillar* bang'd to *post*,
He kick'd about till they were lost.
Cotton, *Scarronides*, p. 62. (Davies.)

Knotted pillar. See *knotted*.—*Pillar and breast*, a common method of mining coal, in which the breasts or working-places are rectangular rooms, usually five or ten times as long as they are broad, and opened on the upper side of the gangway, or main haulage-road, or level driven on the strike of the coal. The breasts are made of various widths, usually from five to twelve yards, according to the character of the roof, but not so wide that the roof will not sustain itself. These breasts or rooms are separated by pillars of coal, broken only by cross-headings where these are needed for ventilation. The pillars are sometimes left so narrow that it is not expected they will permanently support the roof of the mine; in such cases the object of the method is to get as much coal as possible in the shortest time and at the least expense. If more economy of coal is considered desirable, the pillars are left wider, and, after the breasts are entirely worked out, are "robbed"—that is, are cut away until all the coal has been obtained from them which can be removed without too great danger to the miners. This method of mining is also called *post and stall*, *pillar and stall*, *pillar and room*, *stall and room*, *board and pillar*, etc. See *long-wall*.—*Pillar dollar*, a silver coin of Spain (so called from its figure of the Pillars of Hercules), coined especially for use in the former Spanish colonies in America. Also called *peso* and *piece of eight*. See cut in next column.—*Pillar letter-box*, a short pillar placed in a street, containing a receptacle for

letters, etc., which are collected at specified hours by post-office letter-carriers. [Eng.]—*Pillars of Corti*. Same as *rods of Corti* (which see, under *rod*).—*Pillars of Hercules*, the two hills on opposite sides of the straits of Gibraltar—Abyla (Jebel-el-Mina), on the African side, and Calpe (Rock of Gibraltar), on the European side—which were said to have been torn asunder by Hercules.—*Pillars of the abdominal ring*. See *columns of the abdominal ring*, under *column*.—*Pillars of the diaphragm*. See *diaphragm*.—*Pillars of the fauces*. See *fauces*.—*Pillars of the fornix*, the more or less compact strands of the fornix passing one pair anteriorly and one pair posteriorly down toward the base of the brain. The anterior pair pass down to the corpora albicantia, and are called *columns of the fornix*, or *radices ascendentes* (by Meyner *descendentes*) *fornices*. The posterior pillars or crura pass downward to end in the hippocampus major and to form the fimbria.—*Pillars of the palate*. See *palate*, l.—*Pompey's pillar*, a noted monument of antiquity standing at Alexandria in Egypt. It is a huge Corinthian column of red granite, rising to a height of 98 feet 9 inches, exclusive of the substructure. The shaft is monolithic and unfuted, 73 feet long and 29 feet 8 inches in circumference. The capital is 9 feet high, and the square base measures about 15 feet on the side. Despite the popular name, the monument had nothing to do with Pompey: it was erected in honor of the emperor Diocletian, a statue of whom originally stood upon it.—*Rib and pillar*, in *mining*, a system upon which the so-called "thick coal" was formerly extensively mined. It is a modification of the pillar-and-breast method. [South Staffordshire, Eng.]

pillar-block (pil'är-blok), *n.* In *mach.*, a pil-low-block or plumber-block.

pillar-box. Same as *pillar letter-box* (which see, under *pillar*).

pillar-brick (pil'är-brik), *n.* In the construction of a brick-kiln by building up unburned bricks, one of the bricks which are laid up between the "straight courses," and which form the sides of the arches through which the heated products of combustion flow in the process of burning.

pillar-compasses (pil'är-kum'pas-ez), *n.* A bow-pen; a pair of dividers with an attachment for a pen or pencil.

bling those in the stocks, and holes through which were put the head and hands of an offender, who was thus exposed to public derision.

Pilobolus (pi-lō-bō'lus), *n.* [NL., < (f) Gr. *πῖλος*, felt, + *βολός*, a clod, lump: see *bole*², *bolus*.] A genus of phycomycetous fungi, typical of the subfamily *Pilobolaceae*. *P. crystallinus*, the commonest species, occurs on animal dung. Its glutinous spores are forcibly ejected, often to a distance of ten feet.

pilocarpine (pi-lō-kār'pin), *n.* [*< pilocarpus* + *-ine*.] An alkaloid (C₁₁H₁₆N₂O₂) isolated from pilocarpus, which it resembles in its medicinal properties.

Pilocarpus (pi-lō-kār'pus), *n.* [NL. (Vahl, 1796), < Gr. *πῖλος*, a cap, + *καρπός*, fruit.] 1. A genus of polypetalous shrubs of the order *Rutaceae* and tribe *Zanthoxyleae*, characterized by the small calyx-teeth, valvate petals, versatile anthers, smooth ovary-lobes, and one-seeded cells, and by the complete numerical symmetry of the flower in circles of fours and fives. The 12 species are natives of the West Indies and tropical America. They bear pellucid-dotted leaves, either thin or coriaceous, pinnate or of one to three leaflets, alternate, opposite, or whorled. The numerous small green or purple flowers form very long terminal or axillary racemes.

2. [l. c.] The leaflets of *P. pennatifolius*, a very powerful diaphoretic medicine. Also known as *jaborandi*, though this word has been applied to various pungent sudorific plants.

pilori-rat (pi-lō'ri-rat), *n.* A book-name of the Cuban hutia-conga, *Capromys pilorides*.

Pilori-rat (*Capromys pilorides*).

pilose (pi'lōs), *a.* [Also *pilous*; < L. *pilosus*, hairy, < *pilus*, hair: see *pilē*.] Covered with hair; hairy; furry; pilous; especially, covered with fine or soft hair.

pilosity (pi-lōs'i-ti), *n.* [*< pilose* + *-ity*.] The state of being pilose or pilous; hairiness.

Pilosity is incident to orifices of moisture.

Bacon, Advancement of Learning, II. 169.

pilot (pi'lōt), *n.* [Early mod. E. also *pillote*, *pylate*; < OF. *pilot*, F. *pilote* = Sp. Pg. *piloto* = It. *pilota*, *pilota* (ML. *pilotus*, *pilota*), a pilot; cf. MD. *pilote*, *piloot*, *piloot*, *piloot* (Kilian), *peiloot* (Sewel), D. *piloot* = MLG. *pilote*, a pilot; origin uncertain; appar., through OF. *piloter*, *pilotier*, "to sound the depth of water with a line and plummet" (Cotgrave), < MD. *peylloot*, *peiloot*, D. *peillood*, a sounding-lead (= G. *peil-loth*, sounding-lead, plummet), < *peylen*, *piflen* (Kilian), D. *peilen* (= G. *peilen*, take soundings) (contr. of MD. *pegelen*, measure the capacity of anything, < *pegel*, the capacity of a vessel's gage), + *loot*, D. *lood* = G. *loth* = E. *lead*: see *lead*².] 1. The steersman of a ship; that one of a ship's crew who has charge of the helm and the ship's course; specifically, one who works a ship into and out of harbor, or through a channel or passage. In this specific sense the pilot is a person possessing local knowledge of shallow, rocks, currents, channels, etc., licensed by public authority to steer vessels into and out of particular harbors, or along certain coasts, etc., and rendering such special service for a compensation, fixed usually with reference to the draft of water and the distance.

And whanne we shuld a take the Porte, Sodenly fell down and Deyde the *Pylate* of our shippes, which we call *loidsman*. Torkington, Diarie of Eng. Travell, p. 60.

Times answerable, like waters after a tempest, full of working and swelling, though without extremity of storm; but well passed through by the wisdom of the *pilot*. Bacon, Advancement of Learning, II. 181.

Passengers in a ship always submit to their *pilot's* discretion, but especially in a storm. South, Sermons, X. v. The city remaining . . . without government of magistrats, like a ship left without a *pilot*. North, tr. of Plutarch, p. 601.

The high-shoed ploughman, should he quit the land

To take the *pilot's* rudder in his hand, . . .

The gods would leave him to the waves and wind,

And think all shame was lost in human kind.

Dryden, tr. of Persius's Satires, v. 148.

2. A guide; a director of the course of others; one who has the conduct of any affair requiring knowledge and judgment.

All must obey
The counsel of the *pilot*, & still stand
Prest at his service, when he doth command.
Times Whistle (E. E. T. 8.), p. 144.

3. Same as *cow-catcher*. See cut under *passenger-engine*. [U. S.]—4. A book of sailing-directions.—5. Pilot-cloth.

Linings, rugs, wraps, and heavy friezes, *pilots*, druggists, blankets, etc., in which bulk and warmth more than wear-resisting qualities are required. Encyc. Brit., XXIV. 681.

6. The pilot-fish.—7. The black-bellied plover, *Squatarola helvetica*. G. Trumbull. [Virginia coast.]—Coasting-pilot. Same as *coast-pilot*.—Pilot's water, any part of the sea or of a river in which a pilot must be employed. (See also *branch-pilot*.)

pilot (pi'lōt), *v. t.* [*< F. piloter*, pilot; from the noun.] To steer; direct the course of, especially through an intricate or perilous passage; guide through dangers or difficulties.

Where the people are well-educated, the art of *piloting* a state is best learned from the writings of Plato.

Ep. Berkeley, Siria, § 382.

If all do not join now to save the good old ship of the Union on this voyage, nobody will have a chance to *pilot* her on another voyage. Lincoln, in Raymond, p. 89.

pilotage (pi'lōt-āj), *n.* [*< F. pilotage*, < *piloter*, pilot; see *pilot*, *v.*] 1. The act of piloting; direction of a pilot; guidance.

Under his *pilotage* they anchored on the first of November close to the Isthmus of Darien.

Macaulay, Hist. Eng., xxiv.

2. The employment or services of a pilot: as, incompetent *pilotage*.—3. The knowledge of coasts, rocks, bars, and channels.

We must for ever abandon the Indies, and lose all our knowledge and *pilotage* of that part of the world. Raleigh.

4. The fee or remuneration paid or payable to a pilot for his services.—Compulsory *pilotage*, compulsory employment of pilots in accordance with local law.—*Pilotage authority*, a body of men appointed to test the qualifications of applicants for pilots' licenses, and to grant or suspend such licenses, etc.—*Pilotage district*, the limit of jurisdiction of a pilotage authority.

pilotaxitic (pi'lō-tak-sit'ik), *a.* [Irreg. < Gr. *πῖλος*, felt, + *τάξις*, arrangement, + *-itēs* + *-ic*.] In *lithol.*, a term introduced by Rosenbusch to designate a holocrystalline structure said by him to be characteristic of certain rocks, and especially of the porphyrites, in which the ground-mass consists of slender lath-shaped microliths of feldspar, with which are frequently connected the phenomena of fluidal structure, amygdulæ, and the presence of minute vitreous scales.

pilot-balloon (pi'lōt-bal-lōn'), *n.* A small balloon sent up in advance of a larger one to ascertain the direction and strength of the wind.

pilot-bird (pi'lōt-bērd), *n.* A bird found in the Caribbean Islands: so called because its presence at sea indicates to seamen their approach to these islands.

pilot-boat (pi'lōt-bōt), *n.* A boat used by pilots for cruising off shore to meet incoming ships. On the coast of the United States pilot-boats are handy, weatherly schooner-rigged vessels, and frequently

cruise at a long distance off shore; they are distinguished by a flag and by a number painted conspicuously on the mainsail, and at night by a flare-up light, in addition to a masthead light.

pilot-bread (pi'lōt-bred), *n.* Same as *ship-biscuit*.

pilot-cloth (pi'lōt-klōth), *n.* A heavy woolen cloth, such as is used by pilots for pea-jackets.

piloteer, *n.* [*< pilot* + *-eer*.] A pilot.

Whereby the wand'ring *Piloteer*

His course in gloomy Nights doth steer.

Honell, Letters, III. 4.

pilot-engine (pi'lōt-en'jin), *n.* A locomotive engine sent on before a railway-train to see the way is clear, especially as a precursor to a train conveying important personages.

pilot-fish (pi'lōt-fish), *n.* 1. A pelagic carangoid fish, *Naucrates ductor*, found in all warm seas, and occasionally on the Atlantic coast of the United States. It somewhat resembles a mackerel, being of fusiform shape, bluish color, with from five to seven dark vertical bars, and the first dorsal fin represented by a few spines. It is a foot or more long. The pilot-fish is supposed by some to have been the pompius of the ancients, but the traditions respecting it have little foundation in fact. The generic name *Naucrates* was applied by the ancients to species of *Echeneis* and other fishes with a suction disk. See cut under *Naucrates*.

2. *pl.* A term extended to all the *Carangidae*. D. S. Jordan.—3. A remora or sucking-fish of the family *Echeneidae*, as *Echeneis naucrates*. [This use of the term is nearer the original meaning of *Naucrates*.]—4. A corygonid, *Corygonus quadrilateralis*, the Menomonee white-fish or shad-waiter of New England, some of the Great Lakes, and parts of British America to Alaska.

pilot-flag (pi'lōt-flag), *n.* The flag hoisted at the fore by a vessel needing a pilot. In vessels flying the United States flag the pilot-flag is the union-jack. It varies in other nationalities, but is always hoisted at the fore.

pilot-house (pi'lōt-hous), *n.* An inclosed place or house on deck which shelters the steering-gear and the pilot or helmsman. In modern sea-going steam-vessels this is usually situated in some commanding position forward, and generally in connection with the officers' bridge. In a very large proportion of vessels, however, there is no pilot-house, the steersmen and steering-gear being left exposed. Also called *wheel-house*.

pilotism (pi'lōt-izm), *n.* [*< pilot* + *-ism*.] Pilotage; skill in piloting. Cotgrave. [Rare.]

pilot-jack (pi'lōt-jak), *n.* A union or other flag hoisted by a vessel as a signal for a pilot.

pilot-jacket (pi'lōt-jak'et), *n.* A pea-jacket, such as is worn by seamen. See *pea-jacket*.

pilot-light (pi'lōt-lit), *n.* A very small gas-light kept burning beside a large burner, so that when the flow through the main burner is turned on it will be automatically lighted by the pilot-light. It is usually protected by a shield from being accidentally blown out. See *by-pass*.

pilotry (pi'lōt-ri), *n.* Same as *pilotism*.

pilot-snake (pi'lōt-snāk), *n.* A harmless snake of the United States, *Coluber obsoletus*.

pilotweed (pi'lōt-wēd), *n.* Same as *compass-plant*.

pilot-whale (pi'lōt-hwāl), *n.* Same as *coasting-whale*.

pilour, *n.* See *pill*¹.

pilous (pi'lus), *a.* [*< L. pilosus*, hairy: see *pilose*.] 1. Covered with hair; hairy; pilose.

That hair is not poison, though taken in a great quantity, is proved by the excrements of voracious dogs, which is seen to be very *pilous*. J. Robinson, Eudoxa (1658), p. 124.

2. Consisting of hair; hair-like; piliform: as, a *pilous* covering.

Also *pilous*.

pilula (pi'lū-lā), *n.*; pl. *pilulæ* (-lā). [L.: see *pilule*.] In *phar.*, a pill.

pilular (pi'lū-lār), *a.* [*< NL. "pilularis"*, < L. *pilula*, a pilule: see *pilule*.] Of or pertaining to or characteristic of pills: as, a *pilular* mass; a *pilular* form; a *pilular* consistency.

Pilularia (pi'lū-lā'ri-ā), *n.* [NL. (Vaillant, 1717), so called in allusion to the shape of the reproductive organs; < "pilularis," like a pill: see *pilular*.] A genus of vascular cryptogamous plants of the order *Marsileaceae*; the pillworts. They are inconspicuous submerged plants with widely creeping slender rhizomes, with a filiform leaf from the upper side and a tuft of root-fibers from the lower side of each node. Seven species are known, of which only one, *P. americana*, is found in North America. See *pepper-grass*, 2, and *pillwort*.

pilule (pi'lū-lū), *n.* [= F. *pilule* = Pg. *pilula*, < L. *pilula*, a pill, dim. of *pila*, a ball. Cf. *pill*³.] A little pill or pellet.

pilulous (pi'lū-lūs), *a.* [*< pilule* + *-ous*.] Pertaining to or resembling a pill; pilular; hence, small; inconspicuous; trifling. [Rare.]

Has any one ever pinched into its *pilulous* smallness the cobweb of pre-matrimonial acquaintanceship? George Eliot, Middlemarch, II.

pilum (pi'lum), *n.*; pl. *pila* (-lā). [L.: see *pilē*¹.] 1. A heavy javelin used by the Roman foot soldiers.—2. Any javelin used by barbarous races with whom the Romans had to do, as by the Franks, Burgundians, and others.—3. In *phar.*, an instrument used to triturate substances in a mortar; a pestle.

pilus (pi'lus), *n.*; pl. *pili* (-lī). [L., a hair, hair: see *pilē*⁴.] 1. In *bot.*, one of the fine slender bodies, like hair, covering some plants.—2. In *zool.*, a hair or hair-like body, especially a hair

in any way distinguished from those which collectively cover the body.—*Pili gossypii*, cotton.—*Pili tactiles*, tactile hairs. See *hair* 1.

pillow, *n.* A Middle English form of *pillow*.

pily (pi'li), *a.* [*OF. *pile*, < *pila*, a pile: see *pile* 2.] In *her.*, divided into a number of piles set side by side. Some qualifying term expresses their position if they do not point in a parallel direction and downward. The number of piles must also be mentioned in the blazon.—**Barry pily**. See *barry* 2.—**Pily paly**, in *her.*, pily of the ordinary sort—that is, having the small piles reaching from the top to the bottom of the shield. Also *paly pily*, *palisade*.

pimaric (pi-mar'ik), *a.* [*L. pi(nus)*, pine, + *mar(itinus)*, maritime, + *-ic*.] Derived from or occurring in the maritime pine: as, *pimaric acid*.

Pimelea (pi-mē'lē-ā), *n.* [*NL.* (Banks, 1801), so called with ref. to the oily seeds and leaves; < *Gr. πμελή*, fat.] A genus of apetalous shrubs of the order *Thymelæaceæ* and tribe *Euthymelææ*, known by the two stamens, all others of the family having four, eight, or more. There are 76 species, natives of Australia and New Zealand, slender branching shrubs with tough stringy bark. They bear small opposite or scattered leaves, and white, pink, or yellow flowers in terminal or axillary involucre clusters, each flower four-lobed, funnel-shaped, and without the appendages usual in the order, followed by a small fruit with thick rind and berry-like pulp. Many species are cultivated as beautiful greenhouse evergreens, of about 3 feet in height, under the name *rice-flower*. Others are known in Australia as *toughbark*, and can be used for textile purposes, especially *P. aciflora*, the curryjong, a tall smooth shrub. Several attain a height of about 10 feet, as *P. drupacea*, the Victorian bird-cherry.

Pimelepteridæ (pim'e-lep-ter'i-dē), *n. pl.* [*NL.*, < *Pimelepterus* + *-idæ*.] A family of percoideous acanthopterygian fishes, typified by the genus *Pimelepterus*. The body is oval, compressed, and developed nearly equally above and below; the scales are small, adherent, and extending over the vertical fins; the lateral line is uninterrupted; and the teeth are generally incisorial or compressed. The species are inhabitants of tropical and temperate seas. Also called *Cyphosidæ*.

Pimelepterinae (pim-e-lep-ter-i-nē), *n. pl.* [*NL.*, < *Pimelepterus* + *-inæ*.] A subfamily of *Sparidæ*, typified by the genus *Pimelepterus*. They have the front teeth incisorial or lanceolate, and with horizontal backwardly projecting bases, behind which are smaller ones; vomerine teeth are present; and the soft fins are densely scaly. All the species are by some referred to one genus, *Pimelepterus*, while others distinguish two or more additional genera.

Pimelepterus (pim-e-lep-ter-us), *n.* [*NL.* (Lacépède, 1802), < *Gr. πμελή*, fat, + *πτερόν*, wing, *πτερυς*, wing, fin.] The typical genus of *Pimelepteridæ*, having the skin and scales en-

croaching on the dorsal and anal fins, which are consequently thickened, whence the name. These fishes are partly herbivorous, and the species are numerous in all warm seas. *P.* (or *Cyphosus*) *bosci* extends from the Isthmus of Panama along the Atlantic coast as far north as Massachusetts.

pimelite (pim'e-lit), *n.* [*Gr. πμελή*, fat, + *λίθος*, stone.] A mineral of an apple-green color, fat and unctuous to the touch, tender, and not fusible by the blowpipe. It is a hydrous silicate containing some nickel.

pimelitis (pim-e-lit'is), *n.* [*NL.*, < *Gr. πμελή*, fat, + *-itis*.] Inflammation of adipose tissue.

pimelode (pim'e-lōd), *n.* Any catfish of the genus *Pimelodus*.

Pimelodinae (pim'e-lō-dī-nē), *n. pl.* [*NL.*, < *Pimelodus* + *-inæ*.] A subfamily of catfishes of the family *Siluridæ*, typified by the genus *Pimelodus*, having the anterior and posterior nostrils remote from each other and without barbels. Some have a long spatulate snout, and in others the adipose fin is highly developed. They are characteristic of tropical waters, especially of South America, where they represent the catfishes of North America. A few species are African.

pimelodine (pi-mel'ō-dīn), *a. and n.* I. *a.* Belonging to the subfamily *Pimelodinae*.

II. *n.* A catfish of the subfamily *Pimelodinae*.

Pimelodus (pim-e-lō'dus), *n.* [*NL.* (Lacépède), < *Gr. πμελήδης*, fatty, < *πμελή*, fat, + *εἶδος*, form.] A genus of silurids, to which very different limits have been assigned. In the old authors it was a very heterogeneous group, embracing a vast number of species and including the common catfishes of the North American lakes and streams, as well as those of the South American, and various others. It was gradually reduced, and is now restricted to South American and Central American forms with two maxillary

Pimelodus maculatus.

and four mental barbels, typical of the subfamily *Pimelodinae*.

piment, *n.* [*ME. piment*, *pyment*, < *OF. piment*, < *ML. pigmentum*, spiced wine, spice: see *pigment*.] Wine with a mixture of spice or honey, once a favorite beverage. Also *pigment*.

He sente hire *pyment*, meeth, and spiced ale.

Chaucer, Miller's Tale, l. 192.

pimenta¹ (pi-men'tā), *n.* Same as *pimento*.

Pimenta² (pi-men'tā), *n.* [*NL.* (Lindley, 1821), < *Sp. pimenta*, allspice (a related tree): see *pigment*.] A genus of fragrant trees of the myrtle family, order *Myrtaceæ* and tribe *Myrtææ*, characterized by the circular or spirally twisted embryo, and from one to six ovules pendulous from the summit of each of the two cells of the ovary. There are 5 species, natives of tropical America. They bear large and coriaceous feather-veined leaves, and many small flowers in axillary cymes. For *P. acris*, called black cinnamon, etc., see *bayberry*, 3, *bayrum*, and *wild clove* (under *clove*). For the important *P. officinalis*, see *pimento*.

pimento (pi-men'tō), *n.* [Also *pimenta*; < *Sp. pimienta*, the pepper-plant, capsicum, *pimienta*, the fruit of this plant, applied also to *Pimenta officinalis*, Jamaica pepper, = *Pg. pimento*, *pimenta* = *F. piment*, pepper (capsicum). < *ML. pigmentum*, spice: see *pigment*.] 1. Allspice, the berry of *Pimenta officinalis* (*Eugenia Pimenta*), a tree, native of the West Indies, but cul-

There lies the pang that *pinches* me.

Song of the Outlaw Murray (Child's Ballads, VI. 34).

You . . . that would enjoy,

Where neither want can *pinch*, nor fulness cloy.

Quarles, *Emblems*, iii., Entertainment.

How hardly will some *pinch* themselves and Families before they will make known their necessities!

Stillingfleet, *Sermons*, II. vii.

My wife . . . insisted on entertaining them all; for which . . . our family was *pinched* for three weeks after.

Goldsmith, *Vicar*, vii.

7. To narrow, contract, or nip, as by cold or want or trouble: as, *pinched* features; a mind narrow and *pinched*.

The air hath starved the roses in her cheeks,

And *pinch'd* the lily-tincture of her face.

Shak., *T. G. of V.*, iv. 4. 160.

Pinch'd are her looks, as one who pinches for bread.

Crabbe, *Works*, I. 79.

8. To move with a pinch or crowbar: as, to *pinch* a gun into position.

II. *intrans.* 1. To exert a compressing or nipping pressure or force; bear hard: as, that is where the shoe *pinches*.

I *pinch* not off, nor doo I often praise;

Yet, must I needs praise the praise-worthy still.

Sylvestre, tr. of Du Bartas's *Triumph of Faith*, Ded.

But thou

Know'st with an equal hand to hold the scale,
 Seest where the reasons *pinch*, and where they fail.

Dryden.

2. To lay hold; bite or snap, as a dog. All held in dismay

Of Diomed, like a sort of dogs, that at a lion bay,

And entertaine no spirit to *pinch*. *Chapman*, *Iliad*, v.

3. To snarl; carp; find fault. Every way this office of preaching is *pinched* at.

Latimer, 6th Sermon bef. Edw. VI., 1549.

4. To be sparing, parsimonious, or niggardly. For to *pinche*, and for to spare,

Of worldes mucke to gette encores.

Gower, *Conf. Amant*, v.

Surely lyke as the excess of fare is to be lustely repoured, so in a noble man moche *pinching* and nygardshyp of meate and drynke is to be discommended.

Sir T. Elyot, *The Governour*, iii. 21.

The wretch whom avarice bids to *pinch* and spare,
 Starve, steal, and pilfer to enrich an heir. *Franklin*.

Money is exacted (either directly or through raised rent) from the huckster who only by extreme *pinching* can pay her way, from the mason thrown out of work by a strike.

H. Spencer, *Man vs. State*, p. 73.

5. To encroach. Yf ich gede to the plough ich *pyncched* on hys half-acre.

Piers Plowman (C), vii. 267.

To know or feel where the shoe *pinches*, to know by personal experience where the cause of difficulty or trouble in any matter lies.—To *pinch* at, to find fault with; take exception to.

He speke wol of smale thynges,

As for to *pyncchen* at thy rekenynges,

That were nat honeste, if it came to prof.

Chaucer, *Prolog.* to *Manciple's Tale*, l. 74.

pinch (pinch'), *n.* [*< pinch*, *v.*] 1. The pressure exerted by the finger and thumb when brought together forcibly upon something, or any similar pressure; a nip: as, to give one a *pinch* on the arm.—2. As much of anything as can be lifted between the finger and thumb; hence, a very

small quantity: as, a *pinch* of snuff; a *pinch* of salt.

She gave her Charity with a very good Air, but at the same time asked the Church warden if he would take a *Pinch* [of snuff]. *Steele*, *Spectator*, No. 344.

3. A gripe; a pang.

Rather I abjure all roofs, and choose

To wage against the enmity o' the air;

To be a comrade with the wolf and owl—

Necessity's sharp *pinch*! *Shak.*, *Lear*, ii. 4. 214.

Now, since some *pinches* have taken them, they begin to reveille ye trueth, & say Mr. Robinson was in ye false. *Cushman*, quoted in *Bradford's Plymouth Plantation*, p. 72.

4. Pressure; oppression; difficulty; need. The Norman in this narrow *pinch*, not so willingly as wisely, granted the desire.

Selden, *Illustrations of Drayton's Polyolbon*, xviii. 735.

Where the *pinch* lay, I cannot certainly affirm. *Swift*, *Tale of a Tub*, i.

Steele had the *pinch* of impunctuality, due rather to excess of expenditure than to smallness of income. *Encyc. Brit.*, XXII. 528.

5. A pinch-bar. "*Pinches* or forehammers will never pick upon 'em," said Hugh, the blacksmith. *Scott*, *Black Dwarf*, ix.

In, on, upon, or at a *pinch*, in an emergency; under the pressure of necessity.

At a *pinch* a friend is known,

I shall put them in adventure.

Berners, tr. of *Froissart's Chron.*, II. cxviii.

Undone, undone, undone! stay; I can lie yet, And swear too, at a *pinch*; that's all my comfort.

Fletcher, *Humorous Lieutenant*, iv. 4.

Although my proper employment had been to be surgeon or doctor to the ship, yet often upon a *pinch* I was forced to work like a common mariner.

Swift, *Gulliver's Travels*, ii. 5.

Jack at a *pinch*. See *Jack*.—*Pinch* points, points on a double line at which the two tangent planes coincide.

pincho (pin'chō), *n.* [S. Amer.] A South American marmoset, *Midas edipus*.

pinchpennies (pinch'pen'i), *n. pl.* *pinchpennies* (-iz). [*pinch*, *v.*, + *obj. penny*.] A niggard.

They accept one . . . a *pinch penny* if he be not prodigal. *Lyly*, *Euphues*, Anat. of Wit, p. 109.

pinch-plane (pinch'plān), *n.* A singularity of a surface consisting of a generating plane in the developable envelop of the planes having double contact with the surface where the two points of contact coincide.—**Double pinch-plane**, a singularity arising from the coincidence of two pinch-planes.

pinch-point (pinch'point), *n.* A singularity of a surface consisting of a point on a double line or nodal curve where the two tangent-planes coincide.—**Double pinch-point**, a singularity arising from the coincidence of two pinch-points.

pinch-spotted (pinch'spot'ed), *a.* Discolored from having been pinched, as the skin. *Shak.*, *Tempest*, iv. 1. 261.

pinckanyt, *n.* Same as *pignoney*.

John, *Pithies*, little *pinckany*, bestow this jewel a me. *Heywood*, If you Know not Me (Works, ed. Pearson, I. 308).

Pinckneya (pink'ni-ä), *n.* [NL. (Richard, 1803), named after Charles Cotesworth Pinckney, a South Carolinian statesman.] A genus of small gamopetalous trees of the order *Rubiaceae* and tribe *Contamineae*, type of the subtribe *Pinckneyae*, characterized by the woolly corolla-lobes and calyx-tube, and by having one sepal dilated into a large rose-colored leaf-like blade. The only species, *P. pubens*, is a native of the southern United States (in the Carolinas and Florida). It bears roundish and closely woolly branchlets, with large thin opposite leaves, and showy pink- and purple-spotted flowers in axillary and terminal corymbs, made more conspicuous by the pinkish bracts, which are ovate and leaf-like and reach 2 inches in length, the flowers 1½ inches. See *fever-tree*, 2, and *Georgia bark* (under *bark*).

pin-clover (pin'klō'vēr), *n.* Same as *alfilerilla*.

pin-connection (pin'kō-nek'shon), *n.* In an iron or steel bridge, a connection of the parts by the use of pins, in contradistinction to connections made with turn-buckles, rivets, etc. This method of connecting parts of bridges is believed to be of American origin.

pin-cop (pin'kop), *n.* A roll of yarn, shaped like a pear, used for the weft in power-looms.

pin-pinc (pink'pink), *n.* [Imitative; cf. *pink*.] A name of the reed-warbler, *Dryococcyz* or *Cisticola schaniella*, and of other African warblers of the same genus. One of them, *D. testis*, is remarkable for building a beautiful nest, something like that of the long-tailed titmouse, with a supplementary nest outside for the use of the male. See cut in next column.

pincurtlet, *n.* A pinafore. *Hallwell*. [Prov. Eng.]

Pin-pinc (*Dryococcyz testis*).

pin-cushion (pin'kush'on), *n.* 1. A cushion into which pins are stuck when not in use. [The first quotation refers to the originally high value of pins.]

Beggar myself with purse and *pin-cushion*,
When she that is the mistress may be mine?
Shirley, *Witty Fair One*, III. 2.

Thou art a Retailer of Phrases, and dost deal in Remnants of Remnants, like a Maker of *Pin-cushions*.

Congress, *Way of the World*, IV. 9.

2. A plant of the genus *Scabiosa*, the scabious: so called with reference to the soft convex flower-head. Also applied locally to various other plants, as the snowball, *Viburnum Opulus*, sometimes called *pin-cushion-tree*.—Robin-redbreast's *pin-cushion*. Same as *bedegar*.

pind (pind), *v. t.* [*ME. pynden*, < *AS. *pyndan*, in comp. for *pyndan*, put in a pound, pound, < *pund*, pound: see *pound*. Cf. *pend*, *pen*, *pin*.] To impound, as cattle, shut up or confine in a pound.

pindal (pin'dal), *n.* [Also *pinda*, *pindar*, *pinder*: said to be of African origin.] The groundnut or peanut, *Arachis hypogaea*. [Southern U. S. and West Indies.]

pindar¹, *n.* Same as *pinder*¹.

pindar², *n.* Same as *pindal*.

pindara (pin-dä'rä), *n.* [*Ind. Pindārā*, < *Canarese Pindāra*, *Pendārī*, *Marathi Pindārī*, etc.: see *pindaree*.] Same as *pindaree*.

pindaree (pin-dar'ē), *n.* [Also *pindarry*; < *Hind. Pindārī*, < *Marathi Pindhārī*, prop. *Pendhārī* = *Canarese Pindārī*, a plunderer, free-booter.] A member of a horde of mounted robbers in India, notorious for their atrocity and rapacity. They first appeared about the end of the seventeenth century, and infested the possessions of the East India Company and the surrounding country in the eighteenth century. They were disorderly and mercenary horsemen, organized for indiscriminate raiding and looting. They were dispersed in 1817 by the Marquis of Hastings, then governor-general.

Pindaric (pin-dar'ik), *a. and n.* [= *F. pindarique* = *Sp. Pg. It. Pindarico*, < *L. Pindaricus*, < *Gr. Πινδαρικός*, < *Πινδαρος*, *Pindar* (see *def.*).] 1. *a.* Of or pertaining to *Pindar*, one of the first of Greek lyric poets (about 522 to 443 B. C.), or resembling or characteristic of his style.

Almighty crowd! thou shortenest all dispute,
Thou leap'st o'er all eternal truths in thy *Pindaric* way!
Dryden, *The Medal*, I. 94.

You will find, by the account which I have already given you, that my compositions in gardening are altogether after the *Pindaric* manner, and run into the beautiful wildness of nature, without affecting the nicer elegancies of art.

Addison, *Spectator*, No. 477.

It was a strange misconception that led people for centuries to use the word *Pindaric* and irregular as synonymous terms; whereas the very essence of the odes of *Pindar* . . . is their regularity. *Encyc. Brit.*, XIX. 270.

Pindaric hendecasyllabic. See *hendecasyllabic*.

II. n. An ode in imitation of the odes of *Pindar*; an ode in irregular or constantly changing meter. *Addison*.

I sometimes see supreme beauty in *Pindar*, but English *Pindarics* are to me incomprehensible.

C. A. Ward, *N. and Q.*, 6th ser., IX. 68.

Pindarical (pin-dar'ik-al), *a.* [*Pin-daric* + *-al*.] Same as *Pindaric*.

You may wonder, sir (for this seems a little too extravagant and *pindarical* for prose), what I mean by all this preface. *Cowley*, *The Garden*.

Pindarism (pin'där-izm), *n.* [= *F. pindarisme*; < *Pindar* + *-ism*.] Imitation of *Pindar*.

Pindarism prevailed about half a century, but at last died gradually away, and other imitations supply its place. *Johnson*, *Cowley*.

A sort of intoxication of style—a *Pindarism*, to use a word formed from the name of the poet on whom, above all other poets, the power of style seems to have exercised an inspiring and intoxicating effect.

M. Arnold, *Study of Celtic Literature*, p. 144.

Pindarist (pin'där-ist), *n.* [*Pin-dar* + *-ist*.] An imitator of *Pindar*. *Johnson*.

pindarry (pin-dar'i), *n.* Same as *pindaree*.

pinder¹ (pin'dēr), *n.* [Early mod. E. also *poinder*, also *pinner*, *pyner*; < *ME. pynder*, *pyndare*; < *pind* + *-er*. Cf. *pounder*.] The officer of a manor whose duty it was to impound stray cattle.

With that they espy'd the jolly *pinder*,

As he sat under a thorn.

"Now turn again, turn again," said the *pinder*,

For a wrong way you have gone.

Jolly Pinder of Wakefield (Child's Ballads, V. 206).

The *poinder* chafes and swears to see beasts in the corn, yet will pull up a stake, or cut a tether, to find supply for his pin-fold. *Rev. T. Adams*, Works, I. 163.

In the country, at every court leet, ale-tasters were appointed, with the *pinder* or pounder, etc.

S. Doucet, Taxes in England, IV. 56.

pinder² (pin'dēr), *n.* Same as *pindal*.

The words by which the peanut is known in parts of the South—goober and *pinder*—are of African origin.

Jour. Amer. Folk-Lore, II. 162.

pindjajap (pin'ja-jap), *n.* A boat of Sumatra and the Malay archipelago, with from one to three masts, generally two, carrying square

sails, and having much overhang or projection at both stem and stern. *Pindjajaps* are employed in bringing spices, etc., to the ports frequented by Europeans, and were also fitted out as pirate vessels.

Pindova palm. See *palm*².

pin-drill, *n.* See *drill*¹.

pindrow (pin'drō), *n.* See *king-pine*, under *pine*¹.

pindrust (pin'dust), *n.* Small particles of metal produced in the manufacture of pins.

The little particles of *pindrust*, when mingled with sand, cannot, by their mingling, make it lighter. *Sir K. Digby*.

pine¹ (pin), *n.* [*ME. pine*, *pyne*, *pin*, < *AS. *pin*, in comp. *pinbeām*, *pintrēow*, pine-tree, = *D. pijn*, (boom) = *MHG. pine*, (baum), *pin*, (baum) (G. *pinie* = *Sw. Dan. pinie*) = *F. Pr. pin* = *Sp. It. pino* = *Pg. pinho* = *Ir. pin* (chraim), < *L. pinus*, pine; prob. orig. **picnus*, < *pic* (pic-), pitch: see *pitch*. Cf. *Gr. πινυς*, pine.] 1. Any tree of the genus *Pinus*. The pines are evergreens ranging in size from that of a low bush up to a height of 800 feet. Some of them are of the highest economic importance from the timber obtained from them, which, though not of the finest cabinet quality, is very extensively used in all kinds of construction. In this regard the most important species are—in Europe, the Scotch pine; in North America, the (Canadian) red pine, the common white pine, the long-leaved pine, the yellow pine of the east, and that of the west; in India, the Bhutan, chir, and Khassian pines; and in Japan, the matsu (Japanese pine). (See below.) The resinous products of some are of great value (see *pitch*, *tar*, *turpentine*, *resin*, *abietene*, *australene*; also *Aleppo pine*, *cluster pine*, *Coriarian pine*, *long-leaved pine*, *Mugho pine*, and *stone pine*—all below, and *chir*); and some species are useful for their edible seeds (see *nut-pine*). See also *fir-wood*, and *pine-needle wool* (under *pine-needle*).

2. One of various other coniferous trees, as the Moreton Bay pine and the Oregon pine (see below); also, one of a few small plants suggesting the pine. See *ground-pine*.—3. The wood of any pine-tree.—4. The pineapple.—**Aleppo pine**, a middle-sized tree, *Pinus halepensis*, of Mediterranean Europe and Asia, occurring along with the Lebanon cedars. It produces a useful wood, and is the source of the Aleppo turpentine.—**Amboyna pine**, *Agathis (Dammaria) orientalis*. Also called *dammar-pine*. See *Dammar*.—**Austrian pine**, a rather tall tree, *Pinus nigra*, of Austria, etc., having long dark glossy foliage, and resinous wood of moderate worth. Also called *black pine*.—**Bastard pine**. Same as *slash-pine*.—**Bhutan or Ehotan pine**, *Pinus excelsa*, of the Himalayas and Afghanistan, a symmetrical tree growing 150 feet high, with a valuable wood, close-grained and easily worked. Also called *laffy pine*. A native name is *kail*.—**Blahop's pine**. Same as *Obispo pine*.—**Black pine**. (a) *Pinus Murrayana*, a tree of moderate size and worth, of Pacific North America. Also called *tamarack*, *lodge-pole pine*, *ridge-pole pine*, and *spruce-pine*. (b) Same as *Austrian pine*. (c) Same as *bull-pine*. (d) Same as *miro*.—**Brazilian pine**, *Aracaria Brazilianensis*, a fine tree growing 100 feet high, which forms large forests in southern Brazil. Its seeds are large and

edible, and its wood is fit for boards, masts, etc.—**Broom-pine**. Same as *long-leaved pine*.—**Bull-pine**. (a) *Pinus Jeffreyi*, of the Sierra Nevada, a large tree whose wood affords much coarse lumber. Also called *black pine*, *Truckee pine*. (b) Same as *digger pine*. (c) Same as *yellow pine* (a). (d) Same as *yellow pine* (c).—**Bunya-bunya pine**. See *bunya-bunya*.—**Calabrian pine**. See *Corsican pine* and *cluster-pine*.—**Canadian pine**. Same as *red pine* (a).—**Canary pine**, *Pinus Canariensis*, forming extensive forests at high elevations on the Canary Islands. Its timber is considered good, and is not subject to insect ravages.—**Candlewood pine**, a resinous Mexican tree, *Pinus Lecontei*. Also called *torch-pine*.—**Cedar-pine**, a middle-sized tree, *Pinus glabra*, found locally in the southern United States, and of no great value. Also called *spruce-pine* and *white pine*.—**Celery-pine**, *celery-leaved pine*, any one of the three species of *Phyllocladus*, beautiful trees, so called from their branchlets resembling a dissected leaf. *P. trichomanoides*, of New Zealand, furnishes a strong durable timber, and is called by the colonists *pitch-pine*. The Tasmanian *P. rhomboidalis* (*P. asplenifolia*) is known as the *celery-top pine*, and yields elastic spars.—**Cembra pine**, the Swiss stone-pine. See *stone-pine*, below.—**Cheer, cheer, or chir pine**, the long-leaved pine of India. See *chir*.—**Chilian pine**. See *Araucaria*.—**Cluster-pine**, the *Pinus Pinaster* of southern Europe. Its stout leaves are set in dense whorls, and its cones are borne in clusters of from four to eight. It furnishes the Bordeaux turpentine (see *barras* and *galipot*), and its timber is of fair worth. It is used on a large scale in southern France to reclaim sandy wastes. It is also called *maritime pine* and *star-pine*. The Calabrian cluster-pine is *P. Brutia*.—**Corsican pine**, *Pinus Laricio*, of Mediterranean Europe, a species reaching a height of 120 feet, notably forming woods on Mount Etna at an altitude of from 4,000 to 6,000 feet. It yields turpentine, and its coarse elastic wood is easily worked and durable. Its variety *Pallasiana*, of the Taurus Mountains, is the *Taurian* or *seaside pine*. Also called *Calabrian pine* and *Corsican larch*.—**Cowdrie, cowrie pine**. See *kauri-pine* and *Dammara*.—**Dammara-pine**. Same as *Amboy-pine*.—**Digger-pine**, *Pinus Sabina*, a large tree common on the foot-hills of California mountains. It is much used for fuel, and is one of the nut-pines. Also called *bull-pine*.—**Douglas pine**. Same as *Oregon pine*.—**Dwarf pine**. See *Mugho pine*.—**Dye-pine**. Same as *king-pine*.—**Emodi pine**. Same as *cheer pine*.—**Forstall-pine**, *Pinus Balfouriana*, var. *aristata*, of Nevada, etc., a rather large soft-wooded tree, used in timbering mines. It is now nearly exhausted. Also called *hickory-pine*.—**Frankincense-pine**. Same as *loblolly-pine*.—**Georgia pine**. Same as *long-leaved pine*.—**Giant pine**. Same as *sugar-pine*.—**Ginger-pine**, the Oregon, Port Orford, or white cedar, *Chamaecyparis Lawsoniana*, admired in cultivation, and most valuable for its hard, strong, close-grained, and durable wood, which has many uses. Its odoriferous resin is a powerful diuretic and insecticide.—**Golden pine**. Same as *Chinese or golden larch*. See *larch*.—**Gray pine**, *Pinus Banksiana*, a species ranging from the northern borders of the United States northward, of an ashen color, varying in size from 60 feet high down to a straggling bush. Its wood serves for fuel, railway-ties, etc. Also called *Hudson's Bay* or *Labrador pine*, *northern scrub-pine*, and *prince's pine*.—**Hard pine**, specifically, the long-leaved pine.—**Highland pine**, the horizontal Scotch pine.—**Himalayan pine**. Same as *neoz-pine*.—**Hudson's Bay pine**. See *gray pine*.—**Japanese pine**. See *matru*. The Japanese red pine is the *akamatsu*.—**Jersey pine**, *Pinus strobus*, a generally small, straggling tree, growing in barren soil on the eastern coast of the United States, in Kentucky, etc., and westward largely used for pump-logs and water-pipes. Also called *scrub-pine*.—**Khasian pine**, *Pinus Khasya*: in the Khasian mountains a small tree; in the Burmese hills sometimes 200 feet high.—**King-pine**, a lofty fir, *Abies Webbiana*, of the Himalayas and Afghanistan, a stout black tree of columnar outline, or flat-headed, sometimes 150 feet high. Its fragrant resinous wood is useful, and its young cones yield a beautiful violet dye, whence it is sometimes called *dye-pine*. The *bindrow-fir* is a variety of the king-pine.—**Knob-cone pine**, *Pinus tuberculata*, an unimportant species of the western United States.—**Labrador pine**. Same as *gray pine*.—**Lacebark-pine**, *Pinus Bungeana*, of northern China, cultivated by the Chinese in pots. It sheds its outer bark every season.—**Lambert's pine**. Same as *sugar-pine*.—**Lodge-pole pine**. Same as *black pine* (a).—**Lofty pine**. Same as *Bhulan pine*.—**Long-leaved pine**, a tree of great economical importance, *Pinus palustris* (*P. australis*), forming extensive forests along the coast of the United States from southern Virginia to Texas, rarely extending inland more than 150 miles. It grows 70 feet high and a yard in diameter, and its needles are nearly a foot long. Its wood is very hard and strong, tough, coarse-grained, and durable, of a reddish color. It is largely manufactured into lumber, and used in ship-building and all kinds of construction. This tree furnishes also nearly all the turpentine, tar, pitch, resin, and spirits of turpentine produced in the United States. Also called *southern* or *Georgia pine*, *yellow pine*, and *hard pine*; sometimes *broom* or *red pine*, and, especially in England, *pitch-pine*.—**Mahogany pine**. Same as *totara*.—**Maritime pine**. Same as *cluster-pine*.—**Meadow-pine**. Same as *slash-pine*.—**Monterey pine**, the Californian *Pinus insignis*, in the wild state rare and local, but now widely cultivated on the Pacific coast for shelter and ornament: a tree of rapid growth, with beautiful fresh green foliage.—**Moreton Bay pine**. Same as *hoop-pine*.—**Mountain-pine**. (a) The *Mugho pine*. (b) See *white pine* (b).—**Mugho pine**, *Pinus Mugho*, a small tough-wooded tree found on the mountains of southern Europe, and sometimes called *mountain-pine*. A variety, the dwarf pine (*P. Pumilio*) of Austria, etc., yields the Hungarian balsam, sparingly used in medicine. See *knee-pine*.—**Neoz-pine**, *Pinus Gerardiana*, of the northwestern Himalayas, a stout tree growing 60 feet high, with a silvery bark which peels off in long flakes. It yields abundant turpentine, and each cone affords about 100 edible seeds or neoz-nuts, whence it is sometimes called *Nepil nut-pine*.—**Norfolk Island pine**, *Araucaria excelsa*, a majestic tree, sometimes 200 feet high, abounding on Norfolk Island, and affording a tough and close-grained timber. It is said to produce very large compact knots of a semi-transparent brown, valuable for turnery, etc.—**Norway pine**. See *red pine* (a).—**Nut pine**. See *nut-pine* and *pitch*.—**Neoz-pine** and *stone-pine*.—**Obispo pine**, a local Californian tree, *Pinus muricata*, of no

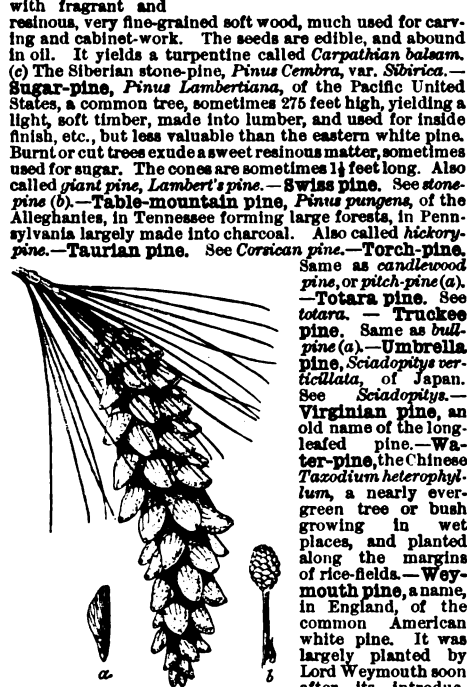

great value.—**Ocote or okote pine**. Same as *candlewood pine*.—**Old-field pine**, the loblolly-pine, which often springs up on abandoned lands, or as second growth after the long-leaved pine.—**Oregon pine**, the Douglas fir or pine, *Pseudotsuga Douglasii*. It ranges from British Columbia to Mexico, but is at its best in Oregon and Washington, where it forms large forests, and sometimes exceeds 300 feet in height. It is the most valuable timber-tree of the Pacific region. Its wood is hard, strong, and durable, difficult to work, largely manufactured into lumber, and used for all kinds of construction, for masts and spars, railway-ties, etc. Lumbermen distinguish varieties of the wood as *red* and *yellow fir*, the red less valuable. The bark is serviceable for tanning.—**Oyster Bay pine**, *Callitris rhomboidea*, a somewhat useful conifer of Tasmania.—**Pinaster-pine**, the cluster-pine.—**Pitch-pine**. (a) In America, *Pinus rigida*, a moderate tree of stiff habit, found from New Brunswick to Georgia. Its wood is used for fuel, charcoal, and coarse lumber. Also called *torch-pine*. (b) In England, the long-leaved pine, or its imported wood. (c) See *celery-pine*.—**Pond-pine**, *Pinus serotina*, a moderate-sized tree of peaty or wet ground from North Carolina to Florida.—**Prince's pine**. (a) The gray pine. (b) See *Chimaphila*.—**Red pine**. (a) An important tree, *Pinus resinosa*, found throughout Canada, sparingly in northern New England, and at its best in northern Wisconsin and Minnesota. It grows from 70 to 140 feet high. Its wood is of a light-reddish color, resinous, light, hard, tough, and elastic; it is largely manufactured into lumber, and used for spars, piles, and all kinds of construction. Without good reason called *Norway pine*. (b) See *Dacrydium*.—**Ridge-pole pine**. Same as *black pine* (a).

Ridge-pole pines, which grow close together, and do not branch out until the stems are thirty or forty feet from the ground.

T. Roosevelt, Hunting Trips, p. 331.

Rosemary-pine. See *loblolly-pine*.—**Running pine**. See *Lycopodium*.—**Sand-pine**, a tree of moderate size, *Pinus clausa*, found in Florida on sandy ridges: of small use. Also called *spruce-pine*.—**Sap-pine**. Same as *pitch-pine* (a). (Rare).—**Scotch pine**, *Pinus sylvestris*, the only indigenous species of *Pinus* in the British Isles, widely spread throughout Europe, especially on mountains, in Scandinavia forming large forests. Its reddish-tinged wood, one of the most generally useful of pine woods, is extensively employed in civil and naval architecture, etc. It is the red or yellow deal of Great Britain. More often called *fir* than *pine*; locally named *redwood*; commercially designated as *Danitia*, *Riga*, *Swedish fir*, etc. A variety, *horizontalis*, with horizontal branches and red wood, is the *Highland*, *Speyside*, or *horizontal Scotch fir* or pine.—**Scrub-pine**. Same as *Jersey pine*. The northern scrub-pine is the same as *gray pine*.—**Seaside pine**. See *Corsican pine*.—**Short-leaved pine**. See *yellow pine* (a).—**Siberian pine**. See *stone-pine* (c).—**Silver pine**. Same as *yellow pine* (c).—**Southern pine**, the long-leaved pine.—**Speyside pine**. See *Scotch pine*.—**Spruce-pine**. Same as *black pine* (a), *cedar-pine*, and *yellow pine* (a).—**Stone-pine**. (a) The Italian stone-pine, *Pinus Pinea*, of Mediterranean Europe, a low round-headed tree, in Greece growing 60 feet high. It is much cultivated for ornament and for its large seeds, which are a considerable article of trade as a desert nut. (b) The Swiss stone-pine, or *rola*, *Pinus Cembra*, a middle-sized tree with fragrant and resinous, very fine-grained soft wood, much used for carving and cabinet-work. The seeds are edible, and abound in oil. It yields a turpentine called *Carpinian balsam*. (c) The Siberian stone-pine, *Pinus Cembra*, var. *Sibirica*.—**Sugar-pine**, *Pinus Lambertiana*, of the Pacific United States, a common tree, sometimes 275 feet high, yielding a light, soft timber, made into lumber, and used for inside finish, etc., but less valuable than the eastern white pine. Burnt or cut trees exude a sweet resinous matter, sometimes used for sugar. The cones are sometimes 1½ feet long. Also called *giant pine*, *Lambert's pine*.—**Swiss pine**. See *stone-pine* (b).—**Table-mountain pine**, *Pinus pungens*, of the Alleghenies, in Tennessee forming large forests, in Pennsylvania largely made into charcoal. Also called *hickory-pine*.—**Taurian pine**. See *Corsican pine*.—**Torch-pine**. Same as *candlewood pine*, or *pitch-pine* (a).—**Totara pine**. See *totara*.—**Truckee pine**. Same as *bull-pine* (a).—**Umbrella pine**, *Sciadopitys verticillata*, of Japan. See *Sciadopitys*.—**Virginian pine**, an old name of the long-leaved pine.—**Water-pine**, the Chinese *Taxodium heterophyllum*, a nearly evergreen tree or bush growing in wet places, and planted along the margins of rice-fields.—**Weymouth pine**, a name, in England, of the common American white pine. It was largely planted by Lord Weymouth soon after its introduction into England.

1. Cone of Stone-pine (*Pinus Pinea*), on its branch. 2. A fascicle of (two) leaves.

Branch with Cone of White Pine (*Pinus Strobus*). a, the seed; b, a very young cone.

Pinus Strobus, found from Newfoundland through Canada and the region of the Great Lakes, and south along the Alleghenies to Georgia. It is at its best in the Upper Lake region, where it forms extensive forests. It rises from 75 to 150 feet, and produces a light, soft, straight-grained timber of a light straw-color, more largely manufactured into lumber than that of any other North American tree, and used in building and for a great variety of purposes. The white pine is also an effective ornamental tree. See *Weymouth pine*, and *yellow pine* (c). (b) *Pinus monticola*, a large species of the western United States, not very common, but in Idaho an important timber-tree. (c) The cedar-pine. (d) The Rocky Mountain species *Pinus flexilis*, of Arizona, and *P. flexilis*, which serves for lumber in Nevada, where better is wanting. (e) Same as *kahikatea*.—**Yellow pine**. (a) *Pinus mitis*, ranging from New Jersey, through the Gulf States, to Texas, and thence to Missouri and Kansas: the most valuable of the yellow pines except the long-leaved, in contrast with which it is called *short-leaved pine*. Its heavy and hard orange-colored wood is largely made into lumber, especially west of the Mississippi, where it is best developed. Also *spruce-pine* and *bull-pine*. (b) The long-leaved pine. (c) An important species, *Pinus ponderosa*, found in the Black Hills, and from British Columbia, through the Pacific region, to Texas and Mexico: within its range the most valuable timber-tree after the Oregon pine. It sometimes approaches 300 feet in height, but is commonly much lower, especially in the Rocky Mountains. Its heavy, hard, and strong, but not durable, timber furnishes lumber, railway-ties, etc. Also called *bull-pine*, *silver-pine*. (d) *Pinus Arizona*, a species of minor importance in the mountains of Arizona. (e) A commercial name of the common white pine. (See also *ground-pine*, *heavy-pine*, *hoop-pine*, *huon-pine*, *kauri-pine*, *knee-pine*, *loblolly-pine*, and *slash-pine*.)

It nedeth nought to *pyne* yow with the corde.
Chaucer, Knight's Tale, l. 838.

A burning fever him so *pynde* awaye
That death did finish this his dolefull daye.
The Nemes Metamorphosis (1600), MS. (Nares.)

Bearre a pleasaunt countenance with a *pined* conscience.
Lily, Euphues, Anat. of Wit, p. 117.

I left in yonder desert
A virgin almost *pined*.
Fletcher, Sea Voyage, ll. 2.

This present Spring, Anno Christi 1656, a Quaker, being put into prison at Colechester for his misdeameours, resolved (as it appeared) to *pyne* himself: whereupon he abstained from all manner of food for divers days together.
S. Clarke, Examples, p. 271.

2. To grieve for; bemoan; bewail.

Abash'd the devil stood, . . . and saw
Virtue in her shape how lovely; saw, and *pined*
His loss. Milton, P. L., iv. 848.

II. intrans. 1. To be consumed with grief or longing; grow thin or waste away with pain, sorrow, or longing; languish: often with *away*: as, she *pined away* and died.

Ye shall not mourn nor weep; but ye shall *pyne away* for your iniquities.
Ezek. xxiv. 23.

There is but One, but One alone,
Can set the Pilgrim free,
And make him cease to *pyne* and moan.
Prior, Wandering Pilgrim, st. 11.

Upon the Rebels ill success James Fitz-Eustace, Viscount Balthazar, fled into Spain, where he *pined away* with grief.
Baker, Chronicles, p. 361.

On the death of the late Duke, it (Parma) was taken possession of by the French, and is now *pinning away* under the influence of their iron domination.
Eustace, Italy, I. vi.

2. To long; languish with longing desire: usually with *for* before the object of desire.

Loathing, from racks of husky straw he turns,
And, pining, for the verdant pasture mourns.
Rouse, tr. of Lucan, v.
For whom, and not for Tybalt, Juliet pined.
Shak., R. and J., v. 3. 236.

I pine to see
My native hill once more. Bryant, Song.

3. To shrink or "render," as fish in the process of curing. = Syn. 1. To droop, flag, wither.
pine (pin), n. [Origin obscure.] The black-headed gull, *Chroicocephalus ridibundus*. Also **pinemaw**. [Ireland.]

pineal (pin'ē-āl), a. [= F. *pinéale* = Sp. Pg. *pineal* = It. *pineale*, < L. *pinca*, a pine-cone; prop. fem. of *pinus*, of the pine, < *pinus*, pine: see *pine*.] 1. Pertaining to a pine-cone, or resembling it in shape.—2. Pertaining to the pineal body.—**Pineal body**, a small, free, ovoid, conical, reddish organ, attached to the posterior cerebral commissure, and projecting downward and backward between the anterior pair of the corpora quadrigemina. It is believed to be a vestigial sense-organ, probably of sight. Also called **pineal gland**, **conarium**, **pinus**, and **epiphysis cerebri**. See cuts under **corpus**, **encephalon**, and **visceral**.
Courtiers and spaniels exactly resemble one another in the pineal gland. Arbuthnot and Pope.

Pineal eye, a visual organ on the top of the head of some extinct animals, of which the existing pineal body is supposed to be the persistent vestige. The site of such an organ is indicated by that vacuity of the skull of some extinct mammals and reptiles known as the **parietal foramen**, and the eye itself is also called **parietal eye** and **third eye**.—**Pineal peduncles**, the habene or habenulae. See **peduncle**.—**Pineal ventricle**, the cavity sometimes found within the pineal body, as a persistent fetal condition.

pineapple (pin'ap'l), n. [Early mod. E. also **pyneapple**, **pyneable**; < ME. *pinappel*, *pynappul*, *pynappylle*, < AS. *pinæpel*, < *pin*, pine, + *appel*, apple.] 1†. The cone or strobilus of the pine; a pine-cone.

His (the pine's) fruits are great Bouleaux or bawles of a brown chestnut colour, and are called **pine-apples**.
Lyte, Dodoens, p. 769.

2. The fruit of *Ananas* (*Ananassa*) *sativa*: so called from its resemblance to a pine-cone.

This is a collective fruit, consisting of a matured spike or head of flowers, all parts of which—flowers, bracts, and axis—are consolidated in one succulent mass. In hothouse culture a single fruit has been known to weigh 14 pounds.

3. The plant *Ananas sativa*, a native of tropical South America, now widely cultivated and naturalized throughout the tropics. Its short stem rises from a cluster of rigid recurved leaves, like those of the aloe, but thinner. The axis extends beyond the single fruit in a tuft of short leaves called the **crown**. Highly cultivated varieties are seedless, and are propagated by suckers, which produce fruit much sooner. The chief seat of pineapple cultivation is the West Indies, whence the fruit is exported in large quantities to the United States and England. The leaves, some 3 feet long, yield a strong fiber, which in the Philippine Islands and elsewhere is woven into a fine fabric. So-called pineapple-cloths are also made from the fiber of other species of *Bromeliaceae*, as *Bromelia Pinguin*, the wild pineapple.

4. A fish of the family *Diodontidae*, a kind of porcupine-fish, *Chilomycterus geometricus*: so called from the prickly skin and the shape when inflated.—**Essence of pineapple**. Same as **alyl butyrate** (which see, under **butyrate**).—**Pineapple cheese**. See **cheese**.—**Pineapple rum**, rum flavored with slices of pineapple.

pineapple-cloth (pin'ap'l-klôth), n. Same as **piña-cloth**.
pineapple-flower (pin'ap'l-flou'ér), n. Any plant of the liliaceous genus *Eucomis*, which consists of four or five bulbous South African plants, moderately ornamental, somewhat cultivated in gardens.

pineapple-tree (pin'ap'l-trê), n. [< ME. *pyne-appylre*, *pynappul tree*, *pynapple tree*; < *pine-apple* + *tree*.] The pine-tree.

Now for **pynappul tree**
The colde or weedishe land most sown be.
Palladius, Husbandrie (E. E. T. S.), p. 98.
Here, amonge certeyne wooddes of date trees and *pynapple* trees of exceeding height, he found two natie sprynges of treame water.
R. Eden, tr. of Peter Martyr (First Books on America, [ed. Arber, p. 77].)

pinaster, n. An improper form of **pinaster**.
pine-barren (pin'bar'en), n. A level sandy tract covered sparsely with pine-trees. [Southern U. S.]

A dreary and extensive forest of pine-trees, or, as it is termed by the Carolinians, a **pine-barren**, where a habita-

tion is seldom seen except at intervals of ten or twelve miles.
Lambert's Travels, II. 226.

Pine-barren beauty. See *Pyxidanthera*.—**Pine-barren terrapin**, a tortoise of the family *Clemmydidae*.

pine-beauty (pin'bū'ti), n. A British moth, *Trachea piniperda*, white with a yellow band and red spots, whose larva feeds on coniferous trees.

pine-beetle (pin'bē'tl), n. A xylophagous beetle, as *Hylesinus* or *Hylurgus piniperda*, destructive to pines.

pine-blight (pin'blit), n. 1. An aphid, *Chermes pinicorticis*, of the subfamily *Chermesinae*, which blights the bark of the pine.—2. The flocculent substance from this insect.—3. The blighting of the tree caused by this aphid.

pine-bullfinch (pin'būl'finch), n. Same as **pine-grosbeak**.

pine-carpet (pin'kär'pet), n. A British geometrid moth, *Thera firmata*, whose larva feeds on the Scotch fir.

pine-chaffer (pin'chä'fër), n. A beetle (*Anomala pinicola*) which feeds on the leaves of the pine. [U. S.]

pine-clad (pin'klad), a. Clad or covered with pines.

pine-cloth (pin'klôth), n. Same as **piña-cloth**.

pine-cone (pin'kôn), n. The cone or strobilus of a pine-tree.

pine-drops (pin'drops), n. pl. See **beech-drops** and **Pterospora**.

pine-finch (pin'finch), n. 1. Same as **pine-grosbeak**.—2. A small fringilline bird of North America, *Chrysomitris* or *Spinus pinus*, commonly found in pine-woods. It is about 5 inches long, and entirely covered with pale or flaxen brown and dusky streaks, more or less tinged with yellow, especially on the wings and tail. The bill is very acute, the tail is emarginate, and the wings are pointed. It is an abundant migratory bird in many parts of the United States and British America, and is a near relative of the slakin or linnet of Europe. Also called **pine-linnet** and **pine-slakin**.

pinerful (pin'fūl), a. [< *pine* + *-ful*.] Full of woe, pain, or misery.

With long constraint of **pinful** penury.
Ep. Hall, Satires, V. II. 82.

pine-grosbeak (pin'grôs'bëk), n. A large fringilline bird of Europe and North America, *Pinicola enucleator*, found chiefly in coniferous

woods in northerly or alpine regions. See *Pinicola*. Also called **pine-bullfinch**, **pine-finch**.

pine-grouse (pin'grous), n. Same as **dusky grouse** (which see, under **grouse**). [Western U. S.]

pine-gum (pin'gum), n. A resin, scarcely distinguishable from sandarac, derived from Australian trees of the genus *Callitris* (*Frenela*), as *C. robusta* and *C. rhomboidea*.

pine-house (pin'hous), n. Same as **pinery**, 1.

pine-kernel (pin'kér'nel), n. The edible seed of some pines. See **pine-nut**.

pine-knot (pin'not'), n. The resinous knot of a pine-tree, used as fuel. [U. S.]

In the remote settlements the **pine-knot** is still the torch of courtship; it endures to sit up by.
C. D. Warner, Backlog Studies, p. 24.

pine-linnet (pin'lin'et), n. Same as **pine-finch**, 2.

pine-lizard (pin'liz'ärd), n. The common brown lizard, or fence-lizard, of the United States, *Sceloporus undulatus*, often found in pine-woods or pine-barrens.

pine-marten (pin'mär'ten), n. A carnivorous quadruped of the family *Mustelidae*, *Mustela martes* or *Martes abietum*, a native of Europe and Asia: so called in distinction from **beech-marten**. The name is extended to the American representative, which is a different species, *M. americana*. See **marten** and **Mustela**.

pine-mast (pin'mäst), n. Pine-cones. See **mast**, 2.

pinemaw (pin'mâ), n. Same as **pine**.
pine-mouse (pin'mous), n. A North American meadow-mouse of the subfamily *Arvicolinae*, *Arvicola* (*Pitymys*) *pinetorum*, common in many parts of the United States, about 4 inches long,

Pine-mouse (*Arvicola pinetorum*).

of a rich dark reddish-brown color, with very smooth, glossy fur. This vole lives mostly in dry soils, as of pine-barrens, and represents a section of the large genus *Arvicola* of which the *A.* (or *P.*) *quasiater* is another member found in Mexico, of a blackish color.

pine-needle (pin'nē'dl), n. The acicular leaf of the pine-tree.

Beneath these trees we walked over a carpet of **pine-needles**, upon which our moccasined feet made no sound.
The Century, XXX. 223.

Pine-needle bath, a bath of water impregnated with an extract of pine-needles.—**Pine-needle wool**, a fibrous substance produced from the leaves of the pine in Norway, Germany, and the southern United States. It is of a light-brown color, and has a pleasant balsamic smell. Garments are made from it when spun and woven on the stocking-loom, and these are supposed to be beneficial to persons threatened with rheumatism or with lung-complaints. In the United States the fibers of pine-needles have been used for coarse bagging. Also **pine-wool** and **fir-wool**.

pine-nut (pin'nut), n. [< ME. *pinnote*, *pynutte*, *pynote*, < AS. *pinhnutu*, < *pin*, pine, + *hnutu*, nut.] 1. A pine-cone.—2. The edible seed-kernel of several species of pine. See **neozapine** and **stone-pine**, both under **pine**. See also **nut-pine** and **piñon**.

In the cottages at the shelter above, where we break our cable, we found many **pine-nuts** opened.
Hakluyt's Voyages, III. 422.

Pine-nut tree [< ME. *pinnote* tree], the pine-tree.

Als dede the **pinnote** tre. Seven Sages, I. 544.

pine-oil (pin'oil), n. 1. An oil obtained from the resinous exudations of pine- and fir-trees: used in making colors and varnishes. Also called **turpentine-oil**.—2. An essential oil distilled from the leaves and twigs of *Pinus Mughus*, and esteemed in German medicine; also, a similar product of *P. sylvestris*.—3. A fixed oil suitable for lamps, obtained in Sweden and elsewhere from pine- and fir-wood by distillation or chemically.

piner (pi'nër), n. An obsolete form of **pioneer**.
pinery (pi'në-ri), n.; pl. **pineries** (-riz). [< *pine* + *-ry*.] 1. A hothouse in which pineapples are raised. Also called **pine-house** and **pine-store**.

A little bit of a shrubbery, . . . and a poor little flower-bed or so, and a humble apology for a **pinery**.
Dickens, Dombey and Son, xxxvi.

2. A place where pine-trees grow; especially, a pine-forest in which an extensive lumbering business is carried on, as in the forests of white pine (*P. Strobus*) of Michigan, Wisconsin, and Minnesota.

In **pineries**, on the other hand, valuable timber is obtained, and the population is far superior to the tar heel, the nickname of the dweller in barrens.
Encyc. Americana, I. 199.

pine-sap (pin'sap), n. A tawny or reddish fleshy plant, *Hypopitys multiflora* (*Monotropa Hypopitys*), resembling the Indian-pipe, but having several smaller flowers in a raceme. So named as parasitic on the roots of pine. Also called **false beech-drops**. See **Monotropa**.

pine-slakin (pin'sis'kin), n. Same as **pine-finch**, 2.

pine-snake (pin'snäk), n. A snake of the genus *Pityophis*, as *P. bellona*, the bull-snake, of which there are several kinds. They attain a large size, are harmless and inoffensive, and are commonly found in pine-woods. See cut under *Pityophis*.

1. Flowering Plant of Pine-sap (*Hypopitys multiflora*). 2. Plant with fruits. a, a flower; b, the fruit.

Pineapple (*Ananas sativa*).

Pine-grosbeak (*Pinicola enucleator*).

pine-stove (pīn'stōv), *n.* Same as *pinery*, 1.
pine-thistle (pīn'thī's'l), *n.* A plant, *Carlina* (*Atractylis*) *gummifera*, the root of which abounds with a gummy matter, which exudes when it is wounded. It grows in the south of Europe, where the flower-stalks are dressed with oil and used as food.

pine-tree (pīn'trē), *n.* [*ME. pinetre, pynetre*, < *AS. pintrēow*, < *pin*, pine, + *trēow*, tree.] Same as *pinel*, 1.—**Pine-tree** *cod*. See *cod*².—**Pine-tree** money, silver coins (the shilling and smaller denominations) of Massachusetts, struck in the latter half of the seventeenth century, and bearing the device of a pine-tree. These pieces were known in their early days as *Boston* or *Bay shillings*, etc. The first application we find of the name of *pine* to them was in May, 1690. *Croby*, *Early Coins of America* (1878), p. 62.—**Pine-tree** State, the State of Maine: so called in allusion to its extensive pine-forests.

pinetum (pī-nē'tum), *n.* [*L.* (> *It. pineto, pineta*), a pine-grove, < *pinus*, pine: see *pinel*, *n.*] 1. A plantation or collection of growing pine-trees of different kinds, especially one designed for ornamental or scientific purposes.—2. A treatise on the pines: as, Gordon's *Pinetum*.

pine-warbler (pīn'wār'blēr), *n.* A small migratory insectivorous bird of North America, *Dendroica pinus* or *vigorsii*, belonging to the

Obverse.

Pine-tree Shilling, 1802.—British Museum. (Size of the original.)

Pine-warbler (*Dendroica pinus* or *vigorsii*).

family of wood-warblers (*Mniotiltidae* or *Sylvicolidae*). It is about 6 inches long, of an olive-green color above and dull-yellow below, with white blotches on the tail-feathers. It is one of the most abundant of its tribe in some parts of the United States, especially in pine-woods of southern localities.

pineweed (pīn'wēd), *n.* *Hypericum nudicaule*: same as *orange-grass*.

pine-weevil (pīn'wē'vīl), *n.* A curculio, *Pissodes strobi*, which lays its eggs on the terminal shoots of the white pine, into which its larvae bore.

pine-wool (pīn'wūl), *n.* Same as *pine-needle wool* (which see, under *pine-needle*).

pine-worm (pīn'wērm), *n.* The larva of a saw-fly of the genus *Lophyrus*. *L. abbotti* commonly infests the white pine in the United States, and *L. lecontei* the Austrian, Scotch, and pitch pine.

pinery, *a.* See *pinyl*.

pin-eyed (pīn'īd), *a.* Having the capitate stigma at the throat of the corolla, the stamens standing lower: noting, for instance, the long-styled form of the cowslip, *Primula veris*, and contrasted with *thrum-eyed*, applied to the short-styled form, in which the anthers are above.

Florists who cultivate the Polyanthus and Auricula have long been aware of the two kinds of flowers, and they call the plants which display the globular stigma at the mouth of the corolla "pin-headed" or "pin-eyed."

Darwin, *Different Forms of Flowers*, p. 14.

pin-feather (pīn'fēw'ēr), *n.* See *feather*.

pin-feathered (pīn'fēw'ēr'd), *a.* Covered with pin-feathers; not fully fledged: said of young birds acquiring their first plumage after the downy state, and of old birds renewing their plumage during the molt: sometimes used figuratively.

Hourly we see some raw pin-feather'd thing
 Attempt to mount, and fights and heroes sing,
 Who for false quantities was whipt at school.

Dryden, tr. of *Persius's Satires*, l.

pin-fire (pīn'fīr), *a.* 1. Noting a cartridge for breech-loading guns, invented by Lefauchaux in 1836. Within a recess of the metal base of the cartridge, whose body is of paper, is placed a percussion-cap, the open end of which faces a hole in the side of the base. Into this hole is loosely fitted a brass firing-pin, which penetrates the cap, and, when the cartridge is placed in the gun and the breech closed, projects through a small hole or recess in the barrel. The hammer of the lock strikes the outer end of this pin in firing, driving the pin down upon and igniting the detonating material in the cap. This cartridge is considered the parent of the modern central-fire and rim-fire cartridges.

2. Noting a breech-loading gun in which a pin-fire cartridge is used.—**Pin-fire cartridge**, a cartridge for breech-loading guns. See *def.* 1. Also called *pin-cartridge*.—**Pin-fire gun**, a breech-loading gun in which a pin-fire cartridge is used.

pinfish (pīn'fīsh), *n.* 1. A sparoid fish, *Lagodon rhomboides*, related to the scup and sheepshead, common along the southern coast of the United States. The body is elliptic-ovate and compressed, the head is pointed, the upper molars are in two rows, the incisors are broad and emarginated at the apex, and there is a precumbent spine in front of the dorsal fin. The color is olive, with silvery sides, six dark vertical bars, a large dark blotch over the pectoral fin, and faint blue and golden stripes on the sides. Also locally called *chopstina*, *bream*, *robin*, *sailors' choice*, and *squirrel-fish*. See *cut* under *Lagodon*.

2. A sparoid fish, *Diplotus holbrooki*, like the *Lagodon rhomboides*, but with entire teeth.—3. A small sunfish of the United States, as the copper-nosed bream, *Lepomis pallidus*.

pin-flat (pīn'flāt), *n.* 1. A small disk of double cardboard covered with some textile material so arranged that pins can be stuck into the edge.—2. A scow carrying a square sail. *Sportsman's Gazetteer*. [Canada.]

pinfold (pīn'fōld), *n.* [Also *penfold*; < *ME. pynfolde, punfolde, ponfolde, pondfolde, pynde folde*; < *pin*, *pound*² (cf. derived verb *pind*), + *fold*².] 1. A place in which stray cattle are temporarily confined; a pound.

Heo hath hulpe a thousande oute of the deueles *ponfolde*.
Piers Plowman (B), v. 633.

His pledge goes to the *pinfold*.

Jolly Pinder of Wakefield (Child's Ballads, v. 206).

2. A fold or inclosure for animals.

The cattle slept as he went out to the *pinfold* by the light of the stars.
The Atlantic, LXL 661.

For the *penfold* (in which was a lion) surrounded a hollow which led where the eye scarce dared follow.

Browning, *The Glove*.

pinfold† (pīn'fōld), *v. t.* [*< pinfold, n.*] To confine in a pound or pinfold; impound.

Had this beene the course in the Primitive time, the Gospel had been *pinfolded* up in a few Cities, and not spread as it is.
N. Ward, *Simple Cocker*, p. 46.

pin-footed (pīn'fūt'ed), *a.* Having pinnate feet; having the toes lobate, as a bird; fin-footed.

ping (pīng), *v. i.* [Imitative.] To produce a sound like that of a rifle-bullet whistling through the air.

ping (pīng), *n.* [*< ping, v.*] The whistling sound made by a bullet, as from a rifle, in passing through the air. *W. W. Greener*, *The Gun*, p. 479.

pinglet† (pīng'gl), *n.* [Perhaps a var. of *pighle*, *pickle*³.] A small piece of inclosed ground.

The academy, a little *pinglet*, or plot of ground, . . . was the habitation of Plato, Xenocrates, and Polemon.
North, tr. of *Plutarch*, p. 228. (*Latham*.)

pinglet² (pīng'gl), *v. i.*; pret. and pp. *pingled*, ppr. *pingling*. [Orig. obscure.] To eat with little appetite. [Prov. Eng.]

pingler† (pīng'glēr), *n.* [Prob. < *pinglet*¹ + *-er*.] A cart-horse; a work-horse.

Perveralle doe they alwaies thinke of their lovers, and talke of them scornfully, judging all to bee clowns which be not courtiers, and all to be *pinglers* that be not couriers.
Lyly, *Euphues*, Anat. of Wit, p. 109.

pingler² (pīng'glēr), *n.* [*< pinglet*² + *-er*.] One who eats with little appetite.

He filleth his mouth well, and is no *pingler* at his meat.
Topell, *Beastes* (1607). (*Hallivell*.)

ping-pong (pīng'pong), *n.* [From the sounds made in striking the balls.] Tennis played upon a table upon which the courts may be marked.

pin-grass (pīn'grās), *n.* The stork's-bill. See *afilerilla*.

pingster, *n.* and *a.* See *Pinkster*.

Pinguicula (pīng-gwēk'ū-lā), *n.* Same as *Pinguicula*, 1.

pinguefy† (pīng'gwē-fī), *v. t.* [Also *pinguify*; < *L. pinguefacere*, make fat, < *pinguis*, fat (see *pinguid*), + *facere*, make (see *-fy*).] To fatten.

The oyl or ointment wherewith women use to anoint the hair of their head hath a certain property in it to *pinguify* withall.

Holland, tr. of *Plutarch*, p. 944.

Pinguicula (pīng-gwēk'ū-lā), *n.* [NL. (in sense 1 so named by Gesner, 1541, with ref. to the popular name *butterwort*), < *L. pinguis*, fat, < *pinguis*, fat: see *pinguid*.] 1. A genus of gumipetalous plants of the order *Lentibulariaceae*, characterized by the spreading posterior corolla-lobe, the four- to five-parted calyx, and the terminal one-celled anthers. There are over 30 species, widely dispersed throughout northern temperate regions, and in the Andes to antarctic climates. They are stemless herbs of moist places, with a rosette of radical leaves, and erect leafless scapes bearing a single purple, violet, yellow, or whitish flower. The broad entire leaves have a peculiar surface as of little crystalline drops. The irritation of foreign bodies causes the leaf-margins to roll inward, imprisoning insects caught upon the sticky surface, and assisting in the absorption of their softer parts. Compare *Utricularia*, a related insectivorous plant. Six species occur in North America, mostly either high northern or near the southern coast, of which latter *P. tules* is the yellow butterwort, a showy plant of the pine-barrens. See *butterwort* (with cut) and *earring-grass*. Also *Pinguicula*.

2. [*l. c.*] A plant of this genus.—3. [*l. c.*] A small painless tumor of the conjunctiva, usually situated close to the edge of the cornea. Also called *interpalpebral blotch*.

pinguid (pīng'gwīd), *a.* [With unorig. term. -id (appar. in imitation of *liquid*, etc.); = *Sp. Pg. It. pinguc*, < *L. pinguis*, fat.] Fat; unctuous.

Pinguid juice to nourish and feed the body.
Evelyn, *Acetaria*.

A *pinguid* turgid stile, as Tully calls the Asiatic Rhetoric.
A. Tucker, *Light of Nature*, II. ill. 22.

pinguidinous (pīng-gwīd'i-nus), *a.* [Also *pinguedinous* = *Sp. It. pinguedinoso*, < *L. pinguedo* (*pinguedin-*), fatness, < *pinguis*, fat: see *pinguid*.] Containing fat; fatty; adipose; greasy; unctuous. *Coles*, 1717.

pinguin¹, *n.* An obsolete form of *penguin*¹.

pinguin² (pīng'gwīn), *n.* Same as *penguin*².

Pinguipedina (pīng'gwī-pē-dī'nā), *n. pl.* [NL., < *Pinguipes* (-ped-) + *-ina*².] A group of trachinoid fishes, named from the genus *Pinguipes*; in Günther's system, the third group of *Trachinidae*, having eyes lateral, the lateral line continuous, and a large tooth on the posterior part of the intermaxillary.

Pinguipedinae (pīng'gwī-pē-dī'nē), *n. pl.* [NL., < *Pinguipes* (-ped-) + *-inae*.] A subfamily of latiloid fishes, typified by the genus *Pinguipes*.

pinguipedine (pīng'gwī-pē-dīn), *a.* and *n.* 1. *a.* Of or pertaining to the subfamily *Pinguipedinae*. 2. *n.* A member of this group.

Pinguipes (pīng'gwī-pēz), *n.* [NL. (Cuvier), < *L. pinguis*, fat, + *pes* = *E. foot*.] The typical genus of *Pinguipedinae*, containing latiloid fishes whose ventral fins are covered with a thick membrane, whence the name.

pinguite (pīng'gwīt), *n.* [*< L. pinguis*, fat, + *-ite*².] A soft oil-green variety of the hydrous iron silicate chloropal.

pingutide (pīng'gwī-tūd), *n.* [*< L. pinguitudo*, fatness, < *pinguis*, fat: see *pinguid*.] Fatness; a growing fat.

pinhead (pīn'hēd), *n.* The head of a pin; hence, anything very small.

pin-headed (pīn'hēd'ed), *a.* Having a head like that of a pin; specifically, in *bot.*, same as *pin-eyed*.

pinhead-sight (pīn'hēd-sīt), *n.* Same as *bead-sight*.

pinhold (pīn'hōld), *n.* A place at which a pin holds or makes fast.

pinhole (pīn'hōl), *n.* 1. A small hole made by the puncture or perforation of a pin; hence, any very small aperture.—2. A minute perforation or transparency, as if made with the point of a pin, of which great numbers sometimes appear in the film of a photographic negative from some chemical defect or fault in manipulation.—**False pinhole**, in pillow-lace making, one of those pinholes on the inner side of a rounded strip, as of a collar, which are used to fix the outer curve by carrying the bobbin from the inner to the outer pins, the inner ones acting as centers from which the outer ones are kept equidistant. Also called *false stitch*.

pinic (pī'nīk), *a.* [= *F. pinique*; as *pinel*¹ + *-ic*.] Pertaining to or derived from the pine-tree; noting one of the acids found in resin: as, *pinic acid*.

Pinicola (pī-nīk'ō-lā), *n.* [NL., < *L. pinus*, a pine, pine-tree, + *colere*, inhabit.] 1. A genus of fringilline birds of the family *Fringillidae*, the type of which is *P. enucleator*; the pine-grosbeaks. The bill is short, obtuse, and turgid, like a bullfinch's; the nostrils are hidden by tufts of nasal plumules; the wings and tail are long—the former pointed, the latter emarginate; and the feet are small. The male is chiefly dull-carmine or lake-red, shaded with black and gray in some places, and varied with white. The female is gray, heightened in some places with saffron-yellow. The genus

restricted to northerly parts of the northern hemisphere, where the birds chiefly inhabit coniferous regions. See *cut under pine-groebak*.

2. A genus of hymenopterous insects.

pinicoline (pi-nik'-ō-lin), *a.* [As *pinicol-ous* + *-ine*.] Inhabiting or frequenting pines or other coniferous woods: said of various animals. *Coues*.

pinicolous (pi-nik'-ō-lus), *a.* [*L. pinus*, a pine, pine-tree, + *colere*, inhabit, + *-ous*.] Same as *pinicoline*.

piniform (pi-ni-fōrm), *a.* [*L. pinus*, a pine, pine-tree, + *forma*, form.] Resembling a pine-cone. — **Piniform decussation**, the decussation of fibers in the oblongata above the decussation of the pyramids: it lies between the pyramids and the central gray matter.

pinning (pi'-ning), *n.* [*ME. pining, pynning*, < *AS. pinung*, torment, torture, pain, verbal *n.* of *pinian*, torment: see *pinē*, *v.*] 1. Punishment; torture. — 2. Suffering.

pinningly (pi'-ning-li), *adv.* In a pinning or lashing manner; by wasting away.

pinning-stool (pi'-ning-stōl), *n.* [*ME. pynnyng-stole*; < *pinning* + *stool*.] A cucking-stool.

To punyashen on pillories and on *pynnyng-stoles*.

Piers Plowman (C), iv. 79.

pinion¹ (pin'-yon), *n.* [Formerly also *pinion*; < *ME. pinion, pynyon*, < *OF. pignon, pennon, panon*, a pinion, plume, feather of an arrow, same as *pennon, penon*, etc., a flag, banner, = *Sp. piñon*, pinion, = *It. pennone*, a bunch of feathers, a pennon, < *L. penna, pinna*, wing, feather: see *pin*, *pen*, and *cf. pinion*,² another use of the same word.] 1. A feather; especially, a remex or flight-feather.

He is pluck'd, when hither
He sends so poor a *pinion* of his
wing. *Shak.*, A. and C., II. 12. 4.

2. The wing of a bird, or the flight-feathers collectively.

Tell me if e'er your tender *Pinions*
bore
Such weight of Woe.

Congreve, *Tears of Amaryllis*.

To Daphne's window speed thy
way;
And there on quivering *pinions*
rise,

And there thy vocal art display.
Shenstone, *Sky Lark*.

3. Technically, in *ornith.*, the joint of a bird's wing furthest from the body; the distal segment of the wing; the manus, consisting of the carpus, metacarpus, and phalanges, collectively bearing the primary remiges, or largest flight-feathers, and the alula or bastard-wing. Most adult birds show the seven separate bones of the pinion here figured; but in a few adults, and probably in all embryos, the osseous elements are more numerous.

4. In *entom.*, one of various moths: as, the brown-spot *pinion*, *Anchoecis litura*. — 5. [*cf. pinion*,¹, *v.*] A shackle or band for the arm. *Ainsworth*.

pinion¹ (pin'-yon), *v. t.* [Formerly also *pinion*; < *pinion*,¹, *n.*] 1. To bind or confine the wings of (a bird); restrain or confine by binding the wings, or by cutting off the pinions; bind or confine (the wings). A very common but cruel method of pinioning, practised especially upon geese by poulterers, is to twist the pinion over the next joint of the wing, where it is confined by the primaries resting upon the secondaries.

Not like a tame bird, that returns; nor like a hawk, that
will shew where she is by her bells; but like an eagle,
whose wings thou canst neither clip nor *pinion*.

Rev. T. Adams, *Works*, I. 482.

2. To bind or confine the arm or arms of (a person) to the body so as to disable or render incapable of resistance; shackle.

Know, sir, that I
Will not wait *pinion'd* at your master's court.
Shak., A. and C., v. 2. 58.

Away with him! I'll follow you. Look you *pinion* him,
and take his money from him, lest he swallow a shilling
and kill himself.
Beau., and *Fl.*, *Woman-Hater*, v. 1.

All their hands he *pinioned* behind
With their owne girdles. *Chapman*, *Illad*, xxi.

3. To bind; attach as by bonds or shackles.

Some slave of mine be *pinion'd* to their side.

Pope, *Dunciad*, iv. 134.

pinion² (pin'-yon), *n.* [Formerly also *pinion*; < *P. pignon*, a small wheel, pinion, spur-nut, =

Sp. piñon, the tooth of a wheel, pinion; a particular use of the word represented by *pinion*¹, a wing, etc., < *L. penna, pinna*, wing, feather, *pinna*, a float of a water-wheel: see *pen*,² *pin*,¹, and *cf. pinion*.] A small wheel with cogs or teeth which engage the teeth of a larger wheel with cogs or teeth, or sometimes only an arbor or spindle having notches or leaves, which are caught successively by the teeth of the wheel, and the motion thereby communicated. See also *cut under pawl-press*.

— **Flying pinion**, the fly of a clock. See *fly*,¹, 3 (a). — **Lantern-pinion**. Same as *lantern-wheel*. — **Long pinion**, a pinion whose leaves extend so far along the axis that the wheel into which the pinion works can move along its axis without becoming ungear. — **Pinion of report**, a smaller pinion moved by the cannon-pinion of a clock. — **Rack and pinion**. See *rack*.

pinion³ (pin'-yon), *n.* Same as *piñon*. [U. S.]

pinion-bone (pin'-yon-bōn), *n.* The bones of the pinion taken together. See *pinion*¹, 3.

pinion-file (pin'-yon-fil), *n.* A small knife-edged file used by watchmakers.

pinion-gage (pin'-yon-gāj), *n.* Fine calipers used by watchmakers.

pinionist¹ (pin'-yon-ist), *n.* [*cf. pinion*¹, *n.*, + *-ist*.] A winged animal; a bird. [Rare.]

All the fitting *pinionists* of eyre

Attentive sate.
W. Browne, *Britannia's Pastorals*, I. 4.

pinion-jack (pin'-yon-jak), *n.* In *milling*, a jack for ungearing the pinion which drives the stone.

pinion-wire (pin'-yon-wir), *n.* Wire formed into the shape and size required for the pinions of clocks and watches. It is drawn, in the same manner as round wire, through plates the holes of which correspond in section to the shape of the wire.

pinite (pin'-it), *n.* [*cf. Pin*, a mine in Saxony, + *-ite*.] A hydrous silicate of aluminium and potassium, occurring massive of a white to gray or green or brown color and dull waxy luster. It is formed from the alteration of other minerals (as feldspar, etc.), and has many varieties; it is probably essentially a compact muscovite.

Pinites (pi-ni-tēz), *n.* [NL., < *L. pinus*, pine: see *pine*.] A generic name under which various fragments of plants, chiefly cones, have been described, which were supposed to belong or to be related to the genus *Pinus*, but the affinities of which were uncertain. A specimen described by Steinberg under the name of *Pinites pulcherrima* is referred by Lesqueroux to *Knorria*, a lepidodendroid plant occurring in the coal-measures. The great tree-trunk found near Newcastle-on-Tyne, which measured seventy-two feet in length, and was designated as *Pinites Brandingi* by Lindley and Hutton, has been referred by several recent writers to the *Cycadaceae*.

pinjinnett, *n.* Same as *pingenet*.

pin-joint (pin'-joint), *n.* A form of joint in which each part is pierced with an eye and the parts are united by passing a pin through the eye.

The rapidity with which bridges with *pin joints* can be erected is an immense advantage.

Sci. Amer. Supp., p. 8987.

pink¹ (pink), *v.* [*ME. pinken*, prick; prob. a nasalized form of *picken, pikken*, pick, peck: see *pick*,¹, *peck*.] *cf. F. piquer*, prick, also pink (pierce with eyelet-holes). *Pink*, *ME. pink*, is a diff. word from *ME. pingen*, < *AS. pyngan*, < *L. pungere*, prick: see *pungent*.] *I. trans.* 1. To pierce; puncture; stab with a rapier or some similar weapon; make a hole or holes in.

We cut not out our clothes, sir.

At half-sword, as your tailors do, and *pink* 'em

With pikes and partisans. *Fletcher*, *Mad Lover*, I. 1.

I will *pink* your flesh full of holes with my rapier for this.

B. Jonson, *Every Man in his Humour*, iv. 1.

"Love," said Mr. Coverley, affecting to whisper, "you must certainly *pink* him; you must not put up with such an affront."

Mme. D'Arday, *Evellina*, lxxiii.

2†. To decorate with punctures or holes; tattoo.

Men and women *pink* their bodies, putting thereon

grease mixed with colour. *Purchas*, *Pilgrimage*, p. 648.

The sea-hedge-hogge is enclosed in a round shell, . . .

handsomely wrought and *pinked*.

R. Carew, *Survey of Cornwall*, p. 32.

Your Wife.

If once well *pink'd*, is cloth'd for Life.

Prior, *Alma*, II.

He found thee savage, and he left thee tame;
Taught thee to clothe thy *pink'd* and painted hide,
And grace thy figure with a soldier's pride.

Cooper, *Expostulation*, I. 486.

Specifically—3. To decorate, as any garment or article made of textile fabric or leather, by cutting small holes of regular shape in succession, scallops, loops, etc., at the edge, or else-

where. It is usually done with the pinking-iron, the material being laid upon a block of lead or the like.

Buckins he wore of costliest cordwayne,

Pinked upon gold, and paled part per part.

Spenser, *F. Q.*, VI. II. 6.

A doublet of black velvet . . . *pinked* upon scarlet satin.

Scott.

II.† *intrans.* To make a hole.

Reo *pinkes* with heere penne on heore parchemin.

Political Songs (ed. Wright), p. 156.

pink¹ (pink), *n.* [*cf. pink*,¹, *v.*] 1†. A puncture or small hole made by some sharp slender instrument such as a rapier or dagger; a stab-wound.

A freebooter's *pink*, sir, three or four inches deep.

Middleton, *Your Five Gallants*, III. 5.

2. A small hole or eyelet punched in silk or other material with a pinking-iron; a scallop.

You had rather have

An ulcer in your body than a *pink*

More in your clothes.

B. Jonson, *Magnetic Lady*, III. 4.

pink² (pink), *n.* and *a.* [So called as having the edges of the petals delicately pinked or jagged; < *pink*,¹, *v.* *cf. F. pince*, pink, < *pincer*, pinch, nip: see *pinch* (not connected with *pink*).] According to some, so called from the small dots, resembling eyes, on some of the species. *cf. Ir. pincin*, a gilliflower] *I. n.* 1. A plant of the genus *Dianthus*. The common garden pink is *D. plumarius*, also called *plumed* or *feathered pink*, and in its ring-marked varieties *pheasant-eye pink*. See *Dianthus*, *cornation*, 3, *maiden-pink*, *meadow-pink*, 2, and phrases below.

2. One of various plants of other genera, with some resemblance to the true pinks. See *Lych-nis*, 2, *moss-pink*, and phrases below. — 3. A red color of low chroma but high luminosity, inclining toward purple. — 4. In *painting*, any one of several lakes of a yellow or greenish-yellow color, prepared by precipitating vegetable juices on a white base, such as chalk or alumina. — 5. A red coat or badge, or a person wearing one; specifically, a scarlet hunting-coat.

With pea-coats over their *pinks*.

Macmillan's Mag., I. 16.

The *pinks* stand about the inn-door lighting cigars and waiting to see us start, while their backs are led up and down the market-place on which the lun looks.

T. Hughes, *Tom Brown at Rugby*, I. 4.

6. A small fish, so called from its color. (a) A minnow.

And full well may you think,

If you troll with a *pink*,

One [a fishing-rod] too weak will be apt to miscarry.

Cotton, *Angler's Ballad*.

The Trout is usually caught with a worm, or a minnow, which some call a *pink*, or with a fly.

I. Walton, *Complete Angler*, p. 90.

(b) A young grayling. (c) A young salmon before its entry into the sea. See *cut under parr*.

Presently the alevin grows into the fry, or *pink*, which is an absurd little fish about an inch long, goggle-eyed, and with dark bars on its sides. *St. Nicholas*, XIII. 740.

7. A flower; in a figurative use, a beauty; hence, the flower or highest type or example of excellence in some particular; a supremely excellent or choice example or type of excellence: as, the *pink* of perfection.

I am the very *pink* of courtesy.

Shak., R. and J., II. 4. 61.

He had a pretty *pink* to his own wedded wife.

Braton, *Merry Wonders*, p. 7. (*Davies*.)

This is the prettiest pilgrim.

The *pink* of pilgrims! *Fletcher*, *Pilgrim*, I. 2.

I am happy to have oblig'd the Mirror of Knighthood and *Pink* of Courtesy in the Age.

Congreve, *Old Batchelor*, II. 1.

Brown pink. See *brown*. — **Carolina pink**. See *pink-root*, 1. — **Carthusians' pink**. *Dianthus Carthusianorum*, a somewhat cultivated European species with a dense cluster of small flowers, usually dark-purple or crimson. — **Cheddar pink**, a pretty dwarf species, *Dianthus cæsius*, found at Cheddar in England. — **Cushion-pink**. Same as *moss-pink*. — **Deptford pink**, a European species, *Dianthus Armeria*, with small flowers, pink dotted with white, adventive in the eastern United States. — **Dutch pink**. (a) A yellow lake prepared from quercitron bark. It differs from Italian pink in not having as much coloring matter, and in being usually precipitated on a chalk base instead of alumina. It is, in effect, an inferior quality of Italian pink. (b) Blood. [Slang.]

That'll take the bark from your nozzle, and distill the

Dutch pink for you, won't it?

Cuthbert Bede, *Mr. Verdant Green*, II. 31.

Fire-pink, *Steno Virginica*, a plant with brilliant scarlet flowers, native in the interior United States, sometimes cultivated. — **Glacier pink**, a species of the Alps and Pyrenees, *Dianthus neglectus*, growing in low tufts whence spring many brilliant flowers. — **Grass-pink**, an orchid, *Calopogon pulchellus*, common in North American bogs. It has a slender stem with a single grass-like leaf at the base, and a short raceme of beautiful pink-purple flowers. — **Indian pink**. (a) See *Dianthus*. (b) Sometimes same as *pinkroot*, 1 (United States), and *cyprus-vine* (West Indies). — **Italian pink**, a yellow lake prepared from quercit-

ron bark.—Mullen-pink. See *Lychnis*, 2.—Old-maid's pink, the common soapwort or bouncing-bet.—Pheasant's-eye pink. Knight, Pict. Hist. Eng., II. 875.

pinky³ (pink'ki), n.; pl. *pinkies* (-kiz). [Dim. of *pink*⁴.] A narrow-sterned boat; a pink. Also *pinkie*.

pinky-built (pink'ki-bilt), a. Built like a pinky—that is, with a sharp stern.

pin-lock (pin'lok), n. 1. A form of lock in which the bolt is a projecting cylindrical pin.—2t. A poundmaster's fee.

The *pinlock*, or *pinder's fee*, is regulated by an Act of Philip and Mary at fourpence for any number of cattle impounded, which custom has made into one of fourpence for each head. V. B. Redstone (N. and Q., 6th ser., x. 197).

pin-machine (pin'ma-shên'), n. 1. A machine for making pins.—2. A machine for cutting and shaping wooden dowels and sash- or blind-pins. It cuts and points pins of all shapes and different sizes.

pin-maker (pin'mâ'kêr), n. One employed in the making of pins.

pin-mark (pin'mârk), n. The small circular indentation on one side and near the shoulder of a printing-type. It is made by the pin which dislodges the type from the mold in which it was cast.

pin-mill (pin'mil), n. A kind of hide-mill for softening skins after they have been soaked in a weak solution of sulphuric acid, rinsed with clean water, and again steeped in a solution of sal-soda and soap, which neutralizes any traces of acid remaining after the rinsing process. It consists of a large drum, with pins projecting from the interior surface, in which the skins are placed loosely, the drum revolving till they are sufficiently pliable for future operations.

The Morocco tanners at Lynn, Mass., and other places in New England where it is used, call it a *pin-mill*.
C. T. Davis, Leather, p. 251.

pin-money (pin'mun'î), n. 1. An allowance or occasional gift made by a husband to his wife, either voluntarily or as a part of the marriage settlement, for her separate use, to be employed in the purchase of apparel or of ornaments for her person, or for other personal expenditure. Technically, in law, it is an annual sum; and arrears can be claimed only for one year, and by the wife, but not by her representatives.

They have a greater interest in property than either maids or wives, and do not hold their jointures by the precarious tenure of portions or *pin-money*.
Addison, The Ladies' Association.

The main Article with me is, that Foundation of Wives Rebellion, and Husbands Cuckoldom, that cursed *Pin-Money*—Five-hundred Pound per Annum *Pin-Money*.
Steele, Tender Husband, I. 1.

pinna¹ (pin'ä), n.; pl. *pinnae* (-ê). [NL., < L. *pinna*, *penna*, a feather, wing: see *pen*², *pin*¹.]

1. In anat. and zool.: (a) A feather. See *penna*. (b) A bird's wing. See *pinion*¹. (c) A fish's fin: the usual technical name. (d) Some wing-like or fin-like part or organ, as the flipper of a seal or cetacean. (e) The outer ear, which projects from the head; the auricle, or pavilion of the ear. See cut under *ear*¹. (f) The nostril, or wing of the nose. (g) One of the smaller branches of some polyps, as plumularians. (h) In entomology, a small oblique ridge forming one of the lines of a pinnate surface. See *pinnate*.—2. In bot., one of the primary divisions of a pinnate leaf: applied most commonly to ferns. In a simply pinnate leaf it is a single leaflet, in a bipinnate leaf it consists of a partial petiole or rachis with the leaflets arranged along the sides. See cut under *Osmunda*.—Dilatator *pinnae*. Same as *depressor ala naut.*—*Pinnae of the nose*, the *ala naut.*; the nostrils.

Pinna² (pin'ä), n. [NL., < L. *pinna*, *pina*, < Gr. *πίνα*, *piva*, a kind of mussel.] 1. A genus of bivalves, typical of the family

Pinnidae. They are commonly called *sea-wings*, and are remarkable for the size of the byssus by which they adhere to rocks. It is notably long and delicate, is very strong, has a beautiful silky luster, and is capable of being woven into cloth, upon which a very high value is set. This manufacture was known to the ancients, and is still practised in Italy. Some species of *Pinna* measure about two feet long, with a byssus of the same length. See also cut under *byssus*.
2. [*L. C.*] A bivalve mollusk of the genus *Pinna*.

pinnaee (pin'äs), n. [Formerly also *pinace*; < F. *pinasse*, *pinace* = *Sp. pinaza* = *Pg. pinaça*, < It. *pinazza*, *pinassa*, a pinnace, pine, anything made of pine, a ship, < L. *pinus*, pine: see *pine*¹, n.] 1. *Naut.*: (a) A small vessel, generally with two masts rigged like those of a schooner, and

Thou canst safely steer
My venturous Pinnace to her wished Peer.
Sylvestor, tr. of Du Bartas's Weeks, II, Edm.

His fourth Son Edwyn was by his Brother Athelstan,
out of Jealousie of State, put into a little Pinnace, with-
out either Tackle or Oars.
Baker, Chronicles, p. 9.

This yeare Master Stickle, the excellent Architect of our
time, did, onely to try conclusion, build a pinnace in Leaden
hall, being of burden about five or six tun, which at
pleasure might bee taken asunder and joynt together.
Stow, Elizabeth, an. 1596.

There came from Virginia into Salem a pinnace of eigh-
teen tons, laden with corn and tobacco.
Wintthrop, Hist. New England, I. 67.

Swift as a swallow sweeps the liquid way,
The winged pinnace shot along the sea.
Pope.

(b) A large double-banked ship's boat.—2t. A
procuress; a prostitute. [Old slang.]

For when all the gallants are gone out o' th' town,
O then these fine pinnaces lack their due lading.
Songs of the London Prentices, p. 66. (*Hallivell*.)

She hath been before me—punk, pinnace, and bawd—
any time these two and twenty years, upon record in the
Pie-Poudre.
B. Jonson, Bartholomew Fair, I. 1.

pinnacle (pin-'ā-kl), *n.* [Early mod. E. also *pin-
acle*; < ME. *pinnakel*, *pinnacle*, *pycnack*, < OF.
pinacle, *pinnacle*, F. *pinacle* = Sp. *pináculo* =
Pg. *pinaculo* = It. *pinacolo*, *pinacolo*, < LL. *pin-
naculum*, a peak, pinnacle; double dim., < L.
pinna, a pinnacle: see *pin*.] 1. A sharp point
or peak; the very topmost point, as of a moun-
tain.

He then led me to the highest pinnace of the rock, and
placed me on the top of it. *Addison*, Vision of Mirza.

Far off, three mountain-tops,
Three silent pinnacles of aged snow,
Stood sunset-flush'd. *Tennyson*, *Lotos-Eaters*.

2. In arch., any relatively small structure (of

whatever form, but commonly terminating in a cone
or a pyramid) that rises
above the roof or coping
of a building, or caps a pro-
jecting architectural mem-
ber, such as a buttress. Its
constructive object is to give great-
er weight to the member which it
crowns, in order that this may bet-
ter resist some lateral pressure.
The application of the term is
generally limited to an ornamental
spire-shaped structure, standing
on parapets, angles, and buttresses,
and often adorned with rich and
varied devices. Pinnacles are very
numerous in the fully developed
medieval style; their shafts are
sometimes formed into niches, and
are sometimes paneled or quite
plain; in examples of late date,
every one of the sides generally
terminates in a gable. The tops
are often crocketed, and have
finials at the apex. Pinnacles are
most often square in plan, but are
sometimes octagonal, hexagonal,
or pentagonal. See also cut under
crocket.

Many pynakle payntet watz poudred ay quere,
Among the castel carnelles, clambred so thik,
That pared out of papure purely hit semed.
Sir Gawayne and the Green Knight (E. E. T. S.), I. 301.

Some renown'd metropolis,
With glistering spires and pinnacles adorn'd.
Milton, P. L., III. 550.

Same as *Pinnatipedia*. (b) Same as *Totipalma-
tæ* or *Steganopodes*.—2. In mammal., same as
Pinnipedia.—3. In Crustacea, crabs which have
some of the limbs like flippers, fitted for swim-
ming; the paddle-crabs, shuttle-crabs, or swim-
ming-crabs. See cut under *paddle-crab*.

Pinnipedia (pin-'i-pē-'di-ā), *n. pl.* [NL., neut.
pl. of *pinnipes*. See *pinniped*.] In zool., the
pinnigrade, pinniped, or fin-footed aquatic car-
nivorous quadrupeds, constituting one of the
prime divisions of the order *Feræ* or *Carnivora*,
the other being the *Fissipedia*. In Illiger's classi-
fication (1811) it was the thirteenth order of mammals.
The body is prone, not raised from the ground; the limbs
are modified into fins or flippers for swimming, and con-
fined within the common integument beyond the elbows
and knees; the feet are rotated backward. The first pha-
langes and digits of the manus and pes are enlarged be-
yond the others. The deciduous dentition is much re-
duced or rudimentary. The skull is greatly compressed
between the orbits; the lacrimal bone is imperforate, in-
traorbital, and rarely confluent with the maxillary, which
bounds the orbit; the palatines are not produced forward
laterally; and there are extensive vacuities between the
frontal and maxillary bones and between the tympanics
and exoccipitals. There are three families—the *Otariidae*
or eared seals (sea-lions, sea-bears, etc.), the *Phocidae*
or seals proper, and the *Trichechidae* or walrus. Also called
Pinnipeds and *Pinnigrada*. See cuts under *otary*, *seal*,
and *walrus*.

De'll hae them that hae the least *pint-stoup*.
Scotch proverb.

Pinus (pi'nus), *n.* [*NL. (Tournefort, 1700), < L. pinus*, pine: see *pine*.] 1. A genus of coniferous trees of the tribe *Abietineæ*, known by the staminate flowers in numerous short yellowish catkins, and the two forms of leaves, the primary small and scale-like, the secondary long and conspicuous and in clusters of from one to five each, enveloped at the base by a dry sheath.

There are about 70 species, widely distributed throughout north temperate regions, with a very few extending within the tropics in eastern Asia and Central America. They are tall or sometimes low evergreens bearing ovoid or oblong cones of closely imbricated woody scales, with thin or thickened apex. Every scale bears two winged seeds, the embryo with from three to ten seed-leaves set in a circle. (See cut under *cotyledon*.) The scales remain tightly set together over the seeds from fertilization till maturity, and after opening and discharging the seeds are long persistent on their axis. The cones vary in size from 2 inches and less in *P. edulis*, the pitch, to 6 inches in the well-known cones of the white pine, *P. strobus*, and reach 18 inches or more in *P. lambertiana*, the sugar-pine. The United States is particularly rich in pines, being the home of half the known species. For species and uses, see *pine*. See cuts under *cone*, *Abietineae*, *cotyledon*, and *pollen*.

Piophila (pi-ō'fī-lā), *n.* [NL. (Fallen, 1810), < *Gr. πίων*, fat, + *φίλη*, love.] A genus of dipterous insects of the family *Muscidae*, or giving name to a family *Piophilidae*, species of which inhabit cheese; the cheese-flies. The larva of the cosmopolitan *P. caesi*, the common cheese-hopper, lives on cheese, hams, and fat in general, and also, according to German, in cooking-salt. One species has been reared on the roots of celery. There are about 30 species, the adults of all of which are small black glistening flies. Three are common to North America and Europe. See cut under *cheese-fly*.

Piophilidae (pi-ō-fī'lī-dē), *n. pl.* [NL. (Macquart, 1835), < *Piophila* + *-idae*.] A family of acalyptate dipterous insects, typified by the genus *Piophila*, having the auxiliary vein of the wings coalescent throughout with the first longitudinal vein. Several genera belong to this family, and four of them are represented in North America.

pioscope (pi-ō-skōp), *n.* [*< Gr. πίων*, fat, + *σκοπεῖν*, view.] A kind of lactoscope invented by Heeren. It consists of a black vulcanized rubber disk having a central circular recess for holding the milk to be tested. Upon this is fitted a glass cover painted with six sectors of color, ranging from white-gray to deep bluish-gray, around a central unpainted spot. The color of the milk as seen through the unpainted spot in the center of the cover is compared with the colors of the sectors, and the quality of the milk is estimated from the color of the sector which most nearly corresponds to that of the sample.

piot (pi'ot), *n.* See *piet*.

pioted, *a.* See *pieted*.

pious (pi'us), *a.* [= *F. pieux*, an extended form of *OF. pie* = *Sp. Pg. It. pio*, < *L. pius*, pious, devout, affectionate, kind. Hence ult. (< *L.*) *piety*, *pity*, *pittance*, etc.] 1. Choose thou another [friend] of somewhat tougher frame, and that will not die of the *pip* like a young chicken.
Scott, *Monastery*, IX.

A thousand *pips* eat up your sparrow-hawk!
Tennyson, *Gerald*.

pip² (pip), *n.* [Short for *pippin*.] 1. The kernel or seed of fruit, as of an apple or an orange. — 2. One of the spots on dice or on playing-cards: thus, the ace has one *pip*; the ten, ten *pips*. — 3. One of the rhomboid-shaped spaces into which the surface of a pineapple is divided. — 4. A trade-name used by manufacturers and dealers in artificial flowers for an imitation of the central part of a flower which bears the seeds or fruit.

pip² (pip), *v. t.*; pret. and pp. *pipped*, ppr. *pip-ping*. [*< pip*², *n.*] To blackball. [*Slang*.]

If Buckle were *pipped*, they would do the same to every clergyman. *A. H. Huth*, *Buckle*, I. 252. (*Encyc. Dict.*)

pip³ (pip), *v.* [A var. of *pip*¹, *peep*¹, in like sense.] 1. *intrans.* To peep, pipe, or chirp, as a chick or young bird.

It is no frequent thing to hear the chick *pip* and cry in the egg before the shell be broken.
Boyle.

II. trans. To crack or chip a hole through (the shell): said of a chick in the egg.

Pipa (pi'pā), *n.* [NL. (Laurenti).] A genus of aglossal tailless amphibians, typical of the family *Pipidae*. *P. americana* or *surinamensis*, the Surinam toad, is the only species. Its color is brownish-olive above and whitish below. It is some-

Surinam Toad (*Pipa americana*), female.

times 7 inches long, and has a peculiarly hideous aspect. It is particularly interesting on account of its mode of rearing its young. After the female has laid the eggs,

the male places them upon her back, fecundates them, and then presses them into cellules, which at that period open for their reception, and afterward close over them. In these cellules on the mother's back the eggs are hatched and the young pass their tadpole state, for they do not leave their domicile till their legs are formed. *Asterodactylus* is a synonym. See *Aglossa*.

Pipa (pī'pē), *n. pl.* [NL., *pl.* of *Pipa*.] Same as *Pipidae*. *Tschudi*, 1838.

pipage (pī'pāj), *n.* [*pipe* + *-age*.] Conveyance or distribution by pipes, as of water, gas, petroleum, etc.

The question of *pipage* is one of immense importance. *Sci. Amer. Supp.*, p. 8768.

A public authority which, in dealing with the questions of constant supply, pressure, and *pipage*, should be bound to have regard not only to the convenience of customers, but also to the requirements for the extinction of fire. *Engineer*, LXVII. 343.

pipal (pē'pal), *n.* Same as *pipul-tree*.

For the discovery of theft they use an ordeal of fire, the person accused carrying a piece of red-hot iron a few paces with nothing between it and the skin but a few *pipal* leaves. *Athenaeum*, No. 3302, p. 815.

pipe¹ (pip), *v.*; pret. and pp. *pip*ed, ppr. *pip*ing. [Also, in the orig. sense 'chirp,' *peep* (formerly also spelled *piep*) and *pip*; < ME. *pipen*, *pypen*, = D. *pijpen* = MLG. *pijen*, LG. *piepen*, *pijen* = MHG. *pfisen*, *pfisen*, G. *pfisen*, *piepen*, *pijen* = Sw. *pipa* = Dan. *pibe*, *pibe*, *peep*, or *chirp*, as birds, < OF. *piper*, also *pepier*, F. *piper*, *pi-pter*, *pipe*, *peep*, or *chirp*, as birds or as frogs, < L. *pipire*, *piptare*, *pipare* (ML. also *pipulare*) = Gr. *πιπικειν*, *chirp*; imitative of the sound of chirping. In later uses the verb is from the noun. Cf. *peep*¹, *pip*³.] I. *intrans.* 1. To chirp, whistle, warble, or sing, as a bird.

It was Autumn, and incessant
Piped the quails from shocks and sheaves.

Longfellow, *Pegasus in Pound*.

2. To sound shrilly, as wind.

His big manly voice,
Turning again toward childish treble, *pipes*
And whistles in his sound.

Shak., As you Like it, II. 7. 102.

Well *pip*ed the wind, and, as it swept
The garden through, no sweet thing slept.

William Morris, *Earthly Paradise*, II. 124.

3. To cry; weep: sometimes with *up*: as, the children *pip*ed up at this.—4. To play on a pipe, fife, flute, or any similar instrument of music.

The younger sorte come *pip*ing on apace,
In whistles made of fine enticing wace.
Gascoigne, Steele Glas (ed. Arber), Ept., p. 82.

He *pip*d, I sung; and, when he sung, I *pip*ed.
Spenser, *Colin Clout*, l. 78.

We have *pip*ed unto you, and ye have not danced.
Mat. xl. 17.

From street to street he *pip*ed advancing,
And step by step they followed dancing.
Browning, *Pied Piper*, vii.

5. To make a shrill noise, as bees, in the hive before swarming.—To *pipe* in an ivy-leaf. See *ivy-leaf*.

II. *trans.* 1. To utter or emit, as notes, in a shrill or piping voice.

A robin . . . was basking himself in the sunshine, and *pip*ing a few querulous notes.

Iroving, *Sketch-Book*, p. 258.

And, while the wood-thrush *pipes* his evening lay,
Give me one lonely hour to hymn the setting day.

Bryant, *A Walk at Sunset*.

When the summer days are bright and long,
And the little birds *pipe* a merry song.
R. H. Stoddard, *Under the Trees*.

2. To play; produce on a pipe or similar musical instrument.

Things without life giving sound, whether pipe or harp, except they give a distinction in the sounds, how shall it be known what is *pip*ed or harped? 1 Cor. xiv. 7.

"Piper, *pipe* that song again."

So I *pip*ed; he wept to hear.

William Blake, *Songs of Innocence*, Int.

Piping a ditty sad for Blon's fate.

M. Arnold, *Thyrsis*.

3. *Naut.*, to call by means of the boatswain's pipe or whistle: as, to *pipe* the crew to grog or to prayers.

The men are generally in long before they are *pip*ed down.

Marryat.

4. To provide or supply with pipes.

This well was *pip*ed and used for a while, but, not yielding enough water for cooling purposes, was closed.

Sci. Amer., N. S., LX. 38.

5. To convey by pipe, as water, gas, oil, etc.

Wherever the water comes from, it is usually conveyed into a tank or a reservoir, and then *pip*ed or ditched about over the farm wherever needed.

Pop. Sci. Mo., XXXVI. 365.

Natural gas will be *pip*ed to Chicago.

New York Tribune, July 3, 1887.

6. To furnish with or make into piping, as in dressmaking or upholstery: as, to *pipe* a border.—7. In *hydraul. mining*, to direct a stream of water upon, as a bank of gravel, from the hydraulic pipe.—To *pipe* one's eye, to weep; cry. [*Nautical slang*.]

Then reading on his 'bacco-box,
He heav'd a bitter sigh,
And then began to eye his pipe,
And then to *pipe* his eye.

Hood, *Faithless Sally Brown*.

He was very frail and tearful; for being aware that a shepherd's mission was to pipe to his flocks, and that a boatswain's mission was to pipe all hands, . . . so he had got it into his head that his own peculiar mission was to *pipe* his eye; which he did perpetually.

Dickens, *Martin Chuzzlewit*, xxxii.

To *pipe* down (*naut.*), to dismiss from muster, as a ship's company, or to signify by means of a boatswain's whistle that the duty being finished, the crew have permission to leave their stations.—To *pipe* or *pipe* off, in *thieves' slang*, to watch (a house or person) closely, in order to obtain information which may be of use in carrying out a criminal plan.

pipe¹ (pip), *n.* [*<* ME. *pipe*, *pype*, < AS. *pipe*, a pipe, = OFries. *pipe* = D. *pijp* = MLG. *pipe*, LG. *pipe* = OHG. *pfisa*, *fisa*, MHG. *pfise*, *pfise*, G. *pfise* = Icel. *pipa* = Sw. *pipa* = Dan. *pibe* = F. *pipe* = Sp. *pg. pipa* = It. *pipa*, *piva*, a pipe, < ML. *pipa*, a pipe (in various uses); from the verb in the orig. sense 'chirp,' 'peep,' as a bird: see *pipe*¹, *peep*¹, *v.* In later uses the verb is from the noun, while again some later uses of the noun are from modern deflected uses of the verb. Cf. doublet *fife*.] 1. A simple tubular musical instrument, usually of wood. The typical form is doubtless that of a flageolet or whistle, or perhaps that of an oboe. The term is no longer technically applied to any particular instrument (though it survives in bagpipe, Pan's pipes, etc.), except in connection with the pipe-organ. See def. 2.

Tho up they gan their merry *pipes* to trusse,
And all their goodly heardes did gather round.

Spenser, F. Q., III. x. 46.

They are not a *pipe* for fortune's finger
To sound what stop she pleases.

Shak., *Hamlet*, III. 2. 75.

Neyther list I to dance after their *pipe* which ascribe a musical harmonie to the heauens.

Purchas, *Pilgrimage*, p. 10.

These [antio trifles] be the *pipes* that base-born minds dance after.

Quarles, *Emblems*, II. 8.

A Shepherd now along the Plain he roves,
And with his jolly *Pipe* delights the Groves.

Prior, *Henry and Emma*.

2. One of the tubes of metal or of wood from which the tones of an organ are produced; an organ-pipe. Such pipes are either flue- or reed-pipes. The tone is produced in flue-pipes by the fluctuations of a compact focused stream of air impinging upon a sharp edge or lip, and in reed-pipes by the vibration of a metal tongue hung in a stream of air. Metal pipes of either class are usually circular in section, while wooden pipes are usually square or triangular. (a) Flue-pipes consist of a body and a foot, the division between which is marked by an opening on one side of the pipe, called the *mouth*. The upper and lower edges of the mouth are called *lips*, and its sides are often shielded by *ears*. Opposite the lower lip a horizontal shelf, called the *language* or *languid*, is inserted so as nearly to separate the pipe into two distinct cavities. Between this shelf and the lower lip is a narrow slit called the *flue* or *wind-way*, through which the stream of air is directed against the upper lip. The quality of the tone depends upon the general shape of the pipe, and especially upon a delicate adjustment of the language and lips called *voicing*. The pitch of the tone depends upon the length of the vibrating column of air within the body. The upper end of the pipe may be open, or may be closed with a plug; an open pipe gives a tone an octave higher than a stopped pipe of the same length. Tuning is effected by altering the effective length of the air-column in various ways; and the adjustable metal flaps or tongues placed at the top of the pipe for this purpose are called *tuners*. The lower end of the pipe is open for the admission of air from the wind-chest. (b) Reed-pipes consist of a tube or body and a *mouthpiece*, the only communication between which is through a short metallic tube called the *shallot*, or reed proper. The oblong opening into the lower part of the shallot is covered or filled by a thin, elastic piece of brass called the *tongue*, or sometimes the *reed*. When the tongue covers the opening, the reed is *striking*; when it merely fills the opening, the reed is *free*. The quality and power of the tone depend largely upon the material and shape of the body, which serves almost exclusively as a resonance-chamber. The pitch of the tone depends upon the vibrating length of the tongue. Tuning is effected by adjusting a wire spring of peculiar shape so as to lengthen or shorten the part of the tongue left free to vibrate: this spring is called the *tuning-wire*. In the organ, pipes of the same variety are arranged in sets called *stops* or *registers*, containing at least one pipe for each key of the keyboard. (See *stop* and *organ*.) The breadth and sonority of a pipe's tone are much influenced by its *scale*—that is, by the general ratio between its width or diameter and its length; broad, bulky pipes giving broad, diapason-like tones, and narrow pipes giving thin, incisive tones. The proportions between the several dimensions of the different kinds of pipes are regulated by somewhat intricate mathematical formulæ. The number of pipes in an organ is approximately equal to the product of the number of keys in the keyboards and the number of stops. The organ at Weingarten is said at one time to have contained 6,666 pipes. The largest pipe in an organ is the deepest one belonging to a 16- or 32-foot

open stop of the pedal organ; such a pipe is usually of wood, and is about 16 or 32 feet long. The smallest pipe is the highest one belonging to one of the mixture-stops, and is usually smaller than a common lead-pencil. Pipes are made either of wood or of metal. The metal most in use for this purpose is called *pipe-metal* or *organ-metal*, and is an alloy of tin and lead. Pure tin, zinc, and lead have also been used, and a great variety of their alloys. When a pipe is sounded, it is said to *speak*. When it fails to speak properly, or speaks when not wanted, it is said to *cipher*.

3. Any hollow or tubular thing or part: as, the *pipe* of a key.—4. A tube of metal, wood, or earthenware serving for various uses, as in the conveyance of water, gas, steam, or smoke: as, a gas-*pipe*; a stove-*pipe*.—5. A large round cell in a bee-hive, used by the queen-bee. *Hall-well*.—6. A tube of clay or other material with a bowl at one end, used for smoking tobacco, opium, or other narcotic or medicinal substance. See *chibouk*, *hooka*, *hubble-bubble*, *narghile*.

The *pipe*, with solemn interposing puff,
Makes half a sentence at a time enough.

Cowper, *Conversation*, l. 246.

The genial stoicism which, when life flouts us, and says, "Put that in your pipe and smoke it!" can puff away with as sincere a relish as if it were tobacco of Mount Lebanon in a narghileh of Damascus.

Lowell, *Cambridge Thirty Years Ago*.

7. A pipeful; a quantity of tobacco sufficient to fill the bowl of a pipe.

Sir, I am for one *pipe* of tobacco; and I perceive yours is very good by the smell.

Cotton, in *Walton's Angler*, II. 235.

Sir Geoffrey, to show his good-will towards me, gave me a *pipe* of his own tobacco.

Steele, *Tatler*, No. 132.

8. A wine-measure, usually containing about 105 imperial gallons, or 126 wine-gallons. Two pipes, or 210 imperial gallons, make a tun. But in practice the size of the pipe varies according to the kind of wine it contains. Thus, a pipe of port contains nearly 188 wine-gallons; of sherry, 130; of Madeira, 110; and of Lisbon, 140. Sometimes confounded with *butt* (which see).

The pint you brought me was the best

That ever came from *pipe*.

Tennyson, *Will Waterproof*.

9. Same as *pipe-roll*.—10. The chief air-passage in breathing and speaking; the windpipe: as, to clear one's *pipe*. [*Colloq.*]

Drinke of this liouure wul cure up clem

The *pipes* and the gomes, as is sure

This Marcial expert upon this cure

Palladius, *Husbandrie* (E. E. T. S.), p. 58.

I should have quite defeated your oration,

And slit that fine rhetorical *pipe* of yours.

B. Jonson, *Catiline*, v. 4.

11. The sound of the voice; the voice; also, a whistle or call of a bird.

There are who do yet remember him at that period—his *pipe* clear and harmonious.

Lamb, *Old Actors*.

Sad and strange as in dark summer dawns

The earliest *pipe* of half-awaken'd birds

To dying ears.

Tennyson, *Princess*, iv.

12. *Naut.*, the whistle used by the boatswain and his mates to call or pipe the men to their various duties; also, the sounding of this instrument.—13. *pl.* The bagpipe. [*Colloq.*].—14. A spool, as of thread; a roll or quill on which embroidery-silk was wound.

I prey yow do byen for me if *pypps* of gold [gold thread on pipes or rolls for embroidery].

Paston Letters, I. 32.

15. A dingle or small ravine thrown out from a larger one. *Halliwel*. [*Local, Eng.*].—16.

In *mining*, an occurrence of ore in an elongated cylindrical or pipe-like mass, such as is characteristic of the so-called pipe-vein. See *pipe-vein*.—17. One of the curved flutings of a grill or ruff; also, a pin used for piping or fluting.

—18. In *hair-dressing*, a cylinder of clay used for curling the peruke.—19. In a steam-engine. See *induction-pipe*.—20. In *metal*, a funnel-shaped cavity at the top of an ingot of steel, caused by the escape of occluded gas (largely hydrogen) during the cooling of the metal. This happens chiefly with steel of hard temper. The formation of pipes of this kind is technically known as *pip*ing.

21. In the manufacture of black-ash or ball-soda (impure sodium carbonate) by the so-called Le Blanc ball-furnace process, one of very numerous hollow characteristic jets of flame which shoot out from the massed mixture of chalk, small coal, and sodium sulphate during the calcining process, and the beginning of the subsidence of which indicates the completion of the calcination. These jets are also called *candles*.—22. The puffin or sea-parrot, *Fratercula arctica*. [*Cornwall, Eng.*].—Blow-off pipe. See *blow-off*.—Celtic pipes. Same as *fairy pipes*.—Drip pipe. See *drip-pipe*.—Dry pipe, a pipe for taking steam free from water from a boiler. See *steam-boiler*.—Dutchman's pipe. See *Dutchman's pipe*.—Eldon pipes. Same as *fairy pipes*.—Fairy pipes. See *fairy*.—Indian pipe. See *Indian-pipe*.—Labial pipe. See

labeled.—Laminated pipe. See *laminated*.—Oaten pipe. See *oaten*.—Open pipe. See *def. 2*.—Pan's pipes, a primitive musical instrument, consisting of a graduated series of tubes of cane, wood, metal, or stone, closed at the lower end, the tone being produced by blowing with the breath across the upper end. It has been used among barbarous and semi-civilized peoples in various parts of

Pan's Pipes.

the world. The tones of the instrument are often sweet and pleasant. Early in the nineteenth century an effort was made in England to form companies of players upon Pan's pipes of various sizes for itinerant performances. Also called *Pandean pipes*, and *syrrinx*.—Pipe gamboge, gamboge in cylindrical sticks, as shaped by bamboo-joints in which the juice is collected.—Stopped pipe. See *def. 2*.—To hit the pipe. See *hit*.

pipe², *v.* An obsolete form of *peep*.

pipe³, *n.* An obsolete form of *pip*.

pipe-bender (pip'ben'dér), *n.* 1. A machine for bending sheet-iron stove-pipe in the operation of making elbows.—2. A flexible mandrel formed of a strong, closely wound steel helix, which is inserted in a soft metal pipe in order that it may be bent without distortion. *E. H. Knight.*

pipe-box (pip'boks), *n.* In a vehicle, the box of a hub or nave which receives the arm or spindle of the axle. *E. H. Knight.*

pipe-case (pip'käs), *n.* (a) A case or box lined with soft material to protect a valuable pipe when not in use. (b) A similar cover for the bowl of a pipe to protect it from the fingers when in use, as when a meerschaum is being carefully colored, to keep the fingers from touching the bowl.

pipe-clamp (pip'klamp), *n.* A vise or holder for a pipe; a pipe-vise. *E. H. Knight.*

pipe-clay (pip'klä), *n.* A white clay suitable for making pipes, and also used for whitening leatherwork, especially by soldiers.

pipe-clay (pip'klä), *v. t.* 1. To whiten with pipe-clay.

Fellows were singing as they pipe-clayed belts or burnished sword-scabards.

Arch. Forbes, Souvenirs of some Continents, p. 35.

Hence—2. To blot out or wipe off; square or settle: said of accounts. [Slang.]

You . . . would not understand allusions to their (the midshipmen's) pipe-claying their weekly accounts. *Dickens, Bleak House, xvii.*

pipe-coupling (pip'kup'ling), *n.* A joint or piece for uniting two pipes

Pipe-coupling.

so as to form a continuous channel, or for forming a junction between a pipe and another object.—Flexible pipe-coupling. See *coupling*.

pipe-cutter (pip'kut'ér), *n.* 1. A tool for cutting iron pipes. A hook passes under the pipe and serves as a rest, while a cutting-chisel or disk is forced down upon the pipe, about which the implement is rotated until a complete section is effected.

2. A machine for truing the ends of pipes or cutting them into lengths.

pipéd (pipt), *a.* [*pipe* + *-ed*]. Tubular or fistulous; formed with or into a tube or pipe.—Piped key, a key with a hollow barrel which fits upon a pin in the lock. Also *pipe-key*.

pipe-dance (pip'däns), *n.* A dance resembling the sword-dance, in which a number of clay tobacco-pipes are used instead of swords.

Sometimes they do the pipe-dance. For this a number of tobacco-pipes, about a dozen, are laid close together on the floor, and the dancer places the toe of his boot between the different pipes, keeping time with the music.

Mayhew, London Labour and London Poor, I. 14.

pipe-die (pip'di), *n.* 1. In a press for molding earthenware pipes, the ring-shaped die which shapes the exterior surface of the pipe. A piece called the *core* is supported in such manner that one of its extremities protrudes outwardly into, and is held concentrically within, the pipe-die. This forms an annular

opening, through which the plastic clay is forced by heavy pressure, to give it the form of a tube. The inside of the socket on the end of the pipe is shaped by what is called a *lower die*, and the outside of the socket is formed by a device called the *ring*, which is interposed between the outside die and a flange on the lower die.

2. A female screw or nut of hardened and tempered steel used for cutting male threads on the ends of metal pipes. The threads of the die have grooves cut across them parallel with the axis on which the die rotates. In cutting pipe-threads, these grooves afford clearance for escape of the metal cuttings, which would otherwise accumulate in the threads of the die and prevent a clean, uniform cut.

3. Any one of the radially arranged and simultaneously adjustable screw cutting-tools which in some kinds of pipe die-stocks have their inner ends formed like chasers for cutting male screws. (See *chaser*.) A right-hand die is one that cuts a right-handed screw-thread. One which cuts a left-handed thread is a left-hand die. See *screw-thread*. Also called *outside die*.

pipe-driver (pip'dri'vër), *n.* An apparatus for forcing into the ground pipes for driven wells.

pipe-fish (pip'fish), *n.* One of the several lophobranchiate fishes which have a long tubular snout like a pipe, as any member of the *Syngnathidae* or *Hippocampidae*. The members of the latter family are more commonly called *sea-horses*, the pipe-fishes proper having the body as well as the jaws slender. One of the best-known pipe-fishes is *Siphostoma* or *Syngnathus acus*, common in British waters. The best-known American species is *Siphostoma fuscum* or *Syngnathus peckhami*.

Great Pipe-fish (*Siphostoma acus*).Massachusetts Pipe-fish (*Siphostoma fuscum*).

ish waters. The best-known American species is *Siphostoma fuscum* or *Syngnathus peckhami*.

pipe-foot (pip'fut), *n.* In organ-building, the lower part of a flue-pipe. Its lower point is called a *toe*. See *pipe*, 2.

pipe-grab (pip'grab), *n.* A clutching tool which is lowered into or upon a well-pipe to lift it to the surface.

pipe-joint (pip'joint), *n.* A pipe-coupling. *E. H. Knight.*

pipe-key (pip'kē), *n.* Same as *piped key* (which see, under *piped*).

pipe-layer (pip'lā'ér), *n.* 1. A workman who lays gas-, water-, or drainage-pipes.—2. A political intriguer (see the quotation); hence, any schemer. [U. S.]

Among the Glentworth papers was a letter in which he said that the men sent from Philadelphia were to be employed in laying the pipes for the introduction of Croton water. The Whig leaders were immediately stigmatized as *pipe layers*, a term persistently applied to them for several years. *Thurston Weed, Autobiog., p. 498.*

pipe-laying (pip'lā'ing), *n.* 1. The act of laying down pipes for gas, water, and other purposes.—2. A laying of plans for the promotion or accomplishment of some scheme or purpose, especially a political one; scheming or intriguing. See the quotation under *pipe-layer*, 2.

pipe-lee (pip'lē), *n.* Tobacco half-smoked to ashes in a pipe. *G. A. Sala.*

pipe-line (pip'lin), *n.* A conduit of iron pipe, chiefly laid under ground, through which oil is forced by pumping to transport it from an oil-region to storage-tanks at a general market or refinery. The method has been put in operation in the United States on a vast scale, as a substitute for other means of transportation, and carried out with all the refinements of modern pumping-machinery, the result being an enormous reduction in the cost of transportation and in the cost of petroleum products to consumers. The conduits are constructed of lap-welded iron pipes, with pumping-stations at intervals of varying lengths, according as the grade is ascending or descending, the average being about 30 miles. The diameters of the pipes are adapted to the needs of the various lines, 6 inches being the size used on most trunk-lines, and two or more pipes being employed when greater capacity is required. The longest existing trunk-line is that connecting the Pennsylvania oil-region in opposite directions with New York and Chicago. This and other trunk-lines, and lines leading from wells to pumping-stations, etc., make up an aggregate extent of many thousand miles. The pipes are liable to obstruction from deposits of paraffin and foreign matters. Such accumulations are removed by driving a sort of piston (called by the workmen a "go-devil") through the pipes, from station to station, by the pressure of the liquid column behind it.

pipe-loop (pip'löp), *n.* In harness-manuf., a long, narrow loop for holding the end of a buckled strap. *E. H. Knight.*

pipe-metal (pip'met'al), *n.* See *organ-metal*, under *metal*.

pipemouth (pip'mouth), *n.* A fish of the family *Fistulariidae*: so called from the pipe-like or tubular snout.

pipe-mouthed (pip'moutht), *a.* Having a piped, fistulous, or tubular mouth, as a fish: specifically noting fishes of the families *Fistulariidae* and *Centrisidae*.

pipe-office (pip'of'is), *n.* An office, abolished in 1834, in the English court of exchequer, in which the clerk of the pipe made out leases of crown lands, accounts of sheriffs, etc.

pipe-organ (pip'ör'gan), *n.* The organ proper, the largest of musical instruments. See *organ*, 1.

pipe-oven (pip'uv'n), *n.* A hot-blast oven in which the air passes through pipes exposed to the heat of the furnace. *E. H. Knight.*

pipe-privet (pip'priv'et), *n.* A former name of the lilac.

pipe-prover (pip'prü'vër), *n.* An apparatus for testing the strength and soundness of steam- and water-pipes by hydraulic pressure.

piper (pi'për), *n.* [*ME. piper, pyper, pipere*, < *AS. pipere* = *D. pipper* = *MLG. piper* = *OHG. piſiari*, MHG. *piſiære*, *piſifer*, *G. piſifer* = *Ice. pipari* = *Sw. pipare* = *Dan. piber*; as *pipe* + *-er*. Cf. *ſifer*.] 1. One who or that which pipes; one who plays on a pipe. In the following quotation from Chaucer the word is used to personify the box-tree, as furnishing the material from which pipes or musical instruments were made.

The box tre *piper*, holm to whippis lasch.
Chaucer, Parliament of Fowls, l. 178.

The *piper* loud and louder blew;
The dancers quick and quicker flew.
Burns, Tam o' Shanter.

"Please your honours," said he, "I'm able
By means of a secret charm, to draw
All creatures living beneath the sun . . .
After me so as you never saw . . .
And people call me the Pied Piper."
Browning, Pied Piper, vi.

Specifically—2. In *ornith.*: (a) A sandpiper or sandpeep; a bird of the genus *Tringa* or some related genus, as *Ereunetes*. See *cuts* under *Ereunetes*, *sandpiper*, and *stint*. (b) A young squab; a newly hatched pigeon.

Pigeon, . . . literally a nestling bird that pipes or cries out, a "*Piper*"—the very name now in use among Pigeon-fanciers. *A. Newton, Encyc. Brit., XII. 84.*

3. In *ichth.*: (a) The most general English name of the lyre-gurnard, *Trigla lyra*. (b) An exocoetoid fish, *Hemirhamphus intermedius*, with an elongate body and ensiform lower jaw, common in New Zealand, and esteemed for its flesh as well as for the sport it gives. Also called *garfish*, *thi*, and *halfbeak*.

I look on the *Piper* as the float fish of New Zealand.
The Field (London), Nov. 25, 1871.

4. A kind of caddis-worm. See the quotation.

You are also to know that there be divers kinds of caddis or case-worms, that are to be found in this nation in several distinct counties, . . . as namely one caddis, called a *Piper*, whose husk or case is a piece of reed about an inch long or longer, and as big about as the compass of a two pence. *I. Walton, Complete Angler, l. 17.*

5. The piper-urchin.—6. In *apiculture*, an after-swarm having a virgin queen. *Phin, Dict. Apiculture, p. 53.*—7. See the quotation.

A clever arrangement of screens over which a bushy-tailed dog not unlike a fox—the *piper*, as it is called—is taught to leap at the word of command.

Athenæum, No. 3069, p. 231.

Drunk as a piper, very drunk. [Colloq.]

Jerry thought proper to mount the table, and harangue in praise of temperance; and in short proceeded so long in recommending sobriety, and in tossing off horns of ale, that he became as *drunk as a piper*.

Graves, Spiritual Quixote, x. 29. (Davies.)

To pay the piper. See *pay*.

Piper (pi'për), *n.* [*NL. (Linnaeus, 1737), < L. piper, pepper*: see *pepper*.] A genus of plants, the type of the order *Piperaceæ* and tribe *Pipereæ*, characterized by the two to six stamens with distinct anther-cells, and an obtuse or slightly beaked ovary crowned with from two to five stigmas, becoming in fruit a small berry. There are over 650 species, widely dispersed through the tropics. They are most commonly jointed shrubby climbers, rarely trees or tall herbs, bearing alternate entire leaves with several or many conspicuous nerves, and large and often wing-like stipules. The flowers are densely packed together in cylindrical stalked spikes (or in a few species in racemes)—at first terminal, soon becoming opposite the leaves (as in *Phytolacca*), pendulous and slender, with dioecious or perfect flowers without calyx or corolla, each with a shield-shaped protecting bract. The *Piper* *Ethiopicum* of the shops is now placed in the genus *Xylopi*. See *pepper*, *Charica*, and *oil of cubebs* (under *oil*); and for important species, see *betel*, *coltsfoot* (and *hazard-tail*), *cubebs*, *kava*, *kava-kava*, and *matipo*.

Piperaceæ (pip-e-rä'së-ä), *n. pl.* [*NL. (Richard, 1815), < Piper + -aceæ*.] The pepper family, an order of apetalous plants of the series *Micrembyæ*, distinguished by the syncarpic

ovary with one cell and one ovule, with usually two, three, or four styles or stigmas. They are generally aromatic or pungent herbs or shrubs, bearing alternate entire leaves, commonly with three or more prominent curving nerves, and often pellucid-dotted or fleshy. The minute flowers are usually in unbranched slender stalked spikes. It includes about 1,000 species and 8 genera, of which *Piper* (the type), *Peperomia*, and *Saururus* are the chief. See *pepper*, *cubeb*, and *Peperomia*.

piperaceous (pip'ē-rā'shi-us), *a.* [*< Piperaceæ + -ous.*] Of or belonging to the *Piperaceæ* or pepper tribe of plants.

pipe-rack (pip'rak), *n.* In organ-building, a wooden shelf placed above the wind-chests, having perforations in which the pipes are held and supported.

Piperæ (pi-pē-rē-ē), *n. pl.* [NL. (F. A. W. Miquel, 1843), *< Piper + -æ.*] A tribe of plants of the order *Piperaceæ*, known by the ovary with one cell and one ovule, indehiscent fruit, and by the absence of the perianth. It includes 1,000 species in the two leading genera *Piper* and *Peperomia*, and about four in the three others.

pipe-reducer (pip'rē-dū'ser), *n.* A pipe-coupling having one end of less diameter than the other, for connecting pipes of different sizes.

piperic (pi-per'ik), *a.* [*< L. piper, pepper, + -ic.*] Produced from plants of the pepper family or from piperine. — **Piperic acid**, $C_{12}H_{10}O_4$, a monobasic acid obtained by boiling piperine with alcoholic potash and acidifying with hydrochloric acid.

piperidge (pip'ē-rij), *n.* [Also *pipperage*, *pip-rage*, and *pepperidge*: said to be a corruption of *berberis*.] 1. The common barberry. Also *piperidge-tree*, *piperidge-bush*. [Eng.]—2. See *pepperidge*.

piperidine (pi-per'i-din), *n.* [*< piperic + -id + -ine.*] A volatile alkaloid ($C_5H_{11}N$) produced by the action of alkalis on piperine.

piperine (pip'ē-rin), *n.* [*< F. piperine, peperin, péperine, < lt. peperino, a cement of volcanic ashes, < L. as if "piperinus, of pepper, < piper, pepper: see pepper."*] 1. A concretion of volcanic ashes.—2. A crystalline alkaloid ($C_{17}H_{19}NO_3$) extracted from pepper. The crystals of piperine are transparent, colorless, tasteless, inodorous, fusible, not volatile. They are very slightly soluble in water but readily soluble in alcohol, and with oil of vitriol give a red color.

piperitious (pip'ē-rish'us), *a.* [*< L. piper, pepper, + E. -itious.*] Having a hot, biting, or pungent taste, like that of pepper; peppery.

piperivorous (pip'ē-riv'ō-rus), *a.* [*< L. piper, pepper, + corare, devour.*] Eating or feeding upon pepper, as a bird: as, the *piperivorous toucan*, *Pteroglossus piperivorus*.

piperlyt (pi-per'li), *a.* [*< piper + -lyt.*] Of or resembling a piper.

Who in London hath not heard of his [Greene's] . . . piperly extemporizing and Tarletonizing, his splash counterfeiting of every ridiculous and absurd toy?
G. Harvey, *Four Letters*, II.

pipe-roll (pip'rōl), *n.* The account kept in the English exchequer containing the summaries and authoritative details of the national treasury: also called the *Great Roll*. It was so named from its shape in the middle ages.

The *Pipe-Rolls* are complete from the second year of Henry II., and the Chancellor's rolls nearly so.
Stubbs, *Const. Hist.*, § 128.

piper-urchin (pi-pēr-ēr'chin), *n.* A sea-urchin, *Cidaris papillata*, the form of which, with its club-shaped spines, is likened to a bagpipe. [Local, British.]

pipe-staple (pip'stā-pl), *n.* [OD. *stapel*, a stalk.] 1. The stalk of a tobacco-pipe; also, a stalk of grass; a windle-straw. *Scott*, *Black Dwarf*, ix. [Scotch.]—2. In bot., the grass *Cynosurus cristatus*, whose stiff stalks are used to clean pipes. [Scotch.]

pipe-stay (pip'stā), *n.* Any device for holding a pipe in place, or for hanging a pipe. *E. H. Knight*.

pipe-stem (pip'stem), *n.* The stem of a tobacco-pipe.

pipe-stick (pip'stik), *n.* A wooden tube used as the stem of a tobacco-pipe. The long German tobacco-pipes have sticks of cherry or birch from which the bark has not been removed.

pipe-stone (pip'stōn), *n.* Same as *catlinite*.

pipe-stop (pip'stop), *n.* A spigot in a pipe. *E. H. Knight*.

pipe-tongs (pip'tōngz), *n. sing. and pl.* An implement used by pipe-fitters in screwing to-

Common Pipe-tongs.

gether lengths of pipe, or in unscrewing lengths previously screwed together or united by screw-threaded pipe-fittings.

pipe-tree (pip'trē), *n.* The lilac-tree, *Syringa vulgaris*.—**Pudding pipe-tree**, the purging cassia. See *Cassia*, 1.

pipette (pi-pet'), *n.* [*< F. pipette, dim. of pipe, a pipe: see pipel.*] 1. In porcelain-making, a small can arranged to hold slip, and to allow it to flow through a pipe at one end. Pipettes are sometimes fitted with adjustable pipes of different diameters. See *slip-decoration*.—2. A small tube used to withdraw and transfer fluids or gases from one vessel to another. The shape differs with the special use to which it is adapted. Some are designed to measure fluids accurately as well as to transfer them.—**Absorption pipette**, an apparatus for subjecting gases to the action of a liquid reagent. In the figure, *a* and *b* are absorption bulbs connected by the glass tube *c*. *c* and *d* are a second pair of bulbs, with

their connecting tubes *f, g*, and *m*, serving as a water-joint to prevent contact with air or escape of fumes. The reagent is introduced through the tube *k*, and connection made by the rubber tube *l*.

pipette (pi-pet'), *v. t.; pret. and pp. pipetted, ppr. pipetting.* [*< pipette, n.*] To take up or transfer by means of a pipette.

The solution of arsenic acid was pipetted into the bottle.
Amer. Chem. Jour., IX, 177.

pipe-twister (pip'twis'tēr), *n.* Same as *pipe-wrench*.

pipe-vein (pip'vān), *n.* A mode of occurrence of metalliferous ores somewhat common in, but not limited to, the lead-mines of Yorkshire and Derbyshire, England. In the so-called "pipes" the ore occupies a more or less nearly cylindrical or pipe-shaped cavity, usually quite irregular in its dimensions, and rarely of any considerable length. Pipe-veins resemble "gaah-veins" in some respects; and they also have certain peculiarities in common with the "carbonas" of the Cornish mines. The principal shoot of tin ore in the East Wheal Lovell Mine, Cornwall, was followed from the 40-fathom level down to the 110-fathom as one continuous pipe, in the shape of a long irregular cylinder with an approximately elliptic section, the dimensions of which were about 14 by 7 feet. *Le Neve Foster*.

pipe-vine (pip'vin), *n.* See *Aristolochia*.

pipe-vise (pip'vis), *n.* A vise designed for grasping pipes or rods while they are being threaded, etc.; a vise to which is attached a pipe-grip.

pipe-wine (pip'win), *n.* Wine drawn from the cask, as distinguished from bottled wine. When claret was a common drink in English and Scottish taverns, it was customary to keep it on tap.

I think I shall drink in pipe-wine first with him; I'll make him dance.
Shak., *M. W. of W.*, III, 2, 90.

pipewood (pip'wūd), *n.* See *Leucothoe*.

pipework (pip'wērk), *n.* 1. See *organ*, 6.—2. Same as *piping*, 4.

pipewort (pip'wērt), *n.* Any plant of the genus *Eriocaulon*, or indeed of the order *Eriocaulaceæ* or (as formerly written) *Eriocaulonaceæ*.

pipe-wrench (pip'wēnch), *n.* A tool having one jaw movable and the other relatively fixed, the two being

so shaped as to bite together when placed on a pipe and rotated in one direction around it. When turned in the opposite direction, the jaws slip over the pipe without turning it, and are thus brought into position for a new effective stroke.

Pipe-wrench.

a, pipe; *b*, hook-shaped jaw, serrated at *g*, and threaded at *c*; *d*, nut which turns in a recess in the block *e*, pivoted at *f* to the shank *h*; the latter is serrated at *g'*, and is supplied with a wooden handle *i*. The jaws *g* and *g'* are adjusted to or from each other by turning the nut *d*, and then a slight rocking motion on the pivot *f* causes them to grip the pipe.

pipi (pē'pē), *n.* [Native name.] The astrigent pods of *Cassipouia Pipai*, a Brazilian plant,

sometimes imported along with divi-divi for tanning, though very inferior.

Pipidæ (pip'i-dē), *n. pl.* [NL., *< Pipa + -idæ.*] A family of aglossate amphibians, typified by the genus *Pipa*. They have no teeth, dilated sacral diapophyses, and ocoacoids and preoacoids which are strongly divergent. It contains the Surinam toad. They are sometimes called *coll-backed toads*. See cut under *Pipa*.

pipient (pip'i-ent), *a.* [*< L. pipien(-t)s, ppr. of pipire, pipe, chirp: see pipel, v.*] Piping; chirping. *Rev. T. Adams, Works*, II, 118.

Pipile (pi-pi'lē), *n.* [NL. (Bonaparte, 1856).] A genus of guans, of the family *Cracidae* and

Piping-guan (*Pipile jacutinga*).

subfamily *Penelopinae*, including the piping-guans of South America, as *P. jacutinga* and *P. cujubi*.

Pipilo (pip'i-lō), *n.* [NL. (Vieillot, 1816), also *Pipillo*.] 1. A genus of American fringilline birds, of comparatively large size, with short rounded wings, long rounded tail, and large strong feet; the towhee-buntings. The species are numerous, and found everywhere in the United States

Chewink or Towhee-bunting (*Pipilo erythrophthalmus*).

and adjoining parts of British America, in Mexico, Central America, and parts of South America. They inhabit shrubbery, and keep much on the ground. The common towhee, chewink, or marsh-robin is *P. erythrophthalmus*, about 8 inches long, the male boldly colored with black, white, and chestnut, and with red eyes. The female is plain brown and white. Similar species or varieties inhabit all the western parts of the United States. In the southwest, and thence into Mexico, is another set of species, of plain grayish coloration in both sexes, as the brown towhee, *P. fuscus*, or Abert's towhee, *P. aberti*. Some greenish forms also occur, as Blanding's finch, *P. chlorurus*.

2. [*c.*] A species of this genus.

piping (pi'ping), *n.* [Verbal *n.* of *pipel*, *v.*]

1. The act of one who pipes.

As Poetrie and Piping are Cosen germans: so piping and playing are of great affinity.
Gosson, Schoole of Abuse.

2. The sound of playing on a pipe or as on a pipe; the music of pipes.—3. Weeping; crying.

He got the first brash at Whitsunday put ower w' fair word and piping.
Scott, Redgauntlet, letter xi.

4. A system of pipes; pipes, as for gas, water, oil, etc., collectively.—5. Fluting.—6. A kind of covered cord used for trimming dresses, especially along seams.—7. In harness, leather guards or shields encompassing a trace-chain.—8. A cord-like ornament of icing or frosting on the top of a cake.—9. In jewelry, a support, usually of a baser metal, attached behind a surface of precious metal which is too thin to preserve its shape unsupported.

Another smaller diadem found in another tomb may be noted. It is of gold plate, so thick as to require no piping at the back to sustain it.
Encyc. Brit., XIII, 676.

10. In hort., a mode of propagating herbaceous plants having jointed stems, such as pinks, by

Several genera are recognized in Europe, but only *Pipunculus* in America.

Pipunculus (pi-pung'kū-lus), *n.* [NL. (Latreille, 1802).] A genus of flies, typical of the family *Pipunculidae*, having a seta on the third antennal joint and the head globose. About 40 species are known, 10 of them North American. These flies live on flowers, and the larvae are parasites of other insects, as the European *P. fuscipes* of tiger-beetles.

pip (pi'pi), *a.* [*< pipel + -y.*] Resembling a pipe; formed like a tube; tubular; hollow-stemmed. [Rare.]

In desolate places, where dank moisture breeds
The *pip* hemlock to strange overgrowth.

Keats, *Endymion*, l.

piquancy (pē'kan-si), *n.* [*< piquant(t) + -cy.*] Piquant quality. (a) Agreeable pungency or sharpness, as of flavor or taste. (b) Pleasing cleverness or raciness, as of manner, style, etc.

A mind that tasted no *piquancy* in evil-speaking.

George Eliot, *Mill on the Floss*, vii. 4.

"How disturbed?" inquired Holgrave. "By things without, or by thoughts within?" "I cannot see his thoughts! How should I?" replied Phoebe, with simple *piquancy*.

Hawthorne, *Seven Gables*, xli.

Our American life is dreadfully barren of those elements of the social picturesque which give *piquancy* to anecdotes.

Lowell, *Study Windows*, p. 91.

(c) Keeness; sharpness; tartness; severity, as of remark or utterance.

Commonly also satirical taunts do owe their seeming *piquancy*, not to the speaker or his words, but to the subject and the hearer.

Barrow, *Sermons*, l. xiv.

piquant (pē'kant), *a.* [Formerly also *piequant*; *< F. piquant* (= Sp. Pg. *picante* = It. *piccante*), stinging, pungent, piercing, keen, sharp, ppr. of *piquer*, prick, pierce, sting: see *pikel*, *v.*, and cf. *piquet*.] 1. Of an agreeable pungency or sharpness of taste or flavor; sharp; stinging; biting: as, sauce *piquant*.

He can marinate fish, make Gellies; he is excellent for a *piquant* sauce.

Howell, *Letters*, l. v. 36.

There are . . . vast mountains of a transparent rock extremely solid, and as *piquant* to the tongue as salt.

Addison, *Remarks on Italy*.

Then shortened each stirrup, and set the *piquet* right.

Browning, *From Ghent to Aix*.

2. A point of conduct; punctilio.

Add long prescriptions of established laws
And *piquet* of honour to maintain a cause.

Dryden, *Hind and Panther*, III. 401.

The ambassador appeared before the Council early in the following month, and demanded, of his own motion, that her [Mary's] officers should be released, and her privilege of worship restored until the Emperor were certified of the position of things. He was told that he spoke without warrant, and could have no answer from the King, and was warned not to move those *piques* without commission.

R. W. Dixon, *Hist. Church of Eng.*, xvii.

3. (a) A blind tick, *Argas nigra*, capable of causing painful sores on cattle and men. See *Argas*. (b) The jigger, chigoe, or chique. See *Sarcophylla*.—4. In the game of piquet, the winning of thirty points before one's opponent scores at all in the same deal, entitling the winner to add thirty more to his score.

piquet (pēk), *v. t.*; pret. and pp. *piqued*, ppr. *piquing*. [Formerly also *picque*; *< pique*, *n.*, 4.] To win a pique from. See *piquel*, *n.*, 4.

If I go to piquet, though it be but with a novice in 't,
He will *piquer*, and repique, and capot me twenty times together.

Dryden, *Sir Martin Mar-All*, l.

piquet (pēk), *v. t.*; pret. and pp. *piqued*, ppr. *piquing*. [*< F. piquer*, prick, sting, nettle, gall, pique: see *pikel*, *pikel*, *v.* Cf. *piquel*.] 1. To

sting, in a figurative sense; nettle; irritate; offend; fret; excite a degree of anger in.

Addison.

He had been crossed in love, and had offered his hand from *piquet* to a lady who accepted it from interest.

Peacock, *Nightmare Abbey*, l.

= *Syn.* 2. *Pique* and *umbrage* differ from the words compared under *animosity* (which see) in that they are not necessarily or generally attended by a desire to injure the person toward whom the feeling is entertained. They are both purely personal. *Pique* is more likely to be a matter of injured self-respect or self-conceit; it is a quick feeling, and is more fugitive in character. *Umbrage* is founded upon the idea of being thrown into the shade or overshadowed; hence, it has the sense of offense at being slighted or not sufficiently recognized; it is indefinite as to the strength or the permanence of the feeling.

piquet (pē-kā'), *a.* [*F.*, prop. pp. of *piquer*, pierce, sting: see *piquel*, *v.*, and cf. *piquant*.] Slightly soured; beginning to have an acid taste: said of wine which has been exposed to heat, or left insufficiently corked. Also *pricked*.

piquet (pē-kā'), *n.* and *a.* [*F.*, *< pique*, pp. of *piquer*, prick, pierce: see *piquel*, *v.*] 1. *n.* 1. A cotton material so woven as to have a small pattern in relief, usually rather thick and stiff, used for waistcoats, children's clothing, etc.

Alpacas, Printed Muslins, or *Piqués* may also be cleaned.

piquillin (pi-kwil'in), *n.* [*S. Amer.*] A bush, *Condalia microphylla*, of the *Rhamnaceæ*, found in Chili and the Argentine Republic. It bears an edible sweet and succulent drupaceous fruit.

piracy (pi'rā-si), *n.* [*< ML. piratia*, for *L. piratica*, piracy, fem. of *piraticus*, piratic: see *piratic*.] 1. Robbery upon the sea; robbery by pirates; the practice of robbing on the high seas.

Specifically, in the law of nations, the crime of depredations or wilful and aggressive destruction of life or property committed on the seas by persons having no commission or authority from any established state. As commonly used it implies something more than a simple theft with violence at sea, and includes something of the idea of general hostility to law. According to the opinion of some, it implies only unlawful interference with a vessel; according to others, it includes also depredations on the coast by a force landing from the sea. The slave-trade was declared piracy by statute in the United States May 15, 1820, by Great Britain in 1824, and since the treaty of 1841 by Austria, Prussia, and Russia.

The trauel thither [to Japan] both for clull discord and great *piracie*, and often shipwracks, is very dangerous.

Hakluyt's *Voyages*, II. ii. 30.

Piracy is robbery on the sea, or by descent from the sea upon the coast, committed by persons not holding a commission from, or at the time pertaining to, any established state.

Woolsey, *Introduct. to Inter. Law*, § 137.

2. Literary theft; any unauthorized appropriation of the mental or artistic conceptions or productions of another; specifically, an infringement of the law of copyright.

piral (pi-ri'), *n.* Same as *piraya*.

pirameter (pi-ram'e-tēr), *n.* [*Irreg. < Gr. περᾶν*, try, test, + μέτρον, measure.] An instrument or apparatus for testing the relative resistance of roads to the draft of vehicles. The original instrument was a rude form of dynamometer dragged on the ground, and indicating resistance by a finger on a dial.

Draft-springs with graduated scales, resembling the ordinary spring-scales for weighing, are now used, the draft-power being applied directly to the springs. Also spelled *perameter*.

pyramidig (pi-ram'i-dig), *n.* [So called, it is said, from its note.] Same as *night-hawk*, 1.

pyramist, *n.* See *pyramis*.

pyramuta (pi-rā-mō'tā), *n.* [*Braz.*] A siluriform fish, *Piramutana pyramuta*, of the common South American catfish type, but with teeth on the palate and with granulated head. It occurs in the Rio Negro and Rio Madeira.

Piranga (pi-rang'gā), *n.* [*NL.* (Vieillot, 1807), also *Pyrranga* (Vieillot, 1816).] A genus of *Tanagridæ*, having the beak dentate near the middle of the tomlia. It is the only genus which is extensively represented in North America. There are several species, extending from Canada to Chili. The common scarlet tanager

Rose-throated Tanager (*Piranga roseigularis*).

ger or black-winged redbird of the United States is *P. rubra*, the male of which is scarlet, with black wings and tail, and the female greenish and yellowish. The summer redbird is *P. aestiva*; the male is entirely rose-red. The Louisiana tanager, *P. ludoviciana*, extensively distributed in the western parts of the United States, is bright-yellow with a black back and wings and scarlet head. The rose-throated tanager, *P. roseigularis*, is a rare and beautiful species found in tropical America. The genus is also called *Phenicocoma*. See also *under tanager*.

pyrate (pi'rāt), *n.* [Formerly also *pirat*, *pyrate*, *pyrat*; = D. *piraat* = G. Sw. Dan. *pirat*; *< OF. pirate*, *F. pirate* = Sp. Pg. It. *pirata*, *L. pirata*, a pirate, *< Gr. περᾶς*, a pirate, lit. one who at-

tacks or attempts, < *πειράω*, attempt, try, attack, < *πειρά*, an attempt, trial, attack, assault, akin to *παρά*, pass over or through, pass, < *πέρος*, passage, etc., and to *E. fare*: see *fare*. Cf. *empiric*, etc.] 1. One who without authority and by violence seizes or interferes with the ship or property of another on the sea; specifically, one who is habitually engaged in such robbery, or sails the seas for the robbery and plunder of merchant vessels; a freebooter or corsair; a sea-robber. See *piracy*.

There be land-rats and water-rats, water-thieves and land-thieves, I mean pirates. *Shak.*, M. of V., I. 3. 25.

Nor swelling seas, nor threatening skies,
Prevent the Pirate's Course.

Congress, Pindaric Odes, II.

2. An armed vessel which sails without a legal commission, for the purpose of plundering other vessels indiscriminately on the high seas. — 3. A publisher, compiler, or bookseller who appropriates the literary or artistic labors of an author without compensation or permission; specifically, one who infringes on the copyright of another.

Mores refers to them [Shakespeare's "Sonnets"] in 1598 in a manner which implies that though unpublished they were well known among the poet's private friends, . . . and in 1599 two of them were printed by the pirate Jaggard. *Shakespeareana*, VI. 106.

4. Any pirate-perch. = Syn. 1. *Thief, Brigand*, etc. (see *robber*), corsair, buccaner.

pirate (pí-rát), *v.*; pret. and pp. *pirated*, ppr. *pirating*. [*< pirate, n.*] I. *intrans.* 1. To play the pirate; rob on the high seas.

They robbed by land, and pirated by sea. *Arbutnot*.
2. To appropriate and reproduce the literary or artistic work of another without right or permission; specifically, to infringe on the copyright of another.

I am told that, if a book is anything useful, the printers have a way of *pirating* on one another, and printing other persons' copies; which is very barbarous.

W. King, Art of Cookery, letter VII.

We are doing all the *pirating* in these days; the English used to be in the business, but they dropped out of it long ago. *New Princeton Rev.*, V. 50.

II. *trans.* 1. To commit piracy upon; play the pirate toward.

In the year 698, a puissant Pirat named Abochapeta, passed from Asia into Africa, leading with him 70 Gallies, and 100 other vessels furnished for his exploits, with which he pillaged and *pirated* such as he met with all by Sea. *Guevara, Letters* (tr. by Hellowes, 1577), p. 329.

2. To appropriate and publish without permission or legal right, as books, writings, etc.; use or reproduce illegally.

They advertised they would *pirate* his edition. *Pope*.
It [Gallman's] edition of Coleridge, Shelley, and Keats was a *pirated* book, and I trust I may be pardoned for the delight I had in it. *Lovell, Coleridge*.

pirate-fish (pí-rát-fish), *n.* The glutinous hag, *Myxine glutinosa*. [Local, Eng.]

pirate-perch (pí-rát-pérch), *n.* A fish of the family *Aphredoderidae*, *Aphredoderus sayanus*, of the United States: so named from its voracity.

Pirate-perch (*Aphredoderus sayanus*).

This fish is of a dark-olive color profusely dotted with black, and has two dark bars at the base of the caudal fin. It is notable for the peculiar fins and the position of the anus, which in the adult is under the throat. It occurs in sluggish streams and bayous coastwise from New York to Louisiana and westward to Illinois. It reaches a length of about 5 inches. See *Aphredoderus*.

Pirates (pí-rá-téz), *n.* [NL. (Burmeister, 1835), < Gr. *πειράτης*, a pirate: see *pirate*.] A genus of reduvioid bugs, typical of a subfamily *Piratinæ*, having the third joint of the hind tarsi as long as the first and second joints together, and that part of the head which bears the ocelli slightly elevated. They are predaceous, and inhabit both North and South America. *P. biguttatus*, sometimes called the two-spotted corsair, occurs from Virginia and Florida to California. It lurks in the branches of trees and bushes for its insect prey, and has been found in houses in beds, where it is supposed to have come in search of bedbugs.

Two-spotted Corsair (*Pirates biguttatus*).

piratic (pí-rát'ik), *a.* [= F. *piratique* = Sp. *piratico* = Pg. It. *piratico*, < L. *piraticus*, < Gr. *πειρατικός*, of or belonging to a pirate, < *πειράτης*, a pirate: see *pirate*.] Same as *piratical*.

piratical (pí-rát'ik-ál), *a.* [*< piratic + -al.*] 1. Of or pertaining to a pirate or piracy; of the nature of piracy: as, *piratical* acts.

All naval war, not only during the middle ages but down to the seventeenth century, was more or less *piratical*.

Stubbs, Medieval and Modern Hist., p. 190.

2. Engaged in piracy, or robbery on the high seas: as, a *piratical* ship or commander. — 3. Pertaining to or practising literary piracy: as, *piratical* publishers.

The errors of the press were . . . multiplied . . . by the avarice and negligence of *piratical* printers.

Pope, Letters, Pref.

piratically (pí-rát'ik-ál-i), *adv.* In a *piratical* manner; by piracy.

piratously (pí-rá-tus-li), *adv.* [*< "piratous" (< pirate + -ous) + -ly.*] *Piratically*.

Divers merchants . . . have had their goods *piratously* robbed and taken. *State Trials*, Lord Seymour, an. 1549.

piraya (pí-rá'yá), *n.* [S. Amer.] A voracious characinoid fish, *Serrasalmo piraya*, of tropical America. It has a deep compressed body with a keeled serrated belly. The mouth is moderate, but its jaws are armed with lancet-shaped teeth as sharp as those of the shark. Cattle when fording rivers are sometimes badly bitten by it. The natives of Guiana sharpen their tiny arrows for the blow-gun by drawing them between two of the teeth, which shave them to a point with their sharp edges. The fish sometimes becomes 3 or 4 feet in length. Also called *caribe* and *pirat*. See cut under *Serrasalmo*.

pire¹, *v. i.* A Middle English form of *peer*¹.

pire², *n.* A Middle English form of *pearl*.

pire³, *n.* An obsolete form of *pier*.

piriet, *n.* A Middle English form of *pearl*.

piriform (pí-rí-fórm), *a.* [*< L. pírūm, a pear, + forma, form.*] Having the form of a pear; pear-shaped.

piri-jiri (pí-rí-jé-ri), *n.* [Tasmanian.] A wiry branching herb, *Holoragis micrantha* (*Gonocarpus citriodora*), found from the mountains of India to Japan and southeastward to Australia and Tasmania. Its leaves are said to be scented.

piriwhit, *n.* Same as *perry*¹.

pirk (pérk), *v.* Same as *perk*².

piri (pér), *v.* and *n.* See *pur*¹.

pirle-pig (pér-li-pig), *n.* A tirelire or money-box. [Scotch.]

pirn (pérn), *n.* [*< ME. pyrne; origin obscure: cf. pirl, pur*¹.] It is glossed by ML. *panus*.] Anything that revolves or twists. (a) A shuttle.

Pyrrus of a webstarys lome, panus. *Prompt. Parv.*, p. 462.

(b) The reel attached to a fishing-rod for winding up the line. (c) A roll of any sort. (d) A stick for twisting on the nose of refractory horses. *Wright*. (e) A bobbin; a spool; a reel. [Scotch.] (f) The amount of thread or line wound at one time upon a shuttle or reel.

pirnie (pí-rí-ní), *n.* A striped woolen nightcap made in Kilmarnock, Scotland. *Simmonds*. [Scotch.]

Pirogoff's operation. See *operation*.

piroque (pi-róg'), *n.* [Also *perogue*; = G. *piroque* = Dan. *piroge* = Sw. *pirog*, *pirok* = It. Pg. *piroga*; < F. *piroque*, < Sp. *piragua*, a canoe, dug-out (see *peragua*); orig. W. Ind.] 1. A canoe made from the trunk of a tree hollowed out. Pirogues are sometimes large, decked, rigged with sails, and furnished with outriggers. In Louisiana the terms *piroque* and *canoe* are used indifferently. See *peragua*; 2.

A number of officers, with three hundred and twenty soldiers, twenty women, and seventeen children, left New Orleans on the 27th of February, under the command of an officer named Loftus, in ten boats and two *piroques*. *Gayarré, Hist. Louisiana*, II. 102.

The earliest improvement upon the canoe was the *Pi-roque*, an invention of the whites. Like the canoe, this is hewed out of the solid log; the difference is that the *pi-roque* has greater width and capacity, and is composed of several pieces of timber—as if the canoe was sawed in two equal sections and a broad flat piece of timber inserted in the middle, so as to give greater breadth of beam to the vessel. This was probably the identical process by which Europeans, unable to procure planks to build boats, began in the first instance to enlarge canoes to suit their purposes.

James Hall, Notes on the Western States (1838), p. 218.
On rounding a point a *piroque*, skillfully paddled by a youth, shot out.

S. L. Clemens, Life on the Mississippi, App. A, p. 597.
The white and the red man were on most friendly terms, and the birch canoe and *piroque* were seen carrying, in mixed company, both races.

W. Barrows, Oregon, p. 39.

2. Same as *peragua*, 3.

Piroque.—In modern usage in America, a narrow ferry-boat, carrying two masts and a leeboard. *Webster*, 1828.

She is what they call a *piroque* here [West Indies], but not at all what is called a *piroque* in the United States: she has a long narrow hull, two masts, no deck: she has usually a crew of five, and can carry thirty barrels of stuff. *Harper's Mag.*, LXXIX. 351.

piroque-rig (pi-róg'rig), *n.* A boat's rig consisting of two leg-of-mutton sails. See *bateau*. [Florida.]

pirol (pí-ol), *n.* [= Dan. *pirol*, < G. *pirol*, *pi-rol*, < ML. *pirulus*, *pyrrhula*, an oriole, < Gr. *πυρρίλας*, some red or yellow bird, cf. *πύρρα*, some red or yellow bird, < *πύρρος*, flame-colored, red or yellow, < *πύρ*, fire: see *fire*.] The European oriole, *Oriolus galbula*. See first cut under *oriole*.

piquette (pí-ò-et'), *n.* [Formerly also *piroet*; < F. *piquette*, a whirligig, a whirling about, a pirouette in dancing; OF. also *piroet*, m.; also *pirevollet*, a whirligig (Cotgrave); dim. of F. dial. *piroue*, a whirligig, a little wheel; cf. *pírr*, *pirry*.] 1. In dancing, a rapid whirling on one leg or on the points of the toes, as performed by ballet-dancers. — 2. In the *manège*, a quick, short turn or whirl of a horse.

piquette (pí-ò-et'), *v. t.*; pret. and pp. *piquetted*, ppr. *piquetting*. [*< F. pirometer, perform a pirouette, < pirometer, a pirouette: see pirometer, n.*] To perform a pirouette; turn or whirl on one leg, or on the toes, as in dancing; advance or move along in a series of pirouettes, or short graceful turns, as a horse.

The mountain stir'd its bushy crown,

And, as tradition teaches,

Young ashes *piquetted* down,

Coquetting with young beeches.

Tennyson, Amphion.

pírr (pér), *n.* [Cf. *birr*¹ and *pirry*.] A gentle wind. [Scotch.]

pirreyt, *n.* An obsolete form of *perry*¹.

pirry (pí-rí), *n.* [Early mod. E. also *pirrie*, *perry*, *perrie*, *pyrry*, *pirie*; < ME. *pirie*, *pyrie*, *perrie*, *pyry*, also *berry*, *berrie*, < Gael. *pioradh* = Ir. *piorra*, a squall, blast. Cf. *pírr* and *birr*¹.] A storm of wind; a squall or gust. *Palgrave*.

For sodatnly there rose a strange storme and a quicke *pirie*, so mischevous and so pernicious that nothing more execrable, or more to be abhorred, could happen in any Christian region. *Hall, Henry VI.*, I. 55. [*Halliwel*].

A *pirrie* came, and set my ship on sands.

Mir. for Mag., p. 502. [*Nares*.]

Nat men and children only, but also . . . horses . . . shulde [by learning to swim] more aptly and boldly passe over great riuers, . . . and nat be afere of pirones or great stormes. *Sir T. Elyot, The Governour*, I. 17.

Pisan¹ (pé-zan), *a. and n.* [*< Pisa* (see *def.*) + *-an*.] I. *a.* Of or relating to the city of Pisa in northern Italy, or its inhabitants, or its characteristic school of art; of or relating to the province of Pisa.

II. *n.* An inhabitant of Pisa.

pisan², *n.* [Also *pysane*, *pizain*, *pizaine*, *pysane*; origin obscure.] A part of the armor of the breast and neck; a gorget or plastron. Also *pizan-collar*.

pisante (pi-zá-nít), *n.* [Named after M. Pisani, a French mineralogist.] A hydrous sulphate of iron and copper, allied to the iron sulphate melanterite.

pisasphalt, *n.* See *pissasphalt*.

piscary (pí-ská-ri), *n.* [*< L. piscarius*, belonging to fish, < *piscis*, fish, = E. *fish*: see *fish*¹.] In law, the right or privilege of fishing in another man's waters.—Common of piscary. See *common*, 4.

piscation (pí-ská-shon), *n.* [= It. *pescagione*, < LL. *piscatio* (n-), a fishing, < L. *piscatus*, pp. of *piscari*, fish, < *piscis*, fish: see *fish*¹.] The art or practice of fishing.

There are extant of his [Oppian's] in Greek . . . five [books] of *Haliectica* or *piscation*. *Sir T. Browne, Vulg. Err.*, I. 8.

piscatology (pí-ská-tol'ô-jí), *n.* [Improp. < L. *piscari*, pp. *piscatus*, fish, + Gr. *-λογία*, < *λέγω*, speak.] The scientific study of fishes; ichthyology. *Atwater, Logic*, p. 217.

piscator (pí-ská-tor), *n.* [L., a fisherman, < *piscari*, pp. *piscatus*, fish: see *piscation*.] An angler; a fisherman. *I. Walton*.

Piscatores (pí-ská-tó-réz), *n. pl.* [NL.: see *piscator*.] In Blyth's system (1849), a group of totipalmate birds corresponding to the *Steganopodes* or *Totipalmatæ* of most authors; the fishers.

piscatorial (pí-ská-tó-ri-ál), *a.* [= F. *piscatorial*; as *piscatory* + *-al*.] Same as *piscatory*.

piscatory (pí-ská-tó-ri), *a.* [= Sp. Pg. It. *piscatorio*, < L. *piscatorius*, belonging to fishermen, < *piscator*, a fisherman: see *piscator*.] Pertaining to fishing or to fishermen; connected with angling; given or devoted to fishing.

On the face of this monument . . . is represented, in bas-relief, Neptune among the Satyrs, to show that this poet was the inventor of *piscatory* eclogues.

Addison, Remarks on Italy.

piscatrix (pis-kā'triks), *n.* [L., fem. of *piscator*, a fisherman.] 1. The feminine of *piscator*.—2. [cap.] [NL.] A genus of gannets of the family *Sulidae*, the type of which is *Sula piscator*. See *Sula*. Reichenbach, 1853.

Pisces (pis'ez), *n. pl.* [L., the Fishes, a constellation; *pl. of piscis*, a fish: see *fish*¹.] 1. A constellation and sign of the zodiac (♓); the Fishes. The figure represents two fishes united by a

ribbon attached to their tails. One of the fishes is east, the other south, of the square of Pegasus.

2. In *zool.*, a class of vertebrates, the fishes, to which different limits have been assigned. See *fish*¹.

pisciculture (pis'i-kap-tūr), *n.* [*< L. piscis*, fish, + *captura*, taking: see *capture*.] The taking of fish by any means, as angling or netting. [Rare.]

Snatching is a form of illicit *pisciculture*.

Standard, Oct. 21, 1878. (Davies.)

piscicolous (pi-sik'ō-lus), *a.* [*< L. piscis*, fish, + *colere*, inhabit.] Parasitic upon or infesting fishes, as fish-lice.

piscicultural (pis-i-kul'tūr-al), *a.* [*< pisciculture* + *-al*.] Of or pertaining in any way to pisciculture; fish-cultural.

pisciculture (pis'i-kul'tūr), *n.* [= *F. pisciculture* = *Pg. piscicultura*, *< L. piscis*, fish, + *cultura*, cultivation: see *culture*.] The breeding, rearing, preservation, feeding, and fattening of fish by artificial means; fish-culture. Pisciculture has been practised from very early ages. It appears to have been in use in ancient Egypt, and was followed in China in early times on a very large scale. It was introduced in Great Britain by Mr. Shaw of Drumlanrig, in Dumfriesshire, Scotland, in 1837. An important branch of modern pisciculture is the propagation and rearing of young fish in artificial ponds, with the view of introducing fish previously not found in the locality, or of increasing the supply of desirable food-fishes. Salmon and trout-ova sent from Great Britain have been successfully propagated in Australia and New Zealand. Of late years America has taken the lead in fish-culture, under the administration of the United States Fish Commission, and millions of ova and fry have been planted in various rivers.

pisciculturist (pis'i-kul'tūr-ist), *n.* [*< pisciculture* + *-ist*.] One who practises pisciculture, or is devoted to the breeding and rearing of fishes; a fish-culturist.

Piscidia (pi-sid'i-ā), *n.* [NL. (Linnaeus, 1737), *< L. piscis*, fish, + *cadere*, kill.] A genus of plants of the order *Leguminosae*, tribe *Dalbergieae*, and subtribe *Lonchocarpeae*, characterized by wing-petals adherent to the keel, and long thick pods longitudinally four-winged. The only species, *P. erythrina*, a native of the West Indies, is a tree with alternate pinnate leaves, white and red flowers in short lateral panicles, and many-seeded indehiscent linear pods. It is known as *Jamaica* or *white dogwood*, reaches a height of about 35 feet, extends into Florida and Mexico, and produces a valuable, very hard, close-grained wood, yellowish-brown in color and taking a high polish, used in its native region for boat-building, firewood, and charcoal. (For the use of its powdered leaves and twigs to stupefy fish, see *fish-poison*.) Its gray or brown acrid bark is imported into the United States for its narcotic properties.

piscifactory (pis'i-fak-tō-ri), *n.* [*< L. piscis*, fish, + *E. factory*.] A place where pisciculture is carried on. [Rare.]

The establishment in 1850 at Huningue (Hünningen) in Alsace by the French Government of the first fish-breeding station, or *piscifactory*, as it was named by Professor Coste, is of great significance. *Encyc. Brit.* XIX. 128.

piscifaua (pis'i-fā-nā), *n.* [*< L. piscis*, fish, + *NL. fauna*: see *fauna*.] The fauna of any region or country, in so far as it is composed of fishes: correlated with *avifauna*. See *fauna*.

pisciform (pis'i-fōrm), *a.* [= *F. pisciforme*, *< L. piscis*, fish, + *forma*, form.] Having the form of a fish; like a fish in shape; technically, fish-like in structure or affinities; ichthyopsidan; ichthyomorphic.

piscina (pi-sī'nā), *n.*; *pl. piscine* (-nē). [L.: see *piscine*¹.] 1. A basin or tank, usually ornamental, as for a fountain or a bath; sometimes, a large shallow vase for ornamental fishes or aquatic plants; also, any tank or cistern of moderate size.

In the garden of the *piscina* [at Fontainebleau] is an Hercules of white marble. *Keelyn, Diary*, March 7, 1644. 2. *Eccles.*, a stone basin, in old churches generally established within a canopied niche placed close to the altar, used to receive the water in

haut, which is 30 degrees south of the equator, and is in opposition on the 3d of September. The figure represents a fish which swallows the water poured out of the vase by Aquarius.

Piscis Volans (pis'is vō'lanz). [NL.: *L. piscis*, fish; *volans*, flying: see *volant*.] The Flying-Fish, one of the southern constellations introduced by Theodori, or Keyser, at the end of the sixteenth century. It is situated west of the star β Argus, and contains two stars of the fourth magnitude. Also called *Volans*.

piscivorous (pi-siv'ō-rus), *a.* [= *F. piscivore* = *Pg. lt. piscivoro*, *< L. piscis*, fish, + *vorare*, devour.] Fish-eating, as a bird; habitually eating or feeding upon fishes; ichthyophagous.

The meat is swallowed into the crop, or into a kind of antestomach observed in *piscivorous* birds.

Ray, Works of Creation.

pisé (pē-zā'), *n.* [F., *< piser*, build in pisé, *< L. piserere*, *pinsere*, beat, pound, bray, crush.] In arch., stiff earth or clay, as used to form walls

or floors, being rammed down until it becomes firm. This method is as old as the days of Miny, and is still employed in France and in some parts of England.

piagy (piz'gi), *n.* A dialectal form of *piety*.

pish (pish), *interj.* [Imitative of a sound made to show contempt.] An exclamation of contempt.

It is not words that shake me thus. *Pish!* Noses, ears, and lips.—Is 't possible? *Shak.*, Othello, iv. 1. 42

pish (pish), *v. I. intrans.* To express contempt by or as by the exclamation "Pish!"

Our very smiles are subject to constructions;
Nay, sir, it's come to this, we cannot *pish*
But 'tis a favour for some fool or other.

Fletcher, Wit without Money, III. 1.

Bob. This is a Toledo! Pish!

Step. Why do you *pish*, captain?

E. Johnson, Every Man in his Humour, III. 1.

II. trans. To say "Pish!" to.

Hor. Pish; ha, ha!

Lup. Dost thou *pish* me? Give me my long sword.

E. Johnson, Poetaster, v. 1.

pishamin (pish'a-min), *n.* Same as *persimmon*.—Sweet and sour *pishamin*, in Sierra Leone, two climbing shrubs, *Carpodinus dulcis* and *C. acida*, of the *Apoynaceae*, bearing edible fruits resembling the persimmon: so called by colonists from the southern United States.

pishaug (pi-shāg'), *n.* [Amer. Ind.] The female or young of the surf-scooter, a duck, *Edeusia peropillata*. [Massachusetts.]

pish-pash (pish'pash), *n.* [E. Ind.] A broth of rice mixed with small bits of meat, much used as food for Anglo-Indian children.

It [a child] surfeits itself to an apoplectic point with *pish-pash*; it turns its mouth with hot curry, and bawls. *J. W. Palmer*, The New and the Old, p. 341.

pishmew (pish'i-mū), *n.* A small white gull. [New Eng.]

Pisidiidae (pi-si-di'i-dē), *n. pl.* [NL., *< Pisidium* + *-idae*.] A family of dimyarian bivalves, typified by the genus *Pisidium*.

They have the branchial and pedal orifices confluent, the anal siphonate, the foot large, the shell equivalent and oval or cuneiform, with the area in front of the umbones larger than that behind, the hinge with two divergent cardinal teeth in each valve and four lateral teeth in the right and two in the left valve, and an external ligament. These small bivalves inhabit fresh water, and are remarkable for the posterior position of the umbones.

in which the individual grains or globules are as large as peas. This mode of occurrence is very characteristic of certain parts of the Oolitic or Jurassic series in England. (See *pea-grit*.) The name "Coral-lag and Pisolite" was given by W. Smith, in 1815, to what

are now generally called the "Corallian beds," a member of the Middle Oolitic series in England. Also *peastone*. *pisolitic* (pi'sō-lit'ik), a. [*< pisolite* + *-ic*.] Having the structure indicated by the term *pisolite*: as, *pisolitic* iron ore, etc. See *pisolite*.—*Pisolitic limestone*, a division of the Cretaceous, of some importance in the north of France, where it lies unconformably in patches on the top of the white chalk.

Pisonia (pi'sō-ni-ā), n. [NL. (Linnaeus, 1737), named after Dr. *Pison*, a traveler in Brazil.] A genus of trees and shrubs, of the order *Nyctaginæ*, type of the tribe *Pisoniæ*, characterized by the terminal stigma and six to ten exerted stamens. There are about 60 species, mainly of tropical America. They bear opposite or scattered oblong-ovate or lanceolate leaves, small dioecious rose, yellow, or greenish funnel-shaped flowers in panicle cymes, and a rigid or stony, rarely fleshy, elongated fruit (an anthercap), often with rough and glutinous angles. Several species are trees cultivated for ornament. *P. Brunoniæ* is the New Zealand para-para tree, a hardy evergreen; others are greenhouse shrubs with green flowers, as the finger or cockspar, a rambling prickly bush of the West Indies with glutinous bur-like fruit, forming thickets. See *bee/wood*, 2, *corckwood*, and *lobolly-tree*.

Pisoniæ (pis-ō-ni-ē-ō), n. pl. [NL. (Bentham and Hooker, 1880), < *Pisonia* + *-æ*.] A tribe of plants of the apetalous order *Nyctaginæ*, characterized by the straight embryo and the elongated utricle included within the enlarged and closed calyx-tube. It includes about 100 species, of 4 genera, *Pisonia* being the type.

pisophalt (pis'ō-falt), n. A corrupt form of *pissasphalt*.

piso-uncinatus (pi-so-un-si-nā'tus), n. [NL., < Gr. *πίσος*, a pea, + *L. uncinatus*, furnished with hooks or tenters, barbed.] A muscle, of rare occurrence, replacing the ligamentum *piso-hamatum*, the short ligament passing from the pisiform to the uncinat bone.

Pistachoes, so they be good, and not musty, joined with almonds, . . . are an excellent nourisher.

Bacon, Nat. Hist., § 50.

They (the Italians) call it *Pistachi*, a fruit much used in their dainty banquets.

Coryat, Crudities, l. 184.

pistachio-green (pis-tā'shiō-grēn), n. A bright green much used in Eastern decoration.

pistachio-nut (pis-tā'shiō-nut), n. The nut of the *Pistacia vera*. It contains a greenish-colored kernel of a pleasant almond-like taste, which is extensively used by the Turks, Greeks, etc., as a dessert-nut or in confections, and is also exported. It yields a wholesome food-oil, which, however, soon becomes rancid. Sometimes called *bladder-nut*. Also *pistachio*, *pistacia-nut*. See *Pistacia*.

pistachio-tree (pis-tā'shiō-trē), n. See *Pistacia*. *Pistacia* (pis-tā'shi-ē), n. [NL. (Linnaeus, 1737), < *L. pistacia*, < Gr. *πιστάκη*, the pistachio-tree: see *pistachio*.] 1. A genus of trees, of the order *Anacardiaceæ* and tribe *Spondiææ*, distinguished as the one apetalous genus of that polypetalous family. The 8 species are natives of western Asia and the Mediterranean region, the Canary Islands, and Mexico.

Branch of Pistachio-tree (*Pistacia vera*) with fruits.

They are large or small trees, exuding a resin (terebinth or mastic), and bearing alternate evergreen or deciduous leaves, pinnate or of three leaflets, and axillary panicles or racemes of small dioecious flowers. (See *mastic*, n., 1, *mastic-tree*, *lentisk*, *balsam-tree*, *terebinth*, *terpentine-tree*, *Chian turpentine* (under *Chian*), *alk*², *alk-grum*, *pistachio-nut*, and *bladder-nut*.) Several species yield useful wood, resins, and galls. The galls of a variety of *P. Khayuk*, of northwestern India, are sold in the Indian bazaars for tanning, and are there known as *kakra singha*.

2. [l. c.] A tree of this genus.

pistacite-rock (pis'tā-sit-rok), n. Same as *epidote*.

pistareen (pis-tā-rēn'), n. [Origin uncertain.] In the West Indies, the peseta.

piste, n. See *pist*¹.

pistell, n. See *pistle*.

pistellert, n. [ME., by aphesis from *epistoller*.] Same as *epistler*.

Pistia (pis'ti-ā), n. [NL. (Linnaeus, 1737), < Gr. *πίσος*, liquid, < *πίνω*, drink.] A genus of monocotyledonous floating water-plants of the order *Araceæ*, constituting the tribe *Pistioideæ*. It is characterized by the absence of perianth, and the position of the solitary or few staminate flowers on the short free apex of a spadix which is adnate below to the small white spathe, and bears at the base a single obliquely globose one-celled ovary with thick style and cup-like stigma. The only species, *P. Stratiotes*, is common throughout the tropics excepting Australia and the Pacific islands. It consists of a rosette of pale pea-green rounded and downy leaves. It floats unattached, its tufts of long feathery roots often not reaching the bottom, and increases by runners, often soon covering ponds and tanks, keeping the water fresh and cool. It bears the name of *tropical duckweed*, and in the West Indies of *water-lattuca*. *pistict* (pis'tik), a. [*< Gr. πιστικός*, in the N. T., qualifying *νάρδος*, nard; taken to mean 'liquid', < *πίσος*, liquid (< *πίνω*, drink). By some identified with *πιστικός*, faithful, genuine, < *πιστός*, faithful, < *πίθεω*, *πίθειν*, persuade, *πίθεσθαι*, *πίθεσθαι*, believe.] An epithet of nard: as, *pistic nard*.

An alabaster box of nard *pistic* was sent as a present from Cambyse to the king of Ethiopia.

pistil (pis'til), n. [= F. *pistil* = Sp. *pistilo* = Pg. It. *pistillo* = G. Sw. *pistill* = Dan. *pistil*, < NL. *pistillum*, a pistil, so called from the resemblance

Pistil.

in shape to the pestle of a mortar; < *L. pistillum*, *pistillus*, a pestle: see *pestle*.] In bot., the female or seed-bearing organ of a flower. A complete pistil consists of three parts, ovary, style, and stigma. The ovary is the hollow part at the base which contains the ovules, or bodies destined to become seeds. The style is simply a prolongation of the ovary, and may sometimes be entirely wanting. The stigma is a part of the surface of the pistil denuded of epidermis, upon which the pollen for fertilizing the ovules is received, and through which it acts upon them. The form of the stigma is very various in different plants, being sometimes a mere knob or point at the apex of the style, a line, or double line, or of several shapes. There are usually several pistils, or at least more than one pistil, in each flower; collectively they are termed the *gynæcium*. See also cuts under *antiscus*, *Lemna*, *lily*, *madder*, *Oxalis*, and *pitcher-plant*.—Compound pistil. See compound¹.

pistillaceous (pis-ti-lā'shius), a. [*< pistil* + *-aceous*.] In bot., of or belonging to the pistil.

pistillary (pis'ti-lā-ri), a. [= F. *pistillaire* = Pg. *pistillar*, < NL. **pistillaris*, < *pistillum*, pistil: see *pistil*.] In bot., of or belonging to the pistil.—*Pistillary cord*, a channel which passes from the stigma through the style into the ovary.

pistillate (pis'ti-lāt), a. [= F. *pistillé*, < NL. *pistillatus*, < *pistillum*, pistil: see *pistil*.] In bot., having a pistil: noting a plant or flower provided with a pistil, and most properly said of one having pistils only. See cuts under *Abietinæ*, *breadfruit*, and *croton*.

pistillation (pis-ti-lā'shqn), n. [*< L. as if *pistillatio* (n.), < *pistillum*, *pistillus*, a pestle: see *pestle*.] The act of pounding with a pestle in a mortar.

The best [diamonds] . . . are so far from breaking hammers, that they submit unto *pistillation*, and resist not an ordinary pestle.

Sir T. Browne, Vulg. Err., ll. 5.

pistillidium (pis-ti-lid'i-um), *n.*; pl. *pistillidæ* (-æ). [NL., < *pistillum*, a pistil, + Gr. *eldos*, form.] In cryptogams, same as *archegonium*.

pistilliferous (pis-ti-lif'e-rus), *a.* [= F. *pistillifère* = Pg. *pistillifero*, < NL. *pistillum*, a pistil, + L. *ferre* = E. bear.] In bot., same as *pistillate*.

pistilline (pis'ti-lin), *a.* [< *pistil* + *-ine*.] In bot., relating or belonging to the pistil.

The *pistilline* whorl is very liable to changes.

Encyc. Brit., IV. 128.

pistillody (pis'ti-lō-di), *n.* [< NL. *pistillum*, pistil, + Gr. *eldos*, form.] In bot., the metamorphosis or transformation of other organs into pistils or carpels. Pistillody may affect the perianth, the sepals, very frequently the stamens, and rarely the ovule. See *metamorphosis*.

Pistioideæ (pis-ti-oi'dē-ē), *n. pl.* [NL. (Durand, 1888), < *Pistia* + *-oides*.] A tribe of monocotyledonous plants, of the order *Araceæ*, consisting of the genus *Pistia*, and distinguished by the unappendaged spadix united to the back of the longer spathe, the two connate stamens, the numerous orthotropous ovules, and the single soft berry which constitutes the fruit.

pistlet, pistelt, n. [ME. *pistel*, *pystyl*, < AS. *pistol*, with apheresis of initial vowel < L. *epistola*, *epistula*, epistle: see *epistle*. For the apheresis, cf. *postle*, ult. < LL. *apostolus*, and *bishop*, ult. < LL. *episcopus*.] An epistle; a communication.

Piers Plowman (C), xvii. 280.

pistle-cloth, *n.* A covering or wrapper for the books of the epistles.

pistol (pis'tol), *n.* [Formerly also *pistoll*; = D. *pistol* = G. *pistole* = Sw. Dan. *pistol*, < OF. *pistole* = Sp. Pg. *pistola*, < It. *pistola*, "a dag or pistol" (Florio); cf. *pistolese*, "a great dagger, a wood-knife" (Florio), OF. *pistoyer*, a dagger; said to have been orig. made at Pistoria, < **Pistola*, now *Pistoia*, a town near Florence, < L. *Pistorium*, a city in Etruria, now *Pistoia*. The name appears to have been transferred from a dagger (a small sword) to a pistol (a small gun). Cf. *pistole*, and *pistolet*, *pistolet*.] A firearm intended to be held in one hand when aimed and fired. It came into use early in the sixteenth century, perhaps as early as 1500, for by 1580 it was common as a weapon of the reiters or German mercenary cavalry,

a, Highland pistol for horseman, 17th century; b, Highland pistol for the belt, 18th century; c, derringer.

who were called *pistoleers* from its use. The early pistol was fitted with the wheel-lock, which was superseded by the flint-lock, and the latter by the percussion-lock. Pistols with more than one barrel have been in use from the introduction of the weapon, those with two having the barrels sometimes side by side, sometimes one over the other. The stock of the pistol has been made of many forms, the old cavalry pistol having it only slightly curved, so that it was held, when pointed at an object, by the right hand, with the lock uppermost, the barrel to the left, the trigger to the right. When accurate aiming was required, as in dueling-pistols, the handle was made much more curved. See *revolver*.—Volta's pistol, a metallic vessel, closed by a cork, containing an explosive mixture of gases which may be ignited by an electric spark.

pistol (pis'tol), *v. t.*; pret. and pp. *pistoled* or *pistollid*, prp. *pistoling* or *pistolling*. [= F. *pistoler*; from the noun.] To shoot with a pistol.

N. Ward, Simple Coblentz, p. 88.

pistol-grip (pis'tol-grip), *n.* A handle, shaped like the butt of a pistol, attached to the under side of the small of the stock of fowling-pieces and rifles. It affords a better hold for the hand than the ordinary form of stock. Also *pistol-hand*. See cut under *gun*.

pistolier, *n.* See *pistoleer*.

pistol-pipe (pis'tol-plp), *n.* In *metal-working*, the twyer of a hot-blast furnace. *E. H. Knight*.

pistol-router (pis'tol-rou'ter), *n.* A form of carpenter's plane; a router having a handle shaped like a pistol-butt.

pistol-shaped (pis'tol-shāpt), *a.* Having the general form of a pistol—that is, partly straight, with a curved addition or extension like the stock of a pistol.

pistol-shot (pis'tol-shot), *n.* 1. The shot from a pistol, or the report from the firing of a pistol.—2. As an estimate of distance, the range, or the approximate range, of a pistol-ball.—3. One who shoots with a pistol; a marksman with the pistol: as, a good *pistol-shot*.

pistol-splint (pis'tol-splint), *n.* In *surg.*, a splint shaped like a pistol, employed especially in fractures of the lower end of the radius.

pistomesite (pis-tō-mēs'it), *n.* [< Gr. *πιστός*, true, + E. *mes(i)ite*.] A carbonate of iron and

magnesium like mesitite, intermediate between magnesite and siderite, but more closely related to the latter.

piston (pis'ton), *n.* [< F. *piston*, a piston, formerly also a pestle, = Sp. *piston*, a piston, < It.

pistone, a piston, var. of *pestone*, a large pestle, < *pestare*, pound, < ML. *pestare*, *pestare*, pound, freq. of L. *pin-sere*, *pisere*, pp. *pistus*, beat, pound: see *pestle*, *pistil*.] 1. In *mach.*, a movable piece, generally of a cylindrical form, so fitted as to fill the sectional area of a tube, such as the barrel of a pump or the cylinder of a steam-engine, and capable of being driven alternately in two directions

Section of Steam-cylinder and Piston.
a, piston; b, piston-rod; c, steam-ports.

by pressure on one or the other of its sides. One of its sides is fitted to a rod, called the *piston-rod*, to which it imparts reciprocating motion, as in the steam-engine, where the motion given to the piston-rod is communicated to the machinery, or by which, on the other hand, it is itself made to move, as in the pump. Two sorts of pistons are used in pumps—one hollow with a valve, used in the suction-pump, and the other solid, which is employed in the force-pump. The latter is also called a *plunger*.

2. In musical wind-instruments of the trumpet family, one of the forms of valve whereby a crook is temporarily added to the tube and the pitch of the tones altered. It is operated by depressing a finger-knob, and thus pushing a plunger into a cylinder. The plunger has channels for changing the direction of the air-column. Pistons have been applied to various instruments, but especially to the cornet, which is therefore called the *cornet-a-piston*.

3. In *organ-building*, a thumb-knob which may be pushed in like a piston, whereby some change in registration is pneumatically effected; a pneumatic coupler or combination knob.

—4. The central retractile part of the acetabulum or sucker of a cephalopod, whose action in producing a vacuum resembles that of the piston of an air-pump.—*Differential piston*. See *differential*.—*Double-piston locomotive*. See *locomotive*.—*Oscillating piston*, an engine-piston which oscillates in a sector-shaped chamber.—*Piston blowing-machine*. See *blowing-machine*.

piston-head (pis'ton-hed), *n.* The disk which is fitted closely to the interior of the cylinder, and is the direct receiver or transmitter of the power developed: distinguished from the *piston-rod*.

piston-knob (pis'ton-nob), *n.* Same as *piston*, 3.

piston-packing (pis'ton-pak'ing), *n.* 1. Any material used to pack or make tight the space between the perimeter of a piston-head and the interior of the cylinder or -barrel in which it moves. Many different materials have been used for piston-packings, among which are hemp (usually in the form of a braided gasket), either by itself or saturated with tallow or mixtures of various oily or fatty materials, india-rubber or compositions of which india-rubber is a principal ingredient, leather, metallic alloys, etc. Piston-packings are usually inserted in a groove or depression in the perimeter of the piston-head, and expanded by mechanical compression to make a steam-tight, air-tight, water-tight, or gas-tight joint.

2. A mechanical device for packing pistons, in which the operation depends more upon the construction than upon the fibrous, plastic, or compressible properties of the packing-material.—*Piston-packing expander*, a steel spring in a piston-head serving to expand the packing against the interior of the cylinder; a piston-spring. *E. H. Knight*.

piston-pump (pis'ton-pump), *n.* A pump consisting of a pump-cylinder or -barrel in which a reciprocating piston works. It is provided with appliances for moving the piston, as a piston-rod or pump-rod, and a hand-lever actuating the pump-rod, or the cross-head of an engine attached to it; an induction-port or -ports covered with valves which permit a fluid to enter the pump-barrel, but prevent its return; and an eduction-port or -ports provided with valves which permit efflux of the fluid from the pump-barrel, but prevent its return. These are the essential features of piston-pumps. They usually also have induction- or suction-pipes, and frequently eduction- or discharge-pipes. See *pump*, *lift-pump*, *force-pump*, *plunger-pump*, and *suction-pump*.

piston-rod (pis'ton-rod), *n.* See *piston*, 1.—*Piston-rod packing*. (a) A material placed in the stuffing-box of a cylinder to make a steam-tight joint about the piston. (b) The stuffing-box of a piston.

piston-sleeve (pis'ton-slēv), *n.* The piston of a trunk-engine, with which the connecting-rod or pitman is directly connected by a pivot. Such a piston has a hollow cylinder (sleeve) cast upon it in order to give it sufficient bearing-length to enable it in itself to perform also the function of a cross-head, the walls of the cylinder then performing the function of the cross-head slides, the pin which directly connects the pitman with the piston taking the place of the ordinary

cross-head pin, and no piston-rod being used. This construction enables the engine to be much shortened in the line of its stroke. See *trunk-engine*.

piston-spring (pis'ton-spring), *n.* A coil around or inside a piston which, by its tension, acts automatically as packing.

piston-valve (pis'ton-valv), *n.* A reciprocating valve resembling a working piston, moved in a tubular passage to open or close a port or ports for alternately admitting steam to or exhausting it from the cylinder of an engine.

piston-wheel (pis'ton-hwēl), *n.* 1. In a rotary engine or pump, a disk or wheel carrying at its outer margin one or more pistons.—2. In a chain-pump, a wheel carrying an endless chain to which are attached pistons working in a tube or barrel. See *rotary engine* (under *rotary*), and *chain-pump*.

piston-whistle (pis'ton-hwis'hl), *n.* A whistle in which, by shortening or lengthening the vibrating air-column through the movement of a piston sliding in the tube (or bell, as it is called in steam-whistles), a sound of varying pitch is emitted. See *Modoc whistle*, under *whistle*.

Pisum (pi'sum), *n.* [NL., < L.: see *pease*, *peal*.] 1. A genus of leguminous plants of the tribe *Vicieæ*, distinguished from the large related genus *Lathyrus* by the dilated summit of the style, which is inflexed and hardened, with reflexed margins above, and bearded on the inner face. There are 2 species, one native of the Taurus in Asia Minor, the other, *P. sativum*, the common garden- and field-pea. *Rhinus*, 1661. See *peal*. 2. In *zoöl.*, a genus of bivalves. *Megerle*, 1811.

pit¹ (pit), *n.* [*ME. pit, put, pyt, pette, putte, pytte*, < AS. *pyt, pytt*, a pit, hole, = OFries. *pet* = D. *put* = OLG. *pute*, MLG. *LG. putte* = OHG. *puzzi, phuzzi, pfuzi*, also *puzza, putza, buzza*, etc., MHG. *butze, bütze, pfütze, G. pfütze* = Icel. *pyttir* = Sw. *puss* = Dan. *pyt* = F. *puits* = Wall. *putz* = Pr. *potz, poutz* = Sp. *poza* = Pg. *poço* = It. *pozzo*, a well, < L. *puteus*, a well, a pit; perhaps orig. a spring of pure water, < √ *pu* in *purus*, pure: see *pure*.] 1. A hole or cavity in the ground, whether natural or made by digging.

And faste by it is a litylle pytt in the Erthe, where the foot of the Pileer is zit entered. *Manderille*, *Travels*, p. 94.

And as the child gan forby for to pace,
This cursed Jew him hent and held him faste,
And kytte his throte, and in a pit him caste.
Chaucer, *Prioress's Tale*, l. 119.

Specifically—(a) An excavation or hole in the ground, covered or otherwise concealed, for snaring wild beasts; a pitfall. (b) A hole dug in the soil of a potato- or turnip-field, for storing potatoes, etc., during the winter. The vegetables stored are usually piled up to some height and covered with earth to keep out the frost. [Great Britain.] (c) In *hort.*, an excavation in the soil, generally covered by a glazed frame, for protecting tender plants, or for propagation. (d) In *foundry*, a cavity scooped in the floor to receive cast-metal. (e) The shaft of a coal-mine, or the mine itself. (f) A vat, such as is used in tanning, bleaching, dyeing, etc.

2. A cavity or depression in the body: as, the pit of the stomach; the armpits.

For person and complexion, they have broad and flat viages, . . . thin haired upon the upper lip and pit of the chin, light and nimble-bodied with short legges.
Purchas, *Pilgrimage*, p. 421.

I found him lying on his bed with his clothes on, his shoes merely slipped off, and his hat held securely over the pit of his stomach. *H. B. Stone*, *Oldtown*, p. 416.

3. A very small depression or dent, such as that left on the flesh by a pustule of the small-pox; a dimple.

Look what a pretty pit there's in her chin!
Middleton, *Spanish Gypsy*, III. 2.

The sandstone surface is distinctly marked by raindrop pits and by ripple or wave marks. *Science*, IV. 273.

4. In *bot.*, one of the pores or thin places in the more or less lignified cell-walls of many plants. The bordered pits, which are especially characteristic of the wood of the *Coniferae*, are composed of two concentric circles, which represent thin spots or pores in the walls of the tracheids. They are very regularly arranged.

5. A hollow or cup.

Flowers on their stalks set
Like vestal primroses, but dark velvet
Edges them round, and they have golden pits.
Keats, *Endymion*, l.

6. A deep place; a gulf; an abyss. Specifically—(e) The grave.

Frendes, I am poor and old,
And almost, God wot, on my pittes brynke.
Chaucer, *Merchant's Tale*, l. 157.

Thou hast brought up my soul from the grave; thou hast kept me alive, that I should not go down to the pit.
Ps. xxx. 3.

6) The abode of evil spirits; hell.

We also saw there the Hobgoblins, Satyrs, and Dragons of the pit.
Bunyan, *Pilgrim's Progress*, p. 131.

Each one reels
Under the load towards the pit of death.
Shelley, *Prometheus Unbound*, II. 4.

7. An inclosed place or area for the exhibition of combats of dogs or cocks, or where dogs are trained or exhibited in killing rats: as, a dog-pit; a cockpit.

Sir Thomas Jermin, meaning to make himself merry, and gull all the cockers, sent his man to the pit in Shoe-lane with an hundred pounds and a dunghill cock, neatly out and trimmed for the battle.
Harl. MS., No. 6395, quoted in *Strutt's Sports and Pastimes*, p. 376.

What though her chamber be the very pit
Where fight the prime cocks of the game for wit.
B. Jonson, *An Epigram on the Court Pucell*.

8. That part of a theater which is on the floor of the house, somewhat below the level of the stage, and behind the usual station of the musicians. In the United Kingdom the name is now often given to the inferior seats behind the stalls. In the United States it has been superseded by *orchestra* or *parquet*.

I and my wife sat in the pit, and saw "The Bondman" done to admiration. *Pepys*, *Diary*, March 26, 1661.

But we, the Actors, humbly will submit,
Now, and at any time, to a full Pit.
Wycherley, *Country Wife*, *Prolog.*

All bad Poets we are sure are Foes,
And how their Number's swell'd the Town well knows;
In shoals I've mark'd 'em judging in the Pit.
Congreve, *Way of the World*, *Epil.*

The Pit is an Amphitheater, fill'd with Benches without Back boards, and adorn'd with green Cloth.
Quoted in *Ashton's Social Life in Reign of Queen Anne*, [II. 6.]

9. Those who occupy the pit in a theater; the people in the pit.

Now, sir, your soliloquy—but speak more to the pit, if you please—the soliloquy always to the pit—that's a rule.
Sheridan, *The Critic*, III. 1.

He [King George IV.] was received with immense acclamations, the whole pit standing up, hurrahing and waving their hands.
Greville, *Memoirs*, Feb. 7, 1821.

10. That part of the floor of an exchange where a special kind of business is carried on: as, a grain-pit; a provision-pit. [U. S.]—11. The cockpit of a ship.—12. The framework in a belfry which supports the pivoted yoke of a swinging bell. *Sir E. Beckett*, *Clocks and Watches*, p. 359. [Now little used.]—*Gjers* soaking-pit, a cavity lined with refractory material, used in metal-working to inclose large ingots, in order to preserve them at a high temperature, and thus avoid the necessity of reheating.—*Olfactory pits*, certain hollows of the embryonic skull which will become nasal passages.—*Pine-pit*, in *hort.*, a pit adapted for raising young plants to replenish pineries.—*Pit and gallows*, in feudal times, the privilege granted by the crown to barons of executing persons convicted of theft by hanging the men on a gallows and drowning the women in a pit. Also *pot and gallows*.—*The bottomless pit*, hell.

And I saw an angel come down from heaven, having the key of the bottomless pit and a great chain in his hand.
Rev. xi. 1.

Your deep-conceited cutpurse, who by the dexterity of his knife will draw out the money and make a flame-coloured purse show like the bottomless pit, but with never a soul in 't.
Middleton, *The Black Book*.

To shoot or fly the pit, to turn tail and try to escape, like a craven cock in a pit.

The whole nation . . . expressing utmost detestation and abhorrence of the Whig principles, which made the whole party shoot the pit and retire.

Roger North, *Examen*, p. 327. (*Davies*.)
We were all to blame to make madam here fly the pit as she did.
Richardson, *Pamela*, II. 308. (*Davies*.)

They lived like beasts and were pitted like beasts.
Granger, *On Ecclesiastes* (1621), p. 213. (*Latham*.)

2. To form a little pit or hollow in; mark with little dents, as by the pustules of the smallpox.

An anasarca, a species of dropsy, is characterized by the shining and softness of the skin, which gives way to the least impression, and remains pitted for some time.
Sharpe.

The red acid acts too powerfully and pits the copper.
Workshop Receipts, 1st ser., p. 172.

3. To impress with rounded cup-like hollows, as the mold for a metal casting which is to have rounded bosses on it.—4. To put or set in the pit or area for fighting; match as contestants or opponents, one against another, as dogs or cocks; used figuratively of any competitors: generally followed by *against*.

The pitting of them [cocks], as they call it, for the diversion and entertainment of man, . . . was, as I take it, a Grecian contrivance.
Archæologia, III. 133.

Socrates is pitted against the famous atheist from Ionia, and has just brought him to a contradiction in terms.
Macaulay, *Athenian Orators*.

II. intrans. To become marked or spotted with pits or depressions; retain the mark of pres-

sure by or as by the fingers: as, in dropsy the skin pits on pressure.

The Carriage Monthly tells its readers how to remove varnish from a panel after it has pitted.
Sci. Amer., N. S., LVII. 276.

Sylvester, tr. of Du Bartas's Weeks, II, The Magnificence.

pita-wood (pē'tā-wūd), *n.* The pith-like wood of *Furcraea* (*Fourcroya*) *gigantea*, used sometimes in Rio Janeiro as a slow-match, and sometimes to line drawers for holding insects.

Pitaya bark. See *bark*² and *Cinchona*.

pit-bottom (pit'bot'um), *n.* In coal-mining, the entrance to a mine and the underground roads in the immediate vicinity, whether at the bottom of the pit or at any point in it beneath the surface at which the cages are loaded. Also *pit-eye*. [*Eng.*]

Pitcairnia (pit-kār-ni-ā), *n.* [*NL.* (L'Héritier, 1786); named after Archibald Pitcairne (1652-1713), professor of medicine at Edinburgh.] A genus of monocotyledonous herbs, of the order *Bromeliaceae*, type of the tribe *Pitcairnieae*, characterized by the terminal raceme with filiform styles and septicidally three-valved capsules. There are about 70 species, natives of tropical America. They bear close-clustered linear short or elongated rigid leaves, generally with spiny margins, and many showy narrow flowers of scarlet, yellow, or other colors, often with large colored bracts. They are considered handsome greenhouse-plants. See *Bromeliaceae*.

Pitcairnieae (pit-kār-ni-ē-ē), *n. pl.* [*NL.* (Bentham and Hooker, 1883), < *Pitcairnia* + *-eae*.] A tribe of plants of the order *Bromeliaceae* and the pineapple family, characterized by the superior ovary, and seeds with linear entire or wing-like appendage. It includes 6 genera, all of tropical America, of which *Pitcairnia* is the type and *Puya* an important genus.

pitch¹ (pitch), *v.*; pret. and pp. *pitched*, formerly *pitcht*, ppr. *pitching*. [*ME.* *picchen*, *pycchen* (pret. *pitchte*, *picte*, pp. *pitcht*, *pygt*), *pitch*, *fix*, *pick*, etc.; assimilated form of *picken*, *picken*, *pick*: see *pick*¹, *v.*] *I. trans.* 1. To pierce with a sharp point; divide with something sharp and pointed; transfix.

Christus, thi sone, that in this world alighte
Upon the crosse to suffre his passoun,
And eek suffred that Longius his herte *pitchte*.

Chaucer, A. B. C., l. 163.

2. To thrust into the ground, as a stake or pointed peg; hence, to plant or fix; set up; place: as, to *pitch* a tent or a camp; to *pitch* the wickets in cricket.

Ther thei *pitcht* the kynges teyntye, by the fairest welle
And the mooste clere that thei hadde seen.

Merrill (E. E. T. S.), II. 150.

Sharp stakes . . .

They *pitched* in the ground.

Shak., 1 Hen. VI., l. 1. 118.

Where he spied a parrot or a monkey, there he was *pitched*; . . . no getting him away.

B. Jonson, Bartholomew Fair, l. 1.

The Southern lords did *pitch* their camp

Just at the bridge of Dee.

Bonny John Seton (Child's Ballads, VII. 281).

After their thorough view of ye place, they began to *pitch* them selves upon their land & near their house.

Bradford, Plymouth Plantation, p. 340.

Wickets were *pitched* at the orthodox hour of eleven a. m.

First Year of a Silken Reign, p. 84.

3. To fix or set in order; array; arrange; set. A hundred shippes full shene with sharp men of army,
Pight full of pepull & mony prise knight.

Destruction of Troy (E. E. T. S.), l. 4066.

There was no need that the book [the Book of Common Prayer] should mention either the learning of a fit, or the unfitness of an ignorant minister, more than that he which describeth the manner how to *pitch* a field should speak of moderation and sobriety in diet.

Hooker, Eccles. Polity, v. 31.

Having thus *pitched* the fields, from either part went a Messenger with these conditions.

Quoted in *Capt. John Smith's Works*, I. 135.

4. To fix, as a rate, value, or price; rate; class; Whose vulture thought doth *pitch* the price so high.

Shak., Venus and Adonis, l. 551.

They *pitched* their commodities at what rate they pleased.

Quoted in *Capt. John Smith's Works*, II. 163.

5. To fling or throw; hurl; toss: as, to *pitch* a pike or a dart; to *pitch* a ball or a penny.

He [his horse] *pitchte* him on the pomel of his heed.

Chaucer, Knight's Tale, l. 1331.

Now, if thou strik'st her but one blow,

I'll *pitch* thee from the cliff as far

As ever peasant *pitched* a bar!

Scott, L. of the L., iv. 23.

As for his cousin Ringwood Twysden, Phil had often entertained a strong desire to wring his neck and *pitch* him down stairs.

Thackeray, Philip, xiii.

6. Specifically, in *base-ball*, to serve (the ball) to the batter. See *base-ball*.—7. In *music*, to determine or set the key (tonality) or key-note of; fix the relative shrillness or height of;

start or set (a piece) by sounding the key-note or first tone: as, to *pitch* a tune high.—8. To pave roughly; face with stones.

A plaine *pitched* walke subdido, that is vnder the open ayre.

Coryat, Crudities, I. 30.

9. In certain card-games, to lead one of (a certain suit), thereby selecting it as trump.—*Pitched battle*. See *battle*¹.—*Pitched work*, in masonry, work in rough stones which are neither thrown down indiscriminately nor laid in regular courses, but let fall into place with approximate regularity, so as to bind one another. It is used in hydraulic engineering for the facing of breakwaters, the upper parts of jetties, etc.

II. *intrans.* 1. To fix a tent or temporary habitation; encamp.

Laban with his brethren *pitched* in the mount of Gilead.

Gen. xxxi. 25.

2. To come to rest; settle down; sit down; alight.

There *pitching* down, once more adieu, said she,

Dull home, which no such seat couldst spread for me.

J. Beaumont, Psyche, II. 19.

And wipe the hive.

Mortimer, Husbandry.

A bud which . . . flowers beneath his sight;

And, in the middle, there is softly *pitch*

A golden butterfly.

Keats, Endymion, II.

3. To fix or decide: with *on* or *upon*.

He's the man I've *pitched* on

My husband for to be.

Margaret of Craignagat (Child's Ballads, VIII. 252).

Pitch upon the best course of life, and custom will render it the most easy.

Tillotson.

Having *pitched* upon a time for his voyage, when the skies appeared propitious he exhorted all his crews to take a good night's rest.

Irving, Knickerbocker, p. 108.

4. To plunge or fall headlong.

Thereupon Zed *pitched* headforemost upon him across the streaming pile, and the couple rolled and pounded and kicked and crushed as before.

W. M. Baker, New Timothy, p. 210.

5. *Naut.*, to plunge with alternate fall and rise of bow and stern, as a ship passing over waves. The motion is most marked when running into a head sea.—6. To throw, toss, or hurl a missile or other object; throw a ball; specifically, in games of ball, to fill the position of pitcher; serve the ball to the batsman.—7. To buck; jump from the ground with the legs bunched together, as a mustang or mule. *Sportsman's Gazetteer*. See *cut* under *buck*².—*Pitch and pay*, pay down at once; pay ready money.

Let senses rule; the word is "*Pitch and pay*";

Trust none.

Shak., Hen. V., II. 3. 51.

To *pitch* in, to begin; set to work with promptness or energy. [*Colloq.*]—To *pitch* into, to attack; assault. [*Colloq.*]

pitch¹ (pitch), *n.* [*< pitch*¹, *v.* In def. 14 an assimilated form of *pick*¹, *n.*, of same ult. origin.] 1. The highest point or reach; height; acme.

Boniface the Third, in whom was the *pitch* of pride, and height of aspiring haughtiness.

Fuller.

2. Height (or depth) in general; point or degree of elevation (or of depth); degree; point.

If a man begin too high a *pitch* in his favours, it doth commonly end in unkindness and unthankfulness.

Bacon, Advancement of Learning, II. 312.

To lowest *pitch* of abject fortune thou art fallen.

Milton, S. A., l. 160.

The chief actor in the poem falls from some eminent *pitch* of honour and prosperity into misery and disgrace.

Addison, Spectator, No. 297.

To such an absurd *pitch* do the Moos'lims carry their feeling of the sacredness of women that entrance into the tombs of some females is denied to men.

E. W. Lane, Modern Egyptians, I. 224.

3. In *acoustics* and *music*: (a) That characteristic of a sound or a tone which depends upon the relative rapidity of the vibrations by which it is produced, a relatively acute or high pitch resulting from rapid vibrations, and a relatively grave or low pitch from slow vibrations. Pitch is therefore coordinate with force, timbre, and duration. It is estimated and stated in terms of the vibration per second of the sounding body. It is experimentally determined either by direct comparison with a standard tuning-fork or by such instruments as the siren. (b) A particular tonal standard or example with which given tones may be compared in respect to their relative height: as, concert *pitch*; French *pitch*. Various standards have from time to time been used or promulgated—as, for example, *classical pitch*, during the last half of the eighteenth century, for the A next above middle C about 415 to 430 vibrations per second; *concert pitch* (commonly called *high pitch*), used in concert and operatic music during the middle of the nineteenth century, varying for the same A from about 440 to 455 vibrations; *French pitch* (commonly called *low pitch*), the diapason normal adopted by the French Academy in 1859, for the same A 435 vibrations; *philosophical pitch*, an arbitrary pitch for middle C, obtained by taking the nearest power of 2, that is, 256 vibra-

tions, or for the next A above about 427 vibrations; *Schellier's pitch*, adopted by the Stuttgart Congress of Physicists in 1834, for the same A 440 vibrations.

Specifically.—4. The height to which a hawk rises in the air when waiting for game to be flushed, or before stooping on its prey.

The greatness of thy mind does soar a *pitch*
Their dim eyes, darkened by their narrow souls,
Cannot arrive at.

Fletcher (and another), False One, v. 4.

5. Stature; height.

So like in person, garb, and *pitch*.

S. Butler, Hudibras, III. iii. 72.

6. Inclination; angle to the horizon.—7. In *mech.*: (a) The distance between the centers of two adjacent teeth in a cog-wheel, measured on the pitch-line, which is concentric with the axis of revolution, and at such a distance from the base of the teeth as to have an equal rate of motion with a similar line in the cog-wheel with which it engages. (b) The distance between the medial lines of any two successive convolutions or threads of a screw, measured in a direction parallel to the axis: the pitch of a propeller-screw is the length measured along the axis of a complete turn. (c) The distance between the paddles of a steamship, measured on the circle which passes through their centers. (d) The distance between the stays of marine and other steam-boilers. (e) The distance from center to center of rivets. (f) The rake of saw-teeth (see *rake*).—8. A throw; a toss; the act by which something is thrown or hurled from one or at something. Specifically, in *base-ball*: (a) A throw or serve of the ball to the batter. (b) The right or turn to pitch the ball.

9. A place on which to pitch or set up a booth or stand for the sale or exhibition of something; a stand. [*Eng.*]

In consequence of a New Police regulation, "stands" or "pitches" have been forbidden, and each coster, on a market night, is now obliged, under pain of the lock-up house, to carry his tray, or keep moving with his barrow.

Mayhew, London Labour and London Poor, I. 12.

10. In *card-playing*, the game all-fours or seven-up played without begging, and with the trump made by leading (pitching) one of a selected suit, instead of being turned up after dealing.

—11. In *mining*, a certain length on the course of the lode, taken by a tributor, or to work on tribute. Also called *tribute-pitch*. [*Cornwall*, *Eng.*, chiefly.]—12. In *floor-cloth printing*, one of the guide-pins used as registering-marks, corresponding to the register-points in lithographic printing.—13. In *naval arch.*, downward angular displacement of the hull of a vessel, measured in a longitudinal vertical plane at right angles with and on either side of a horizontal transverse axis passing through the center of flotation: a correlative of *scend* (which see).—14. An iron crowbar with a thick square point, for making holes in the ground.

Hallivell. [*Prov. Eng.*]—*Auction-pitch*, a game of pitch in which the player entitled to pitch the trump may sell the privilege to the highest bidder, adding the points bid to his score before play, or may reject all bids and himself lead the play, failure to make as many points as the highest bid reducing the pitcher's score correspondingly.—*Gaining pitch*, in a screw propeller, a pitch which increases from the leading edge of the wings to the following edge.

E. H. Knight.—*Head of the pitches*, in *angling*. See *head*.—*Natural pitch*. See *natural*.—*Pitch and hustle*. See *hustle*.—*Pitch and toss*. See *pitch-and-toss*.—*Pitch hyperbola*. See *hyperbola*.—*Pitch of an arch*, the rise or height of an arch.—*Pitch of a plane*, the angle at which the iron is set in the stock.

Common pitch, of 45° from the horizontal line, is used in bench-planes adapted for soft woods; *half pitch*, or 80°, is used in molding-planes for mahogany and other woods difficult to work; *middle pitch*, or 55°, is used in molding-planes for deal and smoothing-planes for mahogany and woods of like character; *York pitch*, or 60° from the horizon, is used in bench-planes for mahogany and other hard or stringy woods, and for wainscoting. The pitch of metal-planes and scraping-planes is 80°.—*Pitch of a roof*, the inclination of a roof. It is expressed in angular measurement, in parts of the span, or in the proportion which the rafters bear to the span. The *common pitch* has a rafter three quarters the length of the span; the *Gothic* has a rafter of the full length of the span; the *Elizabethan*, a rafter longer than the span; the *Greek*, an angle of from 12° to 16°; and the *Roman*, an angle of from 23° to 24°.—*Pitch of a saw*, the inclination of the face of the teeth.

A thick

tenacious resinous substance, hard when cold, the residuum of tar after its volatile elements have been expelled: obtained also from the residues of distilled turpentine. It is manufactured mostly in tar-producing countries, especially Russia. It is largely used to cover the seams of vessels after calking, and to protect wood from the effects of moisture; also medicinally in ointments, etc.

The liquid *pitch* or *tarre* throughout all Europe is boiled out of the torch tree; and this kind of *pitch* serveth to calke ships withall, and for many other uses.

Holland, tr. of Pliny, xvi. 11.

2. The sap or crude turpentine which exudes from the bark of pines. [An improper use.]—3. Bitumen: a word of indefinite meaning used to designate any kind of bituminous material, but more especially the less fluid varieties (maltha and asphaltum).

And the streams thereof shall be turned into *pitch*, and the dust thereof into brimstone, and the land thereof shall become burning *pitch*. Isa. xxxiv. 9.

Burgundy or white *pitch*, the yellowish, hard and brittle, strongly adhesive aromatic resin derived by incision from the Norway spruce, *Picea excelsa*, and probably other conifers: obtained in various parts of Europe, perhaps formerly in Burgundy. It is used as a mild rubefacient, and for non-medicinal purposes. It is often replaced by inferior artificial substitutes.—Canada *pitch*, a resin exuding from the bark of the hemlock-spruce, *Thuja (Abies) canadensis*, in North America. It is used in medicine like Burgundy *pitch*. Also called *hemlock-pitch* and (improperly) *hemlock-gum*.—Elastic mineral *pitch*. See *elastic*.—Jew's *pitch*, mineral *pitch*; bitumen.—Mineral *pitch*. See *mineral*.

*pitch*² (pich), v. t. [*ME. pitchen* (= Sw. *becka* = Dan. *bege*); from the noun.] 1. To smear or cover over with *pitch*: as, to *pitch* the seams of a ship.

Then into a *pitched* potte he wol hem glene [collect], Or salt water con day and nyght hem lene.

Palladius, Husbandrie (E. E. T. S.), p. 90.

Great and well *pitched* Cables were twined about the masts of their shippes. Hakluyt's Voyages, I. 593.

Pitch it (the ark) within and without with *pitch*. Gen. vi. 14.

2. To make *pitch-dark*; darken. [Rare.]

The welkin *pitched* with sudden cloud. Addison.

3. In *brewing*, to add to (wort) the yeast for the purpose of setting up fermentation.—*Pitched paper*. See *paper*.

*pitch*³ (pich), v. i. [An assimilated form of *pick*⁴, var. of *peak*².] To lose flesh in sickness; fall away; decline. Halliwell. [Prov. Eng.]

pitch-and-toss (pich'and-tos'), n. A game in which the players *pitch* coins at a mark, that one whose coin lies nearest to the mark having the privilege of tossing up all the coins together and retaining all the coins that come down "head" up. The next nearest player tosses those that are left, and retains all that come down "head" up, and so on until the coins are all gone.

Two or three chimney sweeps, two or three clowns Playing at *pitch and toss*, sport their "Browns."

Barham, Ingoldsby Legends, II. 109.

pitch-back wheel. See *breast-wheel*.

pitch-black (pich'blak), a. Black as *pitch*.

pitch-blende (pich'blend), n. An oxid of uranium, usually occurring in pitchy black masses, rarely in octahedrons. Also *pechblend*, *pech-blende*, *pechurane*, *uraninite*.

pitch-block (pich'blok), n. In *metal-working*, a bed for supporting the object to be worked in such a manner that it can be turned at any pitch or angle. The bottom of the block is hemispherical, and is supported in a corresponding hollow of a bed or foundation-block. For certain work a pad of leather is interposed between this and the *pitch-block*. It is used especially to support sheet-metal ware during the operation of chasing.

pitch-board (pich'börd), n. A guide used by stair-builders in their work, to regulate the angle of inclination. It consists of a piece of thin board cut to the form of a right-angled triangle, of which the base is the exact width of the tread of the steps, and the perpendicular the height of the riser.

pitch-boat (pich'böt), n. A boat in which *pitch* is melted for paying seams, as a precaution against danger of fire from melting it on board ship.

pitch-chain (pich'chän), n. A chain composed of metallic plates bolted or riveted together, to work in the teeth of wheels.

pitch-circle (pich'sér'kl), n. In toothed wheels, the circle which would bisect all the teeth. When two wheels are in gear, they are so arranged that their *pitch-circles* touch one another. Also called *pitch-line*.

pitch-coal (pich'köl), n. 1. A kind of bituminous coal.—2. Same as *jet*². Brande and Cox.

pitch-dark (pich'därk), a. Dark as *pitch*; very dark.

There was no moon; the night was *pitch dark*.

Thackeray, Bluebeard's Ghost.

pitched (picht), p. a. 1. Fully prepared for beforehand, and deliberately entered upon by both sides with formal array: used specifically of a battle.

In the mean-time, two Armies flye in, represented with foure swords and bucklers, and then what harde heart will not receiue it for a *pitched* fildes?

Sir P. Sidney, Apol. for Poetrie.

In five *pitched* fildes he well maintained The honoured place his worth obtained.

Scott, Rokeby, iv. 16.

The event of a *pitched* battle won gave the rebellion and the Confederate government a standing and a sudden respectability before foreign powers it had hardly dared hope for.

The Century, XXXVI. 288.

2. Sloped; sloping: as, a high-*pitched* roof.

Wall fixtures . . . are equally serviceable where roofs are *pitched* as when they are flat.

T. D. Lockwood, Elect., Mag., and Teleg., p. 157.

pitchelongest, adv. [ME.; < *pitch*¹ + *-long* + adv. gen. *-es*.] Headlong.

Palladius, Husbandrie (E. E. T. S.), p. 150.

*pitcher*¹ (pich'ér), n. [< *pitch*¹ + *-er*¹.] 1. One who *pitches*. (a) In ball-games, the player who serves the ball to the batsman. See *base-ball*. (b) The person who *pitches* reaped grain or hay upon the wagon.

2. In *coal-mining*, one who attends to loading at the shaft or other place of loading. [North. Eng.]—*Pitcher's box*, in *base-ball*, the station of the *pitcher*.

*pitcher*² (pich'ér), n. [< ME. *pycher*, *pycher*, *pychere*, *pychar*, *pychare*, *pecher*, < OF. *pitcher*, *piechier*, *pechier*, F. *pitcher* (obs.), *piechet*, a small jug, = Sp. *pechel*, mug, = Pg. *pecheira*, a *pitcher*, *piechel*, tankard, = It. *pecchero*, *bicchiere*, a goblet (= OHG. *pechhari*, G. *becher*), < ML. *picarium*, *bicarium*, a goblet, < Gr. *bikos*, an earthen wine-cup, wine-jar: see *beaker*.] 1. A vessel with an open spout and generally with a handle, used for holding water, milk, or other liquid.

And . . . behold, Rebekah came forth with her *pitcher* on her shoulder; and she went down unto the well, and drew water. Gen. xxiv. 45.

I'll take a *pitcher* in ilka hand,

And do me to the well.

Sir William Wallace (Child's Ballads, VI. 239).

Dipping deep smooth *pitchers* of pure brass Under the bubbled wells.

A. C. Swinburne, At Eleusis.

2. In *bot.*, a specially adapted tubular or cup-shaped modification of the leaf of certain plants, particularly of the genera *Nepenthes* and *Sarracenia*; an ascidium. See *ascidium*, *pitcher-plant*, *Nepenthes*, and *Sarracenia*.—*Pitchers* have ears, there may be listeners overhearing us: a punning proverb. In the form *little pitchers have long ears* it applies to children.

Not in my house, Lucentio, for, you know,

Pitchers have ears, and I have many servants.

Shak., T. of the S., iv. 4. 52.

*pitcher-man*¹ (pich'ér-män), n. A hard drinker.

For not one shoemaker in ten

But are boon blades, true *pitcher-men*.

Poor Robin (1788). (Nares.)

pitcher-mold (pich'ér-möld), n. A terra-cotta mold in which large pieces of stoneware and other pottery were formerly made. See *pitcher-molding*.

pitcher-molding (pich'ér-möld'ing), n. In *ceram.*, the operation of casting in a *pitcher-mold*. The mold is filled with the clay in a very diluted form; this being poured out, a little remains adhering to the mold; as soon as this is dry, the operation is repeated, and so on until the requisite thickness is obtained. The vessel so cast is separated from the mold by drying at a low heat; and the handles, spout, etc., are attached afterward.

pitcher-nose (pich'ér-nöz), n. A form of faucet with a bent-down lip.

pitcher-plant (pich'ér-plant), n. A plant whose leaves are so modified as to form a *pitcher* or *ascidium*. See cut under *ascidium*. The *pitcher* commonly contains a liquid, and is adapted to the capture and assimilation of insects. The common North American *pitcher-plant* is *Sarracenia purpurea* (see cut in next column), and the parrot-beaked *pitcher-plant* of Georgia and Florida is *S. pitillacina*. (See *Sarracenia*.) The Californian *pitcher-plant*, sometimes called *calif-head*, forms the allied genus *Darlingtonia*. *Heliamphora nutans*, of the *Sarraceniaceae*, is a *pitcher-plant* of the mountains of Venezuela. A large and quite different group, the East Indian *pitcher-plants*, is formed by the genus *Nepenthes*. For the Australian *pitcher-plant*, see *Cephalotus*.

pitcher-shaped (pich'ér-shäpt), a. In *bot.*, having the shape of a *pitcher*. See *ascidium*, 2.

pitcher-vase (pich'ér-väs), n. A vase having the form of an *aiguère* with spout and handle on opposite sides: distinguished from a *pitcher* in that it is merely decorative.

pitching-piece (pich'ing-pēs), n. In *joinery*, same as *apron-piece*.

pitching-stable (pich'ing-stä'bl), n. A variety of Cornish granite used for paving.

pitching-temperature (pich'ing-tem'pēr-ā-tūr), n. In *brewing*, the temperature of the wort at the time the yeast is added to it. This temperature has an important influence on the activity of the fermentation. The English practice is to cool the wort to from 51° to 64° F. The Bavarian brewers cool the wort to from 45° to 50° F. Between these extremes the temperature is regulated according to the temperature of the tun-room or fermenting-room and the strength of the wort, which is *pitched* at a lower temperature in summer than in winter, and at a lower temperature with light beers intended for immediate use than for strong stock-ales or porter. Wort for pale ales is also *pitched* at a low temperature.

pitching-tool (pich'ing-töl), *n.* 1. A kind of stone-chisel or knapping-tool, made of antler or other hard substance, and anciently used with a hammer for flaking off stone in making arrow-heads, etc.—2. In *watch-making*, a tool for placing the wheels of watches in position between the plates.

pitching-yeast (pich'ing-yēst), *n.* In *brewing*: (a) Yeast obtained from fermentation of beer, and intended for use in pitching worts. (b) Yeast which has been prepared for pitching worts by washing it with pure cold water in the stuff-vat, and allowing it to stand covered in the vat in a cool place for a day or longer.

pitch-kettle (pich'ket'l), *n.* Same as *pitch-pot*.
pitchkettled (pich'ket'id), *a.* [*< pitch-kettle + -ed²*.] Covered as if with a pitch-kettle, and thus cast into helpless darkness; puzzled. [Rare.]

Thus, the preliminaries settled,
I fairly find myself *pitchkettled*,
And cannot see, though few see better,
How I shall hammer out a letter.
Conover, Epistle to Robert Lloyd, l. 32. (Davies.)

pitch-opal (pich'ō'pal), *n.* An inferior kind of opal.

pitch-ore (pich'ōr), *n.* Pitch-blende; uraninite.

pitch-pine, *n.* See *pine¹*.

pitch-pipe (pich'pip), *n.* A small musical pipe of wood or metal to be sounded with the breath, by which the proper pitch of a piece of music may be given, or an instrument tuned. It is either a flute or a reed-pipe, and may give either a fixed tone, as A or C, or one of several tones. In the latter case the variation is produced either by a movable plug or stopper altering the length of the air-column, or by a spring that alters the free length of the tongue of the reed.

He had an ingenious servant, by name Licinius, always attending him with a *pitch-pipe*, or instrument to regulate the voice.
Steele, Spectator, No. 223.

pitch-plaster (pich'plās'tēr), *n.* See *plaster*.

pitch-point (pich'point), *n.* The point of contact on the pitch-line common to two engaged wheels.

The *pitch-point*, where its teeth are driven by those of the cogged ring, may be in the same vertical plane, parallel to the axis.
Rankine, Steam Engine, § 158.

pitch-polisher (pich'pol'ish-ēr), *n.* An instrument of metal for polishing curved surfaces of glass, as lenses, specula, etc. It varies in form according to the nature of the work. Its surface is ruled accurately into squares by incised lines, and in use is coated with a prepared pitch. *Byrne, Artisan's Hand-book.*

pitch-pot (pich'pot), *n.* A large iron pot used for the purpose of boiling pitch for paying the seams of wooden ships after calking.

pitchstone (pich'stōn), *n.* An old volcanic rock, resembling hardened pitch in appearance. It is a natural glass resulting from the rapid cooling of those ancient lavas of which common felspar (orthoclase) forms a considerable part. Some pitchstones have a spherulitic structure. See *cut* under *fluidal*.

pitch-tankard (pich'tang'kård), *n.* A tankard covered inside with pitch. The pitch gives a flavor and perhaps a medicinal value to the beverage which the tankard contains. Pitch-tankards are still used in Germany with certain kinds of beer, such as the Lichtenhainer. The modern German pitch-tankards are made of wooden staves held together by wooden hoops, and the ancient English pitch-tankards were made in the same way.

pitch-tree (pich'trē), *n.* The kauri-pine or the Amboyne pine, as the sources of dammar-resins; also, the Norway spruce, as yielding Burgundy pitch.

Pitchurim bean. See *Pichurim bean*.

pitch-wheel (pich'hwēl), *n.* One of two toothed wheels which work together.

pitch-work (pich'wērk), *n.* Work done in a mine under an arrangement that the workmen shall receive a certain proportion of the output.

pitchy (pich'i), *a.* [*< pitch² + -y¹*.] 1. Of, or of the nature of, or resembling pitch; like pitch.

Native petroleum found floating upon some springs is no other than this very *pitchy* substance, drawn forth of the strata by the water.
Woodward, On Fossils.

The *pitchy* taint of general vice is such
As daubs the fancy, and you dread the touch.
Crabbe, Works, II. 100.

2. Smeared with pitch.

The sides convulsive shook on groaning beams,
And, rent with labour, yawn'd their *pitchy* seams.
Falconer, Shipwreck, II.

3. Black; dark; dismal.

When saucy trusting of the cozen'd thoughts
Defiles the *pitchy* night. *Shak., All's Well, IV. 4. 24.*

The *pitchy* blazes of impiety. *B. Jonson, Sejanus, IV. 6.*

Pitchy and dark the Night sometimes appears,
Friend to our Woe, and Parent of our Fears.
Prior, Solomon, I.

4. In *zoöl.*, dark-brown inclining toward black; piceous.

pit-coal (pit'kōl), *n.* Mineral coal, or coal obtained from mines or pits: distinguished from *charcoal*. [Great Britain.]

Divers . . . of the prime Lords of the Court have got the sole Patent of making all Sorts of Glass with *Pit-coal*.
Honwell, Letters, I. 1. 2.

pit-cock (pit'kok), *n.* Same as *pet-cock*. *E. H. Knight.*

pit-crater (pit'krā'tēr), *n.* A volcanic crater at the bottom of a pit or gulf.

The old cone had, like Mt. Loa or the Maui volcano, a great *pit-crater* at top.
Amer. Jour. Sci., 3d ser., XXXII. 261.

pitet, *n.* A Middle English form of *pity*.

piteous (pit'ē-us), *a.* [*< ME. piteous, pytyous, piteos, pitivous, pytevous, pitevous, pitous, pitos, < OF. pitos, piteus, F. piteux = Pr. piatos, pietos, pitos, pidos = Sp. piadoso = Pg. piadoso, piteoso = It. piatoso, pietoso, < ML. pietosus, pitiful, < L. pietas(-t)-s, piety, ML. pity: see pity.*] 1. pit-eye (pit'i), *n.* Same as *pit-bottom*.—**Pit-eye pillar**, a mass of coal left around the bottom of the shaft to support the ground.

pitfall (pit'fāl), *n.* [*< ME. pitfalle, putfalle, pytfalle; < pit + fall¹. Cf. pitfold.*] 1. A pit into which an animal may fall unawares, the opening being so covered as to escape observation. Pitfalls are much used for the capture of large animals in Africa and India and elsewhere, and are sometimes fitted with stout sharp-pointed upright stakes intended to transfix the animal which falls upon them.

Poor bird! thou'dst never fear the net nor lime,
The *pitfall* nor the gin. *Shak., Macbeth, IV. 2. 35.*

Now, poor and basely
Thou sett'st to tolls to betray me; and, like the peasant
That dares not meet the lion in the face,
Digg'st crafty *pitfalls*. *Fletcher, Pilgrim, II. 2.*

Are dim uncertain shapes that cheat the sight,
And *pitfalls* lurk in shade along the ground.
Bryant, Journey of Life.

Hence—2. Figuratively, any concealed danger or source of disaster.

pitfall (pit'fāl), *v. t.* [*< pitfall, n.*] To lead into a pitfall; ensnare. [Rare.]

Able to shew us the ways of the Lord straight and faithful as they are, not full of cranks and contradictions and *pitfalling* dispensas.
Milton, Divorce, Pref.

pit-head (pit'hed), *n.* The head or mouth of a mining-shaft or pit, or the ground surrounding it.—**Pit-head gear**, in coal-mining, same as *head-gear*, 3. [Eng.]

pit-headed (pit'hed'ed), *a.* [*< pit + head + -ed²*.] Having a pit on the head. It is applied specifically (a) to tapeworms, as *Bothriocephalus latius* (T. S. Cobbold), and (b) to venomous serpents of the family *Crotalidae*, known as *pit-headed vipers* (see *Bothrophera*, and *cut* under *pit-viper*).

pithecanthrope (pith-ē-kan'thrōp), *n.* [*< NL. pithecanthropus: see pithecanthrope.*] One of the supposed pithecanthropi.

Prehistoric man . . . has even been sometimes called man-monkey, or *pithecanthrope*.
N. Joly, Man before Metals (trans.), p. 17.

pithecanthropi (pith'ē-kan'thrō'pī), *n. pl.* [*< NL. pl. of pithecanthropus, < Gr. πῖθηκος, an ape, monkey, + ἄνθρωπος, man.*] Hypothetical ape-men, pithecanthropes, or *Alali*. See *ape-man*, *Alalus*.

pithecanthropoid (pith-ē-kan'thrō'poid), *a.* [*< pithecanthrope + -oid.*] Relating to the pithecanthrope, or resembling them.

Pithecia (pi-thē'si-ā), *n.* [*< NL. (Desmarest, 1804), < Gr. πῖθηκος, an ape: see Pithecus.*] The typical genus of the subfamily *Pitheciinae*, containing such species as *P. satanas*, the black couxiu. They are known as *sakis* and *fox-tailed monkeys*. See *cut* on following page.

Pitheciinae (pi-thē-si-ā'nē), *n. pl.* [*< NL. < Pithecia + -inae.*] A South American subfamily of *Cebidae*, having the cerebrum overlapping the cerebellum, the hyoid apparatus moderate, the incisors proclivous, and the tail bushy; the *sakis* and *ouakaris*. There are 3 genera, *Pithecia* (the type), *Chiropotes*, and *Brachyurus*.

pitheciine (pi-thē'si-in), *a.* Of or pertaining to the *Pitheciinae*.

pithecoïd (pi-thē'koid), *a. and n.* [= *F. pithécoides*; < *Gr. πῖθηκος, an ape, + εἶδος, form.*] 1. *a.* 1. Resembling or pertaining to the genus

Black Coudio (*Pithecia satanas*).

Pithophoraceæ (pith'ô-fô-râ'sê-s), *n. pl.* [NL., < *Pithophora* + *-aceæ*.] A doubtfully distinct order of conservoid algae, containing the single genus *Pithophora*.

Reproduction is by means of non-sexual resting spores and prolific cells, no sexual mode of reproduction having as yet been detected.

pithos (pith'os), *n.* [*Gr. πίθος*; see *def.*] In *Gr. antiqu.*, a form of earthenware vase, of very large size and spheroid shape, used for the storage of wine, oil, grain, etc., and sometimes for the burial of dead bodies.

Greek Pithos, now in the courtyard of Grace Church, New York.

pith-paper (pith'pâ'pêr), *n.* A very thin film cut or prepared from the pith of a plant, and used for paper. See *rice-paper*.

pithsome (pith'sum), *a.* [*< pith + -some.*] Strong; robust.

Beside her *pithsome* health and vigor.
R. D. Blackmore, Clara Vaughan, lill. (Encyc. Dict.)

pith-tree (pith'trê), *n.* The ambash.

pith-work (pith'wêrk), *n.* Useful or ornamental articles made of the pith of trees, especially those made in India from that of *Æschynomene aspera*. See *Æschynomene*.

pithy (pith'i), *a.* [Early mod. E. also *pitthie*, *pythy*; < late ME. *pythy*; < *pith* + *-y*.] 1. Of the nature of or full of pith; containing or abounding with pith: as, a *pithy* stem; a *pithy* substance.—2. Full of pith or force; forcible; containing much in a concentrated or dense form; of style, sententious: as, a *pithy* saying or expression.

To teach you gamut in a briefer sort,
More pleasant, *pithy*, and effectual
Than hath been taught by any of my trade.
Shak., T. of the S., III. 1. 68.

Your counsel, good Sir Thomas, is so *pithy*
That I am won to like it.
Webster and Decker, Sir Thomas Wyatt, p. 12.

Charles Lamb made the most *pithy* criticism of Spenser when he called him the poets' poet.
Lowell, Among my Books, 2d ser., p. 177.

3. Given to the use of pithy or forcible expressions.

In his speech he was fine, eloquent, and *pithy*.
Sir T. More, Utopia (tr. by Robinson), I.

In all these Goodman Fact was very short but *pithy*; for he was a plain home-spun man.
Addison.

A white-haired man,
Pithy of speech, and merry when he would.
Bryant, Old Man's Counsel.

=*syn.* 2 and 3. Terse, laconic, concise, pointed, sententious.

pitiable (pit'i-a-bl), *a.* [*< OF. pitiable, piteable, F. pitoiable; as pity + -able.*] Deserving pity; worthy of exciting compassion: applied to persons or things.

In the Gospel, he makes abatement of humane infirmities, temptations, moral necessities, mistakes, errors, for every thing that is *pitiable*.
Jer. Taylor, Sermons, I. vii.

The *pitiable* persons relieved are constantly under your eye.
Ep. Atterbury.

If ye have grieved,
Ye are too mortal to be *pitiable*,
The power to die disproves the right to grieve.
Mrs. Browning, Drama of Exile.

pitiableness (pit'i-a-bl-nes), *n.* A pitiable state or condition.

pitiablely (pit'i-a-bli), *adv.* In a pitiable manner.

pitiedly (pit'id-li), *adv.* In a condition or state to be pitied.

He is properly and *pitiedly* to be counted alone, that is illiterate.
Fellham, Resolves, II. 49.

pitier (pit'i-êr), *n.* [*< pity + -er*.] One who pities. *Bp. Gauden, Hieraspistes, p. 3.*

pitiful (pit'i-ful), *a.* [*< pity + -ful*.] 1. Full of pity; tender; compassionate; having a feeling of sorrow and sympathy for the distressed.

Our hearts you see not; they are *pitiful*;
And pity to the general wrong of Rome . . .
Hath done this deed on Cæsar.
Shak., J. C., III. 1. 100.

2. Exciting or fitted to excite pity or compassion; miserable; deplorable; sad: as, a *pitiful* condition; a *pitiful* look.

In faith, 'twas strange, 'twas passing strange,
'Twas *pitiful*, 'twas wondrous *pitiful*.
Shak., Othello, I. 3. 161.

The Pilgrims . . . stood still, and shook their heads, for they knew that the sleepers were in a *pitiful* case.
Bunyan, Pilgrim's Progress, p. 336.

3. To be pitied for its littleness or meanness; paltry; insignificant; contemptible; despicable.

That's villainous, and shows a most *pitiful* ambition in the fool that uses it.
Shak., Hamlet, III. 2. 49.

'Tis *pitiful*
To court a grin when you should woo a soul.
Cowper, Task, II. 466.

pitifully (pit'i-ful-i), *adv.* In a pitiful manner.

(a) With compassion.
Pitifully behold the sorrows of our hearts.
Book of Common Prayer (Eng.), Lesser Litany.

(b) So as to excite pity; wretchedly.
Now many Ages since the Greek Tongue is not only impaired, and *pitifully* degenerated in her Purity and Eloquence, but extremely decay'd in her Amplitude and Vulgariness.
Howell, Letters, II. 57.

(c) Contemptibly.
Those men who give themselves airs of bravery on reflecting upon the last scenes of others may behave the most *pitifully* in their own. *Richardson, Clarissa Harlowe.*

pitifulness (pit'i-ful-nes), *n.* The state or quality of being pitiful, in any sense.

pitikinst, *interj.* [*< pity + -kin.*] A diminutive of *pity*, used interjectionally, generally in conjunction with *od's* for *God's*. See *ods-pitkins*.

pitiless (pit'i-less), *a.* [*< pity + -less.*] 1. Without pity; hard-hearted.

The pelting of the *pitiless* storm. *Shak., Lear, III. 4. 29.*

2. Exciting no pity; unpitied.

So do I perish *pitiless*, through fear.
Sir J. Davies, Wittes Pilgrimage, sig. G. 1.

=*syn.* 1. Merciless, cruel, ruthless, inexorable, unmerciful, un pitying.

pitilessly (pit'i-less-li), *adv.* In a pitiless manner.

pitilessness (pit'i-less-nes), *n.* The state of being pitiless.

pit-kiln (pit'kil), *n.* An oven for the manufacture of coke from coal.

pitlet, *n.* Same as *pickles*.

pitman (pit'man), *n.*; *pl. pitmen* (-men). 1. One who works in a pit, as in coal-mining, in sawing timber, etc. Specifically—2. The man who looks after the pumping machinery within the shaft of a mine.—3. In *mach.*, the rod which connects a rotary with a reciprocating part, either for imparting motion to the latter or

Harvester Pitman.—a, knives; b, cutter-bar; c, pitman connection; d, pitman; e, crank-wrist.

taking motion from it, as that which couples a crank with a saw-gate, or a steam-piston with its crank-shaft, etc. Also called *connecting-rod*. See also *under stone-breaker*.

pitman-box (pit'man-boks), *n.* The metal strap and brasses which embrace the crank-wrist of the driving or driven wheel of a pitman. Also called, more commonly, *rod-end*.

pitman-coupling (pit'man-kup'ling), *n.* Any means, as a rod-end, for connecting a pitman with the part which drives or is driven by it.

pitman-head (pit'man-hed), *n.* The block or enlargement at the end of a pitman where connection is made with the member to which it imparts motion or with the mechanism from which it receives motion.

pitman-press (pit'man-pres), *n.* A press which is worked by a pitman connection with a shaft, instead of by an eccentric or other device. Such presses are used for drawing, cutting, shearing, stamping, and for packing materials requiring light pressure.

pit-martin (pit'mär'tin), *n.* The bank-swallow or sand-martin, *Cotile* or *Chicicola riparia*, which nests in gravel-pits and like places. See *cut under bank-swallow*.

pit-mirk (pit'mêrk), *a.* [A corruption of *pick-mirk*, dial. form of **pitch-murk*: see *pitch²* and *murk*.] Pitch-dark; dark as pitch. [Scotch.]

The night is mirk, and it's very *pit-mirk*.
Archde of Ca'ball (Child's Ballads, VI. 90).

It's *pit-mirk*—but there's no ill turn on the road but twa.
Scott, Guy Mannering, XI.

pitoust, *a.* A Middle English form of *pitous*.

pitously, *adv.* A Middle English form of *pitiously*.

pitpan (pit'pan), *n.* A very long, narrow, flat-bottomed, trough-like canoe, with thin and flat projecting ends, used in navigating rivers and lagoons in Central America. *Imp. Dict.*

pitpat (pit'pat), *adv.* and *n.* Same as *pitapat*.

pitpit (pit'pit), *n.* [Imitative.] An American honey-creep of the family *Certhiidae*; a guil-guit. Also *pippit*.

pit-saw (pit'sâ), *n.* A saw working in a pit, as a large saw used for cutting timber, operated

Pithecus; belonging to the higher as distinguished from the lower apes; simian; anthropoid, as an ape.—2. Loosely, of or pertaining to an ape; related to an ape.

II. *n.* An anthropoid ape; a simian.

Pithecolobium (pi-thê-kô-lô'bi-um), *n.* [NL. (K. F. P. von Martius, 1829), so called from the resemblance of the curved pods to a monkey's ear; < *Gr. πίθηκος*, an ape, + *λόβιον*, dim. of *λόβος*, an ear, lobe, or legume.] A genus of leguminous shrubs or trees, of the tribe *Ingeæ*, known by the peculiar rigid pods, which are two-valved and flattened, curved, curled, or twisted, and somewhat fleshy. There are about 110 species, widely dispersed in the tropics, especially of America and Asia. They are either unarmed or thorny with axillary or stipular spines. They bear glandular bipinnate leaves of many small or few larger leaflets, and globose heads of white flowers, with long and very numerous stamens. The most important species, *P. dulce*, a large tree native of Mexico, and there called *guanacastil*, contains in its pods a sweet pulp, for which they are boiled and eaten. Introduced into the Philippine Islands, and thence into India, it is now cultivated there under the name *Mango tamarind*. (Compare *tamarind*.) Several other species produce edible pods, as *P. filiforme*, the wild tamarind-tree of Jamaica, a large tree distinguished by the twice-pinnate leaves from the true tamarind, whose leaves are once-pinnate; and *P. Saman*, the genisaro, also called *saman*, *zamarang*, and *rain-tree*. The bark of some species yields a gum, that of others an astringent drug, and that of others, as *P. bigeminum*, the soap-bark tree, and *P. micondium*, the savonette or shagbark of the West Indies, is a source of soap. Several other species are cultivated as hardy evergreen trees under the name *curl brush-bean*. A smaller species, usually a shrub, is the cat's-claw, also called *nephritic tree* or *black bead-tree*, of Jamaica. See also *algarroboilla*.

Pithecus (pi-thê'kus), *n.* [NL. (Geoffroy, 1812), < *L. pithecus*, < *Gr. πίθηκος*, an ape.] A genus of anthropoid apes: same as *Simia*.

Pithelemur (pith-ê-lê'mêr), *n.* [NL. (Lesson), < *Pithe(cus)* + *Lemur*.] A genus of lemurs: synonymous with *Indris* and *Lichanotus*.

pithful (pith'ful), *a.* [*< pith + -ful*.] Full of pith; pithy. *W. Browne, Britannia's Pastorals, II. 4.*

pithily (pith'i-li), *adv.* In a pithy manner; with close application or concentrated force; forcibly; cogently.

pithiness (pith'i-nes), *n.* The character of being pithy; strength; concentrated force: as, the *pithiness* of a reply.

pithless (pith'les), *a.* [*< pith + -less*.] 1. Without pith; wanting strength; weak.

Men who, dry and *pithless*, are debarred
From man's best joys. *Churchill, The Times.*

2. Lacking cogency or force.

The *pithless* argumentation which we too often allow to monopolize the character of what is prudent and practical.
Gladstone, Church and State, II.

pithole (pit'hôl), *n.* A small hollow or pit; especially, a pit left by a pustule of small-pox.

I have known a lady sick of the small pox, only to keep her face from *pitholes*, take cold, strike them in again, kick up the heels, and vanish!
Beau, and FL, Fair Maid of the Inn, II. 3.

Pithophora (pi-thôf'ô-râ), *n.* [NL. (Wittrock, 1877), < *Gr. πίθος*, a large storage-vase (see *pithos*), + *σπειν* = *E. bear*.] A small genus of conservoid algae first detected in the warm tanks in the Botanic Gardens at Kew, also at Oxford and elsewhere, but since found in tropical America. The thallus is composed of branching filaments of cells resembling *Cladophora*, presenting here and there barrel-shaped cells very rich in chlorophyll. They are further distinguished by the peculiar development of thin rhizoids.

by two men, one of whom (called the *pit-sawyer*) stands in the pit below the log that is being sawed, and the other (called the *top-sawyer*) on the log.

pit-sawyer (pit'-sā'yēr), *n.* See *pit-saw*.

pit-specked (pit'-spekt), *a.* Marred by pits or small depressed spots, as fruit.

Pitta (pit'tā), *n.* [NL. (Vieillot, 1816); from the Telugu name.]

1. The typical genus of *Pittidae*, including most of the Old World ant-thrushes, as *P. coronata*. Also called *Citta*. See *Brachyurus*, and cut under *Pittidæ*.—2. [l. c.] Any member of this genus.

pittacal (pit'-a-kal), *n.* [Also *pittacall*; = F. *pittacale*, < Gr. *πίττα*, *πίσσα*, pitch, + *καλός*, beautiful.] A blue substance used in dyeing, originally produced from the tar of beech-wood.

pittance (pit'-ans), *n.* [ME. *pitance*, *pitauance*, *pytance*, *pytaunce*, < OF. *pitance*, an allowance of food in a monastery, F. *pitance* = Sp. *pitanza* = Pg. *pitanga* = Olt. *pietanza*, *piatanza*, It. *pietanza*, dial. *pitanza*, an allowance, daily subsistence (ML. reflex *piantia*, *piantia*, *piantia*, allowance of food in a monastery); cf. OF. *robe de pitance*, a uniform; *pitance*, *pitence*, an anniversary service; lit. 'a pious office or service,' 'a pious dole,' 'an act of piety or pity,' < ML. *pietantia*, < *pietan(t)s*, ppr. of **pietare*, an assumed verb (> Sp. *pitare*), dole out allowances of food, orig. of any alms, < L. *pieta(-t)s*, piety, pity, mercy: see *piety*, *pity*. Cf. ML. *miseri-cordia*, a monastic repast, lit. 'pity,' 'mercy': see *miseri-corde*. According to Du Cange, the word (in the assumed orig. form ML. **piantia*) meant orig. 'an allowance of the value of a picta,' < *picta*, a small coin issued by the Counts of Poitiers, < LL. *Pictaviu*, the capital of the Pictavi, < *Pictavi*, for L. *Pictones*, a people in Gaul. This view is accepted by Skeat as possible, but apart from the consideration of the preceding etymology, which is confirmed by the evidence, ML. *piantia* is not a likely form to be made from *picta* in such a sense, and there is no evidence that *picta* was in such general circulation as to make it a measure of value.] 1. An allowance or dole of food and drink; hence, any very small portion or allowance assigned or given, whether of food or money; allowance; provision; dole.

He was an easy man to yewe penaunce
Ther as he wate han a good *pitauance*.
Chaucer, Gen. Prolog. to C. T., l. 224.

Before, Diego,
And get some pretty *pitance*; my pupil's hungry.
Fletcher, Spanish Curate, II. 1.

I am sensible that the income of your commission, and what I have hitherto allowed you, is but a small *pitance* for a lad of your spirit.
Sheridan, The Rivals, II. 1.

2. An allowance of food or money bestowed in charity; a small charitable gift or payment.

One half of this *pitance* was even given him in money.
Macaulay.

3. A small portion or quantity; a morsel.

Our souls shall no longer remain obnoxious to her treacherous flesh and rebellious passions, nor ratiocinate and grow knowing by little parcels and *pitances*.
Evelyn, True Religion, I. 244.

Far above the mine's most precious ore
The least small *pitance* of bare mold they prize,
Scooped from the sacred earth where his dear relics lie.
Wordsworth, Eccles. Sonnets, l. 52.

pittancer (pit'-an-sēr), *n.* [F. *pitancier* (= Sp. *pitancero* = Pg. *pitanceiro*, < *pitance*, *pitance*: see *pitance*.) The officer in a monastery who distributed the *pitance* at certain appointed festivals.

pitted (pit'-ed), *a.* [F. *pitil* + *-ed*.] Marked thickly with pits or small depressions: as, a face *pitted* by smallpox; specifically, in bot., having pits or punctations, as the walls of many cells; in zool., having many punctations, as a surface; foveolate; areolate.—**Pitted teeth**,

teeth with pits in the enamel, resulting from defective development.—**Pitted tissue**. See *prosenchyma*.—**Pitted vessel**. See *vessel*.

pitter (pit'-ēr), *v. i.* [A dim. var. of *patter*.] To murmur; patter.

When summers heat hath dried up the springs,
And when his *pittering* streamlets are low and thin.
Greene (Park's Heliconia, III. 67).

pitter (pit'-ēr), *n.* [F. *pitil* + *-er*.] 1. One who removes pits or stones from fruit.—2. An implement for removing the stones from such fruit as plums and peaches; a fruit-stoner. [U. S.]

pitterarot, *n.* Same as *pederero* for *paterero*.

In an original MS. Account of Arms delivered up at Inverary in obedience of the Act of Parliament for securing the peace of the Highlands, 1717, mention is made of Two *pitterarots*, one broken.

N. and Q., 7th ser., VIII. 123.

pitticite, *n.* See *pittizite*.

Pittidæ (pit'-i-dē), *n. pl.* [NL., < *Pitta* + *-idæ*.]

A family of mesomyodan or songless passerine birds, typified by the genus *Pitta*; the Old World ant-thrushes. They are of stout form, with very short tail, and long and strong legs; the plumage is brilliant and varied. The leading genera besides *Pitta* are *Eucichla*, *Hydrophila*, and *Melanopitta*. These birds are characteristic of the Oriental and Australian regions, though one (*P. angolensis*) is African; they are especially abundant in the islands of the Malay archipelago. About 50 species are known.

Pittinæ (pi-ti'-nē), *n. pl.* [NL., < *Pitta* + *-inæ*.] The *Pittidæ* regarded as a subfamily of some other family. Before the peculiarities of the Old World ant-thrushes were known, they were wrongly associated with the South American formicarioid birds of somewhat similar superficial aspect, the name *ant-thrush* being given to both. See *ant-thrush*, and compare cuts under *Formicarius* and *Pittidæ*.

pittine (pit'-in), *a.* Of or pertaining to the pittas, or ant-thrushes of the Old World.

pitting (pit'-ing), *n.* [Verbal *n.* of *pit*, *v.*] 1. The act or operation of digging or sinking a hole or pit.

The exact situation of the clay is first determined by systematic *pitting*, to a depth of several fathoms, or occasionally by boring.
Spence Bence, *Manuf.*, I. 686.

2. The act or operation of placing in a pit or in pits: as, the *pitting* of potatoes; the *pitting* of hides.—3. A pit, mark, or hollow depression on the surface, such as that left on the flesh by a pustule of the smallpox.—4. A number of such pits considered collectively; a collection of pitmarks.—5. In bot., the state or condition of being pitted.

The peculiar *pitting* of the woody fibre of the fir.
Encyc. Brit., XIV. 411.

6. A corrosion of the inner surface of steam-boilers, whereby the metal becomes gradually covered with small cavities.—7. A corrosion of the bottom of iron ships. Blisters, and afterward pits, are formed, apparently by the action of the carbonic acid and oxygen in sea-water producing ferric oxide under the protecting paint.

pittizite, **pitticite** (pit'-i-zit, -sit), *n.* [Irreg. < Gr. **πιττιζειν*, *πιττιζειν*, be like pitch (< *πίττα*, *πίσσα*, pitch), + *-ite*.] An arsenio-sulphate of iron, occurring in reniform masses; pitchy iron ore.

pittlet, *n.* Same as *pickle*, *pightle*. Minshew.

pittle-pattle (pit'-pat'l), *v. i.* [A varied reduplication of *patter*¹, *patter*²; cf. *pitter*¹, and *prattle*, *tattle*, etc.] To talk unmeaningly or flippantly.

pittock (pit'-ok), *n.* The coalfish. [Prov. Eng.]
Pittosporæ (pit'-ō-spō-rā-sē-ō), *n. pl.* [NL. (Lindley, 1846), so called from their resinous capsules; < Gr. *πίττα*, *πίσσα*, pitch, + *σπόρος*, seed (see *spore*), + *-acæ*.] Same as *Pittosporæ*.

pittosporad (pit'-ō-spō-rad), *n.* [F. *Pittosporaceæ* + *-ad*.] A plant of the natural order *Pittosporaceæ*.

Pittosporæ (pit'-ō-spō-rē-ō), *n. pl.* [NL. (R. Brown, 1814), < *Pittosporum* + *-æ*.] An order of polypetalous plants, of the cohort *Polygalinæ*. It is unlike the two other orders in its numerous ovules, and in its regular flowers with five stamens; it is also characterized by its five imbricated sepals, five petals with

their narrow bases or claws commonly forming an incomplete tube, versatile anthers, an ovary usually two-celled, a minute embryo in hard albumen, and loculicidal fleshy or papery fruit. There are about 80 species and 10 genera, of which *Pittosporum* (the type), is the only one widely distributed, the others being all Australian. They are shrubs or shrubby twiners, sometimes procumbent, generally smooth, bearing alternate leaves, and white, blue, yellow, or rarely reddish flowers, solitary, nodding, and terminal, or variously clustered.

Pittosporum (pi-tōs'pō-rum), *n.* [NL. (Banks, 1788), so called from the viscous pulp commonly enveloping the seeds; < Gr. *πίττα*, *πίσσα*, pitch, + *σπόρος*, seed.] A genus of plants, type of the order *Pittosporæ*, characterized by the thick wingless seeds, and thick loculicidal capsule, which is coriaceous or woody, globose, ovate, or obovate, often compressed and with imperfect partitions. There are about 65 species, natives of Africa, warmer parts of Asia, Pacific islands, Australia, and New Zealand. They are erect shrubs, generally low, sometimes becoming small trees, often with a resinous bark, generally smooth and evergreen. They bear white or yellowish flowers in crowded terminal clusters, or sometimes solitary or few and lateral. Many species have broad shining dark-green leaves, contrasting well with the white fragrant flowers, and are cultivated under the name *hedge-laurel*. Other species are known as *Brisbane laurel*, *Queensland laurel*, and *haskara*. From the flowers of *P. undulatum*, the Victorian laurel, a highly fragrant volatile oil is distilled. This species and *P. bicolor*, the Victorian cheesewood or whitewood, yield a wood adapted to turners' use, and sometimes substituted for boxwood. A few sometimes reach the height of 90 feet, as *P. rhombifolium*.

pittypat (pit'-i-pat), *adv.* and *a.* Same as *pita-pat*.

pituita (pit'-ū-i'tā), *n.* [L., mucus, phlegm; prob., with loss of initial *s*, < *spuere*, pp. *sputus*, spit out: see *spew*. Cf. *pit*.] Phlegm or mucus; especially, the mucous secretion of the pituitary or Schneiderian membrane. Also, rarely, *pituite*.

As of the *pituita*, or the bile, or the like disorders to which the body is subject.

T. Taylor, tr. of Five Books of Plotinus (1794), p. 102.

pituita (pit'-ū-i'tā), *a.* [F. *pituita* + *-al*.] Same as *pituitary*.

pituitary (pit'-ū-i-tā-ri), *a.* [= F. *pituitaire* = Pg. It. *pituitario*, < L. *pituitarius*, in fem. *pituitaria* (sc. *herba*), an herb that removes phlegm, < *pituita*, phlegm: see *pituita*.] Mucous; secreting or containing mucus, or supposed to do so; relating to *pituita*.—**Pituitary body**, a small ovoid pale-reddish body, occupying the sella turcica, and attached to the under surface of the cerebrum by the infundibulum. It consists of two lobes—an anterior, resembling in structure that of a duodenal gland, and a posterior, which in the lower vertebrates is composed of nerve substance, forming an integral part of the brain, and called the infundibular lobe, but in the higher vertebrates showing only slight indications of nervous elements. Also called *pituitary gland*, *hypophysis cerebri*. See cuts under *brain* (cut 2), *Encephalographia*, and *encephalon*.—**Pituitary diverticulum**, a flask-like outgrowth of the middle of the upper posterior part of the buccal cavity in the embryo, which takes part in the formation of the pituitary body.—**Pituitary fossa**. See *fossa*, and cuts under *paraphenoid*, *Sphenoida*, *Gallina*, *Oreocidia*, and *arid* (cut 3).—**Pituitary gland**. Same as *pituitary body*.—**Pituitary membrane**. See *membrane*.—**Pituitary space**, in *embryo*, an open space at the base of the skull, just in advance of the end of the notochord, inclosed by the trabecula cranii: it subsequently becomes the seat of the pituitary body, and corresponds to what is known in human anatomy as the sella turcica of the sphenoid bone. See *hypophysis*, and cuts under *chondrocranium* and *peristia* (adult turtle).—**Pituitary stem**, the hollow neck of the pituitary body, by which that body hangs from the brain; the infundibulum of the brain. See cut under *corpus*.

To have *pity* upon, to take *pity* upon, generally, to show one's *pity* toward by some benevolent act.

He that *hath* *pity* upon the poor lendeth unto the Lord.
Prov. xix. 17.

=Syn. 1. *Pity*, *Compassion*, *Commiseration*, *Sympathy*, *Condolence*. *Pity* is the only one of these words that allows even a tinge of contempt; *pity* and *compassion* come from one who is felt to be so far superior. *Sympathy*, on the other hand, puts the sufferer and the one sympathizing with him upon an equality by their fellow-feeling. *Compassion* does not keep so near its derivation; it is deep tenderness of feeling for one who is suffering. *Sympathy* is equal to *compassion* in its expression of tenderness. *Commiseration* is, by derivation, sharing another's misery; *condolence* is sharing another's grief. *Compassion* may and *condolence* must stand for the communication to another of one's feelings of sorrow for his case. It is some comfort to receive *commiseration* or *condolence*; it gives one strength to receive *sympathy* from a loving heart; it is likewise to need *compassion*; it calls us to be *pitted*. *Sympathy* does not necessarily imply more than kinship of feeling. See also the quotations under *condolence*.

The Maker saw, took *pity*, and bestowed
Woman.
Pope, January and May, l. 63.

In his face
Divine *compassion* visibly appear'd,
Love without end.
Milton, P. L., III. 141.

Know to press a royal merchant down
And pluck *compassion* of his state
From brassy bosoms, and rough hearts of flint.
Shak., M. of V., IV. 1. 80.

With that *sympathy* which links our fate with that of
all past and future generations.
Storrs, Salem, Sept. 13, 1828.

To Thebes the neighbor'g princes all repair,
And with *condolence* the misfortune share.
Cicero, tr. of Ovid's *Metamorph.*

Our *places* by the coach are taken.

Dickens, David Copperfield, xxii.

"No person to be admitted to keep *Places* in the pit" seems a singular order, were it not explicable by the fact that people used to send their footmen to keep *places* for them until their arrival, and that the manners of these gentry gave great offence to the habits of the pit.

J. Ashton, Social Life in Reign of Queen Anne, II. 18.

9. A particular locality; a particular spot or portion of a surface or in a body: as, a sore *place*; a soft *place*.—10. The proper or appropriate location or position: as, a *place* for everything, and everything in its *place*.

This is no *place* for Ladies; we allow

Her absence. *Heywood*, Royal King.

That it may be possible to put a book in its *place* on a shelf there must be (1) the book, and (2), distinct and apart from it, the *place* on the shelf.

J. Ward, Encyc. Brit., XX. 58.

11. In the abstract, the determinate portion of space occupied by any body.

A mind not to be changed by *place* or time;

The mind is its own *place*, and in itself

Can make a heaven of hell, a hell of heaven.

Milton, P. L., l. 253.

Place . . . stands for that space which any body takes up, and so the universe is in a *place*.

Locke, Human Understanding, II. xiii. 10.

12. A portion or passage of a book or writing. The *place* of the Scripture which he read was this.

Acts viii. 32.

Hosea, in the person of God, saith of the Jews: They have reigned, but not by me: . . . Which *place* proveth plainly that there are governments which God doth not avow.

Bacon, Holy War.

This *place* some of the old doctors understood too literally.

Jer. Taylor, Works (ed. 1835), II. 136.

13. [In this sense a translation of L. *locus*, Gr. *τόπος* (see *topic*).] In *logic* and *rhet.*, a topic; a class of matters of discourse; an order of considerations comprising all those which have analogous relations to their subjects.

A *place* is the resting corner of an argument, or els a mark which giveth warning to our memorie what we may speake probably, either in the one parte or the other. upon all causes that fall in question. . . . For these *places* bee nothing elles but covertes or boroughs, wherein, if any one searche diligently, he maye finde game at pleasure.

Wilson, Rule of Reason (1551).

Shak., Hen. VIII., iii. 2. 394.

In *place*

Of thanks, devise to extirpe the memory

Of such an act. *B. Jonson*, Volpone, iv. 2.

16. A situation; an appointment; an employment; hence, office: as, a politician striving for *place*; a coachman wanting a *place*.

Though he had offered to lay down his *place*, yet, when he saw they went about it, he grew passionate, and expostulated with them.

Winthrop, Hist. New England, I. 394.

For neither pension, post, nor *place*

Am I your humble debtor.

Burns, The Dream.

17. Official or social status or dignity; vocation, station, or condition in life, etc.: as, to make one know his *place*.

When any of great *place* dyeth, they assemble the Astrologers, and tell the hour of his nativitie, that they may by their Art finde a Planet fitting to the burning of the corpses.

Purchas, Pilgrimage, p. 427.

Their summons call'd
From every band and squared regiment
By place or choice the worthiest.

Milton, P. L., l. 769.
He teaches him his place by an incomparable discipline.
The Century, XXXVII. 231.

18. Precedence; priority in rank, dignity, or importance.

Come, do you think I'd walk in any plot
Where Madam Sempronius should take place of me,
And Fulvia come in the rear, or on the by?

B. Jonson, Catiline, iii. 2.

You do not know
What 'tis to be a lady and take place.

Shirley, Love in a Maze, i. 2.

posit.

placebo (plā-sē'bō), *n.* [*< ME. placebo, < OF. placebo, < L. placebo, I will please; 1st pers. sing. fut. ind. of placere, please: see please.*]

1. In the *Rom. Cath. Ch.*, the vespers of the
office for the dead. It was so called from the initial
words of the opening antiphon, *Placebo Domino in regi-
one victorum* (I shall be acceptable unto the Lord in the
land of the living), taken from Psalm cxiv. 9 of the Vul-
gate (cxvi. 9 of the authorized version).

2. A medicine adapted rather to pacify than to
benefit a patient.

Physicians appeal to the imagination in desperate cases
with bread pills and placebos.

Amer. Jour. Psychol., I. 145.

To sing placebo, to act with servile complaisance; agree
with one in his opinions.

Beth ware, therefore, with lordes how ye pleye,

Syngeth Placebo—and I shal if I kan.

Chaucer, Summoner's Tale, l. 307.

Of which comedie . . . when some (to sing placebo) ad-
vised that it should be forbidden, because it was some-
what too plaine, . . . yet he would have it allowed.

Sir J. Harrington, Pref. to Ariosto's Orlando Furioso.

place-brick (plās'brik), *n.* In brickmaking, an
inferior kind of brick, which, having been out-
ermost or furthest from the fire in the clamp or
kiln, has not received sufficient heat to burn
it thoroughly. Place-bricks are consequently soft, and
uneven in texture. They are also termed *peckings*, and
sometimes *sandel* or *samel bricks*.

place-broker (plās'brō'kér), *n.* One who dis-
poses of official place for his own profit; one
who traffics in public offices, whether for his
personal profit or for that of others.

placeful (plās'fūl), *a.* [*< place + -ful.*] Fill-
ing a place.

And in their precinct

(Proper and placeful) stood the troughs and pails

In which he milk'd.

Chapman, Odyssey, ix.

place-hunter (plās'hun'tér), *n.* One who seeks
persistently for public office.

The multiplication of salaried functionaries creates a
population of place-hunters.

Sir E. Creasy, Eng. Const., p. 377, note.

placeless (plās'les), *a.* [*< place + -less.*] Hav-
ing no place or office. *Canning.*

placeman (plās'man), *n.*; pl. placemen (-men).

One who holds or occupies a place; specifically,
one who has an office under government.

A cabinet which contains not placemen alone, but inde-
pendent and popular noblemen and gentlemen.

Macaulay, Sir William Temple.

placement (plās'ment), *n.* [*< place + -ment.*]

A putting, placing, or setting. [*Rare.*]

They are harmful in proportion as the placement of the
loan disturbs the market value of the commodities.

Pop. Sci. Mo., XXXI. 415.

placemonger (plās'mung'gér), *n.* One who
traffics in public employments and patronage.

place-name (plās'nām), *n.* The name of a place
or locality; such a name as is given to places;
a local name: in contradistinction to *personal*
name.

placētī, *n.* [*< L. placenta, a cake, = Gr. πλακοῦς (πλακοῦν-), a flat cake, contr. of πλακοῖς (πλακοῦν-), flat, < πλάξ (πλακ-), anything flat.*] A
cake.

Afterwards make a confection of it [flower-de-luce] with
clarified hony, which must be so hard that you may make
small plaques or trocheuses of it; dry them in the shadow.

T. Adams, Quoted in N. and Q., 7th ser., VII. 29.

placenta (plā-sen'tā), *n.*; pl. placentas or placen-
tæ (-tāz, -tē). [= *F. Sp. Pg. It. placenta, < NL. placenta, placenta (something having a flattened circular form), lit. 'cake,' a particu-
lar use of L. placenta, a cake: see placētī.*] 1.

In *zool., anat., and med.*: (a) The organ of at-
tachment of a vertebrate embryo or fetus to the
wall of the uterus or womb of the female. It is
a specially modified part of the surface of the chorion or
outside one of the fetal envelopes, of a flattened circular

Human Placenta (unattached sur-
face), with umbilical cord.

form, like a plate or saucer,
one side of which is closely
applied to the wall of the
womb, and from the other
side of which proceeds the
umbilical cord or navel-
string. It is highly vas-
cular, and in intimate vital
connection with a similarly
vascular area of the uter-
ine walls, serving for the
interchange of the consti-
tuents of the blood between
the female and the fetus,
and thus acting during in-
tra-uterine life as the or-
gan of circulation, respi-
ration, and nutrition of the
fetus. The human pla-
centa is about as large as a soup-plate, and in connec-
tion with the navel-string and membranes is commonly
known as the *uterine cake, afterbirth, or secundines*. The
presence of a true placenta is necessarily restricted to vi-
viparous vertebrates, and does not occur in all of these
(the two lower subclasses of mammals, the marsupials and
monotremes, being implantal). Several forms of placen-
ta have been distinguished among placental mammals, and
made a basis of classification. See also *cuta under embryo*
and *uterus*. Hence—(b) Some analogous part or
organ in other animals, having a similar func-
tion. (1) In ascidians, the organ by which a fetal sex-
less ascidioid is attached for a time to the wall of the
atrial cavity of the parent. See *cuta under Salpa*. (2) In in-
fusorians, a name given by Stein to the single mass result-
ing from the coalescence of the segments of the nuclei or
different individuals after the process of conjugation.

2. In echinoderms, a flat discoidal sea-urchin,
as a sand-dollar or cake-urchin: used in a ge-
neric sense by Klein, 1734.—3. [*cap.*] A genus
of bivalve mollusks, now called *Placuna*.—4.
In bot., that part of the ovary of flowering plants
which bears the ovules. It is usually the more or
less enlarged or modified margins of the carpillary leaves,
and is of a soft cellular texture. When the ovary is com-
posed of a single leaf,
both margins give
rise to ovules, and
they are consequent-
ly in two rows. In
a compound ovary
there are various
modifications of the
placenta. Thus, when
the edges of the car-
pillary leaves all
meet in a common
axis, the placentas
are said to be *axile*.
When, by oblitera-
tion of the dissepim-
ents, such an ovary

1. Free central placenta, transverse and
vertical sections. 2. Axile central placenta.
3. Parietal placenta. a, a, Placentas.

becomes one-celled, the axile placentas remain in a col-
umn as a *free central placenta*. Or, when the edges of the
carpillary leaves barely meet and slightly incurve, the
placentas become *parietal*, being borne on the wall. There
are all degrees of incurvature, the placentas being located
accordingly. In vascular cryptogams the point giving rise
to the sporangia is sometimes called the *placenta*. The
placenta is sometimes termed the *trophospermium* and
spermatophorum. See also *cuta under ovary*.—*Battledore*
placenta, a placenta which has the cord attached to the
edge.—*Deciduate placenta*, a placenta which comes
away entire at parturition, as in woman and many other
mammals.—*Discoidal placenta*. See *discoidal*.—*Non-*
deciduate placenta, a placenta which is not deciduate.
—*Parietal placenta*. See *parietal*, and *def. 4*, above.—
Placenta adherent, a placenta which has, through inflam-
mation during pregnancy, formed adhesions to the uterus.
—*Placenta cruenta*, blood-clot.—*Placenta prævia*,
that condition of the placenta in which it is attached over
the internal os, thus necessitating its rupture or detach-
ment, with consequent hemorrhage, before the contents of
the uterus can be expelled.—*Placenta sanguinis*, blood-
clot.—*Placenta succenturia*, a supernumerary placen-
tal mass, produced by the development of an isolated
patch of chorion villi.—*Polycotyledonary placenta*, a
placenta whose fetal villi are arranged in distinct tufts or
cotyledons, as in the cow.

placental (plā-sen'tal), *a.* and *n.* [*< NL. placen-
talis, < placenta, placenta: see placenta.*] 1.
a. 1. Of or pertaining to the placenta.—2.
Forming or constituted by a placenta: as, *placental*
gestation; a *placental* part of the chorion.
—3. Provided with a placenta; placenterate or
placenterary: as, a *placental* mammal.—*Placental*
dystocia, difficult birth of the placenta.—*Placental*
murmur or *souffle*, a murmur heard on auscultation of
the pregnant uterus, and regarded as due to the placental
circulation.

II. *n.* A placental mammal; any member of
the *Placentalia*.

Placentalia (plās-en-tā'li-ā), *n. pl.* [*NL. (Bona-
parte, 1837), neut. pl. of placentalis: see placen-
tal.*] Placental mammals; those mammals
which are placenterate or placenterary: distin-
guished from *Implacentalia*. The *Placentalia* were
formerly one of two prime divisions of mammals, contrast-
ed with marsupials and monotremes together. The divi-
sion corresponds to *Monodelphia*, and also to *Eutheria*.
Also *Placentalia*.

placentalian (plas-en-tā'li-an), *a.* and *n.* I. *a.* Of or pertaining to the *Placentalia*; placental.

II. *n.* A member of the *Placentalia*; a placental.

Placentaria (plas-en-tā'ri-ā), *n. pl.* [NL., neut. pl. of *placentarius*: see *placentary*.] Same as *Placentalia*.

placentary (plas-en-tā'ri), *a.* and *n.* [= F. *placentaire*, < NL. **placentarius*, < *placenta*, placenta: see *placenta*.] I. *a.* 1. Of or pertaining to the placenta; placental; pertaining to the *Placentaria*.—2. Made or done with reference to the placenta or to placentation: as, a *placentary* classification.

II. *n.*: pl. *placentaries* (-riz). 1. A member of the *Placentalia*; a placental.—2. In bot., a placenta bearing numerous ovules.

Placentata (plas-en-tā'tā), *n. pl.* Same as *Placentalia*.

placentate (plā-sen'tāt), *a.* [< NL. **placentatus*, < *placenta*, placenta: see *placenta*.] Having a placenta; placenterous; placental.

placentation (plas-en-tā'shon), *n.* [= F. *placentation* = Pg. *placentação*; as *placentate* + -ion.] 1. In zool.: (a) The attachment of the embryo or fetus to the uterus by means of a placenta; uterogestation. (b) The mode in which this attachment is effected; the manner of the disposition or construction of the placenta: as, deciduate or discoidal *placentation*.—2. In bot., the disposition or arrangement of the placentas.

placenta (plā-sen'shi-ā), *a.* A word found only in the phrase-name *placenta falcon*, apparently noting the large dark area on the belly of that hawk, likened to a placenta. See *falcon*. T. Pennant.

placentiferous (plas-en-tif'ē-rus), *a.* [< NL. *placenta* + L. *ferre* = E. *bear*.] 1. Provided with a placenta; gestating in the womb, as a mammal.—2. In bot., bearing or producing a placenta; having a placenta.

Also *placentigerous*.

placentiform (plā-sen'ti-fōrm), *a.* [= F. *placentiforme*, < NL. *placenta*, placenta, + L. *forma*, form.] 1. In zool., having the form, structure, or character of a placenta.—2. In bot., shaped like a placenta; having a thick circular disk, concave in the middle on both upper and lower sides. The root of *Cyclamen* is an example.

placentigerous (plas-en-tij'ē-rus), *a.* [< NL. *placenta*, placenta, + L. *gerere*, carry.] Same as *placentiferous*.

placenterous (plā-sen'āhus), *a.* [< L. *placens* (-t), pleasing (see *pleasant*), + -ious.] Pleasant; amiable.

John Walbye, . . . a *placenterous* person, gaining the good-will of all with whom he conversed.

placentitis (plas-en-ti'tis), *n.* [NL., < *placenta*, placenta, + -itis.] Inflammation of the placenta.

placentoid (plā-sen'toid), *a.* [< NL. *placenta*, placenta, + Gr. *eidōs*, form.] Like a placenta; placenterform.

placenter-proud (plās'proud), *a.* Proud of position or rank. *Fletcher*, Wit without Money, iii. 1.

placer¹ (plā'sēr), *n.* [< *place* + -er.] One who places, locates, or sets.

Lord of creatures all,
Thou *placer* of plants both humble and tall,
Was not I planted of thine own hand,
To be the primrose of all thy land?

Spenser, Shep. Cal., February.

placer² (plas'ēr); Amer. Sp. pron. pla-sār'), *n.* [< Sp. *placer*, a place near a river where gold-dust is found (cf. *placel*, a sand-bank), < *plaza*, a place: see *place*.] In mining, a place where the superficial detritus is washed for gold or other valuable minerals. Placer-mining has hardly any other meaning in English than that of gold-washing, but it is not used in speaking of washing for gold by the hydraulic method. Washing for tin—a kind of mining not carried on in the United States—is called *streaming*.—**Placer-claim**, a mining claim to a placer deposit; under the United States mining law, a tract of mineral land upon which the owner of the claim is entitled to the ordinary surface rights and all forms of deposit, excepting veins of quartz or other rock in place, under the same circumstances and conditions as in the case of vein- or lode-claims (see *lode*), and *mining claim*, under *mining*, except that no location can include more than 20 acres for each individual claimant, and that, where the lands located under such a claim have been previously surveyed by the United States, the exterior limits of the entry must conform to the legal divisions of the public lands and rectangular subdivisions thereof. A patent for a placer-claim includes a vein or lode not at the time known to exist within its limits; but it does not include a known vein or lode, unless so expressed.

placet (plā'set), *n.* [L., it pleases; 3d pers. sing. pres. ind. of *placere*: see *please*.] 1. An

expressed sanction; permission given by one in authority; specifically, sanction granted to the promulgation and execution of an ecclesiastical ordinance, and particularly such sanction granted by a sovereign to papal bulls, briefs, and other edicts.

Such therefore is that secondary reason which hath place in divinity, which is grounded upon the *placets* of God.

Bacon, Advancement of Learning, II. 364.

2. A vote of assent in a council; a vote of the governing body in a university.

placid (plas'id), *a.* [< F. *placide* = Sp. *plácido* = Pg. It. *placido*, < L. *placidus*, gentle, mild, < *placere*, please: see *please*.] Gentle; quiet; undisturbed; equable; serene; calm; unruffled; peaceful; mild.

It conducteth unto long life and to the more *placid* motion of the spirits, that men's actions be free.

Bacon.

That *placid* intercourse (with the great minds of former ages) is disturbed by no jealousies or resentments.

Macaulay, Bacon.

That *placid* aspect and meek regard.

Milton, P. R., III. 217.

=Syn. *Tranquil*, *Serene*, etc. See *calm*.

placidious (plā-sid'ius), *a.* [< *placid* + -ious.] Gentle; placid.

Most easy, peaceable, and *placidious*.

Topseil, Four-Footed Beasts, p. 158. (Halkiwell.)

placidity (plā-sid'it-i), *n.* [= F. *placidité* = It. *placidità*, < L. *placiditas* (-t), < *placidus*, placid: see *placid*.] The state or character of being placid; tranquillity; peacefulness; quietness; calmness.

Cf. *placard*, *plague*.] A Scotch billon coin current in the fifteenth century (from 1468), and also in

Obverse. Reverse.
Plack of Mary, Queen of Scots.—British Museum.
(Size of the original.)

the sixteenth century. It was worth 4 pence Scotch (about two thirds of the United States cent), and under James VI. 8 pence Scotch.—**Plack and bawbee**, to the last farthing; fully. [Scotch.]

placket (plak'et), *n.* [< OF. *placquette*, a thin plate (a placket being appar. a patch sewed on), dim. of *plaque*, plate: see *plack*. Cf. *plaguette*, *placard*.] 1. A pocket, especially a pocket in a woman's dress.

When she comes into a great press of people, for fear of the cutpurse, on a sudden she'll swap thee into her *plackerd*.

Greene, Friar Bacon and Friar Bungay, I. 1.

Just like a plow-boy th'd in a browne jacket,
And breeches round, long leathern point, no *placket*.
Gayton, Notes on Don Quixote, p. 170. (Nares)

2. The opening or slit in a petticoat or skirt; a fent.

That a cod-piece were far fitter here than a pinned *placket*.
Fletcher (and another), Love's Cure, I. 2.

3. A petticoat; hence, figuratively, a woman. Was that brave heart made to pant for a *placket*?
Fletcher, Humorous Lieutenant, iv. 4.

If the maides a spinning goe,
Burne the flax, and fire their toe,
Scorch their *plackets*.
Herriek, Saint Dista's Day.

4. Same as *placcate*.

placket-hole (plak'et-höl), *n.* Same as *placket*, 2.

plackless (plak'les), *a.* [< *plack* + -less.] Peniless; without money.

Poor, *plackless* devils like myself! Burns, Scotch Drink.

plack-pie (plak'pi), *n.* A pie formerly sold for a plack. Scott. [Scotch.]

Placobranchia (plak-ō-brang'ki-ā), *n. pl.* [NL. (J. E. Gray, 1857), < Gr. *πλάξ* (*plāk-*), something flat, a tablet, plate, + *βράγχια*, gills.] A sub-order of nudibranchiate gastropods, established for the family *Elysidae*, characterized by having lamellar or venose gills on the upper surface of the mantle.

placoderm (plak'ō-děrm), *a.* and *n.* [< Gr. *πλάξ* (*plāk-*), a tablet, plate, + *δέρμα*, skin, < *δέρειν*, flay.] I. *a.* Having the skin covered with broad flat plates, as a fish; belonging to the *Placodermi*.

II. *n.* A ganoid fish of the group *Placodermi*.

placodermal (plak'ō-děrm'al), *a.* [< *placoderm* + -al.] Same as *placodermi*.

Placodermata (plak'ō-děrm'atā), *n. pl.* [NL.: see *placodermi*.] Same as *Placodermi*.

placodermatous (plak'ō-děrm'at-us), *a.* Same as *placodermi*.

Placodermi (plak'ō-děrm'i), *n. pl.* [NL.: see *placoderm*.] An order of fishes, constituted for some remarkable Paleozoic forms of doubtful relationships. It has been variously defined. As usually limited, it includes fishes which had a persistent notochord, neural and hemal spines and interspinals connecting with a dorsal and an anal fin, a jointed pectoral appendage enclosed in a bony covering, the head and front of the body inclosed by bony dorsal and ventral shields, no ventrals, and a distinct lower jaw. Thus limited, it has been made to include the families *Coccolepidi* and *Dinichthyidae*. Also *Placodermata*, *Placogonoidi*.

placodont (plak'ō-dont), *n.* [< *Placodus* (-odont).] A member of the group *Placodontia* or family *Placodontidae*.

Placodontia (plak'ō-don'ti-ā), *n. pl.* [NL., < Gr. *πλάξ* (*plāk-*), a tablet, plate, + *δόντις* (*dōnt-*) = E. *tooth*.] A group of extinct reptiles, which had double nares (the posterior nares opening directly into the roof of the mouth by horizontal apertures, as in the sauropterygians), no floor to the narial passage, and maxillary as well as palatal teeth. It has been referred to the fishes, and among the reptiles to the *Sauropsid*; but late systematists regard it as a suborder of the order *Theromora*.

Placodontidae (plak'ō-don'ti-dē), *n. pl.* [NL., < *Placodus* (-odont) + -idae.] A family of extinct reptiles, represented by the genus *Placodus*. They are the only known members of the group *Placodontia*. The general form is unknown. The skull was broad behind, with an apparently compound temporal arcade and a postorbital bar; the teeth around the palate were like paving-stones. The species lived in the Triassic period.

Placodus (plak'ō-dus), *n.* [NL., < Gr. *πλάξ* (*plāk-*), a tablet, plate, + *δόντις* = E. *tooth*.] A genus of reptiles having pavement-like teeth. *P. gigas* is a species of the Trias.

placogonoid (plak'ō-gan'oid), *a.* and *n.* [< Gr. *πλάξ* (*plāk-*), a tablet, plate, + E. *ganoid*.] I. *a.* Having a placoid exoskeleton, as a ganoid fish; belonging to the *Placogonoidi*.

II. *n.* A member of the *Placogonoidi*.

placogonoid (plak'ō-gan'oid), *a.* and *n.* [< *placogonoid* + -an.] Same as *placogonoidi*.

Placogonoidi (plak'ō-gan'oid-i), *n. pl.* [NL.: see *placogonoid*.] Same as *Placodermi*.

placoid (plak'oid), *a.* and *n.* [< Gr. **πλακώδης*, contr. *πλακώδης*, flat, < *πλάξ* (*plāk-*), a tablet, plate, + *είδος*, form.] I. *a.* 1. Plate-like: noting the dermal investments of sharks, which take the place of true scales and are the ossified papillae of the cutis. In combination they form the shagreen of the shark. The name is also extended to the tubercular or thorn-like armature of the skin in rays.

2. Having placoid scales, as a fish; belonging to the *Placoidi*. See cut under *scale*.—**Placoid exoskeleton**, the shagreen, ichthyodorulites, or other forms of the dermal defenses of the elasmobranchiate fishes.

II. *n.* A member of the *Placoidi*.

Placoides (plā-koi'dē-ē), *n. pl.* [NL.] Same as *Placoides*.

placoidian (plā-koi'dē-an), *a. and n.* [*< placoid + -an.*] Same as *placoid*.

Placoidi (plā-koi'dē-i), *n. pl.* [NL.: see *placoid*.] In Agassiz's classification, an artificial group of fishes, having placoid scales: correlated with *Ctenoidi*, *Cycloidi*, and *Ganoidi*. It is mainly equivalent to the class *Elasmobranchii*, but also included the naked marsipobranchs.

placoidian (plā-koi'dē-an), *n.* [*< placoid + -ian.*] Same as *placoid*.

Placophora (plā-kof'ō-rā), *n. pl.* [NL., < Gr. *πλάξ* (plāk-), a tablet, plate, + *φέρω* = E. *bear*¹.] In Gegenbaur's system of classification, one of two primary divisions of the *Mollusca*, consisting of the chitons only. The *Polyplacophora* and *Amphopnea* of Lankester, though of a very different taxonomic grade, are conterminous. See *Polyplacophora*, and cut under *Chitonidae*.

placophoran (plā-kof'ō-ran), *a. and n.* [*< placophor-ous + -an.*] I. *a.* Placophorous; belonging to the *Placophora*. II. *n.* A member of the *Placophora*; a chiton.

placophorous (plā-kof'ō-rus), *a.* [*< Gr. πλάξ* (plāk-), a tablet, plate, + *φέρω* = E. *bear*¹.] Same as *placophoran*.

placula (plāk'ū-lā), *n.; pl. placulae* (-lā). [NL., dim., < Gr. *πλάξ* (plāk-), a tablet, plate.] A little plate or plaque; specifically applied to certain discoidal embryos consisting of a mass of cleavage-cells disposed as a plate or layer: see *monoplacula* and *diploplacula*. Hyatt, Proc. Bost. Soc. Nat. Hist., 1884, p. 97.

placular (plāk'ū-lār), *a.* [*< placula + -ar*³.] Plate-like; flat and broad; having the character of a placula.

placulate (plāk'ū-lāt), *a.* [*< placula + -ate*¹.] Having the form of a placula; being a placula or in the placular stage of development, as an embryo.

Placuna (plā-kū'nā), *n.* [NL. (Bruguière, 1792), < Gr. *πλάξ* (plāk-), a tablet, plate.] The typical genus of *Placunidae*. They have thin, more

Saddle-shell (*Placuna sella*).

or less translucent shells, which are nearly equivalve, and no byssus. Several species inhabit East Indian seas. *P. placenta* is known as the *window-shell*. *P. sella* as the *saddle-shell*.

Placunidae (plā-kū'nī-dē), *n. pl.* [NL., < *Placuna* + *-idae*.] A family of bivalve mollusks, typified by the genus *Placuna*, whose species are generally associated in the same family with the typical *Acroniidae*, and are known as *window-shells*, *window-oysters*, and *saddle-shells*.

pladarosis (plā-dā-rō'sis), *n.* [NL., < Gr. *πλαδάριος*, become soft and flabby, < *πλαδάρος*, wet, damp, flaccid, flabby, < *πλάσσω*, be flaccid.] A soft tumor or wart on the eyelid. Also *pladarosis* and *pladaroma*.

plafond (plā-fond'), *n.* [= Sp. *plafon*; < F. *plafond*, ceiling, < *plat*, flat (see *plate*), + *fond*, bottom: see *fund*¹, *found*².] In arch., the ceiling of a room, whether flat or arched; also, the under side of the projection of the larmier of a cornice, and generally any soffit. Also *plafond*.

plaga (plā'gā), *n.; pl. plagae* (-jē). [NL., < L. *plaga*, a blow, stroke, wound, stripe: see *plague*.] In zool., a stripe or streak of color. — *Plaga scapularis*, in entom., same as *parapleuralis*.

plagal (plā'gal), *a.* [= F. *plagal* = It. *plagale*, < ML. *plagiū*, < Gr. *πλάγιος*, sidewise, slanting, thwart, oblique, < *πλάγος*, *πλάγος*, side.] I. In *Gregorian music*, noting a mode or melody in which the final is in the middle of the compass instead of at the bottom: opposed to *authentic*. See *mode*¹, 7. — 2. In *modern music*, noting a cadence in which the chord of the tonic is preceded by that of the subdominant. See *cadence*.

plagard, *n.* Same as *placard*, 4, for *placate*.

plagate (plā'gāt), *a.* [*< plaga + -ate*¹.] Striped or streaked.

plage¹, *n.* A Middle English form of *plague*.

plage² (plāj), *n.* [*< ME. plage, < OF. plage* (also *plais*), F. *plage* = Sp. Pg. It. *plaga*, < L. *plaga*, region, quarter, tract. Cf. Gr. *πλάγος*, the side: see *plagal*.] 1. A region; a district.

Alle Cristen folk ben fled fro that contrée
Thurgh payens, that conquereden al aboute
The plagis of the North by land and see.
Chaucer, Man of Law's Tale, l. 445.

As far as from the frozen plage of heaven
Unto the watery morning's ruddy bower.
Marlowe, Tamburlaine, l. iv. 4.

2. Quarter of the compass.
Now hastow her the foure quarters of thin astrelable,
devyded after the foure principals plagis or quarters of the
firmament.
Chaucer, Astrolabe, l. 5.

Plagianthus (plāj-i-an'thus), *n.* [NL. (J. and G. Forster, 1776), < Gr. *πλάγιος*, oblique, + *ἄνθος*, flower.] A genus of polypetalous shrubs of the order *Malvaceae* and the tribe *Malveae*, unlike the other genera of its subtribe *Sideseae* in its longitudinally stigmatose style-branches, and characterized by a five-cleft calyx, distant or obsolete bracteoles, many-cleft stamen-column, and one, two, or many carpels, each with one pendulous seed. There are 11 species, all natives of Australia and New Zealand. They bear alternate or clustered, usually entire or angled leaves, and polygamous red, whitish, or yellowish flowers, usually small and densely crowded in the axils or in a terminal spike. Several low shrubby species produce a useful fiber. (See *hemp-bush* and *curragong*.) *P. betulinus*, the ribbon-tree of Otago, New Zealand, also called *cotton-tree*, *lacebark*, and *akaroa-tree*, is an evergreen reaching sometimes 70 feet, though usually a tangled bush, and yields a very fine tough fiber resembling flax, derived from the inner bark of the young branches.

plagiarise, *v.* See *plagiarize*.
plagiarism (plā'ji-a-rizm), *n.* [= Pg. *plagiarismo*; as *plagiary* + *-ism*.] 1. The purloining or wrongful appropriation of another's ideas, writings, artistic designs, etc., and giving these forth as one's own; specifically, the offense of taking passages from another's compositions, and publishing them, either word for word or in substance, as one's own; literary theft.

Sir J. Reynolds has been accused of *plagiarism* for having borrowed attitudes from ancient masters. Not only candour but criticism must deny the force of the charge.
Walpole, Anecdotes of Painting, IV., adv. p. vii., note.

2. A passage or thought thus stolen.

plagiarist (plā'ji-a-rist), *n.* [*< plagiary + -ist*.] One who plagiarizes; one who is guilty of plagiarism.

You glean from the refuse of obscure volumes, where more judicious plagiarists have been before you; so that the body of your work is a composition of drugs and sediments—like a bad tavern's worst wine.
Sheridan, The Critic, l. 1.

plagiarize (plā'ji-a-riz), *v.; pret. and pp. plagiarized, ppr. plagiarizing.* [*< plagiary + -ize*.] I. *trans.* To steal or purloin from the writings or ideas of another: as, to plagiarize a passage.

II. *intrans.* To commit plagiarism.

Also spelled *plagiarise*.
plagiary (plā'ji-a-ri), *n. and a.* [Formerly *plagiarius*; < F. *plagaire* = Sp. Pg. It. *plagiario*, a kidnapper, a plagiarist, < L. *plagiarius*, a kidnapper, plagiarist, < (LL.) *plagium*, kidnapping, prob. < *plaga*, a net, snare, trap, prob. orig. **placa*, < *pleo-tere* = Gr. *πλέκω*, weave: see *plat*.] I. *n.*; pl. *plagiaries* (-riz). 1. A manstealer; a kidnapper.

He was a Cyrenean by birth, and . . . in the time of his minority or child-hood he was by some *Plagiary* stolne away from his friends, and sold to the Iamaelite Merchant.
Purchas, Pilgrimage, p. 243.

2. A plagiarist.
Why, the ditty 's all borrowed; 'tis Horace's; hang him, *plagiary*!
B. Jonson, Postaster, iv. 1.

3. The crime of literary theft; plagiarism.
Plagiary had not its nativité with printing, but began in times when thefts were difficult, and the paucity of books scarce wanted that invention.
Sir T. Browne, Vulg. Err., l. 6.

II. *a.* 1. Manstealing; kidnapping.
Plagiary and man-stealing Tartars.
Brown, Travels (1855), p. 62. (Latham.)

2. Practising literary theft.
Or a Hos ego from old Petrarch's spright
Unto a *plagiary* sonnet-wright.
Sp. Hall, Satires, IV. ll. 84.

Plagiulacidae (plā'ji-lās'i-dē), *n. pl.* [NL., < *Plagiulax* (-lac-) + *-idae*.] A widely distributed family of fossil mammals, typified by the genus *Plagiulax*. The premolars were obliquely grooved and the last was enlarged, the true molars two on each side and small, and the incisors of the lower jaw inclined forward and two in number. The family was for-

merly referred to the marsupials, but by recent writers is generally relegated to the *Prototheria*, as a representative of a peculiar order, *Multituberculata*. Remains referred to this family occur in Europe and America, ranging in geologic time from the Triassic to the Eocene.

Plagiulax (plā'ji-lās'), *n.* [NL., < Gr. *πλάγιος*, oblique, + *αὐλαξ*, furrow.] A genus of fossil primitive mammals from the Purbeck beds of the Upper Oolite, as *P. becclesi*, *P. minor*, and others. See *diprotodont*, *polyprotodont*.

plagihedral (plā'ji-hē'dral), *a.* [= F. *plagihédre*, < Gr. *πλάγιος*, oblique, + *ἑδρα*, seat, base.] In crystal., having faces obliquely arranged, as in certain hemihedral forms which are enantiomorphous to their complementary forms—that is, related to them as a right glove is to the left: this is true of the trapezohedral planes on a quartz crystal.

plagioccephalic (plā'ji-ō-se-fal'ik or -sef'a-lik), *a.* [*< plagioccephal-ous + -ic*.] 1. Having a broad head with flattened forehead. *Jour. Anthropol. Inst.*, III. 90.—2. Pertaining to or exhibiting plagioccephaly.

plagioccephalous (plā'ji-ō-sef'a-lus), *a.* [*< Gr. πλάγιος*, oblique, + *κεφαλή*, head.] Same as *plagioccephalic*, 1.

plagioccephaly (plā'ji-ō-sef'a-li), *n.* [*< plagioccephal-ous + -y*.] Oblique deformity of the skull, such that the anterior part of one half is more developed, and similarly the posterior part of the other half.

plagiocitrite (plā'ji-ō-sit'rit), *n.* [*< Gr. πλάγιος*, oblique, + L. *citrus*, citrus (see *citrus*), + *-ite*².] A hydrous sulphate of iron, aluminium, sodium, and potassium, occurring in fibrous crystalline forms of a lemon-yellow color near Bischofsheim vor der Rhön, in Bavaria.

plagioclase (plā'ji-ō-klās), *n.* [*< Gr. πλάγιος*, oblique, + *κλάσις*, fracture, < *κλάν*, break.] The name given by Breithaupt to the group of triclinic feldspars the two prominent cleavage-directions in which are oblique to each other. The plagioclase-feldspar group includes albite, anorthite, and the intermediate species, oligoclase, andesine, labradorite; with these the triclinic potash feldspar microcline is sometimes included. See *feldspar*.

plagioclastic (plā'ji-ō-klas'tik), *a.* [*< Gr. πλάγιος*, oblique, + *κλάσις*, broken; cf. *clastic*.] Breaking obliquely; characterized by two different cleavages in directions oblique to one another, or pertaining to a mineral (as one of the triclinic feldspars) which has this property.

Plagiodon (plā'ji-ō-don), *n.* [NL. (orig. *Plagiodontia*, F. Cuvier, 1836), < *πλάγιος*, oblique, + *ὄδοντος* (ōdōn'tos) = E. *tooth*.] 1. A West Indian genus of small hystriecomorphic rodents of the family *Octodontidae* and subfamily *Echinomy-*

Plagiodon antium.

inae: so called from the diagonal grooves of the molars. The molars are rootless; the thumb is rudimentary; the tail is short and scaly; the fur is coarse, with silky under-fur; the muzzle is blunt; and the whole form is stout. The genus is closely related to *Capromys*. There is only one species, *P. antium* of San Domingo.

2. A genus of reptiles. *Duméril*.—3. A genus of mollusks. *Isaac Lea*.

plagiodont (plā'ji-ō-dont), *a.* [*< Gr. πλάγιος*, oblique, + *ὄδοντος* (ōdōn'tos) = E. *tooth*.] Having the teeth oblique: noting the dentition of serpents whose teeth are like one another, those of the palate being set in two converging series.

Plagiodus (plā'ji-ō'dus), *n.* [NL. (orig. *Plagiodus*, Steller, 1811): see *Plagiodon*.] Same as *Alepidosaurus*. See cut under *handsaw-fish*.

plagionite (plā'ji-ō-nit), *n.* [*< Gr. πλάγιος*, oblique, + *-n- + -ite*².] A sulphid of antimony and lead, occurring in oblique monoclinic crystals and in massive forms. It has a dark lead-gray color and metallic luster.

Plagiostoma¹ (plā'ji-ōs'tō-mā), *n.* [NL. (Sowerby, 1812), fem. sing.: see *plagiostome*.] A genus of bivalve mollusks of the family *Limidae*, or a subgenus of *Lima*, containing such species as *P. cardiformis*. See cut under *Lima*.

Plagiostoma² (plā-jī-os'tō-mā), *n. pl.* [NL., neut. pl.: see *plagiostome*.] Same as *Plagiostomi*. *Nilsson*, 1832.

Plagiostomata (plā'jī-ō-stō-mā-tā), *n. pl.* [NL.; cf. *Plagiostoma*².] The *Plagiostomi* as an order of *Chondropterygii*. *Günther*.

plagiostomatous (plā'jī-ō-stō-mā-tus), *a.* [*Plagiostomata* + *-ous*.] Same as *plagiostomous*.

plagiostome (plā'jī-ō-stōm), *a. and n.* [*Gr. πλάγιος*, oblique, + *στόμα*, mouth.] I. *a.* *Plagiostomous*.

II. *n.* A plagiostomous fish; any member of the *Plagiostomi*, as a selachian.

Plagiostomi (plā-jī-os'tō-mī), *n. pl.* [NL., *Gr. πλάγιος*, oblique, + *στόμα*, mouth.] In the older systems, an order of chondropterygian or elasmobranchiate fishes, including all the sharks and rays. In some recent systems it has been used as a superordinal or subclass name of the same group. Its characteristics are the development of a distinct suspensorium for the mandible (consisting of the undivided palatoquadrate cartilage), five to seven pairs of branchial apertures, and no operculum.

plagiostomous (plā-jī-os'tō-mus), *a.* [As *Plagiostomi* + *-ous*.] Of or pertaining to the *Plagiostomi*. Also *plagiostomatous*.

Plagiotoma (plā-jī-ōt'ō-mā), *n.* [NL. (*Dujardin*), *Gr. πλάγιος*, oblique, + *-τομή*, *cut*, *τέμνω*, *cut*.] A genus of heterotrichous ciliate infusorians of the family *Bursariidae*. *P. lumbrici* is known as the *bean-animalcule* of the intestine of the earthworm.

Plagiotremata (plā'jī-ō-trē-mā-tā), *n. pl.* [NL., *Gr. πλάγιος*, oblique, + *τρήμα*, hole.] A subclass of *Reptilia*: same as *Lepidosauria*.

plagiotropic (plā'jī-ō-trop'ik), *a.* [*Gr. πλάγιος*, oblique, + *τροπή*, a turning, direction, *τρέπω*, turn.] In bot., exhibiting or characterized by plagiotropism.

plagiotropically (plā'jī-ō-trop'i-kā-lī), *adv.* With plagiotropism.

plagiotropism (plā-jī-ōt'ō-piz-m), *n.* [*Gr. plagiotrop-ic* + *-ism*.] In bot., oblique geotropism; a turning by which the organs of certain plants have their long axes more or less divergent from the vertical—that is, across the direction of gravitation or of the ray of light. Compare *orthotropism*.

The *plagiotropism* of dorsi-ventral organs, such as shoots and leaves, is a more complicated phenomenon. It is the resultant expression of the effect of light and of gravity upon them, promoted, in many cases, by their own weight. In some cases light, and in others gravity, is the determining factor. *Vines*, *Physiol. of Plants*, p. 502.

plagium (plā'jī-um), *n.* [L., kidnapping: see *plagiary*.] In *civil* and *Scots law*, the crime of stealing men, women, or children, formerly punishable with death.

Plagopterinæ (plā-gop-te-rī-nē), *n. pl.* [NL., *Gr. Plagopterus* + *-inæ*.] A subfamily of cyprinoid fishes: same as *Medinæ*.

Plagopterus (plā-gop'te-rus), *n.* [NL. (*Cope*, 1874), so called with ref. to the large dorsal spine, which is capable of inflicting a wound; *L. plaga*, a wound, + *Gr. πτερόν*, wing (fin).] A genus of cyprinoid fishes, with a stout spine on the front of the dorsal fin: same as *Meda*.

plague (plāg), *n.* [*ME. plague*, *OF. plague*, *plage*, vernacularly *plaie*, *F. plaie* = *Sp. plaga*, *plague*, *llaga*, wound, sore, ulcer, = *Pg. chaga*, wound, sore, ulcer, = *It. plaga*, wound, sore, calamity, = *D. plaag* = *MLG. plage* = *OHG. plāga*, *MHG. blāge*, *plāge*, *pfāge*, *phlāg*, *G. plage* = *Icel. plāga* = *Sw. plāga* = *Dan. plage*, *plague*, *L. plaga*, a plague, pestilence, affliction, slaughter, destruction; particular uses of *L. plaga*, a blow, shock, cut, thrust, injury, misfortune (= *Gr. πλῆγμα*, a blow, shock, wound, misfortune), *plangere* (√ *plag*) = *Gr. πλῆσσειν*, strike.] 1. A blow or calamity; severe trouble or vexation; also, one who or that which troubles or vexes, or ravages or destroys.

Oh, what a plague were it that a strange king, of a strange land and of a strange religion, should reign over us! *Latimer*, 1st Sermon bef. Edw. VI., 1549.

He had a wife who was the plague of his days. *Farmer's Old Wife* (Child's Ballads, VIII. 257). But of all plagues, good Heaven, thy wrath can send, Save, save, oh, save me from the candid friend! *Canning*, *Poetry of the Anti-Jacobin*, p. 242.

In 1280 the Bishop of Hebron, vicegerent of the patriarch, sends the thanks of the Franks, and adds that Armenia and Cyprus have been laid waste by a plague of locusts. *Stubbs*, *Medieval and Modern Hist.*, p. 186.

2. Any epidemic disease of high mortality. The disease known specifically as the *plague*, or *bubo plague*, entered Europe from the Levant in the sixteenth century, and lingered there in scattered localities over a thousand years. It has appeared in various regions (Egypt, Turkey, Persia, etc.) in the nineteenth century; the last occurrence in Europe was in the Volga district, in 1878-9. Typical cases,

after a period of incubation of from two to seven days, begin suddenly with prostration, headache, dizziness, and sometimes vomiting and diarrhea; after a few hours or one or two days a chill develops, followed by high fever with noisy delirium, passing into coma; on the second to the fourth day buboes, most frequently inguinal, develop; in non-fatal cases they more frequently suppurate than resolve; there may also be carbuncles, boils, and petechie; convalescence begins from the sixth to the tenth day. The mortality is extreme, sometimes running as high as 96 per cent. The black-death of the fourteenth century may have been a modified form of this plague; so, too, the Fall plague. Also called the *pest*, the *pestilence*, *plandular plague*, or *pestilence*, *inguinal plague*, *Levanti* or *Levantine plague*, *Justinian plague*.

Therefore a great fool were he that would presume to cure these *plagues* of pestilence that ben vncurable. *Book of Quinte Essence* (ed. Furnivall), p. 24.

A plague upon the people fell, A famine after laid them low. *Tennyson*, *The Victim*.

3. As an expletive with the article *the*, used like *the devil*, *the deuce*, etc. Compare *devil*, 7.

How the plague shall I be able to pass for a Jew? *Sheridan*, *School for Scandal*, III. 1.

Indian plague, a pestilential disease which prevailed locally in northwestern India during the nineteenth century, similar in some respects to the plague as described under *d.t.* 2, and perhaps identical with it. Also called *Palé plague*.—*Plague* on or upon, may a plague or curse descend upon (the person or thing mentioned): commonly used lightly, in a diminished sense, and expressing mere annoyance.

A plague o' both your houses! *Shak.*, *R. and J.*, III. 1. 94.

Plague on your pity, ma'am! I desire none of it. *Sheridan*, *School for Scandal*, v. 2.

To be at the plague, to take the trouble. [*Scotch.*]

But I can seldom be at the plague, an' it binna when my bluid's up. *Scott*, *Heart of Mid-Lothian*, xxvi.

plague (plāg), *v. t.*; pret. and pp. *plagued*, ppr. *plaguing*. [= *MLG. plagen* = *MHG. T. Roosevelt, Hunting Trips, p. 6.

plain-song (plā'n'song), *n.* 1. The unisonous vocal music which has been used in the Christian church from its earliest centuries. Its origin is unknown, but it contains elements taken from the ancient Greek music, and possibly also from the ancient Temple music of the Hebrews. It is often called *Gregorian*, from its most prominent early systematizer, or in certain details, *Ambronian*. It rests upon an elaborate system of octave scales or modes. (See *mode*, 7.) According to the principles and rules of these modes, numerous melodies have been composed or compiled, which have become established by tradition or authority as parts of the liturgies of the Western Church in general and of the modern Roman Catholic Church in particular. This body of melodies includes a great variety of material adapted not only to every part of the liturgy, but to the several seasons of the Christian year. Plain-song melodies are distinguished by adherence to the medieval modes, by independence of rhythmical and metrical structure, and by a limited and austere use of harmony. Their effect is strikingly individual, dignified, and devotional. The style as such is obligatory in the services of the Roman Catholic Church, and has been perpetuated there with remarkable purity, in spite of its contrasts with modern music in general. It has exerted a profound influence upon general musical development, dominating that development until nearly 1600, and furnishing innumerable hints and themes to all subsequent styles. The medieval theory of counterpoint was a direct outgrowth of the melodic principle of plain-song. See *Gregorian, tone, mode*, *antiphon, introit*, and *psalm-song*.

2. A cantus firmus or theme chosen for contrapuntal treatment: so called because often an actual fragment of plain-song.—3. The simple notes of an air, without ornament or variation; hence, a plain, unexaggerated statement.

plain-table, *n.* See *plane-table*.

plaintful (plānt'fūl), *a.* [*< plaint + -ful.*] Complaining; expressing sorrow with an audible voice; also, containing a plaint.

Hark, *plaintful* ghosts, infernal furies, hark
Unto my woes the hateful heavens do send.

Sir P. Sidney, Arcadia, III.

plaintiff, *n.* and *a.* An obsolete form of *plaintive*, *plaintive*.

plaintiff (plān'tif), *n.* and *a.* [Formerly also *plaintif*, *plaintife*; *< ME. plaintif, playntif*, *< OF. plaintif*, complaining; as a noun, one who complains, a plaintiff: see *plaintive*.] 1. *n.* In *law*, the person who begins a suit before a tribunal for the recovery of a claim: opposed to *defendant*.

And 'tis well that you
Begin, else I had been the *Plaintif* now.

J. Beaumont, Psyché, iv. 30.

Calling of the plaintiff. See *calling*.—*Nominal plaintiff*, one who appears by name as plaintiff upon the record, but has no interest in the action. Also *nominal party*.

II. *a.* Complaining.

His younger Son on the polluted Ground,
First Fruit of Death, lies *Plaintif* of a wound
Given by a Brother's Hand. *Prior*, Solomon, III.

plaintive (plān'tiv), *a.* [*< F. plaintif*, lamenting; *< plainte*, lament: see *plaint*. Cf. *plaintif*.] 1. Lamenting; complaining; giving utterance to sorrow or grief; repining.

To soothe the sorrows of her *plaintive* son.
Dryden, Illiad, l. 490.

2. Expressive of sorrow or melancholy; mournful; sad: said of things: as, a *plaintive* sound; a *plaintive* air; a *plaintive* song.

Whose *plaintive* strain each love-sick miss admires,
And o'er harmonious fustian half expires.

Byron, Eng. Bards and Scotch Reviewers.

=*Syn.* *Plaintive, Querulous*, woful, rueful. *Plaintive* and *querulous* agree in expressing weakness. He who is *querulous* is ready to find fault over trivial matters, and in a weak, captious, tired way; there is a tone recognised as *querulous*. *Plaintive* is rarely said of persons; a *plaintive* tone or utterance conveys a subdued regret or lamentation: as, the *plaintive* note of the mourning dove. See *petulant*.

The *plaintive* wave, as it broke on the shore,
Seemed sighing for rest for evermore.

Jones Verr, Poems, p. 120.

Quickened the fire and laid the board,
Mid the croon's angry, *querulous* word
Of surly wonder.

William Morris, Earthly Paradise, III. 69.

plaintively (plān'tiv-li), *adv.* In a plaintive manner; mournfully; sadly.

plaintiveness (plān'tiv-ness), *n.* The quality of being plaintive; mournfulness.

plaintless (plānt'les), *a.* [*< plaint + -less.*] Without complaint; unrepining.

By woe, the soul to daring action swells;
By woe, in *plaintless* patience it excoals.

Savage, The Wanderer, II.

plain-wanderer (plān'won'dér-ér), *n.* A bush-quail of the genus *Pedionomus*: as, the collared *plain-wanderer*, *P. torquatus*. [A book-name.]

plain-wave (plān'wāv), *n.* A British geometrid moth, *Acidalia inornata*.

plain-work (plān'wérk), *n.* Plain needlework, as distinguished from embroidery.

plaisance, *n.* [*< F. plaisance, pleasure: see pleasure.*] An obsolete form of *pleasure*.

Pleasures, and joy, and a lively spirit, and a pleasant conversation, and the innocent caresses of a charitable humanity, is not forbidden.

Jer. Taylor, Works (ed. 1835), I. 742.

plaiset, *n.* See *plaise*.

plaster, *n.* and *v.* An obsolete or archaic form of *plaster*.

plait (plāt), *n.* [Also *plat*, *pleat*, and (obs.) *plight*; early mod. E. also *playt*, *pleyght*, etc.; *< ME. platte, playte*, *< OF. pleit, plet, ploit*, *F. pli*, a fold, ply, = *Fr. pleg, plec* = *Sp. pliegue* = *Pg. prega* = *It. piega*, a fold, *< ML. as if "plictum"*, neut., *"plicita"*, fem., for *plicatum, plicata*, neut. and fem. of *L. plicatus*, pp. of *plicare*, fold: see *ply*.] 1. A flattened gather or fold; an overlapping fold made by doubling cloth or some similar fabric in narrow strips upon itself.

They use all one manner of appareyl: as longe coates withoute *pleyghtes* and with narrow sleeves, after the manner of the Hungaryans.

R. Eden, tr. of Sigismundus Liberis (First Books on America, ed. Arber, p. 320).

That attire,

E'en as it sits on thee, not a *plait* alter'd.

Middleton, A Mad World, iv. 4.

It is very difficult to trace out the figure of a vest through all the *plaits* and folding of the drapery. *Addison*.

2. A braid, as of hair, straw, etc.

But in and cam the Queen herself,

W' gowd *plait* on her hair.

Mary Hamilton (Child's Ballads, III. 325).

A high crown of shining brown *plaits*, with curls that floated backward.

George Eliot, Felix Holt, v.

3. Rope-yarn strands braided into sennit.—*Bradfordian*, *Laghorn*, etc., *plait*. See the qualifying words.

plait (plāt), *v.* [Also *plat*, *pleat*, and (obs.) *plight*; *< ME. plaiten, playtyn, plaitin, pleten*, *< playte, plaite*, etc.: see *plait*, *n.*] 1. *trans.* 1. To fold; double in narrow strips: as, to *plait* a gown or a sleeve. See *plaiting* and *box-plaiting*.—2. To braid; interweave the locks or strands of: as, to *plait* the hair.

She has *plaited* her yellow locks
A little abune her bree.

Hynde Etin (Child's Ballads, I. 294).

I'll weave her Garlands, and I'll *plait* her Hair.

Prior, Henry and Emma.

3. To mat; felt. *E. H. Knight*.

II. *intrans.* To twist; twine.

The worm lept out, the worm lept down,
She *plaited* round the stone;
And ay as the ship came to the land
She banged it off again.

The *Laidley Worm of Spindleston-hough* (Child's Ballads, I. 286).

plaited (plā'ted), *p. a.* 1. Folded; made in or with, or marked by, folds or flattened flutings; *pleated*: as, a shirt with a *plaited* bosom.

The *Romance*, of any other people most severe censurers of decency, thought no upper garment so comely for a churlish man as a long *plaited* gown.

Pattenham, Arte of Eng. Poetrie, p. 237.

2. In *bot.* and *zool.*, folded lengthwise like the plaits of a closed fan; fluted.—3. Wrinkled; contracted; knitted.

A conflicting of shame and ruth
Was in his *plaited* brow. *Keats*, Endymion, l.

4. Braided; interwoven: as, *plaited* hair.

Though barks or *plaited* willows make your hive,
A narrow inlet to their cells contrive.

Addison, tr. of Virgil's Georgics, iv.

5. Tangled; intricate.

Time shall unfold what *plaited* cunning hides.

Shak., Lear, I. 1. 283.

Plaited lace. See *lace*.—**Plaited stitch**, one of the stitches of worsted work or Berlin wool work, in which the threads span a considerable distance at each insertion, the result being a sort of herring-bone pattern.—**Plaited string work**, a kind of fancy work made with small cord, or ordinary string, narrow ribbon, or tape, which is plaited or twisted into simple patterns.—**Plaited worms**, the *Apidogasteridae*.

plaiter (plā'tér), *n.* [*< plait + -er*.] One who or that which plaits or braids; especially, an implement for producing plaits of regular size, as in cloth.

plaiting (plā'ting), *n.* [Verbal *n.* of *plait*, *v.*] 1. The act or process of making plaits or folds, or of interweaving or braiding two or more strands, fibers, etc.

Plaiting appears to have been the process first practised; for short fibers, such as grass, rushes, &c., can be used without the aid of spinning by this means.

A. Barlow, Weaving, p. 404.

2. Plaits, folds, or braids taken collectively.—3. In *hat-making*, the felting or interweaving of the hair to form the body by means of pressure, motion, moisture, and heat. Also called *hardening*.

plaiting-machine (plā'ting-mā-shēn'), *n.* A machine for forming plaits in cloth; a *plaiter*. In simple forms it is merely a board with a series of needles hinged to one side, the fabric being folded in plaits under the needles in any manner desired, and held in position by the needles till the form has been impressed by a hot iron. Other machines, whether serving as attachments to sewing-machines or working independently, operate by means of reciprocating blades, which tack or push the fabric into plaits, these plaits being fixed by means of hot irons or heated cylinders.

plait-work (plāt'wérk), *n.* Decoration by means of interlacing or interwoven bands, seeming as if plaited together. Compare *strap-work*.

plakat (plak'at), *n.* [Siamese name.] The fighting-fish.

plan (plan), *n.* [= D. G. Dan. Sw. *plan*, *< F. plan*, a ground-plot of a building (= *Sp. plan*, *plano* = *Pg. plano* = *It. piano*), *< plan*, flat, a later form than the vernacular *plain*, *< L. planus*, flat, plane: see *plain*, *plane*.] 1. The representation of anything drawn on a plane, as a map or chart; specifically, the representation of a building or other structure in horizontal section, as it stands or is intended to stand on the ground, showing its extent, and the division and distribution of its area into apartments, rooms, passages, etc., or its method of construction and the relation of its parts. The *raised plan* of a building is the same as an *elevation*. A *geometrical plan* is one drawn to scale, or one in which the solid and vacant parts are represented in their natural proportions. A *perspective plan* is one the lines of which follow the rules

of perspective, thus showing more distant parts smaller than they are in fact in relation to the nearer parts. The term *plan* may be applied to the draft or representation of any projected work on paper or on a plane surface: as, the plan of a town or city, or of a harbor or fort. See *cut* under *camp* and *canal-lock*.

2. Disposition of parts according to a certain design.

Expatiate free o'er all this scene of man,
A mighty mass! but not without a plan.

Pope, Essay on Man, l. 6.

Man only mars kind Nature's plan,
And turns the fierce pursuit on man.

Scott, Rokeby, III. 1.

3. A formulated scheme for the accomplishment of some object or the attainment of an end; the various steps which have been thought out and decided upon for the carrying out of some project or operation.

Where there seemed nothing but confusion, he can now discern the dim outlines of a gigantic plan.

H. Spencer, Social Statics, p. 322.

The very fact of a plan implies a logical procedure.

W. L. Davidson, Mind, XII. 253.

4. A method or process; a way; a custom.

For why? because the good old rule
Summeth them, the simple plan,
That they should take who have the power,
And they should keep who can.

Wordsworth, Rob Roy's Grave.

5. A type of structure: as, man is the highest development of the vertebrate plan; the plan of a mollusk or an insect.—*American plan*. See *American*.—*Common plan*. In *biol.*, an archetype.—*Details of a plan*. See *detail*.—*European plan*. See *European*.—*Half-breadth plan*, in ship-building, a plan showing the

Half-breadth Plan.

various lines of one longitudinal half of a ship projected on the horizontal plane.—*Hemal plan*, in mollusks, that modification of the common plan in which, by disproportionate growth of the postabdomen, the intestine acquires a hemal flexure: distinguished from *neural plan*.—*Instalment plan*. See *instalment*.—*Neural plan*, in mollusks, that modification of the common plan in which, by disproportionate growth of the abdomen, the intestine acquires a neural flexure: distinguished from *hemal plan*.—*Plan of campaign*. (a) A formulated scheme for carrying on a campaign. (b) In Ireland, a system of procedure formed in 1886 and supported by the National League. The officers of the League, acting as trustees, received the rent of tenants on rack-rented estates; this money, less a certain abatement demanded by the tenants, was offered to the landlord; if the latter refused it, it was used for support in cases of eviction.—*Working-plan*, a draft, drawn to a large scale, supplied to artisans or workmen to work from.—*Syn.* 1. Draft, delineation, sketch.—2. *Plan*, *Scheme*, *Project*, *Design*, *plot*. *Design* may represent the end which a plan, scheme, or project is intended to promote. They all indicate thought given to the general aim and to the details. *Scheme* is the most likely to represent something speculative or visionary: as, he was full of schemes; *project* stands next to it in this respect, but *project* may also be the most definite or concrete: as, a project for building a bridge. *Plan* is the least definite; *design* and *plan* may be very indefinite, or have a concrete sense: as, a design or plan of going away; a design or plan of a house. *Scheme* is often used in a bad sense; *design* sometimes.

Lay square the blocks upon the slip,
And follow well this plan of mine.

Longfellow, Building of the Ship.

The scheme of nature itself is a scheme unstrung and mistuned.

Bushnell, Nature and the Supernatural, p. 46.

And in my ear
Vented much policy, and projects deep
Of enemies, of aids, battels, and leagues.

Milton, P. R., III. 891.

O Painter of the fruits and flowers!
We thank thee for thy wise design,
Whereby these human hands of ours
In Nature's garden work with thine.

Whittier, Lines for an Agricultural Exhibition.

plan (plan), *v. t.*; pret. and pp. *planned*, ppr. *planning*. [*plan*, *n.*] 1. To lay down on paper the different parts, divisions, dimensions, and methods of construction of (a machine, ship, building, etc.): as, to plan an edifice.—2. To scheme; lay plans for; devise ways and means for: as, to plan the conquest of a country; to plan one's escape.

Plan with all thy arts the scene of fate.

Pope.

—*Syn.* 1. To figure, sketch out, delineate.

planula (plā-nū-lā), *n.* [NL., < L. *planus*, flat: see *plain*, *plane*.] A theoretical organism, corresponding to the fourth stage in the development of an ovum; a hypothetical multicellular asexual animal, whose larval form should be that of a ciliated planula. See *planula*. Also called *blastula*. See *blastula*.

Planula (plā-nū-lā), *n. pl.* [NL., < *planus* + *-ula*.] A hypothetical group of animals having the form of a ciliated planula and the morphological valence of a blastula, supposed

to have arisen in the primordial geologic period in the direct line of descent of the remote ancestors of the human race. See *Haecckel*.

planar (plā-nār), *a.* [*L. planar-ius*, flat: see *planary*.] Lying in a plane; planary; flat.—*Planar dyadic*. See *dyadic*.

Planaria (plā-nā-ri-ā), *n.* [NL. (Müller, 1776), < LL. *planarius*, flat.] The typical genus of *Planariidae*. *P. torva* is an example.

planarian (plā-nā-ri-ān), *a. and n.* [*LL. planarius*, flat (see *planary*), + *-an*.] 1. *a.* Flat, as a turbellarian; belonging to the *Planaria* or *Dendrocoela*. See *cut* under *Dendrocoela*.

2. *n.* A member of the suborder *Planariida*. *Planariida* (plā-nār-i-dā), *n. pl.* [NL., < LL. *planarius*, flat, + *-ida*.] A suborder of *Turbellaria*, containing the rhabdocelous and dendrocoelous turbellarian worms; the planarians. When the so-called rhyndocelous turbellarians or nemertean worms are excluded, *Planariida* become the same as *Turbellaria*. They are flatworms, mostly oval or elliptical in form, moving by means of vibratile cilia. They are hermaphrodite. In some the intestine is straight and simple or rhabdocelous, in others branched and complicated or dendrocoelous. They are mostly aquatic, inhabiting both fresh and salt water; but some, the land-planarians, are found in moist earth. See *cut* under *Dendrocoela*.

planaridan (plā-nār-i-dān), *a. and n.* 1. *a.* Planarian in a broad sense; turbellarian.

2. *n.* A planarian.

planariform (plā-nār-i-fōrm), *a.* [*LL. planarius*, flat, level, + *forma*, form.] Like a planarian in form; planaridan. Also *planarioid*.

Planariidae (plā-nār-i-dā), *n. pl.* [NL., < *Planaria* + *-idae*.] A family of monogonoporous *Dendrocoela* of an oblong form, without a foot differentiated from the body, typified by the genus *Planaria*.

planarioid (plā-nār-i-oid), *a.* [*LL. planarius*, flat, + *Gr. eidos*, form.] Same as *planariform*.

planary (plā-nār-i), *a.* [*LL. planarius*, flat, level, < L. *planus*, level, plane: see *plain*, *plane*.] Lying in one plane; flat.

planate (plā-nāt), *a.* [*NL. *planatus*, < L. *planus*, flat: see *plane*.] In *entom.*, flat; forming a plane; flattened.

planceer, *n.* Same as *plancher*.

planch (planch), *n.* [*F. planche*, < L. *planca*, a board, plank: see *plank*.] 1. A plank. *Fan-shaw*.—2. In *enameling*, a slab of fire-brick or baked fire-clay used to support the work while it is baked in the oven.—3. A flat iron shoe for a mule. *E. H. Knight*.

plancher (planch), *v. t.* [*planch*, *n.*] To plank; make of or cover with planks or boards. Also *plancher*.

And to the vineyard is a planched gate.

Shak., M. for M., iv. 1. 80.

Yet with his hooves doth beat and rent
The planched floor.

Gorges, tr. of Lucan. (Nares.)

plancha (plan'chā), *n.* [Mex.] In the Mexican silver-mines, a charge of ore ready for smelting, and also the disk or plate of argentiferous lead produced by the operation.

plancher (plan'chér), *n.* [Also *planceer*; early mod. E. also *plancher*; < F. *plancher*, a floor or ceiling of boards, < *planche*, a board, plank: see *planch*, *plank*.] 1. A plank.

Upon the ground doth lie

A hollow plancher.

Lily, Maud's Metamorph.

Th' anatomized fish, and fowls from planchers sprong.

Drayton, Polyolbion, III. 272

2. A floor of wood.

The holys that ben made for hand gunny, they ben scarce kne froy the *plancher*, and of soche holis ben made fyve.

Paston Letters, I. 88.

Oak, cedar, and chestnut are the best builders: some are best for plough timber, as ash: some for *planchers*, as deal.

Bacon, Nat. Hist., § 658.

3. In *anat.*, the inferior wall or boundary of a cavity.

plancher (plan'chér), *v.* [Early mod. E. also *plancher*; < *plancher*, *n.*] 1. *intr.* To make a floor of wood. *Abp. Sancroft*, Letter, 1691, in D'Ooly, II. 16.

2. *trans.* Same as *planch*.

Towers were *planchered*, & battlements and porticoes of timber set vp.

Golding, tr. of Cesar, fol. 183.

planchet (plan'chet), *n.* [*F. planchette*, a small board, a plane table, a circumferentor, formerly also the bottom of a stump, a bush, etc. (= Sp. *planqueta* = Pg. *prancheta*, a circumferentor, dim. of *planche*, a board: see *planch*, *plank*.] A flat piece of metal intended to receive a die-impression for a coin; a coin-blank.

planchette (plan'chet'), as F., plon-shet', *n.* [*F. planchette*, a small board, a circumferentor: see *planchet*.] 1. A small heart-shaped or triangular board mounted on three supports, of

which two, placed at the angles of the base, are easily moving casters, and the third, placed at the apex, is a pencil-point. If the tips of the fingers of one person, or of two, are placed lightly upon it, the board will often, after a time, move without conscious effort on the part of the operator, and the pencil-point will trace lines, words, and even sentences. It was invented about 1865, and was for a time an object of not a little superstition.

2. A circumferentor.

plane (plān), *a. and n.* [*L. a.* < F. *plan* (fem. *plane*) = Sp. *plano* = Pg. *plano* = It. *piano*, < L. *planus*, flat, level, plane, plain: see *plain*, *a.* II. *n.* < F. *plan* = Sp. Pg. *plano* = It. *piano*, < NL. *planum*, a geometrical plane; cf. L. *planum*, level ground, a plain, neut. of L. *planus*, level, flat, plane, plain: see *plain*, *n.* Cf. *plan*, *n.* *Plane*, *plain*, *plan*, *piano*, are from the same L. word.] 1. *a.* 1. Having the character of a plane; contained within a plane: as, a *plane* mirror; a *plane* curve. In *n-dimensional* geometry, sometimes applied to a linear manifold of any number of dimensions, for which *flat* is generally used.

2. In *bot.*, having a flat surface or surfaces.—3. In *entom.*, flat and not deflexed; flat at the margins: as, *plane* elytra.—*Plane* angle. See *angle*, 1.—*Plane* ashler. See *ashler*, 3.—*Plane* chart, curve, function, geometry, inflection. See the nouns.

—*Plane* cubic parabola. See *cubic*.—*Plane* scale, in *nav.*, a scale on which are graduated chords, sines, tangents, secants, rhumbs, geographical miles, etc.—*Plane* screw, a disk with a spiral thread upon its side.—*Plane* surveying, the surveying of tracts of moderate extent, without regarding the curvature of the earth.—*Plane* trigonometry. See *trigonometry*.—*Plane* wings, in *entom.*, wings which are extended horizontally in repose.

2. *n.* 1. A geometrical surface such that if any two points in it are joined by a straight line, the line will lie wholly on the surface; a surface such that two of them which have any three points in common must coincide over their whole extent; hence, a real surface having (approximately) this form. It is thus the simplest of all geometrical surfaces. A plane may also be defined as a surface of the form which is the ideal limit toward which the surfaces of three rigid solids, A, B, C, approximate, if these are ground together in successive pairs, AB, BC, CA, AB, and so on indefinitely. In higher geometry a plane is considered as unlimited; but in elementary geometry a part of such a surface is also called a *plane*.

Specifically.—2. In *biol.*: (a) An ideal surface of extension in any axis of an organism: as, the vertical longitudinal *plane* of the body. (b) A surface approximately flat or level; a "horizon": as, the *plane* of the teeth or of the diaphragm.—3. In *coal-mining*, any slope or incline on which coal is raised or lowered, but usually applied to self-acting inclines, or those on which the coal is lowered by gravity. [Pennsylvania anthracite region.] In England any main road, whether level or inclined, may be called a *plane*.—4. In *crystal.*, one of the natural faces of a crystal.—5. Figuratively, a grade of existence or a stage of development: as, to live on a higher *plane*.—*Alveolocondylean plane*. See *craniometry*.—*Aspect of a plane*. See *aspect*.—*Axial, basal, circular plane*. See the adjectives.—*Camper's plane*, the plane passing through the auricular points and the base of the inferior nasal spine. Also called *auriculocephalic plane*.—*Cleavage-plane*, in *mineral.*, a surface produced by cleavage.

The flat surfaces obtained by splitting a crystal are called its *cleavage planes*.

Encyc. Brit., XVI. 847.

Composition plane. See *composition*.—*Cyclic planes* of a cone of the second order. See *cyclic*.—*Cyclifying, diagonal, diametral, directing plane*. See the adjectives.—*Double-acting inclined plane*, in *raill.*, etc., an inclined plane worked by the gravity of the load conveyed, the loaded wagons which descend being made to pull up the empty ones by means of a rope passing round a pulley or drum at the top of the plane.—*Double-tangent plane*. See *double*.—*Flecnodal, flecnodal, focal, frontal, horizontal plane*. See the adjectives.—*Glabello-lambdaoid plane* of Hamy, the plane of the glabella and lambda, perpendicular to the median plane.—*Glabello-occipital plane*, the plane of the glabell-occipital diameter, perpendicular to the median plane.—*Inclined plane*, in *mech.*, a plane inclined to the horizon, or forming with a horizontal plane any angle whatever excepting a right angle. It is one of the two fundamental simple machines, the other being the lever. In the figure, AC is the inclined plane, CB the height of the plane, BA its base, and BAC the angle of inclination or elevation. The power necessary to sustain any weight on an inclined plane is to the weight as the height of the plane to its length, or as CB to CA. This was first proved by Stevinus, as follows. Let the two ends of a chain be joined, and let it be then hung over the inclined plane. Then, the festoon which hangs below AB pulls equally upon the two ends, and consequently the part lying on AC balances the part on BC—that is, weights proportional to the lengths of those two sides of the triangle balance one another. Hence, the

Inclined Plane.

less the height of the plane in proportion to its length, or the less the angle of inclination, the greater the mechanical effect, or the less the height in proportion to the length the less in the same proportion will be the weight on the plane which balances a given weight hanging vertically. The name *inclined plane* is sometimes loosely applied to a short railroad of steep grade, where the cars are drawn up the incline by means of a wire rope moved by a stationary engine at the top of the slope, or where special forms of rail and engine are used to overcome the grade. The inclined plane of Mahanoy, Pennsylvania, is an example of the first, the Mount Washington Railroad, New Hampshire, of the second. Inclined planes have been used to lift canal-boats from one level to another, and more recently, as at Cincinnati and at Hoboken, New Jersey, for lifting street-cars and passengers. — *Index of a plane*. See *index*. — *Merkel's plane*, the plane of the auricular and alveolar points. — *Median, mesial plane*. See the adjectives. — *Merkel's plane*, the plane of the auricular points and the lower border of the orbits. — *Metastatic plane*, a plane which contains two metastatic principal axes. — *Naso-iniac plane*, the plane of the nasion and the inflexion, perpendicular to the median plane. — *Naso-opisthiac plane*, the plane of the nasion and the opisthion, perpendicular to the median plane. — *Nuchal plane*, the surface of the occipital bone between the superior curved line and the foramen magnum. — *Objective, oblique, original plane*. See the adjectives. — *Occipital plane*, the surface of the occipital bone above the superior curved line. — *Orbital plane*, the orbital surface of the superior maxillary bone. — *Osculating plane*. See *osculate*. — *Palatine plane of Barclay*, in *cranium*, the plane tangent to the arch of the palate along the middle line. — *Pencil of planes*. See *pencil*. — *Perspective plane*. See *perspective*. — *Pitch of a plane*. See *pitch*. — *Plane at infinity*. See *infinity*. 3. — *Plane of Aëby*, the plane of the nasion and the basion, perpendicular to the median plane. — *Plane of Baer*, in *cranium*, the plane determined by the superior border of the zygomatic arches. — *Plane of Blumenbach*, in *cranium*, the horizontal plane upon which the skull, without the mandible, rests. — *Plane of Busk*, the plane of the bregma and the auricular points. — *Plane of comparison*, in *fort.*, a datum-plane; a horizontal plane passing through the highest or lowest part of a fortification or its site. — *Plane of Daubenton*, the plane of the opisthion and the inferior border of the orbits. — *Plane of deLafaye*, in *fort.*, a plane passing through the interior crest or the highest point of a work, and parallel to the plane of site. — *Plane of flotation*. See *flotation*. — *Plane of mastication*, the plane tangent to the masticating surface of the teeth of the upper jaw. — *Plane of Morton*, the plane passing through the most prominent points of the occipital and parietal protuberances. — *Plane of polarization*. See *polarization*. — *Plane of projection*. Same as *perspective plane*. — *Plane of Rolle*, the plane of the auricular and the alveolar points. — *Plane of the ischium*, in *obstet.*, the lateral wall of the true pelvis, extending from the iliopectineal line to the end of the ischial tuberosity, and including small parts of the ilium and pubis. — *Plane of the picture*. Same as *perspective plane*. — *Polar curve of a plane*. See *polar*. — *Polar plane* of a point. See *polar*. — *Pole of a plane*. See *pole*. — *Popliteal plane*, the popliteal surface of the femur. — *Primitive plane*. See *primitive*. — *Prismatic planes*. See *prismatic*. — *Sagittal plane*, the median longitudinal and vertical plane of bilateral animals: so called because the sagittal suture of the skull lies in this plane. — *Temporal plane*, the temporal surface of the cranium. — *To detail on the plane*. See *detail*. — *Twinning-plane*. See *twinn*. — *Syn.* 1. See *plain*, *n*.

plane¹ (plān), *v. t.*; pret. and pp. *planed*, ppr. *planing*. [*plane¹*, *a*. Cf. *plain¹* and *plane²*, *v.*, ult. the same word.] To make plane or smooth; make clear.

What student came but that you *planed* her path
To Lady Psyche? *Tennyson, Princess*, iv.

plane² (plān), *v. t.*; pret. and pp. *planed*, ppr. *planing*. [*ME. planen*, *OF. (and F.) planer* = *It. pianare*, *LL. planare*, plane (with a cutting-tool), make level, *< L. planus*, level: see *plane¹*.] 1. To make smooth, especially by the use of a plane: as, to *plane* wood.—2*t.* To rub out; erase.

He *planed* away the names everichon
That he biforn had written in his tables.
Chaucer, Summoner's Tale, l. 50.

plane² (plān), *n*. [*F. plane*, a carpenter's tool, *< ML. plana*, a carpenter's tool, *< LL. planare*, plane (with a cutting-tool), make level: see *plane²*, *v.*] 1. A tool for paring, smoothing, truing, and finishing woodwork. The essential parts of a plane are a stock or frame of wood or metal, having a smooth, concave, or convex base or sole, and a throat in which is placed a steel cutter called the *plane-iron* or *bit*. Various devices are used to keep the bit in position in the stock, the most simple and common being a wedge of wood. Planes are made in a great variety of shapes and sizes, and range from 1 to 72 inches in length. Nearly all are distinguished by names having reference to the particular kind of work for which they are designed, as the *edge-plane*, *moiling-plane*, and *smoothing-plane*. Planes are also used for truing soft metal surfaces. Plane-irons are inserted in their stocks at various pitches or angles, according to the duty they are to perform. Common pitch, or 45° from the horizontal line, is used in all bench-planes for soft woods. The pitch is increased with the hardness of the material to be worked. See *pitch* and *plane-stock*, and cut in next column.

2. A metallic gage or test for a true surface; a true plane or plane surface; a surface-plate. — 3. An instrument, resembling a plasterer's trowel, used by brickmakers for striking off clay projecting above the top of the mold. — **Box-slipped plane**, a plane provided with slips of boxwood to afford a more durable wearing surface. — **Circular**

Planes.
a, plane-iron; b, wooden wedge for front of iron as used in c and d; c, fore-plane; d, smoother-plane; e, jointer-plane; f, iron jack-plane; g, iron block-plane; h, wooden jack-plane; i, wooden block-plane.

plane, a plane having a steel sole which is flexible and can be adjusted to the required arc. Also called *round plane* and *rounding-plane*. — **Combination plane**. See *combination*. — **Concave plane**. Same as *compass-plane*. — **Coopers' plane**, a long plane set obliquely, with the sole upward, used for jointing staves. Also called *jointer*. — **Dovetail-plane**, a side rabbet-plane having a very narrow sole, so that it can be used to dress the sides of dovetail-tenons or mortises. — **Fork-staff plane**, a plane used by joiners for working convex or cylindrical surfaces. — **Hollow plane**, a molding-plane with a convex sole. — **Joiners' plane**. See *joiner*. — **Long plane**, a joiners' plane 27 inches long, used when a piece of stuff is to be planed very true. *E. H. Knight*. — **Mouth of a plane**. See *mouth*. — **Round-nosed plane**, in *joinery*, a bench-plane with a rounded sole, used for coarse work. — **Round plane**, a round-sole plane used for making beads, stair-rails, and other rounded work. Also called *rounding-plane*. — **Scale-board plane**, a plane for splitting off from a block the wide, thin chips or sheets of wood for making a usual form of hat-box, etc. It is either pulled or driven over the stuff, the thickness of each shaving or scale-board depending upon the projection of the iron. Sometimes the iron is fixed and the wood is drawn over it, the scale-board dropping down through an opening in the bench. Also called *scabbard-plane*. (See also *bench-plane*, *block-plane*, *fore-plane*, *jack-plane*, *rabbet-plane*, *trying-plane*.)

plane³ (plān), *n*. [*ME. plane*, *< OF. plane*, *F. plane*, also *platane* = *Sp. plátano* = *Pg. It. platano*, *< L. platanus*, *< Gr. πλάτανος*, the plane-tree, *< πλάτις*, broad: see *plat³*.] The plane-tree. In *serve* and *peche*, in *plane* and *popule*. *Palladius, Husbandrie* (E. E. T. S.), p. 92.

Mock-plane, the sycamore maple, *Acer Pseudo-platanus*, whose leaves resemble those of the plane-tree. See under *maple*.

plane-bit (plān'bit), *n*. The cutter of a plane; a plane-iron. *E. H. Knight*. — **Plane-bit holder**, a device for holding a plane-bit to the stone while it is ground.

plane-guide (plān'gid), *n*. In *joinery*, an adjustable guide or attachment to a plane-stock, used in beveling the edges of boards.

plane-iron (plān'ī-ern), *n*. The cutting-iron of a plane. Plane-irons are made either double or single, and are armed with a steel cutting edge.

planeness (plān'nes), *n*. The condition of being or having a plane surface.

On pulling the plates apart the bloom was found to be burnished practically all over both surfaces, showing, of course, that the planishing had not sensibly altered the planeness of the surfaces. *Philosophical Mag.*, 5th ser., XXVIII. 454.

plane-plane (plān'plān), *a*. Having two plane surfaces perfectly parallel to each other.

plane-polarized (plān'pō'lār-izd), *a*. See *polarization*.

planer (plā'nēr), *n*. [*< plane²*, *v.*, + *-er*.] 1. A tool for planing wood; a plane; also, a planing-machine. — 2*t.* A utensil for smoothing or leveling salt in salt-cellar.

Than loke your salt be whyte and drye, the *planer* made of Iuory, two inches brode & thre inches longe. *Babees Book* (E. E. T. S.), p. 266.

3. In *printing*, a block of wood, about 9 inches long, 3½ wide, and 3 high, on the top of which is a strip of leather, by means of which the projecting types of a form are beaten down to a level by blows of a mallet. — **Compound planer**, a machine-tool which combines two planes in one. *E. H. Knight*. — **Diagonal planer**, a machine for wood-planing in which the planing-cylinder is placed obliquely to the line of motion of the stuff which is to be planed. — **Planer knife-grinder**. See *knife-grinder*. — **Snow-planer**, an implement for removing snow from the surface of ice.

Planera (plān'e-rī), *n*. [*NL. (Gmelin, 1791)*, named after J. J. Planer (1743-89), a German botanist.] A genus of plants of the order

Urticaceæ and tribe *Ulmææ*. It is characterized by the fruit, which is wingless, ovoid, nut-like, keeled, and roughened, thick and coriaceous or somewhat fleshy, and containing one cell and one seed. There is but one species, native of North America. See *planer-tree*.

planer-bar (plā'nēr-bār), *n*. An attachment to a planer to enable it to perform within certain limits the work of a slotting- or shaping-machine. *E. H. Knight*.

planer-center (plā'nēr-sen'tēr), *n*. A device, similar to a lathe-center, used to support small work on a planing-machine. *E. H. Knight*.

planer-chuck (plā'nēr-chuk), *n*. A device bolted or keyed to a planer-table, and serving to dog an object under the action of the plane. *E. H. Knight*.

planer-head (plā'nēr-hed), *n*. The slide-rest of a planing-machine.

planerite (plān'ēr-it), *n*. [After D. J. Planer, director of mines in the Ural mountains.] A hydrous phosphate of aluminium, allied to wavellite.

planer-tree (plā'nēr-trē), *n*. A tree of the southern United States, *Planera aquatica*. It is a small tree, with alternate two-ranked toothed leaves, preceded by small axillary clusters of polygamous flowers with bell-shaped calyx and four or five slender projecting stamens. It is most common along the Red River and in southern Arkansas. It resembles the elm, requires wet situations, grows about 30 feet high, and produces a hard compact light-brown wood.

planer-vise (plā'nēr-vis), *n*. A device to hold work on the bed of a planing-machine by means of a movable jaw.

plane-sailing (plān'sā'ling), *n*. In *nav.*, the art of determining a ship's place on the supposition that she is moving on a plane, or that the surface of the ocean is plane instead of being spherical. This supposition may be adopted for short distances without leading to great errors; and it affords great facilities in calculation, as the place of the ship is found by the solution of a right-angled plane triangle. In plane-sailing the principal terms made use of are the *course*, *distance*, *departure*, and *difference of latitude*, any two of which being given the others can be found. See *sailing*.

plane-stock (plān'stok), *n*. The body of a plane, in which the cutting-iron is fitted. Its under surface, which in use is against the work, is called the *sole* or *face*; the cutting-blade is the *iron*; the device which holds the iron upon the inclined bed is the *wedge*; the opening through which the plane-iron passes is the *mouth*; a projecting portion at the front end is the *horn*; and the pushing-handle which projects above the back end is the *toot*.

planet (plān'et), *n*. [*< ME. planetæ* = *D. planet* = *MHG. plānēte*, *G. Sw. Dan. planet*, *< OF. planetæ*, *F. planète* = *Sp. Pg. planeta* = *It. pianeta*, *< LL. planeta*, rarely *planetes*, a planet, *< Gr. πλανήτης*, a wanderer, a wandering star, a planet, lengthened form of *πλάνης*, pl. *πλάνητες*, a wanderer, a planet, cf. *πλανάω*, cause to wander, pass. *πλανάσθαι*, wander, *< πλάνη*, a wandering, perhaps for **πλάνη*, akin to *L. palari*, wander.] 1. A star other than a fixed star; a star revolving in an orbit. The sun was formerly considered as a planet, but is now known to be a fixed star. By *planet* is ordinarily meant a *primary planet* of the solar system, or body revolving round the sun in a nearly circular orbit. Of these eight are *major planets*—being, in their order from the sun, Mercury, Venus, the Earth, Mars, Jupiter, Saturn, Uranus, Neptune. There are besides about 675 *minor planets* known. (See *asteroid*.) The periodic comets are not regarded as planets. A *secondary planet* is a satellite, or small body revolving round a primary planet: thus, the moon is a secondary planet. See *solar system* (under *solar*), *gravitation*, *Kepler's laws* (under *law*), and the names of the major planets.

The *planet* earth, so steadfast though she seem,
Inensibly three different motions move.
Milton, P. L., viii. 123.

2. Same as *planeta*, 2.—**Interior planets**. See *interior*. — **Limit of a planet**. See *limit*. — **Osculating elements of a planet**. See *osculate*. — **Perturbations of the planets**. See *perturbation*, 4.—**Superior planets**. See *superior*.

planeta (plā-nē'tā), *n.*; pl. *planetæ* (-tē). [*ML.*] 1. Originally, an ample mantle, usually of costly material, similar to the *pænula*, or *chabuse* in its earlier or circular form. It was worn by the wealthy, and especially by senators, officials, and nobles. In Rome and other parts of the West during the fifth and sixth centuries. Hence—2. A chasuble. The name *planeta* (apparently unknown to the Greek Church) seems to have been especially used during the seventh and eighth centuries. After this the vestment was usually called a *casula* or *chabuse*; but *planeta* is still the official term in the Roman Catholic Church. At certain penitential seasons (Advent, Lent, etc.) the deacon and subdeacon in cathedrals and some other churches wear a folded *planeta* (*planeta plicata*), except in reading the epistle and gospel.

The *planeta* was worn by bishops as well as by presbyters. *Encyc. Brit.*, vi. 461.

plane-table (plān'tā'bl), *n*. 1. An important instrument of topographical surveying, consisting of a drawing-board mounted upon a tripod, and capable of being leveled and turned in

aximuth, sometimes also having two horizontal motions of translation. An indispensable accompaniment of the plane-table is the alidade, which is a straight-edge carrying upon a standard a telescope with cross-wires (generally with a telemeter), which telescope is horizontally fixed relatively to the straight-edge, but has a motion in altitude. The alidade generally carries a delicate magnetic needle. A certain number of points having been geodetically determined and marked by signals, the plane-table is set up at any other point, and the paper upon which the map is to be drawn, having the trigonometric points laid down upon it, is placed upon the table. The latter is then brought into proper orientation, and the position of the station determined graphically by the three-point problem. The plane-table presents some slight difficulties when the scale is to be so large that the board itself appears of considerable size on the map, and especially when irregularly laid out towns are to be surveyed with the last degree of accuracy. On the other hand, the plane-table is of little use in mere reconnaissance. But in most cases it is the chief instrument of the topographer, and is used in all topographical surveys except those of Great Britain.

2. In mining, an inclined table or surface of boards on which ore is dressed; a frame, or framing-table.

Also plain-table.

plane-table (plān'tā'bl), *n.* [*< plane-table, n.*]

To survey with a plane-table.

plane-table (plān'tā'blér), *n.* A topographic engineer using a plane-table.

plane-tabling (plān'tā'bling), *n.* The employment of a plane-table; the act or process of making a map by means of a plane-table.

planetarium (plan-e-tā'ri-um), *n.*; *pl.* *planetariums*, *planetaria* (-umz, -ā). [= *F. planétaire* = *Sp. Pg. It. planetario*, < *NL. planetarium*, prop. neut. of *LL. *planetarius*, planetary: see *planetary*.] An astronomical machine which, by the movement of its parts, represents the motions and orbits of the planets. See *orrery*.

planetary (plan'e-tā-ri), *a.* [= *F. planétaire* = *Sp. Pg. It. planetario*, < *LL. *planetarius*, planetary (only as a noun, *planetarius*, an astrologer), < *planeta*, a planet: see *planet*.] 1. Of or pertaining to a planet or the planets; consisting of planets: as, *planetary motions*; *planetary inhabitants*; the *planetary system*. —2. Having the character attributed to a planet; erratic or wandering.

I am credibly informed he [Richard Greenham] in some sort repeated his removal from his parish, and disliked his own erratical and *planetary* life.
Fuller, Ch. Hist., IX. vii. 68.

3. In *astrol.*, under the dominion or influence of a planet; produced by or under the influence of planets.

Be as a *planetary* plague, when Jove
Will o'er some high-voiced city hang his poison
In the sick air.
Shak., T. of A., iv. 3. 108.

Born in the *planetary* hour of Saturn.
Adison, Spectator.

Planetary aberration. See *aberration*.—Planetary days, the days of the week as shared among the planets known to the ancients, each having its day.—**Planetary nebula.** See *nebula*.—**Planetary years**, the periods of time in which the several planets make their respective revolutions round the sun.

planeted (plan'et-ed), *a.* [*< planet + -ed*.] Belonging to planets. [Rare.]

Tell me, ye stars, ye planets: tell me, all
Ye starr'd and *planeted* inhabitants—what is it?
What are these sons of wonder?

Young, Night Thoughts, ix.

planet-gearing (plan'et-ger'ing), *n.* Any system of gearing in which planet-wheels are introduced; a mechanical device for converting power into speed. It has been employed for driving the cutter-bars of reapers and mowers, and is an element in other machines.

planetic (plā-net'ik), *a.* [In form < *LL. planeticius*, wandering, < *Gr. πλανητικός*, wandering, irregular, < *πλάνητός*, wandering, < *πλανάσθαι*, wander: see *planet*.] In sense directly dependent on *planet*.] Of or pertaining to a planet; resembling a planet in any way.

planetical (plā-net'ik-al), *a.* [*< planetic + -al*.] Same as *planetic*.

According to the *planetical* relations.

Sir T. Browne, Vulg. Err., v. 22.

Some *planetical* exhalation, or a descending star.

J. Spencer, Prodiges, p. 39.

planeting (plan'et-ing), *n.* [*< planet + -ing*.] The music of the planets or spheres.

Tempering all
The jarring spheres, and giving to the world
Again his first and tuneful *planeting*.

B. Jonson, Sad Shepherd, iii. 2.

planetist (plan'et-ist), *n.* [= *F. planetiste* = *Sp. Olt. planetista*, < *LL. *planetista*, < *planeta*, planet: see *planet*.] An observer of the planets.
Minsheu.

planetoid (plan'et-oid), *n.* [= *F. planétoïde*, < *Gr. πλανήτης*, a planet, + *είδος*, form.] One of

the group of very small planets revolving round the sun between the orbits of Mars and Jupiter (with one known exception), remarkable for the eccentricity of their orbits and the greatness of their angle of inclination to the ecliptic; a minor planet; an asteroid. The diameter of the largest is supposed not to exceed 460 miles, while most of the others are believed to be very much smaller. Ceres was the first to be detected, being observed for the first time by Piazzi, an Italian astronomer, on January 1st, 1801; since 1847 no year has passed without the discovery of new planetoids. The number now known is about 575. They are more properly called *asteroids*, since they are really planets, but resemble stars in appearance.

planetoidal (plan-e-toi'dal), *a.* [*< planetoid + -al*.] Of or pertaining to the planetoids; relating to a planetoid.

plane-tree (plān'trē), *n.* [*< plane³ + tree*.]

1. A tree of the genus *Platanus*, especially *P. orientalis*, the oriental plane-tree, or its variety *acerifolia*, the maple-leaved plane-tree, often regarded as a species. The oriental plane-tree and its variety are found wild from Persia to Italy, and are common in European parks as ornamental trees. The wood is valued for cabinet-work and turnery. (Also called

Branch of the American Plane-tree (*Platanus occidentalis*) with Fruit. a, a single nutlet, showing the bristles at its base.

chinar-tree.) The American plane-trees are better known, where native, as *sycomore* or *buttonwood*. The ordinary species is *P. occidentalis*, the largest tree of the Atlantic forests, often from 90 to 120 feet high, found chiefly on bottom-lands. It is not seldom planted for shade and ornament, and its reddish-brown wood is used in various ways. Other names are *buttonball* and *water-beech*. The plane-tree of California is *P. racemosa*, a somewhat smaller tree with very white bark. Plane-trees suffer from a disease caused by the attack of a parasitic fungus, *Gloeosporium nemisquium*. The entire foliage appears in early summer as if scorched and withered, but later in the season fresh leaves are developed. The trees rarely die from the effects of the fungus. See *Platanus*.

2. The sycomore maple, *Acer Pseudo-platanus*: so called from the similarity of its leaves to those of the plane. Other maples are also sometimes known as *plane-trees*. [Local, Eng. and Scotch.]

planet-stricken (plan'et-strik'n), *a.* Affected by the supposed influence of planets; blasted.

Like *planet-stricken* men of yore,
He trembles, smitten to the core
By strong compunctions and remorse.

Wordsworth, Peter Bell, iii.

planet-struck (plan'et-struk), *a.* Same as *planet-stricken*.

He batters at the malignant's misery; and if such a man riseth, he falls as if he were *planet-struck*.

Rev. T. Adams, Works, I. 479.

planetule (plan'et-ül), *n.* [*< planet + -ule*.] A little planet.

planet-wheel (plan'et-hwēl), *n.* 1. The exterior wheel of the sun-and-planet motion (see *sun*).—2. In the plural, an epicyclic train of mechanism for producing a variable angular motion, such as that of the radius vector of a planet in its orbit. The common contrivance for this purpose consists of two elliptical wheels connected by teeth in gear with each other, and revolving on their foci. While the driving-wheel moves uniformly, the radius vector of the other has the required motion.

Planet-wheels.

The spur-gear to the right, called the planet gear, is tied to the center of the other, or sun-gear, by an arm which preserves a constant distance between their centers. Each revolution of the planet-gear, which is rigidly attached to the connecting-rod, gives two to the sun-gear, which is keyed to the fly-wheel shaft.

plangency (plan'jen-si), *n.* [*< plangen(t) + -cy*.] The state or quality of being plangent; a noisy dashing or beating. [Rare.]

plangent (plan'jent), *a.* [*< L. plangen(t)-s*, ppr. of *plangere*, beat: see *plain*.] 1. Beating; dashing, as waves. [Rare.]

Nor heeds the weltering of the *plangent* wave.

Sir H. Taylor, Ph. van Artevelde (ed. 1852), I., t. 10.

2. Resounding; clashing; noisy.

The bell on the orthodox church called the members of Mr. Peck's society together for the business meeting with the same *plangent*, lacerant note that summoned them to worship on Sundays. W. D. Howells, Auntie Kilburn, xxv.

The shadows and the generations, the shrill doctors and the *plangent* wars, go by into ultimate silence and emptiness.

R. L. Stevenson, An Apology for Idlers.

plangort (plang'gor), *n.* [*< L. plangor*, a striking, beating, a beating the breast in token of grief, < *plangere*, beat: see *plain*.] Plaint; lamentation.

The lamentable *plangors* of Thracian Orpheus for his dearest Eurydice.

Meres, Eng. Literature (Arber's Eng. Garner, II. 96).

Plan (plā'ni), *n.* *pl.* [*NL. pl.* of *L. planus*, flat: see *plane*.] In Cuvier's classification, the second family of subbrachiate malacopterygian fishes; the flatfishes: same as *Pleuronectidæ* in a wide sense and the suborder *Heterosomata*.

planicaudate (plā-ni-kā'dāt), *a.* [*< L. planus*, flat, + *cauda*, tail, + *-ate*.] (see *caudate*.) Having a flattened tail: said of reptiles.

planicipital (plā-ni-sip'i-tal), *a.* [*< L. planus*, flat, + *caput* (*capit*, in comp. *-cipit*), head, + *-al*.] Having a flat head, as an insect.

planidorsate (plā-ni-dōr'sāt), *a.* [*< L. planus*, flat, + *dorsum*, back, + *-ate*.] Having a flat back.

planiform (plā'ni-fōrm), *a.* [*< L. planus*, flat, + *forma*, form.] In *anat.*, presenting a plane or flat surface: said of the articular surface of bones whose jointing is arthrodial.

planigraph (plan'i-grāf), *n.* [*< NL. planum*, a plane, + *Gr. γράφειν*, write.] An instrument for reducing or enlarging drawings. It consists of two scales graduated in a definite ratio to each other, attached end to end, and rotating about a pivot at their common origin. Measurements taken on a copy at one side are marked by the operator at the corresponding gradations on the other arm of the instrument. Interchangeable scales are provided for different degrees of enlargement or reduction.

planimeter (plā-nim'e-tēr), *n.* [= *F. planimètre*; < *NL. planum*, a plane, + *Gr. μέτρον*, measure.] An instrument for measuring a plane area by carrying a tracer round its periphery, and noting the change of reading of a scale. Planimeters are of various constructions; but the most interesting is the polar planimeter (see the first figure). This

consists of an inner arm OJ, turning about a fixed center O, and an outer arm JP, turning about a joint J, and resting upon a point or tracer P, and upon a wheel W, having its axis coincident with or just below the line JP, and provided with a counting-apparatus, so that the turns and fractions of a turn it makes can be read off. In order to see that the instrument will accurately show the area, consider the second figure, where the tracer is supposed to follow

the outline of an infinitesimal parallelogram, P₁P₂P₃P₄, so placed that when the tracer moves from P₂ to P₃, and from P₄ to P₁, the wheel moves from W₂ to W₃ and from W₄ to W₁, both these paths of the wheel being in the direction of its axis, so that it only turns in passing from W₁ to W₂ and from W₃ to W₄, during which motions the in-

ner arm is stationary. The area of the parallelogram described by the tracer is equal to the base $P_1P_2 = W_1W_2$ ($JP_2 + JW_2$) multiplied by the altitude, which is evidently equal to W_2W_3 , so that the area is $W_1W_2 \times W_2W_3 \times (JP_2 + JW_2)$. The wheel turns one way in passing from W_2 to W_3 , and the opposite way in passing from W_3 to W_1 . But these two paths are not exactly equal, their difference being plainly $W_1W_2 \times W_2W_3 + JW_2$. The algebraic sum of the rolling multiplied by the constant length JP_2 gives the area. Now, any finite area may be conceived as formed of such infinitesimal parallelograms, and were the peripheries of all these traced out in the direction of the motion of clock-hands, every boundary between two of them would be traced once forward and again backward, so that the final reading of the wheel would be the same as if only the outer boundary of the area were traced. This is illustrated in the third figure. Also called *platometer*.

planimetric (plan-i-met'rik), *a.* [= *F. planimétrique* = *Pg. planimetrico*; as *planimetr-y* + *-ic*.] Pertaining to planimetry or the mensuration of plane surfaces.—**Planimetric function.** See *function*.

planimetrical (plan-i-met'ri-kal), *a.* [*< planimetric + -al*.] Same as *planimetric*.

planimetry (plā-nim'et-ri), *n.* [= *F. planimétrie* = *Sp. planimetría*, *planimetría* = *Pg. It. planimetria*; *< NL. planum*, a plane, + *Gr. -μετρία*, *< μέτρον*, measure.] The mensuration of plane surfaces, or that part of geometry which regards lines and plane figures.

planing-machine (plā'ning-ma-shēn'), *n.* 1. A machine for planing wood, the usual form of which has cutters on a drum rotating on a

Planing-machine, with outside gear.

a, a, bed; *b, b*, pedestals; *c*, main driving-pulley, keyed to the same main driving-shaft as the pulley *d*, which transmits motion through the belt *e* to the top cutter-cylinder pulley *f*. The feed-mechanism consists of rollers geared together and driven by the pulley *g*, which derives its motion from the feed-belt *h*, driven by a small pulley on the main driving-shaft; *i*, a hand-wheel operating screw-mechanism for raising or lowering the top cylinder; *j*, crank operating mechanism for adjusting matching-heads; *k, k'*, cranks operating adjusting mechanism for raising or lowering feed-rolls to accommodate different thicknesses of stuff; *l*, crank for regulating the pressure-bar; *m, m*, weighted levers for holding the feed-rolls with constant pressure.

horizontal axis over the board, which passes beneath. There may also be cutter-drums underneath and at the edges, so as to plane top, bottom, and edges simultaneously. Also called *wood-planer*.

2. A machine-tool for planing metals, in which the metal object to be planed, fixed to a traversing table, is moved against a relatively fixed cutter. Also called *metal-planer*.

planing-mill (plā'ning-mil), *n.* 1. A shop where planing is done.—2. A planing-machine.

planipennate (plā-ni-pen'āt), *a.* [*< L. planus*, flat, + *penna*, wing, + *-ate* (see *pennate*).] Having flat wings not folded in repose and approximately equal to each other, as a neuropterous insect; specifically, belonging to the *Planipennia*.

Planipennia (plā-ni-pen'i-ā), *n. pl.* [*NL.*, *< L. planus*, flat, + *penna*, wing.] A suborder of neuropterous insects, with nearly equal naked many-veined wings not folded in repose, well-developed jaws, and elongate many-jointed antennae. The larvae are mostly terrestrial, and voracious insect-feeders; the pupae are incomplete and inactive; the perfect insects are generally herbivorous. The suborder includes such forms as the ant-lions (*Myrmeleontidae*), scorpion-flies (*Panorpidae*), and sundry other families, which the genera *Ascalaphus*, *Hemerobius*, *Coniopteryx*, *Mantissa*, *Rhaphidia*, and *Stalis* respectively represent. See cuts under *ant-lion* and *Panorpa*.

planipennine (plā-ni-pen'in), *a.* and *n.* [*< Planipennia* + *-ine*.] 1. *a.* Of or pertaining to the *Planipennia*.

II. *n.* One of the *Planipennia*.

planipetalous (plā-ni-pet'a-lus), *a.* [= *Sp. planipetalus* = *Pg. planipetalō*, *< L. planus*, flat, + *NL. petalum*, petal.] In bot., having flat petals.

planirostral (plā-ni-ros'tral), *a.* [*< L. planus*, flat, + *rostrum*, beak.] Having a broad flat beak, as a bird.

planish (plan'ish), *v. t.* [*< OF. planiss*, stem of certain parts of *planir*, equiv. to *planer*, plane: see *plane* 2, *v.*] 1. To make smooth or plane, as wood.—2. To condense, smooth, and toughen, as a metallic plate, by light blows of a hammer.—3. To polish: as, to *planish* silver goods or tin-plate.

planisher (plan'ish-ēr), *n.* [*< planish* + *-er*.] 1. A thin flat-ended tool used by tinner and

braziers for smoothing tin-plate and brasswork.—2. A workman who planishes, smooths, or planes.—3. A device for flattening sections cut by a microtome for microscopic examination.

planishing-hammer (plan'ish-ing-ham'ēr), *n.* A hammer used for planishing, having a head with highly polished convex faces, usually rather broader than the face of a common machinists' hammer; also, less correctly, a similar hammer used for flattening, curving, etc.

planishing-roller (plan'ish-ing-rō'ler), *n.* A highly polished roller used for smoothing surfaces of metal plate, as copper plated with tin or silver. Specifically, one of the second pair of rolls through which coin-metal is passed in preparing it for minting. They are made of case-hardened iron and highly polished. The strips of metal are passed between them cold, and are brought by them to the required thickness.

planishing-stake (plan'ish-ing-stāk), *n.* A small bench-anvil used to support anything being shaped with a planishing-hammer.

planisphere (plan'i-sfēr), *n.* [= *F. planisphere* = *Sp. planisferio* = *Pg. planisferio* = *It. planisferio*, *< L. planus*, flat, + *sphæra*, sphere: see *sphere*.] 1. A projection of the sphere; especially, a polar projection of the celestial sphere.—2. An apparatus consisting of a polar projection of the heavens, with a card over it turning about the pole, and so cut out as to show the part of the heavens visible at a given latitude at a given local sidereal time.

planispheric (plan-i-sfēr'ik), *a.* [= *F. planisphérique*; as *planisphere* + *-ic*.] Of or pertaining to a planisphere; resembling a planisphere.

Planispheric representation of the cerebral convolutions. *Nature*, XXX, 161.

planispiral (plā-ni-spī'ral), *a.* [*< L. planus*, flat, + *spira*, a coil, spire: see *spire*.] Coiled in one plane, like a watch-spring or flat spiral, as the antlia of a butterfly; whorled in discoid form, as a shell of the genus *Planorbis*. Also *planospiral*.

plank (plangk), *n.* [*< ME. planke*, *< OF. planke*, assibilated *planche*, *F. planche*, dial. *planke* = *Pr. planca*, *plancha*, *planqua* = *Sp. plancha* = *Pg. plancha* = *It. plana* = *OFries. planke* = *D. plank* = *MLG. planke* = *MHG. planke*, *blanke*, *G. planke* = *Sw. planka* = *Dan. planke*, *< L. planca*, a plank, a nasalized form of **placa*, = *Gr. πλάξ* (*plax*), a flat surface, a plain, tablet, plate. Cf. *plack*. See *planch*, a doublet of *plank*. The *fr.* and *W. plank* is appar. *< E.*] 1. A piece of timber differing from a board in having greater thickness; also, loosely, a board. See *board*.

Ne nevere man dide, sithe the tyme of Noe, saf a Monk that be the grace of God broughte on of the Plankes down; that zit is in the Mynstre, at the foot of the Montayne. *Mandeville, Travels*, p. 148.

Across the fallen oak the plank I laid.

Gay, Shepherd's Week, Monday, l. 107.

2. A slab (of stone).

Over his [Sir T. Browne's] Grave was soon after erected . . . a Monument of Freestone, with a Plank of Marble thereon. *Wood, Athens Oxon*, II, 524.

3. In a printing-press, the frame on which the carriage slides.—4. In ribbon-weaving, the batten of the Dutch engine-loom or swivel-loom.—5. Figuratively, one of the articles or paragraphs formulating distinct principles which form the program or platform of a political or other party (the word *platform* being taken in a double sense).

In the Chicago platform there is a plank on this subject, which should be a general law to the incoming Administration. *Lincoln*, in Raymond, p. 86.

We should get those amendments out of the way before we strike out for the summer campaign. We want two planks—non-extension of slavery, and state reform. *S. Bowles*, in Merriam, I, 291.

Walking the plank, a mode of inflicting death formerly practised by pirates by causing their victims to walk along a plank laid across the bulwarks of a ship till they overbalanced it and fell into the sea.

plank (plangk), *v. t.* [= *OFries. plonken* = *MD. planken* = *MLG. planken* = *G. planken* = *Sw. planken* = *Dan. planke*, plank; from the noun. Cf. *planch*, *v.*] 1. To cover or lay with planks: as, to *plank* a floor.

The streets of their cities and townes instead of paving are plankt with fir trees, plained & layd even close the one to the other. *Hakluyt's Voyages*, I, 480.

2. To lay or place as on a plank or table: as, he *planked* down the money. [*Colloq.*]—3. In hat-manuf., to harden by felting. See *planking*, 4.—4. To unite, as slivers of wool, to form roving.—5. To split, as fish, and cook upon a board. See the quotation. [*U. S.*]

The principal dish was *planked* shad. By this process four fish are fastened to a board, and held towards a hot fire. Whilst cooking, the fish are constantly basted with a preparation made of butter, salt, and other ingredients. *Science*, V, 422.

plank-hook (plangk'hūk), *n.* A pole armed with an iron hook, used in moving the runs or wheeling-planks in a quarry, a mine, or the like.

planking (plangk'ing), *n.* [*Verbal n. of plank*, *v.*] 1. The operation of laying down planks or of covering with planks.—2. Planks considered collectively, as in a floor; a piece of work made up of planks; specifically, in ship-building, the skin or covering of wooden timbers on the outer and inner surfaces of the ribs, and upon the beams. A *strake* is a line of planking. *Wales* are strakes of thick planking. See cut under *beam*.—3. In spinning, the splicing together of slivers of long-stapled wool. See *breaking-frame*.—4. One of the finishing operations in felting hats. The hardened hat-body is passed through a cistern containing a hot acidulated water, and between pressing-rollers, the process compacting the fibers into felt.

5. In a steam-cylinder, the lagging or clothing.—Anchor-stock planking, in ship-building, planks with one edge straight and the other so cut that the planks taper from the middle in both directions. The middle of one is placed over or under the ends of two others.

planking-clamp (plangk'ing-klamp), *n.* In ship-building, a tool used to bend a strake against the ribs of a vessel, and hold it in position until it can be nailed or bolted.

planking-machine (plangk'ing-ma-shēn'), *n.* A machine for rubbing, pressing, and steaming formed hat-bodies, to give them strength and thickness.

planking-screw (plangk'ing-skrō), *n.* Same as *planking-clamp*.

plank-sheer (plangk'shēr), *n.* Naut., the gunwale; a timber carried round the ship which covers and secures the timber-heads. Also called *covering-board*.

plankton (plangk'tŏn), *n.* [*< Gr. πλαγκτός*, *-όν*, wandering.] In *zool.*, pelagic animals collectively.

planky (plangk'i), *a.* [*< plank* + *-y*.] Constructed of planks or boards. [*Rare.*]

planless (plan'les), *a.* [*< plan* + *-less*.] Having no plan. *Coleridge*.

planner (plan'ēr), *n.* One who plans or forms a plan; a projector.

planoblast (plā'nō-blāst), *n.* [*< Gr. πλάνος*, wandering, + *βλαστός*, germ.] A wandering bud; the free medusoid of gymnoblastic hydrozoans; the gonophore of such hydroids, detached from the colony, leading an independent locomotory life, and discharging its mature sexual products into the sea; distinguished from the *hedroblast*, or sedentary bud. With a single known exception (that of *Dicoryne*), planoblasts are craspedote or velum-bearing medusae, bell-shaped, with the walls of the bell or umbrella mainly of gelatinous consistence; from the bell hangs a tubular body, the manubrium; the opening of the bell-cavity is the codonostome, partially closed by a membranous velum; and a variable number of filaments, the tentacles, hang from the margin of the umbrella.

To the gonophores belonging to this group [*Gymnoblastes*] the name of *planoblasts* (wandering buds) may be given. *G. J. Allen*, *Challenger Reports*, Hydrozoa, XXIII, II, 22.

planoblastic (plā'nō-blas'tik), *a.* Of the nature of or pertaining to planoblasts; medusoid.

plano-concave (plā'nō-kon'kāv), *a.* [*< L. planus*, plane, + *concavus*, concave: see *concave*.] Plane on one side and concave on the other.

plano-conical (plā'nō-kon'ikāl), *a.* [*< L. planus*, plane, + *conicus*, conic: see *conic*, *conical*.] Plane on one side and conical on the other.

plano-convex (plā'nō-kon'veks), *a.* [*< L. planus*, plane, + *convexus*, convex: see *convex*.] Plane on one side and convex on the other.

planodia (plā'nō'di-ā), *n.* [*< Gr. πλάνος*, wandering, + *ὁδός*, a way, road.] A false passage, such as may be made in using a catheter.

planogamete (plan'ō-ga-mēt), *n.* [*< Gr. πλάνος*, a wandering, + *γάμητος*, *< γαμεῖν*, marry.] In bot., a motile gamete: same as *zoogamete*. See *gamete*.

planographist (plā-nog'ra-fist), *n.* [*< L. planus*, plane, + *Gr. γράφειν*, write, + *-ist*.] A surveyor; a plan- or map-maker. [*Rare.*]

All planographists of the Holy City. *W. M. Thomson*, *Land and Book*, p. 421. (*Encyc. Dict.*)

plano-horizontal (plā'nō-hor-i-zon'tal), *a.* [*< L. planus*, plane, + *ML. horizontalis*, horizontal: see *horizontal*.] Having a plane horizontal surface or position.

planometer (plā-nom'e-tēr), *n.* [*< L. planus*, plane, + *Gr. μέτρον*, a measure.] A plane sur

face used in machine-making as a gage for plane surfaces; a surface-plate.

planometry (plā-nom'et-ri), *n.* [*L. planus*, plane, + *Gr. μέτρον*, *metron*, measure.] The measurement or gaging of plane surfaces; the art or act of using a planometer.

plano-orbicular (plā-nō-ōr-bik'ū-lār), *a.* [*L. planus*, plane, + *NL. orbicularis*, orbicular: see *orbicular*.] Flat on one side and spherical on the other.

Planorbinae (plā-nōr-bi-nē), *n. pl.* [*NL.*, < *Planorbis* + *-inae*.] A subfamily of pond-snails of the family *Limnæidae*, typified by the genus *Planorbis*, having a flat discoidal or planispiral shell. The subfamily is one of three, contrasted with *Limnæinae* and *Ancylinae*.

planorbine (plā-nōr-bin), *a.* [*L. planus*, flat, plane, + *orbis*, circle, disk, + *-ine*.] Whorled in a round flat spiral; planispiral, as a pond-snail; belonging to the *Planorbinae*.

Planorbis (plā-nōr-bis), *n.* [*NL.*, < *L. planus*, flat, plane, + *orbis*, circle, disk: see *orbis*.] The typical genus of *Planorbinae*. It is very extensive, including about 150 species, 25 of which are found in the United States. They inhabit ponds and sluggish streams.

planorbite (plā-nōr-bit), *a.* [*Planorbis* + *-ite*.] A fossil species of *Planorbis*, or some similar planorbine shell.

Planorbulina (plā-nōr-bū-lī-nā), *n.* [*NL.*, < *L. planus*, plane, + *NL. Orbulina*, *q. v.*] A genus of foraminifers whose tests are of planorbine figure.

planorbuline (plā-nōr-bū-līn), *a.* [*Planorbulina*.] Of or pertaining to the genus *Planorbulina*.

Two of the most remarkable modifications of the planorbine type, which strikingly illustrate the extremely wide range of variation among Foraminifera, are *Polytrama* and *Orbitolina*. *Encyc. Brit.*, IX. 380.

planospiral (plā-nō-spi-rāl), *a.* See *planispiral*. **planosubulate** (plā-nō-sub'ū-lāt), *a.* [*L. planus*, plane, + *NL. subulatus*, awl-shaped: see *subulate*.] Smooth and awl-shaped.

plant¹ (plant), *n.* [*ME. plante*, *plante* (partly < *OF.*), < *AS. plante* = *D. plant* = *MLG. plante* = *OHG. phlansa*, *flansa*, *planza*, *MHG. G. pflanze* = *leel. planta* = *Sw. planta* = *Dan. plante* = *OF. (and F.) plante* = *Pr. Sp. Pg. planta* = *It. pianta*, a plant, < *L. planta*, a sprout, shoot, twig, sucker, graft, scion, slip, cutting, a young tree that may be transplanted, a set, hence in general a plant; prob. orig. a spreading sucker (cf. *planta*, the sole of the foot: see *plant²*); lit. 'something flat or spreading,' < *√ plant* = *Gr. πλάνος*, broad: see *plat³*, *plate*. In the later senses (defs. 5-10) the noun is from the verb. Cf. *claw*.] 1. A shoot or slip recently sprouted from seed, or rooted as a cutting or layer; especially, such a slip ready for transplanting, as one of the cabbage-plants, tomato-plants, etc., of the market.

Though that Men bryngen of the *Plantes*, for to planten in other Countrees, thei growen wel and fayre, but thei bryngen forth the no fructuous thing; and the Leves of Bawme ne fallen noughte. *Mandeville*, *Travels*, p. 50.

Transplantat alle hooke the *plante* (of cabbage), and it is aye. *Palladius*, *Husbandrie* (E. E. T. S.), p. 113.

2. A sapling; hence, a stick or staff; a cudgel.

He caught a *plants* of an appell tree, and caste his shelde to ground, and toke the barre in bothe handes, and seide he wolde make hem to remeue. *Morte* (E. E. T. S.), III. 493.

There is a man haunts the forest, that abuses our young plants with carving "Rosalind" on their barkes. *Shak.*, As you Like it, III. 2. 373.

Sir Roger's servants, and among the rest my old friend the butler, had, I found, provided themselves with good taken *plants*, to attend their master upon this occasion. *Addison*, Sir Roger at the Play.

3. An herb or other small vegetable growth, in contrast with trees.—4. An individual living being with a material organism, not animal in its nature; a member of the vegetable kingdom; a vegetable, in the widest sense. While the difference between plants and animals in all their higher forms is clearly marked, science has hitherto been unable to fix upon any one absolutely universal criterion between them. Nothing perhaps is so distinctive of the plant as its power to appropriate and assimilate mineral matter directly, whereas most animals live on the products of previous organization. The plant thus mediates in the scheme of nature between the mineral and the animal world, forming an essential condition of most animal existence. But many plants, including the whole group of *Fungi*, and the saprophytic, parasitic, and carnivorous flowering plants, live wholly or in part on organic matter, while not all animals are confined to organic nutriment. See *animal* and *Protista*. For the fundamental classification of plants, see *Cryptogamia* and *Phanerogamia*.

In some places, those *plants* which are entirely poisonous at home, lose their deleterious quality by being carried abroad. *Goldsmith*, *Citizen of the World*, xci.

5. The fixtures, machinery, tools, apparatus, appliances, etc., necessary to carry on any trade or mechanical business, or any mechanical operation or process.

What with the *plant*, as Mr. Peck technically phrased a great up-as-tree of a total, branching out into types, cases, printing-presses, engines, &c., . . . my father's fortune was reduced to a sum of between seven and eight thousand pounds. *Bulwer*, *Cartons*, xl. 6. (*Davies*.)

The entire *plant*, and even the fuel, were transported on heavy waggons across the Karroo, at an enormous cost to the young settlement. *Fortnightly Rev.*, N. S., XLIII. 380.

6. Concealed plunder. [Thieves' slang.]—7. A trick; dodge; swindle; artifice. [Slang.]

It wasn't a bad *plant*, that of mine, on Fikey, the man accused of forging the Sou'-Western Railway debentures. *Dickens*.

Such-and-such an author says that so-and-so was "burnt alive," followed by a silly smattering of righteous indignation at what never happened, while the dispassionate scholar finds the whole thing a *plant*. *N. and Q.*, 7th ser., IX. 50.

8. In *fish-culture*, a deposit of fry or eggs.—9. *pl.* Oysters which have been bedded: in distinction from *natives*: as, *Virginia plants*. [A market-term, applied chiefly to Virginia oysters bedded in Providence River.]—10. *pl.* Young oysters suitable for planting or transplantation.—*Ballast-plants*. See *ballast*.—*Blind, herbaceous, luminous, etc., plants*. See the adjectives.—*Flowering plant*. See *Phanerogamia*.—*Indicative plants*, species which, in their natural habitat, are reputed to indicate the presence of certain minerals. [*U. S.*]—*Movement of plants*. See *movement*.—*Parasitic plants*. See *parasitic*.—*Pot-plant*, potted plant, a plant grown in a flower-pot, as in conservatories and hothouses.—*Syn. 4. See vegetable, n.*

plant¹ (plant), *v.* [*ME. planten*, *plauten* (partly < *OF.*), < *AS. plantian* (*ā-plantian*, *ge-plantian*) = *D. planten* = *MLG. planten* = *OHG. phlansōn*, *flansōn*, *MHG. G. pflanzen* = *leel. planta* = *Sw. planta* = *Dan. plante* = *OF. (and F.) planter* = *Pr. Sp. Pg. plantar* = *It. piantare*, < *L. plantare*, set, plant, transplant, < *planta*, a sprout, shoot, scion, plant: see *plant¹*, *n.*] *I. trans.* 1. To put or set in the ground for growth, as seed, young shoots, cuttings, vegetables with roots, etc.: as, to plant potatoes; to plant trees.

Nowe onyons sowe, and taul in his place *Lette plante*; and cunel sowe, eke *Armarace* (horse-radish). *Palladius*, *Husbandrie* (E. E. T. S.), p. 210.

2. To lay out and prepare by putting or setting seed, etc., in the ground; furnish with plants: as, to plant a garden or an orchard.

The Lord God *planted* a garden eastward in Eden; and there he put the man whom he had formed. *Gen.* II. 8.

3. To implant; sow the seeds or germs of; engender.

It engenders cholera, *planteth* anger. *Shak.*, T. of the 8., IV. 1. 175.

They *planted* in them a hatred of vices, especially of lying, and in the next place of debt. *Purchas*, *Pilgrimage*, p. 372.

4. To put; place; set; especially, to post or place firmly in position; fix; set up: as, he *planted* himself in front of me; to *plant* a standard on the enemy's battlements.

Plant yourself there, sir; and observe me. *B. Jonson*, *Cynthia's Revels*, II. 1.

The Duke, having *planted* his Ordinance, battered the other side.

Quoted in *Capt. John Smith's True Travels*, I. 11.

The Duke of Marlborough *planted* his creatures round his lordship. *Goldsmith*, *Bolingbroke*.

He *planted* himself with a firm foot in front of the image. *Barham*, *Ingoldsby Legends*, I. 143.

5. To establish or set up for the first time; introduce and establish: as, to *plant* Christianity among the heathen; to *plant* a colony.

He would entreat your care *To plant* me in the favour of some man *That's expert in that knowledge*. *Fletcher*, *Spanish Curate*, II. 1.

When the Romans sent Legions and *planted* Colonies Abroad, it was for divers political Considerations. *Howell*, *Letters*, II. 52.

6. To furnish; provide with something that is set in position or in order.

The port of the said Cite is strongly fortified with two strong Castles, and one other Castle within the cite, being all very well *planted* with munition. *Hakluyt's Voyages*, II. 281.

A very goodly strong Castle, well planted with Ordnance. *Coryat*, *Crudities*, I. 93.

Rochdale, by a crosse pale weinigh foure miles long, is also *planted* with houses along the pale.

Quoted in *Capt. John Smith's Works*, II. 13.

7. To introduce and establish new settlers in; settle; colonize.

Neither may wee thinke that Moses intended so much a Geographical history of all the Nations of the world, many of which were not, long after this time, *planted* or peopled. *Purchas*, *Pilgrimage*, p. 45.

He came hither to return to England for supply, intending to return and *plant* Delaware.

Winthrop, *Hist. New England*, II. 396.

This year the towns on the river of Connecticut began to be *planted*. *N. Morton*, *New England's Memorial*, p. 181.

8. To place or locate as colonists or settlers.

Vpon the twelfth of this Moneth came in a Pinnace of Capitaine Bargraue, and on the seuenteenth Capitaine Lownea, and one Master Enana, who intended to *plant* themselves at Waraskoyack.

Quoted in *Capt. John Smith's Works*, II. 38.

9. To hide; conceal; place in concealment, as plunder or swag. [Thieves' slang.]—10. In *fish-culture*, to deposit (eggs or fry) in a river, lake, or pond.—11. To bed (oysters); bed down, transplant, or sow (young or small oysters).—12. To put, as gold or the like, in the ground, or in a pretended mine, where it can be easily found, for the purpose of affecting the price of the land; also, to treat, as land, in this way; "salt."

A salted claim, a pit sold for a 10*l* note, in which a nugget worth a few shillings had before been *planted*. *Perry Clarke*, *New Chum in Australia*, p. 72.

II. intrans. 1. To sow seed or set shoots, etc., in the soil, that they may grow.

I have *planted*, *Apollo* watered, but God gave the increase. 1 Cor. III. 6.

2*†*. To settle down; locate as settlers or colonists; take up abode as a new inhabitant, or as a settler in a new country or locality; settle.

If we desired to *plant* in Conightecute, they should give up their right to us.

Winthrop, in *Bradford's Plymouth Plantation*, p. 349.

Taunton and Bridgewater men are confident that they are *planting* about Assawamit or Dartmouth, and did yesterday track 200 of them, as they judge, toward Assawamit.

Gov. Winslow, in *App. to New England's Memorial*, p. 445.

plant² (plant), *n.* [*F. plante* = *Sp. Pg. planta* = *It. pianta*, < *L. planta*, the sole of the foot: see *plant¹*.] The sole of the foot, or the foot itself. See *planta*.

Knotty legs, and *plants* of clay, *Seek for ease, or love delay*. *B. Jonson*, *Masque of Oberon*.

planta (plan'tā), *n.*; *pl. plantis* (-tē). [*L.*, the sole of the foot: see *plant²*.] 1. In *vertebrate anat.*, the sole of the foot: corresponding to *palm* of the hand, and opposed to *dorsum* or the *rotular aspect* of the foot. See cuts under *digitigrade* and *plantigrade*.—2. In *ornith.*, the back of the shank; the hind part of the tarsometatarsus, corresponding morphologically to the sole of the foot of a mammal. See cut under *booted*.—3. In *entom.*, the first joint of the tarsus, when it is large or otherwise distinguished from the rest, which are then collectively called the *digitus*. Also called *metatarsus*, in which case the other joints collectively are the *dactylus*.

plantable (plan'ta-bl), *a.* [= *It. piantabile*; as *plant¹* + *-able*.] Capable of being planted, cultivated, settled, etc.

The Land as you go farther from the Sea riseth still somewhat higher, and becomes of a more *plantable* Mould. *Dampier*, *Voyages*, II. II. 58.

plant-a-cruve, **planta-crow** (plant'a-kruv, plan'tā-kro), *n.* [Perhaps < *OF. plante*, a plant, *plant*, a plantation, + *acreve*, *acreve*, growth: see *acreve*, *n.*] A small inclosure for the purpose of raising colewort-plants, etc. [*Scotch*.] **plantage** (plan'tāj), *n.* [*OF. plantage*, a planting or setting, also *plantain*, *F. plantage*, plantation, = *Sp. plantaje*, a collection of plants, = *Fg. plantagem*, plants, herbs; cf. *ML. plantagium*, *plantago*, a plantation of trees or vines; < *L. planta*, a plant: see *plant¹* and *-age*.] Plants generally.

As true as steel, as *plantage* to the moon, *As sun to day*. *Shak.*, T. and C., III. 2. 184.

[The allusion in this passage is explained by the following: The poor husbandman perceiveth that the increase of the moon maketh plants fruitful. *Reginald Scott*, *Disc. of Witchcraft*.]

Plantaginaceæ (plan'tā-jī-nā'sē-sē), *n. pl.* [*NL.* (Lindley, 1835), < *Plantago* (*Plantagin-*) + *-aceæ*.] Same as *Plantaginæ*.

Plantaginæ (plan-tā-jīn'ē-sē), *n. pl.* [*NL.* (Ventenat, 1794), < *Plantago* (*Plantagin-*) + *-ææ*.] The plantain family, an anomalous order of gamopetalous plants, little related to any other, characterized by the scarious corolla with alternate stamens; sepals, petals, and stamens each usually four; and the small entire two-celled pod, usually circumsissile. It

includes 3 genera and over 200 species, nearly all of which belong to the typical genus *Plantago*, the other genera, *Bougueria* and *Littorella*, being both monotypic.

Plantago (plan-tā'gō), n. [NL. (Tournefort, 1700) < L. *plantago*; plantain: see *plantain*.] A genus of plants, type of the order *Plantaginee*, distinguished by the peltate seeds, two-celled ovary, and circumscissile capsule. It includes over 200 species, known as *plantain* or *ribwort*, and found everywhere, from arctic to tropical regions, in wet or dry ground, but most common in temperate climates. They are annual or perennial herbs, almost stemless, bearing rosettes of spreading leaves, which are characteristically broad, entire, five- to seven-nerved, with dilated-petiole base. The small flowers are usually crowded in a long spike, cross-fertilized by the earlier maturity of the pistils. Many species are dimorphic, or include perfect seed-bearing plants of two kinds, one form having long stamens and short styles, the other the opposite. Most of the American species are introduced weeds (for which see *plantain*), *kemp*, *hen-plant*, and *way-bread*, and, for *P. lanceolata*, *ribwort*, *rib grass*, *jackstraw*, and *cocks*. *P. media*, the hoary plantain, lamb's-tongue, or fireweed of English pastures, is a pest on account of its stifling growing crops by its broad flat leaves, close-pressed to the ground; and the common *P. major* is sometimes similarly injurious in America. *P. Coronopus* is a peculiar plant of the British sea-cliffs, called *star-of-the-earth* from its divided radiating leaves, also *herb-ivy*, *buck's-horn*, and *hartshorn-plantain*. For other species, see *seawort*, 2, and *ispaghul-seed*. See cut under *plantain*.¹

plantain¹ (plan'tān), n. [Formerly also *plantan*, *plaintain*; < ME. *planteyne*, *plawnteyne*, < OF. *plantain*, F. *plantain* = Fr. *plantage* = Cat. *plantatge* = Sp. *llanten* (also, after F., *plantaina*) = Pg. *tanchagem* = It. *piantaggine*, < L. *plantago* (*plantagin*-), *plantain*, so called from its broad spreading leaf; from the same source as *planta*, a spreading sucker, a plant, and *planta*, the sole of the foot: see *plant*¹, *plant*².] A plant of the genus *Plantago*, especially *P. major*, the common or greater plantain. This is a familiar dooryard weed, with large spreading leaves close

to the ground, and slender spikes; it is a native of Europe and temperate Asia, but is now found nearly everywhere. (See *hen-plant* and *way-bread*.) The English plantain (so called in the United States) is *P. lanceolata*, the ribwort, rib-grass, or ripple-grass, of the same nativity as the former. It has narrow leaves with prominent ribs, and slender stalks a foot or two high, with short thick spikes. (See *cocks* and *jackstraw*.) The sea-plantain or seaside plantain, *P. maritima*, with linear leaves, occurs on muddy shores in both hemispheres. The leaf is bound upon inflamed surfaces with a soothing effect. See also cut under *amphitropus*.

Indian plantain, any plant of the genus *Cacalia*. The most common species is *C. atriplicifolia*, a pale-colored plant from 3 to 6 feet high, with palmately veined angulate-lobed and toothed glaucous leaves.—**Rattle-snake-plantain**. See *Goodyera*.—**Robin's-plantain**, *Erigeron bellidifolius*, a species with few rather broad heads and bluish rays, flowering early, common in the eastern United States.

plantain² (plan'tān), n. [Formerly also *plantan*; < OF. *plantain*, plane-tree, = Sp. *plátano*, also *plátano*, plantain, plane-tree: see *plane*.] A tropical plant, *Musa*

Plantain (*Musa paradisiaca*).

paradisiaca, or its fruit. The plantain closely resembles the banana, and is in fact often regarded as a variety of it. It is distinguished to the eye by purple spots on the stem, and by its longer fruit. The plantain-fruit is commonly eaten cooked before fully mature, while the banana is mostly eaten fresh when ripe. The pulp is dried and pulverized to make meal. The fresh fruit is comparable chemically with the potato, the meal with rice. The plantain, together with the banana, supplies the chief food of millions in the tropics. Though less nutritious than wheat or potatoes, it is produced in vastly larger quantities from the same area, and with far less effort. Sometimes called *Adam's apple*, from the fancy that this was the forbidden fruit of the Garden of Eden; the specific name refers to the same fancy. See *Musa* and *banana*.

They would also bring great store of oranges and plantains, which is a fruit that groweth upon a tree, and is very like unto a cucumber, but very pleasant in eating.

plantain-eater (plan'tān-ē'tēr), n. A bird of the family *Muscophagidae*; a plantain-cutter or touracou. See *touracou*.

plantain-lily (plan'tān-lil'i), n. See *Funkia*.

plantain-tree (plan'tān-trē), n. See *plantain*².

plantal (plan'tal), a. [Cf. OF. *plantal*, a plant, set, seion; < ML. **plantalis*, < L. *planta*, a plant: see *plant*.] Of or belonging to plants.

There's but little similitude betwixt a terreous humidity and plantal germinations.
Glanville, Scep. Sci. (Latham.)

The same inequality of temper made him surmise that the most degenerate souls did at last sleep in the bodies of trees, and grew up merely into plantal life.
Dr. H. More, Immortal. of Soul, III. 1.

plantant, n. An obsolete form of *plantain*¹ and *plantain*².

plant-animal (plant'an-i-māl), n. One of the zoöphytes or *Phytozoa*, as a sea-anemone or coral.

planter (plan'tār), a. [Cf. L. *plantaris*, of or belonging to the sole of the foot, < *planta*, the sole of the foot: see *plant*².] Of or pertaining to the planta, or sole of the foot: as, a *planter*

muscle, tendon, or ligament; the *planter* aspect of the foot or leg: correlated with *palmar*: often in composition: as, *laminipalmar*, *scutellipalmar*.—**Plantar arch**, the arch formed by the external plantar artery.—**Plantar arteries**, the two terminal branches of the posterior tibial artery in the sole of the foot. The external, the larger, passes outward and forward to the base of the fifth metatarsal, where it turns obliquely inward to communicate at the base of the first metatarsal with the dorsal artery, forming the *planter arch*. The internal, the smaller, runs along the inner side to the base of the great toe.—**Plantar fascia**. See *fascia*.—**Plantar interosseal**. See *interosseal*.—**Plantar ligament**, any ligament of the sole of the foot, especially the long calcaneocuboid ligament.—**Planter muscle**, the *plantaris*.—**Planter nerves**, two branches of the posterior tibial, distributed to many of the small muscles and the integument of the sole of the foot, the external terminating in the skin of the little toe and of the inner side of the fourth, the internal in the contiguous sides of the others.—**Planter tubercle**, the tubercle on the first metatarsal bone, for attachment of the tendon of the peroneus longus.—**Planter veins**, the venae comites of the plantar arteries.

plantaris (plan-tā'ris), n.; pl. *plantaris* (-rēz). [NL., sc. *musculus*, muscle: see *planter*.] A small fusiform muscle with a very long tendon ending variably in or near the tendo Achillis. It arises from the femur near the outer head of the gastrocnemius. The muscle is sometimes absent, sometimes double. In man it is very small or vestigial in comparison with its development in some other animals.

plantation (plan-tā'shon), n. [Cf. F. *plantation* = Pr. *plantacio* = Sp. *plantacion* = Pg. *plantação* = It. *piantazione*, *piantagione*, < L. *plantatio* (-n-), a planting, < *plantare*, pp. *plantatus*, plant, transplant: see *plant*.] 1. The act of planting seeds or plants.

In bower and field he sought, where any tuft
Of grove or garden-plot more pleasant lay,
Their tendance, or plantation for delight.
Milton, P. L., IX. 419.

In April they begin to plant, but their chiefe plantation is in May, and so they continue till the midst of June.
Quoted in Capt. John Smith's Works, I. 126.

2. Introduction; establishment.

Those instruments which it pleased God to use for the plantation of the faith.

Bacon, Advancement of Learning, I. 68.

The first plantation of Christianity in this island.

The first publick attempt against Heaven at Babel after the plantation of the world again.

Stillingeet, Sermons, I. vii.

Elizabeth thought the time had come for the colonization or plantation of Ulster.

W. S. Gregg, Irish Hist. for Eng. Readers, p. 37.

4. A planted place. (a) A small wood; a grove; a piece of ground planted with trees or shrubs for the purpose of producing timber or coppice-wood.

I went to see the New Spring Garden at Lambeth, a pretty contriv'd plantation.
Evelyn, Diary, July 2, 1661.

(b) A farm, estate, or tract of land, especially in a tropical or semi-tropical country, such as the southern parts of the United States, South America, the West Indies, Africa, India, Ceylon, etc., in which cotton, sugar-cane, tobacco, coffee, etc., are cultivated, usually by negroes, peons, or coolies: as, a *sugar plantation*; also used attributively: as, *plantation life*; *plantation songs*.

From the Euphrates we ascended the hills through plantations of pistachio nuts.

Pococke, Description of the East, II. l. 152.

The house was of the ordinary plantation type—large, white, with double piazzas, standing high from the ground; and in the yard was a collection of negro-cabins and stables.
The Century, XXXV. 190.

(c) An original settlement in a new country; a colony: as, Rhode Island and Providence plantations.

We kept a day of thanksgiving in all the plantations.
Winthrop, Hist. New England, I. 55.

5. In Maine and New Hampshire, an unorganized and thinly settled division of a county.—

6. An oyster-bed in which the oysters have been artificially planted; a cultivated area of oyster-bottom: a legal term in the State of Delaware.—**Council of Plantations**, in *Eng. Hist.*, a committee of the Privy Council, established in the reign of Charles II., for supervision of the colonies (or foreign plantations): it was soon united with the Board of Trade. In the eighteenth century colonial affairs passed to a separate administration.

plantation-mill (plan-tā'shon-mil), n. Any one of variously constructed mills adapted for use on a plantation or farm for grinding oats, linseed, etc., moved by hand or other power.

plant-bug (plant'bug), n. One of many different heteropterous insects which suck the

juices of plants. They belong chiefly to the family *Capsidae*, as, for example, the tarnished plant-bug, also called *Lygus pratensis*, *Capsus oblineatus*, and *Phytocoris lineolaris*, which does great damage to many different orchard-trees, small fruits, and vegetables in the United States. The dotted plant-bug, a pentatomid, *Euschistus variolarius* or *punctipes*, is also a general planter-feeder, though exceptionally carnivorous. See *Nynus* and *Phytocoris*.

plant-cane (plant'kān), n. The original plants of the sugar-cane, produced from germs placed in the ground; or canes of the first growth, in distinction from the *ratoons*, or sprouts from the roots of canes which have been cut. [West Indies.]

plant-cutter (plant'kut'ēr), n. 1. A bird of the family *Phytotomidae*.—2. pl. In the early history of Virginia, rioters who went about destroying tobacco-plants.

plant-disease (plant'di-zēz'), n. See *disease*.

plant-eating (plant'ē'ting), a. Eating or feeding upon plants; phytophagous; specifically, in entom., belonging to the *Phytophaga*.

planted (plan'ted), p. a. 1. In joinery, wrought on a separate piece of stuff, and afterward fixed in its place: said of a projecting member: as, a *planted molding*.—2. Introduced or naturalized; not indigenous.

There are plenty of foxes, some native, some planted, and all wild.
The Century, XXXII. 345.

planter (plan'tēr), n. [= D. *planter* = MHG. *planzer*, *plhenzer*, G. *planzer* = Sw. *planterare* = Dan. *planter*; as *plant*¹ + -er.] 1. One who plants, sets in the ground or in position, introduces, establishes, or sets up: as, a *planter* of maize or of vines; the first *planters* of Christianity; a *planter* of colonies.

These Planters of the ancient Literature in England hoped well of their Mother Tongue.
Ascham, The Scholemaster, p. 4.

Your lordship hath been a great planter of learning.
Bacon, Advancement of Learning, Pref., p. vii.

2. One who owns a plantation, especially in a tropical or semi-tropical country: as, a coffee-planter; the planters of the West Indies.

The planters . . . as well as the negroes were slaves; though they paid no wages, they got very poor work. *Emerson, West Indian Emancipation.*

3. A piece of timber, or the naked trunk of a tree, one end of which is firmly planted in the bed of a river while the other rises near the surface of the water: a dangerous obstruction sometimes encountered by vessels navigating the rivers of the western United States. *Bartlett.*—4. A tool or machine for planting seeds: as, a corn-planter, a cotton-seed planter, etc. Planters are usually simple hand-tools for opening the ground and dropping the seeds in the hill. A planter that distributes seeds in rows is called a *drill*, and one that sows broadcast a *seeder*.

planterdom (plan'ter-dum), *n.* [*< planter + -dom.*] Planters collectively.

plantership (plan'ter-ship), *n.* [*< planter + -ship.*] The business of a planter, or the management of a plantation.

plant-feeder (plant'fē-dēr), *n.* Any insect which feeds upon plants, as a plant-bug, or plant-feeding beetle. See cuts under *Phytophaga* and *plant-bug*.

plant-feeding (plant'fē-ding), *a.* Feeding upon plants; plant-eating; phytophagous.

plant-food (plant'fōd), *n.* Anything which affords nourishment to vegetation or plants; a fertilizer.

Whilst in the shape of bone-dust it [insoluble phosphate] is sufficiently available as plant-food to be of considerable value. *Ure, Dict., IV. 668.*

planticle (plan'ti-kl), *n.* [*< NL. as if *planticula, dim. of L. planta, a plant: see plant¹.*]

A young plant, or a plant in embryo. *Darwin.*

Plantigrada (plan-tig'rā-dā), *n. pl.* [*NL., neut. pl. of plantigradus, plantigrade: see plantigrade.*]

A subdivision of *Carnivora*, or *Feræ feripedæ*, embracing those carnivorous animals, as the bear and racoon, which walk with the heel upon the ground. In Illiger's classification (1811), the *Plantigrada* were a family of his *Falculata*, or mammals with claws, and contained carnivorous quadrupeds of several different modern families, as the kinkajou, coati, racoon, badger, wolverine, and bear, yet not all of the members of the families to which the animals named properly belong. [Not now in use, excepting as a convenient collective or descriptive term.]

plantigrade (plan'ti-grād), *a. and n.* [*< NL. plantigradus, < L. planta, the sole, + gradi, go, walk.*] I. *a.* Walking on the whole sole of the foot; having the characters of, or pertaining to, the *Plantigrada*: opposed to *digitigrade*. Man is perfectly plantigrade, and the same condition is seen in those quadrupeds, as bears, whose heels touch the ground.

II. *n.* A plantigrade mammal; a member of the *Plantigrada*.

planting (plan'ting), *n.* [*< ME. plantynge; verbal n. of plant¹, v.*] 1. The art of forming plantations of trees; also, the act or art of inserting plants in the soil.—2. A planted place; a grove; a plantation.

That they might be called trees of righteousness, the planting of the Lord, that he might be glorified. *Isa. lxi. 3.*

3. In *arch.*, the laying of the first courses of stone in a foundation.

planting-ground (plan'ting-ground), *n.* A place where oysters are sown or planted.

plantivorous (plan-tiv'ō-rus), *a.* [*< L. planta, a plant, + vorare, devour.*] Plant-eating, as most caterpillars. *Westwood.*

plantless (plant'les), *a.* [*< plant¹ + -less.*] Without plants; destitute of vegetation. *Edinburgh Rev.*

plantlet (plant'let), *n.* [*< plant¹ + -let.*] A small, undeveloped, or rudimentary plant. Also *plantule*.

plant-louse (plant'lous), *n.* A small homopterous insect which infests plants; specifically, an aphid; any member of the *Aphididae*. The members of the related family *Psyllidæ* are distinguished as *jumping plant-lice*. The *Coccidæ* are more properly named *scale-lice*. These three families, with the *Alaudridæ*, are sometimes grouped as *Phytophthiria*. See cuts under *Aphis*, *Phylloxera*, *vine-pest*, *Pemphigus*, and *Pemphigus*.

plant-marker (plant'mār'kēr), *n.* A label, plate, or tablet bearing the common and botanical name of a tree or garden-plant, intended to be set in the ground near its roots for its identification. Such markers are often made of terra-cotta, Parian ware, etc.

plant-movement (plant'mōv'mēt), *n.* See *movement of plants (under movement)*, *epinasty*, and *hyponasty*.

plantocracy (plan-tok'rā-si), *n.* [*< L. planta, plant, + Gr. -κρατία, < κρατειν, govern.*] 1. Government by planters.—2. Planters collectively. *Eclectic Rev.* [Rare.]

plant-of-gluttony (plant'ōv-glut'n-i), *n.* The dwarf cornel, *Cornus Canadensis*—its berries being regarded in the Scotch Highlands as stimulating to appetite.

plantosseous (plan-tos'ē-us), *a.* Of or pertaining to the plantossei.

plantosseus (plan-tos'ē-us), *n.*; *pl. plantossei (-i).* [*NL., < L. planta, the sole of the foot, + os (-oss-), bone: see osseous.*] A plantar interosseous muscle; an interosseus of the sole of the foot: correlated with *dorsosseus* and *palmosseus*. *Coues and Shute, 1887.*

plantsman (plants'man), *n.*; *pl. plantsmen (-men).* A florist; a nurseryman. [Colloq.]

plantula (plan'tū-lā), *n.*; *pl. plantulæ (-læ).* [*NL., < L. planta, the sole of the foot: see plant².*]

In *entom.*, a membranous appendage between the claws of certain insects, corresponding to the onychium or spurious claw of other species. It commonly forms a cushion-like organ, by means of which the insect is enabled to walk over smooth surfaces. When this cushion forms a sucking-disk it is called the *pseudopoda*.

plantular (plan'tū-lār), *a.* [*< plantula + -ar³.*]

In *entom.*, of or pertaining to the plantula.

plantule (plan'tūl), *n.* [*< F. plantule, < NL. *plantula, dim. of L. planta, a plant: see plant¹.*]

In *bot.*, same as *plantlet*; also, the embryo of a plant.

planula (plan'ū-lā), *n.*; *pl. planulæ (-læ).* [*NL., dim. of L. planus, flat: see plane¹.*]

The ordinary locomotory embryo of the coelenterates, which is of flattened form, mouthless, ciliate, and free-swimming. The term originally applied only to such embryos of certain hydrozoans, but has become more comprehensive. See cut under *blastocoele*.

planulan (plan'ū-lan), *n.* [*< planula + -an.*]

A planula. *Encyc. Brit.*

planular (plan'ū-lār), *a.* [*< planula + -ar³.*]

Of or pertaining to a planula: as, *planular cilia*; the *planular* stage of an embryo.

planuliform (plan'ū-li-fōrm), *a.* [*< NL. planula + L. forma, form.*]

Resembling a planula in form, or having the morphological valence of a planula. *Huxley, Anat. Invert., p. 395.*

planuloid (plan'ū-loid), *a.* [*< NL. planula + Gr. εἶδος, form.*]

Resembling a planula; planuliform.

planuria, **planury** (plā-nū'ri-ā, plan'ū-ri), *n.* [*NL., < Gr. πλάνος, straying, + οὖρον, urine.*]

The discharge of urine through an abnormal passage; uroplanis.

planxyt (plan'ksti), *n.* [Appar. an adaptation of *L. planctus*, a lament: see *plaint*.]

A lament; an Irish or Welsh melody for the harp, often, but not necessarily, of a mournful character.

Dr. Petrie gives a *Planxyt* of his in E-major, "Lady Wrixon," from a collection published in Dublin in 1720.

W. K. Sullivan, Introd. to O'Curry's Anc. Irish, p. dclx.

plap (plap), *v. i.*; pret. and pp. *plapped*, ppr. *plapping*. [Imitative; cf. *plash*, *flap*, *slap*, etc.]

plaque (plak'aj), *n.* [*< F. plaque, a plate, + -age.*]

A method of producing calico-prints: same as *padding*, 3.

plaque (plak), *n.* [*< F. plaque, a plate (of metal), slab, badge, patch, ticket, etc.: see plack.*]

1. An ornamental plate; a brooch; the plate of a clasp.

In front of his turban there was a *plaque* of diamonds and emeralds. *W. H. Russell, Diary in India, II. 220.*

2. A square, oblong, or circular tablet of bronze or silver, the largest dimension of which extends to three or four inches, ornamented in relief with some religious, mythological, allegorical, or decorative subject. The *Plaque*, from which the *plaque* originated, is set in an ornamental framework; the Renaissance *plaque* was intended to be hung up or inserted in a box or a piece of furniture, or, if circular, to be worn as a hat-medallion. Also called *plaque*.

3. Any tablet or distinctly flat plate of metal or porcelain, whether plain or ornamented; particularly, an ornamental circular plate intended for a wall-decoration. See cut in next column.

Plaque in Relief of Enameled Pottery, by Bernard Palissy; 16th century.

—4. The especial decoration of a high rank in many honorary orders. See *star*, *insignia*, *order*, 6 (b).—5. In *anat.* and *zool.*, a small flat object of round figure, as a blood-disk; a little plate. Also *plaque*.—6. A patch.

Warts, epithelioma, herpes, and mucous plaques. *Lancet*, No. 3468, p. 335.

Plaque of blood. Same as *blood-plate*.—**Plaques jaunes**, patches of yellow softening in cerebral cortex.—**Plaques of Peyer**. Same as *Peyerian glands* (which see, under *gland*).

plaqet (plak'et), *n.* [OF.: see *placket*.] In medieval armor, same as *placcate*.

plaque (plak'et), *n.* [F., dim. of *plaque*, a plate: see *plague*. Cf. *placket*.] 1. A small plaque or flat decorative object, as a tile of porcelain or a plate of metal, made for application to a piece of furniture as part of its ornamentation: as, a bureau decorated with bronze plaques.

On the other hand, the finer of the two medallions . . . bears, in its pseudo-classicality, a considerable resemblance to the work of another North Italian worker in bronze, . . . as will appear from an examination of several *plaquettes* from his hand. *The Academy*, Dec. 8, 1888, p. 877.

2. Same as *plague*, 5.

G. Hayem insists that the elements of the blood, to which he gave the name of *hematoblasts*, are identical with the *plaquettes*, or corpuscles, described by Bizzozero. *Smithsonian Report*, 1888, p. 78a.

plash¹ (plash), *v.* [*< ME. *plashen (not found except as in the noun), < MD. plassen, plassen = MLG. plasken = late MHG. platschen, blatschen, G. platschen = Dan. plask = Sw. plaska, dabble; with orig. formative -sk, from the root seen in AS. plættan, plættian, strike with the hand, = Sw. platta, tap, pat: see plat¹, pat¹.*]

The word came to be regarded as imitative, and appears later as *plash*. I. *intrans.* 1. To dabble in water; also, to fall with a dabbling sound; splash.

The shells served as *plasms* or moulds to this sand.
Woodward.

2. In *biol.*, *plasma*. See *bioplasma*, *deutoplasma*,
protoplasma, *plasmogen*, *sarcode*.

plasma (plas'mā), *n.* [NL.: see *plasm*.] 1.
A variety of translucent quartz, or silica, of a
rich grass-green or leek-green color, occurring
in large pieces, associated with common chal-
cedony. Many fine engraved ornaments of
this stone have been found among the ruins of
Rome.—2. The liquid part of unaltered blood,
lymph, or milk, as distinguished from the cor-
puscles of the blood or lymph, or the oil-glob-
ules of the milk; also, the juice expressed from
fresh muscle; the muscle-plasma.—3. The
primitive indifferent nitrogenized hydrocarbon
which forms the basis of all tissues of plants
and animals; the "physical basis of life," in
its simplest expression: now generally called
protoplasma. *Plasma* is now less used in this sense
than formerly, as it had originally the more restricted
meaning given in def. 2. See *protoplasma* and *starch*.

4. In *phar.*, same as *glycerite* of *starch*.
plasmosome (plas'mā-sōm), *n.* [cf. Gr. *πλάσμα*,
a molded figure (see *plasm*), + *σώμα*, body.] A

separate particle of *plasm*; a protoplasmic cor-
puscle.

The out-wandering *plasmosomes* form the so-called para-
nuclei. *Micros. Sci.*, XXX. II. 168.

plasmatic (plas-mat'ik), *a.* [= F. *plasmatique*,
< Gr. *πλάσματικός*, imitating, < *πλάσμα*, a molded
figure, an image: see *plasm*.] 1. In *biol.*, same
as *plasmic*.—2. Giving shape; having the pow-
er of giving form; plastic. *Imp. Dict.*

plasmatical (plas-mat'ik-al), *a.* [cf. *plasmatic*
+ *-al*.] Same as *plasmatic*.

Working in this, by her (Psyche's) *plasmatical* spirits or
archel, all the whole world into order and shape.

Dr. H. More, Philos. Poems (1647), p. 342, notes.

plasmation (plas-mā'shōn), *n.* [LL. *plasma-
tio* (n-), a forming, creating, < *plasma*, a molded
figure, an image: see *plasm*.] Formation.

The *plasmation* or creation of Adam is reckoned among
the generations. *Grafton*, Chron. I. 6.

plasmator (plas-mā-tōr), *n.* [cf. Gr. *πλάσμα* (*πλασμα*), a molded figure, + L. *parere*,
bring forth.] In *mycology*, noting germination
in which the whole protoplasm of a gonidium
issues as a spherical mass which at once be-
comes invested with a membrane and puts out
a germ-tube. *De Bary*.

plasmator, *n.* [ME., = F. *plasmateur*, < LL.
plasmator, a former, fashioner, creator, < *plasma*,
form, mold, fashion, < *plasma*, a molded
figure: see *plasm*.] One who forms or creates;
a creator.

Hayle! fulgent Phebus and fader eternal,
Fartite *plasmator* and god omnipotent.

York Plays, p. 514.

plasmaturet, *n.* [cf. LL. *plasma* (t-), a molded
figure, + *-ure*.] Form; shape.

That so stately frame and *plasmature* wherein the man
at first had been created. *Urquhart*, tr. of Rabelais, II. 8.

plasmic (plaz'mik), *a.* [cf. *plasm* + *-ic*.] Of
the nature of *plasma*; pertaining to *plasma*;
plastic or formative; blastemic; protoplasmic:
as, *plasmic* substances or processes, a *plasmic*
origin. Also *plasmatic*.

plasmine (plas'min), *n.* [cf. Gr. *πλάσμα*, a molded
figure, + *-ine*.] A proteid precipitated from
blood-plasma on the addition of sodium chlorid
and other salts. It coagulates, forming fibrin,
when redissolved in water.

plasmochyme (plas'mō-kim), *n.* [cf. Gr. *πλάσμα*,
a molded figure, + *χυμός*, juice, chyle: see
chyme.] The thick fluid albuminous substance
of a cell. Also *plasmochym*. *Micros. Sci.*, XXX.
II. 211.

plasmode (plas'mōd), *n.* Same as *plasmodium*.

plasmodia, *n.* Plural of *plasmodium*.

plasmodial (plas-mō'di-al), *a.* [cf. *plasmodi-um*
+ *-al*.] Having the character or properties of
plasmodium. Also *plasmidic*.

Plasmidiata (plas-mō'di-ā-tā), *n. pl.* [NL.:
see *plasmodium*.] Plasmidiote organisms:
a synonym of *Myxozoa* when these are regarded
as animals. *E. R. Lankester*.

plasmidiate (plas-mō'di-āt), *a.* [cf. *plasmodi-
um* + *-ate*.] Provided with or producing *plasma-
dium*; consisting of or contained in *plasma-
dium*.

plasmidiation (plas-mō'di-ā'shōn), *n.* [cf. *plasma-
diate* + *-ion*.] In *bot.*, the disposition of
plasmidia. *Jour. of Bot. British and Foreign*,
1883, p. 371.

plasmidic (plas-mō'dik), *a.* [cf. *plasmodi-um*
+ *-ic*.] Same as *plasmodial*.

plasmidiocarp (plas-mō'di-ō-kārp), *n.* [cf. NL.
plasmidium + Gr. *καρπός*, a fruit.] In *Myxo-
mycetes*, a form of fructification which is more
or less irregular in shape. Compare *æthallum*, 2,
and *sporangium*. *Cooke*, Myxomycetes of Great
Britain, p. 30.

plasmidiocarpous (plas-mō'di-ō-kār'pus), *a.*
[cf. *plasmidiocarp* + *-ous*.] Resembling, char-
acterized by, or producing *plasmidiocarps*.
Cooke, Myxomycetes of Great Britain, p. 30.

Plasmidiophora (plas-mō'di-ō-fō-rā), *n.* [NL.
(Woronin), < *plasmidium* + Gr. *φέρω* = *E. bear*.] A
genus of myxomycetous fungi, giving name
to the family *Plasmidiophoræ*. The spores are
free, not quaternate, and are disposed in sori;
they emit zoospores in germination.

Plasmidiophoræ (plas-mō'di-ō-fō-rā-ē), *n. pl.*
[NL. (Zopf), < *Plasmidiophora* + *-æ*.] A fam-
ily of myxomycetous fungi with the fructifica-
tion disposed in sori.

plasmidium (plas-mō'di-um), *n.*; *pl. plasmidia*
(-ā). [NL., < Gr. *πλάσμα*, a molded figure, +
ιδίος, form.] 1. Protoplasm of protozoans in
sheets, masses, or comparatively large quanti-

ties, as formed by the plasmodiate members of
the *Protozoa*. True plasmodium is formed by the or-
ganic fusion of two or several amebiform bodies, and dis-
tinguished from the aggregate *plasmidium* resulting from
mere contact. See *cut* under *Protophyta*.
2. A definite quantity of plasmodium, or the
plasmodium of given individual organisms.

Large masses of gelatinous consistence characteristic of
the so-called animal phase of the Myxomycetean, techni-
cally known as the *plasmodium*.

W. S. Kent, Infusoria, p. 42.

3. The naked multinucleated mass of proto-
plasm, exhibiting ameboid movement, which
makes up the entire plant-body of the slime-
molds (*Myxomycetes*) during the vegetative
period of their existence. See *Myxomycetes*,
slime-mold, *Fuligo*, 2, and *Olpidium*.—**Plasmodi-
um malarie**, a series of forms found in malarial blood,
believed to be different stages in the life-history of a
single organism which causes paludism. Some of these
forms are amebiform, some crescent-shaped, some ro-
sette-shaped, some ciliate; some contain pigment-gran-
ules, and some do not.

plasmogen (plas'mō-jen), *n.* [cf. Gr. *πλάσμα*, a
molded figure, + *-γενής*, producing: see *-gen*.] True
protoplasm; bioplasma. See the quotation,
and *germ-plasma*.

Physiologists have come to use the word "protoplasm"
for one of the chemical substances of which Schultze's
protoplasm is a structural mixture—namely, that highest
point in the chemical elaboration of the molecule which
is attached within the protoplasm, and up to which some
of the chemical bodies present are tending, whilst others
are degradation products resulting from a downward me-
tamorphosis of portions of it. This intangible, unstable,
all-pervading element of the protoplasm cannot at present
be identified with any visibly separate part of the cell-sub-
stance. . . . This "critical" substance, sometimes called
"true protoplasm," should assuredly be recognized by a
distinct name "*plasmogen*." *Encyc. Brit.*, XXIV. 517.

plasmogony (plas-mog'ō-ni), *n.* [cf. Gr. *πλάσμα*, a
molded figure, + *-γονία*, generation: see *-gony*.] The
generation or origination of an organism
from *plasma*. *Rosseter*.

plasmology (plas-mol'ō-jī), *n.* [cf. Gr. *πλάσμα*, a
molded figure, + *-λογία*, < *λέγειν*, speak: see
-ology.] Minute or microscopic anatomy, as a
branch of biology; histology; the study of the
ultimate corpuscles of living matter, as regards
their structure, development, and properties,
with the aid of the microscope.

plasmolysis (plas-mol'i-sis), *n.* [NL., < Gr.
πλάσμα, a molded figure, + *λύσις*, a loosing.] In
bot., the contraction of the protoplasm in ac-
tive cells under the action of certain reagents.
When the solutions employed are more dense than the
fluids within the cell, a certain amount of water will be
withdrawn from the contents of the cell by exosmotic
action, thereby causing a shrinking which can easily be
noted under the microscope, and, when the density of
the solution is known, will allow the experimenter to as-
certain within very narrow limits the density of the con-
tents of the cell and the relative degree of turgidity.

plasmolytic (plas-mō-lit'ik), *a.* [cf. *plasmolysis*
(-lyt-) + *-ic*.] In *bot.*, exhibiting or character-
ized by *plasmolysis*; employed in *plasmolysis*.
plasmolyze (plas'mō-liz), *v. t.*; pret. and pp.
plasmolyzed, ppr. *plasmolyzing*. [cf. *plasmolysis*.]
To effect *plasmolysis* in or of; subject to *plasma-
lysis*. Also spelled *plasmolyse*.

In order to see the primordial utricle better, *plasmolyse*
the cell by running in 10 p. c. salt solution.

Huxley and Martin, Elementary Biology, p. 404.

plaster (plās'ter), *n.* [Formerly also *plaster*,
playster; < ME. *plaster*, also *plastre*, *playster*
(after OF.). < AS. *plaster* = D. *pleister* = MLG.
plaster = OHG. *phlastar*, *plastar*, MHG. *phlas-
ter*, *pfaster*, *plaster*, G. *pfaster* = Sw. *plåster* =
Dan. *plaster* = OF. *plastre*, *plastre*, a plaster,
plaster, F. *plâtre*, gypsum, = Pr. *plastre*, a plas-
ter, = It. dim. *piastrello*, a plaster (ML. *plastrum*,
gypsum); with loss of orig. prefix; ME. *enplastre*,
< OF. *emplastre*, F. *emplâtre*, a plaster,
< L. *emplastum*, a plaster for a wound, <
Gr. *ἐμπλάστρον* for *ἐμπλάστον*, a plaster: see *em-
plaster*.] 1. In *phar.*, a solid compound in-
tended for external application, adhesive at
the temperature of the human body, and re-
quiring to be softened by heat before being
spread.

My myddell woundys they ben derne & depe;

Ther ys no *plaster* that persyth arght.

Political Poems, etc. (ed. Furnivall), p. 215.

Where any private harm doth grow, we are not to reject
instruction as being an unmeet *plaster* to apply unto it.

Hooker, Eccles. Polity, II. 12.

2. A composition of lime, water, and sand,
with or without hair for binding, well mixed so
as to form a kind of paste, and used for coat-
ing walls and partitions of houses.

A House should be built or with Brick or with Stone;

Why, 'tis *Plaster* and Lath; and I think that's all one.

Prior, Dowd-Hall, st. 38.

3. Calcined gypsum or calcium sulphate, used, when mixed with water, for finishing walls, for molds, ornaments, casts, luting, cement, etc. Plaster used as a ground for painting in distemper is unburned, and of two kinds, one coarse and one of a finer quality. Both are made from white alabaster, but the latter, which is used also as a ground for gilding, and for working ornaments in relief, is more carefully prepared than the former. The plaster used for taking casts from life or from statues is always burned.

They suppose that this ryuer [Bahuan] hath made it self away vnder the gronde by some passages of playster or salte earthe.

Peter Martyr, tr. in First Books on America (ed. Arber), p. 172.

Aconite plaster, aconite-root, alcohol, and resin plaster. — **Adhesive plaster**. Same as resin plaster. — **Ammoniac plaster**, ammoniac and diluted acetic acid. — **Ammoniac plaster with mercury**, ammoniac, mercury, olive-oil, sublimed sulphur, diluted acetic acid, and lead-plaster. — **Antimonial plaster**, double tartrate of antimony and potassium and Burgundy pitch. — **Arnica plaster**, extract of arnica-root and resin plaster. — **Aromatic plaster**. Same as spice-plaster. — **Asafetida plaster**, asafetida, lead-plaster, galbanum, yellow wax, and alcohol. — **Belladonna plaster**, belladonna-root, alcohol, and resin plaster. — **Blistering plaster**. Same as cantharides plaster. — **Brown soap plaster**. Same as soap-cerate plaster. — **Burgundy-pitch plaster**, Burgundy pitch and yellow wax. — **Calced plaster**. Same as plaster of Paris. — **Canada-pitch plaster**, Canada pitch and yellow wax. — **Cantharides plaster**, cantharides, yellow wax, resin, and lead. Also called *cantharides cerate*, *blistering plaster*, *vesicating plaster*. — **Capicum plaster**, resin plaster and oleoresin of capicum. — **Carbonate-of-lead plaster**, lead carbonate, olive-oil, yellow wax, lead-plaster, and Florentine orris. — **Chalybeate plaster**. Same as iron plaster. — **Court plaster**. See *court-plaster*. — **Diachylon plaster**. Same as lead-plaster. — **Fibrous plaster**, plaster of Paris into which fibrous material of some kind is worked to give it coherence; used for patterns in low relief for ceilings, walls, and the like. — **Galbanum plaster**, galbanum, turpentine, Burgundy pitch, and lead-plaster; or galbanum, ammoniac, yellow wax, and lead-plaster. — **Hemlock-pitch plaster**. Same as Canada-pitch plaster. — **Iodide-of-lead plaster**, lead iodide, soap plaster, and resin plaster; or lead iodide, lead-plaster, and resin. — **Iron plaster**, oxid of iron, Canada turpentine, Burgundy pitch, and lead-plaster. Also called *chalybeate plaster*, *strengthening plaster*. — **Icinglass plaster**, icingglass, alcohol, glycerin, and tincture of benzoin. Also called *court-plaster*. — **Lath and plaster**. See *lath*. — **Lead plaster**. See *lead-plaster*. — **Litharge plaster**. Same as lead-plaster. — **Logan's plaster**, litharge, lead carbonate, Castile soap, butter, olive-oil, and mastic. — **Mahy's plaster**. Same as carbonate-of-lead plaster. — **Mercurial plaster**, mercury, olive-oil, resin, and lead-plaster. — **Miraculous plaster**, red oxid of lead, olive-oil, camphor, and alum. — **Opium plaster**. See *opium-plaster*. — **Pitch-plaster**, Burgundy pitch, frankincense, resin, yellow wax, oil of nutmeg, and olive-oil. — **Pitch-plaster with cantharides**, Burgundy pitch and cerate or plaster of cantharides; or cantharides, oil of nutmeg, yellow wax, resin, soap plaster, and resin plaster. Also called *warm plaster*. — **Plaster cast**, a reproduction of an object made by pouring plaster of Paris mixed with water into a mold which has been made from the object to be copied. Many molds are needed for a complicated figure, and the parts separately cast are united, showing raised seams where they are put together. — **Plaster jacket**, a bandage surrounding the trunk, made stiff with gypsum, used in cases of the vertebrae. — **Plaster mull**, a plaster made by coating a thin sheet of gutta-percha, backed with manila, with the substance that is to be applied to the skin. — **Plaster of Paris**. (a) Native gypsum: so called because found in large quantities in the Tertiary of the Paris basin. See *gypsum*. (b) Calcined gypsum—that is, gypsum from which the water has been driven off by heat: used in building and in making casts of busts and statues, etc. When diluted with water into a thin paste, plaster of Paris sets rapidly, and at the instant of setting expands or increases in bulk; hence this material becomes valuable for filling cavities, etc., where other earths would shrink. — **Plaster process**, a method of making stereotype plates for printing by the use of plaster. A mold of the type page is made by pouring over it liquid plaster of Paris; this mold when baked entirely dry, is filled with melted type-metal. *Workshop Receipts*, 4th ser., p. 217. — **Poor man's plaster**, a plaster composed of tar, resin, and yellow wax. *Dunglison*. — **Porous plaster**, a spread plaster having numerous small holes to prevent wrinkling and to render it more pliable. — **Rademacher's plaster**, red lead, olive-oil, amber, camphor, and alum. — **Resin plaster**, resin, lead-plaster, and yellow wax or hard soap. Also called *adhesive plaster*, *sticking plaster*. — **Soap-cerate plaster**, curd soap, yellow wax, olive-oil, oxid of lead, and vinegar. — **Soap plaster**, soap and lead-plaster, with or without resin. — **Spice plaster**, yellow wax, suet, turpentine, oil of nutmeg, oilbalm, benzoin, oil of peppermint, and oil of cloves. Also called *aromatic plaster*, *stomach-plaster*. — **Sticking plaster**. Same as resin plaster. — **Stomach-plaster**. Same as spice plaster. — **Stramonium plaster**, extract of stramonium, elemi, and galbanum plaster. — **Strengthening plaster**. Same as iron plaster. — **Thapsia plaster**, yellow wax, Burgundy pitch, resin, terebinthina cocta, Venice turpentine, glycerin, and thapsia resin. — **Vesicating plaster**. Same as cantharides plaster. — **Vigo plaster**, lead-plaster, yellow wax, resin, oilbalm, ammoniac, bdellium, myrrh, saffron, mercury, turpentine, liquid storax, and oil of lavender. — **Warm (or warming) plaster**. Same as pitch-plaster with cantharides. — **Zinc plaster**, zinc sulphate and Castile soap.

plaster (plás'tér), v. t. [Formerly also *plaister*, *plaster*; < ME. *plastren*, *playsteren*, *playstren* = D. *pleisteren* = MLG. *plasteren* = G. *pfastern* = Sw. *plåstra* = Dan. *plastre*; from the noun: see *plaster*, n. Cf. *emplaster*, v.] 1. To apply a medicative plaster to; cover with a plaster; as, to plaster a wound.

And be he bathed in that blode baptised, as it were, And thanne *plastered* with penance and passoun of that babl, He shulde stonde and steppe. *Piers Plowman* (B), xvii. 96.

2. To cover or overlay with plaster, as the walls of a house, partitions, etc.

The east side [of the aqueduct] is *plastered* with a very strong cement, probably to prevent any damage from the sands that might be drove against it.

Pococke, Description of the East, II. 1. 59.

The houses [at Rome] are of stone, but *plastered* as at Vienna.

Eustace, Italy, II. 1.

3. To bedaub or besmear: as, to *plaster* the face with powder. [Colloq.]—4. To fill or cover over with or as with plaster; hide; gloss: with up.

But see here the conveyance of these spiritual gentlemen in *plastering* up their unsauery sorceries.

Bp. Bale, English Votaries, I.

And suck out clammy dewes from herbs and flowers, To smear the chinks, and *plaster* up the pores.

Addison, tr. of Virgil's Georgics, iv.

5. To treat with plaster; add gypsum to: as, to *plaster* vines by dusting them with gypsum in order to prevent rot or mildew of the berries; to *plaster* wines by adding gypsum in order to neutralize acid or produce other fancied benefits.

plasterbill (plás'tér-bil), n. The surf-scooter or surf-duck, (*Oedemia* (*Pelionetta*) *perspicillata*: so called from a peculiarity of the bill. G. Turnbull, 1888. See cut under *surf-duck*. [Massachusetts.]

plaster-clover (plás'tér-klō'vèr), n. The sweet clover, *Melilotus officinalis*: so called from its use in ointments.

plasterer (plás'tér-ér), n. [= D. *pleisteraar* = G. *pfasterer*, *pfüsterer*; as *plaster*, v., + -er¹.] One who plasters walls; also, one who makes plaster ornaments.

plastering (plás'tér-ing), n. [*ME. plastering*, *playsteryng*; verbal n. of *plaster*, v.] 1. The act or operation of overlaying with plaster. — 2. The plaster-work of a building; a covering of plaster. — 3. The treatment of wines by the addition of gypsum or plaster of Paris. See *plaster*, v., 5.

plastering-machine (plás'tér-ing-má-shén'), n. A machine designed for use in spreading plaster in forming interior walls and ceilings. Attempts to construct a practical machine of this kind, adapted to general use, have not yet succeeded, and the ancient method of plastering with hand-trowels is still universal.

plaster-mill (plás'tér-mil), n. 1. A machine consisting of a roller or a set of rollers for grinding lime or gypsum to powder. — 2. A mortar-mill.

plaster-stone (plás'tér-stón), n. Gypsum, or a species of gypsum.

plastery (plás'tér-i), a. [*< plaster + -y¹*.] Resembling plaster; containing plaster.

St. Peter's disappoints me; the stone of which it is made is a poor *plastery* material; and indeed Rome in general might be called a rubbishy place.

A. H. Clough.

plastic (plás'tik), a. [= F. *plastique* = Sp. *plástico* = Pg. It. *plastico* (cf. D. G. *plastisch* = Sw. Dan. *plastisk*), < L. *plasticus*, < Gr. *πλαστικός*, of or belonging to molding or modeling, < *πλαστός*, verbal adj. of *πλασσειν*, mold or form in clay, wax, etc. Cf. *plaster*.] 1. Capable of molding or of giving form or fashion to a mass of matter; having power to mold.

Benign Creator, let thy *plastic* Hand Dispose its own Effect.

Prior, Solomon, III.

Plastic Nature working to this end.

Pope, Essay on Man, III. 9.

The One Spirit's *plastic* stress Sweeps through the dull dense world.

Shelley, Adonais, xlii.

2. Capable of being modeled or molded into various forms, as plaster, clay, etc.; hence, capable of change or modification; capable of receiving a new bent or direction: as, the mind is *plastic* in youth.

Stuff at hand, *plastic* as they could wish.

Wordsworth, French Revolution.

3. Pertaining to or connected with modeling or molding; produced by or characteristic of modeling or molding: as, the *plastic* art (that is, sculpture in the widest sense, as distinguished from painting and the graphic arts).

Pictorial rather than *plastic* in style, both in action and in the treatment of draperies.

C. C. Perkins, Italian Sculpture, p. 162.

4. In *biol.*, specifically, plasmic. — **Plastic bronchitis**, pseudomembranous bronchitis. — **Plastic clay**, clay suitable for making pottery or bricks; specifically, a division of the Eocene in England, especially in the London basin and on the Isle of Wight, where it is characteristically developed. The Plastic clay series was so named by T. Webster, in imitation of the name given by Cuvier

and Brongniart (*Argile plastique*) to a division of the series in the Paris basin. The beds thus named by Webster were later designated by Prestwich as the Woolwich and Reading series. Part of the series is very fossiliferous; among the fossils is a bird as large as the dinosaurs of New Zealand. — **Plastic crystal**. See *crystal*. — **Plastic force**, the sum total of agencies producing growth and organization in living bodies. — **Plastic gum**, gutta-percha. — **Plastic imagination**, the productive or creative imagination. — **Plastic medium**, something intermediate between soul and body, assumed to account for their action one upon the other. — **Plastic nature**. See *nature*. — **Plastic operations**, plastic surgery, operations which have for their object the restoring of lost parts, as when the skin of the cheeks is used to make a new nose (rhinoplasty). — **Plastic solid**. See *solid*.

plasticity (plás'ti-ká-l), a. [*< plastic + -al*.] Same as *plastic*. Dr. H. More, Philosophical Writings, Pref. Gen., p. xvi.

plastically (plás'ti-ká-l-i), adv. In a plastic manner; by molding or modeling, as a plastic substance.

plasticity (plás-tis'i-ti), n. [= F. *plasticité* = Sp. *plasticidad* = Pg. *plasticidade*; as *plastic + -ity*.] The property of being plastic. (a) The property of giving form or shape to matter.

To show further that this protoplasm possesses the necessary properties of a normal protoplasm, it will be necessary to examine . . . what these properties are. They are two in number, the capacity for life and *plasticity*. H. Drummond, Natural Law in the Spiritual World, p. 229.

(b) Capability of being molded, formed, or modeled.

The race must at a certain time have a definite amount of *plasticity*—that is, a definite power of adapting itself to altered circumstances by changing in accordance with them.

W. K. Clifford, Lectures, I. 102.

Some natures are distinguished by *plasticity* or the power of acquisition, and therefore realise more closely the saying that man is a bundle of habits.

A. Bain, Emotions and Will, p. 473.

plastid (plás'tid), n. and a. [*< NL. plastidium*, q. v.] 1. a. 1. A unicellular organism; a simple unit of aggregation of the first order, as an individual protozoan, or a cell considered with reference to its developmental or evolutionary potentiality. The word has no exact zoological signification. Haeckel used it for any elementary organism, as a cell or cytoide.

If we reduce organized beings to their ultimate organisms—cells or *plastids*.

Darwin, Origin of the World, p. 377.

2. In *bot.*, one of the variously shaped proteid bodies, such as chlorophyll-granules, leucoplastids, chromoplastids, etc., which may be clearly differentiated in the protoplasm of active cells. They have substantially the same chemical and, with the exception of color, the same physical properties as protoplasm. They are regarded as being the centers of chemical activity in cells.

II. a. Having the character or quality of a plastid; plastic or plasmic.

plastidium (plás-tid'i-um), n.; pl. *plastidia* (-á). [NL., < Gr. *πλαστός*, verbal adj. of *πλασσειν*, mold, form (see *plastic*), + dim. -ίδιον.] Same as *plastid*.

Plastidozoa (plás'ti-dō-zō'á), n. pl. [NL., < *plastidium* + Gr. *ζῷον*, animal.] Same as *Protozoa*.

plastidular (plás-tid'ū-lār), a. [*< plastidule + -ar³*.] Of or pertaining to plastidules.

plastidule (plás'ti-dūl), n. [*< plastid + -ule*.] A molecule of protoplasm; chemically, the smallest mass of protoplasm which can exist as such, or the very complex and highly unstable molecule of the chemical substance protein, when invested with vital activities.

plastilina (plás-ti-lín'á), n. [*< plast(ic) + -il + -ina*.] A modeling-clay so compounded as to remain moist for a considerable time, and thus dispense with frequent wetting during the progress of the work.

plastin (plás'tin), n. [*< Gr. πλαστός*, verbal adj. of *πλασσειν*, form, mold, + -in².] In *biol.*, an element in the chemical composition of the cell-nucleus: according to Swartz, who calls it also *cytoplastin*, a viscous extensible mass which resists pepsin- and trypsin-digestion.

Carnoy . . . believes that the single, greatly coiled chromatin thread present in the nucleus in Arthropoda has a "plastin envelope," consisting of nuclein substances. . . . Besides the "nuclein" discovered by Miescher, which forms an essential part of the mass of the nucleus, Reinke and Kowalew have found "plastin," and Kossel "histon" and "adenin."

Quart. Jour. Micros. Sci., XXX. II. 168, 169.

plastography (plás-tog'ra-f), n. [*< Gr. πλαστός*, verbal adj. of *πλασσειν*, form, mold, + -γρᾱφία, < γράφειν, write.] Imitation of handwriting; forgery.

plastra, n. Plural of *plastrum*.

plastral (plás'tral), a. [*< plastron + -al*.] In *herpet.*, of or pertaining to the plastron; entering into the formation of the under shell: as, *plastral* bones; *plastral* scutes or sutures.

plastron (plas'tron), *n.* [*F. plastron* (= *It. piastrone*), a breastplate, < *OF. plastre*, a plaster: see *plaster*.] 1. A breastplate; a garment or part of a garment covering the breast. Specifically—(a) The early breastplate worn under the hauberk or brigandine: one of the earliest pieces of plate-armour introduced in the European middle ages. *C. Boutell*, *Arms and Armour in England*. (b) A wadded shield of leather which masters hang before the right breast when giving lessons in fencing. (c) A detachable part of a woman's dress, made of some soft material, and suspended in loose folds from the throat to the waist and caught in the belt: as, a *plastron* of lace, crape, or silk. (d) An ornamental and often jeweled decorative plaque worn on the breast by Hindu women. (e) A man's shirt-bosom, especially one of the form fashionable for evening-dress 1875-90, without plaits, presenting a smooth surface of lawn. 2. In *herpet.*: (a) The ventral part of the shell of a chelonian or testudinate; the lower shell, or under side of the shell, of a turtle or tortoise: more or less opposed to *carapace*. The plastron is wholly an exoskeletal or integumentary structure, in which no bones belonging to the endoskeleton or skeleton proper are found. It consists of a number, typically nine, of separate dermal bones, developed in membrane, and covered with horny epidermis, or tortoise-shell. The nine typical pieces are one median and four pairs lateral, called *entoplastron*, *epiplastron*, *hyoplastron*, *hypoplastron*, and *ziphioplastron*. Formerly, when these were supposed to contain or represent sternal elements, they were respectively named *entosternum*, *episternum*, *hyosternum*, *hyposternum*, and *ziphiosternum*. The plastron is usually immovable, like the carapace, but may be variously hinged, in some cases so as to shut the animal in completely. See also cuts under *carapace*, *Pleurapodystia*, and *Chelonis*. (b) One of the similar exoskeletal plates developed upon the under side of the body of certain *Amphibia*, as the *Labyrinthodontia*.—3. In *mammal.*, the ventral shield or cuirass of the glyptodonts or fossil armadillos.—4. In *anat.*, the sternum with the costal cartilages attached, as removed in autopsies.—5. In *ornith.*, a colored area on the breast or belly of a bird, like or likened to a shield. *Coues*.

Plastron of Tortoise (*Emys*), ventral surface (outside), showing twelve horny epidermal scales as indicated by the dark lines, one of which traverses each ziphiosternal (*xp*) and each hyposternal (*hp*) bony scute; *ec*, interclavicular scute, or entoplastron; *cl*, clavicular scute (clavicularium); *av*, hyosternal scute.

plastron-de-fer (plas'tron-dè-fer'), *n.* Same as *plastron*, 1 (a).
plastrum (plas'trum), *n.*; pl. *plastras* (-trā). [*NL.*, an accom. form of *plastron*; cf. *ML. plastrum*, plaster (gypsum): see *plaster*, *plastron*.] Same as *plastron*.

Platanaceae (plat-a-nā'sē-ē), *n. pl.* [*NL.* (Lindley, 1836), < *Platanus* + *-aceae*.] An order of apetalous trees of the series *Unisexuales*, consisting of the genus *Platanus*, and characterized by having monœcious flowers in dense globose heads, without calyx, and with but few or minute bracts, by the ovary with one cell and one ovule, and the fruit a ball of numerous long achenes, each narrowed into a slender base surrounded with long hairs. See cut under *plane-tree*.

platane, **platan** (plat'ān, plat'an), *n.* [= *D. platan* = *G. platane* = *Sw. Dan. platan*, < *F. platane* = *Sp. plátano* = *Pg. It. platano*, < *L. platanus*, < *Gr. πλάτανος*, a plane-tree: see *plane*³ and *Platanus*, and cf. *plantain*².] The plane-tree.

I espied thee, fair indeed and tall,
Under a *platane*. *Milton*, *P. L.*, iv. 478.

Often, where clear-stem'd *platan*s guard
The outlet, did I turn away.
Tennyson, *Arabian Nights*.

Platanista (plat-a-nis'tā), *n.* [*NL.*, < *L. platanista*, < *Gr. πλάτανος*, a fish of the Ganges, appar. this dolphin.] The typical genus of the family *Platanistidae*, containing the Gan-

Gangetic Dolphin (*Platanista gangetica*).

getic dolphin, *P. gangetica*. This is an entirely fluviatile species, having about 120 teeth, 50 vertebrae, extremely narrow jaws, no pelvic bone, rudimentary eyes, and obsolete dorsal fin. It attains a length of about 8 feet, and feeds on small fishes and crustaceans.

Platanistidae (plat-a-nis'ti-dē), *n. pl.* [*NL.*, < *Platanista* + *-idae*.] A family of delphinoid odontocete cetaceans, framed to contain the genera *Platanista*, *Iniia*, and *Pontoporia*. They

are faviatle or estuarine dolphins of warm waters, having a small or obsolete dorsal fin, broad truncate flippers, distinct flukes, external indication of a neck, free cervical vertebrae, a long mandibular symphysis, no distinct lacrimal bone, distinct tubercular and capillary articulations of the ribs, and long slender jaws with very numerous functional teeth.

Platanus (plat'-a-nus), *n.* [NL. (Tournefort, 1700), < L. *platanus*, < Gr. *πλάτανος*, the plane-tree: see *platane*, *plane*.] A genus of trees constituting the order *Platanaceae*, and consisting of 6 species, by some authors reduced to 3, natives of temperate or subtropical parts of the northern hemisphere, 2, or perhaps 3, confined to America, and 2 to the Old World; the plane-trees. They are large trees, with the light-brown bark often scaling off in broad, thin, and roundish flakes, exposing a whitish inner layer, and giving the trunk a naked or spotted appearance wholly unlike that of any other tree. They bear alternate broadly deltoid leaves, palmately nerved and lobed, the dilated leafstalk covering the leaf-bud of the year following. See *butterball*, *nyamora*, and *olmar-trees*, and cut under *plane-trees*.

Platax (plā'taks), *n.* [NL. (Cuvier, 1829), < Gr. *πλάταξ*, a fish like a perch, also called *κοπίσιος*; prob. < *πλατῆς*, flat: see *platē*.] The typical genus of *Platycidae*, remarkable for the height or depth of the body.

platband (plat'-band), *n.* [*F.* *platebande*, *platband*, *intel*, border, OF. *plattebande*, a flat band, < *plate*, fem. of *plat*, flat, + *bande*, band: see *band*.] 1. A border of flowers in a garden, or along a wall or the side of a parterre. — 2. In *arch.*: (a) Any flat rectangular molding the projection of which is much less than its width; a fascia. (b) A lintel formed with voussoirs in the manner of an arch, but with the intrados horizontal—a common and vicious modern construction, but employed even in some Roman and medieval work in places where a true arch was not convenient, and when monoliths of sufficient size were not available. See cut of *flat arch*, under *arch*. (c) The fillets between the flutes of an Ionic or a Corinthian column.

plat-blind (plat'-blind), *a.* Entirely blind. *Halwell*.

Walpole, *Anecdotes*, I. 2, note.

6. A cup or flagon or other article of gold or silver awarded to the winner in a contest, as to the owner of the winning horse or the crew of the winning boat in a race; a "cup." — 7. A beam or piece of timber laid horizontally in a wall to receive the ends of other timbers. The plate for roof-timbers, and also for joists, is called a *wall-plate*. Compare *platē*, *n.*, 1. — 8. A flat piece of metal, as brass, copper, or steel, on which any representation or inscription is engraved: as, a door-*plate*; a coffin-*plate*; especially, such a piece of metal so engraved for impression on paper, etc.: as, a book-*plate*; a card-*plate*; hence, the printed impression from an engraved plate: as, a book illustrated with *plates*. — 9. A duplicate, in one piece of metal, of the face of composed types or woodcuts. Such plates are made by electrolyte or stereotype process. Plates of book-pages are about one eighth of an inch thick; plates of newspaper-pages are much thicker.

10. (a) In *dentistry*, a piece of metal or composition fitted to the mouth and holding the teeth of a denture. (b) In *horology*, one of the two parallel pieces of metal to which the wheels are pivoted in a watch or clock. (c) The flat piece of metal forming the side of the lock of a firearm. (d) A flat piece of metal usually forming a part of the bed or bosh of a metallurgical furnace. (e) A commonly rectangular piece of glass used in photography to receive the picture. (f) In *baseball*, the home base.

From the nature of things, a ball so knocked that it cannot be caught or fielded to the *plate* before the man can make the entire circuit of the bases yields an earned, or, as it is in such instance more generally called, a "home run."

The Century, XXXVIII. 835.

(g) *Naut.*, a bar or band of iron, as in *futtock-plates*, *channel-plate*, etc.; specifically, in iron ships, the metal which forms part of the strike on the ship's side. — 11. Shale of the coal-measures. It is in these strata that the finest specimens of the coal-plants are most frequently found. Also called *binds*. — 12. Plate-glass.

Carpenter's Plates.
a, ruler-plate; b, pulley-plate; c, crown-plate; d, wall-plate.

The machine in use for polishing the glass is practically that originally designed for the purpose; it is not only used in plate-glass works, but is the machine used for polishing that description of glass which is known as "patent plate."

Glass-making, p. 168.

13. The finest quality of pewter. — 14. In *anat.*, *zool.*, and *bot.*, a plate-like part, organ, or structure; a lamina or lamella; a layer: not specific, the thing indicated being designated by a qualifying term. See cuts under *carapace*, *Coiber*, and *whalebone*. — 15†. A Spanish money of account. Also called *old plate*. Eight reals of old plate made the *peso de plate*, or piaster—that is, the Spanish dollar.

See *dovetail*. — **Dumb-plate**, the part at the bottom near the doors of a furnace where there are no air-openings or spaces; the dead-plate. — **Endochrome, gate-end, genital, gular plates**. See the qualifying words. — **Equatorial plate**, in *biol.*, the collection of chromatin-fibers in the equator of the nuclear spindle during karyokinesis. — **Gold plate**, gold vessels for use or ornament; especially, table utensils of gold. — **Half-tone plates**. See *photo-process*. — **Head-block plate**. See *head-block*. — **Horn plate**, in *embryol.*, the remaining ectoderm of a germ, forming the epidermis of the embryo after the formation from ectoderm of the rudiment of the spinal canal.

From this time the remaining portion of the skin-sensory layer is called the *horn-plate* or horn-layer, because the outer skin (epidermis) with its horny appendages—nails, hair, etc.—develops from it.

Haeckel, *Evol. of Man* (trans.), I. 306.

Induction-plate, a small insulated metal plate placed opposite one of the quadrants of an electrometer, used for reducing the sensitiveness of the instrument. For this purpose the electrified body is connected with the induction-plate instead of with the quadrant directly.

In order that somewhat larger differences may be measured, the *Induction Plate* is introduced to diminish the sensitiveness. *J. E. H. Gordon*, *Elect. and Mag.*, I. 44.

Jugular, madreporic, medullary plate. See the adjectives. — **Locking-plate**. Same as *coat-wheel*. — **Main plate**, the principal plate of a lock. — **Muscular plate**. Same as *muscle-plate*. — **Nasal, negative, occipital, ocular, orbital plate**. See the adjectives. — **Patching up plates**. See *patch*. — **Patent plate**, a name given in England to cylinder-glass. — **Perisomatic plates**. See *perisomatic*. — **Plate diamond**. See *diamond*. — **Plate of a furnace**. See *dead-plate*. — **Plate of wind**, in *organ-building*, the flat sheet or jet of air which is projected through the flue of a flue-pipe against the upper lip of the mouth, and by the fluctuations of which the tone is produced. — **Plate-welding hammer**, a steam-hammer of special form. *E. H. Knight*. — **Pterygostomial plates, radial plates**. See the adjectives. — **Ribbed plate**, sheet-metal with its surface alternately ribbed or corrugated.

Ribbed plate is made by using a roller with grooves on its surface. *Workshop Receipts*, 1st ser., p. 55.

Ship-plate, an inferior quality of wrought-iron plate.

Wrought-iron plates . . . are manufactured of . . . coarse, brittle, and uncertain material, sometimes sold as *ship-plate*. *R. Wilson*, *Steam Boilers*, p. 32.

Terminal plate, in *biol.*, the end-plate of a nerve-fiber. — **Wheel-guard plate** (*mitl*), the rub-iron of a field-artillery carriage. (See also *armor-plate*, *bottom-plate*, *floating-plate*, *horn-plate*, *sleeve-plate*, *spreading-plate*, *tie-plate*.)

plate (plāt), *v. t.*; pret. and pp. *plated*, ppr. *plating*. [*ME.* **platen*, < *AS.* **platan* in comp. *aplattan* and verbal *n.* *plating*, a plate of metal: see *plate*, *n.*] 1. To arm with plate-armor for defense.

Marshal, ask yonder knight in arms
Both who he is and why he cometh hither
Thus *plated* in habiliments of war.

Shak., *Rich.* II., l. 3. 28.

2. To overlay or coat with silver, gold, or other metal; specifically, to attach a perma-

platin (plat'in), *n.* See *platen*.

platina (pla-tē'nā), *n.* [= D. G. Sw. Dan. *platina* = F. *platine*, < Sp. *platina* = Pg. *platina* (NL. *platina*), *platina*, so called from its resemblance to silver, < *plata*, plate, silver: see *plate*.] 1. Same as *platinum*: the older name. —2. Twisted silver wire.—3. An iron plate for glazing stuff.

platinate (plat'i-nāt), *v. t.* Same as *platinize*. *Philos. Mag.*, 5th ser., XXVIII. 454.

plating (plā'ting), *n.* [Verbal *n.* of *plate*, *v.*]

1. The art or operation of covering articles with a thin coating or film of metal, especially of overlaying articles made of the baser metals with a thin coating of gold, silver, or nickel. It is effected in various ways: sometimes the plating-metal is attached to and rolled out with the other metal by pressure; sometimes the one metal is precipitated from its solution upon the other, electrochemical decomposition being now much employed for this purpose. See *electrotype*. —2. A thin coating of one metal laid upon another.

plating-hammer (plā'ting-ham'ēr), *n.* A steam-hammer of from 500 to 700 pounds weight, used for bending plates and for other operations in armor-plating vessels.

platinic (plā-tin'ik), *a.* [*Platinum* + *-ic*.] In chem., of or pertaining to platinum.

platiniferous (plat-i-nif'ē-rus), *a.* [*NL. platina* + *L. ferre* = E. *bear*.] Producing platinum: as, *platiniferous* sand.

platiniridium (plat'in-i-rid'i-um), *n.* [NL., < *platin(um)* + *iridium*.] An alloy of platinum and iridium, occurring in isometric crystals and crystalline grains together with native platinum.

platinization (plat'i-ni-zā'shon), *n.* The process of platinizing, or the condition of being platinized.

platinize (plat'i-niz), *v. t.*; pret. and pp. *platinized*, prp. *platinizing*. [*Platin(um)* + *-ize*.] To coat with platinum in a fine state of division: as, to *platinize* the negative plate (silver) of a Smee's battery. Silver is platinized by dipping it or washing it in a solution of platinum chlorid, and then heating it in a closed vessel till the salt decomposes. The negative plates of Urquhart's potassium-bichromate cell—which consist each of a copper plate having one face and its edges covered with platinum-foil soldered to the copper, and its other face covered with lead—have their platinum sides platinized by a deposit of metallic platinum, obtained by decomposition of platinum chlorid with the aid of a galvanic current, the lead being temporarily covered with an acid-proof varnish or cement. Also spelled *platinise*.—*Platinized glass*. See *glass*.

platinochlorid (plat'i-nō-klō'rid), *n.* [*Platinum* + *chlorid*.] A double chlorid containing platinum: as, potassium *platinochlorid*.—*Ethylene platinochlorid*. See *ethylene*.

platinoide (plat'i-nōid), *n.* [NL. *platinum*, *platinum*, + Gr. *ὅδος*, way (see *cathode*).] The negative or non-oxidizable plate of a voltaic cell, which often consists of a sheet of platinum, as in the Grove cell.

platinoid (plat'i-noid), *n.* [NL. *platinum* + Gr. *εἶδος*, form.] One of the metals with which platinum is invariably found associated. The platinoids are palladium, rhodium, iridium, osmium, and ruthenium.

platinotype (plat'i-nō-tip), *n.* [*Platinum* + *type*.] 1. A process of photographic printing in which the paper is coated with a solution of platinum chlorid and ferric oxalate. When exposed to the light under a negative and subsequently immersed in a hot solution of potassic oxalate, the metal is reduced in proportion to the action of the light. The picture is then finished by simply washing in slightly acidulated water. Some patented platinum processes, as that of Pizzighelli, simplify greatly the operations of development. —2. A print made by any platinotype process.

Excellent specimens of *platinotypes* were shown.

Sci. Amer., N. S., LIV. 65.

platinous (plat'i-nus), *a.* [*NL. platinum* + *-ous*.] Containing or consisting of platinum.

platinum (plat'i-num), *n.* [= F. *platine* = Sp. *plata*, < NL. *platinum* (with term. *-um* added, in analogy with other names of metals), < *platina*, < Sp. *platina*, *platina* (the orig. name): see *platina*.] Chemical symbol, Pt; atomic weight, 195.2. An important metal, introduced into Europe about the middle of the eighteenth century from South America. It does not occur as an ore, but alloyed with other metals, especially with rhodium, osmium, iridium, and palladium, all of which, together with iron, copper, and gold, are almost always present in it in small quantity in what is called its native state. Platinum is surpassed in ductility only by gold and silver, and in malleability only by those metals and copper. It is easily rolled into sheets or drawn into wire. Its specific gravity is 21.5, which is higher than that of any other known substance except osmium and

iridium. It is not oxidized in the air at any temperature, and is not attacked by any of the simple acids. It is infusible in the strongest heat of a blast-furnace, but can be melted in the flame of the oxyhydrogen blowpipe or by means of the electric current. It is a rare metal, and the regions which supply it are few. Most of the platinum of commerce comes from the Urala, South America, and Borneo. It is used chiefly in chemical manufacture and analysis, where its resistance to heat and acids is of special value, and in electrical work. It was used for coinage in Russia from 1828 to 1845.—*Platinum chlorid*. Same as *chloroplatinic acid* (which see, under *chloroplatinic*).—*Platinum luster*. See *luster*.

platinum-black (plat'i-num-blak'), *n.* A black dull powder consisting of very finely divided metallic platinum. It was first obtained by E. Davy, and considered to be a nitride of platinum; later it was recognized by Liebig as metallic, and prepared by him by warming a solution of platinum chlorid in potash with alcohol. According to Liebig, platinum-black absorbs more than 800 times its volume of oxygen. It can be prepared in a variety of ways, and is used in organic chemistry as an oxidizing agent.

platinum-lamp (plat'i-num-lamp), *n.* In elect., an electric lamp in which the incandescent filament is of platinum.

platitude (plat'i-tūd), *n.* [*F. platité*, flatness (of taste), vapidness, a flat remark, < *plat*, flat: see *plat*.] 1. Flatness; dullness; insipidity of thought; triteness.—2. A trite, dull, or stupid remark; especially, such a remark uttered as if it were a novelty; a truism.

It does not seem so easy for a preacher to trade upon his capacity of reserve, yet even in the clerical profession many have gained the reputation of profound divines and able judges in the spiritual life by a judicious management of solemn *platitudes*.

H. N. Ozonham, *Short Studies*, p. 76.

platinudinarian (plat-i-tū-di-nā'ri-an), *a.* and *n.* [*Platitude* (-*dim*-) + *-arian*.] 1. *a.* Of the nature of or characterized by platitude; given to the utterance of platitudes. —II. *n.* One who is addicted to or indulges in platitudes.

You have a respect for a political *platinudinarian* as insensible as an ox to everything he can't turn into political capital. *George Eliot*, *Daniel Deronda*, xxii.

platinudinize (plat-i-tū-di-niz), *v. t.*; pret. and pp. *platinudinized*, prp. *platinudinizing*. [*Platitude* (-*dim*-) + *-ize*, as in *attitudinize*.] To utter platitudes; make dull, stale, or insipid remarks.

platinudinous (plat-i-tū'di-nus), *a.* [*Platitude* (-*dim*-) + *-ous*.] Relating to or characterized by platitude or platitudes; stale; trite; flat; dull; insipid.

platinudinousness (plat-i-tū'di-nus-nes), *n.* The state or quality of being platinudinous; dullness; flatness; staleness; insipidity; triteness.

platty (plat'i), *adv.* [*ME. platy*; < *plat* + *-ly*.] Flatly; plainly; certainly; surely.

This synne is *platty* agayns the Hooly Goost.

Chaucer, *Parson's Tale*.

If you barnes bowe the brede of an hare,

Platty ge be putte to perpetuall pyne.

plattness, *n.* [*plat* + *-ness*.] Flatness.

Palgrave.

platode (plat'ōd), *a.* Same as *platoid*: correlated with *cestode*, *trematode*, and *nematode*.

platoid (plat'oid), *a.* [Irreg. < Gr. *πλατύς*, broad, flat, + *εἶδος*, form.] Broad or flat, as a worm.

platometer (plā-tom'e-tēr), *n.* [Irreg. < Gr. *πλατύς*, flat, + *μέτρον*, measure.] Same as *planimeter*.

platometry (plā-tom'et-ri), *n.* [*Gr. πλατύς*, breadth, + *μέτρον*, < *μέτρον*, measure.] The art of measuring the breadth of rivers. *Dee*, 1570.

Platonia (plā-tō'ni-ā), *n.* [NL. (Martius, 1829), < *Plato*, < Gr. *Πλάτων*, the Greek philosopher: see *Platonic*.] A small genus of tropical American trees, belonging to the natural order *Guttiferæ* and the tribe *Moronebæ*. It is chiefly distinguished from the other genera of the tribe by the anthers being borne above the middle of the numerous filaments into which the phalanges of stamens are divided. The genus embraces only two (perhaps only one) species, large trees with coriaceous, delicately pinnerved leaves, solitary and showy pink flowers, and five-lobed fleshy edible berries. The fruit of *P. insignis*, called *pacoury-ura* in Brazil, is said to be highly delicious, its seeds almond-flavored.

Platonic (plā-ton'ik), *a.* and *n.* [Formerly also *Platonick*, *Platonike*; = F. *Platonique* = Sp. *Platónico* = Pg. It. *Platonico*, < L. *Platonius*, < Gr. *Πλατωνικός*, of or pertaining to Plato, < *Πλάτων*, L. *Plato*, a Greek philosopher, son of Ariston, orig. named Aristocles, and surnamed *Πλάτων* with ref. to his broad shoulders, < *πλατύς*, broad: see *plat*.] 1. *a.* Pertaining to Plato (about 427–347 B. C.), or to his doctrines. Reference to the school of Plato and to his followers is more usually expressed by the adjective *Platonistic*. Plato wrote in dialogues, which are equally admirable from a literary and from a philosophical point of view. He held that the object of philosophy is beauty; that without a

deep sense of ignorance no man can philosophize; that judgments of common sense are open to doubt; that the senses may err, and at best can afford only likelihood (*eikasia*); that experience (*doxa*), built out of perceptions, though safer, does not know the reasons of phenomena; and that man is the measure of things, not in his experience of particular facts, as Protagoras would have it, but in his knowledge of reasons, which alone is ennobling. Philosophy according to Plato has three branches—dialectic, physics, and ethics. Dialectic, the art of discussion, proceeds by definition and division. Division should be by dichotomy. He holds strongly to the truth of cognition; the process of mind and the process of nature are one. Neither the Eleatic doctrine that all is One, and the Many mere illusion, nor the Heraclitan doctrine that there is only a fluid manifold without unity, is the truth; there is a mixed being (*μετὰ ὁμοιότητα*): being has an eternal and an evanescent element, and only a compound of these can be an object of science. The One in the Many is the Idea, the active force prescribing regularity (as we should say, the law of nature), which in supercelestial place subsists while individual cases arise and perish. The Ideas make up an organism, or living system (*ζῶον*). They are themselves regulated by an idea of a teleological character, the Good, or ultimate purpose of all things, identical with Reason, the true Being (*ὄντως ὄν*), the One, King of heaven and earth, which, immutable, draws all things toward itself. This Reason is God, who is related to the Ideas as a poet to the Ideals he has created and intends to embody. That other element which in the actual condition of things in this world has not yet been eliminated so as to leave pure Reason is extended quantity (*μετρίαν καὶ μέγεθος*) or body (*σῶμα*), nearly Aristotle's matter (*ὑλὴ*). This is the secondary principle (*δεύτερος*) of the universe. God, the father, implants the seed of the Good in space, the mother, and without his further intervention the Cosmos, the only begotten son of God, made in his likeness, grows up. This is a second blessed god, instinct with Reason. Plato was a political philosopher. He abhorred alike the sway of oligarchy and of democracy, and still more the outcome of the latter, the one-man power—tyranny. He believed in aristocracy supported by an iron socialism. The relations of the sexes should be so regulated as to stop all increase in the population, which should be limited to 5,040 households. Private property and family relations should be abolished. Three classes should be recognized—workmen, soldiers, and lawyers. The education of a lawyer should begin with music, gymnastic, and mathematics. In his thirtieth year (up to which age he should be seen and not heard) he is to begin the study of dialectic. His education should be completed at the age of fifty, when he is to take his share in the government. The above is an outline of the general views of Plato; many of his special opinions are celebrated. He strongly maintains the immortality and previous existence of the soul. The tie which holds body and soul together is music. Virtue is not natural, nor can it be commanded by the will, but it is the result of discipline. The cardinal virtues are wisdom (*σοφία*), courage (*ἀνδρεία*), prudence (*σωφροσύνη*), and justice (*δικαιοσύνη*). The unjust alone prosper; the perfect man would suffer on the cross. Reason resides in the head, desire in the abdomen, prophesy in the liver. Time is an image of eternity; it is produced by circular motions. Nature abhors a vacuum. Like attracts like. The constellations and the earth are living divinities. Plato was a mathematician, and is said to have invented the ancient method of analysis. His thoughts constantly show the influence of mathematical studies, and the desire to import mathematically distinct conceptions into philosophy. Aristotle, who was Plato's scholar, declared that the Platonic Ideas were numbers. Plato no doubt attributed active virtues to the Ideas of One, Two, Three, and Four.

Now the first Christians many of them were *Platonic* Philosophers. *Selden*, *Table-Talk*, p. 53.

Learn to be civil when I cease to burn.

Prior, *Ode*, st. 5.

Platonic (plā-ton'ik), *a.* [*Gr. Πλάτων*, Plato (see *def.*).] Pertaining to the Greek comic poet Plato (about 427–388 B. C.).—*Platonic meter*, in *anc. pros.*, a meter or period consisting of an iambic penthemimeres between two dactylic penthemimeres.

Platonical (plā-ton'ik-al), *a.* [*Platonic* + *-al*.] Same as *Platonic*. *Bp. Atterbury*, *Sermons*, I. xi., Pref.

Platonically (plā-ton'ik-al-i), *adv.* In a Platonic manner. *Sir H. Wotton*.

Platonise, Platoniser, *n.* See *Platonize, Platonizer*.

Platonism (plā-tō-nizm), *n.* [*Gr. Πλάτων*, Plato, + *-ism*.] 1. The doctrines, opinions, or philosophy of Plato, or of the Academic school. —2. A Platonic saying or proposition.

The striking *Platonisms* of Coleridge.

R. Chasle, *Addresses*, p. 165.

Platonist (plā'tō-nist), *n.* [*< Gr. Πλάτων, Plato, + -ist.*] One who adheres to the philosophy of Plato; a follower of Plato.

Or, self-conceited, play the humorous Platonist, which boldly dares affirm that Spirits themselves supply with bodies, to commix with frail mortality.

Drayton, Polyolbion, v. 180.

Platonistic (plā'tō-nis'tik), *a.* [*< Platonist + -ic.*] Of or pertaining to Plato or his followers, or the Platonic doctrines; characteristic of the Platonists.

Platonize (plā'tō-nīz), *v.*; *pret. and pp. Platonized, ppr. Platonizing.* [*< Gr. Πλάτων, Plato, + -ize.*] 1. *intr.* To follow the opinions or philosophy of Plato; reason like Plato; emulate Plato.

Hilbert Philo; wherein, after his usual wont, he platonizes; the same being in effect to be found in Plato's Timæus.

Hakewell, Apology, II. vi. § 2.

The imagination instinctively Platonizes, and it is the essence of poetry that it should be unconventional, that the soul of it should subordinate the outward parts.

Lowell, Study Windows, p. 402.

II. trans. To explain on the principles of the Platonic school, or to accommodate to those principles.

Also spelled *Platonise*.

Platonizer (plā'tō-nī-zēr), *n.* One who Platonizes; a Platonist. Also spelled *Platoniser*.

Philo the Jew, who was a great platonizer, calls the stars divine images, and incorruptible and immortal souls.

Dr. A. Young, Idolatrous Corruptions in Religion, I. 109.

platoon (plā-tōn'), *n.* [*< F. peloton (pron. plō-tōn'), a platoon, lit. a 'ball,' i. e. cluster, a particular use of peloton, a ball, tennis-ball, dim. of pelote, a ball, pellet: see pellet.*] 1. A small body of soldiers or musketeers, drawn out of a battalion of foot to form a hollow square to strengthen the angles of some military formation or position; or, a small body acting together, but separate from the main body.—2. A number of soldiers, as large as is convenient for drill, etc., drawn up in two ranks, usually from 15 to 25 in each rank; hence (since a company of infantry is habitually divided into two platoons), half of a company considered as a separate body.—**Platoon firing**, firing by platoons, or subdivisions of companies.

platic (plā-top'ik), *a.* Same as *platypic*.

Jow. of Anthropol. Inst., p. 156.

platte¹, *v. t.* A Middle English form of *plat¹*.

platte², *a.* A Middle English form of *plat²*.

platte³ (plat), *n.* [OF.: see *plate*.] Same as *placcate* (c).

platté (plā-tā'), *a.* [OF., *< platte, a plate: see plate*.] In *her.*, semé with plates—that is, with roundels argent.

platted (plat'ed), *a.* Same as *plaited*.

platten (plat'en), *v. t.* [*< plat² + -en.*] In *glass-manuf.*, to open out and flatten into a plate or sheet: said of a blown cylinder of glass.

The hot cylinder is first cracked on one side in a straight line longitudinally by the application of a cold iron rod; then it is laid in the flattening-oven (which has a smooth stone bottom), and kept there in a soft state till it opens out; and lastly it is smoothed out with an implement called a *flattener*. Sometimes the cylinders are cut longitudinally with a diamond, and then placed in the furnace or flattening-arch for opening and smoothing. The flattening of crown-glass is called *flashing*.

plattening (plat'en-ing), *n.* [Verbal *n.* of *platten*, *v. t.*] In *glass-manuf.*, the process of forming glass into plates or sheets. See *platten*.

platter¹ (plat'er), *n.* [*< ME. plater, platerre, appar. orig. *platet, < OF. platel, dim. of plat, a plate: see plate, and cf. plateau.*] A plate; a large shallow dish for holding eatables; especially, a flat dish in which a fowl, a joint, or the like is placed to be carved.

In the Lord of Preestre John ben many dyverse thinges, and many precious Stones so grete and so large that men maken of hem Vesselle; as *Plateres*, Disches, and Cuppes.

Congreve, tr. of Juvenal's Satires, xi.

The attendants bustled to and fro, and speedily brought in several large smoking *platters*, filled with huge pieces of beef, boiled and roasted.

Scott, Monastery, xxiv.

platter² (plat'er), *n.* [*< plat⁴ + -er.*] One who plats, braids, or interweaves.

plattling (plat'ing), *n.* [Verbal *n.* of *plat⁴*, *v.*]

1. The process of making interwoven or platted work.—2. A fabric made of fibers, bundles of fibers, or thin slips of any pliable material, such as cane or straw.

Bermuda hats are worn by our ladies; they are made of a sort of mat or (as they call it) plattling made of the palm-leaf.

Dr. Berkeley, Proposals for Better Supplying of Churches.

Plattnerite (plat'nēr-īt), *n.* [Named after K. P. Plattner (1800–58), a German chemist and

mineralogist.] Native lead dioxid (PbO₂), a rare mineral occurring in iron-black massive forms, of high specific gravity. It was originally described as found at Leadhills, Scotland, but was regarded as a doubtful species until recently identified from the lead-mines of northern Idaho.

Plattner's process. See *process*.

platty (plat'i), *a.* [*< plat² + -y.*] Having plats or bare spots, as grain-fields sometimes have. *Halliwel.* [Prov. Eng.]

plature (plā'tūr), *n.* [*< NL. Platyrus, q. v.*] A broad-tailed humming-bird of the genus *Platyrus*.

platyrus (plā-tū'rus), *a.* [Prop. **platyrus*, *< Gr. πλατύρως, broad-tailed, < πλατύς, broad, flat, + οὐρά, tail.*] Having a broad tail.

Platyrus (plā-tū'rus), *n.* [NL. (Latreille), prop. **Platyrus*, *< Gr. πλατύρως, broad-tailed: see platyrus.*] 1. A genus of venomous marine serpents of the family *Hydrophidae*, having wide and flat gastrosteges and two pairs of frontal shields.—2. A genus of broad-tailed *Trochilidae*, named by Lesson in 1829; the platyrus.

platy (plā'ti), *a.* [Also *platey*; *< plate + -y.*] Like a plate; consisting of plates.

platybasic (plat-i-bā'sik), *a.* [*< Gr. πλατύς, broad, flat, + βάσις, foot, base: see basic.*] Having the occipital bone about the foramen magnum pressed upward; having the negative angle of Daubenton more than 80°. See *craniometry*.

platybrachycephalic (plat-i-brak-i-se-fal'ik or -sef'a-lik), *a.* [*< platy(cephalic) + brachycephalic.*] Flat and broad; both platycephalic and brachycephalic: said of a skull.

platybregmete (plat-i-breg'mēt), *n.* [*< Gr. πλατύς, broad, + βρέγμα, the front part of the head: see bregma.*] A wide bregma, as seen in Mongolian skulls.

platycarpous (plat-i-kār'pus), *a.* [*< Gr. πλατύς, broad, + καρπός, fruit.*] In *bot.*, having broad fruit.

platycephalic (plat'i-se-fal'ik or -sef'a-lik), *a.* [*< platycephal-ous + -ic.*] Same as *platycephalous*.

Platycephalidae (plat'i-se-fal'i-dē), *n. pl.* [NL., *< Platycephalus + -idae.*] A family of acanthopterygian fishes, typified by the genus *Platycephalus*; the flatheads. They have an elongated body depressed in front, a wide depressed head, imbricated scales, two dorsals (the anterior shorter than the posterior), a long anal, and perfect ventrals behind the pectorals. Nearly 50 species are known as inhabitants of the tropical Pacific and Indian oceans.

Platycephalus (plat-i-sef'a-lī'nē), *n. pl.* [NL., *< Platycephalus + -inae.*] The *Platycephalidae* as a subfamily of scorpenoid fishes.

platycephalous (plat-i-sef'a-lus), *a.* [*< Gr. πλατύκεφαλος, broad-headed, < πλατύς, broad, flat (see plat²), + κεφαλή, head.*] Having the vault of the skull flattened; having a vertical index of less than 70.

Platycephalus (plat-i-sef'a-lus), *n.* [NL.: see *platycephalous*.] 1. The typical genus of *Platycephalidae*: so called from the broad depressed

head. *Bloch and Schneider, 1801.—2. [i. c.] A broad flat skull, deformed from synostosis of frontal and parietal bones.*

Platycercidae (plat-i-sēr'si-dē), *n. pl.* [NL., *< Platycercus + -idae.*] The broad-tailed parakeets as a separate family of parrots.

Platycercinae (plat'i-sēr-si'nē), *n. pl.* [NL., *< Platycercus + -inae.*] A subfamily of *Psittacidae*, typified by the genus *Platycercus*, to which varying limits have been ascribed; the broad-tailed parakeets. It is properly restricted to those parrots which have no ambians and no furculum. In a common acceptance, it contains parakeets with a short beak of greater height than length, a small cere (frequently feathered), and a long tail, usually exceeding the wings in length, and in some cases with broad feathers. All the *Platycercinae* belong to the Old World, and they are most numerous in species and individuals in the Australian region. About 70 species are described, among them the grass-, ground-, and zebra-parakeets. See *grass-parakeet, Euphonia, Melopittacus, and Platycercus*.

platycercine (plat-i-sēr'sin), *a.* Broad-tailed; belonging to the *Platycercinae*.

Platycercus (plat-i-sēr'kus), *n.* [NL. (Vigors and Horsfield, 1825), *< Gr. πλατύκερκος, broad-tailed, < πλατύς, broad, + κέρκος, tail.*] The leading genus of *Platycercinae*, containing more than half the species of this subfamily, having the tail long and ample, with its feathers broad to their ends, and the four middle ones longer than the rest. They are beautifully and variously colored, and range from the Malay archipelago to the islands of the Pacific ocean. Several are favorite cage-birds, as the rose or rose-parakeet, *P. eximius*, and the king-parakeet, *P. scapularis*. See *cut under rose*.

Platycerium (plat-i-sēr'i-um), *n.* [NL., *< Gr. πλατύς, broad, + κερών, a honeycomb, < κέρως, wax: see cere.*] A very distinct and remarkable genus of ferns, commonly associated with the *Acrosticheae*. It has been proposed to place it in a separate section, from its producing its sori in large amorphous patches, not, as in the true *Acrosticheae*, universal over the fertile portions. The species are few in number, chiefly Eastern or Australian, and for the most part tropical.

Platycerus (plā-tis'e-rus), *n.* [NL. (Geoffroy, 1762) (cf. *L. platyceros*, *< Gr. πλατύκερος, having broad horns, < Gr. πλατύς, broad, + κέρα, horn.*] A genus of stag-beetles of rather small size, chiefly characterized by the distinctness of the sixth ventral abdominal segment. The few species known are found in Asia, Europe, and North America. Four inhabit the United States, as *P. quercus*, found in oak-stumps throughout North America, 1 inch long and brownish-black.

platycnemis (plat-ik-nē'mi-ē), *n.* [NL.: see *platycnemis*.] The condition of being platycnemis; platycnemism.

platycnemism (plat-ik-nē'mizm), *n.* [*< Gr. πλατύς, broad, + κνήμη, the lower leg: see Cnemis.*] Broad and flat, as a tibia; having such tibiae, as a person.

platycnemism (plat-ik-nē'mizm), *n.* [*< platycnem-ic + -ism.*] The state of being platycnemism; breadth and flatness of the tibia.

Platycoelia (plat-i-sē'li-ē), *n.* [NL. (Dejean, 1833), *< Gr. πλατύς, flat, + κοίλος, hollow.*] A genus of lamellicorn beetles of the family *Rutelidae*, or typical of a family *Platycoelidae*. They are large and handsome South American insects, with a very convex head of a beautiful green color. Also *Platycoelia*.

platycoelian (plat-i-sē'li-ān), *a.* [*< platycoel-ous + -ian.*] Same as *platycoelous*.

Platycoelidae (plat-i-sē'li-dē), *n. pl.* [NL., *< Platycoelia + -idae.*] A family of coleopterous insects, named from the genus *Platycoelia*. *Burmeister, 1844.*

platycoelous (plat-i-sē'lus), *a.* [*< Gr. πλατύς, flat, + κοίλος, hollow.*] Plano-concave, as a vertebra; plane or flat in front and cupped behind, as the bodies of the vertebrae of the cetosaurians: now usually called *opisthocelous*.

platycoria (plat-i-kō'ri-ē), *n.* [NL., *< Gr. πλατύς, broad, + κόρη, the pupil of the eye.*] In *med.*, an undue dilatation of the pupil; mydriasis.

Platycrinidae (plat-i-krin'i-dē), *n. pl.* [NL., *< Platycrinus + -idae.*] A family of Paleozoic crinoids or ennerinites, typified by the genus *Platycrinus*.

platycrinite (plat'i-krin-īt), *n.* An ennerinite of the genus *Platycrinus* or *Platycrinites*.

platycrinoid (plat'i-krin-ōid), *n.* [*< NL. Platycrinus, q. v., + Gr. εἶδος, form.*] A platycrinite.

Platycrinoidea (plat'i-krin-ōi-dē-ē), *n. pl.* [NL., *< Platycrinus + -oidea.*] Same as *Platycrinidae*.

Platyrus fasciatus.

Platycerus quercus.
(Line shows natural size.)

Flathead (*Platycephalus tentaculatus*).

Platycrinus (plā-tik'ri-nus), *n.* [NL., < Gr. *πλατύς*, broad, flat, + *κρίνον*, lily (see *crinoid*).] The typical genus of *Platycrinidae*, from the limestone of the coal-measures: so named from the flatness and breadth of the radial plates on the receptacle. Originally *Platycrinites*.

platydactyl, **platydactyle** (plat-i-dak'til), *a.* and *n.* [NL., *platydactylus*, < Gr. *πλατύς*, broad, + *δάκτυλος*, finger.] *I. a.* Having broad or thick digits; specifically, in *herpet.*, having toes dilated at the ends; discodactyl; belonging to the *Discodactyla*: distinguished from *Oxydactyl*.

II. n. A platydactyl batrachian.

Platydactyla (plat-i-dak'ti-lā), *n. pl.* [NL., neut. pl. of *platydactylus*: see *platydactyl*.] In Günther's classification, a group of opisthoglossate batrachians, having the toes dilated: distinguished from *Oxydactyla*. Also called *Discodactyla*.

Platydactylus (plat-i-dak'ti-lus), *n.* [NL. (Cuvier, 1817): see *platydactylus*.] *1.* A genus of gecko lizards. *P. fascicularis* or *muralis* is the wall-gecko. *P. mauritanicus*, of the countries bordering the Mediterranean, is known as the *tarente*. *2.* In *entom.*, a genus of orthopterous insects. Brullé, 1835.

platydolichocephalic (plat-i-dol'i-kō-sē-fal'ik or -sēf'ā-lik), *a.* [NL., < *platycephalic* + *dolichocephalic*.] Flat and narrow; both *platycephalic* and *dolichocephalic*: said of a skull.

Platyelmia (plat-i-el'mi-ā), *n. pl.* [NL., < Gr. *πλατύς*, flat, + *ἐλμύνς* (*ēlmyns*), worm.] Same as *Platyhelmintha*.

Platygaster (plat-i-gas'tēr), *n.* [NL. (Latreille, 1809) (cf. Gr. *πλατύς*, broad, flat, + *γαστήρ*, stomach: see *gaster*).] *1.* A genus of parasitic hymenopterous

Platygaster herricki. (Cross shows natural size.)

insects of the family *Proctotrypidæ*, typical of the subfamily *Platygastrinæ*. It is separated from other genera by negative characters, and contains a large number of species, more than 100 being known in Europe alone. *P. herricki* is a common parasite of the Hessian fly in North America.

2. A genus of true bugs of the family *Lygaeidae*, erected by Schilling in 1829.—*3.* A genus of fishes erected by Swainson in 1839.—*4.* A genus of flies of the family *Acroceridae*, erected by Zetterstedt in 1840: same as *Sphaerogaster*.

Platygastrinæ (plat-i-gas'te-ri-nē), *n. pl.* [NL., < *Platygaster* + *-inæ*.] An important subfamily of the parasitic hymenopterous family *Proctotrypidæ*, consisting of minute black insects having the fore tibiae one-spurred, the mandibles toothed, and the anterior wings without marginal and stigmal veins. Over 20 genera have been founded, though the group has been little studied. The species seem to be mainly parasitic on dipterous larvae.

platygastic (plat-i-gas'trik), *a.* [NL., < Gr. *πλατύς*, broad, + *γαστήρ*, stomach: see *gastic*.] Having broad or wide gastric cavities: belonging to the *Platygastrinæ*.

platyglossal (plat-i-glos'al), *a.* [NL., < Gr. *πλατύς*, broad, + *γλῶσσα*, tongue.] Having a broad or wide tongue.

Platyglossus (plat-i-glos'us), *n.* [NL. (Bleeker, 1861, after Klein), < Gr. *πλατύς*, broad,

tongued: see *platyglossal*.] A genus of labroid fishes of the wrasse family. They have the teeth of the jaws distinct, the pharyngeal teeth not confluent, the posterior canines well developed, 3 anal spines, 9 dorsal spines, and the cheeks and opercles naked or nearly so. They are known as *doncellas*. *P. radiatus*, 16 inches long, inhabits West Indian and Floridian waters. *P. semicinctus* is a kelp-fish of the Pacific coast of North America.

platygonidium (plat'i-gō-nid'i-um), *n.*; *pl. platygonidia* (-ā). [NL., < Gr. *πλατύς*, broad, flat, + *NL. gonidium*.] See *gonidium*, 3.

Platygonus (plā-tig'ō-nus), *n.* [NL., < Gr. *πλατύς*, broad, flat, + *γόνυ*, knee.] A genus of fossil peccaries of the family *Dicotylidæ*, founded by Le Conte in 1848 upon remains of the late Tertiary of America. Also called *Hyops*, *Protochærus*, and *Euchærus*.

platyhelminth (plat-i-hel'minth), *n.* [NL., < Gr. *πλατύς*, broad, flat, + *ἑλμύνς* (*ēlmyns*), worm: see *helminth*.] A member of the *Platyhelmintha*, in any sense; a flatworm, as a cestoid, trematoid, turbellarian, or nemertean.

Platyhelmintha, **Platyhelminthes** (plat'i-hel-min'thā, -thēz), *n. pl.* [NL., < Gr. *πλατύς*, broad, flat, + *ἑλμύνς* (*ēlmyns*), worm: see *helminth*.] A superordinal or other high group of worms, variously named and rated, including forms more or less flattened, usually ovate, and indistinctly segmented; the flatworms, or cestoids, trematoids, and turbellarians, together contrasted with the roundworms or nemathelminths. In some of the older arrangements, under the name *Platyelmia*, they were divided into the non-parasitic order *Turbellaria* and the two parasitic orders *Trematoda* and *Cestoda*. In another classification the platyhelminths are a prime division of *Vermes*, divided into *Turbellaria* (rhabdocelous and dendrocelous turbellarians), *Nemertina* (rhyncocelous turbellarians), *Trematoda*, and *Cestoda*. In Lankester's latest arrangement they are called *Platyhelminthes*, and are divided into two branches, *Ciliata* and *Cotylophora*. The former is the order *Turbellaria* in a broad sense, here divided into three classes, *Rhabdocela*, *Dendrocela*, and *Nemertina* (or *Rhyncocela*). The *Cotylophora* are divided into three classes, *Trematodea*, *Cestodea*, and *Hirudinea*, the two former of these, each with numerous orders, corresponding in a general way with the families of other authors. The *Mesozoa* of Van Beneden (see *Dicymenida*) are regarded as probably classable with the *Ciliata*. This arrangement is peculiar in bringing the leeches and *Dicymenida* under this head. Otherwise it resembles its predecessors. The many arrangements of the flatworms differ more in nomenclature and taxonomic rating than in actual significance. Also *Platyhelmintha*, *Platyhelminthes*.

Platylobium (plat-i-lō'bi-um), *n.* [NL. (Smith, 1794), < Gr. *πλατύς*, broad, + *λόβιον*, dim. of *λόβος*, pod.] A genus of leguminous shrubs of the tribe *Genisteæ* and subtribe *Bossieæ*, characterized by the two-lipped calyx, orbicular banner-petal, monadelphous stamens, uniform versatile anthers, and broad flat two-valved pod, opening elastically along the lower suture, broadly winged upon the other. The 3 species are Australian shrubs, with slender branches, opposite undivided leaves, and handsome orange-yellow flowers solitary in the axils, occasionally red, resembling the sweet-pea. They are pendent-branching evergreens, cultivated under the name *flat pea*.

Platylophus (plā-til'ō-fus), *n.* [NL., < Gr. *πλατύς*, flat, broad, + *λόφος*, a crest.] *1.* A genus of birds of the family *Corvidæ* and subfamily *Garruline*, containing several species of crested jays from Java, Sumatra, Borneo, etc., such as *P. galericulatus*, *P. coronatus*, and others. Swainson, 1831.—*2.* A genus of arachnidans. Koch, 1839.—*3.* A genus of polypetalous plants of the order *Saxifragæ* and the tribe *Cunoniæ*, characterized by the two-celled, two-seeded, and two-valved capsules, the two awl-shaped recurved styles, four or five calyx-lobes, as many smaller petals, and eight or ten stamens, of the length of the petals, and inserted with them on the base of an urn-shaped disk. D. Don, 1830. The only species, *P. trifoliatus*, the white alder or white ash of Cape Colony, is a very smooth and handsome tree, casting abundant shade, and bearing multitudes of small white flowers in long-stalked axillary panicles, followed by small white capsules. The coriaceous opposite and stalked leaves are each composed of three toothed and velvety lanceolate leaflets. See *alder*, 2.

platymesaticephalic (plat-i-mes'a-ti-sē-fal'ik or -sēf'ā-lik), *a.* [NL., < *platycephalic* + *mesaticephalic*.] Both *platycephalic* and *mesaticephalic*: said of a skull. Also *platymesaticephalic*.

platymeter (plā-tim'e-ter), *n.* [NL., < Gr. *πλατύς*, flat, + *μέτρον*, measure.] An apparatus for measuring the inductive capacity of dielectrics. It consists essentially of two cylindrical shaped condensers of equal size, having their inner coatings connected.

Platymiscium (plat-i-mis'i-um), *n.* [NL. (Vogel, 1837), so called with ref. to the compressed stalk of the pod; < Gr. *πλατύς*, flat, + *μίσκος*, for *μίσχος*, a stalk, also, in form *μίσκος*, husk or shell.] A genus of leguminous trees and shrubs, of the tribe *Dalbergiæ* and the sub-

tribe *Lonchocarpeæ*, characterized by the free wing-petals, the opposite leaves and leaflets, and the indehiscent one-seeded long-stalked pod, which is thin, flat, and oblong. In its opposite or whorled leaves it is almost alone in this large order. The 13 species are natives of tropical America. They bear yellow flowers in racemes on the branches. *P. platyachyum* is called *roble* in the West Indies.

Platynota (plat-i-nō'tā), *n. pl.* [NL.: see *platynote*.] A group of existing *Lacertilia*, with a columella and an orbital septum, procelous vertebræ, not more than nine cervical vertebræ, and the nasal bone single. It embraces the monitors or varanoids of the Old World, with the American genus *Heloderma*. See *monitor*, *Heloderma*.

platynotal (plat-i-nō'tal), *a.* [NL., < *platynote* + *-al*.] Broad-backed, as a lizard; specifically, of or pertaining to the *Platynota*.

platynote (plat'i-nōt), *a.* and *n.* [NL., < Gr. *πλατύς*, broad, flat, + *νότος*, back.] *I. a.* Broad-backed, as a lizard: applied to the varans or monitors.

II. n. A monitor or varanoid lizard.

Platynotus (plat-i-nō'tus), *n.* [NL.: see *platynote*.] In *zool.*, a generic name variously used.

(a) By Fabricius, 1801, for a genus of coleopterous insects. (b) By Schilling, 1829, for a genus of hemipterous insects. (c) By Wagner, 1830, for a genus of reptiles, whence the name *Platynota*. (d) By Haan, 1835, for a genus of crustaceans.

Platynus (plat'i-nus), *n.* [NL., irreg. < Gr. *πλατύς*, widen, make wide, < *πλατύνω*, wide, broad: see *platē*.] A genus of caraboid beetles. *P. maculicollis* is at times so abundant in California as to be a nuisance. It is popularly called the *overtflobug*.

Platynus maculicollis, enlarged.

platyodont (plat'i-ō-dont), *a.* and *n.* [NL., < Gr. *πλατύς*, broad, + *ὀδόντις* (*ōdōnti*) = *E. tooth*.] *I. a.* Having broad teeth.

II. n. A broad-toothed animal.

Platonychus (plat-i-on'i-kus), *n.* [NL., < Gr. *πλατύς*, broad, flat, + *ὄνυξ* (*ōnyx*), claw.] A genus of

Lady-crab (*Platonychus ocellatus*).

crabs of the family *Portunidae*. *P. ocellatus* is a beautiful species known as the *lady-crab*. Incorrectly written *Platonychus*.

platyope (plat'i-ōp), *n.* [NL., < Gr. *πλατύς*, broad, + *ὄψ* (*ōps*), face.] A broad-faced animal, person, or skull.

platyopic (plat-i-op'ik), *a.* [NL., < *platyope* + *-ic*.] Broad-faced; wide across the eyes: applied to skulls or persons whose nasomalar index is below 107.5, as in the Mongolian races generally. Also *platyopic*.

platypetalous (plat-i-pet'a-lus), *a.* [NL., < Gr. *πλατύς*, broad, + *πέταλον*, a leaf (in mod. bot. a petal).] In *bot.*, having very broad petals. [Rare.]

Platypeza (plat-i-pē'zā), *n.* [NL. (Meigen, 1804), < Gr. *πλατύς*, broad, flat, + *πέζα*, foot.] The typical genus of *Platypezidae*, having the four basal joints of the posterior tarsi broad and flattened, whence the name. They are small velvety-black or gray flies, whose larvae live in fungi. Fifteen European and five North American species are known. *P. cinquatus* of the District of Columbia is an example.

Platypezidae (plat-i-pezi'i-dē), *n. pl.* [NL. (Fallén, 1817), < *Platypeza* + *-idae*.] A family of dipterous brachycerous dipterous insects, typified by the genus *Platypeza*. They are of minute size, and resemble the *Dolichopodidae*, but the body is depressed and the head hemispherical, almost entirely occupied by the eyes; the legs are short and spineless, and the hind tarsi are often dilated. The antennæ are porrect and three-jointed; the bare eyes are contiguous in the male; the abdomen is short, and pulvilli are present. The genera are four in number.

platyphylline (plat-i-fil'in), *a.* [NL., < *platyphyllous* + *-ine*.] In *bot.*, broad-leaved; flat.

Thallus sub-membranaceous, stellate, appressed, *platyphylinae*. E. Tuckerman, N. A. Lichens, 1. 74.

platyphylous (plat-i-fil'us), *a.* [*Gr.* *πλατύφυλος*, broad-leaved, < *πλατύς*, flat, + *φύλλον*, leaf.] In *bot.*, having broad leaves.

platypod (plat'i-pod), *a.* and *n.* [*NL.* *platypus* (*-pod*), < *Gr.* *πλατύπους*, broad-footed, < *πλατύς*, broad, + *πούς* (*-pod*) = *E. foot*.] 1. *a.* 1. Having broad feet, in any sense; belonging to the *Platypoda*.—2. In *ornith.*, having the toes extensively coherent, forming a broad sole; syndactyl.

II. n. A broad-footed animal.

Platypoda (plā-tip'ō-dā), *n. pl.* [*NL.*: see *platypod*.] 1. In *mammal.*, a group of monotremes, named from the genus *Platypus*. See *Ornithorhynchidae*, and cut under *duckbill*.—2. In *conch.*, a group of rostriferous gastropods with broad flat foot fitted for crawling. It includes most of the rostriferous gastropods, among the best-known of them being the *Cypræidae*, *Littorinidae*, *Melaniidae*, *Cerithiidae*, and *Viviparidae*. J. E. Gray. See cuts under *Cerithium*, *Cypræa*, *Littorinidae*, and *Viviparidae*.

platypod (plat'i-pōd), *a.* and *n.* Same as *platypod*.

Platysyllidae (plat-ip-sil'i-dē), *n. pl.* [*NL.* (Le Conte, 1872), < *Platysyllus* + *-idae*.] A family of clavicorn *Coleoptera*, typified by the genus *Platysyllus*. They have the dorsal segments of the abdomen partly membranous, ventral segments free; the tarsi five-jointed (at least one pair of tarsi); the mentum large, and prolonged in three obtuse lobes behind; and the palpi distant at base. The family is certainly coleopterous, and its true position seems to be between the *Hydrophilidae* and the *Staphylinidae*; but the form is degraded by parasitism to the semblance of a mallophagous insect.

Platysyllus (plat-ip-sil'us), *n.* [*NL.* (Ritsemā, 1869), < *Gr.* *πλατύς*, broad, flat, + *ψύλλα*, a flea.] A remarkable genus of insects, type of the family *Platysyllidae*, referred by some to the order *Aphaniptera*, by others to the *Diptera*, by Westwood made type of an order *Achreioptera*, by Le Conte placed in the order *Coleoptera* among the clavicorns. *P. castoris*, a parasite of the beaver, is a small eyeless and wingless beetle with short elytra leaving five abdominal segments exposed. Also called *Platysylla*.

Platyptera (plā-tip'te-rā), *n.* [*NL.*, < *Gr.* *πλατύς*, broad, + *πτερόν*, wing, = *E. feather*.] A genus of fishes, typical of the family *Platypteridae*. The only known species, *P. aepyo*, is an inhabitant of fresh water in islands of the Sunda-Moluccan archipelago.

Platypteridae (plat-ip-ter'i-dē), *n. pl.* [*NL.*, < *Platyptera* + *-idae*.] A family of acanthopterygian fishes, represented by the genus *Platyptera*. They are related to the *Gobiidae*, and by many referred to that family, but differ from it by having the ventrals widely separate from each other, and from the *Callionymidae* by the scaly body, unarmed preoperculum, and moderately wide gill-openings.

Platypterna (plat-ip-ter'nā), *n.* [*NL.* (Hitchcock, 1848), < *Gr.* *πλατύς*, broad, flat, + *πτερόν*, the heel.] A genus of gigantic animals, formerly supposed to be birds, now believed to be dinosaurian reptiles, known by their footprints in the Triassic formation of the Connecticut valley.

Platypterygidae (plā-tip-te-rij'i-dē), *n. pl.* [*NL.*, < *Platypteryx* (*-pteryg*) + *-idae*.] A family of bombycid moths, typified by the genus *Platypteryx*. The antennae of the male are pectinate, those of the female generally filiform; the abdomen is slender, and the wings are small but comparatively broad, and sometimes hooked at the tip; the larvæ have 14 legs.

Platypteryx (plā-tip'te-riks), *n.* [*NL.*, < *Gr.* *πλατύς*, broad, flat, + *πτερόν*, wing.] In *entom.*, the typical genus of *Platypterygidae*. The species are known as *hook-tip moths*.

Platypus (plat'i-pus), *n.* [*NL.*, < *Gr.* *πλατύπους*, broad-footed, < *πλατύς*, broad, + *πούς* (*-pod*), = *E. foot*.] 1. In *entom.*, a genus of xylophagous beetles of the family *Scolytidae*: synonymous in part with *Bostrychus*. Herbst, 1793.—2. In *mammal.*: (a) A genus of monotremes, now called *Ornithorhynchus*. Shaw, 1799. (b) [*l. c.*] The species of this genus; the duck-billed platypus. See cut under *duckbill*.—3. In *ornith.*, a genus of sea-ducks of the family *Anatidae* and the subfamily *Fuligulinae*: synonymous with *Fulix*. Brehm, 1831.

Platypygous (plat-i-pi'gus), *a.* [*Gr.* *πλατύς*, broad-bottomed, < *πλατύς*, broad, + *πυγή*, rump, buttocks.] Having broad buttocks.

platyrhine, Platyrhini, etc. See *platyrrhine, etc.*

Platyrhynchi (plat-i-ring'ki), *n. pl.* [*NL.*, *pl.* of *Platyrhynchus*, *q. v.*] In Merrem's classification of birds (1813), a group equivalent to the *Steganopodes* or *Totipalmati* of authors, containing such genera as *Pelecanus*, *Phaëton*, and *Ploceus*, or the pelicans, gannets, cormorants, aningas, tropic-birds, etc.

platyrhynchine (plat-i-ring'kin), *a.* [*Gr.* *πλατύρυνχος* + *-inē*.] Broad-billed, as a bird.

Platyrhynchus (plat-i-ring'kus), *n.* [*NL.* (Desmarest, 1805), prop. **Platyrrhynchus*, < *Gr.* *πλατύρυνχος*, broad-snouted, broad-beaked, < *πλατύς*, broad, + *ρύγχος*, snout, beak.] 1. In *ornith.*: (a) A genus of American tyrant-flycatchers, belonging to the family *Tyrannidae*, and typical of the subfamily *Platyrhynchinae*, having a very broad flat bill with long vibrissæ, whence the name. There are several species, of South and Central America, as *P. mystaceus*. *Megarhynchus* is a synonym. (b) Same as *Eurylæmus*. Vieillot, 1825.—2. In *entom.*, a genus of coleopterous insects. Thunberg, 1815.—3. In *herpet.*, a genus of batrachians. Also *Platyrhynchus*. Duméril, 1854.

Head of *Platyrhynchus mystaceus*, top and side views, natural size.

platyrrhine, platyrhine (plat'i-rin), *a.* and *n.* [*Gr.* *πλατύρρινος* (*-ρινος*), broad-nosed, < *πλατύς*, broad, + *ῥίς* (*-ρινος*), nose.] 1. *a.* 1. Broad-nosed, as any American monkey; belonging to the *Platyrhini*.—2. In *craniom.*, having a flat nose; having a nasal index of from 51.1 (Frankfort agreement) or 53 (Broca) to 58.

II. n. A platyrrhine monkey.

Platyrhini, Platyrhini (plat-i-rī'ni), *n. pl.* [*NL.*: see *platyrrhine*.] A division of *Quadrumanina*, contrasted with *Cutarrhini* and *Strepsirrhini*, including all the American or New World members of the order *Primates* and families *Cebidae* and *Hapalidae* or *Mididae*; the platyrrhine monkeys. There is no bony external auditory meatus, the tympanic bone being annular; the premaxillæ are three above and below on each side; the nasal septum is usually broad and flat, and the nostrils are proportionately far apart, presenting forward or laterally and not downward; the thumb, when present, is scarcely or not appposable; there are no cheek-pouches nor ischial callosities; and the tail is generally long and prehensile or bushy. Also written *Platyrhina*, *Platyrhine*, and in all forms with single or double *r*. See cuts under *Cebinae* and *Hapalidae*.

platyrhinnian (plat-i-rin'i-an), *a.* and *n.* [*Gr.* *πλατύρρινος* + *-ian*.] 1. *a.* 1. In *zool.*, platyrrhine, as a monkey.—2. In *anthropol.*, having broad flat nasal bones, as a person, a people, or a skull.

II. n. A platyrrhinnian animal, person, or skull.

platyrrhiny, platyrhiny (plat'i-rī-ni), *n.* [*Gr.* *πλατύρρινος* (*-ρινος*), broad-nosed: see *platyrrhine*.] The condition of having a platyrrhine skull.

Platyschistæ (plat-i-skis'tē), *n. pl.* [*NL.*, < *Gr.* *πλατύσχιστος*, with broad clefts, < *πλατύς*, broad, + *σχιστός*, cloven, parted, divided, < *σχίζω*, split, part.] In Günther's classification, the first subfamily of *Muraenidae*, with the branchial openings in the pharynx in the form of wide slits, including all the true apodal fishes excepting the typical *Muraenidae*.

platyscopic (plat-i-skop'ik), *a.* [*Gr.* *πλατύς*, broad, flat, + *σκοπεῖν*, view.] In *optics*, having a wide and flat field of view: used as a trade-name for certain achromatic combinations of lenses, as for photographic use, or for hand-magnifiers.

platysma (plā-tis'mā), *n.*; *pl.* *platysmata* (*-mā-tā*). [*NL.*, < *Gr.* *πλάσμα*, a flat piece or plate, < *πλατύνειν*, broaden, extend, < *πλατύς*, broad, flat: see *plat*.] A thin broad muscle situated immediately beneath the skin at the side of the neck, and extending from the chest and shoulder to the face. It represents the panniculus carnosus of many mammals, which produces the movements of the

skin, as in the horse.—*Platysma myoidea*. Same as *platysma*. See *panniculus*, and cut 3, A, under *muscle*.

Platysomata (plat-i-sō'mā-tā), *n. pl.* [*NL.*, < *Gr.* *πλατύς*, broad, + *σῶμα* (*σώμα-*), body.] In Latreille's system of classification, the third family of tetramerous *Coleoptera*, corresponding to the genus *Cucujus* of Fabricius, and to the modern family *Cucujidae*, which, however, is now differently located, among the clavicorn pentamerous coleopters.

platysome (plat'i-sōm), *n.* An insect of the group *Platysomata*.

Platysomidae (plat-i-som'i-dē), *n. pl.* [*NL.*, < *Platysomus* + *-idae*.] A family of fossil lepidosteoid ganoid fishes, represented by the genus *Platysomus*. The body is generally high, covered with rhombogonoid scales arranged in dorsal ventral rows; the notochord is persistent, but vertebral arches are developed; the vertebral column is heterocercal; the fins have fulcra; the dorsal fin is long, occupying the posterior half of the back; the branchiostegals are numerous; and the teeth are tubercular or obtuse. All these fishes are extinct.

Platysomus (plat-i-sō'mus), *n.* [*NL.*, < *Gr.* *πλατύσωμος*, with a broad body, < *Gr.* *πλατύς*, broad, + *σῶμα*, body.] A genus of fossil ganoid fishes, typical of the family *Platysomidae*. Agassiz, 1833.

Platystemon (plat-i-stē'mon), *n.* [*NL.* (Benthām, 1831), so called in allusion to the dilated filaments; < *Gr.* *πλατύς*, broad, + *στήμων*, warp (stamen).] A genus of polypetalous plants of the order *Papaveraceæ* and tribe *Romneyæ*, characterized by its three sepals, six petals, many broad flat stamens, numerous coalescent carpels distinct at maturity, and separate linear stigmas. The only species, *P. Californicus*, common on the lower hills of California and Arizona, is a hairy spreading annual, with yellow long-stalked flowers, and narrow entire leaves, alternate or whorled in threes, blooming profusely in dense dwarf tufts in early spring, and known as *cream-cups*.

Platysternæ (plat-i-stēr'nē), *n. pl.* [*NL.*, < *Gr.* *πλατύστερνος*, broad-breasted: see *platysternal*.] An order of birds in Nitzsch's classification of 1840. plet, *n.* A Middle English form of *plea*.

plea (plē), *n.* [*< ME. plee, ple, play, plait, < OF. plait, plaid, plat, play, plet, plez, F. plaid = Pr. plait, plag = Sp. pleito = Pg. pleito, preto = It. piato, < ML. placitum (also contr. placitum, placdum, and, after Rom., plaitum), a decree, sentence, suit, plea, etc., L. an opinion, determination, prescription, order, lit. 'that which is pleasing,' 'pleasure,' neut. of placitus, pp. of placere, please: see please, and cf. placit*

Hence *plead*, *v.*] 1. In law: (a) A suit or action; the presentation of a cause of action to the court. Pleas were formerly distinguished as *pleas of the crown*, or public prosecutions, usually in criminal cases, and *common pleas*, or suits between subjects or commoners in civil controversies, whence this name was given to a court for such actions, the original of which was held in an outer court of the Tower of London, while the King's Bench was held in an inner court. *Davis*, Law in Shak. (b) In a general sense, that which is urged by or on behalf of a litigant, in support of his claim or defense; the contention of either party. (c) Specifically, in modern practice: (1) At common law, a document (or in some inferior courts an oral statement) on the defendant's part, denying the allegations of the plaintiff's declaration, or alleging new matter (that is, matter not shown by the plaintiff's pleading) as cause why the action should not be maintained. (2) In equity, a document alleging new matter as a cause why the defendant should not be required to answer the complainant's bill. (d) In Scots law, a short and concise note of the grounds on which the action or defense is to be maintained, without argument.—2. That which is alleged in support, justification, or defense; an urgent argument; a reason; a pleading; an excuse; an apology: as, a *plea* for the reduction of taxation; a *plea* for rationalism.

And thus I leave it as a declared truth that neither the fears of sects, nor rebellion, can be a fit *plea* to stay reformation. *Milton*, Church-Government, l. 7.

Hast thou no other *plea* for thy self but that thy sins were fatal? *Stillingfleet*, Sermons, l. 11.

Nor is it possible to urge in defense of this act of James those *pleas* by which many arbitrary acts of the Stuarts have been vindicated or excused. *Macaulay*, Hist. Eng., vii.

The Spaniards subdued the Indians under *plea* of converting them to Christianity. *H. Spencer*, Social Statics, p. 178.

The invasion of private property under the doctrinaire's *plea* of the general good. *N. A. Rev.*, CXLIII 296.

4. Proposition; proposal.

And yet shall I make to yow a feire *plea*: com with me to Bredigan, where the kynge Arthur me abideth, and do hym homage, as the barouns seyen that yow owe for to do, and I shall yelde yow the castell all quyte. *Merrin* (E. E. T. S.), II. 365.

5. A dispute or controversy; a quarrel.

Make a *plee* betwix glotony and thy purse. Neverytheless be ware to which of these two thou be advocata, or what sentences thou geue betwix them, for glotony hath effectuale wytnes. *Political Poems*, etc. (ed. Furnivall), p. 30.

And wow but they were lovers dear,
And loved fu' constanly;
But aye the maid when they tell out,
The salter was their *plea*.

Young Benjie (Child's Ballads, II. 300).

Court of Common Pleas. See *court*.—**Declinatory, dilatory, equitable plea.** See the adjectives.—**Double plea, in law**, a plea in which the defendant alleges two different matters in bar of the action.—**Foreign plea.** (a) In *old Eng. law*, a plea in either a civil or a criminal case that the matter arose or the prisoner was taken in another county than that where it is sought to try him, and therefore that the court or judge of the latter place has no jurisdiction of the case. It was one kind of plea to the jurisdiction, but distinguished from other kinds by the fact that it resulted in removing the cause. (b) Another litigation elsewhere, on the same subject, and between the same parties, or between the creditor and a third party sought to be held for the same debt. When used in this sense it is commonly in reference to the question whether arrest in one action is a satisfaction or bar to the other.—**Issuable, non-issuable, etc., plea.** See the adjectives.—**Plea in abatement, plea in avoidance, plea in bar, etc.** See *abatement*, etc.—**Plea of auterfois acquit, of auterfois attaind, of auterfois convict, plea in criminal cases**, that the accused has been already acquitted, attained, or convicted, as the case may be, on a former trial for the same offense, the object of which is to invoke the protection of the rule in law that a man cannot be twice put in jeopardy for the same cause.—**Plea of non-claim.** See *non-claim*.—**Plea of panel, in Scotland**, the plea of guilt or of not guilty.—**Plea of parole demurrer.** Same as *age-prayer*.—**Plea of pregnancy.** See *pregnancy*.—**Pleas of the crown**, public prosecution in criminal cases; hence, the body of English criminal law.—**Plea to the jurisdiction.** See *jurisdiction*.—**Special plea**, a plea which admits the truth of the declaration, but alleges special or new matter in avoidance.—**Syn. 1. Argument, Plea.** See *argument*.—**2. Excuse.** See *apology*.

pleach (plēch), *v. t.* [*ME. plechen*, < *OF. plecher, plessier, plessier*, also *plaisier, plassier*, *plash*, *plait*: see *plash*², of which *pleach* is a doublet.] 1. To unite (the branches of shrubs, vines, etc.) by plaiting, weaving, or braiding together; *plash*; *mingle*.

Bende as a bowe, or vyne that men *pleche*,
And cleme it, mose it, bynde it softe aboute.

Palladius, Husbandrie (E. E. T. S.), p. 76.

Round thee blow, self-*pleached* deep,
Bramble roses, faint and pale,
And long purples of the dale.

Tennyson, A Dirge.

Seeing I have sworn by the pale pleasures' band
And popped hair of gold Persophone,
Sad-tressed and *pleached* low down about her brow.

A. C. Swinburne, At Eleusis.

2. To form by intermingling or interweaving.
The prince and Count Claudio, walking in a thick-
pleached alley in mine orchard, were thus much over-
heard. *Shak.*, Much Ado, I. 2. 10.

Plundered vines, teeming exhaustless, *pleach'd*
New growth. *Keats*, Endymion, III.

3. To fold, as the arms.

Wouldst thou be window'd in great Rome and see
Thy master thus with *pleach'd* arms, bending down
His corrugible neck, his face subdued
To penetrative shame? *Shak.*, A. and C., IV. 14. 73.

[Obsolete or archaic in all uses.]

pleacher (plē'chēr), *n.* One who pleaches.

The topiarius, or *pleacher*, was kept actively at work
trimming the hedges and trellis walks.

Portfolio, No. 240, p. 231.

plead (plēd), *v.*; pret. and pp. *pleaded*, rarely *pled*, *plead* (pled), pr. *pleading*. [*ME. pleden, pleten, plaidien* (1), < *OF. plaider, pleidier*, *F. plaider* (> *G. plädren*) = *Pr. plaidejar, plaidiari, playejari, plaegar* = *Sp. pleitear* = *Pg. pleitear* = *It. piattegiare, piative*, *plead*, offer a plea, < *plait*, a plea: see *plea*.] **I. intrans.** 1. In law, to present an answer to the declaration or complaint of a plaintiff, or the charge of a prosecutor; deny the plaintiff's declaration or complaint, or allege facts relied on as showing that he ought not to recover in the suit. The plaintiff is said to *declare, complain, or allege*; the defendant *pleads* to his complaint or declaration. The crown or the state prosecutes an offender, and the offender *pleads* guilty or not guilty, confessing or denying the charge.

Be ye noight wae how false Polyphete
Is now aboute eftsones for to *plete*
And brynge on yow advocacs newe?

Chaucer, Troilus, II. 1468.

2. To urge a plea, an argument, or an excuse for or against a claim, or in support, justification, extenuation, etc.; endeavor to persuade by argument or supplication; urge reasons or use argument: as, to *plead* with a judge for a criminal or in his favor; to *plead* with a wrongdoer, urging him to reform.

A! lorde, a-yeenst the wee woie nat *plette*,
For as thou wouldst hit, hit is, and was.

And *pleads* for help its parent cannot give.

O. W. Holmes, Ded. of Pittsfield Cemetery.

3. To sue; make application; enter a plea or an argument.

If a Woman can prove her Husband to have been thrice drunk, by the ancient Laws of Spain she may *plead* for a Divorce from him. *Hovell*, Letters, II. 54.

4. To argue or prosecute causes; contend.

Whan shal your cursed *pletynge* have an ende?
Chaucer, Parliament of Fowls, l. 495.

There do the Advocates and Civilians *pleade*, and discuss matters of controversy. *Coryat*, Crudities, I. 31.

II. trans. 1. To discuss, defend, and attempt to maintain by arguments or reasons offered to the person or tribunal that has the power of determining; argue: as, to *plead* a cause before a court or jury.—2. To urge or allege in extenuation, justification, or defense; adduce in proof, support, or vindication: as, to *plead* poverty as an excuse for stealing.

What *plead* you to your father's accusation?
Beau. and Fl., Laws of Candy, v. 1.

But who are we to make complaint,
Or dare to *plead*, in times like these,
The weakness of our love of ease?

Whittier, Thy Will be Done.

3. To set forth in a plea or defense; interpose a plea of: as, to *plead* a statute of limitations. I . . . humbly crave pardon at adventure, having nothing that I can think of to *plead*.

N. Ward, Simple Cobler, p. 91.

The punishment for this, by *pleading* benefit of clergy, which of course was always done, was reduced to a very minimum—something amounting to the supposed burning of the hand with a barely warm or cold iron.

Ashton, Social Life in Reign of Queen Anne, II. 195.

pleadable (plē'da-bl), *a.* [*plead* + *-able*.] Capable of being pleaded; capable of being alleged in proof, defense, or vindication: as, a right or privilege *pleadable* at law.

Nor bargain or sale that he [an excommunicate] maketh is available in law, neither anle of his acts whatsoever *pleadable*, whereby he lieth as an outlaw.

Holinshed, Descrip. of England, II. 15.

Pleadable briefs, in Scots law, precepts directed to the sheriffs, who thereupon cite parties, and hear and determine.

pleader (plē'dēr), *n.* [*ME. pledere, pletere*, *pletour, plaidur*, < *OF. plaideur*, a pleader, < *plai-*

dier, *plead*: see *plead*.] 1. One who pleads; one who presents pleas for or against a claim, allegation, etc.; technically, a lawyer who pleads a cause or argues in a court of justice (the original meaning of the term), or who drafts, prepares, or devises pleadings.

The thrille buffet signifieth these false *pletours*, men of lawe, that sellen and a-peire theire neighbours be-hinde here bakke for couetise and envye.

Merrin (E. E. T. S.), III. 434.

So fair a *pleader* any cause may gain.

Dryden, Aurengzebe, III. 1.

2. The party whose pleading is under consideration.—**Special pleader**, one of a class of the English bar, whose business consists in giving opinions, and especially in drawing special and difficult pleadings and other documents. In the days of technical common-law procedure, when the statement of the cause of action was presented in different counts varying as to details so as to cover every anticipated variation of circumstances, the function of the special pleader was important to the English practitioner, whether in preparing documents or in detecting defects in those of the adversary.

pleading (plē'ding), *n.* [*ME. pledyng, pletyng*; verbal *n.* of *plead*, *v.*] 1. The act of advocating any cause; specifically, the act or practice of advocating clients' causes in courts of law.

The lawyer is judged by the virtue of his *pleading*, and not by issue of the cause.

Bacon, Advancement of Learning, II. 189.

I fling my heart into your lap

Without a word of *pleading*.

Whittier, Among the Hills.

2. In law: (a) The document (or in some inferior courts an oral statement) formally setting forth the cause of action or the defense of a party. The objects of pleading are to inform the adverse party what questions he must be prepared to meet at the trial; to inform the court what questions are to be determined; and to preserve a record which, with the verdict or judgment, shall show what matters are not afterward to be drawn in question. The term *pleadings* is applied to the documents on either side, whether a declaration, complaint, or bill with demurrer, or a declaration with plea, etc., or a bill or complaint with plea or answer, etc., which form the issue on which it is proposed to try the cause. See *issue*, 10. (b) The formal allegation on the record of that which is to be relied on as the support of the party's case in evidence. (c) The rules and usages of framing such documents, and of the sufficiency of their contents; the art of drawing pleadings. (d) *pl.* (1) The written allegations made in alternate series by the plaintiff and the defendant of their respective grounds of action and defense, terminating in propositions distinctly affirmed on one side and denied on the other, called the *issue*. *Heard*. (2) In a more limited sense, only those allegations or altercations which are subsequent to the count or declaration. *Gould*.—**Code pleading, color in pleading, oral pleading.** See *code*, *color*, *oral*.—**Pleading over** going on to respond by pleading, after a previous pleading has been adjudged insufficient, or has been withdrawn.—**Special pleading.** (a) The allegation of special or new matter, as distinguished from a direct denial of matter previously alleged on the other side. (b) The science of pleading, which, until the English Common-law Procedure Act, in 1852, constituted a distinct branch of the law, having the merit of developing the points in controversy with great precision. Its strictness and subtlety were frequently a subject of complaint, and one of the objects of the act was to relax and simplify its rules. (c) In popular use, the specious but unsound or unfair argumentation of one whose aim is victory rather than truth.

Not one of these [medieval wars] was simply a war of aggression, . . . except perhaps the Norman Conquest; and we all know what an amount of *special pleading* was thought necessary to justify that.

Stubbs, Medieval and Modern Hist., p. 217.

pleadingly (plē'ding-ly), *adv.* In a pleading manner; by supplication.

pleading-place (plē'ding-plās), *n.* A court of justice. *Cowley*, Pindaric Odes, XIII. 5. [Rare.] **pleasable** (plē-zā-bl), *a.* [*please* + *-able*.] Capable of being pleased.

Can a ghost laugh . . . when you are *pleasant* with him?
Lamb, New-Year's Eve.

=Syn. 1. *Pleasant*, *Pleasing*, *Agreeable*, *Conjugal*, *gratify-
ing*, acceptable, welcome. *Pleasant* is the strongest, and
agreeable the weakest of the first four words. *Pleasant*
may be, and generally is, applied to things in the con-
crete: as, *pleasant* weather. *Pleasing* applies generally
to things not physical: as, a *pleasant* face; a *pleasing*
aspect, variety. *Pleasant* suggests the effect produced,
pleasing the power of producing it; hence we may say
a *pleasant* or a *pleasing* variety. *Pleasant* must be objec-
tive, *pleasant* may be subjective: as, he was in a *pleasant*
mood. *Agreeable* and *conjugal* are used of social qualities
and relations, but the latter goes deeper, e. pressing a
natural suitableness, on the part of a person or thing, to
the tastes, habits, temperament, or passing mood of the
person concerned.

It was worth while to hear the croaking and hollow tones
of the old lady, and the *pleasant* voice of Phoebe, mingling
in one twisted thread of talk.

Hawthorne, Seven Gables, v.
Johnson.

Politeness and good breeding are equally necessary to
make you welcome and *agreeable* in conversation and com-
mon life. *Chesterfield, Letters*.

able to; suit; satisfy; seem good to: used im-

personally, and followed by an object, originally
dative, of the person: same as *likes*, l. 1. This
impersonal construction with the indirect object of the
person has given way in more familiar use to a personal
construction, the original dative you, in *if you please*, for
example, being now taken as the subject. (See II., l. 1.) The
word in this sense was formerly common in polite request,
may it please you, or *if it please you*, or, elliptically, *please*
you: a mode of speech still common in addressing a judge
or persons of rank or position: as, *may it please the court*;
if it please your honor; *please* your worship; etc. Com-
pare II., l. 1.

pleasure (plezh'ūr), *n.* [Early mod. E. also
pleasur, plesur; with termination accommodated to the noun suffix *-ure* (as also in *leisure*),
< OF. *pleisir, plaisir*, F. *plaisir* = Fr. *plazer* =
Sp. *placer* = Pg. *prazer* = It. *piacere, piagere*,
please, inf. used as noun: see *please*.] 1. That
character of a feeling by virtue of which it
gratifies the sentient being that experiences
it, so that there is an impulse to its continu-
ance or renewal. As being a character of a mere
feeling, *pleasure* is distinguished from *happiness*, which
is a general state of consciousness arising from such an
adaptation of circumstances to desires as to produce a
prevailing sense of satisfaction. According to hedonistic
writers, happiness consists in an excess of pleasure over
pain. *Pleasure* is measured by its intensity, its duration,
286

the freedom from consequent pain, the number of persons
whom it affects, etc.

And Salomon saith, "The harte full of enuie
Of him selfe hath no *pleasure* nor commoditie."
Babees Book (E. E. T. S.), p. 349.

There is a *pleasure*, sure,
In being mad which none but madmen know.
Dryden, Spanish Friar, II.

About three quarters of the way up the hill we came to
a level spot where there is a fountain, and every thing
made very convenient for those who come here for their
pleasures. *Poocock, Description of the East, II. i. 146.*

How shall we define *pleasure*? It seems obvious to de-
fine it as the kind of feeling which pleases us, which we
like or prefer. *H. Sidgwick, Methods of Ethics, p. 114.*

2. Sensual gratification; indulgence of the ap-
petites.—3. That which pleases or gratifies the
senses or the mind; that which is delightful or
beautiful.

Wiche Galyes went to the Turke Ambasset, and they
Caryed with them Riches and *pleasures*, as clothe of gold
and Crymayn velvet, and other thyngs mor than I knewe.
Torkington, Diarie of Eng. Travell, p. 18.

O bonny, bonny was my love,
A *pleasure* to behold.
James Herries (Child's Ballads, I. 209).

4. A favor; gratification.

It. plebiscito, < L. plebiscitum, a decree or ordinance of the people, < plebs, the people, + scitum, a decree, neut. of scitus, pp. of scire, know: see science.*] 1. Same as *plebiscitum*.—2. An expression of the will or pleasure of the whole people in regard to some measure already decided upon; a vote of the whole people for the ratification or disapproval of some matter: chiefly a French usage.

If people by a plebiscite elect a man despot over them, do they remain free because the despotism was of their own making?
H. Spencer, Man vs. State, p. 14.

Plebiscite we have lately taken, in popular use, from the French. The word previously belonged, however, to the language of the civil law.
F. Hall, Mod. Eng., p. 310.

plebiscitum (pleb-i-si'tum), *n.*; pl. *plebiscita* (-tā). [*L.: see plebiscite.*] A law enacted in ancient Rome by the lower rank of citizens meeting in the assembly called the *comitia tributa*, under the presidency of a tribune or some other plebeian magistrate; a decree of the plebs. At first these decrees bound only the plebs, but by a law generally assigned to 449 B. C., and confirmed by later legislation (339 and 296 B. C.), their effect was extended to the patricians.

plebity (pleb'i-ti), *n.* [*< L. plebita(-)s, the rank of a common citizen, < plebs, the common people: see plebs.*] The common people; the plebs. *Wharton.*

plebs (plebz), *n.* [*L., also less commonly plebes, in OL. pleps, also plebis, the common people; akin to plenus, full, plerique, many, etc.: see plenty.*] The lower order of citizens in ancient Rome; the plebeians; hence, in general, the populace. The members of this order were originally of pure Latin blood, but were not among the founders of Rome; they were recruited from the ranks of the clients and of the Latin peoples who had been annexed by Rome; while citizens, they did not figure in the three tribes or in the curiae and gentes of the patricians, and were thus excluded from the comitia, the senate, and all public, civil, and religious offices. They had all the duties and burdens of citizens with greatly restricted privileges. After the establishment of the republic there took place a long struggle between the two orders. The plebeians secured the institution of the tribunate, various reforms, and an increased share in the government; their efforts culminated when, by the Licinian laws (about 367 B. C.), they secured one of the two consulships. The offices of dictator, censor, and pretor were soon opened to them, and finally, by the Ogulnian law (300 B. C.), the sacred colleges. The strife practically ended by the final confirmation of the extended plebiscitum, about 286 B. C. (*See plebiscitum*). Under the kings and the republic a plebeian could be raised to patrician rank only by a *lex curiata*; Julius Caesar and the emperors conferred the distinction by personal decree. Patrician families or individuals sometimes went over to the plebeian order, for various reasons.

Cæsar, as I stated in another Lecture, divides all the Continental Celtic tribes into the Equites and the Plebs.
Maine, Early Hist. of Institutions, p. 182.

Plecotinæ (plek-ō-ti-nē), *n. pl.* [NL., < *Plecotus + -inæ.*] A subfamily of *Vespertilionidæ*, exemplified by the genus *Plecotus*, having rudi-

mentary nasal appendages or grooves and very large ears; the eared bats. The genera *Plecotus*, *Synotis*, *Otonycteris*, *Nyctophilus*, and *Antrozous* are contained in this group. Also called *Plecoti*.

plecotine (plek'ō-tin), *a.* Belonging to the *Plecoti*.

Plecotus (plē-kō'tus), *n.* [NL. (Geoffroy), < Gr. πλέκειν, twine, twist, + οὖς (ōr-), ear.] A genus of eared bats of the family *Vespertilionidæ* and subfamily *Plecotinæ*, having the incisors and premolars each two above and three below on each side, as the long-eared bat of Europe, *P. auritus*, and the North American *P. macrotis*.

Plectellaria (plek-te-lā'ri-ā), *n. pl.* [NL., < L. *plectere*, plait, twine, twist, + *-ell- + -aria.*] A suborder of nassellarians, whose skeleton consists of a simple siliculous ring or of a triadial framework of spicules, usually furnished with processes forming simple or branched spicules. The branches of the latter may be united into a loose plexus, without, however, forming a chambered fenestrated shell. The skeleton is entirely wanting only in the simplest form.

plectellarian (plek-te-lā'ri-an), *a. and n.* [*< Plectellaria + -an.*] I. *a.* Of or pertaining to the *Plectellaria*.

II. *n.* A member of the *Plectellaria*.

plectile (plek'til), *a.* [*< L. plectilis, plaited, < plectere, plait: see plait.*] Woven; plaited.

The crowns and garlands of the Ancients . . . were made up after all the ways of art, compactile, sutile, plectile.
Sir T. Browne, Misc. Tracts, II.

Plectocomia (plek-tō-kō'mi-ā), *n.* [NL. (Martius and Blume, 1830), so called in allusion to the slender filaments; < Gr. πλέκός, plaited, twisted (verbal adj. of πλέκειν, plait, twist), + κόμη, hair.] A genus of ratan-palms of the tribe *Lepidocaryæ* and subtribe *Calamæ*. It is characterized by an axillary dioecious inflorescence, with numerous persistent spathe, and the spadix divided into many very long tail-like branches, every branch sheathed with numerous two-ranked closely imbricated shell-shaped secondary spathe, each inclosing a short spike 3 inches or less long, bearing coriaceous perianths. The 6 species are natives of mountains in eastern India and the Malayan archipelago. They are climbing palms, with slender or robust, very much prolonged stems. The one-seeded fleshy fruits are densely covered with overlapping rough-fringed, almost prickly scales. The large leaves are pinnate, with narrowly elliptical segments, and the midrib extended into long whip-like tails, covered beneath with exceedingly strong compound claw-like spines, which take firm hold of branches of trees, and support the climbing stem, which in *P. elongata*, the rotang-dahon of Indian jungles, is said to extend to a length of 500 feet.

plectognath (plek'tog-nath), *a. and n.* I. *a.* Pertaining to the *Plectognathi*, or having their characters. Also *plectognathic, plectognathous*.

II. *n.* A member of the *Plectognathi*.

Plectognathi (plek'tog-nā-thi), *n. pl.* [NL., < Gr. πλέκός, plaited, twisted, + γνάθος, jaw.] An order of physoclistous fishes, with the cranium normal, the premaxillaries usually coossified behind with the maxillaries, the dentary coossified with the articular and angular bones, and the lower pharyngeals distinct: so called from the extensive ankyloses of the jaws. The order includes the porcupine-fishes, swell-fishes, box-fishes, globe-fishes, egg-fishes, file-fishes, and related forms, as of the families *Triacanthidæ*, *Balistidæ*, *Tridontidæ*, *Ostracioidæ*, *Tetradontidæ*, *Diodontidæ*, and *Molidae*.

plectognathic (plek'tog-nath'ik), *a.* [*< plectognath + -ic.*] Same as *plectognath*.

plectognathous (plek'tog-nā-thus), *a.* [*< plectognath + -ous.*] Same as *plectognath*.

Plecoptera (plek-top'te-rā), *n. pl.* [NL., < Gr. πλέκός, plaited, twisted, + πτερόν, wing, = E. feather.] In Packard's classification (1888), one of 15 orders of insects, corresponding to the pseudoneuropterous family *Ephemeroidea* alone. These had before (in 1885) been raised to ordinal rank by Brauer, but without a new name.

plectospondyl (plek-tō-spon'dil), *a. and n.* [*< Gr. πλέκός, plaited, twisted, + σπώνδυλος, σπώνδυλος, the backbone: see spondyl.*] I. *a.* Having some joints of the back-bone coossified or ankylosed together, as a fish; having the characters of the *Plectospondyli*. Also *plectospondylous*.

II. *n.* Any fish of the order *Plectospondyli*.

Plectospondyli (plek-tō-spon'di-lī), *n. pl.* [NL.: see *plectospondyl*.] An order of fishes having a precoracoid arch, a symplectic but no coronoid bones, and the anterior vertebrae coossified and connected with the auditory apparatus by a chain of little bones. It contains the cyprinids, characins, and gymnotous fishes—all of fresh water.

plectospondylous (plek-tō-spon'di-lus), *a.* [*< plectospondyl + -ous.*] Same as *plectospondyl*.

plectra, *n.* Plural of *plectrum*.

Plectranthus (plek-tran'thus), *n.* [NL. (Thér. ritier, 1784), so called in allusion to the spurred corolla of many species; < Gr. πλέκτρον, spur (*see plectrum*), + άνθος, flower.] A genus of gamopetalous plants of the order *Labiata*, tribe *Ocimoidæ*, and subtribe *Eucimæ*, characterized by the longer and concave anterior corolla-lobe, four perfect stamens, calyx with five equal or unequal teeth, the posterior tooth sometimes larger, and this or the corolla often prolonged below into a spur or sac. There are about 80 species, natives of the tropics, especially in Africa, Asia, and the Pacific, and also in Japan and at the Cape of Good Hope. They are usually herba, rarely tall shrubs, bearing two-lipped flowers with a long tube, in large or small cymes, which are variously racemed or panicled, and are commonly blue or purple. The name *cockspur-flower* is sometimes used for the cultivated species, which are either tender annuals or herbs and shrubs grown under glass. *P. nudiflorus* is the Chinese basil, and *P. ternatus* the omime-root of Madagascar.

plectre (plek'tēr), *n.* [*< F. plectre, < L. plectrum, plectrum: see plectrum.*] A plectrum. [Rare.]

He'd strike that lyre adroitly—speech,
Would but a twenty-cubit plectre reach.

Browning, Sordello.

plectron (plek'tron), *n.* Same as *plectrum*.

Plectrophanes (plek-trof'ā-nēs), *n.* [NL. (Temminck, 1820), < Gr. πλέκτρον, a cock's spur (*see plectrum*), + φάινειν, show.] A genus of *Fringillidæ*, so named from the long straightened hind claw or plectrum characteristic of some of its members; the snow-buntings or longspurs. The bill is small and conic, with a nasal ruff or tuft of plumules; the wings are long and pointed; and the tail is short, and square or emarginate. The common snow-bunting is usually called *P. nivalis*, but has been placed in a different genus (*Plectrophenax*). The Lapland longspur is *P. lapponicus*. The collared and the painted longspurs are *P. ornatus* and *P. pictus*. Excluding the snow-bunting, the members of this genus are now usually called *Centrophanes* or *Calcearius*. See cut under *Centrophanes*.

Plectrophenax (plek-trof'e-naks), *n.* [NL., < Gr. πλέκτρον, a cock's spur (*see plectrum*), + φάινειν, a cheat.] A genus of *Fringillidæ* dismembered from *Plectrophanes*, having *P. nivalis* as its type; the snow-buntings.

Plectropteridæ (plek-trop-ter'i-dē), *n. pl.* [NL., < *Plectropterus + -idæ.*] The spur-winged geese regarded as a family apart from *Anatidæ*. See cut under *Plectropterus*.

Plectropterinæ (plek-trop-te-rī-nē), *n. pl.* [NL., < *Plectropterus + -inæ.*] A subfamily of *Anatidæ*, represented by the genus *Plectropterus*; the spur-winged geese.

plectropteric (plek-trop'te-rin), *a.* Belonging to the *Plectropterinæ*.

Plectropterus (plek-trop'te-rus), *n.* [NL. (W. E. Leach, 1824), < Gr. πλέκτρον, a cock's spur (*see plectrum*), + πτερόν, wing, = E. feather.]

Spur-winged Goose (*Plectropterus gambensis*).

An African genus of geese having a spur on the wing, as *P. gambensis*.

plectrum (plek'trum), *n.*; pl. *plectra* (-trā). [NL., < L. *plectrum*, < Gr. πλέκτρον, a thing to strike with, as an instrument for striking the lyre, a spear-point, a cock's spur, a punting-pole, < πλέκσειν (πλέκ-), strike: see *plague*.] I. A small instrument of ivory, horn, or metal used for plucking or twanging the strings of a lyre, cithara, or other similar instrument.

I heard the forlorn but melodious note of a hooting owl indefinitely far: such a sound as the frozen earth would yield if struck with a suitable plectrum.

Thoreau, Walden, p. 292.

2. Something like or likened to a plectrum. (a) In anat.: (i) The stylohyal bone, or styloid process

of the temporal bone. (2) The uvula. (3) The tongue. *Eng. Dic.* (4) In *ornith.*, a spur or claw on the wing or foot. (5) In *entom.*, a small bristle or point on the costal margin of the wing, and standing out from it.

pled (pled). An occasional (less correct) pret-erit and past participle of *pled*.

pledge (plej), *n.* [*ME. plegge*, < *OF. plege, plege, plaige, ploige, ploge, plage*, *m.*, = *Pr. plev*, *pleya* = *Of. pleggio*, a pledge, surety, bail (person or thing), prob. < *LL. *præbium*, found only in *ML.* forms reflecting the *Rom.*, *plurium*, *plutium*, *plegium*, neut., a pledge, surety, *plivius*, *plegius*, *m.*, one who gives a pledge, surety (cf. *L. præbrum*, in *pl. præbra*, an amulet), < *L. præbere*, proffer, offer, give, grant, afford (*præbere fidem*, give promise or security): see *prebend*, and cf. *plevin*, from the same source. Hence *pledge*, *v.*] 1. In *law*: (a) A person who goes surety or gives bail for another; especially, a surety whom early English law required of a plaintiff on bringing an action. After a time "John Doe" and "Richard Roe" did duty as such pledges. (b) A bailment of personal property as a security for some debt or engagement. *Story*, *J.* It differs from a *chattel mortgage* in three essential characteristics: (1) It may be constituted without any contract in writing, merely by delivery of the thing pledged; (2) it requires a delivery of the thing pledged, and is continued only so long as the possession remains with the creditor; (3) it does not generally pass the title to the thing pledged, but gives only a lien to the creditor, and the debtor retains the general property. But, as regards choses in action, the distinction that a *mortgage* is a transfer of the title, while a *pledge* is a mere lien without a transfer of title, does not always hold good; for in most cases a pledge of choses in action can be made effectual only by a transfer of the legal title. (See *mortgage*.) A pledge of a chose in action is now more commonly termed *collateral security*, or *collateral*. (c) The thing pawned or delivered as security; a pawn. —2. Anything given or considered as security for the performance of an act; a guaranty. Thus, a man gives his word or makes a promise to another, which is received as a *pledge* for fulfilment; a candidate for parliamentary honors gives promises or *pledges* to support certain measures; the mutual affection of husband and wife is a *pledge* for the faithful performance of the marriage covenant; mutual interest is the best *pledge* for the performance of treaties.

Him little answerd th' angry Elfin knight, . . .
But threw his gauntlet, as a sacred pledge,
His cause in combat the next day to try.

Spenser, *F. Q.*, I. iv. 43.

I had been insulted by the boy that belonged to the gate, who demanded money of me, and snatched my handkerchief from me as a *pledge*.

Pococke, *Description of the East*, II. 1. 7.

(a) Figuratively, a child; offspring.

'Tis the curse
Of great estates to want those *pledges* which
The poor are happy in: they, in a cottage,
With joy behold the models of their youth.

Fletcher, *Spanish Curate*, I. 3.

(b) A surety; a hostage.

Command my eldest son, nay, all my sons,
As *pledges* of my fealty and love.

Shak., 2 *Hen. VI.*, v. 1. 50.

Samuel, their other consort, Powhatan kept for their *pledge*.

Quoted in *Capt. John Smith's Works*, I. 213.

(c) A formal obligation whereby one voluntarily binds himself to abstain from the use of intoxicating drink.

3. A token or sign of favor, agreement, etc.
Let it therefore suffice us to receive Sacraments as sure *pledges* of God's favour, signs infallible that the hand of his saving mercy doth thereby reach forth itself towards us.

Hooker, *Eccles. Polity*, v., App. 1.

Here, boldly take
My hand in *pledge*, this hand, that never yet
Was given away to any.

Fletcher, *Faithful Shepherdess*, I. 3.

4. An expression of good will, or a promise of friendship and support, conveyed by drinking together; hence, in a more general sense, the act of drinking together; the drinking of a health.

Suppose that you winked at our friends drinking those *pledges*.

Scott.

To hold in *pledge*, to keep as security.—To put in *pledge*, to pawn.—To take the *pledge*, to bind one's self to observe principles of temperance or of total abstinence from intoxicating drink.—*Syn.* 2. *Covenant*, etc. See *promise*, *n.*, and *earnest*.

pledge (plej), *v. t.*; pret. and pp. *pledged*, ppr. *pledging*. [*ME. pleggen*, < *OF. plegier*, *ML.* reflex *plegiare*, *plegire* (beside *plevire*, *plivire*, etc., after the *OF. plevir*, *pledge*: see *plevin*); from the noun: see *pledge*, *n.*] 1. To give as a pledge or pawn; deposit in pawn; deposit or leave in possession of a person as security. See *pledge*, *n.*—2. To give or formally and solemnly offer as a guaranty or security.

And so her father *pledg'd* his word,

And so his promise plight.

The Gay Goose-Hawk (Child's *Ballads*, III. 231).

4th. But my vows are *pledged* to her.

So A. Let her foreclose, Jack; let her foreclose; they are not worth redeeming.

Sheridan, *The Rivals*, II. 1.

We mutually *pledge* to each other our lives, our fortunes, and our sacred honour. *Declaration of Independence*.

3. To bind to something by a pledge, promise, or engagement; engage solemnly: as, to *pledge* one's self.

Here [shall] Patriot Truth her glorious precepts draw,
Pledged to Religion, Liberty, and Law.

Story, *Life and Letters*, I. 127.

4†. To guarantee the performance of by or as by a pledge.

Yes, I accept her, for she well deserves it;
And here, to *pledge* my vow, I give my hand.

Shak., 3 *Hen. VI.*, III. 3. 250.

5. To give assurance of friendship to, or promise friendship to, by or in the act of drinking; hence, to drink a health to or with. [The use of the word in this sense is said to have arisen from the fact that, in the rude and lawless society of former times, the person who called upon another to drink virtually pledged himself that the other would not be attacked while drinking or poisoned by the liquor.]

Pledge me, my Friend, and drink till thou be'st Wise.
Cowley, *Ode*.

I'll *pledge* you, Sir: so, there's for your ale, and farewell.
Cotton, in *Walton's Angler*, II. 223.

Sipping beverage divine,
And *pledging* with contented smack
The Mermaid in the Zodiac.

Keats, *Lines on the Mermaid Tavern*.

Reach me my golden cup—that stands by thee,
And *pledge* me in it first for courtesy.

M. Arnold, *Tristram and Iseult*.

6. To assure solemnly or in a binding manner; guarantee.

Ye have *pledged* me vpon youre lyves that I shall have no drede of death.

Merrin (E. E. T. S.), I. 35.

The ordinary farmer's household consisted of a big man, a little man, and a *pleghan*, i. e. a lad of fifteen to drive the plough.

Quarterly Rev., CXLVI. 39.

plegometer (ple-gom'e-tēr), *n.* [*< Gr. πλεγή*, a stroke, + *μέτρον*, measure.] Same as *pleximeter*.

Pleiad (pli'ad), *n.*; pl. *Pleiades*, *Pleiades* (-adz, -a-dēz). [*< L. Pleias*, *Pleias* (-ad-), < *Gr. Πλειάς*, *Πλειάς* (-ad-), pl. *Πλειάδες*, one of the Pleiads or Seven Stars, traditionally so called as indicating by their rising the time of safe navigation; < *πλεῖν*, sail.] One of a close group of small stars in the constellation Taurus, very conspicuous on winter evenings, about twenty-four degrees north of the equator, and coming to the meridian at midnight in the middle of November.

For some unknown reason, there were anciently said to be seven Pleiads, although only six were conspicuous then as now; hence the suggestion of a lost Pleiad. In mythology the Pleiads were said to be the daughters of Atlas and Pleione, and were named Alcyone, Merope, Celano, Electra, Sterope or Asterope, Taygeta, and Maia. These names, with those of the parents, have been applied by modern astronomers since Riccioli (A. D. 1666) to the principal stars of the group. Four of the brightest stars are at the corners of a trapezoid, with one in the base near the star at the northern angle, and one outside the trapezoid, like a handle to a dipper. Alcyone, the brightest of the group, is a greenish star, of magnitude 2.0, at the east end of the base of the trapezoid; it is γ Tauri. Electra is a very white star, of magnitude 3.8, at the westernmost corner of the trapezoid, on the short side opposite the base. Taygeta is a yellowish star, of magnitude 4.4, at the northern corner on the base. Merope is a yellowish star, of magnitude 4.2, at the southernmost corner, not on the base. It is surrounded by a faint nebula, discovered by Tempel many years ago, and visible with a telescope of moderate dimensions. But photographs show that the cluster is also full of invisible wisps and filaments of nebulosity, which are for the most part attached to the larger stars. Maia is a yellowish star, of magnitude 4.0, on the base of the trapezoid, close to the northern angle, but not in it. Asterope is a double star, of magnitude 5.7, not very conspicuous, forming an equilateral triangle with Taygeta and Maia, and lying outside of the trapezoid. Celano is a star of magnitude 5.2, half-way between Electra and Taygeta, just a little outside the western slanting side of the trapezoid. Atlas is a yellowish star, of magnitude 3.8, the second or third brightest in the group, which lies out of the trapezoid, considerably to the east, as in the handle of the dipper. Pleione is a star of magnitude 5.1, a little north of Atlas.

Canst thou bind the sweet influences of *Pleiades*, or loose the bands of Orion?

Job xxxviii. 31.

Many a night I saw the *Pleiads*, rising thro' the mellow shade,
Ghitter like a swarm of fire-flies tangled in a silver braid.

Tennyson, *Locksley Hall*.

plein, *a.* [*ME.*, < *OF. plein*, *F. plein* = *Sp. Pg. pleno* = *It. pieno*, < *L. plenus*, full: see *plenty*.] Full; perfect. *Chaucer*.

pleinly, *adv.* [*ME. pleynly*; < *plein* + *-ly*.] Fully. *Chaucer*.

pleio-. For words so beginning and not found below, see forms beginning with *plio-*.

pleiochasium (pli-ō-kā'si-um), *n.* [*NL.*, < *Gr. πλείων*, more, + *χάσις*, separation, < *χαίρειν*, gape, yawn: see *chasm*.] In *bot.*, a cyme with three or more lateral axes. Also called *multiparous cyme*.

pleiomorphic (pli-ō-mōr'fik), *a.* [*< pleiomorphism* + *-ic*.] In *bot.*, exhibiting or characterized by pleiomorphism.

pleiomorphism (pli-ō-mōr'fiz'm), *n.* [*< pleiomorphy* + *-ism*.] In *bot.*, the occurrence of more than one independent stage or form in the life-cycle of a species, as in certain uredineous fungi, such as *Puccinia graminis*, which passes through three stages. See *heteracism*, *Puccinia*, *Uredineæ*, etc. Also spelled *pleomorphism*.

pleiomorphy (pli-ō-mōr'fi), *n.* [*< Gr. πλείων*, more, + *μορφή*, form.] 1. In *bot.*, same as *pleiomorphism*.—2. In *vegetable teratol.*, the state of a normally irregular flower when it becomes regular by the increase in the number of its irregular elements. It is due to an excessive development. Compare *peloria*. Also spelled *pleomorphy*.

pleiophyllous (pli-ō-fil'us), *a.* [*< Gr. πλείων*, more, + *φύλλον*, leaf.] In *bot.*, exhibiting or characterized by pleiophylly; also, having several or many leaves.

pleiophylly (pli-ō-fil-i), *n.* [*< pleiophyllous* + *-y*.] In *vegetable teratol.*, a condition in which there is an abnormal increase in the number of

leaves starting from a particular point; also, that condition in which the number of leaflets in a compound leaf is abnormally increased. *Masters*.

pleiosporous (plī'ō-spō-rus), *a.* [*Gr.* πλειών, more, + σπóρος, seed: see *spore*.] In *bot.*, having or containing several or many spores.

pleiotaxy (plī'ō-tak-si), *n.* [*Gr.* πλειών, more, + τάξις, arrangement, order.] In *bot.*, a multiplication of the number of whorls—that is, the production of additional distinct whorls, as in many so-called double flowers. Pleiotaxy may affect the bracts, calyx, corolla, androecium, gynoecium, or perianth as a whole.

pleiothalamous (plī'ō-thal'a-mus), *a.* [*Gr.* πλειών, more, + θάλαμος, a bedchamber.] In *bot.*, several- or many-chambered or -celled.

pleiotrachea (plī'ō-trā-kē'a), *n.* [*N.L.*, *Gr.* πλειών, more, + τραχία, the windpipe.] In *bot.*, a membranous tube or trachea containing a compound spiral fiber. *Cooke*.

Pleistocene (plis'tō-sēn), *n.* [*Gr.* πλειστός, most (superl. of πολύς, much), + καινός, recent.] The name given by geologists, with more or less vagueness, to the lower division of the Quaternary or Post-tertiary deposits, or to that division which cannot properly be included under the designation *recent*. See *Post-tertiary*, *Tertiary*, and *Quaternary*.

plekt, *n.* A Middle English form of *pleck*.

plenat (plē'nai), *a.* [*ML.* **plenalis* (in adv. *plenatiter*), *L.* *plenus*, full (see *plen* and *plenty*), + *-al*.] Fully; complete.

I hear the Peace betwixt Spain and Holland is absolutely concluded by the *Plenipotentiary* Ministers at Munster.
Howell, Letters, II. 48.

II. n.; pl. *plenipotentiaries* (-riz). A person invested with full power to transact any business; specifically, an ambassador or envoy to a foreign court, furnished with full powers to negotiate a treaty or to transact other business. A plenipotentiary is not necessarily accredited to any specified foreign court. Frequently meetings of plenipotentiaries for concluding peace, negotiating treaties, etc., are held in some neutral place, so that they may conduct their negotiations and despatch their business uninfluenced by any special power.

The treaty of Blois had not received the ratification of the Navarrese sovereigns; but it was executed by their *plenipotentiaries*, duly authorized.

Prescott, Ferd. and Isa., II. 23.

The terms or propositions of peace should have been fully, frankly, and unreservedly laid before the *plenipotentiaries* assembled at Utrecht.

Lecky, Eng. in 18th Cent., I.

= *Syn.* *See* *ambassador*, 1.

[*Old Eng. and Scotch* in both senses.]

plenishing (plēn'ish-ing), *n.* [*Verbal n.* of *plenish*, *v.*] Household furniture or furnishing. [*Scotch*.]

We has grude *plenishing* o' our ain, if we had the cast o' a cart to bring it down. *Scott, Old Mortality*, viii.

Outright plenishing. See *outright*.

plenishing-nail (plēn'ish-ing-nāl), *n.* In carp., a large flooring-nail.

plenist (plē'nist), *n.* [*plenum* + *-ist*.] One who maintains that all space is full of matter; one who denies the possibility of a vacuum or the reality of empty space.

The generality of the *plenists* . . . did not take a vacuum in so strict a sense. *Boyle, Works*, I. 75.

plenitude (plēn'i-tūd), *n.* [*F.* *plénitude* = *Sp.* *plenitud* = *Pg.* *plenitude* = *It.* *plenitudine*, *L.* *plenitudo*, fullness, *plenus*, full: see *plenty*.] 1. Fullness; abundance; completeness.

In him a *plenitude* of subtle matter,
Applied to caetals, all strange forms receives.
Shak., Lover's Complaint, l. 302.

You know the *plenitude* of the power and right of a king, as well as the circle of his office and duty.
Bacon, Advancement of Learning, II. 220.

A clime
Where life and rapture flow in *plenitude* sublime.
Wordsworth, Desultory Stanza.

2. Repletion; animal fullness; plethora. *Arbutnot*.—The moon in her *plenitude*, in *her*, the full moon.

The *plenteous* horn
Of autumn, filled and running o'er
With fruit, and flower, and golden corn!
Whittier, Autumn Festival.

4. Bounteous or bountiful in giving; generous; open-handed.

Ne beth *plentyuous* to the pore as pure charite wolde.
Piers Plowman (B), x. 80.

Be a man neuer so valiaunt, so wise, so liberrall or *plenteuous*, . . . if he be seme to exercise iniustyce, . . . it is often remembered.
Sir T. Elyot, The Governour, III. 4.

= *Syn.* 1. *Copious*, etc. See *ample*.

plenteously (plēn'tē-us-li), *adv.* In a plenteous manner; copiously; plentifully; bountifully; generously.

Al myhten tho same thinges betere and more *plenteuous* by ben outh in the mowth of the peopel.
Chaucer, Boethius, I. prose 5.

plenteousness (plēn'tē-us-nes), *n.* The state of being plenteous; abundance; copious supply; plenty.

plentiful (plēn'ti-fəl), *a.* [*plenty* + *-ful*.] 1. Existing in great plenty; copious; abundant; ample.

The satirical rogue says here that old men have grey beards, . . . and that they have a *plentiful* lack of wit.
Shak., Hamlet, II. 2. 202.

Alcibiades . . . a young man of noble birth, excellent education, and a *plentiful* fortune.
Swift, Contests and Dissensions, II.

Can anybody remember when sensible men, and the right sort of men, and the right sort of women were *plentiful*?
Emerson, Works and Days.

2. Yielding abundance; affording ample supply; fruitful.

If it be a long winter, it is commonly a more *plentiful* year.
Bacon, Nat. Hist.

For as *plentiful* springs are fittest, and best become large aqueducts, so doth much virtue such a steward and officer as a Christian.
Donne, Letters, lxxxix.

3t. Lavish.

He that is *plentiful* in expenses of all kinds will hardly be preserved from decay.
Bacon, Expense (ed. 1887).

=Syn. 1 and 2. Profuse, luxuriant. *Plentiful* is essentially the same as *plentiful*. See comparison under *ample*.

plentifully (plen'ti-fū-lī), *adv.* In a plentiful manner; copiously; abundantly; with ample supply.

Berne is *plentifully* furnished with water, there being a great multitude of handsome fountains planted at set distances.
Addison, Remarks on Italy.

Sometimes the Cashif sent for me to dine with him, when the drums went round very *plentifully* whilst we were eating.
Pococke, Description of the East, I. 59.

plentifulness (plen'ti-fū-nes), *n.* The state of being plentiful; abundance.

plentifully (plen'ti-fū-lī), *v. t.* [*< plenty + -fy.*] To make plenteous; enrich.

For alms (like leavin) make our goods to rise,
And God His own with blessings plentifulifies.
Spenser, tr. of Du Bartas's Weeks, II, The Vocation.

plentivoust, *adv.* A Middle English form of *plenteous*.

plenty (plen'ti), *n.* and *a.* [*< ME. plentee, plente, < OF. plente, plentet, < L. plenita(-s), fullness, repletion, abundance, < plenus, full; cf. Gr. πλεων, full; akin to E. full: see full.*] I. *n.* 1. Fullness; abundance; copiousness; a full or adequate supply; sufficiency.

There ben Hilles where men geten gret *plentes* of Manna,
In gretter habundance than in any other Contree.
Mandeville, Travels, p. 152.

The fyer towards the element flew,
Out of his mouth, where was great *plentie*.
Ballad of King Arthur (Child's Ballads, I. 239).
God give thee . . . *plenty* of corn and wine.
Gen. xxvii. 28.

They have great *plenty* of very large carp in this river.
Pococke, Description of the East, II. II. 86.

2. Abundance of things necessary for man; the state in which enough is had and enjoyed.

It ne may han togidere al the *plente* of the lyf.
Chaucer, Boethius, v. prose 6.
Ye shall eat in *plenty* and be satisfied, and praise the name of the Lord.
Joel II. 26.

Thy lopp'd branches point
Thy two sons forth; . . . whose issue
Promises Britain peace and *plenty*.
Shak., Cymbeline, v. 5. 458.

3. A time of abundance; an era of plenty.

Dear nurse of arts, *plenties*, and joyful births.
Shak., Hen. V., v. 2. 35.

If a man will goe at Christmas to gather Cherries in Kent, though there be plenty in Summer, he may be deceived; so here these *plenties* haue each their seasons.
Capt. John Smith's Works, II. 196.

Horn of plenty. See *horn*. =Syn. *Plenty, Abundance, Replenishment, Profusion.* These words are in the order of strength. *Plenty* is a full supply, all that can possibly be needed. *Abundance* is a great plenty, as much as can be wanted or more. *Replenishment* is an overflowing plenty, an abundance that bursts out with fullness: as, the *replenishment* of the harvest. *Profusion* is a plenty that is poured or scattered abroad; *profusion* naturally applies to a large number of units: as, a *profusion* of food; a *profusion* of things to eat. *Replenishment* and *profusion* may mean an amount that needs to be restrained or reduced. See *ample*.

Enough is a *plenty*.
Old proverb.
All they did cast in of their *abundance*; but she of her want.
Mark xii. 44.

With an *exuberance* of thought and a splendour of diction which more than satisfied the highly raised expectation of the audience, he [Burke] described the character and institutions of the natives of India.
Macaulay, Warren Hastings.

One boundless blush, one white-empurpled shower
Of mingled blossoms, where the raptur'd eye
Hurries from joy to joy, and hid beneath
The fair *profusion*, yellow Autumn spices.
Thomson, Spring, I. 112.

II. *a.* Being in abundance; plentiful: *plentiful* an elliptical use of the noun, now chiefly colloquial.

Thad ordeyned hir a littir vpon two palfrayes, and leide ther-yne fresch gras and erbes *plente* and clothes, and than leide hir ther-yne softly.

Merlin (E. E. T. S.), II. 301.

For he maye not lese at the moost but a lyne or an hoke: of whyche he maye haue store *plentes* of his owne makinge, as this symple treatise shall teche hym.

Juliana Berners, Treatise of Fysynghe, fol. 2.

They seem formed for those countries where shrubs are *plenty* and water scarce.
Goldsmith.
When labourers are *plenty*, their wages will be low.
Franklin.

plenum (plé-num), *n.* [*< L. plenum, neut. of plenus, full: see plenty.*] 1. The fullness of matter in space: the opposite of *vacuum*: also

used to denote fullness in general.—2. A quantity of a gaseous body in an inclosed space greater than would remain there under normal atmospheric pressure.—**Plenum method** (or **system**) of ventilation, a system in which the air is forced by artificial means into the space to be ventilated, while vitiated or heated air is forced out by displacement.

plenytidet, *n.* [Irreg. (appar. after *plenitude*) *< L. plenus, full, + E. tide.*] A full tide; flood-tide.

Let rowling teares in *pleny-tides* oreflow,
For loose of England's second Cicerō.
Greene, Groats-worth of Wit.

pleochroic (plē-ō-kro'ik), *a.* [*< Gr. πλεων, πλειων, more, + χρώα, color, + -ic.*] Exhibiting pleochroism. The epithet includes *dichroic* and *trichroic*. Also *pleochromatic*, *pleochroous*, *polychroic*.—**Pleochroic halo** or **aureole**, a spot within a mineral (for example, biotite) characterized by strong pleochroism. Such spots are frequently observed in sections when examined under the microscope, and are usually immediately associated with microscopic inclusions.

pleochroism (plē-ōk'rō-izm), *n.* [*< pleochroic + -ism.*] In *crystal*, the variation in color observed in some crystals when viewed in different directions, due to the fact that the rays having vibrations in different planes suffer absorption in different degrees. In general, a uniaxial crystal may be *dichroic*, or have two axial colors, corresponding respectively to the ordinary ray, whose vibrations are transverse to the axis, and the extraordinary ray, with vibrations parallel to this axis; biaxial crystals may be *trichroic*, and the axial colors are generally taken as those determined by the absorption of the rays which are propagated by vibrations parallel to the three axes of elasticity. Tourmalin is a striking example of a dichroic species, epidote and hornblende of trichroic species. A more general epithet for both is *pleochroic*.

pleochromatic (plē-ō-kro-mat'ik), *a.* [*< Gr. πλεων, πλειων, more, + χρώμα(-), color, + -ic.*] Same as *pleochroic*.

pleochromatism (plē-ō-kro-ma-tizm), *n.* [*< pleochromatic + -ism.*] Same as *pleochroism*.

pleochroous (plē-ōk'rō-us), *a.* [*< pleochroic + -ous.*] Same as *pleochroic*.

pleodont (plē-ō-dont), *a.* [*< Gr. πλέων, full, + δόντις (δόντ-) = E. tooth.*] Solid-toothed: opposed to *caelodont*.

pleomastia (plē-ō-mas'ti-ā), *n.* [NL., *< Gr. πλεων, more, + μαστός, one of the breasts.*] The presence of more than one nipple to one mammary gland.

pleomazia (plē-ō-mā'zi-ā), *n.* [NL., *< Gr. πλεων, πλειων, more, + μαζός, Ionic and epic for μαστός, one of the breasts.*] The presence of a greater number of mammary glands than is normal.

pleomorphic (plē-ō-mōr'fik), *a.* [*< pleomorph-y + -ic.*] Same as *pleomorphous*. E. R. Lankester, Nature, XXXIII. 413.

pleomorphism (plē-ō-mōr'fiz-m), *n.* [*< pleomorph-y + -ism.*] 1. Same as *polymorphism*. Nature, XXX. 433.—2. Same as *pleiomorphism*.

pleomorphous (plē-ō-mōr'fus), *a.* [*< pleomorph-y + -ous.*] Having the property of pleomorphism; polymorphic.

pleomorphy (plē-ō-mōr-fi), *n.* [*< Gr. πλεων, πλειων, more, + μορφή, form.*] 1. Same as *polymorphism*.—2. Same as *pleiomorphism*.

pleon¹ (plē-on), *n.* [NL., *< Gr. πλεων, πλειων, more: see plus.*] In bot., a term proposed by Nägeli for those aggregates of molecules which cannot be increased or diminished in size without changing their chemical nature, as distinguished from *micelle*, or aggregates that can be so increased or diminished. See *micella*.

pleon² (plē-on), *n.* [NL., *< Gr. πλεων, ppr. of πλέω, πλείω, sail, swim.*] 1. In *Crustacea*, the abdomen: distinguished from *cephalon* (head) and *perceon* (thorax). C. Spence Bate, Encyc. Brit., VI. 634.—2. The tail-spine or telson of some crustaceans, as the king-crab: so named by Owen, on the supposition that it represents the abdomen: correlated with *thoracetron* and *cephalotron*.

pleonal (plē-ō-nal), *a.* [*< pleon² + -al.*] Of or pertaining to the pleon or abdomen of a crustacean. [Rare.]

pleonasm (plē-ō-naz-m), *n.* [= F. *pléonasme* = Sp. *Pl. It. pleonasmus, < L. pleonasmus, < Gr. πλεονασμός, abundance, exaggeration, in gram. pleonasm, < πλεονάζειν, be or have too much, abound, < πλεων, πλειων, more, compar. of πολυς, much: see plus.*] 1. Redundancy of language; the use of more words than are necessary to express an idea. Pleonasm may be justifiable when the intention is to present thoughts with particular perspicuity or force.

The first surplusage the Greeks call *Pleonasmus* (I call him too full speech) and is no great fault: as if one should say, I heard it with mine ears, and saw it with mine eyes, as if a man could hear with his heels, or see with his nose.
Puttenham, Arte of Eng. Poesie, p. 264.

2. A redundant phrase or expression; an instance of redundancy of language.

Harsh compositions, *pleonasm* of words, tautological repetitions.
Burton, Anat. of Mel., p. 26.

3. In *med.*, excess in number or size. =Syn. 1. *Pleonasm, Verbosity, Tautology, Circumlocution, Periphrasis, Verbiage, Redundancy.* "By *pleonasm* is meant the employment of more words than usual, or of redundant words. When properly employed, it is productive of a high degree of emphasis. . . . By *verbosity* is meant an excessive use of words; it arises from a natural gift of fluent expression, which has not been sufficiently chastened and corrected. . . . *Tautology* arises from verbosity, and may be defined as the repetition of the same idea in different words. . . . *Circumlocution* is another characteristic of verbosity; it means a roundabout mode of speech, where, instead of a direct statement of meaning, the words are multiplied to an unnecessary extent. When properly employed, this is a recognized figure of speech, *periphrasis*. . . . *Periphrasis* is also known as *circumlocution*, but the term *periphrasis* generally refers to those cases where the figure is used with effect, while *circumlocution* refers to its faulty use. *Periphrasis* may be defined as naming a thing indirectly by means of some well-known attribute, or characteristic, or attendant circumstance." J. De Mille, Rhetoric, §§ 27, 28, 29, 132, 218. *Verbiage* and *verbosity* are contemptuous words, *verbiage* being more often applied to the things said or written than are *verbosity*: as, his speech was mere *verbiage*. *Pleonasm* and *periphrasis* are terms of rhetoric, with some general use; the others are in common use. *Redundancy* expresses without contempt the fact that more words are used than are necessary.

A work on style might fitly take, from these documents which our Government annually lays before all the world, warning instances of confusions, and illogicalities, and *pleonasm*.
H. Spencer, Study of Sociol., p. 208.

A relentless clock that has curbed the exuberant verbosity of many a lecturer before me. Nature, XXX. 185.

"In fine," added he, with his usual tautology, "it is right that a man should do his duty."

Molloy, Dutch Republic, I. 279.

The *circumlocutions* which are substituted for technical phrases are clear, neat, and exact.
Macaulay, Dryden.

As the master [Pope] had made it an axiom to avoid what was mean and low, so the disciples endeavored to escape from what was common. This they contrived by the ready expedient of the *periphrasis*. They called everything something else.
Lowell, Study Windows, p. 392.

Verbiage may indicate observation, but not thinking.
Irving.

He [Wordsworth] . . . lacked the critical sagacity or the hardy courage to condemn and strip away his own redundancies.
D. G. Mitchell, Bound Together, p. 194.

pleonast (plē-ō-nast), *n.* [*< LGr. πλεοναστος, abundant, < Gr. πλεονάζειν, abound: see pleonasm.*] One who uses more words than are needed; one given to redundancy in speech or writing.

Ere the mellifluous *pleonast* had done oiling his paradox with fresh polysyllables . . . he met with a curious interruption.
C. Reade, Hard Cash, xxv. (Davies.)

pleonaste (plē-ō-nast), *n.* [So called in allusion to the four facets sometimes found on each solid angle of the octahedron; *< LGr. πλεοναστος, abundant, rich, < Gr. πλεονάζειν, abound: see pleonasm.*] In *mineral.*, same as *ceylonite*. See *spinel*.

pleonastic (plē-ō-nas'tik), *a.* [= Sp. *pleonástico* = Pg. *pleonástico, < Gr. πλεοναστικός, redundant, < πλεοναστος, verbal adj. of πλεονάζειν, abound: see pleonasm.*] Characterized by pleonasm or redundancy; of the nature of pleonasm; redundant.

pleonastical (plē-ō-nas'ti-kal), *a.* [*< pleonastic + -al.*] Same as *pleonastic*.

pleonastically (plē-ō-nas'ti-kal-i), *adv.* In a pleonastic manner; with redundancy.

pleonexia (plē-ō-nek'si-ā), *n.* [NL., *< Gr. πλεονέχεια, greediness, < πλεονέκτης, greedy, grasping, having or claiming more than one's due, < πλεων, πλειων, more, + έχειν, hold, have.*] Morbid greediness or selfishness.

pleopod (plē-ō-pod), *n.* [*< Gr. πλέω, swim, + πούς (πόδ-) = E. foot.*] One of the abdominal limbs of a crustacean; a swimmeret. The pleopods are the typical natatory limbs, or swimming-feet, succeeding the pereopods or walking-feet.

pleopodite (plē-ōp'ō-dit), *n.* [*< pleopod + -ite.*] A pleopod.

pleroma (plē-rō-mā), *n.* [NL., *< Gr. πλήρωμα, a filling up, < πληροῖν, fill up, < πλήρης, full: see plenty.*] 1. Fullness; abundance; plenitude: in *gnosticism*, the spiritual world, or world of light, including the body of eons.

In his system he [Heracleon] appears to have regarded the divine nature as a vast abyss in whose *pleroma* were eons of different orders and degrees—emanations from the source of being.
Encyc. Brit., XI. 681.

2. In bot., same as *plerome*.

pleromatic (plē-rō-mat'ik), *a.* [*< pleroma(-t) + -ic.*] Pertaining to the *pleroma* or fullness of divine being.

plerome (plē-rōm), *n.* [NL. (Hanstein, 1868), *< Gr. πλήρωμα, a filling up: see pleroma.*] 1. In *gnosticism*, same as *pleroma*.—2. In bot., the cylinder or shaft of nascent fibrovascular ele-

ments at the growing-points of the axis of plants.

Enclosed by this [the periblem] is a central cellular mass, out of which the fibro-vascular bundles and the structures of the central part of the shoot or root are formed; this has been termed *plerome*. *Encyc. Brit.*, IV. 92.

plerome-sheath (plē-rōm-shēth), *n.* In *bot.*, a limiting layer of surrounding cellular tissue which incloses ordinarily a group of fibrovascular bundles: with some authors the same as *bund'e-sheath*.

pleromorph (plē-rō-mōrf), *n.* [*Gr.* πλέρωμα, a filling up, + μορφή, form.] A kind of pseudomorph formed by the filling of a cavity left by the removal of a crystal of some species with another mineral or mineral substance.

plerophoria (plē-rō-fō-ri-ā), *n.* [*NL.*] Same as *plerophory*.

plerophory (plē-rof-ō-ri), *n.* [*NL.* *plerophoria*, *Gr.* πλέρωσις, full conviction, certainty, *πλέρωσις*, give full satisfaction or certainty, in pass. be fully convinced, *πλήρης*, full, + *φέρειν* = *E. bear*.] Full persuasion or confidence; perfect conviction or certitude. [*Rare.*]

Young men apprehend not the necessities of knowledge, old men presume of a *plerophory* and abundance.

Rev. T. Adams, Works, I. 317.

plesancee, **plesaucet**, *n.* Obsolete forms of *pleasance*.

pleasant, **pleasunt**, *a.* Obsolete forms of *pleasant*.

pleasht, *n.* An obsolete variant of *plash*.

Plesiartomys (plē-si-ārk-tō-mis), *n.* [*NL.*, *Gr.* πλεσιος, near, + *NL.* *Arctomys*, q. v.] A Miocene genus of sciuriform rodents, somewhat resembling marmots.

Plesiochelyidae (plē-si-ō-kē-lī-i-dē), *n. pl.* [*NL.*, *Gr.* πλεσιόχελυς + *-idae*.] A family of pleurodorous turtles, typified by the genus *Plesiochelys*. They were distinguished by the total absence of the mesoplastral element in the plastron and the union of the pubis above with the epiplastral. They were of Mesozoic age.

Plesiochelys (plē-si-ō-kē-lis), *n.* [*NL.*, *Gr.* πλεσιόχελυς, near, + *χέλυς*, a tortoise.] An extinct genus of turtles, typical of the family *Plesiochelyidae*.

plesiomorphic (plē-si-ō-mōr-fik), *a.* [*Gr.* πλεσιόμορφος + *-ic*.] Same as *plesiomorphous*.

plesiomorphism (plē-si-ō-mōr-fizm), *n.* [*Gr.* πλεσιόμορφος + *-ism*.] In *crystal.*, the relation of crystallized substances the forms of which closely resemble each other, but are not absolutely identical.

plesiomorphous (plē-si-ō-mōr-fus), *a.* [*Gr.* πλεσιόμορφος, near, + μορφή, form, + *-ous*.] Nearly alike in form; exhibiting plesiomorphism.

Plesiopidae (plē-si-ōp-i-dē), *n. pl.* [*NL.*, *Gr.* πλεσιόπιδες + *-idae*.] A family of acanthopterygian fishes, typified by the genus *Plesiops*, generally embraced in the family *Pseudochromididae*.

Plesiops (plē-si-ops), *n.* [*NL.*, *Gr.* πλεσιόπιδες, near, + *ὤψ*, eye, face.] A genus of pseudo-

Plesiops bleekeri.

chromidoid fishes, regarded by some as the type of a family *Plesiopidae*. It contains fishes of the Indian and Pacific oceans, as *P. bleekeri*.

plesiosaur (plē-si-ō-sār), *n.* An animal of the order *Plesiosauria*.

Plesiosauri (plē-si-ō-sā-ri), *n. pl.* [*NL.*, *pl.* of *Plesiosaurus*.] Same as *Plesiosauria*.

Plesiosauria (plē-si-ō-sā-ri-ā), *n. pl.* [*NL.*: see *Plesiosaurus*.] An order of extinct marine *Reptilia*, having the limbs fitted for swimming, the body fish-like, the neck long, and the head quite small. The fore and hind limbs both constitute flippers or paddles like those of cetacean mammals, having numerous phalanges inclosed in a common integument like a fin. The pectoral arch is complete, with triradiate scapular and large coracoid and clavicular elements, and the pelvis is large, with separate ilium, ischium, and pubis. There is no sternum, nor are there any sternal ribs, but floating ab-

dominal ribs are present. The skull has a fixed quadrate bone, one postorbital bar, and no free paroccipital; the vertebrae are amphicelous, with neurocentral sutures, and only two of them compose a sacrum. The ribs are one-headed. The eyeball has no sclerotic ring of bones, and the teeth are socketed in a single row in both jaws. The order contains many genera of gigantic fish-like saurians from the Trias, Lias, and Chalk, whose affinities are with the chelonians, notwithstanding the wide difference in form. The order is also called *Sauropterygia*, but *Plesiosauria* is its prior and proper name. See cut under *Plesiosaurus*.

plesiosaurian (plē-si-ō-sā-ri-an), *a. and n.* [*Gr.* πλεσιόσαυρος + *-an*.] *I. a.* Of or pertaining to the *Plesiosauria*; plesiosaurid; sauropterygian.

II. n. A member of the *Plesiosauria*; a plesiosaur.

Plesiosauridae (plē-si-ō-sā-ri-dē), *n. pl.* [*NL.*, *Gr.* πλεσιόσαυρος + *-idae*.] A family of gigantic animals represented by the genus *Plesiosaurus* and related forms, having both fore and hind limbs perfectly natatory. The pterygoids diverge backward, and do not overlie the basisphenoid, and there are small infra-orbital vacuities in the palate. They lived from the uppermost Triassic to the Cretaceous epoch. Some of the species were of huge dimensions.

plesiosaurid (plē-si-ō-sā-roid), *a.* [*Gr.* πλεσιόσαυρος + *-oid*.] Resembling a plesiosaur; plesiosaurian. *Owen.*

Plesiosaurus (plē-si-ō-sā-rus), *n.* [*NL.* (*Conybeare*), *Gr.* πλεσιόσαυρος, near, + *σαῦρος*, lizard.] A

Skeleton of *Plesiosaurus*, with diagrams of the more important parts.

[*NL.*, *Gr.* πλεῦρα, a rib, in *pl.* (also in sing.), the side, side of a triangle, a page of a book; cf. neut. *πλευρῶν*, a rib, *pl.* *πλευρά*, the ribs, the side.] 1. The principal serous membrane of the thorax; the shut sac, having a serous surface, which lines the walls of the chest, and is reflected over the surface of each lung. There are two pleurae, right and left, completely shut off from each other. Each is divided into a parietal or costal layer and a visceral or pulmonary layer. (See the phrases below.) Like the other serous membranes, the pleurae are moistened with a serous secretion, which serves to facilitate the movements of the lungs in the chest. See cuts under *peritonæum* and *thorax*.

2. In *conch.*, one of the lateral tracts on each side of the rachis of the lingual ribbon of the odontophore: generally used in the plural.

The teeth of the *pleurae* are termed *uncini*: they are extremely numerous in the plant-eating gastropods. *Woodward*.

3. In *compar. anat.*, the lateral portion of one of the rings composing the integument of an arthropod or articulate animal, lying between the tergum and sternum, and in insects and crustaceans consisting of two pieces, the epimeron and episternum. In descriptive entomology the term is generally restricted to the side of the thorax, as in *Diptera*.—Cavity of the pleura, the space between the parietal and pulmonary layers of the pleura. In the normal state these layers are in contact. See cut under *thorax*.—Parietal pleura. (a) Same as *pleura costalis*. (b) All the parts of the pleura except the pulmonary portion.—Pericardial pleura. See *pericardial*.—Pleura costalis, the costal part of the pleura, lining the walls of the thorax.—Pleura mediastinalis, that part of the pleura which enters into the formation of the mediastinum.—Pleura pericardiacæ. Same as *pericardial pleura*.—Pleura phrenica, that part of the pleura which invests the upper surface of the diaphragm; the diaphragmatic pleura.—Pleura pulmonalis, the pulmonary or visceral part of the pleura, investing the lungs.—

Pleuracanthidae (plō-ra-kan'thi-dē), *n. pl.* [NL., < *Pleuracanthus* + *-idae*.] A family of fishes of the order *Xenacanthini*, typified by the genus *Pleuracanthus*. The body was moderately long; the head roundish; the mouth terminal and well slit; the dorsal double, the first short, armed with an anterior spine, and mostly above the head, the second extending from the first to the caudal fin; the anals were double, and the caudal was long and diphycercal; the pectorals had a biserial arrangement of cartilaginous rays, and the ventrals were shark-like; the teeth had two divergent cones and an intermediate denticle. The species lived during the Carboniferous and Permian periods.

Pleuracanthini (plō-ra-kan-thi'ni), *n. pl.* [NL., < *Pleuracanthus* + *-ini*.] An order of fishes otherwise called *Xenacanthini* and *Ichthyotomi*. See *Xenacanthini*.

pleuracanthoid (plō-ra-kan'thoid), *a. and n.*
I. *a.* Of or resembling the *Pleuracanthidae*.

II. *n.* A member of the family *Pleuracanthidae*.

Also *pleuracanth*.

Pleuracanthus (plō-ra-kan'thus), *n.* [NL. (Agassiz, 1837), < Gr. *πλευρόν*, a rib, + *ἀκανθα*, spine.] A remarkable extinct genus of fishes, typical of the family *Pleuracanthidae*.

pleural¹ (plō'ral), *a.* [*< pleura*¹ + *-al*.] Of or pertaining to a pleura or the pleurae: as, the pleural investment of the lungs; the pleural cavity; pleural effusion or adhesions. Also *pleuric*.

pleural² (plō'ral), *a.* [*< pleuron* + *-al*.] 1. Pertaining to a rib or a pleuron, or to the ribs or the pleura collectively; costal; situated on the side of the thorax or chest.—2. Lateral, in general; situated on the side of the body: correlated with dorsal, ventral, etc.—3. In arthropods, pertaining to an arthropod or pleurite: applied to the lateral limb-bearing section of an arthromere, between the sternite and the tergite. See cuts under *Brachyura* and *Trilobita*.

—4. Especially, in entom., lateral and thoracic: as, a pleural sclerite; a pleural segment of a thoracic somite.—Pleural facet of the movable pleura of a crustacean, the anterior part of a pleuron which is overlapped by the preceding pleuron in flexion of the body.—Pleural spine, a spine connected with a pleurite. *G. Bour.*

pleuralgia (plō-ral'ji-gā), *n.* [NL., < Gr. *πλευρά*, the side, + *ἀλγος*, pain.] Pain in the pleura or side; pleurodynia.

pleuralgic (plō-ral'jik), *a.* [*< pleuralgia* + *-ic*.] Pertaining to or affected with pleuralgia.

pleuralia (plō-rā'li-gā), *n. pl.* [NL., neut. pl. of *pleuralis*, < Gr. *πλευρά*, the side: see *pleural*¹, *pleural*².] In sponges, spicules forming a fur. *F. E. Schulze.*

pleurapophysis (plō-rap-ō-fiz'i-sis), *a.* [*< pleurapophysis* + *-al*.] Having the morphological character of a pleurapophysis; of the nature of a rib; costal; costiferous.

pleurapophyses (plō-rap-ō-fiz'i-sis), *n.; pl. pleurapophyses (-sēz). [NL., < Gr. *πλευρόν*, a rib, + *ἀπόφυσις*, a process: see *apophysis*.] A lateral process of a vertebra, having the morphological character of a rib, or forming a true rib. Such processes in the thoracic region of the spine are commonly highly developed, and movably articulated both with the centra and with the diapophyses of the thoracic vertebrae, and they are then ribs in an ordinary sense. They are mostly rudimentary in other parts of the spinal column, but sometimes are very evident, as in the cervical ribs of various vertebrates, including man. In man, in the neck, they bound the vertebral foramen in front, and produce the tubercles known as anterior on the transverse process. Pleurapophyses are also by some considered to be represented in the lateral mass of the human sacrum. Developed and movably articulated pleurapophyses, forming true ribs, often extend into the sacral as well as cervical region, as in various birds; and in all of this class more or fewer of them bear accessory processes called *uncinate*. (See cut under *epipleura*.) In serpents they run in unbroken series from head to tail, and assist in locomotion. (See *gastrotege*.) In some reptiles they support a pata-gium (see cut under *dragon*); in the cobra they spread the hood. In Owen's nomenclature the term *pleurapophysis* is restricted to the true bony part of a rib, the gristly part or costal cartilage being called *hemapophysis*. See cuts under *vertebra* and *endosteolite*.*

pleurarthron (plō-rār'thron), *n.; pl. pleurarthra* (-thrā). [NL., < Gr. *πλευρά*, a rib, + *ἄρθρον*, a joint.] The articulation of a rib. *Thomas, Med. Dict.*

pleurebolic (plō-rek-bol'ik), *a.* [*< Gr. πλευρά*, the side, + *ἐκβολή*, a throwing out: see *ebolic*.] Eversible or capable of protrusion by a forward movement of the sides of the containing tube, as an invert: correlated with *acrembolic*, and distinguished from *pleurembolic*. [Rare.]

It is clear that, if we start from the condition of full eversion of the tube and watch the process of introversion, we shall find that the *pleurebolic* variety is introverted by the apex of the tube sinking inward.

Lankester, Encyc. Brit., XVI. 652.

pleurembolic (plō-rem-bol'ik), *a.* [*< Gr. πλευρά*, the side, + *ἐμβολή*, a putting into: see *embolic*.]

Introversible or capable of being withdrawn by a backward movement of the parts into which it sinks, as an evert: correlated with *acrembolic*, and distinguished from *pleurebolic*. [Rare.]

It [the pleurebolic variety of eversion] may be called *acrembolic*, whilst conversely the *acrembolic* tubes are *pleurembolic*. *Lankester, Encyc. Brit., XVI. 652.*

pleuremchyma (plō-reng'ki-mā), *n.* [NL., < Gr. *πλευρά*, the side, + *ἐχχυμα*, what is poured in: see *enchymatous*, *parenchyma*.] In bot., the woody tissue of plants. See *wood-cell*.

pleuremchymatous (plō-reng-kim'a-tus), *a.* [*< pleuremchyma* + *-ous*.] Of, pertaining to, or of the nature of pleuremchyma.

pleuric (plō'rik), *a.* [*< pleura*¹ + *-ic*.] Same as *pleural*¹.

pleurisy (plō'ri-si), *n.* [Formerly also *plurisy*, partly associated (as in the equiv. ML. *plurior*, *pluritas*, *plethora*) with *L. plus* (gen. *pluris*), more, as if implying a plethora of blood; < F. *pleurésie* = Pr. *pleurezia* = Sp. *pleurestia* = Pg. *pleuriz* = It. *pleurista*, < LL. *pleuritis*, a later form of the reg. L. *pleuritis*: see *pleuritis*.] Inflammation of the pleura. It may be acute or chronic, and may or may not be accompanied by effusion. The effusion may be serous, seropurulent, purulent, or hemorrhagic. Also called *pleuritis*.

The *Pleuritis* stabs him with desperate foil
Beneath the ribs, where scalding blood doth boil.
Sylvestre, tr. of Du Bartas's Weeks, II. The Furies.

Virtue in a chafe should change her linen quick,
Lest *pleurisy* get start of providence.
Browning, Ring and Book, I. 194.

Dry pleurisy, pleurisy without effusion.

pleurisy-root (plō'ri-si-rōt), *n.* A plant of the milkweed family, *Asclepias tuberosa*: so named

1. Part of the inflorescence of *Pleurisy-root* (*Asclepias tuberosa*).
2. The root and the lower part of the stem. a, a flower; b, the anthers and the stigma; c, the fruit; d, a seed.

from its medicinal use. Also called *butterfly-weed*.

pleurite (plō'rit), *n.* [*< Gr. πλευρά*, the side, + *-ite*².] 1. In arthropods, a pleural sclerite; a lateral piece or segment of a somitic ring or somite, between the tergite and the sternite.—2. In a restricted sense, the lateral or pleural part of an abdominal segment of an insect.

pleuritic¹ (plō-rit'ik), *a.* [*< L. pleuriticus*, < Gr. *πλευριτικός*, suffering from pleurisy, < *πλευρις*, pleurisy: see *pleuritis*.] 1. Pertaining to or suffering from pleurisy: as, *pleuritic* symptoms or affections; a *pleuritic* patient.—2. Causing or bringing pleurisy.

For while the effluence of the skin maintains
Its native measure, the *pleuritic* Spring
Glides harmless by.
Armstrong, Art of Preserving Health, III.

pleuritic² (plō-rit'ik), *a.* [*< pleurite* + *-ic*.] 1. In arthropods, of or pertaining to a pleurite; pleural, as a segment of a somite.—2. In entom., specifically, lateral or pleural and abdominal; of or pertaining to a pleurite.

pleuritical (plō-rit'i-kal), *a.* [*< pleuritic*¹ + *-al*.] Same as *pleuritic*¹.

pleuritis (plō-ri'tis), *n.* [NL., < L. *pleuritis*, < Gr. *πλευρις*, pleurisy (cf. *πλευρις*, on or at the side), < *πλευρά*, the side: see *pleura*¹.] Same as *pleurisy*.

pleuroblastic (plō-rō-blas'tik), *a.* [*< Gr. πλευρά*, the side, + *βλαστός*, a germ.] In bot., in the *Peronosporae*, producing vesicular lateral outgrowths which serve as haustoria. *De Bary.*

Pleurobrachia (plō-rō-brā'ki-gā), *n.* [NL., < Gr. *πλευρά*, the side, + *βραχίον*, the arm.] A genus of ctenophorans: same as *Cydippe*, 1.

pleurobranchia¹ (plō-rō-brang'ki-gā), *n.; pl. pleurobranchiae (-ē). [NL., < Gr. *πλευρά*, the*

side, + *βράχια* (NL. *branchiae*, sing. *branchia*), gills.] A pleural gill; a branchial organ borne upon an epimeron of any thoracic segment of a crustacean. Some of the thoracic segments, as in the crawfish, may bear on each side four branchiae, a coxopoditic podobranchia, anterior and posterior arthrobranchiae, and epimeral pleurobranchiae.

Pleurobranchia² (plō-rō-brang'ki-gā), *n. pl.* [NL., < Gr. *πλευρά*, the side, + *βράχια*, gills.] Same as *Pleurobranchiata*. *J. E. Gray, 1821.*

pleurobranchial (plō-rō-brang'ki-gā), *a.* [*< pleurobranchia*¹ + *-al*.] Of or pertaining to a pleurobranchia: as, a *pleurobranchial* process.

Pleurobranchiata (plō-rō-brang'ki-ā'tā), *n. pl.* [NL., neut. pl. of *pleurobranchiatus*: see *pleurobranchiate*.] An order of opisthobranchiate gastropods, whose gills are tufts on the sides under a fold of the mantle, and which have generally a spiral shell in the adult as well as the young. Also *Pleurobranchia*, *Tectibranchiata*.

pleurobranchiate (plō-rō-brang'ki-ā'tā), *a.* [*< NL. pleurobranchiatus*, < Gr. *πλευρά*, the side, + *βράχια*, gills.] 1. Having pleurobranchiae, as a crustacean.—2. Having gills along the sides; specifically, pertaining to the *Pleurobranchiata*, or having their characters.

Pleurobranchidae (plō-rō-brang'ki-dē), *n. pl.* [NL., < *Pleurobranchia* + *-idae*.] A family of notaspidean nudibranchiate gastropods, typified by the genus *Pleurobranchus*. They have distinct buccal tentacles forming a veil, branchiae on the right side of the body under the border of the mantle, a probosciform mouth, and numerous falciform marginal teeth on the radula.

Pleurobranchus (plō-rō-brang'kus), *n.* [NL., < Gr. *πλευρά*, the side, + *βράχια*, gills.] A genus of nudibranchiata, typical of the family *Pleurobranchidae*.

Pleurocarpi (plō-rō-kār'pī), *n. pl.* [NL., < Gr. *πλευρά*, the side, + *καρπός*, fruit.] A division of bryaceous mosses in which the fructification is lateral on the stems, having proceeded from the axils of the leaves. Sometimes called *Pleurocarpæ*.

pleurocarpon (plō-rō-kār'pus), *a.* [*< Gr. πλευρά*, the side, + *καρπός*, fruit.] In bot., having the fructification proceeding laterally from the axils of the leaves, as in some mosses. *Sachs.*

pleurocele (plō-rō-sēl), *n.* [*< Gr. πλευρά*, the side, + *κῆλη*, tumor.] Same as *pneumocoele*.

pleurocentral (plō-rō-sen'tral), *a.* [*< pleurocentrum* + *-al*.] Of or pertaining to a pleurocentrum; hemicentral.

pleurocentrum (plō-rō-sen'trum), *n.; pl. pleurocentra (-trā). [NL., < Gr. *πλευρά*, the side, + *κέντρον*, the center.] One of the lateral elements of the centrum of a vertebra; a hemicentrum.*

Pleurocera (plō-rōs'g-rā), *n.* [NL., < Gr. *πλευρά*, the side, + *κέρας*, horn.] A genus of American fresh-water univalves, typical of the family *Pleuroceridae*. Also called *Trypanostoma*.

pleurocerebral (plō-rō-ser'ē-bral), *a.* [*< Gr. πλευρά*, the side, + *L. cerebrum*, the brain: see *cerebral*.] Connecting the side of the body with the head: specifically, in mollusks and some other invertebrates, noting a nervous cord connecting a cerebral with a pleural ganglion.

Pleuroceridae (plō-rō-ser'ē-dē), *n. pl.* [NL., < *Pleurocera* + *-idae*.] A family of tanioglossate gastropods, typified by the genus *Pleurocera*. It comprises a great number of species, mostly occurring in the fresh waters of the United States, referred by the old writers to the melanians. They are distinguished, however, by their unfringed mantle, want of a distinct male organ, and oviparity. Also called *Ceriphasidae* and *Streptomatidae*.

pleurocoele (plō-rō-sēl), *n.* [*< Gr. πλευρά*, the side, + *κοίλον*, a hollow, neut. of *κοίλος*, hollow.] One of two lateral spaces of the posterior part of the splanchnocoel of a brachiopod.

I propose to give the name *pleurocoele* to these spaces, simply from their position as side chambers.
Davidson, Trans. Linn. Soc., XIV. III. 210.

pleurocolic (plō-rō-kol'ik), *a.* [*< Gr. πλευρόν*, a rib, + *L. colon*, colon: see *colon*².] Same as *costocolic*.—**Pleurocolic ligament**. Same as *costocolic ligament* (which see, under *costocolic*).

pleurocollesia (plō-rō-ko-lē'sis), *n.* [NL., < Gr. *πλευρά*, the side, + *κόλλησις*, a gluing, < *κόλλω*, glue, < *κόλλα*, glue.] Adhesion of the pleura.

Pleuroconchæ (plō-rō-kong'kē), *n. pl.* [NL., < Gr. *πλευρά*, the side, + *κόγχη*, a mussel, shell.] A suborder of inequivalve *Conchifera*, comprising the families *Aviculidae*, *Pectinidae*, *Spondyliidae*, *Ostreidae*, and *Chamidae*.

Pleurobranchus membranaceus.

Pleurodeles (plō-rōd'ē-lēz), *n.* [NL.] A genus of tailed amphibians, typical of the family *Pleurodelidae*.

Pleurodelidae (plō-rō-del'ē-dē), *n. pl.* [NL., < *Pleurodeles* + *-idae*.] A family of gradient or tailed amphibians, typified by the genus *Pleurodeles*. They have palatine teeth in two longitudinal series diverging behind, inserted on the inner margin of two palatine processes, which are much prolonged posteriorly; the parasphenoid toothless; and a postfrontal arch, sometimes ligamentous.

Pleurodira (plō-rō-dī'rā), *n. pl.* [NL.: see *Pleurodires*.] A superfamily of tortoises with the neck bending in a horizontal plane, and pelvis ankylosed to carapace and plastron. It includes the recent families *Sternotheridae*, *Podocnemididae*, *Chelydridae*, and several extinct ones. *Chelodines* is a synonym.

pleurodiran (plō-rō-dī'ran), *a.* Same as *pleurodirous*. *Amer. Nat.*, XXII. 36.

Pleurodires (plō-rō-dī'rēz), *n. pl.* [NL., < Gr. *πλευρά*, the side, + *δέρω*, the neck.] In Gray's classification, a suborder of tortoises whose necks bend sidewise; the pleurodirous tortoises: same as *Pleurodira*. See cut under *Chelydridae*.

pleurodrous (plō-rō-dī'rus), *a.* [< Gr. *πλευρά*, the side, + *δέρω*, the neck.] In *Chelonia*, bending the neck sidewise: noting those tortoises, as the matamoras, which thus fold the head and neck in the shell: opposed to *cryptodirous*. See cut under *Chelydridae*.

pleurodiscous (plō-rō-dis'kus), *a.* [< Gr. *πλευρά*, the side, + *δίσκος*, a disk.] In *bot.*, attached to the sides of a disk.

pleurodont (plō-rō-dont), *a. and n.* [< NL. *pleurodon* (*pleurodont*), < Gr. *πλευρά*, the side, + *ὀδών* (*odont*) = *E. tooth*.] *I. a.* 1. Ankylosed to the side of the socket, as teeth; laterally fixed

Anterior Part of Right Ramus of Lower Jaw of an Iguana, showing Pleurodont Dentition.

in the jaw: distinguished from *acrodont*.—2. Having or characterized by pleurodont teeth or dentition, as a lizard; belonging to the *Pleurodontes*; not *acrodont*: as, a *pleurodont* reptile.

II. n. A pleurodont lizard; a member of the *Pleurodontes*.

Pleurodontes (plō-rō-don'tēz), *n. pl.* [NL., *pl.* of *pleurodon* (*pleurodont*): see *pleurodont*.] A group of pleurodont lizards, comprising such as the American iguanoids. *J. Wagler*, 1830.

pleurodynia (plō-rō-dīn'ē-jā), *n.* [NL., < Gr. *πλευρά*, the side, + *δύνη*, pain.] In *pathol.*, pain in the muscles of the chest.

pleuro-esophagus (plō-rō-ē-sō-fā-jē-us), *n.* [NL., < Gr. *πλευρά*, the side, + *οἰσόφαγος*, esophagus.] A band of smooth muscle-fibers connecting the left pleura behind with the esophagus.

pleurogenic (plō-rō-jen'ik), *a.* [< Gr. *πλευρά*, the side, + *-γενής*, produced: see *-genous*.] Originating from the pleura: as, *pleurogenic* phthisis.

pleurogynous (plō-roj'i-nus), *a.* [< Gr. *πλευρά*, the side, + *γυνή*, female (in mod. bot. pistil).] In *bot.*, having a glandular or tubercular elevation rising close to and parallel with the ovary.

pleurogyrate (plō-rō-jī-rāt), *a.* [< Gr. *πλευρά*, the side, + *L. gyratus*, pp. of *gyrare*, turn: see *gyrate*.] In *bot.*, having the ring on the theca (of ferns) placed laterally.

pleurogyratus (plō-rō-jī-rā-tus), *a.* [< *pleurogyrate* + *-ous*.] Same as *pleurogyrate*.

pleurohepatitis (plō-rō-hep-a-tī'tis), *n.* [NL., < Gr. *πλευρά*, the side, + *ήπαρ* (*hepar*), liver, + *-itis*. Cf. *hepatitis*.] Inflammation of the liver and adjacent pleura.

pleuroid (plō'roid), *n.* [< Gr. *πλευρόν*, a rib, + *είδος*, form. Cf. Gr. *πλευροειδής*, adv., after the manner of ribs.] One of the pair of distinct pleural elements which compose the pleural arch of a vertebra; a pleurapophysis: correlated with *neuroid*. *G. Baur*, *Amer. Nat.*, XXI. 945.

pleurolepidal (plō-rō-lep'i-dal), *a.* [< NL. *Pleurolepis* (*-lepid-*) + *-al*.] Of or pertaining to the *Pleurolepididae*; having oblique rows of ribbed rhomboid scales interlocking. Each scale has upon its inner anterior margin a thick, solid, bony rib extending upward, and sliced off obliquely below, thus forming spines with the inverse parts of the upper and lower scales.

Pleurolepididae (plō'rō-le-pid'i-dē), *n. pl.* [NL., < *Pleurolepis* (*-lepid-*) + *-idae*.] A family of

fossil pycnodont fishes, typified by the genus *Pleurolepis*. By some they are united with the *Dapediidae*. The vertebral column was homocercal, the fins had fulcra, and the body was not very high. They flourished in the Liassic. Also *Pleurolepididae*.

Pleurolepis (plō-rol'e-pis), *n.* [NL., < Gr. *πλευρά*, the side, + *λεπίς*, a scale.] The typical genus of the *Pleurolepididae*, having rib-like rows of scales, whence the name. *Agassiz*.

Pleuroleura (plō-rō-lū'rā), *n.* [NL., < Gr. *πλευρά*, the side, + *λευρός*, smooth, level.] A genus of nudibranchiates, typical of the family *Pleuroleuridae*. Also called *Dermatobranchus*.

Pleuroleuridae (plō-rō-lū'ri-dē), *n. pl.* [NL., < *Pleuroleura* + *-idae*.] A family of inferobranchiate nudibranchiate gastropods, typified by the genus *Pleuroleura* (or *Dermatobranchus*). They are destitute of specialized branchiae, and respiration is effected by the skin. Also called *Dermatobranchidae*.

pleuromelus (plō-rom'e-lus), *n.*; *pl. pleuromeli* (-li). [NL., < Gr. *πλευρά*, the side, + *μέλος*, a limb.] In *teratol.*, a monster with supernumerary limbs attached to the lateral regions of the trunk.

Pleuromonadidae (plō'rō-mō-nad'i-dē), *n. pl.* [NL., < *Pleuromonas* (*-monad-*) + *-idae*.] A family of pantostomatous flagellate *Infusoria*, typified by the genus *Pleuromonas*. These animals are free-swimming, and naked or illoricate, and have a single lateral or dorsal flagellum and no distinct oral aperture.

Pleuromonas (plō-rom'ō-nas), *n.* [NL., < Gr. *πλευρά*, the side, + NL. *Monas*, < Gr. *μονάς* (*monad*), a unit: see *monad*.] The typical genus of *Pleuromonadidae*. *P. jaculans* is an example.

pleuron (plō'ron), *n.*; *pl. pleura* (-rā). [NL., < Gr. *πλευρόν*, a rib: see *pleura*.] A lateral piece, part, or aspect of the body; especially, the side of the thorax: chiefly used of invertebrates. Specifically—(a) In *Crustacea*, a lateral piece or part of any somite below the tergum and above the insertion of the legs; an epimeron. (b) In *Trilobita*, one of the flattened lateral sections of a thoracic or pygidial somite, lying on each side of the axis or tergum. See cut under *Trilobita*. (c) In *Entom.*, the lateral section of the thorax; the pleural part of any one of the three thoracic somites. There are consequently three pleura on each side, called from their position the *propleuron*, *mesopleuron*, and *metapleuron*, according to their respective seats on the prothorax, mesothorax, and metathorax.

Pleuronectes (plō-rō-nek'tē), *n. pl.* [NL., *pl.* of *Pleuronectes*.] The flatfishes. See *Pleuronectidae*.

Pleuronectes (plō-rō-nek'tēz), *n.* [NL. (Arctedi, Linnæus), < Gr. *πλευρά*, the side, + *νήπις*, a swimmer.] A genus of flatfishes, giving name to the family *Pleuronectidae*, formerly continuous with the family, later variously restricted. By most recent writers the name has been limited to the group typified by the common plaice, *P. platessa*, sometimes to the few species much like this type, sometimes extended to a larger assemblage. By others it has been used for the turbot, otherwise called *Bothus* and *Psetta*. By others still it has been employed for the genus otherwise called *Arnoglossus*. In a common European acceptance it includes flounders of northern seas, having the eyes and the color on the right side, the colored side of each jaw usually toothless, the blind side with close-set teeth in one (rarely two) series, the body ovate or elliptical, the small scales ctenoid or cycloid, the lateral line nearly straight or more or less arched anteriorly, and the small gill-rakers widely set. About 12 species of *Pleuronectes* in this sense are found in North America, a majority of them on the Pacific coast, as *P. (Platichthys) stellatus*, the California flounder, one of the largest and most important. *P. (Limanda) ferruginea* is the sand-dab of the Atlantic coast. *P. (Pseudopleuronectes) americanus* is the mud-dab or winter flounder, common on this coast from New York northward.

pleuronectid (plō-rō-nek'tid), *n. and a.* *I. n.* A flatfish; any member of the *Pleuronectidae*; a *pleuronectoid*.

II. a. Of or pertaining to the *Pleuronectidae*. **Pleuronectidae** (plō-rō-nek'ti-dē), *n. pl.* [NL., < *Pleuronectes* + *-idae*.] A family of teleostcephalous fishes, of the suborder *Heterosomata*, or flatfishes, or the *Anacanthini pleuronectoidei* of Günther, comprising the flatfishes or flounders.

Lepidopsetta bilineata, of California, one of the *Pleuronectidae*.

In the widest sense, it includes all the representatives of the suborder. The head is unsymmetrical, with both eyes on one side; one surface is colored, the other colorless; and

the dorsal and anal fins are long and soft. The genera are about 40 in number, with 400 species, mostly carnivorous, inhabiting sandy bottoms of all seas, sometimes ascending rivers, and including such important food-fishes as the halibut, turbot, plaice, and sole. With more restricted limits, it embraces those which have the general physiognomy of the plaice or halibut, distinctly outlined preopercle and other bones, little twisted mouth, generally subacute snout, and nostrils little dissimilar on two sides. It thus excludes the true soles and like fishes (see *Soleidae*). See also cuts under *halibut*, *plaice*, *flounder*, *Paralichthys*, *sole*, and *turbot*. Also *Pleuronectidae*.

pleuronectoid (plō-rō-nek'toid), *a. and n.* [< *Pleuronectes* + *-oid*.] *I. a.* Resembling a fish of the genus *Pleuronectes*; belonging to the *Pleuronectoidei* or *Pleuronectoidei*.

II. n. A member of the *Pleuronectoidei*; a *pleuronectoid*.

Pleuronectoidei (plō'rō-nek-toi'dē-i), *n. pl.* [NL.: see *pleuronectoid*.] Same as *Pleuronectoidei*.

pleuropathia (plō-rō-path'i-ā), *n.* [NL., < Gr. *πλευρά*, the side, + *πάθος*, suffering.] Disease of the pleura.

pleuropedal (plō-rō-ped'al), *a.* [< Gr. *πλευρά*, the side, + *L. pes* (*ped-*) = *E. foot*.] Connecting the side of the body with the foot: specifically said of a nervous cord which connects a pleural with a pedal ganglion, as in mollusks. Also *pedopleural*.

pleuropericarditis (plō-rō-per'i-kār-di'tis), *n.* [NL., < Gr. *πλευρά*, the side, + NL. *pericardium*, q. v., + *-itis*.] Inflammation of the pleura and the pericardium.

pleuroperipneumony (plō-rō-per-ip-nū'mō-ni), *n.* Same as *pleuropneumonia*.

pleuroperitoneal, pleuroperitonæal (plō-rō-per'i-tō-nē'al), *a.* [< *pleuroperitoneum* + *-al*.] In *zool.* and *anat.*, of or relating to the pleura and the peritoneum, or the general body-cavity or perivisceral cavity of a vertebrate animal when it is not divided by a partition (diaphragm) into a pleural or thoracic and a peritoneal or abdominal cavity. It is formed in the early embryo by the splitting of the laminae ventrales into inner or splanchnopleural and outer or somatopleural layers, and the union of the latter layers of right and left sides in the ventral midline of the body.

pleuroperitoneum, pleuroperitonæum (plō-rō-per'i-tō-nē'um), *n.* [NL., < Gr. *πλευρά*, the side, + *περιτόναιον*, peritoneum: see *peritoneum*.] A serous membrane, representing both pleura and peritoneum, which lines a pleuroperitoneal cavity, as in vertebrates below mammals.

Pleurorhthalmia (plō-rof-thal'mā), *n. pl.* [NL., < Gr. *πλευρά*, the side, + *ὄφθαλμός*, the eye.] A group of toxoglossate gastropods with the eyes at the external borders of the tentacles, comprising the families *Conidae*, *Pleurorhthalmidae*, and *Cancellariidae*.

pleuroplegia (plō-rō-plē'ji-ā), *n.* [NL., < Gr. *πλευρά*, the side, + *πληγή*, a stroke. Cf. *hemiplegia*.] Absence of the power of conjugate movement of the eyes to the right or left, though convergence may be preserved.

pleuropneumonia (plō'rō-nū-mō-ni-ā), *n.* [NL., < Gr. *πλευρά*, the side, + *πνεύμων*, lung: see *pleura* and *pneumonia*.] 1. A specific contagious disease, peculiar to cattle, affecting the lungs and the pleura, supposed to be caused by some form of micro-organism. It was recognized as far back as the eighteenth century, and now occurs in all the countries of western Europe, in the United States, in southern Africa, and in Australia. The losses which it causes are frequently enormous. The disease first appears in the interlobular tissue of the lungs, whence it invades the pleura and the lung-tissue proper. The latter becomes solidified, and dark-red in color, which varies in later stages. The interlobular tissue becomes thickened into broad yellowish or grayish bands, which give the cut surface of the lungs a peculiar marbled appearance. The disease may be limited to a single lobe or involve one entire lung. A lung becomes very heavy, weighing in some cases over fifty pounds. The disease appears after a period of incubation of from three to six weeks with a feeble cough, which grows more troublesome from week to week. There is slight fever, associated with partial cessation of rumination and milk-secretion. The back is arched and the head is stretched out horizontally during fits of coughing. After a period of from two to six weeks the animal may recover, or the disease may enter a second or acute stage, in which all the symptoms mentioned become greatly aggravated.

2. In *medicine*, pleurisy combined with *pneumonia*.

pleuropous (plō'rō-pus), *a.* [< Gr. *πλευρά*, the side, + *ποῖς* = *E. foot*.] In *bot.*, having side supports: noting in the genus *Polyporus* those species which have several supports or stipes instead of one as is usually the case. [Rare.]

Pleuroptera (plō-rop'tē-rā), *n. pl.* [NL., < Gr. *πλευρά*, the side, + *πτερόν*, wing.] A group of mammals, containing such as the *Galeopithecidae*, or so-called flying-lemurs (of the order *Insectivora*): so named from the lateral extension

of the skin, which forms a kind of parachute. See cut under *Galeopithecus*.

Pleurogygia (plō-rō-pij'i-ġ), *n. pl.* [NL., < Gr. πλευρά, the side, + γυγή, the rump, buttocks.] A division of *Brachiopoda*, containing the inarticulate or lycopomatous members of that class: contrasted with *Apygia*: same as *Lyopomala*.

pleurogygial (plō-rō-pij'i-ġ), *a.* [*Pleurogygia* + *-al*.] Of or pertaining to the *Pleurogygia*.

pleurohizal (plō-rō-rī-zal), *a.* [*Gr. πλευρά, the side, + ρίζα, root, + -al*.] In bot., having the embryo with the radicle against one edge of the cotyledons—that is, with the cotyledons accumbent. *Gray*.

pleurorrhea, pleurorrhœa (plō-rō-rē-ġ), *n.* [NL., < Gr. πλευρά, the pleura, + ροία, a flow, flux.] Effusion into the pleural cavity.

Pleurosauridae (plō-rō-sā-rī-dē), *n. pl.* [NL., < *Pleurosaurus* + *-idae*.] A family of extinct reptiles referred by some to the order *Rhynchocephalia*, and represented by the genus *Pleurosaurus*. They had an extremely elongated body with many preacral vertebrae, and a long narrow skull with all-like nares. Their remains have been found in the Kimmeridgian rocks of Bavaria.

Pleurosaurus (plō-rō-sā-rus), *n.* [NL., < Gr. πλευρόν, a rib, + σαύρος, lizard.] An extinct genus of lizard-like reptiles, typical of the family *Pleurosauridae*.

Pleurosigma (plō-rō-sig-mā), *n.* [NL., < Gr. πλευρά, the side, + σίγμα, the letter Σ, σ.] A genus of *Diatomaceae*, containing species in which the valves show, with a good microscope, a series of lines, capable, under high powers and a favorable light, of resolution into dots, and therefore furnishing excellent tests for the power of a microscope.

Pleurospandylia (plō-rō-spon-dil'i-ġ), *n. pl.* [NL., < Gr. πλευρόν, a rib, + σπώνδυλος, a vertebra.]

One of the primary groups into which *Reptilia* are divisible. It is characterized by the immobility of the dorsal vertebrae upon one another, and of the ribs upon these vertebrae (and by the absence of transverse processes from all the vertebrae), this fixity being secured by the union of superficial bony plates into which the ribs and vertebrae pass, forming a carapace, and further carried out by the development, in the ventral walls of the thorax and abdomen, of dermal bones, usually nine in number, of which one is median and asymmetrical, the others lateral and paired, the whole forming a plastron. The group contains the single order *Chelonio* or *Testudinata*, and is alone contrasted with *Herpetospondylia*, *Pero-spondylia*, and *Suchospondylia* collectively, which together include all other *Reptilia*. See these words; also cuts under *Chelonio*, *Chelonidae*, *carapace*, and *plastron*.

pleurospandylan (plō-rō-spon-dil'i-ġ), *a. and n.* [*Pleurospandylia* + *-an*.] I. *a.* Having the ribs fixed immovably upon the vertebrae; belonging to the *Pleurospandylia*, as a turtle or tortoise; chelonian; testudinatus. II. *n.* A member of the *Pleurospandylia*, as a turtle or tortoise.

pleurosteal (plō-rō-tē-āl), *a.* [*pleurosteon* + *-al*.] Lateral and costiferous, as a part of a bird's sternum; pertaining to the pleurosteon.

pleurosteon (plō-rō-tē-on), *n.*; *pl. pleurostea* (ē). [NL., < Gr. πλευρά, the side, + στέον, a bone.] In ornith., the anterior lateral piece of the breast-bone; that element of the sternum which forms the costal process and with which ribs articulate: distinguished from *lophosteon*, *caracosteon*, and *metosteon*. See cuts under *carinate* and *epipleura*.

Pleurosternidae (plō-rō-stēr-nī-dē), *n. pl.* [NL., < *Pleurosternum* + *-idae*.] A family of pleurodirous turtles, represented by the genus *Pleurosternum*. The plastron had a mesoplastral bone and an intergular shield, and the entoplastron was rhomboidal. The species lived during the Oolitic and Cretaceous periods.

Pleurosternum (plō-rō-stēr-num), *n.* [NL., < Gr. πλευρόν, rib, + στέρον, the chest.] A genus of extinct turtles, typical of the family *Pleurosternidae*.

pleurosthotonos (plō-rō-thot'ō-nos), *n.* Same as *pleurothotonos*.

pleurostict (plō-rō-stikt), *a.* [*Gr. πλευρά, the side, + στίκτος, verbal adj. of στίκω, prick, stab: see stigma*.] In entom.,

having the abdominal spiracles pleural, or situated on the dorsal part of the ventral segments; specifically, of or pertaining to the *Pleurosticta*: opposed to *laparostict*.

Dr. Horn exhibited seven species of *Pleocoma* from California, of which three were new, and supported the views of the late Dr. Le Conte of the position of this genus, which he insisted was a *Laparostict*, and not a *Pleurostict* Lamellicorn. *Amer. Naturalist*, XXII, 261.

Pleurosticta (plō-rō-stik'tā), *n. pl.* [NL., *pl. of pleurostictus*: see *pleurostict*.] In entom., one of the two main divisions of the family *Scarabæidae*, including those forms which have the abdominal spiracles (except the anterior ones) situated in the dorsal part of the abdominal segments, forming rows which diverge strongly, and with the last spiracle usually visible behind the elytra. The ligula is always connate with the mentum, and the larvae have the lobes of the maxillae connate. The other main division is *Laparosticta*. Also *Pleurosticta*.

pleurothotonic (plō-rō-thō-ton'ik), *a.* [*pleurothotonos* + *-ic*.] Pertaining to, of the nature of, or affected with *pleurothotonos*.

pleurothotonos (plō-rō-thot'ō-nos), *n.* [NL., < Gr. πλευρόν, from the side (< πλευρά, the side, + -θεν, from, an adverbial suffix), + τόνος, tension: see *tone*.] Tonic spasm in which the body is bent sidewise: correlated with *emprothotonos* and *opisthotonos*.

Pleurotomaria (plō-rō-tō-mā-ri-ġ), *n.* [NL. (Lamarck, 1801), < Gr. πλευρά, the side, + -τομα, < τέμνειν, raise, cut.] In conch., the typical genus of *Pleurotomidae*: so called from the notch or slit in the outer lip of the aperture. Formerly the name was used for all the members of the family, but it is now restricted to forms more or less like *P. babylonica*.

Pleurotomaria (plō-rō-tō-mā-ri-ġ), *n.* [NL. (DeFrance, 1826), < Gr. πλευρά, the side, + -τομα, prop. dim. of τέμνω, a cut, slice, < τέμνειν, raise, cut.] The typical genus of *Pleurotomariidae*.

Pleurotomariidae (plō-rō-tō-mā-ri-ġ), *n. pl.* [NL., < *Pleurotomaria* + *-idae*.] A family of scutibranchiate gastropods, typified by the genus *Pleurotomaria*.

The animal has the muzzle simple; there is no frontal veil, the tentacles are simple, and the eyes on pedicels exterior to their bases; two nearly symmetrical gills are developed, and lateral fringes, but no cirri, project from the sides; the shell is trochiform, and has a deep slit in the outer lip, leaving a fasciole on the completed whorls; the operculum is horny and multispiral or subspirally. Four living species, inhabiting deep tropical seas, are known, and many extinct species, ranging from the Silurian epoch upward, as the Liassic *Pleurotomaria anglica*. An ancient genus, ranging from the Devonian to the Trias, is *Porcellia*, of which a typical species is *P. puzosi*.

pleurotomarioid (plō-rō-tō-mā-ri-oid), *a. and n.* I. *a.* Of or relating to the *Pleurotomariidae*.

II. *n.* A species of the family *Pleurotomariidae*.

Pleurotomidae (plō-rō-tō-mī-dē), *n. pl.* [NL., < *Pleurotoma* + *-idae*.] A family of toxoglossate gastropods, typified by the genus *Pleurotoma*. Most of them have the shell spindle-shaped, with a prolonged canalliculate aperture notched near the suture. It contains about 500 species, sometimes known as *fenestre-shells*. See cuts under *Lacheis* and *Pleurotoma*.

pleurotomine (plō-rō-tō-mīn), *a.* [*Pleurotoma* + *-ine*.] Of or related to shells of the genus *Pleurotoma*.

pleurotomoid (plō-rō-tō-mīd), *a. and n.* [*Pleurotoma* + *-oid*.] I. *a.* Of or relating to the *Pleurotomidae*.

II. *n.* A shell of the family *Pleurotomidae*.

pleurotransversalis (plō-rō-trans-vēr-sā'lis), *n.*; *pl. pleurotransversales* (-lēz). [NL., < Gr. πλευρά, the pleura, + NL. transversalis, q. v.] An anomalous muscular slip arising from the transverse process of the seventh cervical vertebra, and inserted into the top of the pleural sac.

pleurotribe (plō-rō-trīb), *a.* [*Gr. πλευρά, the side, + τριβω, rub*.] In bot., touching the side: said of certain zygomorphic flowers, especially adapted for cross-fertilization by external aid, in which the stamens and styles are so arranged or turned as to strike the visiting

insect on the side. Such flowers are especially adapted to bees. *Phaseolus*, *Lathyrus sylvestris*, and *Polypogon monspeliensis* are examples. Compare *nototribe* and *sternotribe*.

pleurotropous (plō-rōt'ō-rō-pus), *a.* [*Gr. πλευρά, the side, + τρέπω, turn*.] In bot., having the faces flat: noting the stems of certain species of *Selaginella*. Compare *goniotropous*.

pleurovisceral (plō-rō-vis'ē-rāl), *a.* [*Gr. πλευρά, the side, + L. viscera, the internal organs: see visceral*.] Pertaining to the side of the body and to viscera: specifically said of the connecting cord or loop between a pleural and a visceral nervous ganglion of an invertebrate, as a mollusk. Also *visceropleural*.

plevin (plev'in), *n.* [Also *plevine*, < ME. *plevine, < OF. plevine, plevine, plevine, plevene (ML. plevina, pleuvina, pluvina), a pledge, warrant, assurance, < plevir, plevir, plevir, pluvir, also plever, pluvir = Fr. plevir (ML. reflex plevire, plivire), promise, engage, pledge, give in pledge, warrant, < L. præbere, proffer, offer, give (præbere fidem, give a pledge): see *prebend*. Cf. *pledge* and *replevin*, *replevy*.] In law, a warrant or an assurance.

plex (pleks), *v. i.* [*plexus*.] To form a plexus.

plexal (plek'sal), *a.* [*plexus* + *-al*.] Of or pertaining to a plexus.

plexed (plekst), *a.* [*L. plexus*, plaited (see *plexus*), + *-ed*.] Plaited, netted, or made plexiform; plexiform.

plexiform (plek'si-fōrm), *a.* [*L. plexus*, a twining, plaiting (see *plexus*), + *forma*, form.] 1. In the form of network; complicated. Quincy.—2. In anat., specifically, formed into a plexus, as nerves; plaited; plexed.

plexiometer, plexometer (plek-sim'e-tēr, plek-som'e-tēr), *n.* [*Gr. πλῆξις, percussion* (< πλῆσσειν, strike: see *plague*), + μέτρον, measure.] In med., an elongated plate, composed of ivory, india-rubber, or some similar substance, from 1½ to 2 inches in length, placed in contact with the body, commonly on the chest or abdomen, and struck with the percussion-hammer, in diagnosis of disease by mediate percussion. Also *plessimeter*, *plegometer*.

pleximetric (plek-si-met'rik), *a.* [*plexiometer* + *-ic*.] Of or pertaining to the pleximeter or its use.

plexiometer, n. See *plexiometer*.

plexor (plek'sor), *n.* [NL., irreg. < Gr. πλῆξις, percussion, < πλῆσσειν, strike: see *plague*.] That which strikes in percussion; a percussion-hammer.

plexure (plek'sūr), *n.* [*L. as if *plexura* (ML. ?), < *plectere*, pp. *plexus*, interweave: see *plexus*.] An interweaving; a texture; that which is woven together.

plexus (plek'sus), *n.* [*L. plexus*, an interweaving, twining, plaiting, < *plectere*, pp. *plexus*, interweave, twine, plait: see *plait*.] 1. A network; any collection of intimately coherent parts, as of an argument.

Antecedent and consequent relations are therefore not merely linear, but constitute a *plexus*; and this *plexus* pervades nature. *Amer. Jour. Sci.*, 3d ser., XXXI, 286.

A perfect *plexus* of ideas that mutually support and interpret one another. *Encyc. Brit.*, II, 55.

2. In anat., an interlacing of nerves, vessels, or fibers; a net-like arrangement of parts, or the

Pleurotoma babylonica.

Pleurotomaria anglica, from the Lias.

Forcellia puzosi, from the Carboniferous limestone.

Brachial Plexus of Nerves in Man. V, VI, VII, I, II, the five main roots (anterior divisions of cervical and dorsal spinal nerves) of the plexus; other cords and continuations of the plexus are named in the figure.

parts so disposed: especially said of certain delicate vascular membranes chiefly composed

of minute anastomosing blood-vessels, as the choroid plexus, and of similar arrangements of nerves of the spinal and sympathetic systems.

—3. In *math.*, a system of one-fold relations.

—**Aortic plexus**, the network of sympathetic nerves on the side and front of the abdominal aorta, between the origins of the superior and inferior mesenteric arteries. Also called *intermesenteric plexus*.—**Auerbach's plexus**, an extensive gangliated plexus of nerves lying between the longitudinal and the circular layer of the small intestine. Also called *myenteric plexus*.—**Axillary plexus**. Same as *brachial plexus*.—**Basilar plexus**. Same as *transverse sinus* (which see, under *sinus*).—**Brachial plexus**. See *brachial*.—**Cardiac plexus**, one of the three great prevertebral plexuses of the sympathetic, situated in the upper thoracic region in front, and between the aorta and the pulmonary artery, where these vessels are in contact. It receives the cardiac branches from the cervical ganglia and those of the vagus nerves, and gives off the nerves which supply the heart, together with some smaller branches which contribute to the nervous supply of the lungs. That division (the smaller) which lies in the concavity of the arch of the aorta is called the *superficial cardiac plexus*, while the *deep cardiac plexus* is placed behind the arch of the aorta, between it and the end of the trachea.—**Carotid plexus**. See *carotid*.—**Caudal plexus**. Same as *coccygeal plexus*.—**Cavernous plexus**. (a) The continuation of the carotid plexus in the cavernous sinus. (b) The continuation of the prostatic plexus, supplying the erectile tissue of the penis. Also called *cavernous nerves*.—**Cervical plexus**, the network of nerves formed by the anterior divisions of the four upper cervical nerves, giving off numerous nerves to the head, neck, and chest, and the phrenic nerve to the diaphragm. A similar plexus of posterior divisions of the three upper cervical nerves is known as the *posterior cervical plexus*.—**Choroid plexuses**. See *choroid*.—**Ciliary plexus**, a fine gangliated network formed from the ciliary nerves, spread over the choroid, and within the ciliary muscle, from which the nerves of the cornea, of the ciliary muscle, and of the iris are derived.—**Coccygeal plexus**, the connection formed between the anterior divisions of the fourth and fifth sacral and first coccygeal nerves.—**Coliac plexus**, the sympathetic plexus of the coeliac artery, continued from the solar plexus, and dividing into the gastric, hepatic, and splenic plexuses.—**Colic plexuses**, divisions of the superior and inferior mesenteric plexuses accompanying the colic arteries.—**Coronary plexus**. (a) One of two plexuses, right and left, derived from the cardiac plexus, and accompanying the respective coronary arteries. (b) Same as *gastric plexus* (b).—**Cystic plexus**, a secondary plexus of the hepatic, to the gall-bladder.—**Deep jugular plexus**, a plexus of lymphatic vessels extending along the internal jugular vein to the base of the cranium.—**Deferential plexus**, the continuation of the vesical plexus upon the vasa deferentia and the seminal vesicles.—**Diaphragmatic plexus**, the phrenic plexus.—**Dorsal plexus**, a network of veins investing the arches of the vertebrae, and receiving branches from the contiguous muscles and skin of the back.—**Epi-gastric plexus**, the solar plexus, or solarplex.—**Esophageal plexus**, plexiform branches of the pneumogastric nerve on the esophagus. Also called *plexus gule*.—**Gastric plexus**. (a) One of two plexuses, anterior and posterior, formed by the left and right vagus nerves respectively. (b) A secondary plexus of the coeliac, accompanying the gastric artery. Also called *coronary plexus*.—**Gastro-epiploic plexuses**, secondary plexuses of the hepatic and splenic, accompanying the gastro-epiploic arteries.—**Hemorrhoidal plexus**. (a) A plexus of fine nerves derived from the pelvic, vesical, and inferior hemorrhoidal plexuses, penetrating the coats of the rectum. (b) A large and copiously anastomosing network of veins in the lower wall of the rectum, beneath the mucous coat, from which the hemorrhoidal veins proceed.—**Hepatic plexus**, the largest division of the coeliac plexus, accompanying the hepatic artery in the substance of the liver.—**Hypogastric plexus**, an intricate sympathetic plexus, formed by the prolongation of the aortic plexus on each side, lying in the interval of the common iliac arteries, invested by a sheath of areolar tissue. It divides into two parts below, one on each side of the pelvic viscera, forming the pelvic plexuses. Also called *superior hypogastric plexus*.—**Ileocolic plexus**, the division of the superior mesenteric plexus accompanying the ileocolic artery.—**Inferior dental plexus**, a plexus formed by the communications of the branches of the inferior dental nerve within the lower jaw.—**Inferior hypogastric plexus**. Same as *pelvic plexus*.—**Inferior mesenteric plexus**, a sympathetic plexus derived from the left lateral part of the aortic plexus, and surrounding the artery of the same name.—**Infra-orbital plexus**, a plexus formed by the union of the labial branches of the superior maxillary nerve with branches of the facial nerve.—**Interepithelial plexus**, the fine network of nerves among the cells of the epithelium of the cornea.—**Intermesenteric plexus**. Same as *aortic plexus*.—**Intermuscular plexuses**, gangliated nerve-plexuses in the substance of organs having unstriated muscle-fibers.—**Intrasplinal plexus**, an irregular network of veins investing the spinal canal, emptying into the intercostal, lumbar, vertebral, and lateral sacral veins.—**Ischiatic plexus**, the upper part of the sacral plexus.—**Lumbar plexus**. See *lumbar*.—**Melsener's plexus**, the gangliated plexus of the submucous layer of the small intestine, formed by branches derived from Auerbach's plexus.—**Meningeal plexus**, the continuation of the carotid plexus upon the middle meningeal artery.—**Mesenteric plexus**, the sympathetic plexus accompanying a mesenteric artery. The superior is derived from the great solar plexus; the inferior chiefly from the aortic plexus.—**Myenteric plexus**. Same as *Auerbach's plexus*.—**Obturator plexus**, the plexus of veins surrounding the obturator foramen.—**Ophthalmic plexus**, the continuation of the cavernous plexus on the ophthalmic artery.—**Ovarian plexus**. See *pampiniform plexus*.—**Pampiniform, pancreatic, pataellar, pelvic plexus**. See the adjectives.—**Pancreaticoduodenal plexus**, a secondary plexus of the hepatic, accompanying the superior pancreaticoduodenal artery.—**Parotid plexus**, the anastomoses formed by loops of the seventh nerve on the side of the face. Also called *plexus* or *pes anserinus*.—**Pharyngeal plexus**. See *pharyngeal*.—**Phrenic plexus**, the

sympathetic plexus which accompanies the phrenic artery to the diaphragm, arising from the semilunar ganglion.—**Plexus anserinus**. Same as *parotid plexus*.—**Plexus anserinus nervi mediani**, the bundles from the eighth cervical nerve that go to form the median nerve.—**Plexus brachialis**, the brachial plexus.—**Plexus cervicalis**, the cervical plexus.—**Plexus choroideus**, the choroid plexus of a lateral ventricle.—**Plexus choroideus inferior**, the choroid plexus of the fourth ventricle.—**Plexus choroideus medius**, the choroid plexus of the third ventricle.—**Plexus choroideus ventriculi lateralis**, the choroid plexus of a lateral ventricle.—**Plexus choroideus ventriculi quarti**, the choroid plexus of the fourth ventricle.—**Plexus choroideus ventriculi tertii**, the choroid plexus of the third ventricle.—**Plexus gangliiformis**, the lower ganglion, or ganglion of the trunk, of the vagus nerve.—**Plexus gule**. Same as *esophageal plexus*.—**Plexus lumbalis**, the lumbar plexus.—**Plexus nodosus**, the ganglion of the trunk of the vagus.—**Plexus palatilis**, the flexiform network of the kneepan, formed by cutaneous nerves, especially the long saphenous.—**Plexus sacralis**, the sacral plexus.—**Plexus submucosus**. Same as *Melsener's plexus*.—**Posterior cervical plexus**, a plexus often formed by the internal branches of the posterior divisions of the first three cervical nerves.—**Prevertebral plexuses**, the three large median plexuses formed by the two sympathetic nerves, situated in front of the spine, in the cavity of the thorax, abdomen, and pelvis, and respectively known as the *cardiac, solar, and hypogastric plexuses*.—**Prostatic plexus**. (a) The continuation of the vesical plexus supplying the prostate body. (b) A plexus of veins surrounding the base of the prostate, formed mainly from the dorsal veins of the penis.—**Pterygoid plexus**, a close network of veins covering both surfaces of the external pterygoid muscle, receiving tributaries mostly corresponding to the branches of the internal maxillary artery, and emptying into the internal maxillary vein.—**Pudendal plexus**. (a) A close net of large veins occupying the upper part of the pubic arch, between the layers of the triangular ligament, and mainly derived from the dorsal veins of the penis or clitoris. (b) The lower section of the sacral plexus (a).—**Pulmonary plexuses**, the two plexuses, the anterior and posterior, formed by branches of the vagus and sympathetic on the front and back side respectively of each lung at its root.—**Pyloric plexus**, a secondary plexus of the hepatic, accompanying the pyloric artery.—**Renal plexus**, a plexus formed of nerves from the semilunar ganglion, the solar and aortic plexuses, and the smallest splanchnic nerve, accompanying the renal artery and terminating in the substance of the kidney.—**Sacral plexus**. (a) A plexus formed by the union of the lumbosacral cord and anterior divisions of the three upper sacral nerves, together with a portion of that of the fourth. Its branches of distribution are the superior and inferior gluteal, great and small sciatic, pudic, and muscular. (b) A plexus of veins in the cavity of the pelvis, tributary to the middle sacral vein.—**Sacrocoeliac plexus**, the series of loops formed by the anastomoses of the external branches of the posterior divisions of the first three sacral nerves, the fourth and fifth posterior sacral, and the posterior coccygeal.—**Santorini plexus**, the pudendal plexus of veins.—**Solar plexus**, the largest of the three great sympathetic plexuses, situated at the upper part of the abdomen, behind the stomach, and in front of the aorta. It consists of an intricate network of nerves, associated with ganglia, receiving the upper splanchnic nerves and some branches of the vagus, and giving off numerous branches which accompany the arteries to the principal viscera of the abdomen, constituting secondary plexuses. Its two principal masses, right and left, are known, from their form, as the *semilunar ganglia*. Also called *epigastric plexus, solar ganglion, spermatic plexus*. (a) A small plexus, derived from the renal and aortic plexuses, accompanying the artery to the testis in the male, to the ovary and uterus in the female. (b) Same as *pampiniform plexus*.—**Spiral plexus**, the plexiform arrangement assumed in the spiral lamina by the nerve-filaments given off from the spiral ganglion of the cochlea.—**Splenic plexus**, one of the divisions of the coeliac plexus, accompanying the splenic artery into the substance of the spleen.—**Subepithelial plexus**, the delicate network, formed by the terminal filaments of the eiliary nerves, ramifying on the basement membrane of the ectocornea, or surface of the cornea proper, beneath the epithelium.—**Superficial jugular plexus**, lymphatic tributaries to the jugular trunk from the occipital, ear, and temporal regions.—**Superior dental plexus**, the series of loops formed by branches of the dental nerves of the upper jaw, from which the filaments given to the teeth are derived.—**Suprarenal plexus**, a secondary plexus derived from the solar plexus, terminating in the suprarenal body, and receiving branches from one of the splanchnic nerves.—**Tonsillar plexus**, a plexus formed around the tonsil by the tonsillar branches of the glossopharyngeal nerve.—**Triangular plexus**, the plexiform arrangement assumed by the bundles of fibers of the sensory root of the fifth nerve before ending in the Gasserian ganglion.—**Tympanic plexus**, a plexus formed by the branches of the tympanic nerve, in union with others from the facial and sympathetic, in the mucous lining of the middle ear.—**Uterine plexus**. (a) A plexus derived from the pelvic plexus, passing through the broad ligament with the uterine artery to be distributed to the uterus. (b) Venous channels at the sides of the uterus, and in the broad ligaments, emptying into the ovarian veins.—**Vaginal plexus**, a network of veins surrounding the vagina, especially in its lower part.—**Venous plexus**, an anastomosing set of veins, forming a network. There are several such, as the ovarian, pampiniform, pharyngeal, prostatic, pterygoid, spermatic, uterine, and vaginal.—**Vertebral plexus**, the sympathetic plexus on the vertebral artery, joined by filaments from the lower cervical nerves.—**Vesical plexus**. (a) A plexus of veins surrounding the muscular coat of the bladder. (b) A plexus derived from the pelvic plexus, distributed to the lower part and side of the bladder, the prostate, and the seminal vesicle.—**Vesico-vaginal plexus**, a plexus derived from the pelvic plexus, distributed to the vagina and bladder.—**Vidian plexus**, the plexus formed by the Vidian nerve about the Vidian artery.

pleyt, v. and n. A Middle English form of *play*¹. **pleynt, pleynt**. Obsolete forms of *plain*¹, *plain*², *plain*³.

pliability (pli-a-bil'i-ti), *n.* [*< pliable + -ity* (see *-bility*).] The quality of being pliable; flexibility; pliability.

plot¹ (plot), *n.* [*Also plat* (see *plat²*); < *ME.* *plot*, *platte*, < *AS.* *plot* (rare), a plot of ground; cf. *Goth.* *plats*, a patch: see *patch*. The sense 'scheme' (whence later 'stratagem, conspiracy') appar. arose from that of 'plan' or 'plot' of a piece of ground, as *plan*, 'scheme', from *plan*, 'plat,' 'draft.' The sense has prob. been affected by association with *complot*, but *plot*, 'scheme,' can hardly be an abbr. of *complot*. Instances of the loss of the prefix *com-*, *con-* are scarcely to be found except recently in humorous or childish use (as in 'fess for confess).] 1. A piece of ground; specifically, a small piece of ground of well-defined shape; a patch or spot of ground.

Let ye, take gode hede of this *plote* of shapde that I now sitte on, when that ye be agēin repelred.
Morley (*E. E. T. S.*), *ll. 150.*

The *plot* was the most wicked and desperate ever known.
Macaulay, *History*.

6. The story of a play, poem, novel, or romance, comprising a complication of incidents which are at last unfolded by unexpected means; the intrigue.

If the *plot* or intrigue must be natural, and such as springs from the very subject, as has been already urged, then the winding-up of the *plot*, by a more sure claim, must have this qualification, and be a probable consequence of all that went before.
Le Bossu, tr. in *Pref.* to *Pope's Odyssey*.

O lud, sir, if people who want to listen or overhear were not always connived at in a tragedy, there would be no carrying on any *plot* in the world. *Sheridan*, *The Critic*, *ll. 2.*

7. Contrivance; deep reach of thought; ability to plan.

Who says he was not A man of much *plot* May repeat that false accusation.

inches. The upper parts are black, and profusely spotted with yellow and white; the under parts are black in the breeding-dress, whitish in winter, variously mottled or speckled during the changes of plumage. The bill and feet are black; the feet are three-toed. The plover lays four eggs, 1½ inches long by 1¼ broad, of a pirl-form shape, drab color, with heavy brownish or blackish blotches.

Hence—2. Some or any bird of the family *Charadriidae*; a charadriomorphie grallatorial bird. The American golden plover, or field-plover, is *Charadrius dominicus*, very closely resembling *C. pluvialis*, but having ashy-gray instead of white axillars. The Swiss bullhead, or black-bellied plover, is *Squatarola helvetica*, inhabiting most parts of the world, and having four toes. (See cut under *Squatarola*.) Many small plovers with white under parts, and rings or bands of black on the head, neck, or breast, are known as *ring-plovers* or *ring-necks*, and mostly belong to the genus *Egretta*. (See also *killdeer*.) The most singular of these is the *crook-billed plover*, *Anarhynchus frontalis*, having the bill bent sidewise. It inhabits New Zealand. The mountain-plover of

(a) The golden plover in full plumage. (Ireland.) (b) The black-heart plover. (Local, U. S.)—**Black-head plover**, the black-bellied or black-breasted sandpiper; the American dunlin. (Local, Canada.)—**Bullhead-plover**. See *bullhead*, 4.—**Golden plover**. See def. 1.—**Gray plover**. (a) A misnomer of the knot, *Tringa canutus*, a sandpiper in winter plumage. (Scotland.) (b) The golden plover when young. (Ireland.)—**Great plover**, the stone-plover.—**Green plover**, the lapwing, *Vanellus cristatus*. (Ireland.)—**Helvetian plover**, the Swiss plover, *Squatarola helvetica*.—**Highland plover**, the Bartramian sandpiper. Also called *Bartram's highland snipe*.—**Hill-plover**, the golden plover. [Fortar.]—**Kentish plover**, *Egretta cantianus*, a small ring-plover of wide distribution in the eastern hemisphere: so called because the specimens from which it was first described (by Dr. John Latham) were received from Mr. Boys of Sandwich in Kent, England.—**Long-legged plover**, a longhanks or stilt; a bird of the genus *Himantopus*.—**Mud-plover**, *Squatarola helvetica*. (Local, British.)—**Norfolk plover**, the stone-plover, *Edidnemus creptans*.—**Oyster-plover**, the oyster-catcher.—**Plover's page**. See *pages*.—**Red-legged plover**, the turnstone, *Streptopias interpres*; the red-legs. (Massachusetts.)—**Ringed plover**. See *Agallites* and *killdeer*.—**Rock-plover**, *Squatarola helvetica*. (Wexford, Ireland.)—**Ruddy plover**, the sandpiper or three-toed sandpiper, *Calidris arenaria*, when in full plumage: chiefly a book-name.—**Sea-plover**, *Squatarola helvetica*. (Local, British.)—**Silver plover**. Same as *gray plover* (a).—**Spanish plover**, the willet, or semipalmated tattler, *Symphemia semipalmata*. March. (Jamaica.)—**Speckled-back or streaked-back plover**, the turnstone, *Streptopias interpres*. (Massachusetts.)—**Spur-winged plover**. See *Chettusia*.—**Strand plover**, *Squatarola helvetica*. (Cork, Ireland.)—**Whistling plover**. (a) The golden plover. (b) *Squatarola helvetica*. (c) The Norfolk plover. (Various localities.)—**Wry-billed plover**, the crook-billed plover. See second cut above.—**Yellow plover**, the golden plover. (East Lothian.) (See also *lark-plover*, *marsh-plover*, *piping-plover*, *stone-plover*.)

plover-quail (pluv'ér-kwál), n. Any bird of the genus *Pedionomus*.

plover-snipe (pluv'ér-snip), n. Any bird of the group *Pressirostres*.

plow, **plough** (plou), n. [Also dial. (Sc.) *pleugh*, *pleuch*; < ME. *plow*, *plowe*, *plough*, *ploughe*, *plowghe*, *plouz*, *plouh*, *ploghe*, *plughe*, *ploh*, a plow, a plowland, < AS. *plōh* (rare), a plowland (not found in AS. in the sense of 'plow', for which the term. word was *sulh*, > E. dial. *sull*, *sullow*), = OFries. *plōch* = D. *ploeg* = MLG. *plōch*, *plūch* = OHG. *plfuog*, *plfuoh*, *plfuog*, *fluog*, *fluoc*, *plōh*, *pluag*, MHG. *plhuoc*, *plfuoc*, G. *plug* = Icel. *plōgr* = Sw. *plog* = Dan. *plow*, a plow; perhaps from the root of *play*¹ (AS. *plegan*) and *plight*¹ (AS. *pliht*), with ref. to the activity or labor involved: cf. MHG. *plhuoc*, *plfuoc*, business, occupation, maintenance. Like *play* and *plight*, the word *plow* belongs only to Teut. (the Slav., etc., forms, OBulg. *plugŭ* = Russ. *plugu*, etc., = Lith. *plugas*, are from OHG.). It is not found in Goth., where *hōha*, plow. Cf. Icel. *arðr*, Norw. *ar*, *al*, plow, related to L. *aratum*, a plow (see *aratum terax*), MHG. *arl*, a plowshare, from the same ult. root (see *ear*³). The explanations which connect *plow* with the Gr. *πλοῖον* = Skt. *plava*, a ship, or with the Gael. *ploc*, a block of wood, stump of a tree (and hence, as Skeat supposes, a primitive plow), are untenable.] 1. An agri-

American Plow.

a, handles; b, beam; c, mold-board; d, share; e, slip-point (can be replaced when broken or worn); f, collar; g, collar-brace; h, wheel (gages depth of furrow); i, arc by which the wheel is set to regulate depth of furrow; j, clevis; k, land-side.

cultural implement, drawn by animals or moved by steam-power, used to cut the ground and turn it up so as to prepare it for the reception of seeds. The soil is cut to a depth of several inches, raised up, and turned over by the progress of the plow, the object being to expose a new surface to the air and, by pulverizing and loosening the soil, to fit it for the reception of seed and the vigorous growth of crops. The plow, in various forms, is also much used for other purposes. In its modern form, the common agricultural plow essentially consists of a *plow-beam* provided with a *clevis* for attachment of draft-animals; *handles*, connected with each other and cross-braced by the *rounds*; a *mold-board*, usually of cast-iron; a *plowshare*, usually of steel, or steel-pointed, and bolted to the mold-board; a *land-side*, usually of cast-iron, attached to the mold-board near the front edge of the latter and in line with the beam; a *collar*, of wrought-iron with a tempered-steel edge, attached to the beam in line with the front edge of the mold-board; and a *standard or shelt*, projecting upward from and usually integral with the mold-board, and connecting the latter with the beam. The rear end of the beam is attached to the land-side handle, one handle being attached to the rear part of the land-side and the other to the rear part of the mold-board. Often a wheel is adjustably attached to the beam near the clevis, for gaging the depth of the furrow.

2. Figuratively, tillage; culture of the earth; agriculture. Johnson.—3. A tool that furrows, grooves, planes, cuts, or otherwise acts by pushing or shoving, like a plow. (a) In *woodworking*, a kind of plane used for grooving door-stiles and similar work. It has an adjustable fence, and is usually adapted to carry eight different widths of plane-irons, for different widths of grooves. (b) In *cloth-manuf.*, an instrument for cutting the finishing parts of the pile or nap of fustian. (c) The cutting-knife of a *plow-press*. (d) In *bookbinding*, a hand-implement for cutting or trimming the edges of books. Machines for the same purpose have rendered the bookbinders' plow almost obsolete. (e) A narrow shovel used in malting to bring the grains underneath to the surface. (f) A rimmer or fattening-knife: as, a *mackerel-plow*. See *rimmer*. (g) A hanging connection extending from a car propelled by electricity through the slot of the underground conduit, by means of which the current is conveyed to the motor on the car.

4. A plowland.

And I'll gie him to his dowry

Full fifty ploughs of land.

Childs Vyet (Child's Ballads, II. 76).

Black-land plow, a plow specially adapted to plowing rich soil free from stones, as the black lands of prairies.—**Double mold-board plow**, a plow which, instead of a land-side, has a second mold-board with curvature the reverse of the ordinary mold-board, so that it turns a double furrow, throwing the earth in opposite directions. It is used for making surface-drains, ridging up, etc.—**Double plow**. (a) A plow by which two furrows can be turned at the same time; a gang-plow consisting of two single plows. (b) A plow which can be adjusted to turn a furrow either to the right or to the left. Also called *drill-plow*, *reversible plow*, and *turning mold-board plow*.—**Gang-plow**, two or more plows attached to a single stock or frame, generally having wheels as a *sulky-plow* has, with

Gang-plow.

a, rear plow; a', front plow; b, long beam; b', short beam; c, wheel running on land; c', wheel running in furrow; d, lever; e, seat; f, ratchet-adjusting lever; g, pole.

adjustable devices for regulating the depth of furrows, and also a seat for the plowman, except when moved by steam. Compare *steam-plow*.—**Hard-plow**, a light small plow sometimes used in gardening, drawn or pushed by hand.—**Hoe-plow**. Same as *horse-hoe*.—**Mole-plow**, a plow with a long standard or shelt, to the lower part of which is attached an iron shoe or burr wing-tool which makes a burrow under the surface without turning a furrow. It is used for under-draining. The shoe is sometimes so attached to the lower part of the shelt as to permit its free motion around stones, etc.—**Paring-plow**. Same as *rod-plow* (which see).—**Pillow of a plow**. See *pillow*.—**Reversible plow**. Same as *double plow* (b).—**Seeding-plow**, a plow with a box for holding and scattering seed in the path of the furrow.—**Shim-coller plow**, plow having in advance of the mold-board of the principal plow a small inclined share or scraper, which cuts off weeds and scrapes them, and sometimes spread manure, into the furrow previously plowed, where the main plow covers them.—**Shim-plow**, a plow cutting off a shallow slice from the surface of land, for killing out weeds. Also called *skim*.—**Side-hill plow**, a plow with a reversible mold-board, which can be turned to throw the furrow downhill in plowing in opposite directions along the side or slope of a hill. Also called *hillside-plow* and *turn-verest plow*.—**Shovel-plow**, a plow with a triangular share, but having no mold-board. It is used for cultivating growing crops. The double shovel-plow has a very broad triangular share attached to two standards.—**Skeleton-plow**, a plow in which the parts bearing against the soil are made in skeleton form, to lessen friction. E. H. Knight.—**Steam-plow**, a heavy plow or gang of plows driven

by steam-power. Steam-plows, operating on various principles, are in use in farming on a large scale. Some are driven by a single stationary engine, which winds an endless rope (generally of wire) passing over pulleys attached to an apparatus called the *anchor*, fixed at the opposite headland, and round a drum connected with the engine itself. Others are driven by two engines, one at each headland, thus superseding the anchor. As steam-plowing apparatus are usually beyond both the means and the requirements of any but the largest farmers, companies have been formed at various places for hiring them out. Locomotive engines drawing gangs of plows have been tried, but compact the soil so injuriously that their use has been practically abandoned.—*Straddle-plow*, a plow with two triangular parallel shares set a little apart, used for running on each side of a row of dropped corn for covering the seed. *E. H. Knight*.—*Subsoil-plow*, a plow with a long standard and a share, but having no mold-board. Following the ordinary plow, it loosens the earth in the bottom of the ordinary furrow, while itself turning no furrow.—*Sulky-plow*, a plow attached to an axle with two wheels, the axle carrying a seat for the plowman and mechanism for adjusting and guiding the plow. *E. H. Knight*.—The Plow, the prominent seven stars in the constellation of the Great Bear; Charles's Wain.—To hold the plow. See *hold*.—To put one's hand to the plow, figuratively, to begin a task; commence an undertaking.—*Turn-wrest plow*. Same as *side-hill plow*.—*Wheel-plow*. (a) A plow in which the depths of furrows are gaged by a wheel or wheels attached to the plow and running upon the surface of the land. (b) A plow having a wheel in the space between the land-side and the mold-board, reducing the friction of the plow by bearing the weight. *E. H. Knight*. (See also *balance-plow*, *ice-plow*, *prairie-plow*, *snow-plow*, *sod-plow*.)

plow, plough (plou), *v.* [*< ME. plowen* (?), *plowghen* = *D. ploegen* = *MLG. ploegen* = *MHG. pluogen*, *pfluogen*, *G. pflügen* = *Icel. plægja* = *Sw. plöja* = *Dan. pløje*, *plow*; from the noun. The older verb for 'plow' is *ear*: see *ear* 3.] *I. trans.* 1. To turn up with a plow; till.

I should be unwilling to go thither, . . . much less to carry an Ox or an Horse with me to plough the ground.
Coryat, *Crudities*, I. 88.

It's I have fifty acres of land;
It's a plow'd and sown already.
Glasgow Peggy (Child's Ballads, IV. 78).

2. To make furrows, grooves, or ridges in, as with a plow; furrow; figuratively, to move through like a plow; make one's way through.

Let
Patient Octavia plough thy visage up
With her prepared nails.
Shak., A. and C., iv. 12. 38.

Here's a health to the mariners
That plough the raging main.
Mary Hamilton (Child's Ballads, III. 125).

3. To effect as with a plow; traverse like a plow.

A Fleet for Gaul address
Ploughs her bold course across the wondering seas.
Wordsworth, *Eccles*, Sonnets, II. 15.

4. To trim or square, as the edges of paper, with a plow. See *plow*, *n.*, 3 (d).

Cutting or ploughing the edges (of a book) with a knife-edged instrument called the plough. *Encyc. Brit.*, IV. 43.

5. To cut or gash (a fish) with the plow or rimmer. [American fisheries.]—6. To reject, as a candidate in an examination; pluck. [British university slang.]

"I have been cramming for smalls; and now I am in two races at Henley, and that rather puts the snaffle on reading and gooseberry pie. . . . And adds to my chance of being ploughed for smalls. . . . What does it all mean?" Inquired mamma, "gooseberry pie" and "the snaffle" and "ploughed for smalls." "Well, the gooseberry pie is really too deep for me; but 'ploughed' is the new Oxfordish for 'plucked'."
C. Reade, *Hard Cash*, Prolog.

To plow in, to cover by plowing: as, to plow in wheat.—To plow up or out, to turn out of the ground by plowing.

All Egypt shall be plough'd up with dishonour.
Fletcher (and another), *False One*, iv. 1.

The Arctic glaciers reach the sea, enter it, often ploughing up its bottom into submarine moraines.
Tyndall, *Forms of Water*, p. 134.

II. *intrans.* To turn up the soil with a plow; till the soil with a plow.

Be that plougheth shall plough in hope. 1 Cor. ix. 10.

plowable, ploughable (plou'ā-bl), *a.* [*< plow*, *plough*, + *-able*.] Capable of being plowed; arable.

plow-almst (plou'ālmz), *n.* A small coin paid to the church in England, in the early Anglo-Saxon period, for every plowland, or for every use of a plow between certain fixed dates.

plow-beam (plou'bēm), *n.* [*< ME. plow-beem*, *ploghe-beme*; *< plow* + *beam*.] The solid horizontally projecting part of the frame of a plow, by which it is drawn. See *cuts* under *plow*.

He was a little annoyed when Magill, getting down from the plow-beam, stopped him.
E. Eggleston, *The Graysons*, xvi.

plow-bolt (plou'bōlt), *n.* A bolt for securing the share, land-side, or mold-board of a plow to the stock. The head is chamfered or countersunk, and in the former case generally has a square or fin, to prevent it from turning when the nut is screwed on. *E. H. Knight*.

plow-bote (plou'bōt), *n.* In *old Eng. law*: (a) Wood or timber allowed to a tenant for the repair of instruments of husbandry. (b) A strip of land set apart in the open-field system of cultivation in the ancient village community for the carpenter on a manor for the repair of the plows and other farm implements.

plowboy, ploughboy (plou'boi), *n.* A boy who drives or guides a team in plowing; hence, a rustic boy; an ignorant country fellow.

plow-clevis (plou'klev'is), *n.* A clevis of special form used on a plow at the end of the plow-beam. It is a stirrup-shaped piece with three loops, one over another, in any one of which the open ring of the doubletree may be placed, according to the depth of furrow desired. *E. H. Knight*.

plower, plougher (plou'ēr), *n.* [*< ME. plougher* = *D. ploeger* = *G. pflüger* = *Icel. plögari*; as *plow* + *-er*.] One who plows land; a cultivator.

The country people themselves are great plowers, and small spenders of corn.
Spenser, *State of Ireland*.

plow-foot, *n.* [*ME. ploughfot*; *< plow* + *foot*.] A plow-tail; a plow-handle.

My plow-fot shal be my pyk-staf and piche a-two the rotes,
And help my culter to kerue and clense the forwes.
Piers Plowman (C), ix. 64.

plow-gang (plou'gang), *n.* Same as *plowland*, 2. In Scotland a plow-gang of land was formerly the property qualification to hunt under the game-laws.

plow-gate (plou'gāt), *n.* Same as *plow-gang*.

plow-handle (plou'han'dl), *n.* [*< ME. ploghe handylle*.] Same as *plow-tail*.

plow-head (plou'hed), *n.* [*< ME. ploghe-hede*.] A plowshare: same as *bridle*, 5.

plowing-machine (plou'ing-mā-shēn'), *n.* A steam-plow.

plow-iron (plou'ī'ēr), *n.* The colter of a plow. *Shak.*, 2 Hen. IV., v. 1. 20.

plowk, *n.* [Also (dial.) *plook*, *pluke*; *< late ME. plouke*, a pimple; cf. *plowked*, pimplly.] A pimple. *Cath. Ang.*, p. 284. [Obsolete or Scotch.]

plowked, *a.* [*ME. plowked*, *plucid*; *< plowk* + *-ed*.] Covered with pimples; pimply.

Polidarius was plucid as a pork fat.
Destruction of Troy (E. E. T. S.), I. 3837.

plow-knife (plou'nif), *n.* In bookbinding, a flat knife (about 6 inches long, 1½ inches wide, and ½ inch thick) with a rounded and pointed cutting-face, sharpened on one side only, which follows the groove of the bookbinders' plow in cutting books or paper.

plowky, *a.* [Also *plooky*; *< ME. plowkky*; *< plowk* + *-y*.] Pimplly. [Obsolete or Scotch.]
For hyme that is smetyne of his awenne blode, and spredis alle over his lymmes, and waxes plowky and brekes owte.
Quoted in *Cath. Ang.*, p. 284.

Plooky, plooky are your cheeks,
And *plooky* is your chin.
Sir Hugh le Blond (Child's Ballads, III. 256).

His face was as plowky as a curran' bun, and his nose as red as a partan's toe.
Galt, *Provost*, xxxii. (Davies.)

plowland, ploughland (plou'land), *n.* [*< ME. plowland*, *plow-land*, *plow-land* (= *D. ploegland* = *MLG. plochlant* = *G. pflugland* = *Icel. plögsland* = *Sw. plogland* = *Dan. pløjeland*); *< plow* + *land*.] 1. Land that is plowed or that is suitable for tillage.—2. In early English tenures, as much land as could be tilled with the use of one plow; a hide of land; a carucate. It was a descriptive term by which land might be granted with the buildings thereon. The difference in early authorities as to the area is probably to be explained by differences in local customs of husbandry and in the arableness of the soil, and especially by the fact that in some districts, and perhaps most generally, the plow was drawn by eight oxen, while in others it may have been drawn by four. It seems generally to have contained about 100 acres more or less. Compare *ozland*.

The pris of a plow-land of penyes so rounde
To aparalle that pyler were pure lytel.
Piers Plowman's Crede (E. E. T. S.), I. 109.

Jugum terre, or half a plow land, is as much as two oxen can till.
Sheppard, *Touchstone*.

Others say that one oxgangs of land containeth 15 acres, and 8 oxgangs make a plow land.
Coke upon Littleton.

plowman, ploughman (plou'man), *n.*; pl. *plowmen, ploughmen* (-men). [*< ME. plowman, ploughman* (= *G. pflugmann*); *< plow* + *man*.] One who plows or guides a plow; a farm laborer who is or may be engaged in plowing.

Will . . . wroughte that here is wryten, and other werkes bothe
Of Peres the Plowman, and mechel puple al so.
Piers Plowman (A), xii. 102.

The merchant gains by peace, and the soldiers by war,
The shepherd by wet seasons, and the ploughmen by dry.
Sir W. Temple.

Like any Ploughman toil'd the little God,
His Tune he whistled, and his Wheat he sow'd.
Prior, *Cupid turned Ploughman* (trans.).

Flowman's fee. See *fee* 2.—**Flowman's spikenard**. See *spikenard*.

plowmbet, plowmet, *n.* Obsolete (Middle English) forms of *plum*.

plowmeat (plou'mēt), *n.* Cereal food, as distinguished from flesh-meat.

Some countryes lack plough-meat,
And some do lack cow-meat.
Tusser, *Husbandry*, April's Abstract.

Plow Monday (plou mun'dā), *n.* The Monday after Twelfth-day, or the termination of the Christmas holidays, when the labors of the plow usually began, observed in England as a rustic festival. On that day it is the custom of plowmen to draw a plow from door to door, soliciting drink-money. Also called *Rock Monday*.

Plough Monday next, after that Twelfth tide is past,
Bids out with the plough, the worst husband is last.
Tusser, *Husbandry*, Ploughman's Feasting Days.

plowngyt, *a.* An obsolete form of *plungy*.

plow-point (plou'point), *n.* A detachable share at the front end of a plow-body, forming an apex to the junction of mold-board, sole, and land-side. *E. H. Knight*.

plow-press (plou'pres), *n.* In bookbinding, same as *cutting-press*, 2.

plow-service (plou'sér'vis), *n.* In early English tenancies, the service rendered by villeins or other tenants in plowing the lands of the lord's manor, or furnishing oxen to the team therefor.

plowshare, ploughshare (plou'shär), *n.* [*< ME. plouhschare* (= *MLG. plöchschar* = *MHG. pfluoschar*, *G. pflugshare*); *< plow* + *share*.] 1. The share of a plow, or that part which cuts the ground at the bottom of the furrow, and raises the slice to the mold-board, which turns it over; the sock of a plow. See *first* cut under *plow*.

Countries by future Plow-shares to be torn,
And Cities rais'd by Nations yet unborn.
Prior, *Solomon*, I.

2. In *anat.*, the vomer.

plowshare-bone (plou'shär-bōn), *n.* 1. In *anat.*, the vomer.—2. In *ornith.*, the pygostyle.

plow-shoe (plou'shō), *n.* A block of wood fitted under the point of a plowshare when not in use, to prevent it from penetrating the soil.

plow-silver (plou'sil'ver), *n.* In *old Eng. law*, money paid by tenants and retainers in commutation of service due in plowing the lands of the lord of the manor.

plow-sock (plou'sok), *n.* Same as *plowshare*, 1. *Scott.* [Scotch.]

plow-staff (plou'stáf), *n.* [*< ME. ploghe-staffe*.] A kind of paddle to clear the colter and share of a plow when choked with earth or weeds: called in Scotland a *pattie* or *pettle*.

plow-star (plou'stär), *n.* See the *Plow*, under *plow*.

Three lights starrye noting in globe celestial hanging:
Thee seun stars stormy, twice told thee plowstar, eke Arcature.
Sanikur, *Eneid*, lii. 528. (Davies.)

plow-stert, *n.* [*ME.* (= *D. ploegstaart* = *MLG. plochstert* = *G. pflugsterz*, *pflugsterze* = *Sw. plogstjert* = *Dan. ploustjert*); *< plow* + *stert*, tail.] Same as *plow-tail*.

plow-stilt (plou'stílt), *n.* A handle of a plow.

plow-swain (plou'swān), *n.* A plowman.

Beasts leave their stals, plough-swains their fires forego,
Nor are the meadows white with drifts of snow.
Sir T. Hawkins, tr. of Odes of Horace, I. 4. (Davies.)

plow-tail (plou'tāl), *n.* That part of a plow which the plowman holds; the handle of a plow.

plow-team (plou'tēm), *n.* In early English times, usually a team of eight oxen, commonly yoked four abreast. The estimated work of such a team served as a measure of land. See *plowland*, 2.

plow-tree (plou'trē), *n.* A plow-handle.

I whistled the same tunes to my horses, and held my plow tree just the same, as if no King nor Queen had ever come to spoil my tune or hand.
Blackmore, *Lorna Doone*, lxxiv.

plow-truck (plou'truk), *n.* An attachment to a plow, in the form of a riding-seat supported on two wheels, to enable the plowman to ride at his work. See *sulky-plow*, under *plow*.

plow-wise (plou'wiz), *a.* Going alternately forward and backward in parallel lines, as in plowing.

This was succeeded by Boustrophedon, or plough-wise writing.
Isaac Taylor, *The Alphabet*, II. 83.

plow-witcher (plou'wich'ēr), *n.* One of a company of plowmen and other field-laborers who drag a plow from house to house, soliciting drink-money, with mumming, dancing, and other sports, preparatory to the first plowing after the Christmas holidays. See *Plow Monday*. [Local, Eng.]

Seven companies of *plow-witchers* waited upon me in my South Lincolnshire home; and some of the performers—Beasy, the Doctor, the Valiant Soldier, &c.—went through the recital of their little play.

N. and Q., 7th ser., I. 36.

plowwright, ploughwright (plou'rit), *n.* One who makes and repairs plows.

Plowwrights, cartwright, knacker, and smith.
Tusser, Husbandry, Corn Harvest.

ploy¹ (ploi), *n.* [Abbr. of *employ*.] 1. Employment.—2. A harmless frolic; a merrymaking. [Scotch.]

ploy² (ploi), *v. i.* [Cf. *deploy*.] *Milit.*, to move from line into column: the opposite of *deploy*.

ployment (ploi'ment), *n.* [*< ploy*² + *-ment*.] *Milit.*, the formation of column from line.

Pluchea (plū'kē-ā), *n.* [NL. (Cassini, 1817), named after N. A. Pluche, a French abbé who wrote upon natural history in 1732.] A genus of composite plants of the tribe *Inuloidae*, type of the subtribe *Pluchineae*, characterized by the corymbose heads of flowers with dry broad bracts, each head containing numerous truncate thread-shaped pistillate flowers in many outer rows, and a few perfect but sterile five-cleft flowers in the center. There are about 35 species, natives of warmer parts of America, Africa, Asia, and Australia, a few herbaceous and extending into the central or northern United States on the coast, the others shrubs or undershrubs. They are woolly or glutinous, with a strong or camphoric odor, bearing alternate toothed leaves, and white, yellow, or purplish flowers. *P. camphorata* is the salt-marsh fleabane of the Atlantic coast, sometimes called *camphor-plank*. *P. odorata* is the riverside tobacco of the West Indies.

pluck¹ (pluk), *v. t.* [*< ME. plucken, plocken, plockien* (pret. *plucked*, *plukkede*, pp. *plucked*, irreg. pret. *plyghte*, pp. *plyght*), *< AS. pluccian, pluccgean, ploccan* (pret. *pluccede*, pp. *plucced*) = D. *plukken* = MLG. *plucken*, LG. *plukken* = OHG. **pflicchen* (not found), MHG. *pflicken*, *pflicken*, G. *pflicken* = Icel. *plukka*, *plokka* = Sw. *plocka* = Dan. *plukke*, pick, pluck; hardly a Teut. word, the Scand. forms being appar. borrowed from AS. or LG., and these prob. derived, through OHG. or Goth. (where, however, the word is not recorded), from an early Rom. (LL.) verb **pilicare*, **pilucare*, found in OIt. *pelucare*, *pelucare*, *plucare*, It. *plucare*, *pluck* (grapes), pick off (grapes) one by one, = Pr. *pelucar*, pick out, = OF. *plouer*, in secondary form **plucquer*, *pluquer*, *plukier*, *plucher*, F. dial. (Picard) *pluker*, *plukier*, *ploki*, *plucher*, F. in comp. *éplucher*, pick, gather (the F. forms prob. in part reflections of the LG.); the ref. to plucking grapes (which suggests the means of its early introduction into Teut. use) being a particular application or transfer of the orig. sense (OIt. *pelucare*, etc.) 'pick out hairs one by one,' as explained under the derivative *peruke*, the verb (LL. **pilicare*, **pilucare*) being derived, with freq. formative (L. *-icare*, LL. *-ucare*, It. *-ucare*, -uccare, etc., the same occurring in *plunge*, ult. *< ML. *plumbicare*), from L. *pilus*, hair, a hair: see *pile*⁴, *peruke* (and *periwig* and *wig*), and also *plush*, from the same source. No evidence of the existence of the Rom. (LL.) verb at a period early enough to produce the earliest Teut. forms is found; analogous verbs in *-icare* are, however, found, and the explanation here given meets all the other conditions. It will be observed that *pluck* still refers in most instances to pulling hair or feathers or berries or flowers, and that L. *pilus*, hair, has had in other respects a remarkable development.] 1. To pull off, as feathers from a fowl, or fruit or flowers from a plant; pick off; gather; pick or cull, as berries or flowers.

Hisse discipulis *pluckiden* eeris of eorn, and thei frotyngne with her hondis eeten. Wyctif, Luke vi. 1.

Al sodeynly three laves have I *plyght*
Out of his book right as he radde.
Chaucer, Prol. to Wife of Bath's Tale, l. 790.

I'll show thee the best springs;
I'll *pluck* thee berries;
I'll fish for thee. Shak., Tempest, II. 2. 164.

As thro' the land at eve we went,
And *pluck'd* the ripen'd ears.
Tennyson, Princess, l. (song).

2. To pull; draw; drag: used either literally or figuratively.

Pluck him headlong from the usurped throne.
Shak., Rich. II., v. 1. 65.

What poor fate follow'd thee, and *pluck'd* thee on,
To trust thy sacred life to an Egyptian?
Fletcher (and another), False One, II. 1.

The best part of himself he had lost before in Apostasy, which *plucked* this destruction upon him.
Purchas, Pilgrimage, p. 357.

It is their Custom to make Men sit on the Floor, as they do, cross-legg'd like Taylors; But I had not strength then to *pluck* up my Heels in that manner.

Dampier, Voyages, I. 502.

Especially—3. To pull sharply; pull with sudden force or jerk; give a tug or twitch to; twitch; snatch; twang, as the strings of a harp or guitar.

Sodeynly he *plyghte* his hors aboute.
Chaucer, Prol. to Man of Law's Tale, l. 15.

Merlin caught the fayle of the yate and *plucked* it to hym, and yede oute as lightly as it hadde not hane ben lokked, and than departed oute mag[is]tr[e] how it crucchid.
Merlin (E. E. T. S.), II. 206.

You are the hare of whom the proverb goes,
Whose valour *plucks* dead lions by the beard.
Shak., K. John, II. 1. 138.

I have been *pluck'd* and tugg'd by th' hair o' th' head
About a gallery half an acre long.
Fletcher (and another), Nice Valour, III. 2.

E'en children followed, with endearing wile,
And *pluck'd* his gown, to share the good man's smile.
Goldsmith, Des. VII., l. 184.

4. To strip, as a fowl, by pulling off its feathers; strip the feathers from: as, to *pluck* a fowl.

Since I *plucked* geese, played truant, and whipped top,
I knew not what 'twas to be beaten till lately.
Shak., M. W. of W., v. 1. 26.

The King of Great Britain used to send for his Ambassadors from Abroad to *pluck* Capons at Home.

Howell, Letters, I. v. 31.

5. To reject, after a university or other examination, as not coming up to the required standard. [College slang, Eng.]

He went to college, and he got *plucked*, I think they call it.
Charlotte Brontë, Jane Eyre, x.

If a man is *plucked*—that is, does not get marks enough to pass—his chance of a Fellowship is done for.
C. A. Bristol, English University, p. 258.

I trust that I have never *plucked* a candidate in the Schools without giving him every opportunity of setting himself right. Stubbs, Medieval and Modern Hist., p. 336.

Plucked instrument, in music. See *instrument*, 3 (c).—To *pluck* a crow with one, to pick a quarrel with one.

O, these courtiers, neighbours, are pestilent knaves; but, ere I'll suffer it, I'll *pluck* a crow with some of 'em.
Dekker and Ford, Sun's Darling, IV. 1.

To *pluck* a pigeon. See *pigeon*.—To *pluck* down a side. See the quotation.

Other that never learned to shoot, nor yet knoweth good shaft nor bow, will be as busy as the best, but such one commonly *plucketh* down a side [to *pluck* down a side]. I believe, is to shoot on one side into the ground, and crafty archers which be against him will be both glad of him, and also ever ready to lay and bet with him: it were better for such one to sit down than shoot.
Ascham, Toxophilus (ed. 1864), p. 8.

To *pluck* off, to descend in regard to rank or title; descend lower.

Pluck off a little;
I would not be a young count in your way.
Shak., Hen. VIII., II. 3. 40.

To *pluck* up. (a) To pull or haul up suddenly; remove entirely or by the roots; eradicate; hence, to exterminate; destroy: as, to *pluck* up weeds.

They *plucked* up anchor, and away did sayle.
The Noble Fisherman (Child's Ballads, V. 381).

But if they will not obey, I will utterly *pluck* up and destroy that nation, saith the Lord.
Jer. xii. 17.

I observed that the corn here was *plucked* up by the roots, according to the ancient usage, which is retained also in the upper Egypt.

Pococke, Description of the East, II. i. 131.

(b) To summon or muster up: as, to *pluck* up courage, spirit, etc.

Pluck up thy heart, my dere mayster.
Robin Hood and the Monk (Child's Ballads, V. 2).

Pluck up thy spirits; look cheerfully upon me.
Shak., T. of the S., IV. 8. 38.

Why did not Little-faith *pluck* up a greater heart?
Bunyan, Pilgrim's Progress, p. 188.

Pluck up a little resolution, and we shall soon be out of the reach of her malignity.
Goldsmith, She Stoops to Conquer, v.

(c) *Intrans.*, to collect one's self; gather spirit or courage.

Bene. You break jests as braggarts do their blades. . . .
D. Pedro. But, soft you, let me be. *Pluck* up, my heart, and be sad [serious].
Shak., Much Ado, v. 1. 207.

pluck¹ (pluk), *n.* [= D. *pluk*, plucking, gathering, crop, = Sw. *plock* = Dan. *pluk*, gathering; from the verb: see *pluck*, *v.* In def. 4 the same word, the heart, liver, and lights being 'plucked out' in preparing the carcass for market. In def. 5 a colloq. fig. use of sense 4, like *heart* and *liver* in similar expressions.] 1. A pull; a tug; a twitch; a snatch: as, he gave the sword a *pluck*.

Were they [the bones] dry, they could not . . . without great difficulty yield to and obey the *plucks* and attractions of the motory muscles. Ray, Works of Creation, II.

2. A blow; a stroke.—3. A bout; a round.

Why, wilt thou fight a *pluck*?
Playe of Robyn Hode (Child's Ballads, V. 423).

4. The heart, liver, and lungs or lights of a sheep, ox, or other animal used as butchers' meat: also used figuratively or humorously of the like parts of a human being.

It vexes me to the *pluck* that I should lose walking this delicious day.
Swift, Journal to Stella, xviii.

There were lower depths yet: there were the parlour houses, where "Trademen flock in their Morning gowns, by Seven, to cool their *Plucks*."

J. Ashton, Social Life in Reign of Queen Anne, I. 294.

Hence—5. Heart; courage; spirit; determined energy; resolution in the face of difficulties.

Decay of English spirit, decay of manly *pluck*.
Thackeray.

Be firm! one constant element in luck
Is genuine, solid, old Teutonic *pluck*.
O. W. Holmes, A Rhymed Lesson.

Attracted by the fame of Botta's discoveries, he [Layard] set to work digging at Nineveh with that *pluck*, that energy, and at the same time that discriminating judgment, which he has since shown on other occasions.

Max Müller, Biograph. Essays, p. 236.

pluck² (pluk), *n.* [Origin obscure; cf. Ir. Gael. *pluc*, a lump, knot, bunch, *pluc*, a club, plug, block: see *plug* and *block*¹.] The poggie, *Agonus cataphractus*. [Scotch.]

plucked¹ (plukt), *p. a.* Having the long stiff hairs removed: said of the pelt of a fur-seal.

plucked² (plukt), *a.* [*< pluck*¹, *n.*, 5, spirit, courage, + *-ed*.] Endowed with *pluck* or courage: with a qualifying adjective. [Colloq.]

"What, going?" said he, "and going for good? I wish I was such a good *plucked* one as you, Miss Anville."

Thackeray, Roundabout Papers, On a Peel of Bells, note.

A very sensible man, and has seen a deal of life, and kept his eyes open, but a terrible hard *plucked* one. Talked like a book to me all the way, but he hanged if I don't think he has a thirty-two-pound shot under his ribs instead of a heart. Kingsley, Two Years Ago, IV. (Derby).

plucker (pluk'er), *n.* 1. One who or that which plucks.

Thou setter up and *plucker* down of kings.
Shak., 3 Hen. VI., II. 3. 37.

2. A machine for straightening and cleaning long wool to render it fit for combing. It has a traveling apron which feeds the ends of the tufts to a pair of spiked rollers, by which tufts and locks are opened, and whence they proceed to a fanning apparatus for cleaning. It is usually managed by a boy.

Plückerian (plū-kē-ri-an), *a.* [*< Plücker* (see def.) + *-ian*.] Pertaining to the geometer Julius Plücker (1801-68).—**Plückerian characteristic**, one of the quantities entering into the Plückerian equations.—**Plückerian equations**, equations published in 1834, substantially as follows: Let *m* be the order of a plane curve, *n* its class, *δ* its nodes, *κ* its cusps, *r* its bitangents, and *i* its inflections. Then

$$3m - \kappa = 3n - i; \\ 2\delta = m^2 - m - n - 3\kappa; \\ 2r = n^2 - n - m - 3i.$$

Plücker's formulae. See *formula*.

pluckily (pluk'i-li), *adv.* In a plucky manner; with courage or spirit. [Colloq.]

"No," said Frank, *pluckily*, as he put his horse into a faster trot.
Trollope, Dr. Thorne, xix.

pluckiness (pluk'i-nes), *n.* The character of being plucky; pluck; courage.

Her quaint, queer expression, in which curiosity, *pluckiness*, and a foretaste of amusement mingled.
Mrs. Whitney, Leslie Goldthwaite, vi.

pluckless (pluk'les), *a.* [*< pluck*¹, *n.*, 5, + *-less*.] Without pluck; faint-hearted. [Colloq.]

plucky (pluk'i), *a.* [*< pluck*¹, *n.*, 5, + *-y*.] Possessing pluck, or spirit and courage; spirited; courageous. [Colloq.]

If you're *plucky*, and not over-subject to fright
And go and look over that chalk-pit white,
You may see, if you will,
The Ghost of old Gili.

Barham, Ingoldsby Legends, II. 146.

pluff (pluf), *v. t.* [Imitative of a sudden puff; cf. *puff* and *fluff*².] To throw out smoke or fine dust in quick whiffs, as by igniting gunpowder or throwing out hair-powder from a puffball. [Scotch.]

pluff (pluf), *n.* [*< pluff*, *v.*] 1. A puff of smoke or dust, as from gunpowder or hair-powder. [Scotch.]

The gout took his head, and he went out of the world like a *pluff* of powder. Galt, Steam-Boat, p. 78. (Jameica.)

2. An instrument used in powdering the hair, made like a sort of bellows, by which the powder was blown in a cloud. Also *powder-puff*.—3. In bot., a Scotch name for a species of puffball, *Bovista lycoperdon*.

pluffy (pluf'i), *a.* [*< pluff* + *-y*.] Fluffy; puffy; blown up.

Light *pluffy* hair. Albert Smith, Pottleton Legacy, xxvii.

A good-looking fellow—a thought too *pluffy*, perhaps, and more than a thought too swaggering.
Lever, One of Them.

plug (plug), *n.* [*< MD. plugge*, D. *plug*, a bung, peg, plug, = MLG. *plugge*, LG. *plugge*, *pligge*, a plug, = MHG. *pfloc* (*pflock*-), *pflocke*, G. *pflock*, a peg, plug, = Sw. *plugg*, *plugg* = Norw. *plug* = Dan. *pløg*, *plök* (prob. *< LG.*), plug, peg; cf. W.

plug, a plug, block, = *Ir. ploc*, a plug, block, club: see *block*. 1. A piece of wood or other substance, usually in the form of a peg or cork, used to stop a hole in a vessel; a stopple; a bung or stopper of any kind.—2. A peg, wedge, or other appliance driven in, or used to stop a hole or fill a gap. (a) A piece of wood driven horizontally into a wall, its end being then sawed away flush with the wall, to afford a hold for nails. (b) In *child engraving*, a heavy peg or stake driven in flush with the surface of the ground as a permanent reference-point, as distinguished from a *stake*, one projecting above the ground. (c) A piece of boxwood cut to cylindrical form, used by wood-engravers. If any part of an engraved block has been injured, a circular hole is drilled through the block, large enough to remove the damaged part. A plug is then driven into the hole, and a new surface thus obtained which can be reengraved.

This mode of repairing a block was practised by the German wood engravers of the time of Albert Durer. The plug which they inserted was usually square, and not circular as at present. *Chatto, Wood Engraving*, p. 366.

(d) A wedge-pin forced between a rail and its chair on a railway. (e) A spigot driven into place, as in a barrel, in contradistinction to one screwed in. (f) A wooden stopper fitted in the opening of the pump on a ship's deck during a storm, to protect the water-tanks against lightning; a pump-stopper.

3. A small piece of some substance, as metallic foil, used by a dentist to fill the cavity of a decayed tooth.—4. A branch pipe from a water-main, leading to a point where a hose can be conveniently attached, and closed by a cap or plug; a fire-plug.—5. In *die-sinking*, a cylindrical piece of soft steel the end of which is fitted to a matrix. When matrix and plug are forced together under heavy pressure, the intaglio design of the matrix is impressed in relief upon the plug. The plug is then hardened, and becomes a punch, which can be used to make impressions on die-faces, as for coining, etc.

6. A flat oblong cake of pressed tobacco.

Tom brought out a corn-cob pipe for the preacher, and shaved him tobacco from a plug.

The Century, XXXVIII. 80.

7. A man's silk or dress hat; a plug-hat. [Slang.]

—8. A worn, damaged, unfashionable, or otherwise injured article, which, by reason of its defects, has become undesirable, unsalable, or in a condition rendering it difficult to sell without a large reduction of its price, as a shelf-worn book, or an old horse worn down by hard work. Also *old plug*. [Colloq.]—9. A short, thick-set person. [Slang.]—10. A workman who has served no regular apprenticeship. [Slang.]—11. A sort of fishing-boat. [Cape Ann.]—12. Same as *plug-rod*, 1.—*Cutting plug*, in a chronographic apparatus for registering velocities of projectiles from one position in the bore of a gun to another, one of a series of plugs inserted into holes drilled radially in the gun-barrel from its exterior into the bore. The plug is connected with a looped electric conducting-wire of a primary circuit, and at its inner end is a small knife pivoted to the body of the plug in such manner that it slightly projects into the bore of the gun, and so arranged that, when forced radially outward by the passage of the projectile over it, it cuts the loop of the wire, and breaks the primary circuit. This induces a brief current in the secondary coil, which has one of its terminals arranged at the edge of one of a series of rapidly, uniformly, and synchronously rotating thin disks of equal diameter attached to a common shaft. The edges of the disks are coated with lamplack. The induced current of the secondary coil produces a spark at the terminal, which burns off a small dot in the peripheral coating. A number of the cutting plugs are inserted at uniform intervals in the gun. Each is serially related to one of the disks, in the order of succession from breech to muzzle of the gun; and when the gun is fired it records the instant the shot passes it on the edge of its related disk. From the angular distance between these records, the known diameter and rotating speed of the disks, the time occupied by the shot in moving from plug to plug is readily calculated; and it is asserted that intervals of time as small as one millionth of a second can be measured. The data thus obtained are of great value in the investigation of the action of explosives.—*Fusible plug*. See *fusible*.—*Plug-and-collar gage*. See *gages*.

—*Plug and feathers*, a flat iron wedge (the *plug*) used in connection with two semi-cylindrical pieces of iron (the *feathers*), placed in a hole bored in a rock, with their flat surfaces toward each other, between which the wedge is driven with a sledge-hammer, the object being to split the rock. See *feather*, 2(d).—*Plug center-bit*. See *center-bit*. *plug* (plug), *v. t.*; pret. and pp. *plugged*, ppr. *plugging*. [= *MLG. pluggen* = *Sw. plugga* = *Dan. plukke*, plug; from the noun.] 1. To stop with a plug; make tight by stopping a hole: as, to plug a decayed tooth; to plug a wound with lint.—2. To hit with a ball or bullet: as, to plug a buck with a rifle. [Slang, western U.S.]—3. To cut out a plug from: said of watermelons when a tapering plug is cut out to see if the fruit is ripe, and then replaced. [Eastern U.S.]

plug-arbor (plug'ar'bor), *n.* A lathe attachment for mounting drill-chucks. *E. H. Knight.*

plug-basin (plug'ba'sin), *n.* A standing wash-basin with a plug-hole at the bottom for emptying. *E. H. Knight.*

plug-bayonet (plug'ba'yō-net), *n.* A bayonet of the early type, which the soldier fixed into

the muzzle of his piece. The haft or plug was often of horn, more commonly of wood, and the steel was secured to this by brass or iron mounting.

plugboard (plug'bōrd), *n.* A switchboard in which the connections are made by means of brass or other conducting plugs.

plug-cock (plug'kok), *n.* A cock in which a plug with a transverse hole in it is fitted into a transverse hole in a hollow barrel or cylinder, the diameter of the plug being greater than the interior diameter of the cylinder, and therefore permitting liquid to flow through the latter only when the transverse hole in the plug is so turned as to form a continuous passage with the hollow in the cylinder.

The plugs are sometimes covered or packed with a yielding material, and are usually tapered, so that pressing them into their seats keeps them tight.

plug-finisher (plug'fin'ish-er), *n.* In dentistry, a fine file, of a great variety of shapes, used for finishing the surfaces of plugs or fillings.

plugger (plug'er), *n.* One who or that which plugs; specifically, a dentist's instrument, of various forms, for driving and packing a filling material into a hole in a carious tooth. See *dental hammer*, under *hammer*. *E. H. Knight.*

plugging-forceps (plug'ing-fōr'seps), *n.* A dentist's instrument or plugger used to compress a filling in a carious tooth. *E. H. Knight.*

plug-hat (plug'hat), *n.* Same as *chimney-pot hat* (which see, under *hat*). [Slang.]

plughet, *n.* An obsolete dialectal form of *plow*.

plug-hole (plug'hōl), *n.* A hole for a plug; a hole left by the removal of a plug.

A surface had been taken down, leaving large plug-holes to be filled up. *Paper-hanger*, p. 21.

plug-joggle (plug'jog'gl), *n.* The name given by Smeaton to a stone such as the center-stones of the Eddystone-lighthouse foundation, which were joggled into the surrounding stones, and also secured to the corresponding stones above and below by a central plug of stone.

plug-machine (plug'mā-shēn'), *n.* A machine combining a cutter and shaper for making wooden plugs for the draught-holes of beer- and liquor-casks.

plug-rod (plug'rod), *n.* 1. In a condensing engine, a rod connected with the working-beam and serving to drive the working-gear of the valves. Also called *plug*, *plug-tree*.—2. The air-pump rod of a steam-engine. *E. H. Knight.*

plug-switch (plug'swich), *n.* An arrangement in which electrical connection between two conductors is established by the insertion of a metallic plug.

plug-tap (plug'tap), *n.* 1. A cylindrical tap for cutting the dies of a screw-stock; a master-tap.—2. A tap slightly tapered at the end to facilitate its entrance in tapping a hole. *E. H. Knight.*

A plug-tap has the full depth of screw-thread all along its length. *Campin, Hand-turning*, p. 111.

plug-tree (plug'trē), *n.* Same as *plug-rod*, 1.

plug-ugly (plug'ug'li), *n.* A city ruffian; one of a band of rowdies who indulged in wanton assaults upon persons and property in streets and public places: first used in Baltimore. [Slang.]

plug-valve (plug'valv), *n.* A valve closed by a tapering plug at right angles to the flow of the liquid.

plum (plum), *n.* [Formerly also, erroneously, *plumb* (as in *limb* for *lim*, *numb* for *num*, etc.); < *ME. plomme*, with vowel shortened, earlier *ploume*, < *AS. plūme*, *plūme* = *D. pruim* = *MLG. plume*, *LG. plomme* = *OHG. pfūma*, *pfūmo*, *MHG. pfūme*, *phlūme*, *phrūme*, *prūme*, *prūne*, *G. pfauwe* = *Icel. plōma* = *Sw. plommon* = *Dan. blomme*, *plum*, = *F. prune* (> *E. prune*) = *Pr. pruna* = *Sp. dial. pruna* = *It. pruna*, *prugna*, *f.*, a plum, < *ML. prūna*, *f.*, a plum, *L. prūnum* (*pl. prūna*), neut., a plum, *prūnus*, *f.*, a plum-tree, < *Gr. πρῦνον*, neut., *πρῦνον*, *f.*, earlier *πρῦνον*, neut., a plum, *πρῦνον*, *f.*, a plum-tree. Cf. *Ir. pluma* = *Corn. pluman* = *Gael. plumbas*, *plumbais*, *plum* (< *E. f.*). For the change of *L. r* to *l* and of *n* to *m*, cf. *pilgrim*, ult. < *L. peregrinus*. For the introduction of a Latin and Greek fruit-name into Teut., cf. *peach* and *pear*, also *quince*, quince.] 1. A fruit of any of the trees called *plums* (see defs. 2 and 3); specifically, the fruit of a tree of the genus *Prunus*, distinguished

Plug-cock.
a, body or barrel; b, tapered plug; c, tightening-screw fitted to the bottom of b, and bearing upon a washer; d, thumb-piece, in large cocks replaced by a hand-lever or wrench

from the peach and apricot by its smooth surface, smaller size, and unwrinkled stone, and from the cherry by the bloom on its surface and commonly larger size. Plums are of use chiefly as a dessert fruit (the green gage being esteemed the best of all varieties), and as a dried fruit in the form of prunes. (See *prune*.) Locally a liquor is manufactured from them, and sometimes an oil is expressed from the kernels.

2. One of several small trees of the genus *Prunus*, forming the section *Prunus* proper. The numerous varieties of the common garden-plum are often classed as *P. domestica*; but all these, together with the bullace-plum, known as *P. insititia* (see *bullace*), are believed to be derived ultimately from *P. spinosa* (*P. communis*), the blackthorn or sloe of Europe and temperate Asia, in its truly wild state a much-branched shrub, the branches often ending in a stout thorn. Plum-wood is useful in cabinet-work and turnery. The plum is chiefly cultivated in France (in the valley of the Loire), in Germany, and in Bosnia, Serbia, and Croatia. In America the plum suffers greatly from the ravages of the curculio. (See *plum-curculio*.) The Japanese plum, *P. japonica*, though not insect-proof, is a valued acquisition in California and the southern United States. For native species, see *beach-plum*, *cherry-plum*, and *wild plum*, below.

In Almant, in himself, in male, in peche, Ys grafted plumme.

Paladius, Husbondrie (E. E. T. S.), p. 216. The harvest white plum is a base plum.

Bacon, Nat. Hist., § 509.

It is as if the rose should pluck herself, Or the ripe plum finger its misty bloom.

Keats, Posthumous Sonnets, xiv.

3. One of numerous trees of other genera bearing plum-like fruit. See phrases below.—4. A grape dried in the sun; a raisin.

So when you've swallow'd the Potion, you sweeten your Mouth with a Plum. *Congress, Double-Dealer*, III. 4.

The dried grapes which the French term raisins secs, or raisins passés, we term simply raisins when used for eating uncooked, and *plums* when they form an ingredient in the famous English plum pudding.

S. Dowell, Taxes in England, IV. 37.

5. A good thing; the best or choicest part; a sugar-plum: in allusion to the use of plums or raisins in cakes, plum-pudding, etc.

The reviewer who picks all the plums out of a book is a person who is regarded with reasonable terror and resentment by both authors and publishers.

The Academy, Nov. 2, 1889, p. 280.

Often, indeed, the foot-note contains the very plum of the page. *The Writer*, III. 120.

6. The sum of £100,000 sterling; hence, any handsome sum or fortune generally; sometimes, also, a person possessing such a sum. [Colloq., Eng.]

The Miser must make up his Plum, And dares not touch the hoarded Sum.

Prior, The Ladie, Moral.

Several who were plums, or very near it, became men of moderate fortunes. *Addison, Vision of Justice.*

An honest gentleman who sat next to me, and was worth half a plum, stared at him. *Steele, Tatler*, No. 244.

My brother Heidelberg was a warm man, a very warm man, and died worth a plum at least: a plum! ay, I warrant you, he died worth a plum and a half.

Colman, Clandestine Marriage, III.

Assyrian plum. See *sebasten*.—*Australian plum*, a date-plum or peristemon, *Dioppyros* (*Carpollia*) *australis*, the black plum of Illawarra. For other Australian plums, see *Queensland plum* and *wild plum* (a).—*Beach-plum*, *Prunus maritima*, a straggling bush on the coast from Maine to Mexico, with a rather pleasant red or purple fruit, often preserved.—*Black plum*. See *Australian plum*.—*Blood-plum*. (a) See *Hemalotaphia*. (b) A recently introduced Japanese plum with red flesh. [U.S.]

—*Canada plum*. See *wild plum* (b), below.—*Cherry-plum*, a cherry-like form of the common plum, the variety *myrobolana*. Also called *myrobolan plum*.—*Chick-asaw plum*, *Prunus angustifolia* (*P. Chicaea*), a species probably native in the southern Rocky Mountains, now naturalized widely eastward and northward. It bears a globose red or yellow fruit, thin-skinned and of pleasant flavor. It is often cultivated, receiving special attention as less subject than the common plum to the attacks of the curculio.—*Cocoa-plum*, *Chrysobalanus Icaco*. See *Chrysobalanus*.—*Damaak plum*. Same as *damaon plum*.

—*Damaon plum*. See *damaon*.—*Darling plum*, the red ironwood, *Reynosia latifolia*, a small tree of the West Indies and southern Florida. It bears an agreeable fruit, and its dark-brown wood is very hard and strong.—*Date plum*. See *date-plum*, *Dioppyros*, and *peristemon*.—*Downward plum*, a small tree of the West Indies and Florida: same as *anti-swood*. Also called *saffron plum*.—*East Indian plum*, *Flacourtia Cataphracta* and *F. Ramontchii* (including *F. sapida*). The latter is common, wild or cultivated, throughout India, and found also in the Malay archipelago and in Madagascar, thence called *Madagascar plum*.

Plumbaginaceæ (plum-baj-i-nā'sē-ē), *n. pl.* [*NL.* (Lindley, 1835), *< Plumbago* (-gin-) + *-aceæ*.] Same as *Plumbaginæ*.

Plumbaginæ (plum-baj-jin'ē-ē), *n. pl.* [*NL.* (Ventenat, 1794), *< Plumbago* (*Plumbagin*) + *-æ*.] An order of dicotyledonous gamopetalous plants, the leadwort family, of the cohort *Primulales*, characterized by a tubular or funnel-shaped calyx with five, ten, or fifteen ribs, five stamens opposite the five equal corolla-lobes, five styles, and a free one-celled ovary with one ovule pendulous from a long central stalk (funiculus) which rises from the bottom of the cell. Both in its ovary and its farinaceous albumen it is unlike all other gamopetalous orders. It includes 8 genera, of which *Plumbago* is the type, and from 200 to 270 species, all but 20 of which are contained in the large genera *Statice*, *Acantholimon*, and *Armeria*. They are maritime herbs, natives especially of the Mediterranean region, with a few widely diffused. They are commonly smooth stemless plants, with densely tufted or rosulate leaves, and a branching inflorescence bearing dry rigid bracts and flowers usually having a rose, violet, blue, or yellow corolla, with a calyx of a different color.

plumbaginous (plum-baj'i-nus), *a.* [*< L. plumbago* (-gin-), *plumbago*, + *-ous*.] Resembling plumbago; consisting of or containing plumbago, or partaking of its properties.

plumbago (plum-bā'gō), *n.* [*< L. plumbago*, black-lead, molybdena, also a plant, leadwort, *< plumbum*, lead: see *plumb²*.] 1. Black-lead; graphite. See *graphite*, 2. [*cap.*] [*NL.* (Tournefort, 1700).] A genus of plants, the leadworts, of the order *Plumbaginæ* and tribe *Plumbagieæ*, characterized by a glandular calyx with five short erect teeth, a salver-shaped corolla with slender tube, free stamens, and five styles united into one nearly to the top. The 10 species are natives of warm climates, extending to southern Europe and central Asia. They are usually perennial herbs, with long branches, or partly climbing, bearing alternate clasping leaves, and spikes of blue flowers (or of other colors) at the end of the branches. Several species, bearing the name *leadwort*, are in common cultivation; another, *P. scandens*, a trailing white-flowered species, is native to the south of Florida, extending thence to Brazil, and known, like *P. Europæa*, as *toothwort*, from the use to which its caustic leaves and roots are put. *P. rosea* is used in India to produce blisters.

Plumb-bob.

Plumeria (plö-më'ri-ä), *n.* [*NL.* (Tournefort, 1700), named after Charles *Plumier* (1646-1706), author of many works on American plants.]

A genus of trees of the gamopetalous order *Apocynaceæ*, type of the tribe *Plumeriæ*, and of the subtribe *Euplumeriæ*. It is characterized by the numerous ovules in many rows in two carpels which ripen into two rigid diverging follicles, a calyx glandular within, stamens near the base of the tube of a salver-shaped corolla, winged seeds, and unappendaged anthers.

There are about 45 species, natives of tropical America, some of them naturalized in the Old World. They are trees with thick branches, alternate long-stalked and prominently feather-veined leaves, and large white, yellow, or purplish flowers in terminal cymes. See *jasmine-tree*, *kambodja*, *nossegay-tree*, and *pagoda-tree*.

Plumeriæ (plö-më'ri-ë-ä), *n. pl.* [*NL.* (Endlicher, 1836), < *Plumeria* + *-æ*.] A tribe of plants of the order *Apocynaceæ*, the dogbane family, characterized by the distinct carpels of the ovary, peltate seeds, and unappendaged base of the anther-cells, which are filled with pollen throughout. It includes 41 genera, mainly tropical trees or shrubs—two, *Vallesia* and *Amaoria*, occurring in the United States, and another, the herbaceous genus *Vinea*, extending into Europe, and widely naturalized in the Atlantic States. The four subtribes are typified by the genera *Rauwolfia*, *Cerbera*, *Plumeria*, and *Tabernemontana*.

plumery (plö'më-ri), *n.* [*L. plume* + *-ery*.] Plumes collectively; a number of plumes taken together; a display of plumes.

Helmets or shields Glittering with gold and scarlet *plumery*.

An American, by his boasting of the superiority of the Americans generally, but more especially in their language, once provoked me to tell him that "on that head the least said the better, as the Americans presented the extraordinary anomaly of a people without a language. That they had mistaken the English language for baggage (which is called *plunder* in America), and had stolen it." *Coleridge, Letters, Conversations and Recollections, p. 214.*

"Help yourself, stranger," added the landlord, "while I tote your plunder into the other room." *Hoffman, Winter in the West, letter xxxiii. (Bartlett.)*

2. The act of plundering; robbery. *Plunder*, both name and thing, was unknown in England till the beginning of the war; and the war began not till September, anno 1642. *Heylin, Examen Historicum (1659), i. 248, quoted in F. Hall's Mod. Eng., p. 113.*

For my part I abhor all violence, *plunder*, rapine, and disorders in souldiers. *Pyrrhus, Treachery and Disloyalty, iv. 29.*

The Biscains were almost quite disheartened by reason of the frequent inroads and *plunders* of the Saracens. *North, tr. of Plutarch (ed. 1676), ii. 35.*

3. That which is taken from an enemy by force; pillage; prey; spoil; booty.

The prospect of *plunder* reconciled all disputes. Dutch and English, admirals and generals, were equally eager for action. *Macaulay, War of the Succession in Spain.*

4. Hence, that which is taken by theft, robbery, or fraud: as, the cashier escaped with his *plunder*.—*Syn. 3. Booty, Spoil, etc. See pillage.*

plunder (plun'dēr), *v. t.* [*< MD. and D. plunderen, plunderen* = *MLG. plunderen* = *Sw. plundra* = *Dan. plyndre, plunder*, < *G. plündern*, steal household effects, pillage, plunder, prop. remove household effects, < *plunder*, household effects, trumpery, baggage: see *plunder, n.* The word appears to have been carried from Germany to the other countries during the Thirty Years' War, in which many foreign mercenaries were engaged, and much plundering was done. For the development of sense from 'household effects,' 'clothing,' etc., to 'pillage,' 'rob,' cf. *rob, reave*, as similarly developed from *robe* (*AS. reaf*), clothing.] 1. To take goods or valuables forcibly from; pillage; spoil; strip; rob. He [Baleigh] hath fired and *plundered* Santo Thoma, a Colony the Spaniards had planted with so much blood. *Howell, Letters, i. l. 4.*

It is not demonstrated that kings and aristocracies will *plunder* the people, unless it be true that all men will *plunder* their neighbours if they can. *Macaulay, West. Reviewer's Def. of Mill.*

2. To take by pillage or open force: as, the enemy *plundered* all the goods they found.

Than what is *plundered* in the rage of war. *Dryden.*—*Syn. 1. To despoil, sack, rifle, ravage. See pillage, n.*

plunderage (plun'dēr-āj), *n.* [*< plunder* + *-age*.] In *maritime law*, the embezzlement of goods on board a ship.

plunderer (plun'dēr-ēr), *n.* One who plunders. It was a famous saying of William Rufus, . . . "Who-soever spares perjured men, robbers, *plunderers*, and traitors, deprives all good men of their peace and quietness." *Addison, Freeholder, No. 31.*

plunderous (plun'dēr-us), *a.* [*< plunder* + *-ous*.] Plundering; pillaging.

plunge (plunj), *v.*; pret. and pp. *plunged*, ppr. *plunging*. [*< ME. plungen, ploungen, plongen*, < *OF. plonger, plonchier*, *F. plonger* = *Picard plonker*, < *LL. *plumbicare*, freq., plunge; cf. *Fr. plombar*, plunge, = *It. piombare*, fall heavily like lead, plunge, throw, hurl (see also *plump* 2, *v.*); < *L. plumbum*, lead: see *plumb* 2. The *L. plumbare* means only 'solder with lead,' 'make of lead.' For the *LL. freq. *plumbicare*, cf. *pluck* 1, prob. < *LL. *pilicare, *pilucare*.] 1. *trans.* 1. Without a prudent determination in matters before us, we shall be *plunged* into perpetual errors. *Watts.*

Yet he listen'd, *plunged* in thought. *M. Arnold, Sohrab and Rustum.*

3. To entangle or embarrass: used chiefly in the past participle.

For thou well know'st I have been so *plung'd*, so torn With her resolv'd rejection and neglect. *Beau. and Fl., Knight of Malta, i. 1.*

Plunged and gravelled with three lines of Seneca. *Sir T. Browne, Religio Medici, § 21.*

II. *intrans.* 1. To dive, leap, or rush (into water or some fluid).

Bid me go find some desperate rock from whence Down I may *plunge* into the deepest Main. *J. Beaumont, Psyche, ii. 158.*

Through the forest, like a wild beast, roared and *plunged* the Saco's falls. *Whittier, Mary Garvin.*

2. To fall or rush headlong into some thing, action, state, or condition: as, to *plunge* into debt or into a controversy.

Bid me for honour *plunge* into a war Of thickest foes, and rush on certain death. *Addison, Cato, i. 1.*

3. To throw the body forward and the hind legs up, as an unruly horse.

But th' angry Steed . . . Calls for the Combat, *plunges*, leaps, and prances. *Sylvester, tr. of Du Bartas's Weeks, ii., The Handy-Crafts.*

4. To descend precipitously or vertically, as a cliff.

While she sat on an ivied stone, on the edge of the *plunging* wall, I stood there and made a speech. *H. James, Jr., Pass. Pilgrim, p. 236.*

5. To bet recklessly; gamble for large stakes; speculate. [*Sporting slang.*]

Plunging was the order of the day, and lansquenets was the game at which most of this *plunging* was done. *Fortnightly Rev., N. S., XXXIX. 319.*

plunge (plunj), *n.* [*< plunge, v.*] 1. A sudden dive, leap, or dip into something: as, a *plunge* in the sea.—2. An immersion in difficulty, embarrassment, or distress; the condition of being surrounded or overwhelmed; a strait; difficulty. [*Obsolete or obsolescent.*]

Do you observe the *plunges* that this poor gallant is put to, signor, to purchase the fashion? *B. Jonson, Every Man out of his Humour, iv. 6.*

Then be thou in these *plunges* A patron to thy mother in her pains. *Greens and Lodge, Looking Glass for Lond. and Eng.*

3. A sudden and violent pitching forward of the body, and pitching up of the hind legs, as by an unruly horse.—At a *plunge*, at a pinch; in a strait.

He [Collins] had a pressing and immediate objection to remove. And as he had no great stock of argument, and but small forecast, any thing at a *plunge* would be received which came to his relief. *Warburton, Divine Legation, vi. § 6.*

Flow-and-plunge structure, in *geol.* See *flow* 1.

plunge-bath (plunj'bath), *n.* A bath sufficiently large to admit of the complete immersion of the bather.

plunge-battery (plunj'bat'ēr-i), *n.* See *battery*. **plungeon** (plunj'on), *n.* [*< F. plongeon*, a plungeon, the diver, also diving, < *plonger*, dive, plunge: see *plunge*.] A diving bird. *Ainsworth.*

plunger (plunj'jēr), *n.* 1. One who or that which plunges.—2. A cavalryman; in the plural, cavalry. [*Milit. slang.*]

It's an insult to the whole Guards, my dear fellow, after refusing two of us, to marry an attorney, and after all to bolt with a *plunger*. *Kingsley*, *Two Years Ago*, xvi.

3. A reckless better; a dashing or venturesome gambler or speculator. [Sporting slang.]

—4. A part of a machine or piece of mechanism that plunges. (a) The piston of a Cornish pump. It is a cylindrical mass of iron which plays through a stuffing-box up and down in the plunger-case, and forces the water into the lift or tube, in which it rises to the surface, adit-level, or other desired point. (b) Any solid piston. See *plunger-piston*. (c) The dasher of a churn. (d) The firing-pin or striker used in some breech-loading firearms. (e) A metallic cylinder, hollow or solid, sometimes surrounding and sometimes within the coil of wire of a small inductorium, by the movement of which the intensity of the induced current may be regulated. (f) Any compression-machine in which the force is applied by means of a plunger. See cuts under *hydraulic*, *percussion-fuse*, and *pump*. (g) A cylindrical graduated rod used in blasting to ascertain whether the cartridge has reached the bottom of the drilled hole, when charging the hole for a blast.

5. In *pottery*, a vessel in which clay is beaten by a wheel to the required consistency. *E. H. Knight*.

plunger-bucket (plun'jér-buk'et), *n.* 1. In a pump, a bucket having no valve.—2. Same as *plunger-piston*, 2.

plunger-lift (plun'jér-lift), *n.* 1. In a pump, a bucket having no valve. See cut under *pump*.—2. Same as *plunger-piston*, 2.

plunger-piston (plun'jér-pis'ton), *n.* 1. In a pump, a solid cylindrical piston, either operated by a special piston-rod with a crosshead, or protruding from the pump-barrel sufficiently for the direct attachment of a pitman to it outside of the pump-cylinder.—2. The solid piston of a pressure-gage, steam-indicator, or some similar instrument. Also called *plunger-lift* and *plunger-bucket*.

plunger-pump (plun'jér-pump), *n.* A pump in which the liquid confined in the pump-barrel by a foot-valve or check-valve is forced by displacement, during the inward stroke of a plunger, through another check-valve into the discharge-pipe or passage, or the air-chamber, of the pump.

plunging (plun'jing), *p. a.* Directed from above downward; poured down from a higher plane: as, to subject the enemy to a *plunging* fire. See *fire*, *n.*, 13.

plunging-siphon (plun'jing-si'fon), *n.* A small tube with open ends which is thrust into liquor in bulk in order to withdraw a sample by closing the upper end with the finger.

plungy (plun'ji), *a.* [*ME. plowngy*; < *plunge* + *-y*.] Rainy. [*Prov. Eng.*]

The wynd Nothus leteth his *plungy* blastas. *Chaucer*, *Boethius*, *lib. meter 1*.

plunket (plung'ket), *n.* Same as *blunket*.

Out came six ladies all in crimson satin and *plunket*, embroidered with golde and perle, with Frenche hoodes on their hedges.

Hall, quoted in *Strutt's Sports and Pastimes*, p. 240.

plup. An abbreviation of *pluperfect*.

pluperfect (plū'pér'fekt), *a. and n.* [Abbr. of *L. (NL.) plusquam-perfectum* (sc. *tempus*), the pluperfect tense, lit. 'more than perfect': *L. plus*, more (see *plus*); *quam*, than; *perfectum*, neut. of *perfectus*, perfect: see *perfect*.] *I. a.* Noting the time, or the expression of time, of an action occurring prior to another specified time: as, the *pluperfect* tense.

II. n. In *gram.*, the pluperfect tense of a verb, or an equivalent verb-phrase: for example, Latin *amaveram*, English 'I had loved.'

plural (plū'ral), *a. and n.* [*ME. plurelle*, < *OF. plurel*, *F. pluriel* = *Sp. Pg. plural* = *It. plurale* = *G. plural*, < *L. pluralis*, of or belonging to more than one, or to many; in *gram. pluralis*, sc. *numerus*, the plural number; < *plus* (*plur-*), more: see *plus*.] *I. a.* 1. Containing more than one; consisting of two or more, or designating two or more.

Better have none
Than *plural* faith, which is too much by one.
Shak., *T. G. of V.*, v. 4. 52.

Specifically—2. In *gram.*, noting the form of a word (primarily of a noun or pronoun, then of an adjective qualifying it, and finally of a verb of which it is subject) which marks it as signifying or relating to more than one, as distinguished from *singular*, signifying only one; in some languages, which have a dual form for two, signifying more than two: thus, *boys* is the plural number of *boy*, *men* of *man*, *we* of *I*, *these* of *this*, *are* of *is*, and *were* of *was*.—*Plural marriage*. See *marriage*.

II. n. 1. The state of being manifold or more than one.

If respect be had to the severall arts there professed, Sigebert founded schools in the *plural*. But if regard be taken of the cyclopedy of the learning resulting from those severall sciences, he erected but one grand school.

Fuller, *Ch. Hist.*, II. li. 56.

2. That form of a word which expresses plurality, or the plural number. Abbreviated *pl. pluralisation*, *pluralise*, etc. See *pluralization*, etc.

pluralism (plū'ral-izm), *n.* [*plural* + *-ism*.]

1. The character of being plural.—2. The holding by one person of two or more offices at the same time; specifically, the holding of two or more livings or benefices at the same time, or the ecclesiastical system under which this is possible.

pluralist (plū'ral-ist), *n.* [*plural* + *-ist*.] A clergyman who holds at the same time two or more ecclesiastical benefices.

Who, being a *pluralist*, may under one Surplice, which is also Hinnen, hide foure benefices besides the metropolitan toe.

Milton, *Apology for Smeectymnus*.

Many ecclesiastics, some even of those who affected to be evangelical, were *pluralists*, and left their numerous parishes to the care of those who would serve at the lowest price.

Bancroft, *Hist. U. S.*, I. 215.

pluralistic (plū'ra-lis'tik), *a.* [*pluralist* + *-ic*.] Holding to the existence of many reals.

plurality (plū'ral-i-ti), *n.*; *pl. pluralities* (-tiz).

[*ME. pluralite*, < *OF. pluralite*, *F. pluralité* = *Sp. pluralidad* = *Pg. pluralidade* = *It. pluralità*, < *LL. pluralitas* (-t)s, the plural number, < *L. pluralis*, plural: see *plural*.] 1. The character of being plural; the fact of expressing or of consisting of more than one; also, a number greater than unity: as, a *plurality* of gods; a *plurality* of worlds.

And bigge zow benefices *pluralite* to hane.

Piers Plowman (C), iv. 33.

The wantonnesse
Of their insatiate appetite, that feeds
On such *plurality* of viands, breeds
Offensive humors.

Times' Whistle (E. E. T. S.), p. 57.

We are now led to recognise the doctrine of the "*plurality* of causes" in our explanations of things; and the instances of this *plurality* are both numerous and familiar.

A. Bain, *Emotions and Will*, p. 213.

2. The greater number; the majority.

Take the *plurality* of the world, and they are neither wise nor good.

Sir R. L'Estrange.

The two avoyers are elected by the *plurality* of suffrages of all the citizens.

J. Adams, *Works*, IV. 332.

3. In *U. S. politics*, the number by which the votes cast for the candidate who receives the greatest number exceed the votes cast for the candidate who receives the next greatest number, when there are more than two candidates and no one candidate receives a majority of the votes. If A receives 5,000 votes, B 4,000, and C 3,000, no one has a majority, but A has a plurality of 1,000 over B. In most of the States a plurality elects a candidate; in others, as Connecticut and Rhode Island, if no candidate (as for governor) receives a popular majority, the election goes to the legislature. Compare *majority*.

4. *Eccles.*: (a) The holding of two or more benefices by the same person at the same time; *pluralism*.

The most part of them were such as had preach'd and cri'd down, with great show of zeale, the avarice and *pluralities* of Bishops and Prelates.

Milton, *Hist. Eng.*, III.

(b) One of two or more livings held by the same incumbent. See *living*, 4 (a).

Who engross many *pluralities* under a non-resident and slubbing dispatch of souls.

Milton, *Apology for Smeectymnus*.

pluralization (plū'ral-i-zā'shon), *n.* [*pluralize* + *-ation*.] The act of pluralizing; the attribution of plurality to a person or thing. Also spelled *pluralisation*.

"Inferiors invariably use the third person plural in addressing their superiors: a form which, while dignifying the superior by *pluralization*, increases the distance of the inferior by its relative indirectness."

H. Spencer, *Pop. Sci. Mo.*, XIII. 300.

pluralize (plū'ral-iz), *v.*; pret. and pp. *pluralized*, ppr. *pluralizing*. [*plural* + *-ize*.] *I. trans.* To make plural by using the termination of the plural number; attribute plurality to; express in the plural form.

II. intrans. Eccles., to hold two or more benefices at the same time.

Also spelled *pluralise*.

plurisy (plō-ri-si), *n.* [An altered spelling of *pleurisy*, simulating *L. plus* (gen. *pluris*), more, and taking sense accordingly.] 1. Superabundance.

Oh, great corrector of enormous times,

... that heat'st with blood

The when it is sick, and cur'st the world

O' the *plurisy* of people.

Fletcher (and another), Two Noble Kinsmen, v. 1.

Thy *plurisy* of goodness is thy ill.

Massinger, Unnatural Combat, iv. 1.

2. Superabundance of blood; a plethora.

You are too insolent;

And those too many excellencies, that feed

Your pride, turn to a *plurisy*, and kill

That which should nourish virtue.

Beau. and Fl., Custom of the Country, ii. 1.

plurivalve (plō-ri-valv), *a.* [*< L. plus (plur-), more, + valva, a folding door: see valve.*] 1. In entom., having several valves or sheathing-plates.—2. In bot., having many valves: said especially of capsules.—3. In conch., same as *multivalve*.

plus (plus), *a.* [*< L. plus (plur-), more, pl. plures, OL. pleores, more, several, the majority (compar. of multus, much), = Gr. πλεον, πλέον, pl. πλείονες, more, compar. of πολλός, many (= E. feel²); cf. πλέω, full, L. plenus, full: see plenty.*] 1. More (by a certain amount); increased (by a specified addition): followed by a noun as an apparent object (a preposition, *by*, to be supplied): as, the interest *plus* the disbursements amounts to so much; 6 *plus* 9 is 15: in this and the next two uses correlative to *minus*. In algebra and arithmetic this sense is indicated by the sign +, called the plus sign or sign of addition: as, $a + b = x$, which is read "a plus b equals x." [A sign like this was formerly sometimes used as a contraction of Latin et, and.]

His prose, then, is that of a wise man *plus* a poet.

E. C. Stedman, Poets of America, p. 134.

2. More than nothing; belonging to the positive side, as of an account; above zero, or above the lowest point of positive reckoning: as, a *plus* quantity in an equation (that is, one having the plus sign, or when initial having no sign, before it).—3. Marking more than zero; positive: as, the *plus* sign.

Emerson, Complete Prose Works, II. 352.

4. In etym., in composition with; with the addition of (the word or element following): expressed, as in mathematics, by the sign + (see the etymologies in this work). The same sign is occasionally used to indicate cognate or related forms.—*Logarithmic plus and minus. See logarithmic.*

plush (plush), *n.* [Formerly also *pelluce*; = *D. plus*, a tuft or lock of wool or hair, *plush*, = *G. plusch* = *Sw. plys*, *plysch* = *Dan. plyds*, *< F. pluche, peluche*, shag, *plush*, = *Sp. peluza, pelusa, pelusa* = *Pg. pelucia*, *plush*, nap, = *It. peluzo, pelucio*, dial. *plusia*, *plush*, nap, down; *< ML. as if plucius*, hairy, shaggy, *< L. pilus*, hair: see *pil*, and cf. *peruke* and *pluck*.] A cloth of silk or cotton, and sometimes of wool (especially of camel's and goat's hair), having a softer and longer nap than that of velvet. *Plush* is used especially for upholstery, women's cloaks, expensive liveries, and men's silk hats, and since 1870 as a ground for embroidery in house-decoration, for curtains, and the like.

The rich Tartars sometimes fur their gowns with *pelluce* or like shag, which is exceeding soft, light, and warm.

Bakstuy's Voyages, I. 98.

My tailor brings me home my fine, new, coloured-cloth suit, my cloak lined with *plush*—as good a suit as ever I wore in my life.

Pepys, Diary, Oct. 23, 1664.

Banbury plush, woolen plush used for upholstery and the like, first made in the town of Banbury, England. (See also *furniture-plush*.)

plush-copper (plush'kop'er), *n.* A capillary variety of cuprite, or red oxid of copper: same as *chalcotrichite*.

plusher (plush'er), *n.* [Origin obscure.] A kind of dogfish.

The Plucher are pursued and devoured by a bigger kind of fish, called a *Plusher*, being somewhat like the Dog-fish.

R. Carew, Survey of Cornwall, p. 34.

plush-stitch (plush'stich), *n.* In worsted- or wool-work, a stitch that forms freely hanging loops which can be cut, thus producing a long soft nap similar to that of plush, or can be left uncut, as a kind of fringe.

plush-velvet (plush'vel'vet), *n.* Plush having a shorter nap than is common, and thus resembling velvet.

plush-velveteen (plush'vel-ve-tēn'), *n.* Cotton plush closely imitating plush made of silk.

plushy (plush'i), *a.* [*< plush + -y.*] Consisting of or resembling plush; shaggy and soft.

Then followed a long gaze out of the window, across the damp gravel and *plushy* lawn.

community or society by virtue of his wealth; a person possessing power or influence solely or mainly on account of his riches; a member of a plutocracy.

We have had *plutocrats* who were patterns of every virtue. *Gladstone*, *Nineteenth Century*, XXI. 17.

The *plutocrats* and bureaucrats, the money-changers and devourers of labour. *Kingsley*, *Alton Locke*, xli. (*Davies*.)

plutocratic (plŭ-tŏ-krat'ik), *a.* [*< plutocrat + -ic.*] Pertaining to or characteristic of a plutocracy or a plutocrat: as, a *plutocratic* government; *plutocratic* ideas.

plutologist (plŭ-tol'ŏ-jist), *n.* [*< plutology + -ist.*] One skilled in plutology, or the science of wealth and its distribution.

As the *plutologists* have explained, the means of happiness are immensely increased by that complex system of mutual co-operation which has been gradually organized among civilized men.

H. Sidgwick, *Methods of Ethics*, p. 408.

plutology (plŭ-tol'ŏ-jī), *n.* [*< Gr. πλοῦτος*, wealth, + *-λογία*, *< λέγω*, speak: see *-ology*.] The science of wealth; the body of natural laws governing the production and distribution of wealth; political economy.

Several authors have tried to introduce totally new names [for political economy], such as *plutology*, *chromatistics*, *catalactics*. *Jevons*, *Pol. Econ.* (2d ed.), Pref.

Plutonian (plŭ-tŏ-ni-an), *a. and n.* [*< L. Plutonium*, *< Gr. Πλούτωνος*, of Pluto or the nether world, *< Πλούτων*, Pluto: see *Pluto*.] *I. a.* Of or pertaining to Pluto; Plutonic.

The night's *Plutonian* shore. *Poe*, *The Raven*.

II. n. A Plutonist.

Plutonic (plŭ-ton'ik), *a.* [*< L. Pluto(n)*, *< Gr. Πλούτων*, Pluto, + *-ic.*] *1.* Of or relating to Pluto or the regions of fire; subterranean; dark.—*2.* Pertaining to or designating the system of the Plutonists: as, the *Plutonic* theory.—*3.* In *geol.*, formed deep below the surface. *Plutonic* rocks are such igneous rocks as have been formed under conditions of depth and pressure, and have cooled slowly, so as to have acquired in general a distinctly crystalline structure: the term *Plutonic* is opposed to *volcanic*, the former designating rocks formed at some depth beneath the surface, the latter rocks of igneous origin but of superficial formation. As used by Lyell, the word is nearly the equivalent of *metamorphic*.

Granite is thus a decidedly *plutonic* rock—that is, it has consolidated at some depth beneath the surface, and in this respect differs from the superficial volcanic rocks, such as lava, which have flowed out above ground from volcanic orifices. *A. Geikie*, *Text-Book of Geology*, II. ii. § 7.

Plutonic theory, the geological theory that the present aspect and condition of the earth's crust are mainly due to igneous action.

Several modern writers, without denying the truth of the *Plutonic* or *metamorphic theory*, still contend that the crystalline and non-fossiliferous formations, whether stratified or unstratified, such as gneiss and granite, are essentially ancient as a class of rocks.

Lyell, *Prin. of Geol.* (11th ed.), I. 129.

Plutonism (plŭ-tŏ-nizm), *n.* [*< Plutonist + -ism.*] The doctrines of the Plutonists.

Plutonist (plŭ-tŏ-nist), *n.* [*< Pluton-ic + -ist.*] One who adopts the *Plutonic* theory.

Plutus (plŭ'tus), *n.* [*L.*, *< Gr. Πλούτος*, the god of riches, a personification of πλοῦτος, riches, wealth; prob. from the root of πλέω, full, *L. plus*, more, etc.: see *plus*.] In *classical myth.*, a personification of wealth, described as a son of Iasion and Demeter, and intimately associated with Eirene or Peace, who is often represented in art grouped with the infant Plutus. Zeus is said to have blinded him, in order that he might not bestow his favors exclusively on good men, but should distribute his gifts without regard to merit.

pluvial (plŭ'vi-əl), *a. and n.* [*I. a. = F. pluvial = Pr. Sp. Pg. pluvial = It. piuviale, < L. pluvialis*, of or pertaining to rain, *< pluvia*, rain, *< plu-*

vius, rainy: see *pluviosus*. *II. n.* *< F. pluvial* (*Sp. capa pluvial*), *< ML. pluvialis*, etc., a rain-cloak: see *I.*] *I. a.* 1. Rainy; humid; relating to rain; also, very rainy; characterized by great or extensive rainfall.—*2.* In *geol.*, depending on or arising from the action of rain.

The particular kind of denudation effected by means of rain is called *pluvial* denudation.

Huxley, *Physiography*, p. 181.

II. n. Eccles., a cope: so called from its use in outdoor processions, etc., as a protection from the weather.

Pluviales (plŭ-vi-ā'lēz), *n. pl.* [*NL.*, pl. of *L. pluvialis*, pertaining to rain: see *pluvial*.] The plovers and plover-like birds: synonymous with *Charadriomorphæ*.

pluvialiform (plŭ-vi-āl'i-fŏrm), *a.* [*< NL. pluvialiformis, < Pluviales*, *q. v.*, + *L. forma*, form.] Plover-like; pluvialine; charadriomorphie.

Pluvialiformes (plŭ-vi-āl-i-fŏr'mēz), *n. pl.* [*NL.*, pl. of *pluvialiformis*: see *pluvialiform*.] The schizognathous water-birds, an extensive series of wading and swimming birds more or less related to the plovers, corresponding to the *Charadriomorphæ* and *Coccomorphæ* of Huxley, or the orders *Limicolæ*, *Longipennes*, and *Pygopodes*.

pluvialine (plŭ'vi-ā-lin), *a.* [*< Pluviales + -ine*.] In *ornith.*, of or pertaining to a plover; resembling or related to the plovers; charadriomorphie: as, *pluvialine* characters; a *pluvialine* genus of birds.

pluviometer (plŭ-vi-am'e-tēr), *n.* Same as *pluviometer*.

pluviometrical (plŭ'vi-ā-met'ri-kəl), *a.* Same as *pluviometric*.

Pluvianellus (plŭ'vi-ā-nel'us), *n.* [*NL.* (*Hombron* and *Jacquinot*), dim. of *Pluvianus*: see *Pluvianus*.] A genus of small wading birds re-

Pluvianellus sociabilis.

lated to the turnstones and surf-birds, with a hind toe and very short tarsus, containing one species, *P. sociabilis*, from the southern regions of South America.

Pluvianus (plŭ-vi-ā'nus), *n.* [*NL.* (*Viellot*, 1816), *< L. pluvia*, rain: see *pluvial*.] A genus

Crocodile-bird (*Pluvianus aegyptius*).

of plovers, belonging to the subfamily *Cursoriinae*; the crocodile-birds. *P. aegyptius*, the only species, inhabits northern Africa, and is among the birds supposed to be the trochilus of Herodotus (the *Hoplopterus spinosus* being another). See *trochilus*, and cut under *spurred*. Also called *Cursorius*, *Hyas*, *Amnophila*, and *Chlodromus*.

pluviograph (plŭ'vi-ŏ-gráf), *n.* [*< L. pluvia*, rain, + *Gr. γράφω*, write.] A self-recording rain-gage.

In Beckley's *pluviograph* a pencil, attached to a vessel which sinks as it receives the rain, describes a curve on a sheet of paper fixed round a rotating cylinder.

Encyc. Brit., XX. 257.

pluviometer (plŭ-vi-om'e-tēr), *n.* [*Also pluviometer; < L. pluvia*, rain, + *Gr. μέτρον*, measure.] An instrument for collecting and measuring the quantity of water that falls in rain, snow, etc., at a particular place; a rain-gage. See cut in next column.

Pluviometer. *a.*, vertical section.

pluviometric (plŭ'vi-ŏ-met'rik), *a.* [*< pluviometer + -ic.*] Made by means of a pluviometer: as, *pluviometric* observations.

pluviometrical (plŭ'vi-ŏ-met'ri-kəl), *a.* [*< pluviometric + -al.*] Same as *pluviometric*.

pluviometrically (plŭ'vi-ŏ-met'ri-kəl-i), *adv.* In a pluviometric manner; by means of pluviometry; by the use of the pluviometer.

pluviometry (plŭ-vi-om'et-ri), *n.* [*< L. pluvia*, rain, + *Gr. -μετρία*, *< μέτρον*, measure.] The measurement of the amount of precipitation of rain or snow; the use of the pluviometer.

pluvioscope (plŭ'vi-ŏ-skŏp), *n.* [*< L. pluvia*, rain, + *Gr. σκοπεῖν*, view.] A rain-gage; a pluviometer.

The results are here tabulated of the pluviometric observations taken at Paris during the years 1890-70 with the *pluvioscope* invented by the author (*M. Hervé Mangon*). *Nature*, XXXV. 478.

Pluviose (plŭ'vi-ŏs), *n.* [*F.*, *< L. pluviosus*, full of rain, *< pluvia*, rain.] The fifth month of the French revolutionary calendar, from January 20th to February 18th inclusive in the year 1794.

pluvios (plŭ'vi-us), *a.* [*< ME. pluviosus = F. pluvieux = Pr. plovos = Sp. pluvioso = Pg. pluvioso, chuvoso = It. piovoso, < L. pluvius*, rainy, causing or bringing rain, *< pluer*, rain, imper. *pluit*, it rains.] Rainy; pluvial.

In places over cold and *pluviosus*, oyles is to doon. *Palladius*, *Husbandrie* (E. E. T. S.), p. 151.

The fungus parcels about the wicks of candles . . . only signifieth a moist and *pluviosus* air about them, hindering the avolation of the light and favillous particles. *Sir T. Browne*, *Vulg. Err.*, v. 24.

ply (pli), *v.*; pret. and pp. *plied*, ppr. *plying*. To bend; mold; shape.

Woman of manye sooles half a clerk is; But certeynly a yonge thyng may men gye, Right as men may warm wax with handes pleye. *Chaucer*, *Merchant's Tale*, l. 186.

2†. To draw; work.

Then all his letters will be such ecstasies, such vows and promises, which you must answer short and simply, yet still *ply* out of them your advantages. *Dryden*, *Sir Martin Mar-all*, l. 2.

3. To use or employ diligently; keep on using with diligence and persistence; apply one's self steadily to; keep busy with; toil at.

Who shall bear your part, And be in Padua here Vincentio's son, Keep house and *ply* his book, welcome his friends, Visit his countrymen and banquet them? *Shak.*, *T. of the S.*, l. 1. 201.

Lord George Gordon the left wing guided, Who well the sword could *ply*. *Battle of Alford* (*Child's Ballads*, VII. 259).

The bold swain, who *plies* his oar, May lightly row his bark to shore. *Scott*, *Rokeby*, ll. 31.

So lustily did Van Poffenburgh *ply* the bottle that in less than four short hours he made himself and his whole garrison, who all sedulously emulated the deeds of their chieftain, dead drunk. *Irving*, *Knickerbocker*, p. 351.

4. To practise or perform with diligence and persistence; pursue steadily: as, to *ply* one's trade.

Then, laying aside those their holy garments, they *plied* their work till the evening. *Purshas, Pilgrimage*, p. 145.
The needle *plies* its busy task. *Conover, Task*, iv. 150.
"When first"—(he so began)—"my trade I *plied*,
Good master Addie was the parish-guide."
Crabbe, Works, I. 129.

Gambling is not permitted on the grounds at Epsom, but there were many gamblers on the grounds, and they sought every occasion to *ply* their vocation.

T. C. Crawford, English Life, p. 19.

5. To attack or assail briskly, repeatedly, or persistently.

They so warmly *plied* our divided fleets that whilst in conflict the merchants sail'd away, and got safe into Holland.
Keely, Diary, March 12, 1672.

The hero stands above, and from afar
Plies him with darts and stones, and distant war.
Dryden, Æneid, viii.

Again he [Apollo] took
The harnessed steeds, that still with horror shook,
And *plies* 'em with a lash, and whips 'em on,
And, as he whips, upbraids them with his son.
Addison, tr. of Ovid's Metamorph., II.

6. To address with importunity or persistent solicitation; urge, or keep on urging or soliciting, as for a favor.

He *plies* the duke at morning and at night.
Shak., M. of V., III. 2. 279.

A courtier would not *ply* it so for a place.

B. Jonson, Volpone, III. 4.

I have been always *plying* you to walk and read.
Swift, Journal to Stella, xxxiv.

Sunderland was *plied* at once with promises and menaces.

Macaulay, Hist. Eng., vi.

7. To offer with persistency or frequency; press upon for acceptance; continue to present or supply: as, to *ply* one with drink, or with flattery.

If you perceive that the untravelled company about you take this down well, *ply* them with more such stuff.
Dekker, Gull's Hornbook, p. 113.

With cup full ever *plied*,
And hearts full never dried.

Chapman, The Blind Beggar of Alexandria (song).

They adore him, they *ply* him with flowers, and hymns, and incense, and flattery.
Thackeray.

8. To apply; devote with persistency or perseverance.

Ne ever cast his mind to covet trade,
Or *ply* himself to any honest trade.

Spenser, F. Q., III. vii. 12.

9. To exert; acquit.

But it is worthy of memorie to see how the women of ye towne did *plye* themselves with their weapons, making a great massacre vpon our men.

Webbe, Travels (ed. Arber), p. 23.

II. *intrans.* 1. To bend; yield; incline.

The gold of hem hath now so badde alayes
With bras that, though the coyne be fair at ye,
It wolde rather breeste atwo than *plye*.

Chaucer, Clerk's Tale, I. 1112.

To *plye* this wale or that wale to good or to bad, ye shall have as ye use a child in his youth.

Ascham, The Scholemaster, p. 46.

As like a lion he could pace with pride,
Ply like a plant, and like a river alide.

Sir J. Davies, Dancing.

2. To keep at work or in action; busy one's self; work steadily; be employed.

All D'Aulnay's company *plied* for their fortifying with palisades, and the friars as busy as any.

Winthrop, Hist. New England, II. 162.

Ere half these authors be read (which will soon be with *plying* hard and daily), they cannot choose but be masters of any ordinary prose.

Milton.

In vain their airy Pinions *ply*.

Congress, Pindaric Odes, II.

And around the bows and along the side
The heavy hammers and mallets *plied*.

Longfellow, Building of the Ship.

3. To proceed in haste; sally forth.

Thither he *plies*,
Undaunted to meet there whatever power
Or spirit of the nethermost abyss
Might in that noise reside.

Milton, P. L., II. 964.

Adrian Block . . . *plied* forth to explore the vicinity.

Bancroft, Hist. U. S., II. 83.

4. To go back and forth or backward and forward over the same course; especially, to run or sail regularly along the same course, or between two fixed places or ports; make more or less regular trips: as, the boats that *ply* on the Hudson; the steamers that *ply* between New York and Fall River; the stage *plied* between Concord and Boston: said both of the vessels or vehicles that make the trips and of those who sail or run them.

And then they *ply* from th' eaves vnto the ground,
With mud-mixt Reed to wall their mansion round.
Spenser, tr. of Du Bartas's Weeks, II. The Handy-Crafts.

Cæsar, causing all his Boats and Shallops to be fill'd with Souldiers, commanded to *ply* up and down continually with relief where they saw need. *Milton, Hist. Eng.*, II.

Busy housewives *plied* backwards and forwards along the lines, helping everything forward by the nimbleness of their tongues. *Irons, Knickerbocker*, p. 129.

5. *Naut.*, to beat; tack; work to windward: as, to *ply* northward.

That day we *plied* downe as farre as our Ladie of Holland, and there came to an anker.

Hakluyt's Voyages, I. 310.

The Currents at Cape La Vela do seldom shift, therefore Ships that *ply* to Wind-ward to get about it do not *ply* near the shore, but stand off to Sea.

Dampier, Voyages, II. III. 101.

She was flying dead into the east, and every minute her keel passed over as many fathoms of sea as would take her hours of *plying* to recover.

W. C. Russell, Death Ship, xii.

6. To offer one's services for trips or jobs, as boatmen, hackmen, carriers, etc.

He was forced to *ply* in the streets, as a porter, for his livelihood.

Spectator.

There is at Edinburgh a society or corporation of errand-boys called *Cawdies*, who *ply* in the streets at night with paper lanterns, and are very serviceable in carrying messages.

Smollett, Humphrey Clinker (J. Melford to Sir Watkin [Phillips]).

[It] will be readily pointed out by any one of the fifty intelligent fly-drivers who *ply* upon the pier.

Barham, Ingoldsby Legends, II. 139.

ply (pli), *n.* [*< ply, v.*] 1. A fold; a thickness: often used in composition to designate the number of thicknesses or twists of which anything is made: as, three-*ply* thread; three-*ply* carpets.

I found myself at last on the diver's platform, twenty pounds of lead upon each foot, and my whole person swollen with *ply* and *ply* of woollen underclothing.

R. L. Stevenson, Education of an Engineer.

2. Bent; turn; direction; bias.

Custom is most perfect when it beginneth in young years; . . . late learners cannot so well take up the *ply*.

Bacon, Custom and Education (ed. 1887).

He bent all the subordinate branches of their government to the *ply* of his own favourite passion.

Goldsmith, Seven Years' War, v.

Under Elizabeth the growing taste for theatrical representations had begun gradually to displace it [the bailing of animals, and especially of bulls and bears], and to give a new *ply* and tone to the manners of the rich.

Lecky, Eng. in 18th Cent., iv.

He [Hamilton] accepted the constitution as it was, and did his best to give it the *ply* which he desired by practical interpretation.

Nineteenth Century, XXXIII. 106.

Plyctolophina, **Plyctolophus**. See **Plyctolophus**, etc.

plyer, *n.* See **plier**.

plyght¹, *n.* and *v.* A Middle English form of **plight**¹, **plight**², etc.

plyght², **plyghtet**. Middle English forms of the preterit and past participle of **pluck**¹.

Plymouth Brethren. See **brother**.

Plymouth cloak. A staff; a cudgel. [Slang.] [That is, a cane, a staff; whereof this is the occasion. Many a man of good extraction, coming home from far voyages, may chance to land here, and, being out of sorts, is unable for the present time and place to recruit himself with clothes. Here (if not friendly provided) they make the next wood their draper's shop, where a staff cut out serves them for a covering. For we use, when we walk in *cuervo*, to carry a staff in our hands, but none when in a cloak. *Ray, Proverbs* (1742), p. 238.]

Reserving still the emblem of a souldier (his sword) and a *Plymouth cloak*, otherwise called a battoone.

Lenten's Characterisms, Char. 30. (Nares.)

Shall I walk in a *Plymouth cloak* (that 's to say) like a rogue, in my hose and doublet, and a crab-tree cudgel in my hand?

Dekker, Honest Whore, II.

Plymouthism (plim'uth-izm), *n.* [*< Plymouth + -ism.*] The doctrines of the Plymouth Brethren. See **Plymouth Brethren**, under **brother**.

Plymouthist (plim'uth-ist), *n.* [*< Plymouth + -ist.*] An adherent of Plymouthism; one of the Plymouth Brethren; a Plymouthite.

There are therefore at least five official divisions or sects of *Plymouthists*.

Encyc. Brit., XIX. 239.

Plymouthite (plim'uth-it), *n.* [*< Plymouth + -ite*².] One of the Plymouth Brethren.

Plymouth Rock. A large and serviceable variety of the domestic hen, of American origin. Both cock and hen have the plumage finely and evenly barred transversely throughout with blue-black on a ground of pearl-gray. The legs and beak are clear-yellow, and the tail is very small. The normal variety has an upright comb; but there are also pea-combed *Plymouth Rocks*. White *Plymouth Rocks* have been introduced recently.

plyt, **plytet**, *n.* Middle English forms of **plight**². **P. M.** An abbreviation: (a) of *post meridiem*, 'after noon or midday' (also *P. M.*, *p. m.*); frequently used as synonymous with *afternoon* or *evening*; (b) of *postmaster*; (c) of *peculiar meter*.

pm. In dental formulæ, an abbreviation of *premolar*.

pneodynamics (nê'ô-di-nam'iks), *n.* [Irreg. *< Gr. pneiv, breathe, + dynamis, power*: see *dynamics*.] The science of the mechanics of respiration.

pneogaster (nê-ô-gas'tér), *n.* [Irreg. *< Gr. pneiv, breathe, + gastēr, the stomach*.] The respiratory tract; the respiratory or branchial intestine considered as a part of the general intestinal system, being developed from the embryo in connection therewith. It consists of air-passages in the widest sense, as lungs, windpipes, etc., or their equivalents.

pneogastric (nê-ô-gas'trik), *a.* [*< pneogaster + -ic.*] Of or pertaining to the pneogaster.

pneograph (nê-ô-gráf), *n.* [Irreg. *< Gr. pneiv, breathe, + γράφειν, write*.] An instrument invented by Dr. Mortimer Granville for testing and indicating the duration, force, and continuity of expiration in diverse conditions of the lungs. It consists of a delicately suspended and counterpoised semi-disk of talc, which is moved by the breath when held in front of the mouth. The disk carries a needle, which makes a tracing on smoked paper caused to move uniformly in relation with the needle. The tracings indicate by their undulations the character of the expiratory movement, from which the condition of the lungs may be inferred.

pneometer (nê-om'ô-tér), *n.* [Irreg. *< Gr. pneiv, breathe, + μέτρον, measure*.] A spirometer.

pneometry (nê-om'ô-et-ri), *n.* [Irreg. *< Gr. pneiv, breathe, + μέτρον, measure*.] Measurement of inspired or expired air.

pneoscope (nê'ô-skôp), *n.* [Irreg. *< Gr. pneiv, breathe, + σκοπεῖν, view*.] An instrument for measuring the extent of movement of the thorax.

pneuma (nû'mâ), *n.* [NL., *< Gr. πνεῦμα, breathe, < pneiv, blow, breathe*. Cf. *neume, neuma*.] 1. Breath; spirit; soul.—2. A breathing. In *early church music*: (a) A form of ligature at the end of certain plain-chant melodies, resembling the pericæle, but differing from it in being sung to an unmeaning syllable having no connection with the text. Its use can be traced with certainty to the fourth century, and it is still employed in the services of the Roman Catholic Church, especially at high mass. (b) Same as *neume*, 2.

pneumathrosis (nû-mâr-thrô'sis), *n.* [NL., *< Gr. πνεῦμα, air, + ἄρθρωσις, a jointing*: see *arthrosis*.] The presence of air in the cavity of a joint.

pneumathorax (nû-mâ-thô'raks), *n.* An erroneous form of *pneumothorax*.

pneumatic (nû-mat'ik), *a.* and *n.* [= F. *pneumatique* = Sp. *pneumático* = Pg. It. *pneumatico*, *< L. pneumaticus*, *< Gr. πνευματικός*, relating to wind or air, *< πνεῦμα, wind, air, breath, spirit*, *< pneiv, blow, breathe*.] 1. *a.* 1. Of or pertaining to air, or gases in general, or their properties; also, employing (compressed) air or other gas as a motive power, as, *pneumatic* experiments; a *pneumatic* engine. *Pneumatic* notes numerous instruments, machines, apparatus, etc., for experimenting on elastic fluids, or for working by means of the compression or exhaustion of air.

2. Consisting of or resembling air; having the properties of an elastic fluid; gaseous.

The *pneumatic* substance being in some bodies the native spirit of the body. *Bacon*.

3. Moved or played by means of air: as, a *pneumatic* instrument of music.—4. In *zool.*: (a) Filled with air; fitted to receive or contain air; pneumatized, as the air-cells or the bones of birds. (b) Of or pertaining to the respiratory system of any animal.—*Pneumatic action*, in *organ-building*, an action in which the keys, stop-knobs, or pedals merely make connections whereby the desired motions may be pneumatically effected. The *pneumatic* principle involved is either that of a small bellows which is inflated or emptied by the key or coupler, or that of a tube with pistons or valves at the ends which work sympathetically.—*Pneumatic bellows, coupler, etc.* See *pneumatic action*, above.—*Pneumatic cabinet*, in *med.*, an air-tight cabinet in which a patient is placed, so that the atmospheric pressure on the surface of the body may be increased or diminished.—*Pneumatic calisson*. See *calisson*, 3 (c).—*Pneumatic car, clock, conductor, drill*. See the nouns.—*Pneumatic despatch*, the transmission of articles from one point to another by air-pressure through a tube specially prepared for the purpose. Practically this is limited to the sending of small articles, as letters, telegraphic despatches, etc., for short distances, as between different stations in a large city. They are inclosed in a suitable box, which is propelled by compressed air through a tube from 2 to 3 inches in diameter; the return takes place by the atmospheric pressure, the air in the tube being exhausted at the first station.—*Pneumatic-despatch tube*, a tube traversed by a car or carrier which receives and delivers letters or parcels at stations along a route. Motion is caused by pressure of air, which is either forced into the tube from behind the car or exhausted in front of it, or both simultaneously. Special devices have been contrived for perfecting the construction of the cars and for arresting them at the points desired. The Brisbane carrier is a hollow ball which rolls along the interior of the pneumatic tube.—*Pneumatic differ-*

entiation, in *med.*, the causing a patient to breathe air of a different tension from that which surrounds his body.—**Pneumatic duct**, in *comp. anat.* See *ductus pneumaticus*, under *ductus*.—**Pneumatic elevator**, excavator, gun, etc. See the nouns.—**Pneumatic jig**, in *mining*, an air-jig; a jig in which the separation is effected by blasts of air instead of an intermittent current of water.—**Pneumatic organ**. See *organ*.—**Pneumatic paradox**, that peculiar exhibition of atmospheric pressure which retains a valve on its seat under a pressure of gas, allowing only a film of gas to escape.—**Pneumatic pen**. See *pen*.—**Pneumatic philosophy**, the science of metaphysics or psychology; pneumatology.—**Pneumatic physicians**, a school of physicians, at the head of which was Aethanas, who made health and disease to consist in the different proportions of a fancied spiritual principle, called *pneuma*, from those of the other elementary principles.—**Pneumatic pile**. (a) A tube open at the lower or penetrating end, and closed from the air at the top, but communicating with a receiver from which air is exhausted. The pressure of the air acts to force the pile downward, and at the same time the silt within it is pressed upward and discharged into the receiver. (b) A caisson within which compressed air excludes the water, permitting necessary operations to be carried on inside it.—**Pneumatic spring, tube**, etc. See the nouns.—**Pneumatic trough**, a form of trough used by the physicist or chemist in experiments with gases. By its use the gas can be collected in a bell-jar or other receptacle over a surface of water or mercury.

II. n. 1. In *organ-building*, one of the members of a pneumatic action, whether a bellows or a tube. See *pneumatic action*, above.—**2.** Same as *pneumatology*, 2, where see quotation. **pneumatal** (nū-mat'ī-kal), *a. and n.* [*< pneumatic + -al.*] **I. a.** Same as *pneumatic*.

This body then accompanying the soul he calls *pneumatal*, that is (not spiritual in the Scripture sense, but) spirituous, vaporous, or airy.

Cudworth, *Intellectual System*, p. 785.

II. f. n. A vaporous substance; a gas. **Bacon. pneumatically** (nū-mat'ī-kal-i), *adv.* By means of pneumatic force or of some pneumatic contrivance: as, *pneumatically sunk caissons*.

pneumaticity (nū-mat'is'ī-ti), *n.* [*< pneumatic + -ity.*] The state of being pneumatic, or hollow and filled with air; capacity of being inflated with air; inflation by air: applied to air-passages of animals, the hollow bones of birds, etc.

pneumatics (nū-mat'iks), *n.* [*Pl. of pneumatic: see -ics.*] 1. That branch of physics which treats of the mechanical properties of gases, and particularly of atmospheric air. Pneumatics treats of the weight, pressure, equilibrium, elasticity, density, condensation, rarefaction, resistance, motion, etc., of gases; it treats of them also considered as media of sound (acoustics), and as vehicles of heat, moisture, etc. It also comprises the description of those machines which depend for their action chiefly on the pressure and elasticity of air, as the various kinds of pumps, artificial fountains, etc. **2t.** The doctrine of spiritual substances; pneumatology.

pneumatize (nū-mat'iz), *v. t.; pret. and pp. pneumatized, ppr. pneumatizing.* [*< pneumatic + -ize.*] To fill with air; render pneumatic, as bones. *Coues*, Key to N. A. Birds, p. 135.

pneumatocyst (nū-mat'ō-sist), *n.* [*< Gr. πνεύμα(-), air, + κύστις, bladder: see cyst.*] 1. The air-sac, float, or pneumatophore of an oceanic hydrozoan or siphonophorous hydromedusan; one of the several appendages of the stem of these organisms, serving to buoy them in the water. See cuts under *Athyria* and *Hydrozoa*. When pneumatocysts are wanting, they may be replaced by a general inflation of the stem, called then a *somatocyst*.

2. In *ornith.*, an air-sac or air-space; one of the cavities in a bird's body filled with air. *Coues*.

pneumatocystic (nū-mat'ō-sis'tik), *a.* [*< pneumatocyst + -ic.*] Of or having the character of a pneumatocyst, in any sense.

pneumatogram (nū-mat'ō-gram), *n.* [*< Gr. πνεύμα(-), breath, + γράμμα, a writing: see gram².*] A tracing of respiratory movements.

pneumatographic (nū-mat'ō-graf'ik), *a.* [*< pneumatograph + -ic.*] Of or pertaining to pneumatography: as, a *pneumatographic communication*; a *pneumatographic medium*.

pneumatography (nū-mat'ō-graf'ī), *n.* [*< Gr. πνεύμα(-), wind (in def. 1, a spirit), + γραφία, < γράφειν, write.*] 1. So-called spirit-writing, independent of the hand of a medium or other material instrument. Also called *independent writing* and *direct writing*.—**2.** The observing and descriptive stage of pneumatology (sense 3). *O. T. Mason*, *Smithsonian Report*, 1881, p. 500.

pneumatological (nū-mat'ō-loj'ī-kal), *a.* [*< pneumatology + -ic-al.*] Pertaining to pneumatology.

pneumatologist (nū-mat'ō-loj'ist), *n.* [*< pneumatology + -ist.*] One versed in pneumatology.

pneumatology (nū-mat'ō-loj'ī), *n.* [*< Gr. πνεύμα(-), air, + λογία, < λέγειν, speak: see -ology.*]

1t. The doctrine of or a treatise on the properties of elastic fluids; pneumatics.—**2.** The branch of philosophy which treats of the nature and operations of mind or spirit, or a treatise on it.

The terms *Psychology* and *Pneumatology*, or *Pneumatic*, are not equivalent. The latter word was used for the doctrine of spirit in general, which was subdivided into three branches, as it treated of the three orders of spiritual substances—God, Angels and Devils, and Man.

Str. W. Hamilton, *Metaphysics*, vi., foot-note.

3. The study of the beliefs, practices, and organizations of men with reference to a supposed world of spirits; spiritual philosophy.

Various terms have been suggested, as comparative mythology, spiritology, pneumatology, daimonology, &c. *O. T. Mason*, *Smithsonian Report*, 1881, p. 500.

4. In *theol.*, the doctrine of the Holy Spirit.

The *pneumatology* of Ephesians resembles that of John, as the christology of Colossians resembles the christology of John.

Schaff, *Hist. Christ. Church*, I. § 96.

Pneumatomachian (nū-mat'ō-mā'ki-an), *n. and a.* [*< Gr. πνευματομάχος, hostile to the Holy Spirit, < πνεύμα(-), spirit, + μάχεσθαι, quarrel.*] **I. n.** An adversary of the Holy Ghost; one who denies the existence, personality, or godhead of the Holy Spirit; specifically, one of a sect or party, or group or succession of parties and sects, in the fourth century holding such doctrines. The Pneumatomachians in general taught that the Holy Ghost is a creature, a ministering spirit. Some combined this view with the Arian view that God the Son is a creature, and a few taught the extreme doctrine that the Spirit is the creature of a creature (the Son). Most of them, however, accepted the Homolousian doctrine of the person of the Son, and these were known as *Macedonians* or *Marathonians*, and also as *Semi-Arians*—the Semi-Arians having as a whole adopted these views. The views of the Pneumatomachians were developed out of Arianism, after the Nicene Council (A. D. 325), and first showed themselves distinctly about 358. The heresy declined rapidly after the Constantinopolitan Council of 381.

II. a. Pertaining to the Pneumatomachians.

pneumatometer (nū-mat'ō-mē'tēr), *n.* [*< Gr. πνεύμα(-), air, breath, + μέτρον, measure.*] An instrument for measuring the quantity of air inhaled into the lungs at a single inspiration and given out at a single expiration; a pulmometer; a spirometer. Also called *pneumometer*, *pneumoneter*.

pneumatometry (nū-mat'ō-mē'tē-ri), *n.* [*As pneumatometer + -y.*] The measurement of the air inspired or expired, as with a pneumatometer.

pneumatophonic (nū-mat'ō-fon'ik), *a.* [*< pneumatophon + -ic.*] Of or pertaining to pneumatophony. [*Rare.*]

pneumatophony (nū-mat'ō-fō-ni), *n.* [*< Gr. πνεύμα(-), spirit, + φωνή, voice.*] So-called spirit-speaking; the supposed production of articulate sounds, resembling the human voice or speech, and conveying intelligence, by disembodied spirits. [*Rare.*]

pneumatophore (nū-mat'ō-fōr), *n.* [*< Gr. πνεύμα(-), air, + φόρος, < φέρειν = E. bear.*] Cf. *LGr. πνευματόφορος*, borne by the wind, also inspired.] A pneumatocyst, or a structure which supports such a float; especially, the proximal dilatation of the cnemose or hydrosome of the *Physophoridae*. See cuts under *Athyria* and *Hydrozoa*.

pneumatophorous (nū-mat'ō-fō-rus), *a.* [*< pneumatophore + -ous.*] In *zool.*, bearing a pneumatocyst; pertaining to a pneumatophore, or having its character.

pneumatosis (nū-mat'ō-sis), *a.* [*< pneumatosis + -ic.*] Affected with pneumatosis.

pneumatoses (nū-mat'ō-sis), *n.* [*NL., < Gr. πνεύματος, a blowing up, inflation, < πνεύμα(-), blow up, fill with wind, < πνεύμα(-), wind: see pneumatic.*] A morbid accumulation of gas in any part of the body. See *emphysema*.

pneumatothorax (nū-mat'ō-thō'raks), *n.* Same as *pneumothorax*.

pneumectomy (nū-mek'tō-mi), *n.* [*For *pneumectomy, < Gr. πνεύμα, lung, + ἐκτομή, excision.*] Excision of a portion of a lung.

pneumo-. In the following compounds of Greek πνεύμα, lung, *pneumo-* is short for the proper form *pneumono-*.

pneumoactinomyositis (nū-mō-ak'ti-nō-mi-kō'sis), *n.* [*NL., < Gr. πνεύμα, lung, + NL. actinomyositis.*] Actinomyositis of the lung.

Pneumobranchia (nū-mō-brang'ki-ā), *n. pl.* [*NL., < Gr. πνεύμα, lung, + βράγχια, gills.*] In Gray's classification (1840), same as *Pneumobranchiata*, 3.

Pneumobranchiata (nū-mō-brang'ki-ā'tā), *n. pl.* [*NL., < Gr. πνεύμα, lung, + NL. Branchiata.*] 1. An order of gastropods, including

those which breathe air in a closed chamber lined with pulmonic vessels: applied by J. E. Gray to the typical pulmonates or pulmonifers, and including most of the inoperculate land-shells as well as the fresh-water forms related to them.—**2.** In Lamarck's classification (1819), a section of gastropods, containing his family *Limacea*.—**3.** In Gray's classification (1821), a subclass of *Gastropodophora*, comprising all terrestrial gastropods, and divided into *Inoperculata* and *Operculata*.

pneumocace (nū-mok'a-sē), *n.* [*< Gr. πνεύμα, lung, + κακός, badness, < κακός, bad.*] Gangrene of the lungs.

pneumocarcinoma (nū-mō-kār-si-nō'mā), *n.* [*NL., < Gr. πνεύμα, lung, + L. carcinoma.*] Carcinoma of the lungs.

pneumocele (nū-mō-sēl), *n.* Same as *pneumonocele*.

pneumoconiosis (nū-mō-kō-ni-ō'sis), *n.* Same as *pneumonoconiosis*. Also *pneumokoniosis*.

pneumoderma (nū-mō-dēr-mā), *n.* [*< Gr. πνεύμα, lung, + δέρμα, skin.*] A gymnosomatous pteropod of the family *Pneumodermidae*.

pneumoderma¹ (nū-mō-dēr'mā), *n.* [*NL., < Gr. πνεύμα, air, + δέρμα, skin.*] Subcutaneous emphysema.

Pneumoderma² (nū-mō-dēr'mā), *n.* [*NL. (Péron and Lesueur, 1810), < Gr. πνεύμα, lung, + δέρμα, skin.*] A genus of gymnosomatous pteropods, typical of the *Pneumodermidae*, in which processes of the integument perform the function of gills. Also called *Pneumodermis*, *Pneumodermion*, *Pneumodermum*, *Pneumodermium*, *Pneumodermum*.

Pneumodermatidæ (nū-mō-dēr'mat'idē), *n. pl.* [*NL., < Pneumoderma(t) + -idæ.*] Same as *Pneumodermidae*.

Pneumodermidæ (nū-mō-dēr'mi-dē), *n. pl.* [*NL., < Pneumoderma² + -idæ.*] A family of gymnosomatous pteropods, typified by the genus *Pneumoderma*, having the head and mouth tentaculate. They have a specialized branchial apparatus consisting of at least a lateral gill on one (right) side and generally a posterior gill, suckers on the ventral side of the protrusible anterior part of the buccal cavity, and a jaw. Twelve or more species, of three genera, are known. Also called *Pneumodermatidæ*, *Pneumodermidæ*, *Pneumodermidæ*.

Pneumodermis (nū-mō-dēr'mis), *n.* [*NL.*] Same as *Pneumoderma*². *Oken*.

Pneumodermion (nū-mō-dēr'mon), *n.* [*NL. (Lamarck, 1819): see Pneumoderma².*] Same as *Pneumoderma*².

Pneumodermionidæ (nū-mō-dēr'mon'idē), *n. pl.* [*NL., < Pneumodermion + -idæ.*] Same as *Pneumodermidæ*.

pneumocenteritis (nū-mō-en-tē-ri'tis), *n.* [*NL., < Gr. πνεύμα, lung, + κέντρον, intestine, + -itis.*] Hog-cholera; swine-plague. See *cholera*.

pneumogastric (nū-mō-gas'trik), *a. and n.* [*< Gr. πνεύμα, lung, + γαστήρ, stomach.*] **I. a.** Pertaining to the lungs and the stomach, or to the functions of respiration and digestion: specifically, in anatomy, noting several nervous structures.—**Pneumogastric ganglion**. See *ganglion*.—**Pneumogastric lobule**. Same as *flocculus*, 2.—**Pneumogastric plexus**. See *gastric plexus* (under *plexus*), and *vagus*.

II. n. The pneumogastric nerve. See *vagus*. **pneumogram** (nū-mō-gram), *n.* [*< Gr. πνεύμα, lung, + γράμμα, a writing: see gram².*] The tracing yielded by the pneumograph.

pneumograph (nū-mō-gráf), *n.* [*< Gr. πνεύμα, lung, + γράφειν, write.*] In *pathol.*, same as *stethograph*.

pneumographic (nū-mō-gráf'ik), *a.* [*< pneumograph + -ic.*] Descriptive of the lungs and air-passages, or the organs of respiration.

pneumography (nū-mō-gráf'ī), *n.* [*< Gr. πνεύμα, lung, + γραφία, < γράφειν, write.*] 1. Descriptive pneumology; a treatise on or description of the lungs and air-passages, or organs of respiration.—**2.** The recording of the movements of respiration.

pneumohemothorax (nū-mō-hem-ō-thō'raks), *n.* [*NL., < Gr. πνεύμα, air, + αἷμα, blood, + θώραξ, chest.*] The presence of gas and blood or bloody serum in the pleural cavity.

pneumohydrothorax (nū-mō-hi-drō-thō'raks), *n.* [*NL., < Gr. πνεύμα, air, + ὕδωρ (hōdōr), water, + θώραξ, chest.*] The presence of gas and serous liquid in the pleural cavity.

pneumological (nū-mō-loj'ī-kal), *a.* [*< pneumology + -ic-al.*] Of or pertaining to pneumology.

Pneumoderma violaceum.

pneumology (nū-mol'ō-jī), *n.* [*< Gr. πνεύμων, lung, + -λογία, < λέγειν, speak: see -ology.*] The sum of scientific knowledge concerning the lungs and air-passages, or the organs and processes of respiration.

pneumometer (nū-mom'ē-tēr), *n.* Same as *pneumatometer*.

pneumometry (nū-mom'et-ri), *n.* Same as *pneumatometry*.

pneumomycosis (nū-mō-mī-kō'sis), *n.* [*< Gr. πνεύμων, lung, + μύκης, fungus, + -osis.*] The presence of fungi in the lungs. Also *pneumomycosis*.

pneumonia (nū-mō-nal'jī-ā), *n.* [*< Gr. πνεύμων, lung, + πόνος, pain.*] Pain in the lungs.

pneumonatelectasis (nū-mō-nat-e-lek'tā-sis), *n.* [*< Gr. πνεύμων, lung, + NL. atelectasis.*] Atelectasis of the lungs.

pneumodema (nū-mō-nē-dē'mā), *n.* [*< Gr. πνεύμων, lung, + οίδημα, swelling.*] Edema of the lungs; pulmonary edema.

pneumonia (nū-mō-nī-ā), *n.* [= *F. pneumonie* = *Sp. Pg. pneumonia*, *< NL. pneumonia*, *< Gr. πνευμονία, Attic also πνευμονία, a disease of the lungs, < πνεύμων, Attic also πλεῖμων, = L. pulmonis*], a lung, *< πνεύω, breathe: see pneumat-ic. Cf. pulmonary.*] Inflammation of the tissues of the lung, as distinct from inflammation of the bronchial tubes (bronchitis) and from inflammation of the serous covering of the lungs (pleuritis). Also called *pneumonitis*.—**Etiology** pneumonia, croupous pneumonia with icterus.—**Catarrhal pneumonia**, pneumonia in which the exudate contains mucin and pus, but does not coagulate. Also called *bronchopneumonia* and *lobular pneumonia*.—**Central pneumonia**, pneumonia of the central part of a lung.—**Cheesy pneumonia**, bronchopneumonia with consolidation of more or less extensive areas of lung-tissue, with degeneration resulting in the formation of cheese-like masses of debris. Such cases are usually if not always tuberculous, and are usually designated as *phthisis*.—**Chronic interstitial lobular pneumonia**, a chronic pneumonia with excessive increase of the interstitial connective tissue. Such cases are often tuberculous in origin, and are sometimes called *fibroid phthisis*.—**Croupous pneumonia**, pneumonia in which the exudate coagulates from the contained fibrin. Also called *fibrinous pneumonia*, or, from its distribution to one or more lobes in their entirety, *lobar pneumonia*.—**Desquamative pneumonia**, catarrhal pneumonia in which the alveolar epithelium is shed in considerable quantity.—**Intermittent pneumonia**, croupous pneumonia with frequent marked remissions of pyrexia, not pertaining to malarial poisoning.—**Lobular pneumonia**, a pneumonia which in its distribution affects the areas belonging to small bronchi scattered here and there, as distinct from lobar pneumonia, in which entire lobes are affected. Also called *catarrhal pneumonia* because it invades the lung-tissue from the bronchi, which are primarily affected.—**Pneumonia migrans**, a croupous pneumonia which invades progressively from day to day adjacent parts of the lungs.—**Typhoid pneumonia**, croupous pneumonia with exceptionally severe general effects, exhibited in great prostration, delirium, dry tongue, enlarged spleen, often slight icterus, and albuminuria.

pneumonia (nū-mon'ik), *a. and n.* [*< Gr. πνευμονικός, pertaining to the lungs, < πνεύμων, lung: see pneumonia. Cf. pulmonic.*] I. *a.* 1. Pertaining to the lungs; pulmonary.—2. Pertaining to pneumonia; affected with pneumonia; pulmonitic: as, *pneumonic patients*.

II. *n.* A remedy used in diseases of the lungs.
pneumonitic (nū-mō-nit'ik), *a.* [*< pneumonia + -ic.*] Pertaining to or of the nature of pneumonitis.

pneumonitis (nū-mō-nī'tis), *n.* [*< Gr. πνεύμων, lung, + -ίτις.*] Inflammation of the lungs; pneumonia.

pneumonocarcinoma (nū-mō-nō-kār-si-nō'mā), *n.* [*< Gr. πνεύμων, lung, + NL. carcinoma, carcinoma.*] Carcinoma of the lungs.

pneumonocele (nū-mō-nō-sēl), *n.* [*< Gr. πνεύμων, lung, + κήλη, tumor.*] Hernia of the lung, as through an opening in the diaphragm.

pneumonocholemyda (nū-mō-nō-klam'i-dā), *n.* [*< Gr. πνεύμων, lung, + χλαμύς (χλαμύδ-), a cloak, mantle.*] A suborder of *Gasteropoda*, having the pallial chamber converted into a lung-sac, but no gills, as in the families *Cyclo-tonidae*, *Helicinidae*, *Aciculidae*, etc.

pneumonocholemydate (nū-mō-nō-klam'i-dāt), *a.* [*< Pneumonocholemyda + -ate.*] Belonging to the *Pneumonocholemyda*.

pneumocirrhosis (nū-mō-nō-si-rō'sis), *n.* [*< Gr. πνεύμων, lung, + NL. cirrhosis.*] Cirrhosis of the lungs.

pneumonoconiosis (nū-mō-nō-kō-ni-ō'sis), *n.* [*< Gr. πνεύμων, lung, + κόνις, dust, + -osis.*] Inflammatory disease of the lungs due to inhalation of irritating particles.

pneumoderma (nū-mō-nō-dēr'mā), *n.* [*< NL.*] Same as *Pneumoderma*².

pneumonodinia (nū-mō-nō-din'i-ā), *n.* [*< Gr. πνεύμων, lung, + δόνη, pain.*] Pain in the lungs.

pneumonomelanosis (nū-mō-nō-mel-ā-nō'sis), *n.* [*< Gr. πνεύμων, lung, + NL. melanosis.*] Pulmonary melanosis, or anthracosis.

pneumonometer (nū-mō-nom'ē-tēr), *n.* [*< Gr. πνεύμων, lung, + μέτρον, measure.*] Same as *pneumatometer*.

pneumonophthisis (nū-mō-nof-thī'sis), *n.* [*< Gr. πνεύμων, lung, + φθίσις, consumption.*] Pulmonary phthisis.

pneumonorrhagia (nū-mō-nō-rā'jī-ā), *n.* [*< Gr. πνεύμων, lung, + -παγία, < ρηννύω, break, burst.*] Same as *pneumorrhagia*.

pneumony (nū-mō-nī), *n.* Same as *pneumonia*.

Pneumotoka (nū-mō-ot'ō-kā), *n. pl.* Same as *Pneumotoca*.

pneumotokous (nū-mō-ot'ō-kus), *a.* Same as *pneumotocous*.

pneumopericarditis (nū-mō-per'i-kār-di'tis), *n.* [*< Gr. πνεύμων, lung, + -παγία, < ρηννύω, break, burst.*] Same as *pneumorrhagia*.

pneumopericardium (nū-mō-per-i-kār-di-um), *n.* [*< Gr. πνεύμων, lung, + περικάρδιον, pericardium: see pericardium.*] The presence of gas in the pericardial cavity.

pneumophthisis (nū-mōf-thī'sis), *n.* [*< Gr. πνεύμων, lung, + φθίσις, consumption: see phthisis.*] Pulmonary phthisis.

pneumopleuritis (nū-mō-plē-ri'tis), *n.* [*< Gr. πνεύμων, lung, + πλευριτις, pleuritis: see pleuritis.*] Inflammation of the lungs and the pleura; pleuropneumonia.

pneumopyothorax (nū-mō-pi-ō-thō'raks), *n.* [*< Gr. πνεύμων, lung, + πύον, pus, + θώραξ, the chest: see thorax.*] The presence of gas and pus in the pleural cavity. Also called *pyopneumothorax*.

pneumorrhagia (nū-mō-rā'jī-ā), *n.* [*< Gr. πνεύμων, lung, + -παγία, < ρηννύω, break.*] Pulmonary hemorrhage.—**Diffuse pneumorrhagia**, an escape of blood into the substance of the lung, with laceration. Also called *pulmonary apoplexy*.

pneumoskeletal (nū-mō-skel'e-tal), *a.* [*< pneumoskelet-on + -al.*] Of or pertaining to the pneumoskeleton.

pneumoskeleton (nū-mō-skel'e-ton), *n.* [*< Gr. πνεύμων, lung, + σκελετόν, a dry body: see skeleton.*] An exoskeleton or hard tegumentary structure developed in connection with a respiratory or pulmonary organ. Thus, the shell of a mollusk, being developed from the pallium or mantle, which has a respiratory function, constitutes a *pneumoskeleton*. H. A. Nicholson.

pneumothorax (nū-mō-thō'raks), *n.* [*< Gr. πνεύμων, air, + θώραξ, the chest: see thorax.*] The presence of air in the pleural cavity. Also *pneumatothorax*.

Pneumotoca (nū-mot'ō-kā), *n. pl.* [*< NL: see pneumotocous.*] A division of *Vertebrata*, including air-breathing oviparous vertebrates, as birds and reptiles. Owen.

pneumotocous (nū-mot'ō-kus), *a.* [*< Gr. πνεύμων, lung, + ωτόκοος, egg-laying: see ootocous.*] Breathing air and laying eggs, as a vertebrate; belonging to the *Pneumotoca*.

pneumotomy (nū-mot'ō-mī), *n.* [*< Gr. πνεύμων, lung, + τομή, a cut, < τέμνειν, ταμείν, cut.*] In *surg.*, incision into the lung, as for the evacuation of an abscess.

pneupome (nū'pōm), *n.* [*For *pneumonopome, < Gr. πνεύμων, lung, + πῶμα, lid.*] An operculate pulmonate gastropod.

pnigalion (nī-gā'li-on), *n.* [*< Gr. πνιγάλιον, the nightmare, cf. πνίξ, suffocation, < πνίγειν, choke.*] In *med.*, an incubus; a nightmare.

Pnoöpyga (nō-ē-pī-gā), *n.* [*< NL. (Hodgson, 1844), < Gr. πνοή, breath, + πύγῃ, the rump.*] A genus of birds of wren-like character, having booted tarsi, and very short tail-feathers hidden by their coverts, commonly referred to the fam-

ily *Troglodytidae*. There are several species, all Asiatic, as *P. squamata* (or *albiventer*), *P. pusilla*, and *P. caudata*. The genus had before been called *Tesia* by Hodgson, from the Nepalese name of some bird of this kind. The latest authority refers the genus to the *Timeliidae*. R. B. Sharpe, Cat. Birds Brit. Mus., VI. 301.

Pnyx (niks), *n.* [*< Gr. πνύξ (gen. πνυκός), a place of assembly (see def.), < πνυκός, crowded, close.*] A public place of assembly in ancient Athens, where the people met for the discussion of political affairs of the state; also, a popular assembly convened in this place.

pot, *n.* A Middle English form of *pea*².

P. O. An abbreviation: (a) of *post-office*; (b) (*naut.*) of *petty officer*.

Poa (pō'ā), *n.* [*< NL. (Linnaeus, 1737), < Gr. πόα, dial. ποία, ποίν, grass, esp. as fodder, an herb or plant.*] A genus of grasses of the tribe *Festuceae* and subtribe *Eufestuceae*, characterized by the commonly two- to six-flowered spikelets in a lax panicle, the smooth grain free from the palea, and the keeled and obtuse awnless flowering glume with five nerves converging at the apex. There are 100, or according to some over 200, species, widely dispersed, few in the tropics, most abundant in north temperate regions. They are known in general as *meadow-grass* or *spear-grass*. Some are low annuals, as *P. annua*, the low spear-grass, abundant by American roadsides and paths in parks, and blooming in the south from midwinter onward. The other American species are perennials, with tufted stems, often tall, and soft leaves, flat or less often convolute. The genus contains several valuable hay- and pasture-grasses, of which the most important is *P. pratensis*, the Kentucky blue-grass, June-grass, etc. (See *blue-grass* and *meadow-grass*). *P. amabilis* is cultivated under the name *love-grass*, *P. trivialis* as *bird-grass*, etc., and *P. caspica* as *Australian grass*. For other species, see *bench-grass*, *daggers* (under *dagger*), *δ*, *foal-grass* (under *foal*), *June-grass*, *silver-grass*, *teff*, and *wire-grass*.

Poaceae (pō-ā-sē-ē), *n. pl.* [*< NL. (R. Brown, 1814), < Poa + -aceae.*] A series or division of the order *Gramineae*, the grasses, distinguished from the other similar division, *Panicaceae*, by the absence of a joint to the pedicel beneath the glumes, and by the presence of a stalk or empty glumes or imperfect flowers above the fertile flowers. It includes the larger part of the grasses, or about 200 genera (*Poa* being the type), in 7 tribes and 21 subtribes.

poach¹ (pōch), *v.* [Early mod. E. also *poatch*, *potch*, *poche*, *poch*; according to Cotgrave, who gives only the pp. *poché*, *< OF. pocher, poucher*, thrust, poke (given by Cotgrave 'thrust or dig out with the fingers'), *F. pocher*, hit (the eye, so as to give one a black eye), also *OF. pocher*, blur (with ink), *< LG. poken*, poke, thrust, = *MD. pochen*, thrust: see *poke¹*, of which *poach¹* is thus ult. an assimilated form. Some refer this *OF. pocher, poucher*, to *pouce*, *poulce*, the thumb, *< L. pollex (pollic-)*, the thumb: see *pollex*.] I. *trans.* 1. To poke; thrust; push; put.

Pull out my heart: O! *poach* not out mine eyes. *Sylvestre*, tr. of Du Bartas's Weeks, II. The Decay.

His (Charlemagne's) horse, *poaching* one of his legs into some hollow ground, made way for the smoking water to break out, and gave occasion for the Emperor's building that city (Aix). *Sir W. Temple*, On the United Provinces, I.

2. To stab; pierce; spear: as, to *poach* fish.

They use also to *poch* them (fish) with an instrument somewhat like the sammon-spear. R. Carew, Survey of Cornwall, p. 31.

3. To tread; break up or render slushy by frequent treading; mark with footprints.

The cattle of the villagers . . . had *poached* into black mud the verdant tuft. Scott.

The *poach'd* silt that floods the middle street. Tennyson, Merlin and Vivien.

II. *intrans.* 1. To make a thrust in or as in sword-play.

For where I thought to crush him in an equal force, True sword to sword, I'll *poach* [*poche*, folio 1623] at him some way, Or wrath or craft may get him. Shak., Cor., I. 10. 15.

To speak truly of latter times, they [the Spaniards] have rather *poached* and offered at a number of enterprises than maintained any constantly. Bacon, War with Spain.

2. To be penetrable, as soft muddy or marshy ground; be damp and swampy.

Chalky and clay lands burn in hot weather, chap in summer, and *poach* in winter. Mortimer, Husbandry.

ily *Troglodytidae*. There are several species, all Asiatic, as *P. squamata* (or *albiventer*), *P. pusilla*, and *P. caudata*. podalic (pō-dal'ik), *a.* [Irreg. < Gr. *pois* (pod-), = E. *foot*, + *-al* + *-ic*. Cf. *pedal*.] Pertaining to the foot.—*Podalic version*, in *obstet.*, the operation of turning the fetus within the uterus so as to bring down the foot or some part of the lower extremities: distinguished from *cephalic version*.

Podalyria (pod'ā-lir'i-ā), *n.* [NL. (Lamarck, 1793), < L. *Podalirius*, < Gr. *Podalīrios*, in myth. son of Æsculapius.] A genus of leguminous shrubs, type of the tribe *Podalyriæ*, characterized by the broad obtuse keel-petals united on the back, the turgid, ovoid, coriaceous pod, simple short-petioled rigid leaves, and a calyx remarkably indented at its broadly bell-shaped base. The 17 species are natives of South Africa, and are silvery-pubescent or villous shrubs, with alternate leaves, awl-shaped stipules, and pink, purple, or blue axillary flowers, usually only one or two together. *P. sericea*, the African satin-bush, and several other species are cultivated for their flowers and silky leaves.

Podalyriæ (pod'ā-lir'i-ā), *n. pl.* [NL. (Bentham, 1840), < *Podalyria* + *-æ*.] A tribe of leguminous plants, characterized by its united sepals, papilionaceous petals, ten separate stamens, and simple or radiately compound leaves. The *Sophoræ*, the only other papilionaceous tribe with ten freestamens, is different in its pinnate leaves. The *Podalyriæ* include 26 genera, mainly Australian shrubs, with unjointed pods, and usually simple leaves not jointed to their short petiole. For the best-known

genera, see *Podalryia* (the type), *Baptista* (the only genus in the eastern United States), *Piptanthus*, *Pultenaea*, *Jacksonia*, and *Gompholobium*.

podanencephalia (pod-an-en-se-fā'li-ā), *n.* [NL., < Gr. *ποῦς* (*pod-*), = E. *foot*, + NL. *anencephalia*, *q. v.*] In *teratol.*, anencephalia with a pedunculated head.

Podargidae (pō-dār'ji-dē), *n. pl.* [NL., < *Podargus* + *-idae*.] A family of fissirostral pica-rian birds, typified by the genus *Podargus*, related to the *Caprimulgidae*, and usually included in that family. They have very broad palatine bones with posterolateral processes, rudimentary basipterygoid processes, no elacodochon or oil-gland, and a pair of powder-down tracts, one on each side of the rump. These birds are confined to the Oriental and Australian regions; some of them are known as *frogmouths*, from the great breadth and deep fissure of the beak. They are nocturnal and insectivorous, and resemble goatsuckers and owls. The genera are *Podargus*, *Batrachostomus*, and *Egotheles*. Also *Podargine* as a subfamily of *Caprimulgidae*.

podargine (pō-dār'jin), *a.* Of or pertaining to the *Podargidae* or *Podargine*.

podargus (pō-dārg'), *n.* A bird of the genus *Podargus*.

Podargus (pō-dār'gus), *n.* [NL. (Cuvier, 1829), < Gr. *πόδαργος*, swift-footed, < *ποῦς* (*pod-*), foot, + *ἀργός*, swift, bright.] 1. The typical genus of the family *Podargidae*. There are several species, confined to the Australian and Pa-puan regions, as *P. strigoides*, or *P. cinctus*, known to the colonists as *more-pork*, from its cry.

2. [L. *a.*] A species of this genus; a *podargus*.

podarthral (pō-dār'thrāl), *a.* [*< podarthrum* + *-al*.] In *ornith.*, joining the toes to the shank; pertaining to the *podarthrum*: as, the *podarthral* joint or articulation.

podarthrititis (pō-dār'thrī'tis), *n.* [NL., < Gr. *ποῦς* (*pod-*), foot, + *ἀρθρίτις*, joint-disease: see *arthritis*.] Inflammation of the joints of the foot.

podarthrum (pō-dār'thrum), *n.*; *pl. podarthra* (-thra). [NL., < Gr. *ποῦς* (*pod-*), foot, + *ἄρθρον*, a joint.] In *ornith.*, the foot-joint; the metatarsophalangeal articulation; the juncture of the toes collectively with the metatarsus.

pod-auger (pod'ā'ger), *n.* See *auger*, 1.

Podaxinae (pod-ak-sin'ā-ē), *n. pl.* [NL. (Saccardo), < Gr. *ποῦς* (*pod-*), foot, + L. *axis*, axle: see *ax*.] A subfamily of gasteromycetous fungi of the family *Lycoperdaceae*.

Podaxonia (pod-ak-sō'ni-ā), *n. pl.* [NL., < Gr. *ποῦς* (*pod-*), foot, + *ἄξων*, axis: see *ax*.] A phylum of molluscs, composed of three classes, *Sipunculoidea*, *Brachopoda*, and *Polyzoa*, having a secondary long axis of the body at right angles with an original oro-anal long axis. It corresponds nearly to *Molluscoidea*, except in including the gephyreans.

podaxonal (pod-ak-sō'ni-al), *a.* [*< Podaxonia* + *-al*.] Of or pertaining to the *Podaxonia*.

pod-bit (pod'bit), *n.* A boring-tool used in a brace. It is semi-cylindrical in shape, with a hollow barrel, and a cutting lip projecting from the extremity of the barrel.

podder (pod'er), *n.* [*< pod* + *-er*.] 1. A gatherer of pods.—2. *pl.* Beans, peas, tares, vetches, and other podded or leguminous plants in general. [Prov. Eng. in both uses.]

poddy (pod'i), *a.* [*< pod* + *-y*.] Round and stout in the belly; paunchy. *Halliwel*. [Prov. Eng.]

podelcoma (pod-el-kō'mā), *n.* [NL., < Gr. *ποῦς* (*pod-*), foot, + *ἔλκος*, a sore.] A perforating ulcer of the foot.

podencephalus (pod-en-sef'ā-lus), *n.*; *pl. podencephali* (-li). [NL., < Gr. *ποῦς* (*pod-*), foot, + *ἐγκέφαλος*, brain.] In *teratol.*, an exencephalus in which the brain is contained in a pedicellate sac.

podex (pō-der'), *n.* [*< Sp. poder*, power: see *power*.] In *Spanish-Amer. law*, a power of attorney formally made before a notary public; a procurator.

podestà (pō-des-tā'), *n.* [It. (> F. *podestat* = Fg. *podestade*), < L. *potestas* (*potestat-*), power,

a magistrate: see *potestate*.] One of certain magistrates in Italy. (a) A foreign magistrate, placed by the emperor Frederick Barbarossa over various Italian cities. (b) A chief magistrate in Italian towns and in medieval republics, often clothed with nearly despotic power. His functions were largely judicial.

The Venetians have always their *Podestà*, or *Gouverneur*, with his two Counsellors resident therein.

Hakluyt's Voyages, II. 104.

(c) In many Italian cities, a subordinate municipal judge.

podestat, *n.* [*< F. podestat*, < It. *podestate*, *podestà*: see *podestà*, *potestate*.] A magistrate: same as *potestate*.

I have seen of the greatest *podestates* and greatest judges and Presidents of Parliament in France.

Puttenham, Arte of Eng. Poesie, p. 308.

podestare (pō-des'te-rāt), *n.* [As It. *podestaria*, *podestaria*, magistracy (< *podestà*, a magistrate: see *podestà*), + *-ate*.] The office, dignity, or jurisdiction of a *podestà*; the term of office of a *podestà*.

In the next year, 1280, in the *podestare* of Alberigo Signorelli of Bologna, the palace of the Incontini were burnt and demolished by the fury of the people.

J. Adams, Works, V. 230.

podetia, *n.* Plural of *podetium*.

podetiform (pō-dē'shi-fōrm), *a.* [*< NL. podetium* + L. *forma*, form.] Of the shape of a *podetium*; resembling a *podetium*. *E. Tuckerman, Genera Lichenum*, p. 232.

podetium (pō-dē'shi-um), *n.*; *pl. podetia* (-ā). [NL., < Gr. *ποῦς* (*pod-*), foot.] In *bot.*, in certain lichens, the shrubby or stalk-like outgrowth of the thallus, bearing exposed hymenia; also, any stalk-like elevation. See cuts under *Cladonia*.

podex (pō'deks), *n.*; *pl. podices* (pō'di-sēz). [L.] In *zool.*: (a) The rump; the uropygium; the anus or anal region. (b) In *entom.*, the pygidium.

pod-fern (pod'fērn), *n.* A singular aquatic fern, *Ceratopteris thalictroides*, very variable in form, found in the tropics of both hemispheres: so called from the pod-like segments of the fertile frond, which are everywhere covered with sori. The stipes are inflated with large air-cells.

pod-gaper (pod'gā'pēr), *n.* A bivalve mollusk of the family *Solenomyidae*.

podge¹ (poj), *n.* [Perhaps for *plodge*; cf. *plod*.] A puddle; a plash.

podge² (poj), *v. i.*; pret. and pp. *podged*, ppr. *podging*. [Perhaps for *plodge*; cf. *plod*.] To plod.

My dames will say I am a *podging* ass.

Historie of Albion and Belama (1688). (Nares.)

podgy (pō'ji), *a.* Same as *puddy*.

podia, *n.* Plural of *podium*.

podial (pō'di-al), *a.* [*< podium* + *-al*.] Of or pertaining to the *podium*.

Podica (pō'di-kā), *n.* [NL. (Lesson, 1831), < LL. *podicus*, belonging to a foot, < Gr. *ποῦς* (*pod-*), foot.] The African genus of *Heliornithidae*,

African Finfoot (*Podica senegalensis*).

the sunbirds or finfoots, containing several species, as *P. senegalensis* and *P. petersi*. Also called *Podoa* and *Rhigelura*.

podical (pō'di-kal), *a.* [*< L. podex* (*podic-*), rump, + *-al*.] Of or pertaining to the *podex*; uropygial; anal or pygidial, as with reference to the terminal somite of the abdomen of an insect.—**Podical plates**, in *entom.*, two or more small pieces surrounding the opening of the intestinal canal: when present, they are generally concealed by the last external abdominal segments. Anatomists have regarded these plates as the rudiments of the eleventh abdominal segment.

Podiceps (pod'i-seps), *n.* The original and usual form of *Podiceps*.

podices, *n.* Plural of *podex*.

Podicipedidae (pō'di-si-ped'i-dē), *n. pl.* [NL., < *Podiceps* (*-ped-*) + *-idae*.] A family of birds of the order *Pygopodidae*, typified by the genus *Podiceps*; the grebes. The family has many peculiarities, causing it to rank as a suborder called *Podicipedes*, whose characters are the same as those of the family. They have no ambles, femorocaudal, or accessory tendinous muscle, only one carotid, short xiphisternum, long narrow pelvis, from fifteen to nineteen cervical vertebrae, a long crenal process of the tibia and a very large patella, no superorbital depression for a nasal gland, and a special pyloric sac. Cecae are present, and the oil-gland is tufted. The feet are four-toed and lobate, not webbed; the nails are flat and blunt; the tail is rudimentary; the primaries are eleven in number; the lores are naked; the head is usually crested; and the bill is of variable shape. The leading genera are *Aechmophorus*, *Podiceps*, *Tachybaptus*, and *Podilymbus*. *Colymbidae* is a synonym in one of its senses. Also *Podicipidae*, *Podicepidae*, *Podicipitidae*. See cuts under *Aechmophorus* and *grebe*.

Podiceps (pō'dis'i-pēz), *n.* [NL., orig. *Podiceps* as a specific name (Linnaeus, 1766), later as a generic name (Latham, 1790), tr. E. *arse-foot*; < L. *podex* (*podic-*), rump, + *pes* = E. *foot*.] The typical genus of the family *Podicipedidae*. It formerly contained all the grebes, but is now usually restricted to those which have the bill moderately stout, not longer than the head, and not hooked at the end, the tarsus not longer than the middle toe and claw, the dimensions over ten inches, and the head usually crested and ruffed. There are numerous species, such as the crested grebe, *P. cristatus*; the red-necked grebe, *P. griseigena*; the horned grebe, *P. cornutus*; and the eared grebe, *P. auritus*. Also called *Colymbus*. Usually *Podiceps*. See cut under *grebe*.

Podilymbus (pod-i-lim'būs), *n.* [NL. (Lesson, 1831), < *Podi(ceps)* + (*Co*)*lymbus*.] A genus of *Podicipedidae*, containing American grebes with a thick stout epignathous bill, and no crests or ruffs, the frontal feathers being mucronate. *P. podiceps* is the commonest grebe of the United States, commonly called the *piebilled dabchick*. The genus is also called *Hydroks* and *Nesiteles*.

podismus (pō-dis'mus), *n.* [NL., < Gr. *ποδίσμος*, a measuring by feet (taken in sense of 'a binding of the feet'), < *ποδίζω*, measure by feet, also bind the feet, < *ποῦς* (*pod-*), foot.] Spasm of the muscles of the foot.

Podisus (pō'di-sus), *n.* [NL. (Herrich-Schäffer, 1853), < Gr. *ποῦς* (*pod-*), foot, + *ισος*, equal.] A genus of pentatomid bugs, with over 30 species, all American. They are of medium size and usually light colors, predaceous in habit, and provided with a strong beak wherewith to impale their prey. *P. placidus* is a North American species, notable as an enemy of the imported currant-worm, *Nematus ventricosus*. *P. spinosus* is common and widespread: it attacks many injurious larvae. See also cut under *soldier-bug*.

Podisus placidus.
a, enlarged; b, natural size.

podite (pō'dit), *n.* [*< Gr. ποῦς* (*pod-*), foot, + *-ite*.] A limb or leg of a crustacean, especially when developed as an ambulatory appendage, or leg fitted for walking. See *endopodite*, *exopodite*, *epipodite*; also *basipodite*, *caropodite*, *dactylopodite*, *ischiopodite*, *meropodite*, *propodite*, and cuts under *Podophthalmia*.

These *podites* are usually seven-jointed.

Encyc. Brit., VI. 635.

poditic (pō-dit'ik), *a.* [*< podite* + *-ic*.] Of or pertaining to a *podite*.

poditti (pō-dit'i), *n.* [Australian.] The Australian saw-beaked kingfisher, *Syma flavirostris*. See cut under *Syma*.

podium (pō'di-um), *n.*; *pl. podia* (-ā). [L. (> It. *podio* = F. *podium*), < *podium* (see def.), < Gr. *πόδιον*, a little foot, dim. of *ποῦς* (*pod-*), foot: see *peu*.] 1. In *arch.*, a continuous pedestal; a stylobate; also, a raised platform which surrounded the arena of the ancient amphitheater, upon which sat persons of distinction, or a bench surrounding a room.—2. In *zool.* and *anat.*, the foot; the pes: usually applied in ornithology to the toes collectively, without the shank of the foot.—3. In *conch.*, the foot of a mollusk. Its parts are distinguished as *propodium*, *mesopodium*, *metapodium*, and *epipodium*, or *fore*, *middle*, *hind*, and *side parts*. See cuts under *Gastropoda*, *Leptodermata*, *Myiidae*, and *Pisidiidae*.

4. In *bot.*: (a) A footstalk, stipe, or the like. [Rarely used except in compounds.] (b) A joint, internode, or independent unit in the growth of the axis of a plant.

podje (poj'e), *n.* [Native name.] The spectral tarsier, *Tarsius spectrum*, of Borneo and Celebes. See cut under *Tarsius*.

pod-lover (pod'luv'er), *n.* The noctuid moth *Dianthaea capsophila*: an English collectors' name, translating the specific term.

podobranchia (pod-ō-brang'ki-ā), *n.*; pl. *podobranchiae* (-ē). [NL., < Gr. ποῖς (pod-), foot, + βράγχια, gills.] A foot-gill; one of the respiratory organs of crustaceans which are attached to the legs. Parts of a podobranchia are distinguished as the *base*, *stem*, *expanded lamina*, and *apical plume*, besides the proper *branchial filaments*. Podobranchia are coropoditic, or borne upon the coropodites of the limbs to which they are respectively attached, and of which they are the modified epipodites. See cuts under *Podophthalmia*, especially *M* and *N*.

podobranchial (pod-ō-brang'ki-āl), *a.* [*< podobranchia* + *-al*.] Of or pertaining to a podobranchia.

podobranchiate (pod-ō-brang'ki-āt), *a.* [*< podobranchia* + *-ate*.] Having podobranchiae.

Podocarpus (pod-ō-kār'pē-ē), *n. pl.* [NL. (Endlicher, 1847), < *Podocarpus* + *-eae*.] Same as *Taxoides*.

Podocarpus (pod-ō-kār'pus), *n.* [NL. (L'Héritier, 1817), so called in allusion to the thick fleshy stalk which supports the fruit (not so in other conifers); < Gr. ποῖς (pod-), foot, + καρπός, fruit.] A genus of coniferous trees of the tribe *Taxoides*, characterized by solitary or twin pistillate flowers surrounded by a few scales, bearing a somewhat stalked and projecting blade, which envelops the single adnate and inverted ovule. In fruit this blade usually becomes fleshy, forming a pulpy covering to the hard shell-like seed, which contains a thin embryo with two seed-leaves only, in fleshy albumen. The staminate flowers are solitary or in clusters of from two to five, or in long catkins, the stamens forming a long dense column covered with sessile two-lobed anthers in spiral rows. There are from 40 to 60 species, forming much the largest coniferous genus except *Pinus*. They are chiefly natives of the southern hemisphere beyond the tropics, and also frequent in montane and eastern tropical Asia. They are evergreen trees, with much diversity in foliage: the leaves are either scattered, opposite, two-ranked, or crowded; scale-like, linear, or broad; and veinless or with many fine parallel veins. The fruit is a globose or ovoid drupe or nut, 1½ inches or less in diameter, in some species edible, as *P. andina*, the plum-fir of Chili, with clusters of cherry-like fruits, and *P. gmelini*, the native plum or damson of New South Wales, also called *Mawarra pine* and *white pine*. Several other species are known as *fir* or *pine* among the colonists of New Zealand, Australia, and Cape Colony. Compare *fir* and *pine*, and for individual species see *hikitea*, *maifai*, and *micro*. Many species are among the most important timber-trees of the southern hemisphere, as (besides the preceding) *P. Totara*, the mahogany-pine; *P. cupressina*, the kaw-labau, one of the chief timber-trees of Java; and the various yellow-woods of Cape Colony. (See *yellow-wood*.) Others are a source of valuable gums, as *P. polytachya*, the wax-dammar of Singapore. Some are but bushes, others reach a great height, as *P. amarus* of Java (200 feet), and the yacca-tree of the West Indies (100 feet). Some botanists use the name of the section *Nageia* for the whole genus.

podoccephalous (pod-ō-sef'ā-lus), *a.* [*< Gr. ποῖς (pod-), foot, + κεφαλή, head*.] In bot., having a head of flowers elevated on a long peduncle: said of a plant.

Podoces (pō-dō'sēz), *n.* [NL. (Fischer, 1823), < Gr. ποδοῦς, swift-footed, < ποῖς (pod-), foot, + ὤς, swift.] A genus of oscine passerine birds of the family *Corvidae* and subfamily *Fregi-*

female (in mod. bot. pistil.) In bot., same as *basigynium*.

Podolian (pō-dō'li-an), *a.* [*< It. Podolia* (see def.) + *-an*.] Of or pertaining to Podolia, a district of western Russia.—**Podolian cattle**, a breed of cattle widely distributed throughout Italy, usually with white or gray coat and enormous horns.—**Podolian marmot**, the *Spalax typhlus*. Pennant.

podology (pō-dol'ō-jī), *n.* [= F. *podologie*, < Gr. ποῖς (pod-), foot, + λογία, < λέγειν, speak: see *-ology*.] A treatise on or a description of the foot. Dunglison.

podometer (pō-dom'e-tēr), *n.* [*< Gr. ποῖς (pod-), foot, + μέτρον, measure*.] Same as *pedometer*.

Podophthalma (pod-of-thal'mā), *n. pl.* [NL.: see *Podophthalmia*.] 1. In *Crustacea*, same as *Podophthalmia*. Leach, 1815.—2. In *conch.*, a division of rostriferous gastropods, having eyes at the ends of cylindrical peduncles which are separated from and at the outer edges of the long subulate tentacles. It includes the family *Ampullariidae*. J. E. Gray, 1840.—3. [Used as a sing.] A genus of spiders, type of the *Podophthalmidae*.

Podophthalmata (pod-of-thal'mā-tā), *n. pl.* [NL., pl. of *Podophthalma*.] Same as *Podophthalmia*.

podophthalmic (pod-of-thal'māt), *a.* [*< Gr. ποῖς (pod-), foot, + ὀφθαλμός, eye, + -ate*.] Same as *podophthalmic*.

podophthalmatous (pod-of-thal'mā-tus), *a.* [*< podophthalmata* + *-ous*.] Same as *podophthalmic*.

Podophthalmia (pod-of-thal'mi-ā), *n. pl.* [NL., < Gr. ποῖς (pod-), foot, + ὀφθαλμός, eye: see *ophthalmia*.] A division of malacostracous *Crustacea*, having the eyes borne upon movable eye-stalks or ophthalmites, and the cephalo-

Parts of the Crawfish (*Asiaticus fluviatilis*), with the nomenclature of the appendages of the stalk-eyed crustaceans (*Podophthalmia*) and the higher crustaceans (*Malacostraca*) in general.

A, mandible; B, first maxilla; C, second maxilla; D, scaphognathite; E, first maxilliped; F, second maxilliped; G, third maxilliped. (B right; the others left.) In A to F, *ab*, endopodite; *c*, exopodite; *d*, epipodite; *e*, setaceous filaments of coxopodite. M, cross-section of half a thoracic somite; *a*, the somite; *b*, the coxopodite; *c*, basipodite; *d*, ischopodite; *e*, branchiiferous epipodite; *f*, *g*, branchiae; *h*, filiform appendage. N, a branchiiferous epipodite, enlarged; *a*, its point of attachment; *b*, basal enlargement; *c*, *c*, branchial filaments; *d*, terminal lobes.

thorax forming a carapace; the stalk-eyed crustaceans: distinguished from *Edriophthalmia*. The group is divisible into two orders, *Stomatopoda* and *Decapoda*, the latter containing the most familiar crustaceans, as prawns, shrimps, crawfish, lobsters, and crabs. See also cuts under *Asiaticus*, *Asiaticus*, *Copepoda*, *copepod-stage*, *endopodite*, *lobster*, *prawn*, and *stalk-eyed*.

podophthalmian (pod-of-thal'mi-an), *a. and n.* I. *a.* Same as *podophthalmic*.

II. *n.* A member of the *Podophthalmia*.

podophthalmic (pod-of-thal'mik), *a.* [*< Gr. ποῖς (pod-), foot, + ὀφθαλμός, eye* (see *ophthalmia*) + *-ic*.] Stalk-eyed, as a crustacean; belonging to the *Podophthalmia*.

Podophthalmidae (pod-of-thal'mi-dē), *n. pl.* [NL. (Cambridge, 1877), < *Podophthalma* + *-idae*.] A family of spiders, allied to the *Lycosidae* and *Agelenidae*, and having the eyes placed in four rows, the legs long and slender, and the abdomen long and cylindrical: typified by the genus *Podophthalma*. It is represented in the southern United States by the genus *Tetragnophthalma*.

podophthalmite (pod-of-thal'mit), *n.* [*< Gr. ποῖς (pod-), foot, + E. ophthalmite*.] The distal or terminal joint of the movable two-jointed

ophthalmite or peduncle of the eye of a stalk-eyed crustacean, the other being the *basiophthalmite*. See cut under *stalk-eyed*.

podophthalmitic (pod'of-thal'mit'ik), *a.* [*< podophthalmite* + *-ic*.] Of or pertaining to a podophthalmite.

podophthalmous (pod-of-thal'mus), *a.* [*< podophthalmic* + *-ous*.] Same as *podophthalmic*.

podophyllic (pod-ō-fl'ik), *a.* [*< podophyllin* + *-ic*.] Pertaining to or derived from podophyllin.

podophyllin (pod-ō-fl'in), *n.* [= F. *podophylline*; < *Podophyllum* + *-in*.] A resin obtained from the rootstalk of *Podophyllum peltatum*. It is used in medicine as a purgative, and seems to have the power of stimulating the secretion of bile.

podophyllous (pod-ō-fl'us), *a.* [= F. *podophylleux*, < Gr. ποῖς (pod-), foot, + φύλλον, a leaf.] In *entom.*, having the feet or locomotive organs compressed into the form of leaves.

Podophyllum (pod-ō-fl'um), *n.* [NL. (Linnaeus, 1737), so called in allusion to the 5- to 7-parted leaf, thought to resemble the foot of some animal; < Gr. ποῖς (pod-), foot, + φύλλον, leaf.] A genus of polypetalous plants of the order *Berberidaceae* and tribe *Berberideae*, characterized by having the ovules in many rows, the flower with six sepals, from six to nine petals, as many or twice as many stamens, and a large peltate stigma crowning the ovary, which becomes in fruit a berry. There are 2 species, one being *P. peltatum*, the May-apple or wild mandrake of North America, the other a Himalayan species. They are singular herbs, with thick and prolonged poisonous creeping rootstocks, from which rise long-stalked orbicular peltate and deeply lobed leaves, known among children as *umbrellas*, from their resemblance both when folded and when expanded; also called *duck's-foot*. The flowering stem, unlike the other, bears two leaves, peltate near the edge, and between them a single large flat white flower. The leaves are poisonous, but the sweetish yellow egg-shaped fruit is sometimes eaten. See *May-apple*, 1, *mandrakes*, 2, *hog-apple*, and *podophyllin*.

podopter (pō-dop'tēr), *n.* [*< Gr. ποῖς (pod-), foot, + πτερόν, wing*, = E. *feather*.] A member of the *Podoptera*.

podoscaph (pod'ō-skaf), *n.* [*< Gr. ποῖς (pod-), foot, + σκάφος, a ship*: see *scaphus*.] A hollow apparatus, like a small boat, attached one to each foot, and serving to support the body erect on the water.

Podosomata (pod-ō-sō'mā-tā), *n. pl.* [NL., neut. pl. of *podosomatus*: see *podosomatous*.] In Leach's system, an order of aporobranchiate *Arachnida*, constituted by the single family *Pycnogonidae*.

podosomatous (pod-ō-sō'mā-tus), *a.* [*< NL. podosomatus*, < Gr. ποῖς (pod-), foot, + σῶμα (sōma), body.] Having the legs of conspicuous size in comparison with the body; specifically, of or pertaining to the *Podosomata*.

podosperm (pod'ō-spēr-m), *n.* [= F. *podosperme*, < Gr. ποῖς (pod-), foot, + σπέρμα, seed: see *sperm*.] In bot., same as *funicle*, 4.

podospermium (pod-ō-spēr-mi-um), *n.* [NL.: see *podosperm*.] In bot., same as *funicle*, 4.

Podosphæra (pod-ō-sfē'rā), *n.* [NL. (Kunze), < Gr. ποῖς (pod-), foot, + σφαῖρα, a ball.] A genus of pyrenomycetous fungi of the family *Erysiphaceae*. The appendages are free from the mycelium, and dichotomously branched at the end. The peritheciol contains but a single ascus. *P. Oxyacanthæ* is the cherry-blight.

Podostemaceae (pod'ō-stē-mā'sē-ē), *n. pl.* [NL. (Lindley, 1835), < *Podostemon* + *-aceae*.] A peculiar order of apetalous plants of little-known affinity, characterized by the ovary of two or three cells, with numerous ovules in each cell, and by the aquatic habit, with creeping or expanded disks in place of roots, united to stones under water, from which arise stems with small leaves like mosses, or fronds resembling algae. The flowers are minute, with one, two, few, or many stamens, one ovary and two or three styles, a three- or five-cleft perianth, or in its place a row of little scales, and the fruit a small capsule. There are about 116 species, belonging to 4 tribes and 23 genera, of which *Podostemon* is the type. They are small plants of rapid rivers and brooks, growing firmly attached to stones under water, natives of the tropics, mainly in America, Africa, and Asia.

Podostemon (pod-ō-stē'mon), *n.* [NL. (Michaux, 1803), so called in allusion to the elevation of the two stamens on a stalk supporting the ovary; < Gr. ποῖς (pod-), foot, + στήμων, warp (stamen).] A genus of aquatic plants, type of the order *Podostemaceae* and tribe *Eu-podostemeae*, characterized by the two stamens with filaments united more than half their length, the two awl-shaped and entire stigmas, and an equally two-valved, oval, obtuse pod with two cells and eight ribs. There are about 20 species, natives of North America, Brazil, Madagascar,

Desert-chough (*Podoces panderi*).

hæ, with short wings, characteristic of the desert regions of central Asia; the desert-choughs. Four species are described—*P. panderi*, *P. hendersoni*, *P. biddulphi*, and *P. humilis*.

Podocoryne (pod'ō-kō-rī-nē), *n.* [NL. (Sars, 1842), < Gr. ποῖς (pod-), foot, + κορυφή, a club.] The typical genus of *Podocorynidae*. *P. carnea* is an example. Also *Podocoryna*.

Podocorynidae (pod'ō-kō-rin'i-dē), *n. pl.* [NL., < *Podocoryne* + *-idae*.] A family of gymnoblastic hydromedusans, typified by the genus *Podocoryne*.

pododynia (pod-ō-din'i-ā), *n.* [NL., < Gr. ποῖς (pod-), foot, + δύνω, pain.] Pain in the foot; podalgia.

podogyn (pod'ō-jin), *n.* [*< F. podogyne*, < NL. *podogynium*, q. v.] Same as *podogynium*.

podogynium (pod-ō-jin'i-um), *n.*; pl. *podogynia* (-ā). [NL., < Gr. ποῖς (pod-), foot, + γυνή,

and the East Indies, with one, the type species, *P. ceratophyllus*, the threadfoot or river-weed, extending into the northern United States. They have erect or branching stems, growing fast to stones, or in some the plant forms a lichen-like crust, sending up short branches only. Their usual aspect is much that of a filamentous or membranous seaweed.

Podostomata (pod-ō-stō-mā-tā), *n. pl.* [NL., neut. pl. of *podostomatus*: see *podostomatous*.] A class of *Arthropoda*, composed of the orders *Trilobita* and *Merostomata* (the latter containing the *Xyphosura*, *Synziphosura*, and *Euryptera*): so called from the foot-like or ambulatory character of the mouth-parts. They are an ancient generalized type, represented at the present day by the king-crabs only.

podostomatous (pod-ō-stō-mā-tus), *a.* [NL. *podostomatus*, < Gr. *ποῖς* (pod-), foot, + *στόμα*, mouth.] Having foot-like mouth-parts; belonging to the *Podostomata*.

podotheca (pod-ō-thē-kā), *n.*; *pl. podothecae* (-sē). [NL., < Gr. *ποῖς* (pod-), foot, + *θήκη*, sheath.] 1. In *ornith.*, the covering of the foot, in so far as it is bare of feathers; the tarsal envelop and the sheaths of the toes.—2. In *entom.*, a leg-case, or that part of the integument of a pupa covering a leg.

podothecal (pod-ō-thē-kal), *a.* [< *podotheca* + *-al*.] Sheathing or investing the foot; of or pertaining to a podotheca.

podotrochilitis (pod-ō-trō-kī-lī'tis), *n.* [NL., < Gr. *ποῖς* (pod-), foot, + *τροχίλος*, pulley, + *-itis*.] An inflammatory disease of the fore foot in the horse, involving the synovial sheath between the sesamoid or navicular bone of the third phalanx (or hoof) and the flexor perforans playing over it: commonly called *navicular disease*. It is a frequent cause of lameness.

Podoura, **podouran**, etc. See *Podura*, etc.

pod-pepper (pod'pē'pēr), *n.* See *Capsicum*.

pod-shell (pod'shel), *n.* A bivalve mollusk of the family *Pharidae*.

pod-shrimp (pod'shrimp), *n.* An entomostracous crustacean whose carapace is hinged or valvular, and thus capable of inclosing the legs as in a pod. The existing pod-shrimps are all small, but the type is an old one, formerly represented by large entomostracans. It is illustrated in the cuts under *Bathetridae* and *Limnetis*.

The once giant *pod-shrimps* of Silurian times. *Encyc. Brit.*, VI. 668.

pod-thistle (pod'this'tl), *n.* The stemless thistle, *Cnicus* (*Carduus*) *acaulis*.

The people at Brackley . . . always spoke of the stemless thistle as the *pod-thistle*. *Academy*, Jan. 11, 1890, p. 30.

Podura, **Podoura** (pō-dū'rā, pō-dō'rā), *n.* [NL. (Linnaeus, 1748), < Gr. *ποῖς* (pod-), foot, + *οὐρά*, tail.] 1. A Linnean genus of apterous insects, corresponding to the modern order *Thysanura*, used by later naturalists with various restrictions, and now typical of the family *Poduridae*. They have but one tarsal claw. Some forms are found on standing water, others on the snow. They are known as *springtails* and *snow-fleas*. See cut under *springtail*.

2. [*l. c.*] A species of this genus; a *poduran*.

poduran, **podouran** (pō-dū'ran, pō-dō'ran), *a.* and *n.* [< *Podura* + *-an*.] 1. *a.* Same as *podorous*.

2. *n.* A member of the genus *Podura* or the family *Poduridae*.

Podurellae, **Podourellae** (pod-ū-rel'ē, pod-ō-rel'ē), *n. pl.* [NL., dim. of *Podura*.] In early systems of classification, as Leach's and Latreille's, a group of thysanurous insects, typified by the genus *Podura*, inexactly corresponding to the modern order or suborder *Collembola*.

Poduridae, **Podouridae** (pō-dū'ri-dē, pō-dō'ri-dē), *n. pl.* [NL. (Burmeister, 1838), < *Podura* + *-idae*.] A family of thysanurous insects of the order *Collembola*, typified by the genus *Podura*, to which various limits have been assigned. It was formerly nearly equivalent to *Collembola*, but is now restricted to forms with the body cylindrical and the appendage of the fourth abdominal segment developed into a salivary apparatus. The mouth-parts are very rudimentary. The respiration is tracheal, though the podurans are supposed also to breathe directly through the integument. They are found almost everywhere in damp places. There are several genera besides *Podura*, as *Anura*, *Achoreutes*, *Tomocerus*, *Orchesella*, and *Lepidocyrtus*. See *snow-flea*, and cut under *springtail*.

podorous (pō-dū'rus), *a.* [< Gr. *ποῖς* (pod-), foot, + *οὐρά*, tail.] Belonging or pertaining to the genus *Podura* in any sense.

pod-ware (pod'wār), *n.* Pulse growing in pods or cods. See *podder*, 2. *Hallivell*. [Prov. Eng.]

podyperidrosis (pod-i-per-i-drō'sis), *n.* [NL., < Gr. *ποῖς* (pod-), foot, + *ὑπέρ*, over, beyond, + *ιδρώσις*, perspiration: see *hidrosis*.] Excessive sweating of the feet.

poel, *n.* See *poi*.

poes (pō'e), *n.* [Also *pue*; a New Zealand name.] The poe-bird, originally called the *poe bee-eater*. *Latham*, 1782.

poe-bird (pō'e-bērd), *n.* [< *poes* + *bird*.] The poe, tui, or parson-bird, *Prothemodera cincinnati* or *novae-zealandiae*, a meliphagine bird of New Zealand and Auckland. It is about as large as a blackbird, iridescent-black in color, with a patch of long curly white plumes on each side of the neck, and a white band on the wings. It is valued both by the natives for its plumage, which contributes to the ornamentation of the feather mantles worn by them, and also as a cage-bird, from the fineness of its song and its powers of mimicry. See cut under *parson-bird*.

poecile (pē'si-lē), *n.* [< Gr. *ποικίλος*, sc. *στόα*, a porch adorned with fresco-paintings, fem. of *ποικίλος*, many-colored, mottled, pied, variegated, various, manifold; akin to *L. pingere* (√ *pic*), paint: see *picture*, *paint*.] A sto or porch on the agora of ancient Athens: so called from the paintings of historical and religious subjects with which its walls were adorned. See *sto*.

poecilitic (pē'si-lit'ik), *a.* and *n.* [Also *poikilitic*, and incorrectly *paecilitic*; < Gr. *ποικίλος*, many-colored, mottled, + *-it-ic*.] A name suggested by Conybeare as an equivalent for *New Red Sandstone*, in allusion to its variegated color, the rocks of which this group is made up consisting chiefly of red, yellow, and variegated sandstones, conglomerates, and marls, with occasional beds of limestone. See *sandstone*, *Permian*, and *New Red Sandstone* (under *sandstone*).

poecilocyte (pē'si-lō-sit), *n.* [< Gr. *ποικίλος*, many-colored, + *κύτος*, a hollow.] A red blood-corpuscle of abnormal shape.

poecilocytosis (pē'si-lō-sit-ō'sis), *n.* [NL., as *poecilocyte* + *-osis*.] The presence of poecilocytes in the blood.

poecilonym (pē'si-lō-nim), *n.* [< Gr. *ποικίλος*, various, manifold, + *ὄνομα*, *ὄνομα*, a name: see *onym*.] One of two or more names for the same thing; a synonym. *Wilder*; *Leidy*.

poecilonymic (pē'si-lō-nim'ik), *a.* [< *poecilonym* + *-ic*.] Characterized by or pertaining to poecilonymy.

An unusually complete combination of poecilonymic ambiguities. *Buck's Handbook Med. Sci.*, p. 523.

poecilonymy (pē'si-lō-ni'mi), *n.* [< *poecilonym* + *-y*.] The use of several different names for the same thing; application of different terms indifferently to a thing; varied or varying nomenclature. *The Nation*, July 18, 1889.

Poecilopoda (pē-si-lōp'ō-dā), *n. pl.* [NL., < Gr. *ποικίλος*, many-colored, manifold, + *ποῖς* (pod-)= *E. foot*.] In Latreille's system of classification, the second order of his *Entomostraca*, divided into two families, *Xiphosura* and *Siphonostoma*. It was a highly artificial group, including *Limulus* with numerous parasitic crustaceans, fish-lice, etc., as *Argulus*, *Caligus*, etc. Diverged of these and restricted to the *Xiphosura*, the term is synonymous with *Merostomata* in one sense. See *Merostomata*.

poecilopodous (pē-si-lōp'ō-dus), *a.* Of or pertaining to the *Poecilopoda*.

poecilothermic (pē'si-lō-ther'mik), *a.* [< Gr. *ποικίλος*, various, + *θερμῆ*, heat.] Varying in bodily temperature with that of the surrounding medium, as is particularly the case with cold-blooded animals. Also *poikilothermic*. [Rare.]

Most of the lower animals are poikilothermic, or, as they have less appropriately been called, cold-blooded.

Claus, *Zool.* (trans.), I. 74.

poem (pō'em), *n.* [< OF. *poème*, F. *poème* = Sp. *Pg. It. poema*, < L. *poëma*, < Gr. *ποίημα*, anything made or done, a poem, < *ποιεῖν*, make. Cf. *poet*.] 1. A written composition in metrical form; a composition characterized by its arrangement in verses or measures, whether in blank verse or in rime: as, a lyric poem; a pastoral poem.

The first and most necessary point that ever I founde meete to be considered in making of a delectable poeme is this, to grounde it upon some fine invention.

Gascogne, Notes on Eng. Verse, § 1 (Steele Glas, etc., ed. [Arber].)

A poem is not alone any work or composition of the poets in many or few verses; but even one alone verse sometimes makes a perfect poem. *B. Jonson*, *Discoveries*.

A poem, round and perfect as a star. *Alex. Smith*, *A Life Drama*, II.

There is no heroic poem in the world but is at bottom a biography, the life of a man. *Carlyle*, *Sir Walter Scott*.

It is not metres, but a metre-making argument, that makes a poem. *Emerson*, *The Poet*.

2. A written composition which, though not in verse, is characterized by imaginative and poetic beauty in either the thought or the language: as, a prose poem.

poematic (pō-e-mat'ik), *a.* [< Gr. *ποιηματικός*, poetical, < *ποίημα*, a poem: see *poem*.] Relating to a poem; poetical. *Coleridge*.

Cf. *poem*, *poet*.] 1. The art of poetic composition; skill in making poems.

Poesie therefore is an arte of imitation, for so Aristotle termeth it in his word *Mimesis*—that is to say, a representing, counterfeiting, or figuring forth.

Sir P. Sidney, *Apol. for Poetrie*.

Poesy is a part of learning in measure of words for the most part restrained, but in all other points extremely licensed. *Bacon*, *Advancement of Learning*, II. 141.

A poem . . . is the work of the poet, the end and fruit of his labour and study. *Poesy* is his skill or craft of making, the very action itself, the reason or form of the work. *B. Jonson*, *Discoveries*.

2. Poetry; metrical composition.

By the many formes of *Poesie* the many moodes and pangs of louers thoroughly to be discovered.

Puttenham, *Arte of Eng. Poesie*, p. 34.

Simonides said that picture was a dumb *poesie*, and *poesie* a speaking picture. *Holland*, tr. of *Plutarch*, p. 305.

Music and *poesie* used to quicken you. *Shak.*, *T. of the S.*, I. 1. 32.

I am satisfied if it cause delight; for delight is the chief, if not the only, end of *poesie*; instruction can be admitted but in the second place; for *poesie* only instructs as it delights. *Dryden*, *Def. of Essay on Dram. Poesy*.

The lofty energies of thought, The fire of *poesie*. *Whittier*, *The Female Martyr*.

3. A poem.

Some few ages after came the poet Geoffrey Chaucer, who, writing his *poesies* in English, is of some called the first illuminator of the English tongue.

Verstegan, *Rest. of Decayed Intelligence*, vii.

4. A motto or sentimental conceit engraved on a ring or other trinket. See *posy*.

A hoopes of Gold, a paltry Ring That she did glue me, whose *Poesie* was For all the world like Cutlers Poetry Vpon a knife; Loue mee, and leaue mee not. *Shak.*, *M. of V.* (folio 1622), v.

Nay, and I have *poesies* for rings too, and riddles that they dream not of. *B. Jonson*, *Cynthia's Revels*, II. 1.

poet (pō'et), *n.* [< ME. *poete*, < OF. *poète*, F. *poète* = Sp. *Pg. It. poeta* = D. *poët* = G. *Sw. Dan. poet*, < L. *poeta*, < Gr. *ποιητής*, a maker, poet, < *ποιεῖν*, make. Cf. *poem*, *poesy*.] 1. One who composes or indites a poem; an author of metrical compositions.

A poet is a maker, as the word signifies; and he who cannot make, that is invent, hath his name for nothing. *Dryden*.

Search'd every tree, and pry'd on every flower, If anywhere by chance I might espy The rural poet of the melody. *Dryden*, *Flower and Leaf*, I. 125.

2. One skilled in the art of making poetry, or of metrical composition; one distinguished by the possession of poetic faculties or susceptibilities; one endowed with the gift and power of imaginative invention and creation attended by corresponding eloquence of expression, commonly but not necessarily in a metrical form.

Seemably they that make verses, expressyng therby none other lernynge, but the crafte of versification, be not of ancient writers named *poetes*, but only called *versifiers*. *Sir T. Elyot*, *The Governour*, I. 13.

I begin now, elevated by my Subject, to write with the Emotion and Fury of a *Poet*, yet the Integrity of an Historian. *Wycheley*, *Love in a Wood*, Ded.

The poet represents the things as they are impressed on his mind by the hand of the Creator.

Landor, Chesterfield and Chatham.

The poet is the man whose emotions, intenser than those of other men, naturally find a vent for themselves in some form of harmonious words, whether this be the form of metre or of balanced and musical prose.

J. C. Shairp, Poetic Interpretation of Nature, I.

Poet laureate. See *laureate*. — **Poet's cassia.** See *Oxyria*. **poetaster** (pō'et-as-tēr), *n.* [= *OF. poetastre* = *Sp. It. poetaastro*, < *NL. poetaster*, < *L. poeta*, a poet (see *poet*), + *dim. -aster*.] A petty poet; a feeble rimester, or a writer of indifferent verses.

He [Voltaire] was well acquainted with all the petty vanities and affectations of the poetaster.

Macaulay, Frederic the Great.

He makes no demand on our charity in favor of some poetaster for whom he may have imbibed a strange affection.

Whipple, Esa. and Rev., I. 32.

poetastri (pō'et-as-tri), *n.* [*< poetaster + -y*.] The rimed effusions of a poetaster; paltry verses.

poetess (pō'et-es), *n.* [= *F. poëtresse* = *Sp. poetisa* = *Fr. poetisa* = *It. poetessa*, < *ML. poetissa*, fem. of *L. poeta*, a poet: see *poet* and *-ess*.] A woman who is a poet.

poethood (pō'et-hūd), *n.* [*< poet + -hood*.] The state or quality of being a poet; the inherent qualifications or the conditions that constitute a poet. *S. Lanier, The English Novel, p. 47.*

The true Pandora of all heavenly graces.

Poetry (pō'et-ri), *n.* [*< ME. poëtrye*, *poëtrie*, < *OF. poëtrie*, *poëterie*, *poëtrie*, *poëtrerie* = *Old. poëtria*, < *ML. poëtria*, poetry (cf. *L. poëtria*, < *Gr. ποιήτρια*, a poetess), < *L. poeta*, a poet: see *poet* and *-ry*.] 1. That one of the fine arts which addresses itself to the feelings and the imagination by the instrumentality of musical and moving words; the art which has for its object the exciting of intellectual pleasure by means of vivid, imaginative, passionate, and inspiring language, usually though not necessarily arranged in the form of measured verse or numbers.

By poetry we mean the art of employing words in such a manner as to produce an illusion on the imagination, the art of doing by means of words what the painter does by means of colours.

Macaulay, Milton.

Poetry is itself a thing of God;

He made his prophets poets; and the more

We feel of poeas do we become

Like God in love and power — under-makers.

Bailey, Festus, Proem.

The grand power of Poetry is its interpretative power, by which I mean . . . the power of so dealing with things as to awaken in us a wonderfully full, new, and intimate sense of them, and of our relations with them.

M. Arnold, Maurice de Guérin.

We shall hardly make our definition of poetry, considered as an imitative art, too extended if we say that it is a speaking art of which the business is to represent by means of verbal signs arranged with musical regularity everything for which verbal signs have been invented.

Encyc. Brit., IX. 207.

2. An imaginative, artistic, and metrical collocation of words so marshaled and attuned as to excite or control the imagination and the emotions; the language of the imagination or emotions metricaly expressed. In a wide sense poetry comprises whatever embodies the products of the imagination and fancy, and appeals to these powers in others, as well as to the finer emotions, the sense of ideal beauty, and the like. In this sense we speak of the poetry of motion.

The essence of poetry is invention: such invention as, by producing something unexpected, surprises and delights.

Johnson, Waller.

Poetry is not the proper antithesis to prose, but to science. Poetry is opposed to science, and prose to metre. . . . The proper and immediate object of science is the acquirement or communication of truth; the proper immediate object of poetry is the communication of immediate pleasure.

Coleridge.

No literary expression can, properly speaking, be called poetry that is not in a certain deep sense emotional whatever may be its subject matter, concrete in its method and its diction, rhythmical in movement, and artistic in form.

Encyc. Brit., XIX. 257.

3. Composition in verse; a metrical composition; verse; poems: as, heroic poetry; lyric or dramatic poetry; a collection of poetry.

On seyde that Omere made lyes

Feynlinge in his poetries.

Chaucer, House of Fame, I. 1477.

And this young birkie here, . . . will his . . . poetries help him here?

Scott, Rob Roy, xxiii.

Pogge (*Agonus cataphractus*).

poggy¹ (pog'i), *n.*; pl. *poggies* (-iz). [Also *poggy*.] A small arctic whale, yielding only about 20 or 25 barrels of oil, supposed to be the young of the bow-head whale, *Balaena mysticetus*. *C. M. Scammon, Marine Mammals, p. 60.* See cut under *whale*.

poggy² (pog'i), *n.* Same as *porgy*.

poghaden (pog-hā'dn), *n.* [Amer. Ind.] The menhaden. Also *pauhagen*.

pogle, *n.* Same as *pogy*.

Pogonia¹ (pō-gō'ni-ā), *n.* [*NL. (Jussieu, 1789)*, so called in allusion to the frequently fringed lip; < *Gr. πωγωνία*, bearded, < *πῶγων*, beard.] A genus of terrestrial orchids of the tribe *Neottieae* and subtribe *Arethuseae*, characterized by the distinct and usually erect sepals, the long wingless column, and the undivided or three-lobed lip. There are over 80 species, widely dispersed over the world, of which 6 occur in the United States. The typical species (including the most common American, *P. ophioglossoides*, sometimes called *snake's-mouth orchid*) grow in bogs, especially in the neighborhood of peat, and produce a tuberous root, and a slender stem bearing a single handsome and fragrant pale-rose nodding flower, a single leaf, and a single bract; others have two or three leaves, and few or many flowers; a few bear a single flower surmounting a whorl of leaves; and many of the Old World species produce first a one-sided raceme of nodding flowers and later a single broad or roundish leaf. *P. pendula* is the three-birds orchis of the United States, named from the form of the fruit.

pogonia², *n.* Plural of *pogonium*.

Pogonias (pō-gō'ni-as), *n.* [*NL. (Lacépède, 1802)*, < *Gr. πωγωνία*, bearded, < *πῶγων*, beard.] 1. In *ichth.*, a genus of sciaenoids, having numerous barbels on the lower jaw (whence the name); the drums or drumfish, as *P. chromis*. See cut under *drum*, 11 (a). — 2. In *ornith.*, same as *Pogonorhynchus*. *Illiger, 1811.*

pogoniasis (pō-gō'ni-ā-sis), *n.* [*NL.*, < *Gr. πῶγων*, beard (cf. *πωγωνία*, bearded), + *-iasis*.] Excessive growth of beard, especially in a woman.

pogoniate (pō-gō'ni-āt), *a.* [*< Gr. πωγωνία*, bearded, < *πῶγων*, beard.] 1. In *zool.*, bearded or barbated. — 2. In *ornith.*, webbed, as a feather; having webs or pogonia; vexillate.

pogonium (pō-gō'ni-um), *n.*; pl. *pogonia* (-s). [*NL.*, < *Gr. πωγωνιον*, dim. of *πῶγων*, a beard.] In *ornith.*, the web, vane, or vexillum of a feather.

Pogonorhynchinae (pō-gō'nō-ring-ki'nē), *n.* pl. [*NL.*, < *Pogonorhynchus* + *-inae*.] A subfamily of *Megalomidae* (or *Capitonidae*), typified by the genus *Pogonorhynchus*, and containing the African barbets.

Pogonorhynchus (pō-gō'nō-ring'kus), *n.* [*NL.* (Van der Hoeven, 1835), < *Gr. πῶγων*, beard, + *βύχος*, snout.] A genus of African barbets, typical of the subfamily *Pogonorhynchinae*, having a large sulcate and dentate beak which is strongly pogoniate. *P. dubius* is glossy-black, blood-red, and white. *P. hirsutus* (or *flavipunctata*) is a barbet of the Gaboon, forming the type of the subgenus *Tricholæma*. See cut on following page.

Flowering Plant and Leaf of Snake's-mouth Orchis (*Pogonia ophioglossoides*).

Pogostemon (pō-gō-stē'mon), *n.* [NL. (Desfontaines, 1815), so called in allusion to the long hairs often clothing the filaments; < Gr. πῶγον, beard, + στῆμων, warp (stamen).] A genus of gamopetalous plants of the mint family, order Labiales, and tribe Satureineæ, type of the subtribe Pogostemoneæ, and characterized by the four perfect stamens, which are protruding, distant, straight, and little unequal, and by the terminal roundish one-celled anthers, five-toothed calyx, four-cleft corolla with one lobe spreading, and the flowers close-crowded in large verticillasters, in an interrupted spike or panicle. There are about 32 species, natives of the East Indies, the Malay archipelago, and Japan. They are herbs or shrubby plants, with opposite leaves, and the numerous small flowers are whitish and purple, or of other colors. See *patchouli* for the principal species.

Pogonorchynchus hirsutus.

pogue (pōg), *n.* [Ir. Gael. *pog* = W. *poc*, a kiss.] A kiss. [Irish.]

I axed her for a pogue,
The black-eyed saucy rogue,
For a single little pogue,
An' she scornful turned away!

The Century, XXXVIII. 892.

pogy (pō'gi), *n.*; pl. *pogies* (-giz). [Also *poggy*, *poggie*, *pogie*, *porgy*, etc.] 1. The menhaden, *Brevoortia tyrannus*. [New England.]—2. A kind of small fishing-boat used in the Bay of Fundy and along the New England coast. *Perley*.

pogy-catcher (pō'gi-kach'ēr), *n.* A sailing vessel or steamer employed in the capture of menhaden.

pogy-gull (pō'gi-gul), *n.* A sea-gull found at Cape Cod, Massachusetts (where so called), perhaps *Larus argentatus*.

poh (pō), *interj.* Same as *pooh*.

pohutukawa (pō-hū-tō-kā'wā), *n.* [Maori: see the quotation.] A conspicuous tree, *Metrosideros tomentosa*, growing on rocky coasts in New Zealand. It has leathery shining leaves, and is very handsome in blossom. Its bark yields a brown dye, and its hard strong reddish wood is suitable for the frames of ships, agricultural implements, etc.

Here every headland is crowned with magnificent pohutukawa-trees, literally rendered the 'brine-sprinkled,' known to the settlers as the Christmas tree, when bouquets of its glossy green and scarlet are used in church decoration as a substitute for the holly-berries of Old England. *Constance F. Gordon Cumming*, *The Century*, XXVII. 920.

poi (pō'i), *n.* [Hawaiian.] An article of food of the Sandwich Islanders, prepared from the root of the taro, *Colocasia antiquorum*. After being mixed with water, the taro-root is beaten with a pestle till it becomes an adhesive mass like dough; it is then fermented, and in three or four days is fit for use. Also *pos*. *C. W. Stoddard*, *South Sea Idyls*, p. 135.

Poi is generally eaten from a bowl placed between two people, by dipping three fingers into it, giving them a swirl round, and then sucking them. *Lady Brassey*, *Voyage of Sunbeam*, II. xvi.

poignancy (poi'nān-si), *n.* [(< *poignan* (t) + -cy.)] 1. The power of stimulating the organs of taste; piquancy.—2. Point; sharpness; keenness; power of irritation; asperity: as, the poignancy of wit or sarcasm.—3. Painfulness; keenness; bitterness: as, the poignancy of grief.

poignant (poi'nant), *a.* [Early mod. E. *poynant*, < ME. *poynant*, < OF. (and F.) *poignant* (= Sp. Pg. *pungente* = It. *pungente*, *pugnente*, < L. *pungen* (t)-s, ppr. of *pungere*, prick: see *pungent*, and cf. *point*.] 1. Sharp to the taste; biting; piquant; pungent.

Wo was his cook, but if his sauce were
Poynant and sharp, and redy al his gere.
Chaucer, *Gen. Prolog.* to C. T., l. 352.

No poignant sauce she knew, nor costly treat;
Her hunger gave a relish to her meat.
Dryden, *Cock and Fox*, l. 21.

2. Pointed; keen; sharp.

His poynant speare, that many made to bleed.
Spenser, *F. Q.*, I. vii. 19.

3. Keen; bitter; satirical; hence, telling; striking.

Always replying to the sarcastic remarks of his wife with complacency and poignant good humour.

Sir T. More, *Family of Sir T. More*, Int. to Utopia, p. xiv. Example, whether for emulation or avoidance, is never so poignant as when presented to us in a striking personality. *Lowell*, *Books and Libraries*.

4. Severe; piercing; very painful or acute: as, poignant pain or grief.

Our recent calamity . . . had humbled my wife's pride, and blunted it by more poignant afflictions. *Goldsmith*, *Vicar*, xxii.

=Syn. 3 and 4. *Piquant*, etc. (see *pungent*), sharp, penetrating, intense, biting, acrid, caustic.

poignantly (poi'nant-li), *adv.* In a poignant, stimulating, piercing, or irritating manner; with keenness or point.

poignard, *n.* [F.] Same as *poniard*.

poignet (poi'n), *n.* [F. *poing*, fist: see *poing*.] Fist; hand.

The witnesses which the faction kept in *poigne* (like false dice, high and low Fullhams), to be played forth upon plots and to make discoveries as there was occasion, were now chaplains. *Roger North*, *Examen*, p. 108. (*Davies*.)

poimenics (poi-men'iks), *n.* [(< Gr. ποιμήν, a shepherd, LGr. a pastor: see -ics.)] Pastoral theology. See *pastoral*.

poinadot, *n.* Same as *poniard*.

My Peece I must alter to a Poynado, and my Pike to a Pickadevant. *Heywood*, *Royal King* (Works, ed. Pearson, 1874, VI. 70).

poiard, *n.* An obsolete form of *poniard*.

Poinciana (poi-ni-si-ā'nā), *n.* [NL. (Tournefort, 1700), named after *Poinci*, a governor-general of the West Indies in the middle of the 17th century, who wrote on the natural history of the Antilles.] A genus of leguminous plants of the suborder *Cæsalpinieæ* and tribe *Eucæsalpinieæ*, characterized by the five valvate calyx-lobes, five nearly equal orbicular petals, ten distinct declined stamens, and hard flat two-valved many-seeded pods. The 3 species are natives of warm regions in eastern Africa, the Mascarene Islands, and western India, but have long been introduced into the West Indies and other tropical countries. They are handsome trees with bipinnate leaves and showy orange or scarlet flowers. *P. regia*, with crimson flowers, is known as royal peacock-flower, flame-acacia, and gold mohur-tree. *P. pulcherrima*, with red and yellow flowers, is the Barbados-pear, flower-pride, or flower-fence. *P. Gilliesii* is the crimson thread-flower. They are also sometimes called *flamboyants*. See *flamboyant*.

poind (poi'nd), *v. t.* 1. A dialectal (Scotch) form of *pind* or *pound*.—2. To seize; detain; seize and sell under warrant, as a debtor's goods. [Scotch.]

He slew my knight, and poi'nd his gear.

Lament of the Border Widow (Child's Ballads, III. 87).

poinder (poi'n-der), *n.* A dialectal form of *pinder*.

poinding (poi'n-ding), *n.* [Verbal *n.* of *poind*, *v.*] In Scotch law, a process by which a creditor may enforce his demand by seizure of movable property. It is carried into effect either by sale and payment of the proceeds to the creditor, or by appraisal of the goods and their delivery to the creditor on account. *Personal poinding* cannot be prosecuted, except against a tenant for rent, until the debtor has been charged to pay or perform and the days allowed therefor have expired. The right of a private creditor to reach things in action and some other movables, such as money and ornaments on the person, has been questioned. *Real poinding*, or *poinding of the ground*, is the remedy of one who is enforcing a lien or burden on land, as distinguished from a personal obligation to seize movables found on the land, other than those of strangers, and other than those of a tenant in excess of rent actually due from him.

poinette, *n.* See *poynet*.

poing (pwañ), *n.* [F., the fist, = Sp. *puño* = Pg. *punho* = It. *pugno*, < L. *pugnus*, fist.] In her-, a fist or closed hand used as a bearing.

Poinsettia (poi-nset'i-ā), *n.* [NL. (Graham, 1836), named after Joel R. Poinsett, American minister to Mexico, who discovered the plant there in 1828.] 1. A former genus of American apetalous plants of the order *Euphorbiaceæ* and tribe *Euphorbieæ*, now included as a section of the vast genus *Euphorbia*.—2. [l. c.] The *Euphorbia* (*Poinsettia*) *pulcherrima*, a plant much cultivated in conservatories. It is conspicuous for the large scarlet floral leaves surrounding its crowded yellowish cymes of small flowers, and is much used for decoration, especially in churches. Also called *Christmas-flower* or *Easter-flower*, in England *lobster-flower* and *Mexican flame-leaf*, and in Mexico *flora de pasqua*.

point¹ (poi'nt), *n.* and *a.* [ME. *point*, *poyn*, *pointe*, *poyn*; < (a) OF. *point*, *pointet*, *point*, F. *point*, *m.*, a point, dot, full stop, period, speck, hole, stitch, point of time, moment, difficulty, etc., = Sp. *punto* = Pg. *ponto* = It. *punto*, *m.*, = OFries. *punt*, *punt* = D. *punt* = MLG. *punte*, LG. *punt*, *pünt* = MHG. *punct*, *punt*, *puncte*, *punte*, G. *punkt* = Icel. *punkr* = Sw. Dan. *punkt*, a point, < L. *punctum*, a point, puncture, spot on dice,

small part or weight, moment, point in space, etc., prop. a hole punched in, neut. of *punctus*, pp. of *pungere*, prick, pierce, punch: see *punch*, *pungent* (cf. L. *punctus* (*punctu*-), a pricking, stinging, also a point, < *pungere*, prick, punch); (b) < OF. *pointe*, *pointe*, *pointe*, F. *pointe*, *f.*, a point, bodkin, small sword, place, etc., also sharpness, pungency, etc., = Sp. *punta* = Pg. *ponta* = It. *punta*, *f.*, < ML. *puncta*, *f.*, a point, etc., fem. of L. *punctus*, pp. of *pungere*, prick, pierce, punch: see above.] 1. *n.* 1. The sharp end of something, as of a thorn, pin, needle, knife, sword, etc.

With the egge of the knyfe youre trenchere vp be ye reysande
As nyghe the poyn

Babees Book (E. E. T. 8.), p. 138.

Eight forkie arrows from this hand have fled,
And eight bold heroes by their points lie dead.

Pope, *Illad*, viii. 382.

This barbed the point of P.'s hatred.

Dickens, *Great Expectations*, II. 217.

2. That which tapers to or has a sharp end; a tapering thing with a sharp apex. (a) *A sword.*

Why, I will learn you, by the true judgment of the eye, hand, and foot, to control any enemy's point in the world. *B. Jonson*, *Every Man in his Humour*, l. 4.

(b) In *etching*, an engraving-tool consisting of a metallic point, a sewing-needle or a medium embroidery-needle, or a rat-tail file ground to an evenly rounded tapering point, not too sharp if intended for use on an etching-ground, but much more trenchant if it is to be employed in dry-point on the bare copper.

There were also many fragments of boxwood, on which were designs of exquisite beauty, drawn with the point. *C. T. Newton*, *Art and Archaeol.*, p. 379.

(c) In *printing*, a projecting pin on a press for marking the register by perforating the paper. (d) A small diamond or fragment of a diamond used for cutting glass. (e) A punch used by stone-masons to form narrow ridges in the face of a stone which is to be afterward dressed down. (f) A wedge-shaped chisel for rigging ashler. (g) A triangular piece of zinc for holding glass in the sash before the putty is put in. (h) *pl.* In *rail*, the switches or movable guiding-rails at junctions or stations. [Eng.]

For horse traction fixed points of chilled cast-iron or steel are sufficient, as the driver can turn his horses and direct the car on to either line of rails.

Encyc. Brit., XXIII. 507.

(i) A branch of a deer's antler. See *antler*.

He was a fine buck of eight points.

T. Roosevelt, *Hunting Trips*.

(j) In *backgammon*, one of the narrow tapering spaces on which the men are placed. (k) *pl.* Spurs or stout needles suitably fastened in a flat board, on which printed sheets are placed by passing the needles through the point-holes; this is done to insure the exact cutting of printed sheets that have uneven margins. *Knigh*, *Book-binding*.

3. A salient or projecting part; a part of an object projecting abruptly from it, as a peak or promontory from the land or coast.

And the sayde yle Cirigo is directly ayenst the poyn

Sir R. Guyllorde, *Fylgrymage*, p. 13.

The splintered points of the crag are seen,
With water howling and vexed between.

Whittier, *Mogg Megone*.

4. A salient feature or physical peculiarity; especially, a feature which determines the excellence of an animal; characteristic; trait.

So remarkable was their resemblance [two horses] in points, action, and color that . . . even the grooms came out to see. *J. W. Palmer*, *After his Kind*, p. 226.

5. The salient feature of a story, discourse, epigram, or remark; that part or feature of a saying, etc., which gives it application; the directly effective part; hence, the possession of such a feature; force or expression generally: as, he failed to see the point of the joke; his action gave point to his words.

Every author has a way of his own in bringing his points to bear. *Sterne*, *Tristram Shandy*, I. 9.

Both her [Madame de Lieven's] letters and her conversation are full of point. *Greville*, *Memoirs*, Feb. 8, 1819.

An epigram now is a short satire closing with a point of wit. *I. D'Iraeti*, *Amen*, of Lit., II. 352.

6. The precise question or matter in dispute or under consideration; the principal thing to be attended to; the main difficulty to be met or obviated: as, these are side issues—let us come to the point.

He maintained, which was in fact the point at issue, that the opinions held at that day by the Quakers were the same that the Ranters had held long ago.

Southey, *Bunyan*, p. 42.

"You haven't told me about the Greek yet," says Charles Wall, clinging to the point.

W. M. Baker, *New Timothy*, p. 115.

7. An indivisible part of an argument, narrative, or account; a particular; a detail; an item. See *at all points* and *in point of*, below.

Where she no point had of diffame no daia.

Rom. of Partenay, I. 3392.

But for y am a lowed man, paraunter y migte
Passeu par aventure & in som pointy eren.
Piers Plowman's Crede (E. E. T. S.), l. 846.

Told him every point how he was slain.
Chaucer, Nun's Priest's Tale, l. 202.

But in what particular points the oracle was, in faith I
know not.
Mr P. Sidney, Arcadia, l.

You are now beyond all our fears, and have nothing to
take heed on your self but fair ladies. A pretty point of
securty, and such a one as all Germany cannot afford.
Mr John Suckling, Letters (1648), p. 86.

8. Particular end, aim, purpose, or concern;
object desired: as, to gain one's point.

The constant design of both these orators, in all their
speeches, was, to drive some one particular point.

Swift, To a Young Clergyman.

Our Swain,
A very hero till his point was gained,
Proved all unable to support the weight
Of prosperous fortune.

Wordsworth, Excursion, vi.

I suppose the point of the exhibition lay in hearing the
notes of love and jealousy warbled with the lisp of child-
hood; and in very bad taste that point was.

Charlotte Brontë, Jane Eyre, xl.

The rain always made a point of setting in just as he had
some out-door work to do.
Irving, Rip Van Winkle.

9t. Case; condition; situation; state; plight.

He departed that Ryvere in 300 male Ryvers, because
that he had sworn that he scholde putte the Ryvere in
suche point that a Woman myghte wel passe there with-
outen castynge of hire Clothes.

Mandeville, Travels, p. 41.

He was a lord ful fat and in good point.

Chaucer, Gen. Prolog. To C. T., l. 186.

And over yere that wol been in goodo points,
Withouten scorf or scalle in cors or jointe.

Palladius, Husbandrie (E. E. T. S.), p. 154.

Amant be-thought hym that he myghte come neuer in
better point to conquire his Castell that he so longe hadde
lost, and sente after peple.
Martin (E. E. T. S.), ll. 360.

10t. A deed or feat; an exploit.

Yf thou durst, par ma fay,
A point of armys undertake,
Thow broke her will fore ay.

Torrent of Portugal, p. 36. (*Hallivell*.)

11. A mark made by the end of a sharp in-
strument, such as a pin, needle, pen, etc.; a
dot or other sign to mark separation, to mea-
sure from, etc. Specifically—(a) A mark of punctua-
tion; a character used to mark the divisions of composi-
tion, or the pauses to be observed in reading or speaking,
as the comma (,) the semicolon (;), the colon (:), and espe-
cially the period or full stop (.)

There abruptly it did end,
Without full point, or other Cesure right.

Spenser, F. Q., II. x. 68.

Who shall teach the propriety and nature of points and
accents of letters?
Purchas, Pilgrimage, p. 168.

But thy Name all the Letters make;
Whate'er 'tis writ, I find That there,
Like Points and Comma's ev'ry where.

Cowley, The Mistress, The Thief.

Hence—(b) A stop; a conclusion; a period.

And ther a point; for ended is my tale.

Chaucer, Canon's Yeoman's Tale, l. 469.

(c) A diacritical mark, indicating a vowel, or other modifi-
cation of sound: especially in Hebrew, Arabic, etc. (d) A
dot used in writing numbers—(1) inserted after the
units' place to show where the decimals begin (specifically
called a *decimal point*); or (2) placed over a repeating de-
cimal, or over the first and last figures of a circulating de-
cimal: thus, $\frac{1}{3} = .33$; $\frac{1}{3} = 1.2567$; or (3) used to separate a
series of figures representing a number into periods of a
certain number of figures each. (e) In musical notation, a
dot affixed to a note, either after it, to increase its time-
value (see *dot*), or above or below it, as a sign of a staccato
effect (see *staccato*). (f) A speck or spot; a jot; a trace;
hence, figuratively, a very small quantity.

Thei cowde not in hym espi no pointis of covetise.

Martin (E. E. T. S.), l. 106.

12. An object having position but not exten-
sion. (a) A place having spatial position but no size;
the uninterrupted common limit of four three-dimensional
spaces.

We sometimes speak of space, or do suppose a point in
it, at such a distance from any part of the universe. *Locke*.

All rays proceeding from a point pass through a single
point after reflexion, because they undergo a change in
their direction greater in proportion as the point of the
mirror struck is distant from the principal axis.

Lommet, Light (trans.), p. 42.

(b) In astron., a certain place marked in the heavens, or
distinguished for its importance in astronomical calcula-
tions: as, vertical points (the zenith and the nadir); equi-
social points; solstitial points. (c) In persp., any defini-
tive position with reference to the perspective plane: as,
point of sight; vanishing-point. (d) That which has posi-
tion in time, but no definite continuance; an instant of
time.

And a noon as he was comen his felowes recovered that
were in points to leve place. *Martin* (E. E. T. S.), ill. 459.

The period of his [Henry V.'s] accession is described as
a point of time at which his character underwent some
sort of change. *Stubbs, Const. Hist.*, § 645.

13. Precise limit or degree; especially, the
precise degree of temperature: as, the boiling-
point of water.

Oh, furious desire, how like a whirlwind
Thou hurriest me beyond mine honour's point!
Beau. and Fl., Knight of Malta, l. 1.

They [the Jesuits] appear to have discovered the precise
point to which intellectual culture can be carried without
risk of intellectual emancipation.

Macaulay, Hist. Eng., vi.

14. A small unit of measurement. (a) A linear
unit, the tenth part of a geometrical line, the twelfth part
of a French line. (b) In typography, a
type-founding unit of measure; in
the United States about one seven-
ty-second of an inch. It regulates
the bodies and defines numerically
different sizes of types. The body
of pica, for instance, is 12 points
in size, and the new designation
for pica is 12 point. The French
(Didot) point is larger. Twelve
points French are nearly equal to
thirteen points American. The
point system was introduced in
1737 by Fournier the younger, a
type-founder of Paris. As made by
him, this point was not a regular
fraction of any legally prescribed
measure. François-Ambroise Di-
dot readjusted this point as a
fraction of the standard royal foot,
in which form it was gradually
accepted by the printing-trades of
France and Germany. The Ameri-
can point was adopted by the
United States Type-Founders' As-
sociation in 1833, and made of
smaller size, to prevent a too
marked disturbance of the sizes
then in regular use. The old names
of types and their relation to each other are shown by
the number of points assigned to each size in the follow-
ing table:

4 POINT.	10 POINT.
5 POINT.	11 POINT.
6 POINT.	12 POINT.

of types and their relation to each other are shown by
the number of points assigned to each size in the follow-
ing table:

(c) *Naut.*, an angular unit, one eighth of a right angle, or
11°, being the angle between adjacent points of the com-
pass (see *compass*, n. 7): as, to bring the ship up half a
point.

I find the compass of their doctrine took in two and
thirty points. *Swift, Tale of a Tub*, viii.

15. A unit of fluctuation of price per share or
other standard of reference on the exchanges,
etc. In stock transactions in the United States a point
is \$1 (or in Great Britain £1); in coffee and cotton it is
the hundredth part of a cent, and in oil, grain, pork, etc.,
one cent: as, Erie preferred has declined five points; cof-
fee has gone up 200 points.

In the afternoon there had been one of the usual furries
in the "street." Zenith and Nadir preferred had gone off
three points. *The Century*, XXXVIII. 209.

16. A unit of count in a game (compare *def.*
19); hence, an advantage in any struggle: as, I
have gained a point.

Charles's impudence and bad character are great points
in my favour. *Sheridan, School for Scandal*, iv. 2.

17. In *piquet*, the number of cards in the longest
suit of a hand: as, what is your point? Six.—

18. In *lace-making*, needle-point lace: as, Alen-
çon point; Dresden point; a collar of point. See
cut under *lace*. Used in the plural, the term de-
notes lace, especially fine lace in general: as, a christen-
ing-robe trimmed with French points; especially so used
in the eighteenth century, in such phrases as "he is well in
points"—that is, well supplied with lace. Point is also
used freely in English in connection with the decorative
arts (as a tapestry of Beauvais points), referring to some
peculiar kind of work, and is even applied to bobbin-
lace and the like. It also denotes vaguely a pattern or
a feature of a pattern in works of embroidery and the
like, usually in connection with the stitch or the peculiar
method of work which produces it. Thus, *dentelle*, *point*
d'Angleterre, means literally lace, English style of work,
but the phrase *English point* is more often used for it,
causing great confusion with the proper sense of needle-
point lace. See *lace*.

We shall all ha' bride-laces
Or points. *B. Jonson, Tale of a Tub*, l. 2.

19. A lace with tags at the end.
Such laces, about eight inches long, con-
sisting often of three differently colored
strands of yarn twisted together and hav-
ing their ends wrapped with iron, were
used in the middle ages to fasten the
clothes together, but gave place to bu-
tons in the seventeenth century. They
were also made of silk or leather. They
or their tags were much used as small
stakes in gaming, as forfeits, counters,
and gratuities—uses explaining many
allusions in old writers, especially the figurative use of
the word for a small value, or a thing of small value.

Points in Costume.

All in a kirtel of a lyght waget,
Ful faire and thikke been the pointes set.
Chaucer, Miller's Tale, l. 136.

I pray yow bryng hom pointys and lassyis of silk for yow
and me. *Paston Letters*, II. 368.

He made his pen of the aglet of a point that he plucked
from his hose. *Latimer, 4th Sermon* bef. Edw. VI., 1549.

In matters not worth a blewie point . . . we will spare
for no cost. *Udall, tr. of Apophthegms of Erasmus*, p. 8.

Full large of limbe and every joint
He was, and cared not for God or man a point.

Spenser, F. Q., I. li. 12.

20. A fastening resembling a tagged lacing.
(a) A short narrow strip of leather sewed to any part of
harness to form a buckling-strap. (b) *Naut.*, a short piece
of rope or sennit used in reefing sails. See *reefing-point*.

21. In *fencing*, a stab or puncture with the
point of a sword; a blow with the button of the
foil when properly directed: as, he can give me
three points in ten (i. e., he can make ten hits
or points on me while I make seven on him).—

22. In *her.*: (a) One of the nine recognized
positions on the shield which denote the local-

The Nine Points of the Shield.

A, dexter chief point; B, chief point; C, sinister chief point; D,
honor point; E, fesse-point; F, nombril; G, base or flank point; H,
dexter base point; I, sinister base point.

ity of figures or charges. (b) The middle part
of either the chief or the base as distinguished
from the dexter and sinister cantons. (c) A
bearing which occupies the base of the es-
cutcheon. It is usually considered as a pile reversed—
that is, rising from the base and reaching to the upper
edge of the escutcheon; but it is very often of less height,
reaching only to the fesse-point or to the nombril, and
sometimes is merely the base itself bounded by a hori-
zontal line separating it from the rest of the field. Plain
point is especially treated in the way last mentioned.
The bearing is very rare in English armory, and hence
some writers treat it as synonymous with *base*, and
others as synonymous with *pile reversed*. It is also cus-
tomary to represent the sides of the sharply angled point
as concavely curved, while those of the pile are straight.
(d) A division of the field barwise: thus, three
points gules, argent, and azure, means that the
field is divided into three horizontal stripes, of
which the uppermost is red, the middle one
silver, etc.—23t. Ordinance; law; act.

The comyns of this present yeld affermen and enacte alle
the pointes of this yeld, for the grete ease, pease, profit,
and tranquille of the Cyte.

English Gilds (E. E. T. S.), p. 404.

24t. A slur; an indignity.

But the triest men of Troy traitur hym cald,
And mony pointes on hym put for his pure shame,
That deseruet full duly the dethe for to have.

Destruction of Troy (E. E. T. S.), l. 7900.

25. The action or attitude of a dog in pointing
game: as, he comes to a point well.

In the pointer and setter, the fit almost always occurs
just after a point, the excitement of which appears to act
upon the brain. *Dogs of Great Brit. and America*, p. 349.

26. In games: (a) In *cricket*, a fielder who stands
at a short distance to the right of the batsman,
and slightly in front of him. See diagram
under *cricket*. (b) In *lacrosse*, a player who
stands a short distance in front of the goal,
and whose duty is to prevent the ball from
passing through the goal. (c) *pl.* In *base-ball*,
the position occupied by the pitcher.—27. A
thing to be pointed at, or the mere act of
pointing; especially, a fitch of bacon or the
like, which is not eaten, but only pointed at
as a pretense for seasoning: as, to dine on
potatoes and point (that is, on nothing but po-
tatoes): a jocular expression in vogue in Ire-
land.

Their universal sustenance is the root named potato,
... generally without condiment or relish of any kind,
save an unknown condiment named point.

Carlyle, Sartor Resartus.

28t. A particular signal given, as by the blast
of a trumpet or the beat of a drum; hence, a
note; a call.

On a sudden we were alarmed with the noise of a drum,
and immediately entered my little godson to give me a
point of war.

Steele, Tatler, No. 96.

The trumpets and kettledrums of the cavalry were next
heard to perform the beautiful and wild point of war, ap-
propriated as a signal for that piece of nocturnal duty.

Scott, Waverley, xlii.

29. In *music*, the entrance of a voice or an in-
strument with an important theme or motive.
—*Accidental point*. See *accidental*. — *Acting point*, in
physics, the exact point at which any impulse is given.—

Alençon point. See *Alençon lace*, under *lace*. — **Alveolar point.** See *alveolar*, and cut under *craniometry*. — **Apparent double point.** See *apparent*. — **Archimedean point.** the initial recognition of one's own existence as given in consciousness: so called because this was supposed to supply the necessary point or fulcrum of indubitable fact on which to raise the structure of philosophy. — **Armed at all points.** See *armed*. — **At all points** (formerly of all points), in every particular; completely.

The third was Moneval, that was a noble knight and richly armed of *alle points*. *Mélin* (E. E. T. S.), III. 562.

Young Eustace is a gentleman at all points,
And his behaviour affable and courtly.
Fletcher (and another), *Elder Brother*, III. 1.

At or in (the) point, on the point; ready; about (to): sometimes used with *on* or *upon*.

My son *in point* is for to lette
The holy lawes of oure Alkaron.
Chaucer, *Man of Law's Tale*, I. 233.

And Esau said, Behold, I am at the point to die; and what profit shall this birthright do to me? *Gen.* xxv. 32.

I knock'd and, bidden, enter'd; found her there
At point to move. *Tennyson*, *Princess*, III.

At (or on) the point of, in the act of; very near to: as, on the point of leaving; at the point of death.

Shah Alum had invested Patna, and was on the point of proceeding to storm.
Macaulay, *Lord Clive*.

Articular point. See *articular*, and cut under *craniometry*. — **Base point.** in *her*. See def. 22 (a). — **Bone-point.** a name given to some rich varieties of rose point-lace—it is said because of its appearance as if richly sculptured in ivory or bone. See *bone-lace*. — **Breaking-point.** in *engineering*, *mechanics*, etc., the degree of strain under which a structure or part will give way. — **Cardinal point.** (a) One of the four points of the horizon, due north, south, east, and west. (b) *In astrology*. See *cardinal*. (c) *In optics*, six points on the axis of a lens or system of lenses, including (1) two focal points, which are the foci for parallel rays; (2) two nodal points, so situated that an incident ray through one emerges in a parallel direction through the other; (3) two principal points—those points on the axis through which the so-called principal planes pass: these planes are parallel to the axis, and so situated that the line joining the points in which an incident ray meets the first and the corresponding emergent ray meets the second is parallel to the axis; under certain conditions the principal points may coincide with the nodal points. — **Conical, conjugate, consecutive, corresponding, etc., points.** See the adjectives. — **Critical point.** See *critical*. — **Cut over point.** in *jewelry*. See *cut*, *n.* — **Cut point.** cut work or cut-and-drawn work, a phrase adapted from the French *point coupé*. — **Dead-point.** in *mech.* See *dead-center*. — **Decimal, disacritical, diagonal, double point.** See the adjectives. — **English point.** See *English point-lace* (a), under *lace*. — **Equinoctial points.** See *equinoctial*. — **Fixed point.** in *mech.* a center around which any part moves. — **From point to point,** from one particular to another.

He can al devyse
Pro point to point, nat o word wol he faille.
Chaucer, *Monk's Tale*, I. 472.

Frontal points. Same as *ankle*. — **Genoa point,** a kind of bobbin-made guipure, especially that which has a réseau instead of detached and irregular brides for its ground. — **Heads and points.** See *head*. — **Imaginary point.** See *imaginary*. — **Indented in point.** See *indented*. — **Index of a point.** See *index*. — **In good point** [OF. *en bon point*: see *embonpoint*], in good case or condition. See def. 9. — **In point.** (a) See *at point*. (b) Applicable; apposite; appropriate; exactly fitting the case.

When history, and particularly the history of our own country, furnishes anything like a case in point, . . . he will take advantage of it. *Sheridan*, *The Critic*, II. 1.

In point of, as regards; with respect or regard to.

If I transgress in point of manners, afford me
Your best construction.
B. Jonson, *Devil is an Ass*, III. 1.

Providence had created the inhabitants of the peninsula of India under many disadvantages in point of climate.
Bruce, *Source of the Nile*, I. 371.

In point of fact, as a matter of fact; in fact.

In point of fact, he expired about half-past four that same afternoon. *R. H. D. Barham*, *Memoir of R. H. Barham* (Ingoldsby Legends, I. 116).

Irish point. See *Irish*. — **Jugal point.** See *craniometry*. — **Limiting points.** See *limit*. — **Lubber's point.** Same as *lubber-line*. — **Lunistical points.** See *lunistical*. — **Malar point.** See *craniometry*. — **Mental, metoptic, multiple, nasal, navel point.** See the qualifying words. — **Needle-point,** needle-made lace: a phrase especially applied to Alençon and Argentan laces, as being formerly the only important French laces and the only fashionable ones not made with the bobbins. See under *lace*. — **Neutralization point.** See *neutralization*, 1. — **Neutral points,** points on the commutator of a dynamo upon which the collecting brushes rest: generally the extremities of a diameter at right angles to the resultant lines of force. — **Nodal points.** See *nodal*. — **Objective, occipital, original, parabolic point.** See the adjectives. — **Painful points,** points painful on pressure, occurring in many cases of neuralgia in the course of any affected nerve: described by Valléix in 1841. — **Petit point.** Same as *ten-stitch*. — **Pinch points.** See *pinch*. — **Point à brides.** (a) The ground of lace when made of brides or bars. (b) Lace having a bride ground, as opposed to that having a réseau ground. — **Point appliqué.** See *appliqué*. — **Point à réseau,** lace which has a net ground worked together with the pattern, as is the case with Mechlin. — **Point at infinity.** See *infinity*, 3. — **Point d'Alençon.** Same as *Alençon lace* (which see, under *lace*). — **Point d'Angleterre.** See *English point-lace* (a), under *lace*. — **Point d'appui.** See *appui*. — **Point d'Argentan.** Same as *Argentan lace* (which see, under *lace*). — **Point de gaze,** a very fine needle-made ground for lace, generally identified with the finest Brussels lace when wholly made with the needle. — **Point de racroc,**

a method of fastening together the different pieces of lace as in Brussels and Bayeux laces: it is not sewing, but a fresh row of meshes imitating in part the ground of the lace. — **Point d'esprit,** in *lace-making*: (a) Originally, a small oval figure occurring in various kinds of guipure, and usually consisting of three short lengths of cord or parchment laid side by side and covered with the thread: such ovals were arranged in various patterns, but especially in rosettes. (b) A much smaller solid or mat surface, square or oblong, used to diversify the net ground of certain laces. — **Point de Valenciennes.** Same as *Valenciennes lace* (which see, under *lace*). — **Point de velin.** Same as *velin point*. — **Point diamond.** See *diamond*. — **Point duchesse.** Same as *duchesse lace* (which see, under *lace*). — **Point for point,** in detail; precisely; exactly.

This sergeant came unto his lord ageyn,
And of Grisildes wordes and hir chere
He tolde him point for point.
Chaucer, *Clerk's Tale*, I. 521.

Point impaled, in *her*, a point divided vertically or palewise, the two parts of different tinctures. — **Point of alteration or duplication,** in *medieval musical notation*, a dot placed after and properly above the first of two short notes in perfect rhythm as a sign that the second note after it is long. — **Point of attack,** that part of a defended position which is chosen for the main assault or onset; in siege operations, that part of the defenses which must be reduced in order to force the garrison to surrender.

Up to that time I had felt by no means certain that Crump's landing might not be the point of attack.
U. S. Grant, *Personal Memoirs*, I. 336.

Point of coincidence. See *coincidence*. — **Point of contrary flexure,** a point on a plane curve at which a tangent moving along the curve ceases to turn in one direction and begins to turn in the opposite way. — **Point of day,** dawn; daybreak. [Obsolete or poetical.]

So shall I say to alle the princes that thei be redy at the point of day for to ride. *Mélin* (E. E. T. S.), III. 565.

Point of dispersion, in *optics*, that point from which the rays begin to diverge, commonly called the *virtual focus*. — **Point of distance.** See *distance*. — **Point of division or imperfection,** in *medieval musical notation*, a dot placed between two short notes to indicate a rhythmic division like that marked by the modern bar. — **Point of election.** See *election*. — **Point of fall,** in *gunn.* the point first struck by the projectile. — **Point of fusion.** See *fusion*. — **Point of honor.** (a) See *honor*. (b) In *her*, a point in the escutcheon immediately above the center: also called the *heart*. — **Point of horse,** in *mining*, the spot where a vein, as of ore, is divided by a mass of rock into one or more branches. — **Point of incidence,** in *optics*, that point on a surface upon which a ray of light falls. — **Point of law,** a specific legal principle or rule. The term is generally used to indicate a discriminating application, or the precise effect on a given state of facts, of the appropriate legal principle or provision. — **Point of magnetic indifference.** See *magnetic*. — **Point of order,** in deliberative bodies, a question raised as to whether proceedings are in conformity with parliamentary law and with the special rules of the particular body itself. — **Point of osculation.** See *osculation*. — **Point of perfection,** in *medieval musical notation*, a dot placed after a long note in triple or perfect rhythm to prevent its being made duple or imperfect by position. — **Point of reflection,** in *optics*, the point from which a ray is reflected. — **Point of refraction,** in *optics*, that point in the refracting surface where the refraction takes place. — **Point of regard,** the point at which the eye is directly looking. Its image falls in the middle of the macula lutea of the retina. — **Point of sight.** Same as *point of vision*.

Therefore, as in perspective, so in tragedy, there must be a point of sight in which all the lines terminate, otherwise the eye wanders, and the work is false.
Dryden, *Grounds of Criticism in Tragedy*.

Point of view, a position from which one looks, or from which a picture is supposed to be taken; hence, the state of mind, or predisposition, which consciously or unconsciously modifies the consideration of any subject. — **Point of vision,** the position from which anything is observed, or is represented as being observed; the position of the eye of the observer. Also called *point of sight*, *point of view*, *center of projection*, *center of vision*, etc. — **Point plat,** in *lace-making*. (a) Flowers or sprigs of bobbin-work, as opposed to needle-point work. See *plat*, *n.* 2. (b) Application-lace in which such pillow-made flowers are applied to a net ground. See *application-lace* and *Brussels lace* (both under *lace*). — **Points and pins,** an old game similar to skittles. — **Points of support,** in *arch.* those points or surfaces on the plan of the piers, walls, columns, etc., upon which an edifice rests, or in which the various pressures are collected and met. — **Points of the compass.** See *compass*, *n.* 7. — **Point-to-point,** in a straight line; across country.

To test a good hunter there is nothing like a four-mile point-to-point steeplechase. *Edinburgh Rev.*, CLXVI. 409.

Pointistic points. See *pointistic*. — **Power of points,** in *elect.* the effect of fine points in promoting electrical discharge. The density (electrical) at any point of a charged body is inversely as the radius of curvature, and is, therefore, relatively great at the extremity of a fine point. When it reaches a certain limit, the electricity escapes easily, and charged bodies may thus be silently discharged. — **Principal points,** in *optics*, of a lens or a combination of lenses, the two points on the optical axis which possess the property (among others) that the line drawn from the first principal point to any point in the object is parallel to the line drawn from the second principal point to the corresponding point in the image. The angle subtended by the object at the first principal point, therefore, equals that subtended by the image at the second. Gauss first discovered these points, and introduced the term *Hauptpunkt*, of which *principal point* is the translation. — **Rose-point,** in *lace-making*, the peculiar style identified with Venetian needle-point lace of the early part of the seventeenth century. The pattern is rather large, with beautifully designed conventional flowers, and is especially distinguished by the decided relief which is given to it, so that it is often said to resemble carved ivory. The pattern is

so distributed that there is but little space for the ground to occupy, and this ground is composed of large brides or bars decorated with picots. — **Spanish point,** gallons and pasements of silk, silk and gold, silver and the like, which were in demand during the latter part of the seventeenth and in the eighteenth century. Much of it was made in the Spanish Netherlands, and much also in Genoa. — **Spinal point.** See *craniometry*. — **Subnasal, supra-auricular, supraclavicular, etc., point.** See the adjectives, and cut under *craniometry*. — **Supranasal point.** Same as *ophryon*. — **Supraorbital point.** Same as *ophryon*. — **The Five Articles and the Five Points.** See *article*. — **To back a point,** in *sporting*, to come to a point on observing that action in another dog: said of pointers and setters. — **To be at a point,** to be determined or resolved.

Be at a point with yourselves, as the disciples of Christ which had forsaken themselves, to follow not your will but God's will.
J. Bradford, *Letters* (Parker Soc., 1853), II. 120.

To blow heads and points. See *head*. — **To cast a point of traverse.** See *cast*. — **To come to point,** to fight with swords.

They would have come to points immediately, had not the gentlemen interposed.
Smollett, *Sir L. Greaves*, III. (Davies.)

To control the point. See *control*. — **To give points to.** (a) To give odds to; have the advantage of.

Any average Eton boy could give points to his Holiness in the matter of Latin verses. *The American*, 1833, VI. 333.

(b) To give a valuable or advantageous hint, indication, or piece of information to: as, he can give us points on that subject. [Slang.] — **To make a point.** (a) To rise in the air with a peculiar motion over the spot where quarry is concealed: said of a hawk. (b) To make a particular desired impression: "score." — **To make a point of,** to be resolved to (do something) and do it accordingly; insist upon: as, to make a point of rising early. — **To point,** in every detail; completely.

A faithlesse Sarazin, all armde to point.
Spenser, *F. Q.*, I. II. 12.

Hast thou, spirit,
Perform'd to point the tempest that I bade thee?
Shak., *Tempest*, I. 2. 194.

To stand upon points, to be punctilious; be overnice or over-scrupulous.

This fellow doth not stand upon points.
Shak., *M. N. D.*, v. 1. 118.

To strain a point, to exceed the reasonable limit; make an exception or concession, as of a rule in business, or a position in an argument. — **Tressed point,** a lace made of human hair. — **Tritactic, quadratitactic, quinquetactic, sextactic, etc., point,** a point where two plane curves have three, four, five, six, etc., consecutive points in common. — **Vellum point,** lace worked on a pattern drawn on parchment, to correspond with which the main lines of the threads are laid; hence, needle-point lace of almost any sort. — **Venice point.** Same as *rose-point*: indicating both the lace itself and the method of working it. — **Vowel points,** in the Hebrew and other Eastern alphabets, certain marks placed above or below the consonants, or attached to them, as in the Ethiopic, representing the vocal sounds or vowels which precede or follow the consonant sounds.

W. Made with the needle: said of lace. Compare *needle-point*.

The principal point (I. e., strictly, needle-made) laces are the ancient laces of Italy, Spain, and Portugal, and the more modern lace of France, called point d'Alençon.
Industrial Arts (S. K. Handbook), p. 261.

point¹ (point), *v.* [*< ME. pointen, poyneten, < OF. (and F.) pointer, poynier, also pointier = Pr. ponchar = Sp. puntar, also puntuar = Pg. pontuar = It. puntare, point, = D. punten, point, sharpen, punteren, stipple, point, dot, = MLG. punten, appoint, settle, fix, = G. punkten, punkten (also punktieren, punctieren = Sw. punktera = Dan. punktere, < F.), point, punctuate, stipple, dot, < ML. punctare, also puncturare, prick, punch, point, mark, < L. punctum, neut., punctus, m., a point: see point², *n.*] *I. trans.* 1. Afterward they prile and poynlen
The folk right to the bare boon.
Rom. of the Rose, I. 1068.

2. To supply or adorn with points. See *point*, *n.*, 19.

And pointed on the shoulders for the nonce,
As new come from the Belgian garrisons.
Sp. Hall, *Satire*.

3. To mark with characters for the purpose of separating the members of a sentence and indicating the pauses; punctuate: as, to point a written composition. — **4.** To direct toward an object; aim: as, to point a gun; to point the finger of scorn at one.

The girl recognized her own portrait without the slightest embarrassment, and merely pointed her pencil at her master.
H. W. Preston, *Year in Eden*, VIII.

5. To direct the observation or attention of.

Whoever should be guided through his battles by Minerva, and pointed to every scene of them, would see nothing but subjects of surprise.
Pope.

6. To indicate; show; make manifest: often with *out*.

But O vain judgement, and conditions vain,
The which the prisoner points unto the free!
Spenser, *F. Q.*, IV. xii. 11.

Are. What will you do, Philaster, with yourself?
Phil. Why, that which all the gods have pointed out for me.
Beau. and Fl., Philaster, I. 2.

And will ye be as kind, fair may,
As come out and point my way!

The Broom of Cowdenknows (Child's Ballads, IV. 46).
What a generous ambition has this man pointed to us!
Steele, Tatler, No. 251.

7. To indicate the purpose or point of.

If he means this ironically, it may be truer than he thinks. He *points* it, however, by no deviation from his straightforward manner of speech.
Dickens.

8. To give in detail; recount the particulars of.
Of what wight that stant in swich disjoynte,
His wordes alle or every loke to *pointe*.
Chaucer, Troilus, III. 497.

9. In *masonry*, to fill the joints of (brickwork or stonework) with mortar, and smooth them with the point of a trowel: as, to *point* a wall: often with *up*.
Point all their chinky lodgings round with mud.
Addison, tr. of Virgil's Georgics, IV.

10. To give a point to; sharpen; forge, grind, file, or cut to a point: as, to *point* a dart or a pin; also, to taper, as a rope (see below). Hence—
11. Figuratively, to give point, piquancy, or vivacity to; add to the force or expression of.

There is a kind of drama in the forming of a story, and the manner of conducting and *pointing* it is the same as in an epigram.
Steele, Guardian, No. 42.

Beauty with early bloom supplies
Her daughter's cheek, and *points* her eyes. *Gay.*
He left the name at which the world grew pale
To *point* a moral or adorn a tale.
Johnson, Vanity of Human Wishes, I. 232.

With joys she'd grieve, had troubles in her course,
But not one grief was *pointed* by remorse.
Crabbe, Works, I. 93.

To *point* a rope, to taper a rope at the end, as by taking out a few of its yarns, and with these working a mat over it, for neatness, and for convenience in reeling through a block.—To *point* a sail, to rig points through the eye-let-holes of the reefs in the sail. [Rare].—To *point* the leaders, in *four-in-hand driving*, to give the leaders an intimation with the reins that they are to turn a corner.—To *point* the yards of a vessel, to brace the yards up sharp: often done when steaming, to expose less surface to the wind.

II. *intrans.* 1. To indicate direction or direct attention with or as with the finger.

They are portentous things
Unto the climate that they *point* upon.
Shak., J. C., I. 3. 32.

This fable seems to *point* at the secrets of nature.

Bacon, Physical Fables, vii., Expl.

Their neighbors scorn them, Strangers *point* at them.

Dekker, Seven Deadly Sins, p. 15.

Thus having summarily *pointed* at things which Mr. Brewster (I think) hath more largely write of to Mr. Robinson, I leave you to the Lords' protection.

Cushman, quoted in Bradford's Plymouth Plantation, p. 38.

2. To lead or direct the eye or the mind in some specified direction: with *to*: as, everything *points* to his guilt; to *point* with pride to one's record.

None of these names can be recognised, but they *point* to an age when foreign kings, possibly of the Punjab, ruled this country by satraps.

J. Ferguson, Hist. Indian Arch., p. 151.

How Latin, together with Greek, the Celtic, the Teutonic, and Slavonic languages, together likewise with the ancient dialects of India and Persia, *points* back to an earlier language, the Mother, if we so may call it, of the whole Indo-European or Aryan family of speech.

Macmillan's Mag., I. 35.

Everything *pointed* to a struggle that night or early next morning.

Cornhill Mag., Oct., 1888.

3. To indicate the presence of game by standing in a stiff position, with the muzzle directed toward the game. See *pointer*, 1 (c).—4. To show positively by any means.

To *point* at what time the balance of power was most equally held between the lords and commons at Rome would perhaps admit a controversy.

Swift, Contests and Dissensions in Athens and Rome, III.

5. In *surg.*, to come to a point or head: said of an abscess when it approaches the surface and is about to burst.—6. In *printing*, to make point-holes in the operation of printing, or to attach printed sheets on previously made point-holes; in *bookbinding*, to put printed sheets on pointing-needles.—7. *Naut.*, to sail close to windward: said of a yacht.

*point*²⁴ (point), *v. t.* [By aphoresis from *ap-point*.] To appoint.

First to his Gate he *pointed* a strong guard.

Spenser, Mother Hub. Tale, I. 1115.

Go! bid the banns and *point* the bridal day.

Bp. Hall, Satires, IV. I. 124.

Has the duke *pointed* him to be his orator?

Shirley, Love's Cruelty, II. 2.

pointable (poin'ta-bl), *a.* [*point* + *-able*.] Capable of being pointed, or pointed out.

You know, quoth I, that in *Ellas'* time, both in Israel and elsewhere, God's church was not *pointable*; and therefore cried he out that he was left alone.

J. Bradford, Works (Parker Soc.), I. 552. (Davies.)

pointal (poin'tal), *n.* [*F. pointal*, strut, girder, prop, *OF. pointal, pointel*, a point, = *Sp. puntal*, a prop, stanchion, < *ML.* as if **punciale* (†), < *L. punctum*, point: see *point*. Cf. *pointel*.] 1. A king-post. *Imp. Dict.*—2. Same as *pointel*, 2.—3. Same as *pointel*, 3.

point-blank (point'blank'), *n.* [*F. point blanc*, white spot: *point*, point; *blanc*, white: see *point*¹ and *blank*.] 1. A direct shot; a shot with direct aim; a point-blank shot.

Against a gun more than as long and as heavy again, and charged with as much powder again, she carried the same bullet as strong to the mark, and nearer and above the mark at a *point blank* than theirs.

Pepys, Diary, IV. 156.

2. The second point (that is, that furthest from the piece) at which the line of sight intersects the trajectory of a projectile.

When the natural line of sight is horizontal, the point where the projectile first strikes the horizontal plane on which the gun stands is the *point-blank*, and the distance to the *point-blank* is the point-blank range.

U. S. Army Tactics.

point-blank (point'blank'), *adv.* [An ellipsis of *at point-blank*.] Directly; straight; without deviation or circumlocution.

This boy will carry a letter twenty mile as easy as a cannon will shoot *point-blank* twelve score.

Shak., M. W. of W., III. 2. 34.

There is no defending of the Fact; for the Law is *point-blank* against it.

N. Bailey, tr. of Colloquies of Erasmus, I. 408.

Pope, Imit. of Horace, II. I. 76.

They cast about them their *pointed* antitheses, and often subalided into a clink of similar syllables, and the clinch of an ambiguous word.

I. D'Israeli, Amen. of Lit., II. 352.

Pointed arch, an arch bounded by two arcs each less than 90°. The arch of this form is characteristic of European medieval architecture from the middle of the twelfth century, though examples of its use occur earlier. Its logical and consistent use was devised and perfected in France. The *pointed arch* of much Oriental architecture is an independent development, which never led to the logical conclusions and constructive methods of the French *pointed* architecture. See *Pointed style*, below.

Gothic architecture differs from Romanesque far more fundamentally than by the use of *pointed arches* in place of round arches, or by the substitution of one decorative system for another.

C. H. Moore, Gothic Architecture, p. 7.

Pointed ashler. See *ashler*, 3.—*Pointed box*, in *mining*, a box in the form of an inverted pyramid, forming one of a series of three or four, and used for dressing ore according to the method devised by Von Rittinger. Also called a *V-box*, and frequently by the German name *Spitzkasten* (that is, 'point-box').—*Pointed cross*, in *her.*, a cross having every one of its four arms pointed abruptly, or with a blunt point, differing from the cross *fichée* of all four, which is like a four-pointed star.—*Pointed style*, in *arch.*, a general phrase under which are included all the different varieties of advanced medieval architecture, generally called *Gothic*, from the common application of the *pointed arch* and vault in the twelfth century until the general diffusion of Renaissance architecture toward the beginning of the sixteenth century. This style, as fully developed by the middle of the thirteenth century, exhib-

its great flexibility and adaptability to all purposes, and is thoroughly in accord with the conditions imposed upon the architect by northern climates, which demand, among other things, spacious and well-lighted interiors for public meetings, and high-pitched roofs which can shed rain rapidly and upon which heavy masses of snow cannot lodge. While the *pointed arch* and vault are the most obvious characteristics of this style, they are in fact merely necessary details of it. It is fundamentally a system of construction in stone in which a skeleton framework of ribs and props forms the essential organic part of the building. All the weights and strains are collected in a relatively small number of points, where the loads are sup-
